JAPANESE LINER SINKING IN SANDS

Tenparisan Maru Not Floated Since It Foundered

COPALIS, Wash., Jan. 31. (UP)—Slowly sinking in the sands, the wrecked Japanese steamer Tenparisan Maru, stands today a monument to the many lives lost in shipwrecks along the Oregon and Washington coast lines.

The Tenparisan Maru went ashore, during a gale, Thanksgiving Day, 1927. The spot where the distressed steamer lies is at the mouth of the Copalic River, a stream non-navigable by sea-going craft, a mile north of this little beach resort.

Tales of Shipwrecks

Many a beachcomber and veteran of the seas here told tales of shipwrecks on the North Pacific coast dating back to the wreck of the steamer Brother Jonathan, which foundered July 30, 1865, a few miles south of the Oregon coast, with a loss of 155 lives.

Several years ago the steel barge W. J. Pirre foundered north of Destruction Island in the Giants' Graveyard. Today, along the rock bound coast, graves of a few of the victims can be found, buried there by members of the Quillayute Indian tribe.

Another Story Told

Another story told is that of the wreck of the British steamer Bawnmore, which struck the coast between Bandon and Cape Blanco in Curry County, Oregon, September 1, 1895. In those days beachcombers lived along the coast line waiting for ships to wreck. Besides the clothing and foods salvaged from the Bawnmore, a street car, being shipped aboard the vessel from Glasgow, Scotland, to Calao, Peru, was brought ashore. It is said to be the first and only trolley seen in that section of the northwest.

Neahkanie mountain, located on the Oregon coast, has been visited by many ships in past years, claiming as its prey, the lives of many men.

235 Persons Lost

The greatest loss of life, caused by the foundering of a vessel off this coast line, was the sinking of the American steamer Pacific, November 4, 1875. The disaster occurred approximately 30 miles south of Cape Flattery, with more than 235 persons losing their lives.

With the coming of the coast guard, the loss of life from sea disasters in this section of the Pacific Coast has been low compared with that of former years.

In 1919, the trim, five-masted schooner Jannette Caruthers, foundered in a gale eight miles south of here with a loss of nine lives. The weather beaten hull of the once proud sailer is practically covered with the sands.

As the years roll by, the Tenparisan Maru, too, will probably have become buried in the sands of the beach, protecting its remains from further battery by the lashing breakers.

Phil Scott Is To Meet Sandwina In Heavyweight Fight

LONDON, Jan. 31. (UP)—After a lay-off of nearly ten months, Phil Scott, heavyweight champion of Britain, has condescended to enter the ring tonight at the Albert Hall, where he will attempt to halt the progress of Ted Sandwina, the German-American heavyweight, who has won his last 13 fights by the knockout route. The bout is scheduled for 15 rounds, stake money and purse amounting to \$17,500.

Developing Protege

Scott's last fight was with Roberto Roberti at Madison Square Garden and Scott beat the big Italian on points. Since then Phil has not participated in any bouts, but he has by no means been inactive. He has been busy coaching and developing his protege, Eddie Steele, whom Scott thinks will develop into a promising heavyweight.

Although Scott is popular with the fight fans, his opponent, Ted Sandwina, has a big following in the east-side of London. Sandwina has cleaned up all Britain's heavyweight aspirants, and in addition, has knocked ambition out of a number of Europe's heavyweights. He has developed a terrific punch in each hand, and only recently he performed the rare feat of knocking out his opponent in one round with a straight left. Ted is making no secret of the fact, that he is relying solely on his hitting powers to beat "Long Phil." However, Scott is confident he will be able to give his opponent a scientific boxing lesson and prove he is still Europe's best at his weight. Scott is very keen on another trip to the United States, and he fully realizes he will not be wanted there if he loses to Sandwina.

Star Preliminaires

Promoter Harry Jacobs is also (Continued on page 8)

Livestock Outlook Found To Be Good

AUSTIN, Jan. 31. (Special)—Live stock conditions in Texas are generally favorable and the outlook is bright for the first part of the year, at least, according to Bernard Nichols, editor of the Texas Business Review, issued monthly by the Bureau of Business Research at the University of Texas.

"Shipments to the Fort Worth markets in December were the smallest for a long time, all classes of animals except hogs showing large declines," Mr. Nichols said. "Shipments to that market were but 125,916 head, compared to 175,253 head in November and 173,790 head in December, 1927."

"The winter in Texas so far has been very mild and ample moisture has been available in most sections of the state to maintain ranges and pastures in good condition. As a result, animals have been holding up exceptionally well, and feeding has been rather limited except to thin animals and calves."

Jazzmania Hits Berlin Like Tornado

Wagnerian Tradition Is on the Discard

BERLIN, Jan. 31. (UP)—Jazzmania is sweeping Berlin like a tornado. The German capital which, together with Vienna, enjoys the reputation of Europe's most distinguished musical center, is finding its dignified Wagnerian tradition menaced by the encroachments of syncopated, moaning, finger-snapping melodies.

Distinguished Exponents

Distinguished exponents of German culture have vainly tried to stem the jazz tide, which has been invading the stage, cabarets, hotel lobbies, radio microphones, cafes, country inns and the highways and byways of the country. Germany's leading statesman, Dr. Gustav Stresemann, is one of the most bitter enemies of jazz and on many occasions, has publicly heaped abuse upon what he considers this scourge of American disharmony.

Onward March

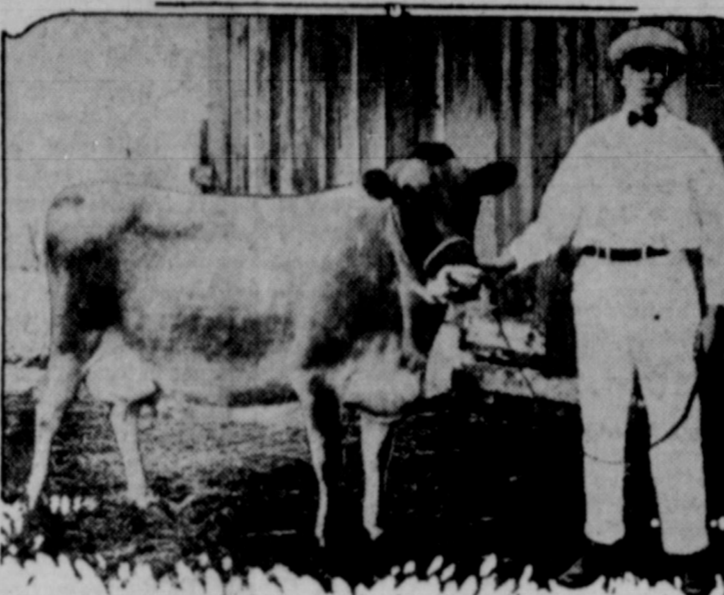

The onward march of the saxophone, however, has broken through the "Hindenburg line"

and captured the German capital. Shoppers in Berlin during the holiday season gave fresh evidence of the growing popularity of jazz. The manager of one of the biggest phonograph stores in Berlin estimated that 5,000,000 phonograph records were sold in this city within a few days. He said that the latest tango "jazz hit," a Viennese tune called, "I Kiss Your Hand, Madame," was sold to 500,000 Berliners during the recent Christmas shopping week. The Americanized clientele of the phonograph-record shops asked for this melody, sang, whistled, drummed and whistled—and they got it.

Jazz Is Favorite

Favorite German Christmas carols, such as "Silent Night, Holy Night," were a poor second to the feet-shuffling jazz record. Among the sales of operatic music, "Walkure," "Rigoletto" and "Martha," were the favorites, but their popularity lagged far behind that of the singing saxophone product.

