The Children of General Alvin R. Luedecke want to express our appreciation for your honoring our father last Tuesday.

The afternoon reception at the museum, graciously hosted by the Schleicher County Historical Society, was a delight. The museum's extensive collections are both interesting and impressive, and we were pleased to be asked to share some of our father's memorabilia for display.

The evening program reflected the thought and effort of the whole community, and was a heartwarming celebration of the values our country was founded upon. The words of the speakers of the Ministerial Alliance were inspiring, and the musical performances by the band, the handbell choir and the choruses added just the right touch. We were highly impressed with the talent and extraordinarily good behavior of the third and fourth graders. Eldorado is indeed fortunate to have an active American Legion Post and teachers such as Mrs. Parker who are willing to spend the energy and time to organize this lovely program each year.

While we were glad to be able to honor all of Eldorado's veterans, were deeply touched by the tribute to our father. We hope the beautiful plaque which was presented will inspire the

An ounce of prevention is the best medicine

Last month I talked about several things that someone can do to keep from seeing me. In today's column I will mention another thing that someone can do to stay healthy. These are the adult vaccines. There are three of them; the flu vaccine, the pneumonia vaccine, and the tetanus vaccine.

Everybody is very familiar with the flu vaccine. This is now

Be sure to call for pipeline locations before

The number one cause of natural gas pipeline incidents is excavation-related activity. The great majority of these are unintentional and can be avoided. At least 48 hours before digging, leveling land or drilling, be sure to place a toll-free call to 1-800-344-8377 to locate any pipeline that may be in the area. After your call is received,

a representative will be sent to mark the location of the line at no cost to you.

Making this call is important to the public, you and the pipeline. It can prevent dangerous situations, property damage, disruption of service and work delays.

How to recognize a natural gas leak.

There are several signs that can indicate a pipeline leak. They include:

- ♦ Distinctive odor associated with natural gas.
- ◆ Dead vegetation in an otherwise green area.
- ♦ A hissing or roaring sound.

What to do if you find a leak.

If you find a pipeline leak, your first concern should be for your own safety and the safety of those around you. It is important to take the following steps:

- ◆ Leave the area immediately on foot.
- ◆ Avoid creating sparks that could ignite the gas.
- ◆ Do not light a match, start an engine or switch electrical equipment on or off.
- → Immediately call the pipeline operator. If it is a Lone Star Pipeline Company line, call us collect at (214) 741-1671.
- ♦ If it is a Texas Utilities Fuel Company pipeline, call us collect at (214) 969-7221.
- ◆ Call 911 or the local fire and police departments.
