YOUR BUSINESS WILL BE APPRECIATED

Agriculture Is A Sensitive Business

College Station, Tex.—"American agriculture is a sensitive business. The prices of food often reflect the risks producers have had to take to get it to your table," according to Dean H. O. Kunkel, College of Agriculture at Texas A&M University.

"In 1973 we can control a few more of these risks than say 100 years ago, but economic ruin is still the reward of many," Kunkel said. "Whether crop or livestock, the producer for a period of many months must continue to invest heavily without knowing whether he'll even get his money back, let alone make a profit. Disease, insects or bad weather can wipe him out."

"A good example is this year's unusually severe winter. Prices of beef and some other agricultural products will likely increase due to the prolonged bad weather." Kunkel says that this severe weather caused a sharp rise in the cost of feed and resulted in poor livestock gains. This will likely cause higher retail beef prices in the spring and summer.

However, a good crop year in 1973 is forecast due to excellent moisture conditions. This may lead to a bumper harvest next summer and an easing of pressure on feed supplies.

A series of events caused the severe feed shortage, says Kunkel. Unusually cold weather with rain or snow covered Texas and several other states. And it started nearly a month earlier than usual. This caused ranchers to feed heavily to protect herds from loss. Cold, cloudy weather also reduced the growth of winter pastures, so important to cattle in many parts of the state. Then the extended bitter weather caused an estimated 150,000 cattle deaths in our state. Many of these were cows and calves. This will affect supply of stockers and feeders.

The early winter also played havoc with harvest of the 1972 crop. It is estimated that about one-third of the cotton on the High Plains is still in the field. And cottonseed meal is heavily used as stock feed. The icy grip of winter also worsened the feed situation in other ways. Many oil mills and processing plants could not operate at maximum due to the fuel shortage brought on by an early winter.

Together with this sharp change due to the weather, the U. S. livestock industry was using feed in record volume through the fall and early winter, Kunkel said. It is estimated that a 5% increase in feed usage occurred because of increased cattle numbers. Cattle on feed were up substantially, 9% for the nation and 18% for the southwestern states. This caused greater feed disappearance than normal and depleted feed grain and protein supplement reserves. Texas used over one-half million ton more grain in fattening cattle than in the previous year.

Severe weather restricted the growth of winter wheat, and many calves have been lost on the Plains in recent storms. Calves that were normally grazed on wheat until mid-March were shipped to the feedlots before Christmas, further intensifying the critical feed shortage. Transportation of feed grains and protein supplements from elevators and oil mills became a problem, further aggravated by the weather conditions.

Even the recent grain deal with Russia had its effect. This increased the price of wheat so that it was no longer profitable to use in fattening rations. Further, it had a buoyant effect on the entire grain market as speculators entered the picture. Stocks of wheat and other feed grains were reduced by nearly 31 million metric tons during 1972 because of exports.

"The entire feed situation points up an interesting aspect of modern agriculture, not often appreciated by the public," Kunkel said. "American agriculture is greatly affected by a series of what appear to be small changes, and especially by severe alterations in the weather. When a combination of factors bears down on modern agriculture, the normal flow of feed and livestock products is radically altered. Fortunately, our agricultural industry has tremendous ability to recoup its losses, given a decent break in the weather and some stability in prices and feed supplies."

"The American public has become accustomed to relatively low cost food. The percentage of disposable dollars we spend for food is the lowest of any country in the world. Bear in mind, too, that the average shopping cart only has 72 cents worth of food for each dollar at checkout. The remainder is hardware, paper goods, soap, insect spray and other non-food items. Today, less than one dollar out of every six earned by the average worker is all that is required to buy the safest, most wholesome, nourishing food products man has ever known, thanks to our vast multi-billion dollar food industry," the dean concluded.

YOUR FRIENDLY SERVICE BANK

How to make your home more comfortable while you lower your energy costs.

Like to enjoy barefoot
comfort in your home all
year long?

Like to cut heating costs as
much as a third?

Like to cut air conditioning
costs as much as half?

The secret is through
insulation.

Your home probably has some
insulation already. But, thorough
insulation includes an adequate
amount in the ceiling, in the walls and
under the floor. It also includes weather
stripping, storm doors and storm
windows or double glazed windows.

Once you have good insulation, you
can forget about cold floors, cold walls
and chilly corners. You'll be more
comfortable and enjoy your home more.