Boy, 15, Raises World Champion

Hilson Guier, 15, of Farmington, Ky., is the first member of Uncle Sam's calf clubs for boys and girls to own and test a world champion. He is shown above with Proud Prince's May, his three-year-old Jersey, whose official 305-day record of 12,624 pounds of milk and 784.04 pounds of butter fat sets a new high mark.

ICE CREAM AND CAKE DAY GOES OVER BIG AT COOKING SCHOOL

This afternoon was cake and frozen dessert day at the cooking school sponsored by The Democrat, and Mrs. Leona Rusk Ihrig, the lecturer and demonstrator in charge of the school, lived up to her national reputation as a culinary expert without an equal. To make the afternoon complete, 10 gallons of the famous Gate City ice cream from the Gate City Creamery at Childress were at the disposal of the largest crowd as yet recorded during the four days the cooking school has been functioning.

Supply of Cones

The cream was accompanied by a generous supply of cones and it was served in this manner. The delicious cake made by Mrs. Ihrig served as the proper medium for enjoying the ever-famous dessert. The dessert prepared by her was beautiful to behold and she attributed its success largely to the fact that it was frozen in the General Electric refrigerator which she has used throughout the school.

Nothing Very Fancy

In her lecture, Mrs. Ihrig told the women present that she was laying very little stress on what is termed as the "fancy" things prepared in the kitchen, but rather, she wanted to show them how to prepare better and with a minimum of effort the foods they were accustomed to serve.

Cakes, those culinary bits of delight on which so many housewives pride themselves were thoroughly discussed by Mrs. Ihrig. She discussed all sorts and kinds of cakes, those with elaborate decorations and those without. Angel food cake held the center of attention and it was the baking of this cake in all its dainty loveliness and goodness that occupied a considerable part of the lecture.

Many women were heard to remark that they had not missed a single lecture and demonstration and were only sorry that the school is to be brought to a close on Friday afternoon.

Interest Demonstrated

Although the women have followed Mrs. Ihrig closely during each session of the cooking school, more interest was demonstrated in the "cake day" than any of those preceding. Mrs. Ihrig noticed this fact and commented upon it. She said it was but natural for women to concern themselves particularly with the baking of cakes and the serving of desserts as these articles of food serve to finish off any well ordered meal, whether it be for a family gathering or a club party.

After the cooking school lecture and demonstration was finished this afternoon, the staff of The Democrat was treated to some of the delicious ice cream and cake that made several of the staff members admit that there is more (Continued on page 8)

Artist of Russia Uses Human Hair In His Portraits

BERLIN, Jan. 31. (UP)—Russia has presented another novelty to the world—a portrait and landscape painter, Gregori Boruchoff, who uses human hair in place of the customary oils and pigments in "painting" his pictures.

Boruchoff's unique works, which at first glance appear indistinguishable from pictures actually done in oil, have been displayed at many private showings and in several of the smaller European museums and galleries. When on a visit to Berlin recently, he expressed the hope of being able to show his portraits in America sometime in the near future.

Apprentice Hairdresser

Born 42 years ago in Chernigoff, Ukraine, Boruchoff became an apprentice hairdresser when he was 10 years old, ultimately reaching the elevated estate of hairdresser for the famous Russian theatrical cast of the Brothers Adelheim.

It was while working at his chosen profession in Chernigoff 22 years ago that he stumbled upon the art of "hair-portraiture." His initial attempts to perfect the art failed, however, and it was not until he found himself supplied with an overabundance of leisure in 1915 when he was a prisoner of war in an Austrian camp—that he succeeded in developing his knitting technique and his judgment of color values to a point where he could "paint" to his personal satisfaction. He was assisted in his studies at that time by a Swedish member of an American prisoner's relief committee, who obtained money and the requisite materials for him.

Explains System

During his recent visit here Boruchoff explained his system of "hair-portraiture." His canvases is a piece of silk or linen cloth (Continued on page 8)

Gallagher Will Be Utilities Officer

ABILENE, Jan. 31. (Special)—Dan A. Gallagher of Clinton, Illinois, was elected secretary-treasurer of the West Texas Utilities Company at a meeting of the board of directors. R. M. Wolfe, who has held this position since 1923, was named auditor of the company. H. A. Lepper, who has been acting auditor for some time, becomes assistant auditor. These changes become effective February 1.

Illinois Graduate

Mr. Gallagher, who is a graduate of the University of Illinois, formerly was in the treasurer's department of the Central Illinois Public Service Company. For nearly three years he was with Arthur Young & Company, internationally known accountants, and for a year he was assistant to the treasurer of the Central & Southwest Utilities Company of Dallas.

Mr. Wolfe came to the West Texas Utilities Company in February 1923 from the Commonwealth Public Service company of Fort Smith, Arkansas.

Ruth Elder Wins Her Spurs In Movies

Noted Aviatrix Will Play In Westerns

HOLLYWOOD, Jan. 31. (UP)—Ruth Elder, it appears, has won her spurs and will be a member of the motion picture colony indefinitely.

The noted aviatrix has signed for a series of pictures with Hoot Gibson, the Western star, who produces his own films for Universal release.

Feminine Leads

Playing feminine leads in the two-gun thrillers may not be the ultimate in screen stardom but it is remunerative and it requires box office appeal.

Before Gibson contracted Miss Elder he made sure of the box office by addressing 1000 inquiries to exhibitors in large and small cities all over the country. With one exception these exhibitors reacted favorably to her.

Development Interesting

The development is interesting since it brings Miss Elder as one of the first of widely publicized persons—not actors—to become successful on the screen.

AIR TRAVEL TO BE AIDED BY RADIO

Engineer of Government Outlines Need For Service

NEW YORK, Jan. 31. (UP)—The future development of commercial air travel is virtually dependent upon the use of radio, in the opinion of Dr. J. H. Dellinger, chief of the radio section of the U. S. Bureau of Standards, who addressed the winter convention of the American Institute of Electrical Engineers today. Dr. Dellinger said the percentage of aviation accidents resulting from hazards of weather was due to the slowness with which radio aids to air navigation have been advancing.

"Radio seems the answer to those hazards," Dr. Dellinger concluded, "and there is ground for hope that not only this percentage of accidents but the whole number of accidents will become vanishingly small when the present possibilities of radio are realized in practice."

Limitations Overcome

Dr. Dellinger pointed out that genuine service will not be available until the air traveler may count on schedules as regular as railway trains maintain, independent of weather or other contingencies. All other limitations arising in a fair way to be overcome, he said, yet air traffic comes to a standstill when low visibility prevents the pilot from seeing landmarks or lights on the ground. A pilot may continue to fly in a fog, Dr. Dellinger said, by use of such instruments as the altimeter, turn indicator and compass, but it is only by means of radio that he can be certain of keeping to a given course and find the landing field when the ground is invisible.

Radio Beacon

The radio beacon system which is being established on the airways of the United States is destroying the fog menace, Dr. Dellinger declared, and when this system is fully established, he pointed out, there is every reason to believe that the last great obstacle to safe flying will have been conquered, scheduled flights will be dependable, the passenger flying can be considered established as a serious service.

Describes Means

Dr. Dellinger described some of the means by which radio could be employed as an aid to air navigation for the flyer not traveling the regular airways. The first of these systems utilizes direction-finding stations on the ground which determine the direction of the airplane, combine their calculations and by triangulation determine the plane's position, which is then communicated to the pilot. A second method is the use of a radio direction-finder on the airplane. The pilot steers a course in the indicated direction of the radio station on the ground, and can be certain of reaching that point. The third method described by Dr. Dellinger employs the (Continued on page 8)

No Connection Is Observed Between Man and Monkeys

WASHINGTON, Jan. 30. (UP)—There is no connection between the origin of man and monkey, Dr. Austin H. Clark, Smithsonian Institution scientist, told the United Press today in explaining his new theory of life just announced in the quarterly review of Biology.

