

Tech Events

Monday, June 22—Sign up for ping pong tournament at Union newsstand.

Thursday, June 25—square dance from 7:00 p.m. — 8:30 p.m. in the Rec. Hall.

Tuesday, June 30—movie, "The Doctor Takes a Wife"

Cars Involved In Accident

A two-car collision, with no injuries, causing damage estimated at about \$140, occurred at 12:05 p.m., Wednesday at the traffic signal west of Tech Union.

A white, '54 model Ford, driven by Pat Machen, 15, and a two-tone blue, '53 Ford, which was driven by Mrs. G. E. McIlroy, were involved in the collision.

Mrs. McIlroy, on route home after picking up her son, Danny, from Tech's nursery school, was turning south, at the traffic light west of Tech Union, from the street in front of the Tech Union, when the accident occurred. Miss Machen was driving North on Boston through the campus.

Tech traffic patrolman H. B. Barnett estimated the damage done to Mrs. McIlroy's car at about \$100, and Machen's car at about \$40.

IN AUSTIN

Officials Discuss Finances

Dr. E. N. Jones, Tech president, met with other state college and university presidents in Austin Tuesday for conferences regarding possible legislative appropriations for the next biennium.

FIVE OTHER TECH officials were in Austin Wednesday for talks with officials of the Texas Commission on Higher Education.

Representing Tech were Marshall Pennington, vice president and comptroller; Roy Wells, assistant to the president; Dr. Floyd Boze, admissions dean; John Taylor, auditor; Robert B. Price, internal auditor.

The Legislature is currently in its second special session trying to pass appropriations and tax bills before the biennium beginning September 1.

WEDNESDAY a House appropriations subcommittee detained for further study the bill which would cause raising of student activity fees for 19 state schools.

Appearing against the bill have been students, college presidents and legislators.

The measure would provide for the school governing boards to levy as much as \$60 per year in compulsory activity fees, which would be used for athletics, medical fees, parking permits, publications, and various other activities.

Previously, the Texas Commission on Higher Education had asked that college athletics and medical services be removed from tax support.

Daniel Appointments Seen; Watkins Picks Committee

An Editorial

The Next President

Information received by the Toreador Wednesday from a very reliable source close to Governor Price Daniel in Austin indicates the long-awaited appointments to the Tech board of directors may soon be made.

And with the appointment of the special committee of three board members by Winfield D. Watkins, present board chairman, the search for the next president of Texas Tech begins in earnest.

In all probability, the choice of the new president will be made by the new board. The next regularly-scheduled board meeting is on August 22, although the chairman may call a special session when necessary.

It is doubtful, however, that Watkins will call such a meeting, since his term expired in February and he is not asking for re-appointment.

In addition to Watkins, Jim Lindsey of Midland and P. C. Callaway of Corpus Christi are serving on terms which expired in February. Both are being considered for re-appointment.

With the upcoming appointments to the board and the first efforts toward finding the next president underway, the time is ripe for all concerned with the future of Texas Tech to give much thought to the selection of the new president.

The decision concerning the new president will be one of the most important decisions ever made by a Tech board of directors.

The man who steps into the president's office on September 1 will face the responsibility of leading Tech into an even greater period of development than that experienced under the leadership of President Jones.

During the past decade Tech has become an awakening giant, but during the next decade Tech will establish a firm position as one of the great institutions of Texas and the South.

To do this, the next president must be more than a "good man for the job," he must be a leader among leaders, a man who has the stature, the ability and the devotion required of a college president.

He must not only have the highest possible academic background, but also a proven administrative ability and a deep understanding of young people.

The new president must also know politics and have an inside understanding of Texas political circles, for the coming years will see Tech taking a large slice of state educational appropriations and to do this Tech will have to wage a constant struggle against the University and A&M.

Once again, may we urge the board of directors and all concerned to devote much time and effort to soul-searching on this all-important question.

For ahead lies a future full of growth and accomplishment for Texas Tech, and the man who is chosen to lead Tech into that future must have the utmost leadership ability.

