

PLAIN TALK

By BILL PERKINS

Did you ever wonder how McLean was named?

We just found out this week and we are indebted to Mr. C. S. Rice, a local resident for 51 years, who through his son-in-law, Legon Burris, owner of the Greyhound Drug, passed the information on to us.

Russell A. McLean and family of North Cambridge, Mass., wondered, too. They passed through here Sunday, August 7, on their vacation trip to California and dropped in Burris' drug store to inquire about the town and to buy a copy of The McLean News. Burris had already sold all of the copies that he had left on the newsstand but he took their address and we will mail them a copy of this issue. Burris also bought an extra 15 copies of the last issue of the paper so that he would not run out of The News over the weekend.

Mr. Rice gave us this information which we will pass on to the traveling McLeans and anyone else who is interested.

"In 1902 the Chicago, Rock Island Railroad extended their line from Oklahoma City to Amarillo.

"At that time the chairman of the Texas Railroad Commission (which granted the road their franchise) was named McLean. (I do not remember his initials.) So when the little town in the southeast corner of Gray county was laid out it was named McLEAN in honor of the railroad commission chairman.

"I came here in 1904. At that time there was a general merchandise store, a lumber yard which I became manager of, and a small hotel—part of which was a dug-out—a drug store, a livery stable and a blacksmith shop.

"Before the year was over a bank was opened and The McLean News was established. C. S. RICE."

Danny Douglas, scribe for the local Boy Scouts, told us that attendance was not so good. He said that he and Scoutmaster Douglas Groves would sure like to see more Scouts out on Monday evenings at 7:00 o'clock at the American Legion Hall.

At 2:30 p. m. next Tuesday at the American Legion Hall a meeting will be held for the planning of the year's program for Teen Town. Mrs. Bill Stubbs told us. More sponsors are needed, she explained, so that things will run more effectively and so that no one person will have too many responsibilities.

It only cost \$25 plus court charges to beat up an editor up here in the Panhandle. At least that is what they charge over in Hemphill county. Editor Ben Ezzell of the Canadian Record took a beating from a candidate for mayor last spring during the campaign. The would-be mayor later withdrew from the race. The attorney who defended the absent candidate last week in court, after the fine was assessed, said to some of the onlookers, "If it doesn't cost any more than that I might whip him myself."

The bus is running from Shamrock to Childress again. It has been discontinued since July 21. We found out July 22 that the line wasn't running when we were trying to get back to Bryan to get our wife, dog and household goods moved to McLean. The line had discontinued the day before and our ticket from Shamrock to Childress was no good. At no extra charge, Greyhound sent us to Oklahoma City, then to Dallas. Guess it was sort of a bargain at that, since we got to see parts of the Sooner State that we hadn't seen before.

SCENES: The Johnny Haynes' back from their Colorado vacation. Rev. Marvin Fisher and Ruth off to California to perform a wedding and to vacation. Bob Glenn and the city gang un-stopping a six-inch line back of the Charles Cooke home. Sheriff Rufe Jordan in to see us and to renew his subscription. T. G. Richardson winning \$73 in merchandise certificates here at Saturday's appreciation day drawing. "A Man Called Peter" coming to the Derby Drive-In Sunday for a three-day run. Odell Mantooth and Cooper's Foods 1955 McLean Tiger schedules in every store in town. The Clint Williams' moving to Stinnett.

Meeting Scheduled For Tuesday To Map Plans For Teen Town Program

VILLAGE

GOSSIP (More or Less)

Rev. and Mrs. Marvin Fisher left early Monday morning for a two-weeks vacation. They will visit the C. N. Grimes family in Fresno, Calif., and while there Brother Fisher will perform the wedding ceremony for his niece.

Miss Mary Ann Back and her family have been busy this week making last minute arrangements for Mary Ann's wedding Friday night to John Thomas Hale of Memphis.

The annual Firemen's picnic will be held tonight at the City Park. Fire Chief Boyd Meador has announced.

Mr. and Mrs. Claude Hinton have returned from a vacation trip to Colorado.

County Approves Paving of Road In Lefors Area

Gray county commissioners have tentatively accepted a bid from Baker Construction Company of Borger for the county's part in the construction of pavement for a proposed new farm-to-market road that runs east from farm-to-market road 749 at the Phillips plant south of Pampa into Lefors.

