COUNTY AGRICULTURA

It is my understanding that both Wheeler and Collingsworth Counties are having a moderate infestation of cotton insects, namely cabbage loopers, garden webworms and army worms.

On Monday of this week I made colored pictures of the various a brief injection tour of the county to determine if such infestation was present in this county.

Although time did not permit a very detailed inspection, I did not find any fields that would warrant treatment. However, I believe thte situation would be worth watching, since all three of these worms spread very rapidly when they hit

Your most economical method of control is through the use of MEAT IMPORTS 3 to 4 lbs. per acre of a Toxaphene -DDT (2-1 mixture),

You will not have any trouble

spotting potential damage. Inspect cotton daily, particularly around the edge of the fields. The webworm usually works on adjoining patches of careless weeds and then moves in on your cotton. I placed a 1963 cotton insect control guide at the McLean Gin, along with two booklets that have