Lubbock Girl Edges Six Tech Co-Eds

Six Texas Tech co-eds were finalists this week in the Miss Lubbock contest sponsored annually by the Lubbock Junior Chamber of Commerce.

JAN CONE, 1959 graduate of Tom S. Lubbock High School, was named Miss Lubbock of 1959 Tuesday night in the final judging

at the Lindsey Theater. She will enter Tech in the fall as a freshman.

First alternate is Lajuana Rabb, Tech co-ed from Dallas. Paula Wilkerson, Tech co-ed from Lubbock, is second alternate.

SEE WINNERS, Page 3

by PRESTON MAYNARD

In a telephone interview with the Toreador late Wednesday afternoon, a source close to Governor Price Daniel in Austin indicated that the three appointments to the Tech board of directors may be forthcoming in the near future.

The source further indicated that the appointments are now "right up at the top of the list" for the Governor's attention.

The source also commented that the vacant appointment to the Texas A&M board of directors, filled Wednesday by Daniel's choice of S. B. Whittenburg of Amarillo, had been a major problem and now that it was made, the Governor could turn more attention to the Tech appointments.

In another development Wednesday, Winfield D. Watkins of Abilene, present chairman of the board, announced through the Tech public information office the appointment of a special committee to begin work on finding the new Tech president.

The committee is composed of C. I. Wall of Amarillo, chairman, Harold Hinn of Plainview and Douglas Orme of Big Spring.

Wall announced that the group is to meet soon to initiate work toward finding the new president, although specific plans will not be made until an organizational meeting can be held.

He stated, "We want to get the best man we can for the presidency," and "therefore we want to be sure we have explored every possibility before making final recommendations."

The three Tech appointments, which expired on February 19 of this year, are presently held by Winfield D. Watkins of Abilene, chairman, Jim Lindsey of Midland, vice chairman, and P. C. Callaway of Corpus Christi.

Watkins is not requesting re-appointment, while Lindsey and Callaway are serving interim terms and may be re-appointed.

The next scheduled board meeting is on August 22.

Whittenburg, appointed by Daniel to a six-year term ending on Jan. 10, 1965, is the publisher of the Amarillo Globe-Times and is past chairman of the board of regents of Texas Woman's University.

HE Group At Meeting

Six representatives from Tech are attending the American Home Economics Assn. meeting this week in Milwaukee, Wis.

CAROLYN VINES OF Albany and Jane Sessums of Lubbock are representing the Tech Home Ec Club. Lynell Fouts of Sagerton is the delegate from Phi Upsilon Omicron, home economics professional sorority.

Mrs. Lila Kinchen, associate professor of clothing and textiles, Miss Opal Wood, instructor of food and nutrition, and Dr. Willa Vaughn Tinsley, dean of the School of Home Economics, are also attending.

THEME OF THE 50th anniversary meeting of the group is 50 years of progress in home economics and prospects for the future. Mrs. Eleanor Roosevelt is to speak on "Russia—The Country and the People as I Saw Them."

TCU Football Game Changed

Tech's football game with T.C.U. next October 10 has been changed from afternoon to night to prevent any conflict with the Texas-Oklahoma game at Dallas.

Tech begins the season next fall playing Texas A&M at the Cotton Bowl in Dallas. The Raiders then meet Oregon State, Tulsa and T.C.U.

Tech Golfers Lose To U. of Houston

Red Raider golfer's lost out in the final rounds of the NCAA tournament to the University of Houston golfers.

DON KAPLAN, Captain, and John Paul Cain posted the best Raider scores with rounds of 143. Cain posted a 71-72-143 and Kaplan, 71-72-143.

The Raiders finished in the top ten with a total score of 586 which was 27 strokes behind the winning U. of Houston team.

Union Board Checks Plans

Applications for the position of Program Director, tentative plans for the expanded Tech Union and the selection of the Homecoming Dance band were discussed by the Tech Union Board Monday afternoon.