The proposed plan is for the county, city of Lefors, and the Lefors Independent School District to divide the cost of paving for the proposed new road. The project would pave approximately one-half mile into and through the city of Lefors. The county's share of the cost for the project is \$4,832.00. Total cost was set at \$11,975.00. Mayor Fred Blackwell of Lefors and Arlie Ham of the Lefors Independent School District were present at the Monday meeting.

Cap Rock Bus Line Service Is Resumed This Week

Bus services between Pampa and Childress via Shamrock which was temporarily discontinued on July 21 was resumed Monday, August 15.

Wayne Peery of Claude has leased the Cap Rock Bus Line and purchased two buses from Mr. and Mrs. Glynn Bell, former operators.

Mr. Peery, a driver for Continental Trailways for 11½ years, is establishing an office in Pampa, at 115 South Russell. He will operate the Cap Rock himself on the following schedule:

Leave Pampa at 7:30 a. m., leave Shamrock at 8:50 a. m., arrive in Childress at 10:05 a. m.; leave Childress at 2:30 p. m., leave Shamrock at 3:50 p. m., arrive back in Pampa at 5:10 p. m.

For seven years, Mr. Peery drove for Trailways between San Antonio and Corpus Christi. For the past four and a half years, he has driven for the same company over a route from Amarillo to Denver, Colo.

One backward step, one relinquishing of right in an evil hour, one faithless tarrying, has torn the laurel from many a brow and repose from many a heart.—Mary Baker Eddy.

"Better late than never" is not half so good a maxim as "Better never late."—Anonymous.

A meeting will be held Tuesday, August 23, at the American Legion Hall at 2:30 p. m. for the purpose of planning the program for Teen Town for the coming year, according to Mrs. Bill Stubbs.

Mrs. Stubbs requested that all parents, teachers and teen-agers interested in planning the year's program for Teen Town be at Tuesday's meeting.

"We would like to have your help and ideas to improve Teen Town. More sponsors will be required in order to carry on the program effectively and so that no one person will have to serve too much," she said.

"We will plan a bigger and better program for our young people. Come and bring your suggestions.

"Everyone interested is invited to be present at this meeting," Mrs. Stubbs concluded.

Open Air Revival Being Conducted By McLean Baptist

Rev. Ennis Hill, pastor of the Calvary Baptist Church in Pampa, is evangelist for the revival now in progress at the First Baptist Church in McLean. The revival will continue through Sunday, August 28.

Music for the revival is under the direction of Bob Davis, music director of the local church.

Services are being held daily at 10:00 a. m. and 8:00 p. m. with the morning services inside the church building and the evening services in the open air just north of the church.

Dr. Buell T. Wells, pastor of the church, urges citizens of the area to attend these services.

Jack Dauer Brooks To Receive Degree From Texas Tech

Jack Dauer Brooks of McLean is one of more than 320 Texas Tech students who are scheduled to receive degrees at summer commencement exercises Friday, August 26. President E. N. Jones announced today.

This year's exercises will be held on the Administration Building green, beginning at 7:15 p. m.

Brooks, who majored in agricultural education, is the son of Mr. and Mrs. H. W. Brooks, owners of a dry goods store here, who now reside in White Deer.

New Credit Program Is Outlined For Gray County Farmers And Ranchers

Details of a new credit program tailored to the needs of farmers and ranchers in the Great Plains area, combining established real estate and production loan programs of the Farmers Home Administration with a greatly expanded emergency loan program, has been announced by James D. Gouldy.

The loans will be available in Gray county, and applications can be filed at the Farmers Home Administration office at the City Hall in McLean. The program is an outgrowth of recommendations made at the Great Plains agricultural conference called by Secretary Benson and held last May 30-June 2 in Denver.

Loans will be made for re-seeding and the establishment of grassland and other approved conservation and land use practices including soil and water erosion control measures, development of domestic and irrigation water supplies, repair and improvement of existing farm buildings, and the purchase of additional land needed to enlarge a farm to a family-type size.

Loans also may be made to purchase livestock, farm equipment, farm equipment repairs, seed, fertilizer, feed, insecticides,

Memphis Youngsters Entertain Lions at Tuesday's Luncheon

The regular second Tuesday meeting of the McLean Lions Club was held at noon at the Fellowship Hall of the Methodist church with President Hickman Brown presiding.