Dr. Clark, noted throughout the world for his biological research, upholds the Biblical idea of creation of man and combines it with a radical theory of evolution.

Man is an accident, appearing on earth before the dawn of history substantially the same as he is today, the biologist asserted.

Clark's Theory
Dr. Clark's theory—a startling one for a man of science—is expected to create a furor similar to that brought about when Darwin published his ideas on evolution.

He takes the carefully gathered Darwinian evidence on the descent of man from an ape-like creature and unceremoniously discards it as unscientific.

"Man appeared in the Pliocene age, just preceding the Ice age. He appeared suddenly and in substantially the same form as he is today. There is not the slightest evidence of his existence before that time.

No Missing Links
"There are no such things as missing links, fossil skulls, which have been dug up and advanced as missing links showing connection between man and monkey, have all been shown as misinterpretations."

In his theory, Dr. Clark accepts neither the ideas of the creationists nor the evolutionists. Both are in error but the creationists have the better of the argument, he believes.

"Just what life is we do not know. All living substances are composed of elements found also in inorganic substances, though in the bodies of animals and of plants these elements are combined in forms peculiar to living substance, or to the products of living substance. So we may consider life as the ability, confined to groups of certain complex carbon compounds, to increase in bulk indefinitely in such a way and in such varied forms as shall enable the increase to take place to the best advantage."

Forms Dissimilar
All life tends to produce certain forms dissimilar to itself, the scientist said, and when these forms happen to be created under a favorable environment, they

serve as a new type of plant or animal.

From some quadruped, or maybe biped, man actually sprang, Dr. Clark offers as a theory, not an abnormality but in one broad leap to existence as man is known today. The environment was right and man lived. Dr. Clark believes that man may have been born and died many times until his creation happened under the right environment.

Vatican Expects Solution Of All Former Disputes

ROME, Jan. 30. (UP)—The Vatican looks for final, definite agreement between the Italian government and the Holy See for settlement of their long standing dispute after Easter.

A draft accord for the settlement has been reached by unofficial negotiations made by men who have been working on the problem since September and has been presented to the Pope for his consideration.

The accord has not yet been accepted, either by the Vatican or the government but its terms are reliably understood to be as outlined by the United Press Jan. 3.

Any report that the settlement has become final is premature. The Italian foreign office told the United Press today that the agreement had not been completed.

Vatican prelates handling the negotiations said:

"We do not look for a final definite agreement before Easter. Progress is constantly being made but no final accord has been reached."

A resume of the terms of the agreement as outlined is as follows:

1. The Italian government would cede a plot of territory west of the present Vatican to the Pope.

2. The Pope would have nominal sovereignty over the territory, although the government would attend to its civil administration.

3. Italy would agree to pay one billion lire (\$52,300,000) as liquidation of church property which the Holy See since 1870 has maintained was despoiled.

4. Italy would send an ambassador to the papal court and the Vatican would send a Nuncio to the King's court.

The question of allowing the Vatican an outlet to the sea by ceding a narrow strip of territory from Rome to the coast was understood to have been abandoned because of its technical difficulties.

The agreement presumably would end the self-imposed imprisonment of the Pope in the Vatican. In that connection it is recalled the United Press was informed on high authority several months ago that the Pope's doctors had decided it would be necessary for him to get away from the Vatican during the hot months next summer, because of his health.

Oakland-Pontiac Production Will Touch High Level

CHICAGO, Ill., Jan. 31. (Special)—Production and sale of Oakland and Pontiac Sixes will touch the highest level in history during 1929. A. R. Glancy, president and general manager of the Oakland Motor Car Company, predicted here before 1,000 Oakland-Pontiac dealers at a banquet held in connection with the National Automobile Show.

Mr. Glancy stated that 1929 volume should show a sizeable increase even over the 260,000 cars built by his company during the past year—a record 35 per cent better than in any previous twelve months period in the 22-year existence of the Oakland company.

National Prosperity
National prosperity of an unparalleled order, and confidence evident from the huge corporation to the day laborer indicate that this prosperity will continue and should make 1929 the automotive industry's best year, Mr. Glancy declared.

Coupled with these basic reasons is the fact that the industry itself is better able this year than heretofore to stretch the purchasing power of the automobile dollar. Sales organizations are stabilized, Mr. Glancy pointed out, and research and engineering departments are working more intelligently, and new manufacturing methods and processes are enabling the volume producer to put additional equipment and refinements into his product at no advance over former prices.

Favorable Position
Mr. Glancy told the Oakland-Pontiac dealers that they are in a particularly favorable position this year in view of the high public interest shown in their two lines of cars according to the story revealed by sales figures. The new Oakland All-American Six, he said, despite having been announced during the dull selling

season, is rolling up the highest monthly sales figures recorded since the line first came on the market in 1907.

The new Pontiac "Big" Six similarly, is gathering orders at a rate that assures peak production throughout a good share of the year, the Oakland executive stated.

Fraternity Member Of Most Value Will Be Awarded a Gift

FORT WORTH, Jan. 31. (Special)—Alpha Zeta Pi, national honorary Romance language fraternity at Texas Christian University, has voted to present the most valuable member of the chapter each year with a gift imported direct from Spain or France. Selection of the most valuable member will be decided by secret ballot of the members, and the identity of the person will remain a secret until the annual banquet in May of each year.

Raymond Ballew went to Dallas Saturday night where he was met by his wife, who had been visiting relatives in Waco. They returned home early this week.

Mrs. Ernest E. Robinson returned home Saturday from Plainview where she had been visiting her son and daughter. She was accompanied home by Mrs. Lon A. Robinson and baby, Betty Jean, who visited for a few days returning home today.

J. W. McCulloch of Newlin, was a business visitor in Memphis Wednesday afternoon. While he was here McCulloch stated he was through gathering cotton and the several of the farmers were preparing their land for the coming crop.

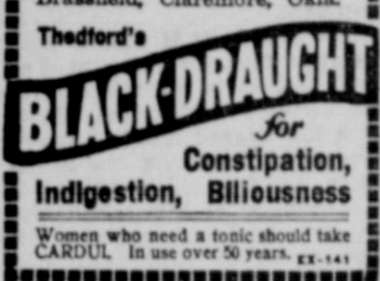

C. L. Goble returned Tuesday from Lubbock where he had been to make preparations for the moving of his family to that place. They will load out today and move to a farm two miles north and four miles west of the Technological College. Mr. Goble has been a successful farmer of Hall county for several years and the best wishes of his many friends go with him and family for their success in the new location.

CARD OF THANKS
We want to thank our many friends and neighbors for their kindness and help shown us during the illness and death of our darling son. Your kindness and sympathy extended us in this sad hour has been such a consolation. We also thank our friends for the beautiful floral offerings.
Mr. and Mrs. Grady Evans, and Family.

An Oklahoma Mother Says:

"BLACK-DRAUGHT is a fine medicine to give to children. I use it for mine whenever I need to give them a laxative. They don't mind taking it when I make it into a tea, and it quickly relieves constipation and the bad symptoms which come from it. I can recommend it to other mothers, for I have found it useful in my home."

"When I was a child my mother gave it to me whenever I complained of not feeling well. I have always taken it for upset stomach and constipation. It is about the only medicine I have to take. A few doses of Black-Draught, now and then, keep my system in order. My husband takes it, too. I hardly see how I could keep house without Black-Draught. It has become a standby with us, in keeping the children and ourselves well."—Mrs. Luther Brassfield, Claremore, Okla.