Meeting in the Student Life Conference Room, the Board considered the applications for Program Director, referring its decision to the Office of the President for final approval.

Nelson Longley, director of the Tech Union, explained the schematic plans for the Union expansion. Further revision and cost estimates of the plans are to be made before the August 22 meeting of the Tech board of directors.

Roger Loter, assistant Union director, was authorized to begin negotiations for contracting a band for the Homecoming Dance, November 14.

Attending the meeting were James G. Allen, dean of student life and chairman; Longley; Loter; Dr. Fred W. Norwood, professor of accounting; Dr. Florence Phillips, dean of women; Robert Rodgers and Preston Maynard, editor of the summer Toreador.

Announcements

The Library hours for the summer sessions are from 7:30 a.m. to 9:30 p.m. Monday through Friday; from 7:30 a.m. to 4:30 p.m. Saturdays. The Library is closed on Sundays and on July 4.

TECH BEAUTY AND FOAL — Tech Beauty, who made appearances with the Red Raider during the 1957 football season, is shown with a new addition—a filly born Tuesday night. Holding the mare and foal is Dr. Fred Harbaugh, professor of veterinary science.

Tech Workshops Continue Varied Activity Programs

Oboists and bassoonists enrolled in Tech's summer band school are practicing economy as well as their instruments.

Because the reeds they must have are expensive and wear out easily with steady usage, students are learning to make their own.

Commercial reeds cost about \$2.50 each while those made by the individual cost about 50 cents for the original mouth-piece plus 15 cents for each reed replacement.

Reeds are simple to make and the tonal quality produced by a handmade reed is pure and more pleasant than that produced by a commercial reed. Raw reed stocks are obtained from southern France, from a cane especially grown for that purpose.

The band school ends Friday with a public concert given at 7:30 p.m. on the Ad Building green.

Two workshops in the Home Economics Department begin Monday, June 29, one on clothing and textiles and the other on food demonstration.

The clothing and textile workshop is primarily for home economics teachers and graduates and ends July 3. New techniques in

garment making will be stressed. One dress will be made with the emphasis on cutting, fit, accuracy and professional appearance of the garment.

The food demonstration workshop is designed for women who work with the public, such as home economists, television demonstrators and home demonstration agents.

A public demonstration on the cooking of fish will be given July 2 by Miss Bertha Vanlandingham, food demonstrator for the Fish and Wildlife Service of the Department of Interior.

A School Business Services Workshop is being conducted June 24-25. Discussion topics for some 150 school superintendents, business managers, and tax assessors and collectors include a comparison of school business services in Texas and New Mexico, financing school expansion, and ad valorem taxes and the schools.

Exhibits and work sessions on topics covered in the meetings are also planned.

Dr. Ronald B. Mitchell told participants in the Air Age Workshop, Friday, that a "soft com-

ponent" — man — must first be reckoned with before space travel is successful.

"Space craft must be adapted to man, because man cannot be adapted to rocket ships," stated Dr. Mitchell, chief of the medical science division in the Air Force School of Aviation Medicine at Randolph AFB. He also described bio-medical aspects of space medicine.

Lt. Col. Charles Strapp, another speaker, described the organization and operation of the Air Defense Command.

SNEA President Attends National Student Leadership Conference

Barbara Vandiver, president of Tech's Paul W. Horn chapter of the Student National Education Assn., is attending the third annual Student NEA Leadership Conference on the campus of the University of Kansas at Lawrence, June 19 through July 3.

DONALD GILL, STATE president, of TSEA, is representing West Texas State College at the meeting, and Bill Crockett is representing the University of Houston.

A chairman for her delegation this past year, she is to be chairman for the committee on state ethics at TSEA state convention this coming year.

MISS VANDIVER IS a junior elementary education major. Formerly she was a representative on the state membership committee.

THE TOREADOR

Established in 1925

Out of the Past

The Toreador, September, 1925

They talk about famous newspaper scoops, but we'll wager there has never been one to compare with the following news story found in the September 7, 1925 issue of the Toreador . . .

