NUMBER 29

## Sales Tax Return Better In 1977

State Comptroller Bob Bullock said Friday that city sales tax rebates to date for 1977 are running a healthy 20.3 percent ahead of last year. McLean has received \$10,049,36 so far in 1977, whereas in 1976 they only received \$8,533.33.

Bullock said his office mailed rebate checks totaling \$3.6 million to 868 Texas cities for their July share of the one percent city sales tax.

The July checks boost to \$190.7 million the total that has been rebated to Texas cities for the first seven months of this year. This compares to \$158.6 million for the same period last year. McLean received a check for this period of \$1,004.49.

These rebates are just another sign of the strength of the Texas economy, Bullock said.

He also noted that state sales tax collections in Texas are registering a bigger percentage increase than any other state.

Bullock said the City of Houston will get a July sales tax rebate check for \$4.7 million and Dallas and San Antonio will receive \$3.2 million and \$1.3 million, respectively.

## Blood Pressure Clinic July 28

There will be a blood pressure clinic held Thursday, July 28 at the Senior Citizen's Hall on Main Street.

Everyone is invited to come by and have your blood pressure from 1 to 4 p.m.

Mr. Vernon Schultz was a recent guest of the William McElroys. He teaches English in the Arizona schools and is the author of "Southwestern Town: Wilcox, Arizona", available in our local library.

## New Arrivals

Mr. and Mrs. Keith Fields of Groom proudly announce the birth of a daughter born in Pampa on July 4 weighing 7 pounds 6 ounces. She was named Stacy Jean. She has one brother, Matt, who is two and a half years old.

Her grandparents are Mr. and Mrs. Edward Vincent of Lefors and Mr. and Mrs. Billy Fields of Groom.

Great-grandparents are Mr. and Mrs. Irwin Anglin and Mr. and Mrs. R. L. Fields of Groom.

Great-great-grandmothers are Mrs. Minnie Eschle of Groom and Mrs. Katie Vincent of Pampa.

## National Farm Safety Week

July 25-31, 1977

## Farm Safety Week Gov. Briscoe

Governor Dolph Briscoe has proclaimed July 25-31, Texas Farm Safety Week built around the theme "Safety is a Good Investment." Purpose of the observance is to call attention to methods of preventing the needless accidents on Texas farms and ranches that annually take 200 lives and cause multimillion dollar losses.

Governor Briscoe pointed out that safety must be a personal commitment and an integral part of everyday living. It's up to each farmer, he said, to protect priceless human resources through such practices as: developing a home fire escape plan, storing clearly marked poisons well out of children's reach, training family and workers to perform tasks safely, and providing and wearing appropriate protective equipment so that accidents aren't given a chance to happen.

Since traffic, firearms and drowning accidents pose the greatest hazards for Texas farm families, a specific investment in their prevention would be well during Farm Safety Week.

Drivers can learn to avoid collisions in the eight-hour National Safety Council Defensive Driving Course. Offered regularly around the state, it can also save graduates 10% on their automobile insurance. More information is available from the Texas Safety Association, P. O. Box 9345, Austin, TX 78766. The National Rifle Association's Hunter & Firearm Safety Courses (coordinated by the Texas Parks & Wildlife Dept.) and the American Red Cross First Aid and Learn-To-Swim Courses also provide valuable safety training.

## Baptist Youth Camp July 25-29

Youth camp will be held on July 25-29, according to Joe Holt, youth director at the First Baptist Church. Pan Fork Camp is located between Shamrock and Wellington. All youth are urged to attend if possible.

## Hay Potential Still Good

Dry weather has limited hay making in some sections of Texas this year, but there is still plenty of time for good hay production, says a pasture and forage specialist with the Texas Agricultural Extension Service. Due to the long growing season and the fact that most of the state generally receives good late summer and early fall rains, a good hay crop is still possible. It's important to fertilize hay meadows now so that the grass will be able to make good growth once the rains come. Cutting grass at the proper stage of growth will also insure top quality, high protein hay.

## HOSPITAL NOTES

McLean Hospital visiting hours are as follows:

RICK MANTOOTH

## Rick Mantooth Is In "Texas"

The energy and skill of members of the "TEXAS" company leap from the stage in this twelfth season of Paul Green's musical drama playing in the Paso Duro Canyon. Some of the actors and singers and dancers and riders and technicians and members of the hospitality crews who present it have connections with your community.

They will perform nightly except Sunday through August 20.

To join the 900,000 who have already seen "TEXAS", write Box 268, Canyon, Texas 79015 or call 806-655-2182. It is well to make reservations in advance.