What is a double acting leavener? How can baking failures be eliminated? How can foods be made more delicious? How can costs be reduced?

These and many other important questions will be answered

at the **Demonstration Cooking School**

Come to the school this week and learn many new things about preparing and serving wholesome foods. There is a reason WHY bakings are soggy, tough or lack quality — improper leavening is generally responsible.

will explain, in an interesting and instructive way, just how every woman can avoid baking disappointments and supply her family with the most tempting and nutritious of foods. The methods she uses and shows you how to use, are the same that are employed by the world's greatest cooks. She gives you scientific facts—reveals the most advanced baking methods—instructs you exactly HOW to improve your bakings in a way that will surprise you. Of course, she uses

CALUMET
THE WORLD'S GREATEST BAKING POWDER
in preference to all other leaveners. And, you will, too, after becoming acquainted with its superior quality. Calumet is the highest grade leavener that can be produced. Contains only such ingredients as have been officially approved by U.S. Food Authorities. Absolutely pure. Economical in both cost and use.

Good-Morning Biscuits
baked in a jiffy
Just try this time-saving scheme and we'll wager your family will have hot biscuits for breakfast often.
Whenever you make biscuits for the evening meal, mix up enough extra dough for the following morning. Have your biscuits all cut out, put them in the pan and keep them overnight where it's cold. All you have to do the next morning is to heat your oven and bake them.
Try this tested recipe for biscuits given below. Made with Crisco they are light, tender, fluffy and snowy-white. And, of course, their flavor is sweet. How could it be otherwise when the flavor of Crisco itself is so sweet and fresh?
2 cups bread flour 1/4 cup milk or water
3 teaspoons baking powder (for "drop" biscuits)
3/4 teaspoon salt 1/2 cup milk or water
4 tablespoons Crisco (for "rolled" biscuits)
Sift dry ingredients together 3 times. Work Crisco in with fork. Add liquid gradually.
Form dough into shape, roll 1/4 inch thick, cut. For some-shaped biscuits, cut squares, then diagonally in half. Brush top of biscuits with melted Crisco or milk. Bake in hot oven (450° F.) 13 to 20 minutes. Makes about 12 biscuits.
Taste Crisco
Then you'll understand why its own sweet, fresh flavor so improves the taste of your cakes, pies, hot breads, cookies and fried foods.
Crisco is a great time-saver. Easy to cream, easy to mix—winter or summer.

UTURE IS FOR WORKERS

Women To Be Med

Jan. 31 (UP) for humanitarian minimum wages for women is foreseen by the Bureau of the Labor Department.

has completed legislation during the past year.

has placed a legal ceiling on wages for women not only in all states but by the Federal Government.

but are subject to constant pressure, and their effect, it is said.

that today many of their experience minimum wages is it said.

ment in regulations were put into effect after the passage of the National Labor Relations Act.

countries minimum wages applicable to men in certain industries, the laws have been amended to include women and minor children.

Improved minimum wage laws were passed in 1912 following the passage of the "Child Labor Act" in the United States, which set a minimum wage for children.

passed in 1912 setting a minimum wage for children in California, Minnesota, Nebraska, Washington, Oregon, Arkansas, Puerto Rico, and the District of Columbia.

amount of wages sought to be a 'living wage' for some of these states amount as a minimum wage could be changed by the law. Others have shifted wages with economic conditions.

avor with which it is regarded in the past, it still remains to be seen whether the new laws have made any difference.

been unable to give every worker a standard of living which has improved in the past.

Brother of Earl Is Sheep Shearer

VANCOUVER, Jan. 31. (UP) —The brother of an earl works as a sheep shearer here. Not only that, but he is a very good sheep shearer and seems to enjoy the work, since he is the only man on the job who has ever remained more than 18 months.

That is the report from Burns & Co., Ltd., stockyards on George Perceval, younger brother of the newly elevated Earl of Egmont, Alberta rancher who recently inherited the title and an estate valued at \$1,000,000.

Of Simple Tastes Perceval is a man of simple tastes and has no love for publicity. When sought out he retired somewhat hastily from discussion of family affairs. And when he glimpsed an accompanying photographer he quickly fled.

A small spare man with a tiny black moustache, he is about 50 years of age. He was wearing blue overalls and a jumper coat, mud-spattered working boots, and crowning his costume was a battered felt hat.

Years on Prairies Perceval said he had spent years on the Canadian prairies, punching cattle and handling heavy range work. He came here three years ago from Priddis at the time of his mother's death, selling his half interest in the ranch to his brother.

"I came to Canada with him," he said in discussing the new earl, "and I worked with him all the way across the country. I ranged across the road with him for years until mother died and then I decided to go away. We weren't surprised to see him become an earl—but you'll have to ask him about the rest of the story."

ENDEAVORERS HAVE LARGE ATTENDANCE

The intermediate Christian Endeavorers of the First Christian Church had a splendid attendance at their meeting last Sunday. Interest was fine, especially at the period set apart for election of officers for the next six months. Officers elected were: President, Grace Ogden; vice-president, B. F. Shepherd, Jr.; secretary, Mary Gardner; treasurer, Frances Ogden; pianist, Dorothy Jones.

A special program will be given Sunday night celebrating the forty-eighth anniversary of Christian Endeavor.

Mason Suffered For 15 Years Then He Found Sargon

"For fifteen years I suffered from a complication of troubles that I believe started with an inactive liver. I was weak, nervous and generally rundown. I frequently had sharp, shooting pains in my side. My sleep was poor and I lost weight, strength and energy. Nearly everything I ate caused indigestion. I took a trip to Hot Springs, but got no relief there, and then I visited several health resorts in the North seemingly without benefit.

"A friend of mine told me about the fine results he had gotten from Sargon and Sargon Soft Mass Pills, so I bought a bottle. I could see a difference for the better from the first few doses. I began to sleep better and to eat anything I wanted.

"I now feel like a new man.

My appetite is fine. The pains in my side have disappeared. I am not the least bit nervous, and am full of new energy. I have gained weight and my friends are all commenting upon my wonderful improvement. "Sargon Soft Mass Pills are wonderful. They ended my constipation and biliousness without gripping in the least. "I wouldn't be without Sargon if it cost twenty dollars a bottle." The above remarkable statement was made by A. J. Mason, residing at the Colonial Hotel, Fort Worth and owner of considerable property, in that city. Sargon may be obtained in Memphis from Tarver Drug Co.

E. V. Massey and family who have recently moved to Hall county from Fannin county, are making their home in Memphis at present and will probably locate in or near Memphis and be one of our citizens in the future. We are glad to welcome them. Z. T. Beaty, ginner of Hedley, was a business visitor in Memphis Wednesday afternoon.

A NEW COMMANDER BY STUDEBAKER

finer, smarter, at a still lower price

\$1350 at the factory

NEW COMMANDER VICTORIA FOR FOUR, \$1375 at the factory. Bumpers extra

STUDEBAKER, builder of champions, introduces the greatest motor car ever built and sold at its price. Priced still lower, yet providing an even greater measure of every element that made The Commander the first truly great motor car of moderate price.

The racy, youthful style of The Commander interprets the speed, the power, the trustworthiness, which its gallant predecessor so dramatically demonstrated by traveling 25,000 miles in less than 23,000 minutes.

The new Commanders are lower—and look lower still. They ride more comfortably—they are roomier—their power reaches new heights of silken smoothness. The new Commanders are Studebakers—and champions. There are no finer credentials than these.