"A scrap of paper in the president's office was given new significance by the tragic death of Will Rogers. On October 26, 1926, Rogers was visiting in the home of Amon G. Carter of Ft. Worth, then chairman of the board of directors of the college. Carter mentioned that the Tech band wanted to come to Ft. Worth for the Tech-T.C.U. football game, but that the college would be unable to finance the trip.

"How much would it take to bring them," the humorist asked.

"About two hundred dollars, I think," Carter replied.

"Without any hesitation, Rogers wrote a check to the Tech band for two hundred dollars and presented it to his host. A photostatic copy of this check is retained in Dr. Knapp's office as a souvenir."

Anyway, it's an interesting story, even if the dates are somewhat confusing.

Winners . . .

Ten finalists were chosen from a field of seventeen in preliminary judging Friday night. Judging was based on talent, swim suit appearance, personality and charm.

TECH COEDS WERE Jeanne Cagel, Sandra Hendrix, Paula Wilkerson, Sue Post, Lajuna

Rabb, and Irma Galindo. Anne Wilhite, Rosemary Kay, and Joanne Hinkle were also among the ten finalists.

MISS CONE RECEIVES an expense-paid trip for herself and a chaperone to Beaumont, July 28-29. She will also share in \$500 worth of gift certificates from Lubbock merchants.

Dean Allen Is Attending Conference

Dean and Mrs. James G. Allen are attending the 41st Meeting of the National Association of Student Personnel Administrators (NASPA) at the Harvard Business School in Boston, Mass., June 25-30.

THE MEETING is a workshop directed by representatives of the Harvard Business School.

Dean Allen is a participant in Commission III of the National Association, which is to do work on "The Development and Training of Student Personnel Administrators." Dean O. D. Roberts of Purdue University is chairman of this Commission.

"**STUDENT Personnel Work** as a Career" is the topic for a brochure to be prepared by a subcommittee of which Dean Allen is a member.

He will also serve as chairman for a panel discussion concerning "Peripheral Problems — Automobiles, Drinking, Discrimination, Dress, Public Display of Affection, Intercampus Raids." This discussion is scheduled for Monday afternoon, June 29.

Thomas Represents Tech at Meeting

Dr. Henry C. Thomas, physics department head at Texas Tech, represented Tech at a meeting of nuclear science and engineering fellowship advisors Saturday (June 20) at Gatlinburg, Tenn.

SPONSORED BY the Oak Ridge Institute of Nuclear Studies, the conference was held to discuss problems of planning nu-

clear course work, promotion and administrative details of the fellowship program.

Thomas became head of Tech's physics department last year. He holds a B.S. degree from Western Kentucky State and M.S. and Ph.D. degrees from Vanderbilt University.

PRIOR TO joining the Tech faculty, he was physics department head at Bradley Polytechnic Institute and spent five summers as a research scientist at Oak Ridge National Laboratory.

At Oak Ridge he was acting director of the Beta Ray research group.

In addition to his regular classroom and administrative duties this past academic year, Thomas has directed a class in atomic-age physics for high school teachers in the Lubbock area.

Techsan Gives Garden Advice

Now's the time for the division and planting of chrysanthemums to make yards and gardens brighter in the fall, a Tech horticulturist advises.

Ed Zukauckas, assistant professor of horticulture at Tech, reminds gardeners that purchased seedlings or divided mums may be set out from June 10 to almost the end of July with success.

"Planting now," he said, "will give the average South Plains homeowner and gardener an opportunity to have mums ready to enter in Tech's Fall Horticulture Festival slated Oct. 17-18."

Teachers Get English Honor

National Defense Graduate Fellowships have been presented three high school English teachers, enabling each to spend three years of study on the doctoral level at Tech.

WILLIAM F. MARTIN of Lamesa, Melvin R. Roberts of Seminole, Okla., and Miss Martha Davis of DeQueen, Ark., are the three recipients.