Rick Mantooth (Branson Hill) is a three year veteran of the company, and is a member of the dance troupe. Graduate of Canyon High School, he brings with him a wide range of interests and abilities. His vocal talents have earned him numerous medals in U.I.L. solo and ensemble competitions. He performed on the CHS stage in the many productions including: "Hello Dolly," as Barnaby; "Oliver," as Noah Claypole, and in "Antigone," District Contest Play, All-Star Cast. Besides music, Rick was involved in FTA, Student Council, Drama Club and Theatricals. He won a scholarship at WT for Campus Services.

Rick Mantooth is the grandson of Mr. and Mrs. Odell Mantooth.

## 13 Drown Over July 4 Holiday

Thirteen persons died in Texas waters over the July Fourth holiday, well below Parks and Wildlife predictions of some 25 deaths.

P&WD water safety official William Walker said a preliminary check with department law enforcement offices around the state shows the Dallas-Fort Worth region accounted for the most drownings -- six -- with three in the Houston area and the remainder scattered about the state.

Last year 23 people died during the holidays.

## Revival Service To Be Held At Local Church

The Carter Family, featuring Jimmy & Brenda, with Todd & Tim will be in revival services July 20-31 at Assembly of God Church at 4th and Main Street.

This family is blessed with an exciting ministry in song and the preaching of God's Word that will excite you as you listen.

Jimmy was called of God at the age of 16 yrs. to preach the Gospel and has been traveling preaching and singing since that time. Having traveled extensively this family has heard the heart throb of America.

You are urged to attend these services nightly at 7:30 p.m. and let them share this exciting message with you.

## Gina Layne Elected Lion's Sweetheart

Miss Gina Layne succeeds Miss Maridale Glass as Lions Club Sweetheart. Gina is the daughter of Mr. and Mrs. William Layne and is a senior at Mills.

She is an active tennis and basketball player. Musically, Miss Layne is adept on both the piano and alto saxophone. A member of FHA and FBLA, Who's Who is Music and the Society of Distinguished American High School Students, Miss Layne plans a college career in journalism.

Lion President Wilson Boyd presented the new Sweetheart with a special International Lions pin enclosed in a heart shaped backing.

Anyone interested in starting a fast pitch soft ball team is asked to contact Carey Don Smith or Thacker Haynes.

Mr. Theo Heasley is a patient in St. Anthony's Hospital in Amarillo, where he had surgery.

## Fire Danger!

AUSTIN--Because of the very dry condition of rangeland in several parts of the state, Agriculture Commissioner Reagan V. Brown warns summer travelers and campers that carelessness could easily trigger costly and dangerous range fires.

Brown said that vast areas of valuable rangeland could be turned into wasteland "in a matter of minutes" by cigarettes or matches thoughtlessly thrown from vehicles or by unattended campfires.

COURTESY--YOU ARE SHARING THE ROADWAY WITH NUMEROUS OTHER HIGHWAY USERS. BY SHOWING RESPECT TO OTHERS, YOU WILL EARN THEIR RESPECT. AVOID CROWDING OTHER VEHICLES AND DEMANDING OTHERS' SPACE. SIGNAL YOUR INTENTIONS EARLY AND NOTE THE SAME IN OTHERS.

Summer is quickly moving toward fall, but there's still plenty of time for Texans enjoy their vacations with picnics, trips to the beach and lakes and mountains.

And, there's time for many people to have those pleasant events ruined by a common problem--food poisoning, says the Texas Department of Health Resources.

It's unfortunate, but food poisoning is a frequent result of improper food handling, particularly when the weather is hot, says I. M. Doughty Jr., Director of the Food and Drug Division of the Department of Health Resources.

Food poisoning can be carried with you in your picnic basket or obtained at a cafe, cafeteria or a church supper. Or says Doughty, it can be gotten at home.

At the bottom of this pain and misery may be a bacterial infection called salmonellosis. It is commonly known as food poisoning and often is credited by individuals as being a 24-hour virus.

Health authorities can tell anyone what causes salmonellosis and how to prevent it, but it continues to be a health problem.

The term "salmohellosis" refers to infections caused by any of the numerous members of the genus salmonella. Some 900 varieties are known and they may inhabit most species of warm-blooded animals and many cold-blooded vertebrates. Major reservoirs of human salmonellosis are in domestic livestock, swine and poultry. Organisms may be transmitted to man either directly from animals or through contaminated products of animal origin. Not overlooked in importance is the human carrier.