The cost will vary, depending on the
style of home and amount of insulation
already in it. But, one important fact to
keep in mind is that insulation is the
only comfort improvement you can
make in your home which requires no
maintenance, yet pays for itself
through lower energy bills.

Ask an insulation dealer for advice and
a free estimate, or call WTU for more
information.

WHAT COSTS LESS NOW THAN IN 1952?

The average cost of a kilowatt hour of electricity used by a residential customer served by WTU cost 29% less than it did twenty years ago... (1952 - 1972) and... in 1972 the average customer used over three and a half times as much electricity as he did in '52."

Non-Stick Cookware Saves Kitchen Time

College Station, Tex.—Scraping, scrubbing, soaking and scouring have virtually been eliminated with non-stick finishes on cookware and appliances. Two types of non-stick finishes are available—heavy-duty and regular.

"Before using the item for the first time, wash it in hot sudsy water to remove any dust or manufacturing oils," the specialist suggested. "Then condition the cooking surface by lightly rubbing with cooking oil on a paper towel or waxed paper. This insures non-stick coating if repeated from time to time."

A commercial cleaner is available for removing stains. If directions are closely followed, it is safe and effective, Miss Cochran noted.

42 PARTY HELD The Merry Makers 42 Club met in the club room in the Memorial Building last Thursday.

DUPLICATE BRIDGE Seven tables of players participated Feb. 1st.

Consumer Scene

Tips On Selecting A "Clean" Oven

Ten years ago when the consumer went to buy a new range the oven was hardly a factor in the purchasing decision. There was only one kind of oven—a grey porcelain-enamel-on-steel lining that required liberal application of elbow grease and various cleaning compounds whenever you wanted to remove the baked-on spatters to see what the original finish looked like.

Today, choosing the oven is a major part of selecting an electric or gas range, with the consumer having three, and possibly four, choices, according to General Electric's Consumers Institute.

While many consumers think both systems provide carefree oven cleaning, there is a world of difference between the two. The "self-cleaning" approach—the first automatic oven cleaning system introduced—uses a special 1-to-3 hour high-temperature cleaning cycle to make oven spills and spatters disappear.

One of the nation's most significant engineering accomplishments has just been designated a National Historic Civil Engineering Landmark by the American Society of Civil Engineers.

John A. Roebling, father of the modern suspension bridge, is best remembered for his crowning work, the Brooklyn Bridge, built three decades later than this one.

Need Listings On Farms and Ranches—Large or Small 2-bedroom house, real nice—\$7,000 3-bedroom, 2 lots, close to school—\$5,000 James Williams Real Estate 5. MAIN STREET — ELDORADO, TEXAS

Austin, Tex.—The Texas Legislature swept away some of the clouds last week and made important moves toward "government in the sunshine."

In addition to passing the revised "open meetings" laws—patterned after Florida's famous "sunshine law"—House committees approved a new "open records" law for Texas and placed on the House calendar a "free flow of information" bill.

Changes in the Texas open meetings law will allow the public and press to be informed of all "quorum" meetings of public bodies. It was approved 132 to 13 by the House of Representatives and moved over to the Senate Jurisprudence Committee.

Closed meetings will be held to a minimum under the exemptions in the new law. It was authored by Rep. Carl Parker of Port Arthur and submitted as a part of House Speaker Price Daniel Jr.'s "reform package."

A marathon five-hour hearing by the House Judiciary Committee—chaired by Rep. DeWitt Hale—was held on the "free flow of information" measure. This proposal is H.B. 10, sponsored by Rep. Dave Allred of Wichita Falls.

It grants a "news source" confidential privilege, and allows Texas journalists to get more information about governmental, law enforcement and other matters important to the public.

The House Judiciary Committee approved the bill 16 to 4 and sent it to the House floor for debate this week.

H. B. 6, the "open records" measure, will allow the public and press access to most all records of government, city, county and state, that are not closed by state statute. A few other restrictions were placed on the bill—sponsored by Rep. Lane Denton of Waco.

All of these "government in the sunshine" measures follow the pattern of new House rules which open committee meetings, and follow the trend toward "openness."

People's Watchdog Proposed—Again

Legislators from Houston and Fort Worth have introduced legislation proposing to create the office of "ombudsman" in the State Government in Texas.

The idea has been put before the legislature in previous sessions only to receive a cold shoulder. The ombudsman would be an independent and politically neutral office with the sole duty of investigating and recommending action on citizen complaints about state government administration, under the proposed legislation.

