Those boys who left home just a short time ago are carrying the flag—the Stars and Stripes with its message of liberty—toward Berlin. It's not an easy journey for them. Some of them will never reach Berlin and some will never come back home again. Hunnish bullets may cut them down or maim them; poison gas may suffocate them and barb-wire entanglements mangle them. They must fight for days at a time hip-deep in mud and slime. But they are carrying forward the flag—ready to give up their lives that German autocracy may be crushed. They are glad to do it; they only ask to serve that they may save their folks back home in old Texas from the fate of Belgians.

**What Are You Doing?**  
Just what are you doing to back up the boys who are giving up their all—life itself, if needed—to protect you here at home? Are you carrying the flag here in Texas or are you hiding behind it and letting the boys do all? Their shoulders can't bear all of the burdens. They can't do everything for you. If the Texas men in France are to beat the Boche and come back home, they must have the cartridges your Thrift Stamps will buy; they must have the guns, clothes and food your War Savings Stamps will get for them. Are you going to refuse to save your money are you going to keep on using non-essentials, are you going to refuse to buy Thrift Stamps and War Savings Stamps when the Texas Sammie laddies are out there fighting for you?

**Serve and Prosper**  
Money put in War Savings Stamps now saves the lives of men. Less than five years from now the same money will be paid back to you with added interest. You can't lose if you invest in War Savings Stamps, but if you don't buy War Savings Stamps the boys over there will lose—lose their lives, lose the war. Their loss will be yours—what then belongs to you will be the property of the Kaiser. Buy War Savings Stamps now and you and the boys will never lose. Save the boys and save yourself by saving and investing in Thrift Stamps and their bigger brothers, War Savings Stamps. What more can you do?

**Societies Will Save.**  
For every company of soldiers in the field or training in the army camps there should be a War Savings Society here at home. War Savings Societies will save soldiers; they are made up of people who have taken the edge to save their money and invest as they can in war-winning War Savings Stamps. War Savings Societies will aid these boys in getting to Berlin and they will make more certain their return to home in Texas. If you can't be in khaki-colored ranks, at least be in the company of soldier livers here at home by joining a War Savings Society. Are the boys over there asking you to do too much for them when they request a little favor of you?

**Societies Sink Subs.**  
If those Texas sailor laddies come marching home again there must be a War Savings Society for every company of them. Americans have but two big duties today: They must either fight or help the fighters. War Savings Societies will save sailors. They have a man-sized work to do—those sailor laddies and marines from Texas. They have to keep the Kaiser's war boats bottled up in Bremenhaven where they will do no harm to America and our allies. Their duty is to prevent the Hunnish undersea water-wolves from torpedoing our transports and sending Texas lads to join the Tuscania's silent dead. They gladly risk their lives to save the men who marched away from home such a short time ago, or who soon will go.

Long trains, locomotives half hidden in steam clouds, are grinding and lurching and pounding their way over the rails to the east. They are carrying Texas soldiers—your boy and your neighbors' boys—to the ports from where they will sail for France to fight for you who remain at home. They are going—going with prayers in their hearts, smiles on their lips—going to fight for you. Their only hope is that their efforts will save Texas for Texans, America for Americans. They hope to come back when the job is well done and Wilhelm is written as plain Bill. Whether they will return is a matter that rests largely with you. Are you investing in Thrift Stamps and War Savings Stamps which supply the Texas boys with ammunition, food, clothing and things that they need?

## MODERN ROMEO TRUE TO HIS LOVE

Lover Steals Into Morgue to Place Flowers on Bier of Girl.

## DIED 15 YEARS AGO

Since That Time Sweetheart Has Paid Stealthy Midnight Visits to Gaze on Face of One He Lost.

St. Louis.—In the corner of a cold, forbidding room, attached to one of the largest morgues in St. Louis, lies the body of a beautiful girl of twenty. She rests in a glass-covered coffin, a smile upon her lips, and with features as carefully preserved as they were when they pulsed with life and love and hope some 15 years ago. The body has remained unclaimed through all the years, though not forgotten, for at regular periods, a lover, whose identity has remained a secret, quietly slips into the dreary and greswome death chamber to deposit beautiful roses upon the casket and gaze at the face of the woman he had loved in life.

The young woman, fair and winsome, left her home in an Illinois town to become the wife of a prosperous merchant, much older than herself. The love she craved was withheld, because her husband was wrapped up in business affairs. One night the young bride stole silently away and, though she was sought and ultimately found, she refused to return to her husband, and took up her life in St. Louis, where she found work and supported herself meagerly, too proud to appeal to her husband for the care he would have given her.

Met a Younger Lover. One day she accidentally met a young man, a struggling youth who was ambitious to become a lawyer, but was without means aside from his pittance obtained in an attorney's office. Their friendship ripened into love, as they were drawn together by

Deposits Beautiful Roses Upon the Casket.

mutual understanding of each other's struggle and difficulties. The girl planned for a divorce and the young man pledged his scanty funds to aid her purpose.