Martin is a 1954 Tech graduate and Pettus High School teacher. Roberts is a 1958 graduate of East Central State College at Ada, Okla., and a Tascosa High School teacher in Amarillo. Miss Davis is a 1955 graduate of Arkansas State College at Conway.

THE THREE Tech fellowships are awarded from 1,000 such grants authorized by the National Defense Act of 1958, according to Dr. Truman Camp, English department head.

Dr. Camp also stated the English department's doctoral program has been expanded to include a course in the teaching of college-level English for prospective career college teachers.

DID YOU KNOW—that on June 8, 1936, the Victory Bells, presented to the college by the graduating class of 1936, were rung for the first time, for 15 minutes preceding Commencement exercises.

Language Workshop Nears Last Session

Members of Tech's foreign language workshop finish the concluding work to the three-weeks course on Friday.

Workshop members during the course wrote and put on tape foreign language materials.

Dr. Harley Oberhelman, foreign language assistant professor, directed the class of 13 secondary teachers and two elementary teachers.

According to Dr. Oberhelman, the course was divided into three separate stages. Period one saw the language teachers studying the methods and techniques of making electronic tapes.

During the next section of practice, course members spent about a week writing materials for later recording.

During this concluding week, Tech students and faculty personnel have recorded the scripts in Spanish on master tapes, Oberhelman said. The master tapes are now being used to reproduce separate tapes for each member of the workshop. These tapes will be used in teaching Spanish in junior and senior high schools.

Approximately 30 elementary teachers participated in a workshop for persons who work with Spanish-speaking children. Dr. Faye Bumpass, assistant professor of English, directed the special course in teaching English as a "foreign" language.

Two elementary teachers in the language laboratory workshop taped a master tape describing techniques of teaching English as a foreign language to Spanish-American students.

Oberhelman stated that the master to this tape would be on

file in Tech's audio-language lab. Teachers in the area may send in a blank tape to be recorded from this lecture tape.

Assisting in recording the Spanish tapes were Dr. Julio Rivera, assistant professor of sociology

from Colombia, Mrs. Yamandu Ubal of Uruguay, Mrs. Cathy McCullen of Cuba, Charles Aguilar, Tech student from Seminole, Roberto Villa-Garcia, Tech student from Peru, and Alfred Zabroky, Tech student from Mexico.

Apprentice Teachers Enter Final Week of Course

A unique apprentice program in pre-service teacher education for vocational homemaking is moving into its final week of residence for the apprentice teachers.

SPONSORED BY THE Tech home economics education department and the Sears Foundation, the apprentice teachers are locat-

ed in ten places over the state, principally in West Texas.

Dr. Willa Vaughn Tinsley, dean of the School of Home Economics, is to visit Miss Judy Kelley, one of the apprentice teachers who is in the Galena Park School, and the supervisory teachers of that local program on Monday, June 29.

Audio Visual Groups Plan Coop Centers

Two audio-visual specialists, Dr. Henry McCarty of Tech and Dr. Horace Hartsell of Michigan State, have developed plans for small-school cooperative centers for audio-visual materials.

ALTERABLE TO FIT numerous small-school situations, the plans make available to students in small rural schools the advantage of instructional films in color, audio tapes and other audio-visual aids.

Since the expensive equipment and supplies needed for educational color films and taped teaching aids are out of reach for most small schools, the two researchers concerned themselves with finding a workable system for cooperative programs.

TO DO THIS, THEY studied 104 cooperative audio-visual centers in the U.S., preparing plans for systems involving student populations of 10,000 to 50,000.

The National Education Association's Departments of Audio-Visual Instruction and Rural Education have published the results of the study.

COPIES OF the study, "The Cooperative Approach to Audio-Visual Programs," may be obtained for \$1.50 each from either of the departments mentioned.

Seniors should remember that deadline for ordering Senior Invitations is July 16 and for receiving a Cap and Gown is July 22.

The deadline for submitting material for the July 8, 1959 issue of TECH TIMES is July 1. Call Mrs. Virginia Sauer, department of public information, Ext. 417 or 437.