The most dramatic and highly-publicized aspects of salmonellosis are the food-borne infections which occur in large groups of persons who have consumed a common contaminated food, says Doughty. In this type of contamination, the food most likely has been prepared in advance and then held in such manner that the bacteria had an opportunity to multi-

ply. Perhaps you've read or heard of such outbreaks which followed a banquet or picnic.

The Texas Department of Health Resources is so concerned with the problem of food-borne infections that it sponsors courses in teaching food hygiene. Its regional offices and local health departments help carry out training programs for food handlers. And, films and literature are available on the subject from the Public Health Division. In addition, periodic inspections are carried out at food handling establishments.

Many of the foods you buy raw and prepare may have salmonella in them. But by proper handling, you can neutralize the dangers from infection. Your home cutting board could be the source of illness unless it is properly washed using hot water after cutting up raw meat and poultry. Bacteria can build up in cracks and crevices and contaminate other foods--or even the meat after it is cooked and placed back on the cutting board.

In some ways, food-borne illness is a matter of chance. Five factors must come into play to produce it. You must, of course, have bacteria present, and you need growth-supporting temperatures, suitable food, moisture and time.

"Improper sanitation or improper refrigeration and heating are the main causes of food poisoning in humans. Almost without exception in food poisoning cases, the food was contaminated after having been cooked and allowed to stand at temperatures which encouraged bacterial growth," says Doughty.

Harold Bredthauer, supervisor of the Bacteriology/Mycology Branch of the TDHR laboratories, says these bacteria thrive at temperatures ranging from 45 to 140 degrees Fahrenheit--from cool to warm. "So keeping food just barely cool or warm doesn't help. For commercial establishments," said Bredthauer, "we recommend that food be maintained below 45 degrees or above 140 degrees. Once introduced into foods

under proper conditions, the bacteria begins growing. So time is important between fixing and eating the food. The shorter period the better. And, beware of left overs which have been off refrigeration for long periods, said Bredthauer.

"Some of the things you are most likely to take on picnics are the high protein, moist foods in which germs thrive," Bredthauer noted. "These include milk, milk products, eggs, meat, poultry, fish, shellfish and such favorites are cream pies, custards and potato salad." The extent of the salmonella problem is so great that the federal government has launched an attack on salmonella and other food-borne diseases. Consumer education is being given top priority.

Luckily for Texans, the quality of food handling in

the state is such that few large outbreaks occur. But there's always that possibility. And with hot summer temperatures, the Texas Department of Health Resources advises everyone going camping or picnicking: keep those cold foods cold and the hot foods hot. Picnicking is a great summertime pleasure, so add to the pleasure with proper food handling.

"Isn't that a lot of money just to make puzzles?"

### 4-H Horsemen To Compete

Top 4-H Horsemen in Texas will be competing at the State 4-H Horse Show, July 26-30, at the Astro Arena in Houston, announces a horse specialist with the Texas Agricultural Extension Service. The open invitational

portion of the show will be held July 27-28. The regular show of entries qualifying for district competition begins with the showmanship class the afternoon of July 28. Finals in the open classes will be held that evening, and finals in the regular show will be held Saturday evening July 30.

MRS. GREG C. TOLLESON

### Cherrie Billingsley Becomes Bride of Gregory Tolleson Friday, July 15

Cherrie Joette Billingsley became the bride of Greg C. Tolleson in a double-ring ceremony at 7 p. m. Friday, July 15 in the United Methodist Church of McLean.

The Rev. Zirl A. Myers, pastor of the Assembly of God Church of McLean, officiated the exchange of vows. Special music was presented by Ida Hess of McLean, with Becky Mathews of Hutchinson, Kansas as soloist. Jami Mercer of Dallas re-

gistered guests.

The bride is the daughter of Mr. and Mrs. Joe Billingsley of McLean. Parents of the bridegroom are Mr. and Mrs. Carrol W. Tolleson, also of McLean.

For her wedding, the bride chose a formal gown of candlelight organza over bridal taffeta. The gown was designed with a Victorian neckline of scalloped lace and a sheer yoke of Belgian princess lace. Her empire bodice was banded

in satin and enhanced by a double flounce of lace forming a deep vee. The softly gathered A-line skirt fell to a scalloped lace hem which swept into back fullness, cascading into a chapel train.

She wore a matching lace coil enhanced by a soft satin bow and a full length veil of soft bridal illusion trimmed in lace.

Her attendants wore pastel halter dresses with wreaths of flowers in their hair. Attending the bride as maid of honor was her sister, Susan of McLean.

Bridesmaids were Teresa Cheatham of Amarillo, Rose Helen Dwyer of McLean and Debbie Seitz of Mobeettie.