Ball bearing spring shackles • hydraulic shock absorbers • non-shatterable windshield • adjustable front seat, pedals and steering wheel • double drop frame.

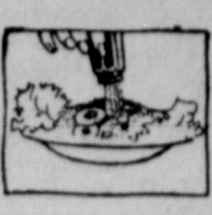

39 Studebaker-Erskine Models—\$835 to \$2575 at the Factory

Eight People Of Webster Narrowly Escape Injuries

Eight people of the Webster community had a narrow escape Sunday when the car in which they were riding overturned. None were seriously injured, but a few of them had minor bruises and scratches.

The accident happened on the cap between Silverton and Quitaque, and was caused from a flat tire. The car turned completely over and lighted on its top, breaking only one glass in the car.

Those in Car

Those in the car were J. O. McMurry, Miss Mayme Ratcliff, principal of Webster school, Miss Dorothy McMurry, driver of the car, Miss Katie Belle Brown, Miss Ora Mae Swigler, Miss Cora Belle Nash, Miss Bernice Roan, and Miss Flay Wheeler, all of the Webster community.

SIX FIREMEN HURT IN LAUNDRY BLAZE

CHICAGO, Jan. 31. (UP)—Six firemen fighting a fire in a large laundry were trapped beneath a falling brick wall here today. They were removed a short time later. Fireman John Carey died in an ambulance on the way to a hospital. Five of his companions were severely burned and received internal injuries.

MRS. WEBSTER HOSTESS TO ATALANTEAN CLUB

Mrs. C. R. Webster delightfully entertained the Atalantean Club Monday, January 28, with a luncheon, celebrating the anniversary of the club. Vases and baskets of red and white carnations and roses added to the attractiveness of the rooms. Beautifully decorated 1929 calendars were used as place cards for the following: Mesdames S. A. Bryant, W. P. Dial, W. C. Dickey, W. P. Dickson, W. B. Deberry, C. W. Broome, E. S. Foote, S. B. Foxhall, L. M. Hicks, N. A. Hightower, T. T. Harrison, C. W. Kinslow, John Lofland, D. A. Neeley, James Norman, Frank Phelan, S. L. Saago, O. V. Alexander and C. R. Webster. Unique favors were presented by the hostess to all present representing the month of their birth.

At 7 o'clock the members of the club entertained their husbands with a turkey dinner, after which 42 was enjoyed.

Local and Personal

Mr. and Mrs. Ed Crump and family of Estelline were Memphis visitors Wednesday afternoon.

H. E. Franks of Ramsdell, is transacting business in Memphis today.

Mrs. D. L. Cooper and daughter, Mrs. Glynn Thompson, departed today for Colton, California, where they will visit for about three months with Mrs. Cooper's brother, Attorney T. T. Clark. Glynn will also make a visit to California about April for a few days after which they will return to Memphis.

Jet W. Brumley departed today for his home at Pampa after a short visit with his parents, Mr. and Mrs. J. H. Brumley.

Mrs. A. A. Long and daughter Miss Ida Mae left this morning for Compton, California, where they will spend two months visiting their son and brother, Sam Long.

Mrs. M. N. Mosley left this morning for her home in Los Angeles, California, after several months visit here with her daughter and other relatives.

Scout Executive I. E. Jolly returned Wednesday from Dallas where he attended a two-day session of Scout officials of Texas and Oklahoma. He reports a great meeting.

Dr. S. S. Groener of Marshall, Texas, president of the Marshall College, was a Memphis visitor Wednesday.

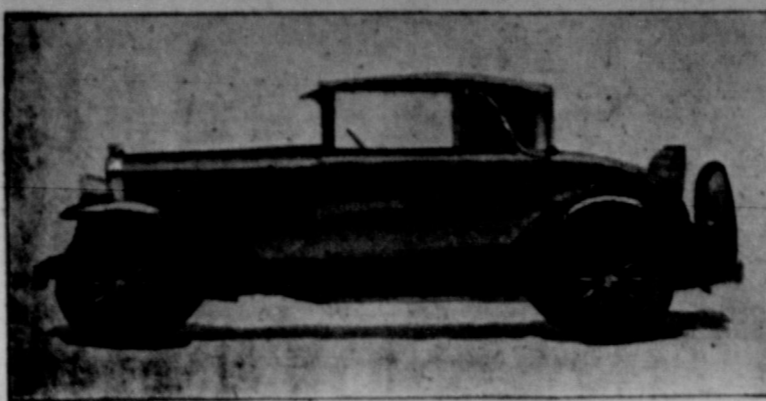

C. H. Brewer and children of Amarillo are here this week visiting relatives.

Fred C. Connally, district manager of the Westmorland company of Amarillo, is in the city today looking for a home to rent in order that he might make Memphis his headquarters.

Cal. Ash of Lockney, is in the city visiting his old friend, J. W. Wells. These two gentlemen were boyhood friends in Mississippi and have known each other for over fifty years. They are greatly enjoying the renewal of old acquaintance and talking over many happenings of their earlier days.

Youth Acquitted On Murder Charge

SEARCY, Ark., Jan. 31. (UP)—Thirteen year old George Smith was acquitted on a murder charge in connection with the fatal shooting of Clarence Dodge by a circuit court jury here today. Self defense was the plea entered by the defense, which was upheld by the jury.

The state charged the boy killed Dodge with his father's shotgun without warning. The evidence in the case showed that Dodge stopped in front of the Smith home and dared the youth to come out.

CHILDRESS

It's Major John Coolidge Now

The brilliant inaugural ball of Governor J. H. Trumbull of Connecticut was marked by the appearance of John Coolidge, son of the president and fiancé of Governor Trumbull's daughter, Florence, in the uniform of a major in the Connecticut National guard. Here is an intimate picture of the group of honor: Florence Trumbull, John Coolidge, Mrs. Trumbull and the governor.

ant does all the work, produces all the feed and gives the landlord half of the gross receipts. Many such tenants are negroes and they are making money for themselves and their landlords.

Wirt Carpenter, president of the Security State Bank, operates several farms on this basis. In 1927 one of his tenants milked 20 cows from which he and the landlord each received \$1,443.1. The tenant also made 19 bales of cotton the same year. The same tenant was on the same farm in 1926 but had no cows and that year he made only 11 bales of cotton. Another tenant of Mr. Carpenter's borrowed \$324 in February to make a crop and paid the note in July from milk checks. Another man bought 23 acres of land for \$750 all on credit and paid for it in two years from 12 milch cows and what cotton he could raise. Another landlord had 196 cows on eight different farms. These cows were all milked on the halves and the landlord's net profit was \$5,736 in one year's time. Numerous instances of this kind were given by the landlords to show that such a partnership is profitable to both landlord and tenant. Dairying has been very profitable to all concerned.

People Dairy Minded

The Starkville plant made more money the first year than any other plant because all the people were dairy minded and cooperated. Banks were very enthusiastic because they have had no trouble with the dairy business. Deposits in Starkville banks total \$2,300,000. There is \$1,000,000 in savings accounts in Starkville banks; new wealth created by milch cows say the bankers. There has been only three foreclosures by the banks of the town for cow loans in the past 15 years. There is not a credit merchant in town. Formerly nearly all business was credit business. The county was bankrupt in 1914.

In addition to the milk business which is far above a million dollars, the county still produces 600 bales of cotton per year and this cotton is produced on about one third of the land it was made on ten years ago because the dairy farmers are improving their soil. There is nothing being done at Starkville which cannot be done here in Texas.

