Idle Dollars

In every community there are thousands of idle and unproductive dollars. Idle dollars may represent value, but they have no value to their owners nor the community until they are put in motion. Today there is a pleasant and profitable job for every dollar in the land. Homes are needed—homes which will make better citizens, better neighborhoods, a better town—homes which will contribute indirectly to the welfare of every man, woman and child in this community.

Loans for home-building are good investments. You can select your loan and keep in close touch with it.

John H. Wannamaker, a manufacturer of South Carolina, president of the American Union Group Corporation, blamed the corn and cotton gamblers. Wannamaker has a plan. "The government and everyone should help to stabilize prices. When we can build or cotton and sell one-bushel a month in the month we shall be in a worse stable condition." President Wilson warns that farmers should have credit facilities on sound warehouse receipts. I say that if the producers have to sell today they will have to sell less than the price of production. Federal Reserve Bank officials have been advising a limit on what the cotton be stored in warehouses and warehouse receipts used as collateral. But they deny the right of the local or the power of the government to advance money or credit in order that the price of cotton may be advanced to 40 or 50 cents. Just now the man with no credit is out of business and has no guarantee. Remember that there would be