Amanda Henderson of Amarillo and Teresa Jones of McLean were flower girls. Candelighters were Kim Brister of Pampa and Guy Skelton of Dimmit.

The bridegroom's best man was Todd Dorsey of Amarillo. Groomsmen were Mike and Buddy Newhouse of Clarendon and Ronnie Heasley of McLean.

Colby Henderson of Amarillo was ring bearer. Ushers were William Mercer of Amarillo, Van Horn and Marshall Hanes, both of McLean and Gary Skelton of Dimmit.

A reception followed the ceremony. Members of the house party were Natalie Morris, Brenda Heasley and Toni Wynn, all of McLean. Others were Jana Mercer of Dallas and Sherri Rollison of Pampa.

Rice girls were Sandy Brister of Pampa and Tracey Jones of McLean.

The bride is a 1977 graduate of McLean High School and will attend Amarillo College this fall. Her husband is a 1976 graduate of McLean High School and is employed by McLean Cattle Co.

After the wedding, the couple departed for a wedding trip to Lake Isabel, Colorado.

MR. and MRS. BILLY SNELL BENNETT

### Leslie Karen Back and Billy S. Bennett Exchange Vows In Bride's Home

In a candlelight ceremony Saturday, June 18, Miss Leslie Karen Back became the bride of Billy Snell Bennett, Jr., in the home of her mother, Laverne Back, 516 Walnut.

Parents of the bridegroom are Mr. and Mrs. Bill S. Bennett, Highlands, Texas.

Jeree Boyd, pianist, played a program of nuptial music preceding the ceremony, and the traditional wedding march. Gay Simpson played and sang "The Twelfth of Never" at the beginning of the ceremony and "Evergreen" at the conclusion of reading of the vows.

David Fultz, Church of Christ minister of Guymon, Oklahoma, officiated at the double ring ceremony as the couple stood before an archway outlined with greenery and centered with a pair of doves. Baskets of palm flanked the archway and a candelabra placed on a Florentine gold candlestand completed the setting.

The bride, given in marriage by her father, Richard Back of Oklahoma City, wore a gown of candlelight silk organza scattered with alencon lace appliques decorated with seed pearls. Her shoulder length veil of illusion was attached to a Swedish crown of lace and pearls, and she carried a cascade bouquet of gardenias, white roses and gypsophilla.

Miss Halcyon Back, sister of

the bride, was maid of honor, and Molly Starnes of Highlands, Texas, cousin of the groom, was bridesmaid. Joy Davis, Weatherford, Oklahoma, cousin of the bride, was flower girl. Honor attendants for the bride wore candlelight organza embroidered in yellow and green roses over yellow floor-length dresses.

Bill S. Bennett, father of the groom, and David Bennett, brother of the groom, were honor attendants for the groom. Dick Back, brother of the bride, seated guests.

A reception was held in the home immediately following the ceremony. The serving table was laid with an imported cut-work linen cloth. The three-tiered wedding cake was decorated with yellow roses and topped with white satin wedding bells. Aunts of the bride, Mrs. Scott Shurley, Chicago, Illinois, served the cake, and Mrs. Willie Harris, McLean, poured.

Miss Gina Layne, pianist, played incidental piano music during the reception.

Mrs. Bennett, a 1971 graduate of McLean High School, attended Abilene Christian University and graduated from the University of Texas in December 1975. She is employed by Gulf Chemicals Company in Houston.

Mr. Bennett graduated from the University of Texas school of Pharmacy in 1974. He is presently attending Dental School at the University of Texas in Houston.

After a wedding trip to Hawaii, the couple will be at home at 14415 Alderson, Apt. 13, Houston, Texas.

Guests were registered by

### Bennetts Host For Rehearsal Dinner

Mr. and Mrs. Bill S. Bennett, Highlands, were hosts at a rehearsal dinner Friday night, June 17, at the Church of Christ Fellowship Hall honoring Miss Leslie Back and their son, Billy, whose wedding was an event of 4:00 p. m., June 18.

The tables arranged in U-shape were laid with white damask cloths, and decorating the head table was an arrangement of yellow roses and gypsophilla. Mint green ribbon streamers and miniature yellow satin roses were placed along between stemmed crystal candelabra holding green candles and rice. Unique rice bags made by Mrs. Bennett with yellow drawstrings and rose trim were favors completing the table decorations.