One evening the young man called at the girl's shabby apartment. He found her dead. An autopsy revealed that she had died from a natural cause, a malady of the heart. The newspapers told of the finding of the body of the young woman, and a few hours later the deserted husband appeared and identified the remains as those of his young wife. He promised to return later to arrange for the burial, and requested that the body be carefully embalmed. Then he disappeared and never returned.

Lover Made Strange Request. The body, with its glass-covered coffin, was placed in a corner of the death room, and some hours later, a man's broken voice came over the telephone, requesting that the body of the girl be held until further orders. That night the death chamber had a visitor, and on the casket reposed a bouquet of roses and a note. The contents of the note were not divulged by the undertakers, but the body of the girl remained unburied.

That was 15 years ago. Through some mysterious potency of the embalming fluid the girl's body has remained as it was in life. Twelve times during the 15 years the undertakers have found fresh flowers on the glass above the girl's smiling face. Each time the lid of the case has been found open and the hair revealing the touch of a caressing hand. Occasionally a note is found, a word of thanks for keeping the promise to save the body from the tomb. The undertakers declare they will never bury the body until the faithful lover either reveals his identity or eventually fails to return to pay his tribute of love to all that remains, earthly, of the one he loved and lost.

## SHE WANTED HOME; MAKES OWN BRICKS

Detroit Woman Shuns Washtub Two Days a Week to Provide Material.

Detroit, Mich.—When she wasn't bending over the washtub at the rate of \$1.50 a day, Miss Kate McDonald was making bricks at the rate of 320 a day until she completed 8,000 of them—enough to build the home of her dreams.

Eighteen years ago Miss McDonald, washerwoman, cook, brick manufacturer, and general good business woman, found herself alone in Detroit with a

Made the Bricks Herself.

very small capital. She invested in a 20 to 50 foot lot, where she lived in a shabby frame house, alone with dreams of something higher and better than anybody else had in the neighborhood; something of her own design and ingenuity.

But how to accomplish her dream on an income of \$1.50 a day was somewhat perplexing, even to Miss McDonald, until, visiting the state fair one day, she became interested in a brick mold. The mold was purchased and Kate began in a little barn, to sand and cement her dreams.

July 4, 1915, Kate made her first brick, October 20, 1916, she had manufactured 8,000 which to her seemed enough to build another Tower of Babel. She had devoted only two days a week to the task and did all the work unaided.

The dream, which in this case was a ten-room brick house is completed, and is valued at \$4,000.

## THEY BUY TOO MANY BUCKETS

Expert Window-Cleaners Charged With Jewelry Robberies Amounting to \$50,000.

New York.—Sauskin coats by night and window-cleaners' overalls by daytime proved such a contrast as to result in the undoing of two clever New York thieves who are being held on the charge of jewelry robberies amounting to approximately \$50,000.

The men gained easy access to exclusive homes by professing to be expert window cleaners. They bought too many pairs of overalls and too many buckets from the same dealers.

And, according to the history of window cleaners, they dressed too well and spent too much money on Broadway at nights—that is, too much for window cleaners.

## THRILLING RESCUE OF MAN FROM ICE CAKE

New London, Conn.—Tim Tilm, a South Sea Islander, is recovering at the hospital at Ft. Michie, Gull Island, in the sound, from a thrilling experience on a floating ice cake. Tilm says he was "jolted" by some deckhands on a Fall river boat who told him he was to be arrested on his arrival at Fall River. He says he jumped overboard into the icy waters and clambered on a big ice cake, whence he was rescued the following morning.

## BOYS TAKE A WILD RIDE

Necessary to Shut Off Power on Indiana Interurban Line to Stop Mad Race.

Michigan City, Ind.—Albert Williams, twelve, colored, was lodged in jail after he had piloted a Gary-Michigan City interurban at a fifty-mile clip while the car crew gave vain chase in an automobile. Albert and two other boys started on their personally conducted speed test when the crew left the car standing in front of the station at Gary. It was necessary to shut off the power of the whole line to stop the mad ride.

## Looks for Honest Thief.

Hardin, Ill.—On the theory that not all thieves are dishonest, C. H. Lamar, editor of a paper here, has advertised he will leave the back door of his office open at night so that the person who stole Lamar's laprobe and horse blanket can return them.

## AMERICAN RIFLE IS BETTER THAN HUN'S

QUICKER FIRING, EASIER SIGHTING AND GREATER ACCURACY CLAIMED FOR WEAPON.

## BIG SUM FOR MOBILE CANNON

Bureau of Ordnance Program Calls for \$2,000,000,000 Expenditure By Gun Division—Employment Service Plans to Supply Farm Workers.

(From Committee on Public Information.)

Washington—American troops are armed with a faster firing and more accurate rifle than used by the Germans, according to our expert designers, manufacturers, and marksmen, says a statement by the bureau of ordnance. One military critic and writer claims the German Mauser does not permit the most skilled user to get more than 50 per cent of the firing speed of the modified Enfield adopted for the United States service.

