## **Driver Escapes** Death In Wreck Of **Vegetable Truck**

#### Huge Van Overturns As Truck Plows Thru **Right-of-Way Fence**

Walter E. Lamm is under treatment in the Ozona Hospital for injuries suffered early Wednesday morning when the huge diesel powered refrigerated van, loaded with vegetables, which he was driving left the highway at a curve a mile west of Ozona and plowed to a stop across the rightof-way fence, with its trailer upside down and the tractor still upright.

Lamm, who evidently dozed and failed to make the turn at the top of the hill west of Ozona, suffered lacerations about the face, a deep cut under the left car and bruises about the body and arms. Don Cooke, employed at the O-

zona Oil Co., was the first to the wreck, which occurred about 6 o'clock Wednesday morning. While working at the station, Cooke heard the noise of the crash and went to the scene. He brought Lamm to the hospital and then returned to the wreck to see if there was another victim of the wreck. Lamm had asked if there was anybody was with him, causing Cooke and Sheriff V. O. Earnest to make ling City: 2nd, Ozona Black a thorough search of the area. It was not until some time later that Lamm recalled that he was alone. His wife and son had planned to make the trip with him but were unable to do so. He later told officers that he had dreamed some time before that his son was with him.

The big truck left the highway at the west end of the curve, continuing in a straight line to plow Aged Mares: 1st, Mitzi M, Clif- through highway posts, right-of-

## CADILLAC MOTOR CAR DIVISION

## Start of a Wonderful Journey!

Well, there it goes-out from the great Cadillac factory into the hands of a proud and happy owner.

And what an odyssey it would make if its whole future course could be charted and foreseen!

-far journeys to the world's most fascinating places ... grand appearances at the proudest social events ... splendid visits to affairs of state . . . year after year of participation in the life of a fine American family.

Yes-and perhaps two or three, or even four fine American families-for a Cadillac is so soundly designed and built that there is no practical limit to its utility. Truly, no more interesting biography could be written

than an account of the life of the average Cadillac est. As the primary means of transportation for interesting vital people-it is usually a spectator at important evens -always in demand as a trustworthy traveling companion.

So there it goes, like the many thousands of its prede-cessors, on one of the most eventful and fascinating journeys a motor car ever began.

Wouldn't it be wonderful-and inspiring-to go along?

We are serry indeed that dolay in delivery of new Cadillacs continues unavoidable. If you are making for a Cadillac, please be patient - but hold to your purpose. There is no subscience for the "Standard of the World."

Packard Patrician '400'-most advanced motor car in America

Car details as shown are subject to change without notice

PAGE FIVE

Newest of them all .... and built to stay that way!

Everywhere you look, it's not only the newest new car of the year ... but the car most likely to stay that way!

Consider styling. Packard gives you the newest ideas in functional designplus-traditional Packard exclusiveness that defies year-to-year "dating."

Take power. Packard Thunderbolt engines give you the peak efficiency of America's highest-compression eights. Plus: the service-free simplicity of a design with up to 25% fewer working parts than in engines of comparable power!

Or study automatic drives. Packard -and Packard alone-offers the unequalled smoothness and efficiency of Ultramatic Drive. And here again, there's service-free simplicity that puts this Drive in a durability class of its own. Look into the rattle-proof rigidity of Packard Armor-rib body construction ... the lastingly smooth firmness of Packard's own broad-beam suspension

system . . . look deeper than you've ever looked into a car before! You'll know, then, why Packard holds motordom's most consistent durability record:

Of all the Packards built-in the last 52 years-over 50% are still in service!

Let that be your final clue to the most far-sighted good buy in the automotive field today!

It's more than a car-it's a PACKARD

# How can you Tell till you Try It?

THE days and weeks are slipping by -and what have you done about it?

What have you done to find out how it feels to handle a high-powered and high-spirited '51 Buick?

We'll tell you this. In all the years that Buick has been building fine automobiles, there's never been the match for this one.

This is a car that likes to be compared -for power, for performance, for ease of control, for ride, and room, and comfort.

We can tell you its valve-in-head Fireball power sinks you back in the cushions at the touch of your toe.

We can tell you it's nimble-footed in

traffic, or that it conquers hills with smooth and exultant momentum.

We can tell you it hugs the road and holds the carves as if it were drawn by an invisible magnet.

We can tell you that it has big, soft coil springs on all four wheels-or that its gas mileage will put a smile on your face.

We can tell you that Dynaflow Drive\*

No other can provides all this :

DYNAFLOW DRIVE\* . FIREBALL POWER WHITE-GLOW INSTRUMENTS . DREAMLINE STYLING 4-WHEEL COIL SPRINGING . DUAL VENTILATION PUSH-BAR FOREFRONT . TORQUE-TUBE DRIVE BODY BY FISHER

obiles are built BUICK will

will spoil you for any other type of power transmission.

But you'll never know till you try for yourself what all this really means.

How about coming in for a sample? Once you've experienced all this for yourself, the modest price tags on Buick SPECIALS, SUPERS OF ROADMASTERS will look like a double bargain.

# Standard on ROADMASTER, optional at extra cost on other Serie ries, trim and models are subject to change without