Guests included the honorees, Leslie and Billy, Mr. Jimmy Starnes and Molly, Highlands, David Bennett, Highlands, Mr. and Mrs. David Fultz, Beth and Harmony, Guymon, Oklahoma, Dick Back, Bettye and Chadd, all of Memphis, Tennessee, Mr. and Mrs. J. B. Buchanan, and Joy of Hobart, Okla., Mrs. Claud Buchanan, Hobart, Richard Back, Okla. City, Jeree Boyd, Gay Simpson and Gina Layne, all of McLean, Mr. and Mrs. Willie Harris, Mrs. Beatrice Street, Laverne Back, Halcyon Back and the hosts.

Bettye Mason, Memphis, Tennessee, houseguest of the Backs.

Out of town guests were:

Mr. and Mrs. Robert Fuchs, Pflugerville, Mr. and Mrs. Jimmy Starnes and Molly, Highlands, Mr. and Mrs. Bill S. Bennett, Highlands, David Bennett, Highlands, Mrs. Claud Buchanan, Mr. and Mrs. J. B. Buchanan, Hobart, Okla., Mr. and Mrs. Scott Shurley, Chicago, Illinois, Donna Buchanan, Benton, Arkansas, Mr. and Mrs. Johnnie R. Back, Borger, Texas, Bettye and Chadd Mason, Memphis, Tennessee, Wayne Roberts, Covington, Louisiana, Mr. and Mrs. John O'Dell and Joy, Weatherford, Oklahoma, and Bruce Buchanan, Hobart, Oklahoma.

McLean guests were: Mr. and Mrs. Jesse Roberts, Mr. and Mrs. L. M. Watson, Mrs. J. Glass, Mrs. Vera F. Back, and Mrs. Beatrice Street.

Thaw pre-cooked meat and tomato sauce to add to pasta spanish rice or chili for a great hurry-up meal, suggests Mary K. Sweeten, food and nutrition specialist with the Texas Agricultural Extension Service, The Texas A&M

### W. M. U. Meet In Dickinson Home

The W. M. U. of the First Baptist Church met Tuesday, July 12, for their Royal Service in the home of Mrs. J. P. Dickinson.

Mrs. Dickinson served as leader of the program. Some very interesting things were discovered about W. M. U. work in the Mediterranean countries and Islands.

All ladies of the church are invited to attend these meetings.

### GIVE ME THE BIBLE

Timothy was a most fortunate man. He grew up in a home where God's Word was revered and taught. His usefulness in the church as an able helper of the apostle Paul may be attributed to the fact that he was trained up in the nurture and admonition of the Lord. Of him, Paul said, "... from a child thou hast known the holy scriptures, which are able to make thee wise unto salvation through faith which is in Christ Jesus" (2 Tim. 3:15).

As a result of the rich experiences of Bible study, Timothy developed a great faith that merited the enthusiastic praise of the apostle: "... I call to remembrance the unfeigned faith that is in thee, which dwelt first in thy grandmother Lois, and thy mother Eunice; and I am persuaded that in thee also" (2 Tim. 1:5).

There is no need for anyone to be less fortunate than Timothy. We invite young and old alike to study the Bible with us in public assemblies on Sunday and Wednesday of each week or in private classes, at your convenience, at any time day or night. Faith comes only by hearing the Word of God (Rom. 10:17) and faith will save only when it is demonstrated by doing the works God has given His people to do (James 2:17-26). May the living God of Heaven hasten the day when the watchword of all people will be "GIVE ME THE BIBLE."

### Finding A Place To Hunt

Trying to find a place to hunt takes both tact and luck and successful sportsmen know they have to start looking well in advance of hunting season to beat the onrush of hunters heading for the fields.

Most hunters know it is nearly impossible to pull off the road and hunt without getting permission from the landowner as nearly all of the state is owned by someone.

Provisions of the Texas Penal Code makes it a crime to trespass for the purpose of hunting. Landowners don't condone trespassing and often call the law to remove the reluctant hunter.

If you find a place that you want to hunt, ask the landowner. Tracking down the legal owner can be a real hunt itself but, someone in the area knows who owns the property and how to get in touch with him.

Most landowners want to manage wildlife on their property and past experience has taught them the most economical way is by hunting. Hunt Hunting has become a cash crop as grain and livestock prices fluctuate and both day and season leases are available to the hunter.

Since the landowner looks upon wildlife as a cash crop, hunters pay to try their luck at deer, turkey and quail. Lease hunting has both disadvantages and advantages but, charging a fee to hunt is not always a one-sided proposition.

Most landowners catering to

leasing hunting improve wildlife range with an eye toward better hunting. Lease hunters know who and how many hunters are on the property and landowners seldom overload a pasture with guns.