Frank Daniel Is Buried With Full Military Honors

The funeral of Frank I. Daniel, who was killed in an automobile accident Tuesday night, eight miles south of Estelline, was held at Turkey Wednesday afternoon with full military honors.

Mr. Daniel, in company with three friends, was driving an Overland coupe when the accident occurred. The other occupants of the car were uninjured. Following the accident, Mr. Daniel was hurried to a local hospital, where he died shortly after his arrival.

Was Legion Member

Frank Daniel was 33 years of age and was a member of the Charles R. Simmons post of the American Legion. Members of the local post had charge of the services at the grave, they being Roy L. Guthrie, H. L. Nelson, Ray Martin, Lewis Wheat, R. L. Rodgers, E. W. Patrick, E. S. Shelley, W. F. Reed, Frank Van Pelt, T. A. Power and B. P. Blake of Estelline.

Fruits and Numerous Vegetables Moving To Market Rapidly

AUSTIN, Jan. 31 (Special)—Fruits and vegetables from Texas farms are moving to market fairly rapidly, according to Bervard Nichols, editor of the Texas Business Review, issued monthly by the Bureau of Business Research at the University of Texas.

"Normally the low point in loadings is reached in September, after which the trend is sharply upward until March or April," Mr. Nichols said. "This fall and early winter, crops have been a little later than usual, so that shipments have been rather light. Also prices in many cases were so low that only part of the crops were harvested. At this season of the year, most of the Texas loadings are in the Rio Grande Valley and in the Winter Garden area.

1,503 Cars Fruits

"There were 1,503 cars of fruit and vegetables loaded in the state during December, compared to 529 cars in November and 1,637

cars in December, 1927. Fewer cars of mixed vegetables, cabbage, sweet potatoes and tomatoes account for a large part of the decline. During the entire year of 1928, a total of 45,888 cars were sent to market, against 35,883 in 1927, or a gain of nearly 30 per cent. In addition to 45,888 cars, large quantities of green corn, brussels sprouts, parsley, beets, and many minor vegetables were shipped. No records are available for these loadings, but the amount is conservatively estimated at 5,000 cars. This makes a total of more than 50,000 carloads of fruit and vegetables shipped from Texas farms in the past year. There were also large quantities sent to market by truck that are not included in the car lot figures."

Young People Week Will Be Observed Starting on Feb. 3

The week, beginning February 3, will be known as Young Peoples Week in the Methodist church. The Senior League is sponsoring the program for the week. The Hi League and the Junior League society will also have a part on the program. The special meetings for the week will be a mother and daughter rally on Tuesday evening. All mothers and daughters of the church are invited. The Senior League will give a program at the prayer meeting hour Wednesday evening. A father and son rally will be held Thursday evening, at which time all fathers and sons of the church are invited to be present.

Dr. Ernest E. Robinson will speak to young people Sunday evening, February 10.

CAR OWNERS MUST PURCHASE LICENSES

Automobile owners who have not purchased their 1929 car licenses are requested by local officers to leave their cars in the garage after today, or until such licenses have been procured. It will eliminate trouble on the part of the officers, and embarrassment to the car owner by having to pay a fine in addition to the regular car tax. All cars, regardless of ownership, must carry the 1929 car license if driven on the streets or highways after today.

Thousand Citizens Hunt for Girl Who Is Thought Dead

TERRA HAUTE, Ind., Jan. 31. (UP)—The search for Edith May Dierdoff, news girl, believed to have been kidnapped and murdered, drew a thousand citizens from the countryside south of here today.

Two airplanes flew over the towns of Sullivan, Carlisle and Paxton, while police and citizens continued a systematic search of abandoned mine shafts and creek banks. Little hope of finding the girl alive is felt.

The girl has been missing since Sunday. Her news bag containing three papers was found beside a deep water hole under a bridge. The bag was marked with blood clots and matted hair.

is going to explain to you how you can cross this divide and make this long journey from 7 to 10 years a pleasure.

Do not miss hearing him as he will answer all questions asked him the same as he has all week. There will be no picture shown at this special performance.

OKLAHOMA CITY, Jan. 28. (UP)—Impeachment trial of Henry S. Johnston, suspended Oklahoma governor, was postponed by the Senate today until ten o'clock Thursday. At that time, demurrers on impeachment charges will be presented, Judge Thomas Owen, counsel for Johnston said.

1. A municipal auditorium.
2. More dairy cows for Hall County.
3. Modern creamery plant.
4. Paved highway across Hall County.
5. An adequate public library.
6. More paved streets.
7. Better police and fire protection in business and residential districts.

SPRING IS COMING, ETC.

AND now, after smoking our daily dozen cigars, we are in that contented frame of mind to write our annual editorial on Spring. We have been looking forward to this duty for several months and our thoughts have been gathering strength and the full force of that strength is about to be unburdened.

Spring—what a name and what a season! It has been coming with insistent regularity for these many years, yea, and they are many. Spring came long before there were men to know what it was all about. Even now, some of them do not fully appreciate this gorgeous, glorious, invigorating time of year (here may be added any other necessary adjectives.) Spring may be traced from the Archaean period, or the period when life is supposed to have dawned, through the Palaeozoic period, or age of coal plants, of fishes and invertebrates, on through the Mesozoic period, or age of reptiles, and extending through the Cenozoic period, or age of mammals, on down to the Quaternary period, when man in all his buxom skins and hides danced upon the scene.

Do what you will about it, or think what you may, it is the same old Spring, with the twittering of birds, the spreading of green and the rising of the sap in the animate and inanimate. That is one of our deep thoughts, but we will let that pass. Spring is about to begin to commence to happen and therein lies the pith of this writing.

A little early, you say, to predict the coming of Spring? Why not? When Winter comes, we have been taught that Spring is not far behind. This is winter isn't it? Well and good; now look out for Spring.

"In the Spring a young man's fancy—" you know that old stall. Go ahead and love—everyone loves something, whether it is a dog, cat, spouse or just an ordinary sweetheart. It takes a poet to tell about Spring as it really isn't. He or she sees and hears things that never happen outside the printed page, but poets have to be suffered. They suffer enough and misery loves company. Do not give us credit for the latter part of that thought for it is far from original.

This is a mighty cold day to be writing about Spring, but seasons are long suffering and so are our readers. This business of Spring will never get you very far. You may think you know what it is, but you are wrong. No one ever knows what Spring is until it is too late and then the knowledge is of small benefit. We might as well admit we know nothing whatever about it and that explains this editorial.

TOM LOVE AT THE BAT

THE honorable and venerable statesman, Mr. Thomas B. Love, is having considerable difficulty in getting over certain of his pet measures in the Texas Legislature. It will be recalled that Tom was one of the leaders in the Hoovercratic forces prior to the elections last November. He succeeded admirably in getting his name on the front pages of many of our far-seeing and worthy papers and he is certainly to be congratulated for this accomplishment.

Now, the same Mr. Love is trying to make the Legislature of this worthy commonwealth give the Democrats who voted for Hoover electors a clean bill of health. His measure has been termed "the freedom of conscience bill," but his dramatic gesture was roundly swatted by the good men and true who make laws for us faster than we can enforce those already on the statute books.

Alvin Moody of Houston, chairman of the Anti-Al Smith Democrats in the campaign last fall and Mrs. Claude De Van Watts, state president of the W. C. T. U. who took almost as prominent a part in the Hoover campaign, joined their pleas with those of Mr. Love in support of his bill, but the voices of these good people were definitely stifled by the committee and it now seems certain that the present Legislature, at least, is not going to vote a clean bill of health to those who bolted the Democratic ticket in the November primaries.

