Science finds new reasons for KELLOGG'S ALL-BRAN

MILLIONS have found Kellogg's ALL-BRAN a safe way to overcome common constipation. Now science shows this delicious cereal brings three benefits to the diet: "Bulk." Vitamin B. Iron.

- The "bulk" in ALL-BRAN is much like the "bulk" in lettuce —only it is concentrated in a more convenient form to relieve constipation. It absorbs moisture, forms a soft mass, which gently clears out the wastes.

Vitamin B tones the intestines, and promotes regular habits. Iron builds blood, and aids health generally.

No wonder ALL-BRAN is considered far more natural than pills and drugs — so often habitforming. Try two tablespoon-fuls daily. If you suffer from intestinal trouble not relieved this way, see your doctor.

An Unusually Enjoyable Affair A hundred Big Spring men, their wives, sweethearts, and guests, in a colorful and tuneful setting last night in the Crystal ball room of the Settles Hotel feasted, laughed and applanded through one of the most clever programs ever present ed at a similar function here.

It was the second annual joint Ladies Night banquet of the Ki-wanis and Rotsry clubs.

Kiwanian Garland Woodward wa tonstmaster. Music was by Joe Gill and his splendid recording orches-tra. The hotel management, carning the praise of all, had created a resplendent Hallowe'en scene for the banquet. Caps of paper and toy whistles finished ridding everyone of cares and worries and changed most sedate into harmless play boys for a spell.

The guests entered the dining hall to the strains of The Eyes of Texas' by the orchestra. Invocation was offered by the Rev. W. H. Marof St. Mary's Episcopal church. Guests other than Rotary Anns and Kiwaniqueens were ordered to remain standing, following the sing-ing of "Let Me Call You Sweetheart," led by Mrs. Bruce Frazier, Rotary Ann, and Mrs. L. A. Eubanks, Kiwaniqueen. Each guest introduced himself and gave the name of his host.

Aside from three side-splitting speeches, made up of humor sprinkled tastefully with the seasoning of philosophy, sociology, theology and archeology, the entertainment was provided by a group of local ar-

COFFEE VARIES IN FLAVOR IF ROAST IS "HIGH" OR "LOW"

Hills Bros. Overcome This Variation by Their Patented Process-Controlled Roasting

There is no way to know when a nig batch of coffee is perfectly roasted. One batch may be "high," another "low," with the result that there is variation of flavor.

Hills Bros. overcome this uncertainty, with their radically different and exclusive process—Controlled Roasting. As the accuracy of the hour-glass depends upon an even, continuous flow...a little at a time... so the uniform flavor of Hills Bros. Coffee is produced by this patented process that roasts evenly, continuously ... a little at a time. Positive control of heat develops every berry to perfection velops every berry to perfection — to the degree that insures a rich, full-bodied, unvarying flavor in every pound.

full-bedied, unvarying flavor in every pound.

No other coffee tastes like Hills Bros. Coffee because no other coffee is reasted the same way. Controlled Roasting is Hills Bros. 'own process. Hills Bros. 'Coffee is packed in vacuum cans that keep it ever-fresh. Air, which destroys the flavor of coffee, is removed from cans and kept out. Coffee packed in ordinary cans, even if "air-tight." does not stay fresh. Ask for Hills Bros. Coffee by name, and look for the Arab trade-mark on the can.
