Light 1 and friends who attended.

After the hymn, "Shall We Ga-ther at the River" by the church choir, Rev. Charles Bruce, pastor of the Eldorado Presbyterian church, read a New Testament scripture, paid tribute to Mr. Wagley for the genuineness of his friendship, and offered prayer. The cnoir then sang "How Firm a Foundation," after which Rev. Vernon Shaw of Round Rock Children's Home, whom the Wagley family had known, and whose brother Rev. Melvin Shaw had been the family pastor in Castro County, addressed words of con solation to the family, and read the obituary.

Rev. Clifford Nelson, First Baptist pastor, spoke on "Precious the Sight of God is the Death of his Saints"-explaining that death finds the saints ready, with fixed faith, prepared for death by leaving a good example and some material goods to loved ones, and ready to receive their reward at any time.

Also a part of the service was Rev. Nelson's closing prayer, following the choir's song "There's a Land that is Fairer than Day." Interment was made in the Eldorado Cemetery with Ratliff in Saturday In Cisco charge.

## Wilson Humphrey Wins **Bausch & Lomb Award**

W. J. Fraker, Principal of Eldorado High School, announces that Wilson Humphrey is this year's winner of the Bausch & Lomb Honorary Science Award Medal for achieving the highest scholastic record in science subjects during his high school course. Only winners of this Award are eligible to compete for three scholarships sponsored by Bausch & Lomb Optical Co., at the University of Rochster.

The Science Award Medal is presented upon graduation. However, the winner must be selected at an early date because applications for Bausch & Lomb Scholarships must be filed on or before March 10. The choice of the winner is based upon scholastic achievement in science subjects, with incidental consideration of records in other subjects, qualities of leadership, and extracurricular activities.

The Honorary Science Award Medal was instituted in 1932 and is presented in thousands of secondary schools throughout the country.

The Bausch & Lomb Science Scholarship Program was estab-lished in 1944 and now provides three scholarships with a value of \$3,200 each.

Both the Science Award and the Scholarship Programs have been officially approved by the National Association of Secondary School Principals, and many other educators throughout the country. They are recognized as significant evidence of scientific aptitude and have proved the means of encouraging countless young people to the consideration of scientific careers.

Inadequate salaries are the main reason schools cannot find teachers for the classrooms being built for increasing enrollments, said Charles H. Tennyson, secretary treasurer of the Texas State Teachers Assn. Tennyson said Texans should be shocked by the fact that the state passed on January 12, 1953, in the may have fewer teachers in 1960 than in 1952 even though the schol-

astic population is expected to increase 325,000 over its present level

More than 4,000 teachers left the Gwen of Odessa; tractor must agree to deliver the profession last year, while populawarrants at such price to the party tion growth created the need for with whom the County has made an extra 1,000 teachers. This meant such arrangements. All bids must a total of 5,000 new teachers was

needed. Only 4,000 college graduates were certified to teach in Texas in '52, and approximately half of those were lured away from the profession, primarily by higher salaries offered by industry, Tenyson reported.

He questioned whether the aver ge 1951-52 teacher salary of \$2,860 was adequate to hold men and women in the important profession of educating Texas' boys and girls. Income tax and retirement deductions cut that average to \$2,279 in take-home pay, and this had a purchasing power of \$1150 dollars in terms of the 1935-39 dollar, Tennyson observed.

"Who will teach Texas children n 1960 if the teaching profession is able to attract only 2,000 qualified college graduates each year and continues to lose 5,000 teachers annually?" Tennyson asked.

This, he said, is a major question to which the legislature should give serious consideration.

## Surprise Ending!

That raffle for our Volunteer Fire Department went over fine. We're going to have money to get a new engine-and then some.

Our local merchants realiy donated some wonderful prizes. Like Buzz Ellis, the radio-TV dealer, giving that big television set . . . and the Superior Motors putting up a brand-new car.

There was a humorous note, too. The prize of a year's supply of coal-donated by Baker Coal Yard-was won by Mrs. Thayer, whose husband is the biggest fuelil dealer in the county! What did

Mrs. Thayer do with the coali She gave it to a church she's not even a member of. (Her Church uses her husband's fuel oil.)

From where I sit, that's real generosity. But then, Mrs. Thayer never did believe in dividing people into groups. She's "for" everybody - whatever church they go to, whether they like TV or radio, people who enjoy temperate beer, people who don't. A really warm-hearted person.