To our way of thinking, Mr. Love has had his say in Texas politics. Some are suggesting that he will be a candidate for

governor at the next election. Some good friend, who has Mr. Love's interests at heart, should whisper to him that he will waste a considerable portion of his valuable time, if he seeks to win the Democratic nomination for the office of chief executive of this state. We believe Mr. Love has certain of the qualifications for the office, but he certainly does not have all the requisites.

If the gentleman from Dallas thinks that he would receive all the votes, or any considerable portion of the ballots cast for Mr. Hoover, he is badly mistaken. Catholicism and prohibition defeated Mr. Smith in Texas, and the chances are that these two matters will not be injected into the next race for the governorship.

Mr. Love has been at the bat for a long time. Now, that he is advancing in years, it would seem expedient for him to retire from the field of action and let the Democratic party of this state try out a new battery.

"KIND HEARTS ARE MORE THAN CORONETS—"

It is a simple matter to be kind and considerate of others. We believe in speaking straight and going to the bottom of things, if the need arises, but we believe that reason, in bountiful measure, should be exercised—reason tempered with tact, farsightedness and good judgment. We have very little respect for a person who is always willing to agree with us. We much prefer to have a person be himself always, standing on his own feet and fighting for the principles he believes to be right, rather than straddling the fence and allowing indecision to get the upper hand of him.

Some of our best friends differ with us in matters religious, political, social and what not, but because we have a difference of opinion does not prevent us from being fast friends. We have received their convictions kindly and we believe they have received ours in much the same way.

This business of being kind is a little thing of itself, but the good that such a policy will do cannot be adequately measured. It is often a difficult job to be pleasant and affable when a person is overworked or burdened with many duties and obligations, but the man or woman who is getting the most out of life, will take the time necessary to be courteous and considerate of the feelings of others.

The biggest dividends do not come from financial investments, they do not come from the counting of coupons and the acquisition of bank stock, but the dividends that really are worthy of investment come from human experience.

The Rotary Club of this city has a loan fund which is available to certain deserving students to allow them to have a college education. This organization is investing in the future and the returns from such investments cannot be measured in dollars and cents, but in lives that have been directed in the right way and through the right channels. This club is showing a bigness of heart, a kindness of spirit, and a desire to serve that is wholly commendable.

It is not the big things that a person or organization does that always count for the most, but the little, helpful kindnesses make life really worth living and justifies our existence as a part of it. In the words of the poet:

"Kind hearts are more than coronets,
And simple faith than Norman blood."

Bowling Teams Are Making Ready For Tournaments of Year

MILWAUKEE, Jan. 31 (UP)—Abraham Lincoln "Abe" Langtry is preparing to go to Chicago to conduct another American Bowling Congress tournament.

For 24 years Abe has been secretary of the A. B. C. and for 24 years he has watched the tourney grow from an infant in which only a few dozen teams were entered to its present 2,000 team status.

Popularity Observed
Abe has seen bowling grow in popularity during his career and he has been pleased with the resultant growth of the A. B. C., that finally has become so big that it requires weeks to run it off. The tournament now is classed as the biggest indoor sporting event in the world.

The congress at Chicago this year may be bigger than the one at Kansas City last year, Langtry believes and he expects to see the popularity of the sport carry the Congress to continually bigger proportions.

Bowling is the one thing in which Abe has taken an active interest throughout this much of his life, and he expects to continue to arrange the schedules and suggest improvements in the rules of the congress.

'Landis' of Bowling
The friends of Abe say that he has been responsible for many improvements in the sport of the maple pins and he is universally credited with successfully running the A. B. C. since 1905 despite its increasing size and consequent unwieldiness.

Here in Milwaukee where Abe lives, he is known as "The Judge Landis of Bowling," and he is recognized as one of the leaders of the opposition to gambling at the national bowling meets. Abe has fought strenuously against "pools" in connection with his beloved

sport.
Fathered Idea
Abe fathered the idea of awarding medals at the A. B. C. meet for high scores and was the originator of a move to limit the number of alley keepers on each sanctioned team.
Entries for this year's A. B. C. will close soon but Abe would not predict whether Chicago will be successful in an attempt to set a new record for the number of teams entered.
The present record is held by Kansas City, where 2,251 teams participated last year. Chicago has set 2,700 as the goal for the A. B. C. this spring.

Browning Library At Baylor Is Given 150 Valuable Books

WACO, Jan. 31. (Special)—A gift of 150 books and other material of value has been made the Browning Library by Marie Ada Molineux, Ph. D., M. D., of Lynn, Mass., Dr. A. J. Armstrong, head of the English department here and founder of the Browning Library, announced Friday.

Dr. Molineux is a graduate of Boston University and a member of the first Browning society organized.

Dr. Molineux writes, "Whenever I see enthusiasm and appreciation of Browning in anyone, teacher or student, I desire to help, and Dr. Armstrong impressed me through his words, written and printed, as having a remarkable ability to stir the younger as well as the older people with whom he came in contact."

She has given in the neighborhood of 450 books and pamphlets to the Browning Library already as well as presented a lock of the poet's hair inclosed in a glass case with frame work of gold.

Folks who flaunt Christianity into the air and then gossip are no better than the snakes that crawl flat on their belly—and that's no bologney, either.—Scurry County Times.

The Great American Home

THE WORLD OF SPORT

BY PHILLIP MARTIN

There seems to be matters of some importance going on these days among the college lads. And at a moment when nothing in particular has the sports public staring pop-eyed, one can be grateful to the campus lads for contribution to the news columns.

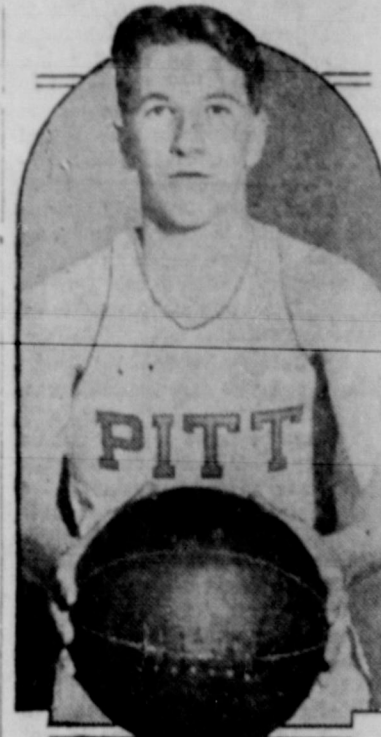

Although one is at a loss as to how the greatest college player in America is determined, it has been said of late by a number of college coaches that Charley Hyatt, the Pittsburgh basketball star, deserves that honor. Everett Dean at Indiana said so, and Sam Barry at Iowa did, too.

This Hyatt lad is the angular-looking fellow who last year scored 292 points in 21 cage games for the Pitt team. They were undefeated. This season he scored 109 points in his first eight games, although some of these tilts resulted in Pitt defeats.

There may be better college players in this country than Hyatt, but this writer is quite content to tag along with him as his basketball Allah until a better one comes on the scene. We've seen Hyatt perform twice and it was a treat for sore eyes.

What this Hyatt fellow doesn't do excellently on a basketball floor can't be done at all. He goes like mad all the time, he passes accurately, dirbbles nicely and shoots—well, he shoots as if it were impossible to miss. And he seldom does.

He is great. Perhaps not the greatest in America, but surely just a mite below the greatest if

Here is Charley Hyatt, star Pittsburgh basketball player, who has been called the "greatest college player in America." He can do everything there is to be done on a court.

there is a greater. And he is good because he has lived basketball all his life—he's 20 now—and has lived it with one idea in view—to be as good as any other man.

ingham. He was born in a dressing room. Nine Lupinos have died while performing, all of them clowns and comedians.