The superiority claimed for the American weapon is supported on three counts: Quicker firing as a result of bolt-handle design, easier and quicker sighting as a result of sight design, greater accuracy of bullet flight resulting from bullet design and greater mechanical accuracy of chamber and bore.

A summary of the work of the gun division of the bureau of ordnance shows it has been necessary to equip 16 large plants for manufacture of mobile artillery cannon. The total program of the gun division calls for an expenditure of nearly \$2,000,000,000.

The major projects have included: Construction of smokeless powder plants in face of the necessity of doubling the present output. These are now under way.

Expenditure of approximately \$40,000,000 for plant facilities to manufacture artillery cannon, with an estimate that \$300,000,000 will be spent for cannon alone within two years after the beginning of the war.

Preparations for the erection of plants to extract nitrol from the illuminating gas being furnished cities by private gas companies.

Conservation of the supply of ammonium nitrate and acids and construction at government expense of a plant for the fixation of nitrogen and its final conversion into ammonium nitrate.

Construction, now undertaken, of gas saving plants to cook approximately 1,500,000 and five large shell filling plants with a total cost of \$25,000,000.

A special farm-service division is being established in most of the 100 offices of the United States employment service as one of the plans for meeting the labor requirements of the farmers. Special field agents are being sent into districts where acute farm-labor shortage exists or where unusually large numbers will be needed.

A weekly bulletin will be issued in which opportunities for farm employment and the needs of certain districts will be listed. Posters announcing the location of federal and state employment offices are being hung in post offices, railway stations, and other public places.

All third and fourth class post offices, of which there are 55,000, are now authorized farm-labor employment offices. During the harvest season in certain states temporary offices will be opened in a number of cities for the purpose of furnishing accurate information as to where harvest hands are needed.

A weekly report of farm-labor conditions is being sent to the main office at Washington by all the branch offices and by many state employment offices.

The use of gas as a substitute for gasoline for motor traction is increasing in England. According to a report to the United States department of commerce about 4,500 commercial vehicles have already been equipped to run on coal gas, with an estimated saving of gasoline of 3,000,000 gallons a year.

Over 20 large companies are manufacturing airplanes, 15 are producing engines, and more than 400 are producing spare parts, accessories, and supplies.

Naval training camps have a capacity of 102,000 in summer, 94,000 now in winter.

In 16 cantonnments 650,000,000 feet of lumber were used.

Paymaster general of the navy drew checks for more than \$30,000,000 in one day—February 23—for munitions; total advertised purchases for the navy for 1915 were \$19,000,000.

During February, with 23 business days, \$13,878,811 were loaned to farmers by the federal land banks, according to a statement of the farm loan board. This is \$2,001,294 more than the January total.

On March 1 the total amount of mortgage loans placed since the establishment of the federal land banks is \$64,532,343, covering 28,495 loans.

Since the declaration of war 1,791 employees of the department of commerce have entered military and naval

The following statements are from the official review of the first year of war, made public by the committee on public information.

The total estimated expense of the United States government in the first year of war, without loans to the allies, is \$12,067,278,679.07.

During the first year of war the United States army has increased in actual strength from 9,524 officers and 202,510 enlisted men to 123,801 officers and 1,528,924 enlisted men. Strength of the navy today is nearly 21,000 officers and 330,000 enlisted men; strength a year ago was 4,792 officers and 77,946 enlisted men. The total number of persons now in the naval establishment exceeds 425,000.

The first contingent of the expeditionary forces landed safely at a French port 88 days after war was declared. American troops went on the line for their baptism of fire 187 days after war was declared.

Nearly 73,000 mechanics and other civilian employees are working at navy yards and stations.

More than 700 privately owned vessels have been purchased or chartered by the navy.

Some 300 woolen mills are working on army contracts.

Over 20,000,000 pairs of shoes have been ordered for the army.

Treasury department floated \$6,616,532,300 subscriptions to Liberty bonds. Loans to a total of \$3,882,000,000 had been made to co-belligerent nations to end of 1917.

Total weight of steel thrown by a single broadside from the Pennsylvania today is 17,508 pounds; maximum broadside of largest ship during Spanish-American war was 5,650 pounds.

Two weeks after war was declared contracts had been made covering the requirements of an army of 1,000,000 men, this material comprising 8,700,000 items.

More than 11,000 manufacturers bid for navy business.

Total deaths in the army from April 6, 1917, to March 14, 1918, for all causes was reported by the Adjutant General's office to be 1,191. Of this number, 192 were reported as killed in action and 237 died or were lost at sea. The total number wounded in action was 494. Thirty-five men have been reported as missing; 28 of them are said to have been captured. Casualties in the navy and marine corps from April 6 to December 31, 1917, include 5 naval officers and 139 enlisted men, killed or died from wounds. No officers were reported as wounded in action, but 10 enlisted men were so reported.