The two sponsors, Reps. Hawkins Menefee of Houston and David Finney of Fort Worth, said the Ombudsman would be able to protect the individual citizens by giving them recourse for their grievances against unfair or abusive administrative practices.

The Ombudsman, however, would have only the power to criticize and publicize, but not reverse, undesirable administrative actions.

Mickey Mouse Discrimination?

Houston Rep. R. C. (Nick) Nichols has introduced legislation which he says will eliminate the "Mickey Mouse" discriminatory practices of some insurance companies when it comes to selling automobile and fire insurance.

One bill would prohibit any fore or automobile insurance company from canceling, refusing to issue, or refusing to renew a policy because of the age, sex, race or place of residence of the person applying for insurance.

Rep. Nichols says "older people and younger people are the victims of automatic discrimination when buying auto insurance, even though they may have good individual driving records."

Another Nichols' bill would require that the only kind of life insurance policies which can be sold in Texas would be level term policies which are guaranteed renewable to age 80—without evidence of insurability.

"The typical cash-value life insurance policy is one of the most prevalent and least understood consumer frauds in existence," says Nichols. "The simple fact is, at the death of the insured the beneficiary automatically loses the cash value of the policy."

Pray Quietly Please

Sen. Walter Mengden, Republican state senator from Houston, has dropped a bill in the legislative hopper to allow local school boards to establish periods of silent prayer or meditation at the beginning of each school day.

The U. S. Supreme Court says a school district cannot dictate to a class of students the wording of a daily prayer. Mengden says his bill would get around that ruling through this bill which authorizes private prayer, not as a religious service or exercise, but an opportunity for silent prayer or meditation on either the anticipated activities of the day or—by those so disposed—on a religious theme."

DWI Is A No-No, Or Else

Baytown Rep. Joe Allen has introduced legislation to require a mandatory minimum 30-day suspension of operator's license upon first conviction for driving while intoxicated, and a mandatory one-year sentence on second conviction.

Rep. Allen says Department of Public Safety officials tell him "almost a third of all fatal rural accidents were the direct result of drunk drivers. Statewide figures are almost as high."

"Over 700 people were killed on the highways of Texas by drunk drivers in 1971. Consider that nearly 200,000 accidents that same year were caused by drinking and driving and that the rates go up every year, and you get a good idea of the size of the problem," says Allen.

Allen says he has DPS support for his bill, partly because "juries hesitate to suspend a driver's license for a whole year. Consequently, our officers make the arrests, but can't get the driver off the road for any significant length of time."

Land Report Released

Rapid growth over the last decade has concentrated to a rising public concern for proper land resources management and for regulation of development of the state's unincorporated areas—those areas outside the reach of effective municipal jurisdiction.

In most areas of the state, such development is not subject to any governmental health, safety or planning standards the Texas Advisory Commission on Intergovernmental Relations says in a new report, "Land Use Standards in Unincorporated Areas: Proposed State Legislation for Local Governments."

The Commission notes that despite pleas from many municipal and county officials and organizations of local government, there has been no general legislation adopted to expand county and municipal authority over development beyond the city limits.

In this respect, Texas compares unfavorably with other states, the report stated. County-wide zoning, or its equivalent, is authorized in 40 states and various forms of subdivision are exercised by counties in 37 other states.

The Commission recommends legislation to (1) enable cities and towns to extend development standards applied inside incorporated areas to their extra-territorial jurisdiction, including authority to extend health and safety ordinances governing construction, alteration, or remodeling of structures to the city's extraterritorial jurisdiction; (2) give counties authority to establish development standards in unincorporated areas; (3) encourage "sensible, flexible land use practices in unincorporated areas by extending to county government the same general zoning power and related authorizations long exercised by Texas cities."

Short Snorts . . .

Rep. Neil Caldwell has been appointed by House Speaker Price Daniel Jr. to the Texas Council on Marine-Related Affairs. Caldwell fills the unexpired term of former Rep. Ray Lemmon of Houston.

Texas Agriculture Commissioner John C. White has named Doland Olson of Lubbock as supervisor of the Texas Department of Agriculture's District II at Stephenville and named Raymond Houtchens, an inspector in District I (Lubbock) to succeed Olson in the supervisory position.

Leading communicable disease in the state in 1972 was influenza and other flu-like illnesses, the State Health Department reports. The leading communicable disease nationwide in 1972 was gonorrhea, which ranked second in Texas with 58,404 reported cases.