The hunting lease between the hunter and landowner can be for a day or the season. Seasonal leases allow the hunter to return for frequent hunts and a knowledge of the area increases his chances for success. Day hunting is more convenient for the hunter with limited time afield but, is usually less expensive.

The hunting lease between the landowner and sportsman should spell out the exact conditions of the hunt such as species to be hunted, areas open to hunting and how many hunters will be allowed on each area.

All of these conditions written down before hunting season begins will eliminate a misunderstanding later in the season.

There are still landowners who will let you hunt without charging a fee but, they

are becoming fewer and fewer as hunting pressure increases and habitat decreases across Texas.

### Cooperative Leaders

Some 2,500 cooperative employees, managers and directors, educators, youth leaders, young farmer couples and government staff people will be participating in the 1977 National Institute on Cooperative Education (NICE) of the American Institute of Cooperation at Texas A&M University, August 15-18. Theme of the weeklong meeting will be "Cooperation-- Making It Work." Particular emphasis will be given to finding ways to make cooperatives work, particularly in marketing and agricultural products, says a professor of agricultural cooperation at Texas A&M.

Safe operating practices for lawn mowers include shutting off the mower when moving it from one level to another, when leaving it unattended, and when removing debris.

## THANK YOU

To our friends and customers in McLean and surrounding area:

We wish to thank each and every one for your patronage while here in business. We invite you to stop and visit with us in our new location in Shamrock, Texas at the tower station where we have moved.

Thanks again.

## THE FAMILY LAWYER

### Value of Personal Belongings

Your coat disappears from a checkroom. Your curtains are damaged at the laundry. Your couch is stained by water leaking down from an upstairs apartment. Assuming you are entitled to compensation, how much money can you collect? What is the value, in dollars and cents, of your personal belongings?

A simple test was suggested by the proprietor of a restaurant, after a woman's coat vanished from his checkroom.

"We will pay her what it would cost to buy a secondhand coat of similar quality," he said in a court hearing. "After all, that is what she lost—a secondhand coat."

But the court awarded her substantially more than the secondhand value. The judge said that, in her eyes, it was her own personal garment—not just a "secondhand coat."

Generally speaking, in fixing damages for personal belongings, the law will take the viewpoint of the original owner rather than of the person responsible for the loss. Accordingly, it relies mainly on the original cost of the item (minus depreciation).

What if the lost or damaged merchandise was part of a matching set? May you collect for the entire set? The law usually says yes, again taking the viewpoint of the owner.

Thus, when five out of a set of eight matching drapes were ruined at the laundry, a court held the laundry liable for all eight. The judge said that since the customer would have to buy a whole new set, this was the truest measure of the harm she had suffered.

Nevertheless, the law does not ordinarily grant compensation for values that are strictly sentimental.

For example, suppose those drapes happened to be especially precious to the woman because they had been made by her late mother. Obviously, this would heighten their value in her own eyes.

Yet, because this factor is so purely personal, it would not be counted against the laundry as an element of damages. The law would consider it—fair to place upon the laundry, a special responsibility about which, when it accepted the drapes for cleaning, it knew nothing at all.

**Agricultural Agents**  
 Texas A. & M. College  
 Extension Service

by Joe VanZandt  
 The hot, dry weather recently has been conducive to an increase in spider mites on a lot of different plants. As the weather gets hot and dry the mites can build up to damaging populations very quickly.

We had several ornamental plants brought to the Sick Plant Clinic, Monday with spider mite problems. Spider mites can also attack field crops as well.

Spider mites usually begin colonies on the underside of leaves. Early plant damage is seen as "sandblasting" at the site of the colony. Also, fine webbing may be found around the site of the colony.

Chemical control of mites is often difficult because of resistance to the chemical and difficulty in getting the chemical on the mites. Repeat applications of a miticide are generally required for effective control. Read all label instructions carefully before using a miticide. A leaflet-1244, available in the County Extension Office, contains recommended chemicals to use.

Spider mites are generally highly susceptible to destruction by water. When feasible, a fine, hard stream of water through an ordinary garden nozzle will usually kill most mites present. The nozzle should be held 4 to 8 inches from the infested leaf surface and moved across the leaf to get full coverage. The water stream should be directed at the surface where most mites are present and each leaf should be completely wetted.

Destruction of the webbing by water washes most mites from the plant and causes others to become helplessly entangled. In either case, those mites wetted by water are killed and cause no further damage. However, eggs are unaffected by this procedure and a few mites are frequently missed in the initial washing. Thus, washings should be repeated two or three times at 3- to 5-day intervals to kill newly hatched mites and escaped adults.