Government now operates 200,000 miles of railway, employing 1,000,000 men and representing investment of \$17,500,000.

Bonds, certificates of indebtedness, war-savings certificates, and thrift stamps is issued by the treasury up to March 12 totaled \$8,560,802,052.98.

The United States government has won the war on March 12, 1918, \$1,439,429,750.

To March 12 the war-risk insurance bureau had issued policies for a total of \$12,465,116,500 to the armed forces. Allotments and allowances to soldiers' and sailors' dependents paid by the government in February amounted to \$19,976,543.

The ordnance department manufactures about 100,000 items. One type of gun with its carriage has 7,990 parts, exclusive of accessories.

For training troops in cantonnments 1,000,000,000 rounds of ammunition have been bought.

The navy has developed an American mine believed to combine all the good points of various types of mines, and is manufacturing them in quantities.

Army medical training schools have been created with capacity of 21,000 officers and men—15,000 enlisted men and 6,000 officers already trained and graduated.

Naval communication service operates all radio service; 5,000 youths are studying radiotelegraphy at two naval schools.

Medical officers numbering 14 are members of the medical department of the navy. Navy maintains 12,000 hospital beds and 5,000 are being added.

Of 63,203 candidates for officers' commissions at two officers' training camps 44,578 were successful; a test series is now in progress with 18,000 attendance.

During the year the latest type of naval 16-inch gun was completed for one new battleship; it throws a projectile weighing 2,100 pounds.

When war was declared, 123 naval vessels were building or authorized and contracts have been placed since that time for 949 vessels.

Before the war a total of \$1,500,000 had been appropriated for air service. Congress has made \$691,000,000 available for aircraft production in first year of war.

There are now 180 firms employed in Germany in the manufacture of whole wood soles for new footwear with an output of 400,000 pairs weekly. Beechwood has been chiefly used, but any hardwood with the exception of oak, will serve equally well.

As a provision to maintain the supply of gas in districts where it is urgently needed for national work an order has been issued under which the use of gas manufactured or supplied by any specific undertaking may be prohibited in motor vehicles other than those used by the undertaking itself.

The Australian wheat crop for the season of 1917-18 is estimated at 114,020,000 bushels, compared with last year's yield of 152,565,000. The 25 per cent decrease is a result of reduced acreage and unfavorable conditions.

## Relieve Your Rheumatism For 25c.

NR does it by improving digestion, assimilation and elimination—the logical way.

### NR Today—Relief or No Pay

There are three vital processes of human existence—the digestion of food, the extraction of nourishment from it and the elimination of the waste.

Let anything interfere with these processes—let them be interrupted or improperly carried on, and sickness of some kind follows.

Poor digestion and assimilation means failure to derive full nourishment from food and that in turn often means impoverished blood, weakness, anemia, etc. Poor elimination means an accumulation of waste matter which poisons the body, lowers vitality, decreases the power of resistance to disease and leads to the development of many serious ills.

Rheumatism—due to some interference with the process of elimination, is one to get rid of certain body wastes—cannot be expected to yield to any medicine that fails to correct the condition responsible for it. Could a reasonable person expect to rid himself of rheumatic pain as long as

rheumatic poison is allowed to remain in the body.

Think of this: It explains the success of Nature's Remedy (NR Tablets) in so many cases where other medicines have failed. Thousands are using NR Tablets every day and getting relief. Why pay five or ten times as much for uncertain things? A 25c box of Nature's Remedy (NR Tablets), containing enough to last twenty-five days—must help you, must give you prompt relief and satisfactory benefit or cost you nothing.

And Nature's Remedy is not only for the relief of rheumatism. It improves digestion, tones the liver, regulates kidney and bowel action, improves the blood and cleanses the whole system. You'll feel like a new person when you've taken NR Tablets a week. You've tried the expensive medicines and doctors, now make the real test. You'll get results this time. Nature's Remedy (NR Tablets) is sold, guaranteed and recommended by your druggist.

**HUNS USING FLAME PROJECTOR, AND FRENCH GUNS ON THE SOMME**

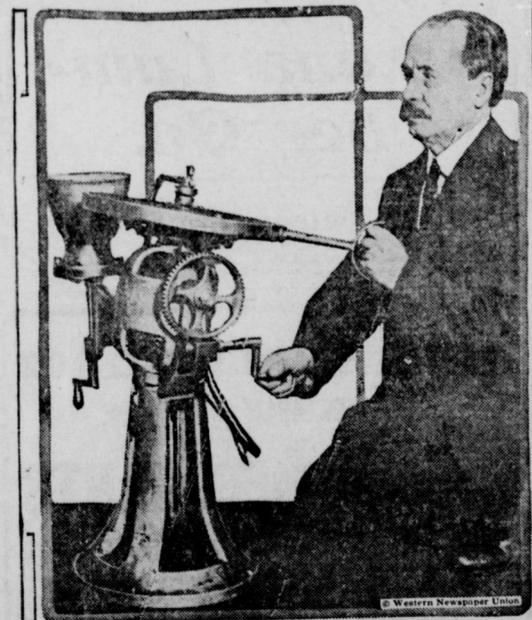

The flame-thrower has appealed to the Hun's lust for devastation. However it has only added to the horrors of war without being particularly effective in either direct attack or defense. The photograph shows a flame-projector being used in a trench. Below are seen two of the huge French guns mounted on railway trucks in position to guard the left bank of the Somme against the advancing Germans.