Some 4,000 Texas junior and senior high school students and their teachers are to converge on Austin March 16-17 for the 46th annual convention of the Interscholastic League Press Conference.

The State Department of Banking has received applications for state bank charters for the Katy Bank & Trust and Sheldon State Bank, both in Harris county.

The 26th annual session of the YMCA Youth and Government program will be held in Austin February 22-25 with about 800 delegates assembling to study the legislative and judicial process.

Dr. Kenneth H. Ashworth, vice chancellor of the University of Texas System, has been named executive vice-president of the University of Texas at San Antonio.

Texas Municipal League directors will ask the Texas Legislature to conduct a thorough study of public labor-management relations in Texas. Action was taken in anticipation of nearly 100 public labor-related bills to be considered by the Legislature.

County Extension Agent's Column
By MRS. DIANE LUBE

Diet And Heart Disease

Relation of diet to heart disease is probably the most controversial medical-dietary area today.

Both doctors and the public question how fats in the diet affect health or development of heart disease.

Atherosclerosis is a disease in which large and small arteries are narrowed and hardened by deposits of fatty materials and minerals along internal walls.

Other names are used to refer to this condition—cardiovascular disease, coronary heart disease and arteriosclerosis.

Fats in the diet may lead to elevated blood lipids and atherosclerosis. This, in turn, can lead to cardiovascular diseases such as coronary heart disease.

However, diet is believed to be only one of many factors associated with atherosclerosis.

Others include heredity, overweight condition, high blood pressure, high blood cholesterol and high blood lipids, and cigarette smoking.

Other important factors associated with the disease are the individual's life style or socioeconomic level, lack of exercise, stress, and such metabolic diseases as diabetes.

Since diet is thought to be just one factor among many, authorities advise against making drastic, self-prescribed change in diets.

Storing Kitchen Helpers

Now that "Santa" brought all those handy kitchen helpers, the question is where to put them.

Electrical helpers are useful, add to creative cooking and save time and energy, yet require space and placement for convenience.

To get the most use and storage, study the appliances.

Determine which is used most frequently—and which would be used more often if it were easier to take out and put away.

Due to inconvenient storage, often the time and energy saved by an appliance's use is lost in getting it out, setting it up and returning it to storage.

Ideally, kitchen aids should be stored where they're used. This strongly applies to such frequently used items as toasters, coffee-makers and can openers.

Unless there are immediate plans for remodeling, most homemakers must work in existing space.

A peg board or wall hooks offer storage for certain small appliances without using valuable counter space.

These "wallables" include hand mixers, electric knives and warming trays.

In general, store seldom-used equipment out of the way—but within easy reach when needed.

Heavy things, on the other hand, should be stored near counter level to reduce strenuous lifting.

Although a well-organized kitchen isn't easy to accomplish, the

Fryer Prices May Move Ahead Soon

College Station, Tex.—With fryer supplies leveling off, prices will move upward for the next several weeks, according to Mrs. Gwendolyn Clyatt.

The consumer marketing specialist, Texas Agricultural Extension Service, Texas A&M University, added that fryers remain budget buys—both the whole bird and fryer parts—in spite of price increase.

Whole turkeys and turkey parts also offer an economical choice at the poultry counter.

"Beef prices are about the same as the past two weeks, and most markets are featuring various beef cuts at special prices.

"In general, look for best values on chuck roasts and steaks, stew meat, ground beef, round steaks and roasts, and beef liver."

Pork values include hams, picnics, end-cut loin roasts and chops, and shoulder roasts and steaks.

"Two eggs will satisfactorily take the place of a serving of meat for high-quality protein, so families can use more eggs economically," the specialist suggested. "Grade A large-side eggs offer the best quality and economy for the money."

Fresh fruit and vegetable items in ample supply at the most economical prices include apples, oranges, grapefruit, bananas, tangerines and tangelos.

Others are potatoes, purple top turnips, cabbage, carrots, dry yellow onions, cauliflower, rutabagas, hard shell squash and broccoli, although prices on potatoes and dry yellow onions edged up a bit recently, she concluded.

Mr. and Mrs. Jim Lube spent the week end in Houston visiting their parents.

FEBRUARY

The following events, selected by the Texas Tourist Development Agency, Box 12008, Austin 78711, are but a few of the many excellent recreational opportunities offered by communities across the state. A more complete listing of Texas events may be obtained free of charge from the Texas Highway Department, Travel and Information Division, Box 5064, Austin 78703.