## VEGETABLES BEAT SUMMER HEAT

Gray County gardeners can minimize harmful effects of hot weather stress in vegetables. In planning for vacation time away from home remember to arrange a caretaker for your garden--someone you can trust to carry out your instructions on irrigation and harvesting. The usual high air temperatures of the Plains in July cause vegetable plants to give up water vapor from their leaves (transpire) rapidly. For example, fruiting tomato plants will require an irrigation of at least 1 to 1 1/2 inches every 3 days. This is equivalent to a volume of 60 to 90 gallons per 100 square feet. You can check the delivery rate of your watering system by funneling the water into a 5 gallon pail, taking note of the time required to fill it. Then you will know how long to run your system to get the desired volume for the size of your garden.

Maintain a 3-inch layer of mulch to keep the soil temperature from rising above 75°F. A thick layer of mulch will save on water especially while your plants are young and prevent weed growth, too.

**ACCIDENT PREVENTION**  
 Special attention is directed to accident prevention on the farm and ranch during National Farm Safety Week, July 25-31.

A safe farm can help save lives and prevent a lot of suffering and disruption of family life. Also, it can help keep people on the job and doing more productive work. Besides being attractive, a safe farm usually has facilities and equipment that are properly maintained for maximum safety and this same equipment will usually be more productive, efficient and economical. Yes, safety is indeed a good investment.

Wash swimsuits regularly to give them longer, brighter life, advises Marlene Odle-Kemp, clothing specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

Mrs. Jack Bailey is a patient in St. Anthony's Hospital in Amarillo where she had surgery.

## Summer Heat

You can't really beat the heat.

Whether it's the heat or the humidity, or both, it's hot in almost all of the United States in July. After weeks of sweating and steaming, it's not uncommon to find the heat is beginning to wear you down.

You can't do anything about the outside temperature, you can avoid it if you're fortunate enough to work and live in air-conditioned comfort, but it still will be hot outside.

The American Medical Association points out that there are some things you can do to be more comfortable -- things that can help you beat the heat.

Stay out of the sun as much as possible, especially during the middle of the day when rays are hottest. Wear light, loose clothing. The ladies have the edge over the men in this respect. Drink more liquids than usual, but take extra salt only on your physician's advice, particularly if you have liver or kidney trouble or a heart condition.

Take a shower or dip in the pool once or twice a day to cool off. Get plenty of rest and sleep. Eat your regular diet and don't go overboard on cold cuts and salads, unless you like them anyway.

Get up early in the morning to do your heavy work on the lawn or garden. Or work at dusk in the evening, but try to avoid heavy exertion during the hottest hours

## INVEST IN ACCIDENT PREVENTION

With National Farm Safety Week set for July 25-31 it's especially a good time to give more consideration to accident prevention, says an agricultural safety engineer with

of the day. There is sound physical reason behind the siesta custom of the tropics.

You need exercise in the summer as well as in the winter, but don't overdo it, especially on extra hot days. Don't overdo physical exertion, whether at work or at play.

The more relaxed outdoor life of the summer months has many advantages to compensate for the heat. Stay relaxed and use common sense and you can beat the heat--at least somewhat.

the Texas Agricultural Extension Service. The theme of the week is "Safety is a Good Investment", and emphasizes that accidents result not only in personal injury but in costly equipment damage, medical expense, loss of valued talent and skills of agricultural producers and workers, and production

"Immunization Isn't Just  
 Kid Stuff". Adults need pro-  
 tection, especially against  
 such diseases as diphtheria  
 and tetanus, says the Texas  
 Department of Health.

## It's Never To Late To Get A Vocation

It's never too late to learn  
 new skills or change voca-  
 tions. Carl Hardy, a 65 year  
 old graduate of the boot and  
 shoe program at TSTI in Ama-  
 rillo, is living proof of that  
 statement.

Before Carl enrolled as a  
 student at TSTI's mid-con-  
 tinent campus in March 1976,  
 he and his wife were enjoy-  
 ing his retirement by traveling  
 throughout North America.  
 Prior to the former California  
 man's retirement, he served  
 24 years in the U.S. Marine  
 Corps and retired at the rank  
 of Sgt. Major in 1954. In  
 1956, Hardy graduated from  
 Southwestern University Law  
 School at Long Beach, Cali-  
 fornia. The insurance claims  
 business was his next step in  
 the civilian world. Hardy was  
 a partner in the J. V. Jame-  
 son and Associates in San Jose,  
 California until 1967. Then  
 he opened his own claim ser-  
 vices office in San Luis Obis-  
 po, California and worked  
 there until he sold out in  
 1974 and retired.