**JUST AS ITS SHELL LEFT FOR THE GERMAN LINES**

This remarkable action picture shows one of the most powerful French guns, operating from a railroad truck, just at the moment that the shell left for the German lines. The gunners and the men watching have stuffed their fingers into their ears to protect them from the great noise of the explosion, although their ears have been already plugged to prevent injury from the concussion.

**NEW GUN TO REVOLUTIONIZE WARFARE**

Here is what is claimed to be the greatest death-dealing war weapon yet conceived and its inventor, Levi W. Lombard of Boston. The machine gun, sometimes called the centrifugal gun, has a maximum firing power of 33,000 shots per minute. The ammunition is fed in a cuplike attachment at the left, and emitted through the slot just to the right of the top of the receiver. The gun has been tested and it is claimed it has been proven practicable.

**Coconut Macaroons.**  
One and one-half cups shredded coconut, one-half pound powdered sugar, whites of five eggs. Beat the egg whites until stiff and very dry, fold in carefully the powdered sugar and the coconut. Mix very lightly. Drop by teaspoonfuls on oiled paper; bake in a slow oven 20 minutes, take out of oven when a golden brown and, when cold, moisten the underside of the paper so that the macaroons may easily be removed.

**Bull Associations Valuable.**  
Bull associations should be a potent factor in the control of contagious diseases, according to the annual report of the bureau of animal industry, United States department of agriculture. One of the associations, of which on June 30, there were 36 actively operating in 17 states, has discarded all cattle that reacted to the tuberculin test, while other associations have been successful in avoiding contagious and infectious diseases of all kinds.

**MUNROE A LOAN BOOSTER**

Jack Munroe, who had fame as a prize fighter when he challenged Jeffries for the heavyweight championship of the world, is to be beaten when the bout was held, is now in the United States helping boost the Liberty loan. He has been fighting over there with the British army and is now a commissioned officer. His right arm was waded in battle and he still carries it in a sling.

**Birds a Boats**  
In connection with the difficulty Assistant Secretary of the Navy Roosevelt is experiencing in providing appropriate names for the new flotillas of mine sweepers it is recorded that on one occasion one of the heavy cruisers should be honored with the name of the great admiral Drake of the British navy. After waiting a long time this admirer of the splendid sailor received a reply from the admiralty stating that it was not deemed prudent to bestow the name of a duck on such important ships of war.—New York Herald.

**An American Woman at Front**

**Descendant of Robert E. Lee Has Famous Hospital in France ::**

Wounded Poilus recuperating at Mrs. Bradley Lee's hospital. Mrs. Bradley Lee is shown in first row dressed in white Red Cross nurse costume.

**T**HE publication of statistics of all army hospitals shows that an American woman—Mrs. Zama Bradley Lee, formerly of Baltimore and New York—operates a hospital having the lowest mortality rate of all the institutions in France.

Although the hospital of Mrs. Bradley Lee at Creil is for contagious cases—and nearly every patient is also suffering from a wound or from gas besides—the death rate is only a little more than 3 per cent.

Having received the bronze and silver medals of honor for services for la Patrie, Mrs. Bradley Lee has now been proposed for the gold medal and will be decorated with it when she takes possession of her new hospital.

French army engineers are building this hospital with a capacity of 500 beds, on the hill just south of this town, which is the principal base and depot of the Army of the North and Centre.

Nearly 5,000 men have passed through Mrs. Bradley Lee's hospital during the three years she has had it, and the beautiful American woman has been seen at the bedside of every one of the hundred-odd men who have died there, ministering to him until the end.

Mrs. Bradley Lee is the widow of David Bradley, and a descendant of Gen. Robert E. Lee. She has lived in France for some years, owning a handsome chateau near Chantilly. At the beginning of the war she served as a nurse and assistant on an army ambulance.

from Calais, could change cars and take through express trains for the Riviera, for Switzerland or for Germany. The great steel bridge across the Oise, which the retreating French blew up in August, 1914, before the battle of the Marne, is still resting in the river bed, and traffic is carried on by several smaller bridges thrown across the stream by army engineers.

