POLIO WIDESPREAD

Recent surveys show that more than 80 percent of persons over age 15 have specific polio antibodies in their blood, indicating previous and usually unknown infection with polio virus.

It is still a mystery why only a fraction of those infected are disabled. Ma rch of Dimes supported scientists in leading institutions throughout America are trying to find ways to protect the suspectible. The National Foundation for Infantile Paralysis has spent \$13,000,000 for polio research into treatment and prevention.

Scientists feel confident that March of Dimes financed research will end in control of infantile paralysis within our lifetime. The people of Crockett county can help by increasing their contributions to meet the 1951 need for \$50,000,000 in the nation.

Far More Beautiful...Gorgeous New Interiors...and an Even Finer High-Compression Engine!

Loday, we are privileged to present the new Cadillac for 1951—finer and more wonderful from every conceivable standpoint... Numerous refinements in exterior design have made it more lovely to behold-while wholly new interiors, so rich in fabric and tailoring that they defy description, impart a sense of luxury that is simply beyond compare. . . . And, oh, the things that have been done to make it store gentle to handle-and more comfortable to fide in! The changes in this regard are manifoldand the results are a revelation. The car's quietness

is now akin to silence; driving is all but a response to your wish; comfort leaves literally nothing to be desired. To ride or drive is to relax-and to rest. . . . The great master engine has also been refineddown to the smallest details. Its voice is closer to a whisper; its power application is faster; and it's even smoother in operation. . . . And there is an even finer Hydra-Matic Drive-with a new reverse for easier shifting, and for "rocking" the car in sand or snow. There is new steadiness on the road-better balance on turns and curves-easier and softer braking. And throughout the chassis are vital improvements which add to endurance and dependability. . . . All in all, here is new lustre for the Cadillac name-and a far higher standard for the automotive world. . . . There are ten distinctive body types and four individual series-the "Sixty-One," the "Sixty-Two," the "Sixty Special," and the incomparable "Seventy-Five". . . . Why not come in and see them today? We'd be most happy to see you-and we are certain you'd find it an interesting and enlightening experience.