Feb. 2-4 Rio Roundup—Western River Festival along Paseo del Rio, San Antonio. Once again San Antonio's unique downtown River Walk will become a part of the western mood that invades the city during rodeo month. Western music, food, arts & crafts, and the "law and order" of the Bexar County Gunslingers and their frontier justice highlight activities and whip up spirit for the 25th annual San Antonio Livestock Exposition & Rodeo Feb. 9-18.

Feb. 3-11 Southwestern International Livestock Show & Rodeo, El Paso.

Feb. 11-19 Rio Grande Valley International Music Festival & Opera, McAllen. Now in its 13th year, this event was originated for the purpose of providing Valley students with the opportunity to enjoy live symphony performances. To do this and underwrite most of the costs for the children's concerts, it was necessary to also schedule performances for adults. The result is a schedule of 22 performances—children's, pop, concert, symphony and opera—in five cities during the nine-day festival. Over 20,000 children and 6,000 adults attended last year. This year the San Antonio Symphony will perform in the host city McAllen, in Harlingen, Edinburg, Pharr and Reynosa, Mexico. For all 13 years the cost for

children's tickets has remained at 50¢. Adult tickets for concerts are \$3.50 and opera tickets cost \$3-\$12. A complete schedule and tickets may be obtained from the Rio Grande Valley International Music Festival & Opera, P. O. Box 1915, McAllen, Texas 78501.

Feb. 19-22 South Texas Wolf Hunters' Open Bench Show, Derby Run & Running Dog Bench Show, Karnes City. Back in 1922 in Martinez, just east of San Antonio, 41 hounds and 55-60 hunters got together for the first South Texas Wolf Hunters' trials. In 1936 the annual event was the subject of a four-page spread in Life magazine. Life is gone, but the hunt goes on—bigger and better than ever. Last year 200-300 hounds and hunters from all over Texas and seven other states participated. This year's event will be at the Wagner Ranch six miles from Gillett, 20 miles north of Karnes City on State Highway 80. Roads to the event will be marked. On the 19th there is the open bench show for both hunting and non-hunting dogs. The mornings of the 20-22 the Running Dog Bench Show will see the hounds hunting from first light to about noon. Hunters will be camping on the ranch, but food will be available for non-cooks. There is no charge for watching.

Feb. 21-March 4 Houston Livestock Show & Rodeo, Houston. The Livestock Show, in its own special building, accommodates 17,000 entries that compete for more than \$200,000 in premiums. The rodeo, Feb. 23-March 4 in the Astrodome, this year stars on various days, Charley Pride, Sonny & Cher, Merle Haggard, Rick Nelson, Donna Fargo, Sonny James, the Fifth Dimension, Engelbert Humperdinck and the Jackson 5. Matinee performances 2 p.m.; evening 7:45 p.m., Monday through Saturday; 7 p.m. Sundays.

Heads Mohair Council

Walter L. Pfluger of San Angelo, long-time West Texas ranchman and well-known mohair producer, is the new president of the Mohair Council of America, succeeding Noel C. Fry of Del Rio. Pfluger was elected president of the 6,000 member mohair promotion organization at the Council's annual membership and directors meeting held January 31 in San Angelo.

James T. Hunt of Sonora, secretary & treasurer of the Council for the last three years, was elected vice president.

CARDBOARD 10c & 20c, at Success

WHITAKER IS I. R.

Greg Whitaker is institutional representative of the Lions Club for the local Boy Scout troop, instead of Elton McGinnes as reported in last week's Success issue.

Primitive Baptist Church
Menard Highway
Elder Carl Watson, Pastor
Service each 2nd Sunday at 11:00 a.m. and 2:00 p.m. Congregational singing half hour before preaching.

This picture of Carla makes me think of an old proverb my mother used to quote: "Precious things come in small packages."

Go ahead, mark me down for a doting dad. I'm quick to admit that my little girl is precious to me. With her loving arms about my neck I feel richer than a king. I walk into a room and see her eyes light up—so who wants to be president? As she snuggles down among the blankets, I kiss her and tell myself that I'll give her the best, now and always.

That's why I take her to church every Sunday. I want God to be a part of Carla's life from the very first. I know that an understanding of God and His love will ensure my daughter's well-being far beyond any material gift I could give her.

God's goodness is yours for the taking. Enrich your life. Go to your church, and take your family with you.

- Sunday
- Genesis 1: 20-31
