DIAL 3113

"My Pop knows when

everybody

gets up!"

No, Tommy's Dad is not a snooper. It's part of his job to know what time you and your neighbors start turning on lights, ranges, shavers, percolators and toasters in the morning. For these all call for more electricity, and he's the man who tells the power-plants when to send more current through the wires.

### TRAFFIC COP OF THE ELECTRIC LINES

If a bad storm breaks, Tommy's father detours your electricity, so storm damage won't black out your community. If tomorrow will be colder, or cloudy, you'll need more current . . . he'll have it ready. Whenever you and your neighbors and the factories in your town are using a lot for lights and heat and appliances, he sends more into the wires. When the town sleeps, he orders less. As a *Load Dispatcher*, he holds one of the most important jobs in your electric company.

### NEXT-DOOR NEIGHBORS TO EVERYBODY

are these helpful men who see that you get all the low-cost electricity you want, when you want it. They have to know the hour-by-hour needs of every neighborhood . . . and that's where they draw on the intimate knowledge of the community that the electric company has gained over many years. It's the skill and experience of electric company people like Tommy's Dad—and the common sense business methods they use—that have built up for Americans the most and the best electric service in the world.

Hill of this place, was guest speaker at a tea given by the Eldorado Chapter of the Daughters of the American Revolution, in the reception room of the First Baptist Church Tuesday afternoon.

An annual increase in the minimum salary scale at the rate of \$50 for each year of experience up to and including eight years of teaching experience was provided in the new salary schedule.