**Introduced American Methods.**  
"What sort of diseases do we get here?" she repeated in answer to a question: "Why, everything—from smallpox and typhus down to scarlet fever and measles, with diphtheria and typhoid and bronchitis perhaps the most prevalent. And whatever success I have made of this hospital is due primarily to the fact that I have used American methods everywhere. I have scandalized the patients and shocked the French doctors, but at the beginning they were kind with me and let me have my way. Since they have seen the results that have followed the application of our American treatment and methods they have been willing for me to do so, and a few of them—a few of the more advanced physicians—have followed my example and have instituted American practices themselves in other hospitals."

"I have had wonderful success with my typhoid cases, using the ice-bag method instead of the hot bath treatment that they wanted to insist on giving. And I have always specialized on fresh air and cold air, too, except under certain circumstances, and cleanliness everywhere."

"No patient has ever used a handkerchief in this hospital, and no one ever will while I have anything to do with it," continued Mrs. Bradley Lee.

It is known that nearly all soldiers here are given handkerchiefs or are permitted to wipe their noses or mouths with anything but little squares of gauze which they throw into closed receptacles immediately after they use them once.

"That is one reason why this is the only hospital in all of France in which no member of the staff, no physician, no nurse, nor even an orderly or scrubwoman has ever caught a disease here. I have never had anything worse than the cold and the sore throat that I have now since I have worked on men suffering with typhus and smallpox, and been with them for days and nights, hour after hour."

"There is not another hospital in France that has that record, and I have only lost one typhoid patient in all these three years, just by strictly following the American method of treatment all the time."

**Patients Frightened at First.**  
"The poor patients were a little frightened at first; they who have been taught that fresh air means a draught and who have never become too intimate terms with soap and water, especially during cold weather."

"Today I received a Kabyle—a native from the French colonies in northern Africa—and that man finished my collection. I have had a man from every nationality fighting in this war during the last three years. Chiefly my patients have been French, of course, but I have also had a good many Belgians and British, sent down on the main line railroad through Amiens. Then when the Russians were on the front I had a number of them with scarlet fever. We had Senegalese, the black troops from Central Africa; we had Moors and Algerians, Italians and Roumanians from the foreign legion, a Portuguese aviator, and the chauffeur for the king of Montenegro. Many German prisoners of war have been brought here, and I had an Austrian aviator who was with the German flying service and had been shot down on this front. Then a Turk who had escaped from a concentration camp was picked up here with diphtheria, and finally a Bulgarian who had smuggled his way

**WAR AIDS GENERAL HEALTH**

Sight of Sturdy Soldiers and Sailors on the Streets Declared to Have Had Good Effect.

An observing physician says that the presence in New York's streets of many soldiers and sailors has an indirect effect on the health of civilians. He believes that most persons become imitative when they see one of Uncle Sam's men with head erect, shoulders back and chest thrown out. The natural result is deep breathing, and from this comes improved digestion and circulation, thus causing better health.

The doctor called attention to the fact that Poe in pointing out the psychological effect of one person on another in regard to acts and mannerisms said he could figure many thoughts of persons in the streets by watching their actions. As an illustration, Poe told of a man hurrying along in a slouchy manner until he approached a hunchback, when he immediately straightened, the similarity of carriage causing an unconscious effort at the instant the hunchback's misfortune was flashed to the brain of the normal man.

Still another influence affecting the general health of the public, due to the war, is the increased number of patriotic men who have gone into training after rejection by army or navy surgeons due to minor physical disability. Others, too, have undergone lesser surgical operations, long neglected, so that they might pass.

**Money in Snails.**

An investment of ten cents three years ago in two red snails has netted a profitable business for Mme. Veronique Varje Scrimshaw, who is known to hundreds of school children as "The Snail Queen."

The small investment brought thousands of snails, which Mme. Scrimshaw sells to school children 50 for five cents, and the madame throws in a bit of seaweed and sand. The children are so eager for snails that the madame's profits sometimes reach \$12 a day. She is said to be the only woman known to raise snails.

**ENJOYED SIGHT OF CROWDS**

**British Soldier, Home on Leave, Avers That Even to See White People Is a Luxury.**

The man who thinks he has the loneliest job in all war was recently on leave in London. There he was spending all his walking hours walking the streets and looking at the crowds.

Three years ago he was a cog in London's commercial machine. Then he went to Gallipoli. Now he is at

tached to the Sudanese army near the Abyssinian and Belgian-Congo frontiers. He is the only Englishman in an area of 200 miles and none of the native troops in his command speak English. He has a smattering of Arabic and his only conversation is in that language. Some of his men, who, he says, are fine soldiers, were enemies not many years ago.

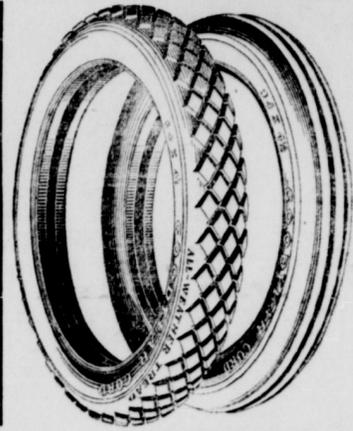

In an interview reported by the Manchester Guardian he remarked that the very sight of crowds was a luxury after his experience. His chief diversion in Africa is playing "patience," although this is diversified by incidental lion hunting and the casual chance of shooting other big game. None the less he could say that while "the loneliness gets on my nerves occasionally, on the whole I like the job, and we get some jolly little scraps which are not reported in the newspapers. Still I would welcome the society of a war correspondent or two."