Out of town guests for the meeting included R. A. Massey of Memphis, Ralph Thomas of Pampa, and Don Leach of Rails, who formerly coached here.

Dr. Buell T. Wells, pastor of the First Baptist Church, Bob Davis, music director of the local church, and Rev. Ennis Hill, pastor of the Calvary Baptist Church in Pampa, were guests of Lion J. C. Claborn.

Two new members, Dr. Joe Sudermann and Bill Perkins, were installed into the local club by Lion Larry Fuller.

Lion Johnnie Back introduced Frank Smith of Memphis, who brought with him 18 boys and girls who presented the program for the luncheon. The group, which included 15 boys and three girls, did tumbling acts in the Fellowship Hall and later outside on a trampoline. Smith stated that this group is part of a larger group of 60 or 70 youngsters who had been working out since May when the Memphis Boys Club obtained the trampoline.

Elephants, alligators, turtles and poll parrots have an average life span of 100 years or more.

Kearney Available For 1955 Planting In High Plains Area

Kearney, a new and unusually cold and greenbug resistant barley for the High Plains of Texas, will be available, to growers for 1955 plantings.

The variety was developed by the Nebraska Agricultural Experiment Station. Tests covering its adaptation and resistance to greenbugs have been conducted at the Amarillo Experiment Station at Bushland. It is recommended for the area west of the Caprock and from Lubbock north through the Panhandle.

Kearney had a survival of 97 per cent in 1951 compared with 59 and 0 for Reno and Cordova, respectively. It is a true winter type barley and will head normally only from fall plantings.

It matures later and grows taller than most other commercial varieties grown on the High Plains. Kearney has outyielded Reno and Ward, but in seasons when winter survival is not a factor, less hardy varieties, such as Cordova, may yield more.

The new variety probably will produce less early fall grazing than the upright growing tender varieties, but because of its superior winter-hardiness, should be more suitable for winter and spring grazing on the High Plains. Its test weight compares favorably with other varieties.

Seed were released to commercial and certified growers in the fall of 1954 and limited quantities will be available to farmers for 1955 fall plantings. No seed will be available to farmers from the Texas Agricultural Experiment Station. Foundation seed may be obtained from the Nebraska Station at Lincoln for the production of certified seed.

Registration plans for the 1955-56 school year have been completed and were announced Tuesday by Jimmy Payne, principal of McLean High School. Regarding the registration procedure, Mr. Payne made the following statement:

"School registration will be from 9 a. m. to 4 p. m. for the following days:

"Seniors—Monday, August 22; Juniors—Tuesday, August 23; Sophomores—Wednesday, August 24; and Freshmen—Thursday, August 25.

"It is very important that all students register on these days in order that classes may be set up properly.

"Books will be checked out and lockers assigned on these days.

"We want to urge all students to make arrangements to be here on the days assigned for their class," Mr. Payne said.

Regular classes will begin Monday, August 29, it was previously announced.

SCIENCE IN YOUR LIFE

Versatile Vitamins
Thanks to the British Navy we know the value of vitamins, for some 200 years ago the Admiralty accidentally learned that a daily ration of vitamin-rich lemon or lime juice would protect its sailors from scurvy. It was not until the early 1900's, however, that the name "vitamin" was actually applied to the naturally occurring substances since found so necessary for healthy life.

Modern scientists have determined the amounts of specific vitamins that man needs and thus enabled physicians to prescribe vitamins, either individually or in combination, to combat dietary deficiencies. Special formulations of vitamins help bolster the patient during especially trying periods of his life. For example, the multi-vitamin Obiron is specifically designed to fortify health requirements of the expectant mother. Also, ASF multi-vitamins have been formulated to fill special needs of the patient undergoing physical or physiological stress, such as surgery, severe burns and serious infections.

The vitamins are quite versatile. Having proved their value in medical practice, they have also been put to good use in many industries, including cosmetics, baking, food packaging and photographic supplies. Some of the vitamins are now being manufactured synthetically and are tailored to meet the specific needs of the industry in which they are used. One of these, synthetic dry vitamin A, produced by the Chas. Pfizer & Co., Inc., has been found useful as a skin nutrient in cosmetics. It is also used to enrich dry milk and other food products. It is through the pioneering of the British Navy that we today recognize the versatile vitamins and enjoy healthier and happier lives.