While travelling with his  
 wife in Texas in December of  
 1975, the former marine  
 sergeant happened to watch  
 an NBC news story about the  
 boot and shoe operations pro-  
 gram at Texas State Techni-  
 cal Institute in Amarillo.  
 Hardy said, "When I first  
 heard of the boot and shoe  
 school, the idea of learning  
 new skills intrigued me. I  
 have always felt that if a per-  
 son became tired or bored  
 with what he's doing...it's  
 time to change."

In looking back on the train-  
 ing that he received at TSTI,  
 Carl was able to make a com-  
 parison of a vocational school  
 to an academic oriented  
 school. "At an academic  
 school, you spend most of  
 your time learning theory.  
 You learn to use the tools of  
 your trade after graduation.  
 At a vocational school such  
 as TSTI, you learn the tools  
 of your trade while attending  
 school leaving only the de-  
 velopment of professionalism  
 after graduation," Hardy  
 said.

But no matter how young or  
 old a person is, the retired  
 marine sergeant and insur-  
 ance claims man agreed that  
 it is never too late to learn  
 the work that you really like  
 to do.

## Carbon Monoxide Will Kill

The same fire that gives  
 meat its delicious smoked  
 flavor also produces a poten-  
 tially deadly gas.

The dangerous gas is carbon  
 monoxide, CO, a tasteless,  
 colorless, odorless gas pro-  
 duced every time a carbon-  
 containing material burns.

The Texas Medical Associa-  
 tion says CO combines with  
 blood 200 times more easily  
 than oxygen. If a person  
 breathes air containing a nor-  
 mal amount of oxygen and a  
 moderate amount of carbon  
 monoxide, the blood will be  
 starved for oxygen. When  
 blood cannot supply oxygen to  
 the brain, permanent brain  
 damage or death may result.

Dangerous quantities of CO  
 usually accumulate when a  
 relatively cool, slow fire  
 burns in limited air. Since  
 the gas cannot be seen, smell-  
 ed or tasted, it is hard to de-  
 tect except by the symptoms  
 of its poisoning: drowsiness,  
 headache, tightness across  
 the forehead, confusion, nau-  
 sea and muscular weakness.  
 CO poisoning may cause enou-  
 gh confusion that victims cannot  
 reach fresh air to relieve the  
 symptoms and prevent serious  
 injury.

To prevent a carbon mono-  
 xide attack in your home:

- 1) Provide plenty of fresh air  
 for charcoal grills, barbecue  
 pits and hibachis, especially  
 when used indoors. Better, yet,  
 do not use them indoors at  
 all.
- 2) Some people get CO poi-  
 soning because charcoal brique-  
 tions because charcoal brique-  
 ts were brought inside when  
 they were gray ashes. As long  
 as wood or briquets give off  
 heat, they give off CO.
- 3) Be sure the garage is seal-  
 ed from the house. Never run  
 an engine, especially a ve-  
 hicle engine, in a closed gar-  
 age.
- 4) Before winter, have all  
 heating systems checked for  
 operating efficiency. Make  
 sure vents, pipes, flues and  
 chimneys are tight.

fish normally found in each  
 lake. The remainder of the  
 lakes and their fish popula-  
 tions were not affected by  
 this operation as the chemi-  
 cal dissipated within hours.

Complete information per-  
 taining to fish production,  
 growth rates and ratio of  
 game fish to rough or forage  
 fish will be determined after  
 all the figures are compiled  
 by the P&WD.

These new facts about each  
 lake will be compared with  
 previous surveys completed  
 over the last several years and  
 trends of fish populations will  
 be evident.

The next step for each lake  
 will be the use of electro-  
 fishing gear to collect fish  
 samples not accessible to  
 chemical or net operations.  
 Plans for the final survey with  
 the electro-fishing gear is  
 planned for late July or early  
 August.

Cabbage is one of the oldest  
 food vegetables. In the  
 "Iliad" Homer wrote that  
 Achilles washed cabbages.

## Second Phase Is Completed

The second phase of the  
 management plans for Buffalo  
 Springs lake near Lubbock and  
 McClellan lake near McLean  
 have just been completed by  
 fisheries personnel of the  
 Texas Parks and Wildlife De-  
 partment.

Routine procedures were  
 followed at both lakes as  
 nets were strung across pre-  
 determined coves and a ro-  
 tenone chemical was dis-  
 pensed into the water.

All the fish were collected  
 as the chemical affected their  
 ability to breath. Fisheries  
 technicians using landing  
 nets gathered all species of