Which possibly goes to show that even in the desert the newspaper has its uses.

**OZONA GIRL SCOUTS**

Gardens all planted and well watered. We are grateful to the Giver of all good for the timely rain.

The Scout meeting has been changed to the afternoon on account of not having any place to meet at night. Ye Wise Men of Ozona, give us an assembly hall.

Every Scout present at the last meeting and enthusiasm at high pitch.

**OZONA BOY SCOUTS**

The Boy Scouts will put on a play soon, called "The Boy Scout Hero." They are busy rehearsing it, and working on their big war garden. Thanks are due to Mrs. Ward Brooks for the garden, and Mrs. West for the fencing and to those who have loaned them tools and given them seed.

In the recent campaign the boys sold several hundred dollars worth of bonds and also several hundred dollars of War Stamps.

The Boy Scouts of America, in the second Liberty Loan Campaign, sold over one hundred and one million dollars worth of bonds. This illustrates what hard asset they are to the government.

Several boys of the Ozona Boy Scouts have been discharged for dishonorable conduct. The pledge is: "Every Scout to Save a Soldier". In future this is a warning, that every Scout who does not want to save a soldier will be punished.

J. B. Ragless, carpenter, 210 W. 60th St., Chicago, Ill., says: "My back gave out completely and I had to quit work. I could hardly endure the pain in my back and nights I tossed and turned, unable to sleep. Often in the morning my back was as stiff as a board, so that I couldn't stoop to dress myself. When I did manage to bend over, everything before me turned black. My head seemed to be whirling and sometimes I was so dizzy I had to grasp something to keep from falling."

"The kidney secretions were irregular in passage, getting me up at night and the passages burned cruelly. I lost my appetite, was weak and listless and went down twenty-five pounds in weight. When I had almost given up hope, Doan's Kidney Pills cured me. Soon after, I passed an examination for life insurance and I'm glad to say my cure has lasted."

**Appeal to All True Citizens to Help  
Eliminate the Diseased Tree Life  
Across the Path of True Democracy.**

**(By) WINSTON CHURCHILL, V.  
Recently Returned From the War Zone.)**

Germany may be likened to a great tree that has fallen across the path of democracy. The trunk is being chopped through by two axes, the military and the propagandist. If the trunk is to be severed and the obstruction removed, neither must be spared. Americans must contribute willingly to help their ally to support their army and navy, which will be the deciding military factor in the struggle.

Our American president was the first world statesman to make clear that while a military victory is essential, it is not in itself adequate. The great significance of this war lies not on the battle lines, but behind them. It is a war for human liberty, and that which restricts human liberty, not only in the German empire, but also in America and England and France and Italy and Russia must be abolished. We are beginning to perceive that the future progress of democracy depends on national selfishness and international co-operation scientifically conceived.

**Issued World Proclamation.**

In a series of masterly state papers Mr. Wilson has announced to the world that America enters the war unselfishly, and has defined the true issue for all the peoples of the earth—even for those deluded portions of the German population which, because of a false system of education, have hitherto upheld the hands of the worst enemies of liberty, the Junkers. Until quite recently, one of the most disgusting symptoms from the point of view of the allies was a discontent with, if not an actual opposition to, the war of large elements among the working classes of the allied peoples. In Russia, where democracy was most cruelly suppressed, where conditions for the peasant and the workman were hardest, a revolution actually took place—a revolution that has sounded the keynote of our times. The world service which our president is doing is that of enlisting the allegiance of those masses for the war. He is convincing them that it is their war. And these are they upon whom the evils of an outward economic system have pressed hardest, and who hitherto have seen little hope that victory over the Germans meant their own deliverance. Mr. Wilson has issued a world proclamation of emancipation from economic slavery.

**Make Their Own Treaties.**

He not only declares that powerful nations shall cease to exploit little nations, but that powerful individuals shall cease to exploit their fellow men. He declares that henceforth no wars shall be fought for domination, and that to this end secret treaties shall be abolished. The peoples through their representatives shall make their own treaties. And just as national democracy insures to the individual the greatest amount of self-determination, of self-realization, world democracy shall insure self-determination to the individual nations of the earth. In order that each may be free to make its own contribution to world democracy.

**Fighting for Oppressed.**

This is the spirit in which America has entered the war. We are fighting for the oppressed everywhere. And we are equally determined that the injustice and inequalities that exist in our own government, the false standards of worth, the materialism, the luxury and waste shall be purged from our midst. We shall seize this opportunity to finish up the cleaning of our own household. To sustain our army and navy in the struggle for such a cause, to uphold our president, to aid our allies who have fought so long and so bravely, these are worthy of our sacrifices. I am confident that the response of the American people to the third Liberty loan will be generous.