Isn't it funny how a dark corner gives a man a bright idea.

YOUR NEW SOCIAL SECURITY

Most older workers know that social security payments are "retirement" payments and cannot be paid unless the worker has "retired." It is believed, however, that there is some confusion as to the meaning of the term "retirement."

In the first place, restrictions against persons working while receiving payments applies only to the age group from 65 through 71. After a person becomes 72 years of age, he can receive any social security payments to which he is entitled regardless of the amount of his earnings. People in this group should contact their social security office immediately and file application for payments if they have worked as much as 1 1/2 years in employment or self-

INTEREST LOW IN ANTELOPE OVER TEXAS

A surprising lack of interest in the October antelope hunts was reported by the chief clerk of the Texas Game and Fish Commission.

He said applications are running well behind the usual pace when, ordinarily, requests greatly exceed the number of permits to be granted.

The commission has authorized hunts in both the Panhandle and west of the Pecos. About three hundred head of buck antelope are earmarked for harvest in the 28-county Panhandle regulatory area, and more than six hundred buck and doe antelope are listed as surplus west of the Pecos.

The clerk emphasized that interested persons should NOT—repeat NOT—send in their money for the \$5 individual special licenses, but rather should write first for an application blank and instructions.

Separate drawings for the two hunts will be held in commission headquarters in Austin in early September. Midnight August 31 is the deadline for mailing applications.

TO THE CREDIT OF THE SENATE

The Senate was urged to extend the provisions of the minimum wage law to certain enterprises, including retailing, which have been exempt every since the law was first passed in 1938.

Retailing is a purely local enterprise—every store must compete locally, and it will succeed or fail as it meets varying local desires and needs.

SUPPOSE THE POSTMAN WOULDN'T SERVE YOU!

There has been much discussion of the "preference" clause in laws relating to the sale of government-produced (which means tax-subsidized) electric power.

Under the preference clause, government electricity must first be offered to publicly-owned distribution systems, and only what they don't want, if any, can be sold to the taxpaying, publicly-regulated investor-owned utilities.

In principle, that's exactly as if the post office had a rule whereby each postman gave preference to a certain small group of people on a route and served the rest of us only if he happened to have any time left.

Efforts have long been underway to eliminate the preference clause. If and when they succeed, it will be a victory for fair play in a nation which is supposed to be dedicated to equality and justice for all.

WHERE TIME IS FOR SALE

A box of groceries representing the average housewife's weekly food purchases might not at first glance seem particularly representative of progress.

In addition to greater food variety and quality, today's housewife can buy another priceless commodity at her local food store—and that is time.

Groceries have changed a lot in the past 30 years and so have the stores which make them available to us. From the standpoint of quantity and sheer overwhelming variety of quality foods, the modern super market has become a veritable Pandora's box of culinary delights.

An hour's take-home pay will buy much more of nearly every kind of food now than it would in 1925. The average person eats more and better now than in those days and it still costs the same 25 per cent of his income.

The fellow who says that it is useless to plant seeds in his yard is just a pessimist. After all, the birds enjoy them as a variety in their diet.

MERRY CAMPING TRIP

A party of young people chaperoned by Mr. and Mrs. Byrd Guill enjoyed an outing at the W. O. Mathis place on McClellan Creek the first of the week.

of the fact that there were 13 members of the party, the only unusual incident occurring during the trip represented good fortune rather than ill.

WALLACE SIMS HURT

Wallace, the eight year old son of Mr. and Mrs. D. B. Sims, received some serious injuries Wednesday afternoon.

to run when just opposite the C. C. Cooper house and dragged the little fellow to the city park fence, before she was stopped by Erwin Rice, who was coming that way in his car.

When picked up the boy was still conscious, but his back and head were badly bruised and mangled and his left leg was broken just above the ankle.

HOBBOES TAKE PUSH CAR

Quite a little excitement was caused here last Saturday morning when it was learned that the local officers (three of them) had rounded in seven tourists, from whom they wanted to assort three who were charged with having appropriated the push car at Ramsdell with which to relieve the tedium of tiresome tramping.

SYMBOL OF QUALITY

AN ELECTRIC FREEZER IS A

Flavor Saver!

Two Styles... There's room in the smallest kitchen for a food freezer — so take your choice — upright or chest type.