The present Lupinos also boast the blood of the Grimaldis, the other ancient family of clowns. Barry Lupino's great grandfather married a sister of Joseph Grimaldi while George III was King of England.

Over in Brooklyn at the Brooklyn Paramount the standees among the movie fans are entertained by "Prince" Alexander Alkan, negro official lobby cleaner, who also doubles in song. The "Prince" thinks nothing of rendering an aria from "La Boheme" while sweeping up chewing gum and cigarette butts. He draws extra pay for doing it. It keeps the customers' minds off their feet.

The bright idea of the producer of "That Ferguson Family" at the Garrick was to invite all the Fergusons in New York to see the show free. He found only 500 listed in the telephone directory. But more came. Finally an arrival from the East Side edged through the crowd to the box-office.

Pulling his hat down over his eyes and dabbing at his face with a handkerchief, he said: "Pliz to give me a pess. A good sit, will you?"

"And who are you?" asked the treasurer.

"I'm a Feigerson!"

The Shuberts have acquired controlling interest in "Diamond Lil," in which Mae West is touring. . . . Otto H. Kahn, endower of the little theatre sort of arts, visited the Hoboken theatre where Christopher Morley and other Bohemian literati have established a repertoire company on a shoestring. "How much can you use?" asked Kahn, pulling out his checkbook later. Morley looked embarrassed and said he reckoned they couldn't use anything—they'd cleared \$50 that week. . . . Since then it's become a fad and they've cleared

more . . . When Frank Van Hoven's death in Dublin was reported recently his friends on Broadway wouldn't believe it without sending many cables. Van Hoven, always billed as "The Dippy Magician" was a great practical joker and had reported himself dead before. But this time he was dead and vaudeville had lost one of its few really entertaining performers.

Mrs. D. A. Grundy having charge of the devotional with Mrs. John A. Wood reading the scripture.

The Tapestry Weavers given by Mrs. T. M. Harrison and Mrs. W. S. Moore added much to the program.

Talks by Mrs. Henderson Smith, Mrs. Chas. Oren and Mrs. Claud Johnson in keeping with the subject, Consecration, made the program intensely interesting. As a pleasing climax to this most pleasant meeting a plate lunch was served by the hostesses, Mrs. C. R. Webster, Mrs. J. M. Ballew, Mrs. C. W. Crawford, Mrs. J. E. Neel Mrs. Claud Johnson Mrs. Henderson Smith Mrs. Whitington and Mrs. D. L. C. Kinard.

MISSIONARY MEETING WITH MRS. D. L. C. KINARD

The first missionary and social meeting of the new year 1929 proved unusually interesting Monday afternoon, when the Baptist W. M. S. gave a program at the home of Mrs. D. L. C. Kinard. Theme, Personal Consecration.

Quick muscular energy in KARO

KARO is a delicious food—but more—it is a real energy food.

There are 120 calories per ounce in Karo—almost twice the energy-giving value of eggs and lean beef, weight for weight.

No effort to digest Karo is required as in many other staple foods.

Which means, Karo supplies energy quickly.

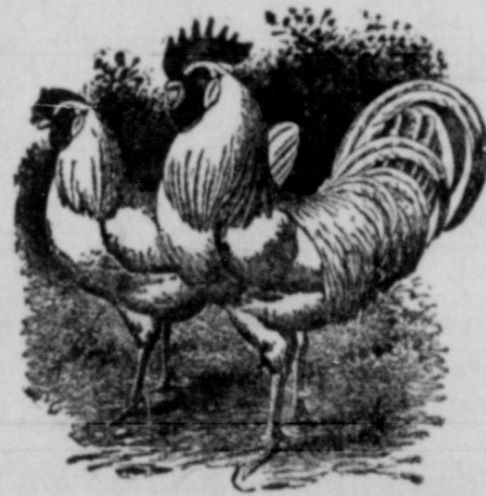

And this is important to those who work and play hard. Especially good is Karo for growing children, as your doctor can tell you.

• Serve plenty of Karo—keep the folks healthy, happy and satisfied.

DELICIOUS ON PANCAKES

We Are Ready

All equipment has been installed in our 52,000 capacity hatchery plant and our machine is now in operation. Give us a chance to prove to you that we can furnish you with healthier and stronger baby chicks than the old-fashioned way.

"No Respectable Hen Wants to Set This Modern Age and Time"

Our first setting was placed in our Smith Machine Monday and we will set every three days from then on. We carry a complete line of the famous Sol-Hot electric, coal and wickless oil Brooders. Three weeks free trial will convince you that no better Brooder is made.

Custom Hatching, 3c per egg. Trays hold from 156 to 165 eggs. All our baby chicks are from full blood, well culled, healthy flocks.

Dog Inherits \$5,000 Estate

If you think the above is the picture of an ordinary dog, you're mistaken, for 'Dick' recently fell heir to the \$5,000 estate left by his mistress, Mrs. Minnie M. Hoover of Los Angeles. Under the terms of Mrs. Hoover's will, the entire estate goes to the dog. He is shown above with Philip Smith, a boy pal, who is caring for him until the court appoints a guardian.

Artist—

and his brush a fine knitting needle. He gathers his materials, consisting of many strands of hair of various shades, on a palette, and there blends or mixes the shades until he obtains the desired tint much as the ordinary oil painter mixes his pigments. He then takes the blended strands and knits them onto the cloth. His knitting method, he said, is that used in making Gobelin tapestries. To get the proper lights and shadows in his pictures he uses light and dark shades of hair exactly as the oil painter uses light and dark colors. In this manner he succeeds in working into his portraits the minutest details of the face of his subject, down even to the wrinkles around the nose and mouth.

Boruchoff's only complaint was directed against bobbed hair. He must have long, fine hair for certain features of his "painting," and the bobbed-hair fad has greatly limited his supply of this material.

Ice Cream—

rotating radio beacon for the guidance of the independent flyer. A radio transmitting station, located preferably at an airport, sends forth a beam of radio waves which sweep constantly around. A special signal indicates when the beam sweeps through the north. A pilot listening for the beacon signal with his earphones determines his direction by the time elapsing between the north signal and the instant when the beam is heard with maximum intensity. The elapsed time is determined by means of a stopwatch calibrated to read direction.

Have Disadvantages

All of these methods have disadvantages which are not present in the operation of the radio beacon system employed for the United States airways. Dr. Dellinger said. All that is required on the plane now traveling a charted airway is a simple visual indicator on the instrument board, by reference to which the pilot can immediately tell whether or not he is on his course.

BUYS NEW PLAYER

Rube's Coffee Shop has just recently installed a Seeburg Automobile selective player for the entertainment of his patrons. This instrument was purchased from a local dealer, G. G. McBrayer. The machine represents the latest invention in the musical world and will be heralded with pleasure by the many patrons of the shop.

putting on a number of star preliminaries, and the interest in the Berg-Vinez bout will almost equal that of the main event. Jack Berg, who recently returned from the United States, demonstrated his great improvement when he easily beat the Anglo-Italian. Berg holds a doubtful decision over the veteran Frenchman, Vinez, therefore he is keen to prove his superiority in order to demonstrate his right for a title bout with the lightweight champion, Sam Steward, who has recently given a hard bout by Vinez.

Steward is billed to meet Fred Webster, who is making good progress in professional ranks after holding amateur championships at three weights. Webster is being freely tipped by fight critics to beat Steward, therefore, both the heavy and the lightweight situations, will be clarified after tonight's bouts.

FOR SALE—Delaval separator, used about nine months. A. P. Todd, Newlin, Texas. 44-3p