**Bonds Feed the Boys.**

Every farmer knows how his boys like to eat. Mother's fried chicken and apple dumplings and pumpkin pies haven't a chance in the world when the boys sit down at table. Lots of farmers' boys are in France and the farmer doesn't want them to go hungry over there. Liberty Bonds buy food for them.

**Don't Bury Your Bond.**

When you and your neighbor have bought your Liberty Bonds, don't take them home and hide them in the cupboard. Take them to your country banker and have him give you certificates of deposit for the bonds. Your banker can take these bonds to a Federal Reserve bank and borrow money for your use in case you suddenly find yourself in need of funds. Hiding a bond is as bad as hoarding money. Keep the bonds and the money in circulation and the country will pull through this crisis all right.

**What "His Bit" Really Means.**  
As first used in England, "His Bit" was intended to convey the impression of "his all," but the term "bit" as used in this country rather minimizes the task before us. Men think of one doing "his bit" in a sense of smallness rather than in a sense of consecration of their all. Let's find some new expression—stronger, more emphatic, more all-embracing, and yet not profane, which conveys the thought that we must do our utmost in this great world war.—Manufacturers' Record.

**Calomel Users! Listen To Me!  
I Guarantee Dodson's Liver Tone**

Your druggist gives back your money if it doesn't liven your liver and bowels and straighten you up without making you sick.

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work.

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a

spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot silitate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

Are Here Told the Best Remedy for Their Troubles.

Freemont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general rundown condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. GODEX, 925 Napoleon St., Fremont, Ohio.

North Haven, Conn.—"Lydia E. Pinkham's Vegetable Compound restored my health after everything else had failed when passing through change of life. There is nothing like it to overcome the trying symptoms."—Mrs. FLORENCE ISLELLA, Box 197, North Haven, Conn.

**Swift & Company's 1918 Year Book**  
It shows that Swift & Company sells the meat from a steer for less money than the live steer cost!

Proceeds from the sale of the hide, fat, and other by-products covered all expense of dressing, refrigeration, freight, selling expense and the profit of \$1.29 per steer as shown by Swift & Company's 1917 figures as follows:

Average price paid for live cattle per steer	\$84.45
Average price received for meat	68.97
Average price received for by-products	24.09
Total received	93.06
This leaves for expenses and profit	8.61
Of which the profit per steer was	1.29

There are many other interesting and instructive facts and figures in the Year Book.

**Died in San Angelo.**  
James Kendall, aged seventy, a trapper in Crockett county for a quarter of a century, died in San Angelo at St. John's sanitarium Sunday morning shortly after five o'clock. The body was prepared for burial by the Hubert Massie Company and sent to Barhart on the Orient. From that point it was taken by automobile to Ozona, where the funeral took place Monday. But little is known here of Mr. Kendall's life. It is understood that he has no relatives at Ozona. Standard.

The funeral services were conducted by Rev. A. J. Carson, pastor of the Baptist church, Monday afternoon at three. "Uncle Jimmie" had many friends in Ozona and Crockett county who will be grieved to learn of his death.

**CLEAN-UP ANNOUNCEMENT !!**

The following plan for the quarterly Clean-Up has been adopted permanently by the Woman's Club as the best possible way of handling the work at present. Any suggestions or criticisms will be appreciated.

A copy of these regulations will be sent to each home. Post it in your kitchen for reference. HENCEFORTH NO ONE WILL BE PHONED.

1. The first week of February, May, August and November will be Clean-Up weeks.
2. The following divisions will be permanent:  
Monday—First division—Everything North of Broadway and East of Main St.  
Tuesday—Second division—Everything South of Broadway and East of Main.  
Wednesday—Third division—Everything North of Broadway and West of Main.  
Thursday—Fourth division—Everything South of Broadway and West of Main.  
Friday—"Brooklyn" division.

Please observe the following rules:

1. Put all your trash in boxes, barrels or sacks that can be handled by the wagon man.
2. Do not throw out ashes or loose dirt and expect it to be hauled away. The men will carry no tools for such work.
3. Have your trash ready on YOUR day. The wagons will have only one day for each division.
4. Please clean up the streets and alleys near your home.
5. Take all dead animals to the dump ground and BURN them.
6. You can reach the City Dump Ground thru the first gate North of the cemetery gate. The grounds are about a quarter of a mile up this road. The Commissioners Court imposes a heavy fine for unloading trash and in any other place.
7. Watch your cess-pool. It may be a menace to your health and your neighbor's.
8. Let us all get together to make Ozona indeed the City Beautiful—the cleanest and most sanitary town in West Texas.

The Woman's Club and the Commissioners appreciate the hearty co-operation you have given to this movement and will continue to give you their best service.