Time Saving... Go to the store when you want to — that makes shopping a pleasure — and keeps you in command of your time and budget.

Economical... Savor the moment meals, with a freezer, have a way of being expensive. You're ready, though, with a freezer, for economical last-minute meal planning.

Freezing "locks in" the goodness that Nature gave the fruits and vegetables you enjoy so much. Keeps all the vitamins and nutrition in the foods, too.

A home freezer will pay for itself in economical purchases when quality is high and price low.

You can bank on a food freezer for money and flavor dividends — all year long.

Rx For Posterity
 The hands of a physician are skilled in using the scalpel, the syringe, the splint. These very same hands also have proved remarkably successful with the quill, pen and typewriter.

The writing abilities of physicians are thought by many to be limited to illegible scribbling on a prescription blank. This is far from the truth, for physicians have made considerable contributions to literature throughout history.

One of the first doctors-turned-writers was Johann Christoph Friedrich von Schiller, the famous dramatist who gave up medicine to write. Schiller was jailed in his native land and forbidden to write; but he fled his domain, abandoned medicine entirely and spent the rest of his life writing great dramas.

Other well-known names in literature who practiced the art of healing include the dramatist Anton Chekhov, fiction writer Tobias Smollett, the poets John Keats and Oliver Wendell Holmes.

Sir Arthur Conan Doyle, creator of Sherlock Holmes, also practiced medicine before turning to the quill.

Of the contemporary authors, W. Somerset Maugham, Albert Schweitzer, A. J. Cronin and William Carlos Williams are some of the more successful physicians-authors.

Williams, one of the nation's leading poets, explains that writing enabled him to detach his mind from his life as a physician, and, in turn, has made him a better doctor.

More than half of all women employed in the U.S. are married and living with their husbands. One fourth are single. The remainder are widowed, divorced, or separated.

It takes five years and \$20,000 to train a rookie into a fully competent police officer. After training, many go into some other work because of poor pay in the law enforcement field.

Auto Comes Out Second Best When Tangled With Train

"An intelligent driver doesn't argue with a train."

In those words E. C. McFadden of Dallas, president of the Texas Safety Association, Inc., warned motorists to use extra caution at highway-rail intersections. McFadden spoke in support of the Signs of Life program which the Texas Safety Association, the Department of Public Safety and the National Safety Council are conducting in Texas.

"In 1954," McFadden said "there were 167 motor vehicle-train grade crossing accidents in rural areas despite the fact that highway-railroad intersections in Texas are marked by signs and signals to protect the motorist and pedestrians."

McFadden added that "many motor vehicle grade crossing accidents occur at crossing protected by gates, flashing lights, bells, wig-wag signals or watchmen, in addition to such devices as the crossbuck and the round approach sign. The kind

and amount of protection varies with the complexity of the situation.

"These Signs of Life which the railroads and government agencies furnish can be of no help to motorists who ignore them—as many do," McFadden said. "And it's certainly a mystery why drivers will be so careless when it's obvious that the automobile always comes off second best in any encounter with a train."

McFadden advised both motorists and pedestrians to observe the following rules in crossing railroad tracks:

1. Be sure all tracks are clear. Even though one train has gone by, there may be a second train coming.

2. Where there are no lights listen for the passed tracks: roar or audible signals, listen for the train whistle and the noise of its approach, and look both ways.

3. Where there are other protective devices, wait until they have stopped operating.

"Signs of Life are for your protection," he said. "Heed them and you'll live longer."

MILLIONS OF parts, thousands of tons of delicate and complicated machinery, 11,570,000 square feet of area and upwards of 45,000 people on the job! That's what Lockheed Aircraft Corporation uses in producing aircraft ranging from bulged-top radar planes for military, below, to domestic airliners.

INSTALLING intricate electrical wiring system of luxurious Constellation is typical of tasks confronting company's workers. One of every five is a woman.

AT SPRAWLING California division plant in Burbank, workmen are often dwarfed by such production line features as three-bladed, 15-foot propellers on giant 66-passenger airliners.

CLOSELY LINKED with Lockheed operations is motor truck transportation. Its big trucks and trailers are more than transport vehicles—they are an extension of assembly lines that produce components of aircraft. International trucks, like that shadowed above by Constellation's nose, virtually tie the company's three California factories together.
