

## Convocation Expected For Publications Race

### Fore.. Grab Your Stick, Golf's Here

Tech May Get 9 Hole Course On Campus

Grab your golf sticks and come running, all you lads and lassies who like to see how far and accurately you can drive the little white pellet.

Tech may get a golf course on the campus, according to information received today. The course would be located about 100 yards northwest of the engineering building and would have 9 holes. The project is sponsored by several faculty members and 60 members of the Golf club, recently organized.

The project will be financed by private funds raised by the club through various entertainments which will be given later in the year. The course had been discussed before but nothing had been done to further the project.

**Golf Tourney Slated**  
All persons interested in golf and a campus course should attend a meeting of the Golf club Thursday night at 7:30 in Room 210. The project will be discussed.

The annual Texas Tech Golf tournament qualifications start Sunday, Feb. 18 and end March 17. The tourney will be held on the Broadview course east of town. Any student can enter and compete for prizes which will be announced later. J. W. Jackson, government professor, Alex Cooke and J. D. Webster are officials in the tourney. Anyone wishing to enter should contact one of them. Cooke is president of the Golf club and Webster is treasurer.

### Activity Book Funds Changed

The student council in a meeting this week made a few slight changes in the apportionment of money received from the sale of student activity tickets and which is divided among campus organizations. The only major change was made when a motion was passed that \$.075 be taken from each activity ticket which had been allocated to the student council, and added to the Engineering show.

This change raises the apportionment to the Engineering show from \$.015 to \$.225 for each book sold. Consideration was made to the show because of its rapid increase and because of the thousands of visitors who saw Tech campus during this annual presentation. Also the expense of obtaining equipment and other materials was taken into consideration by the council in the allocation of money.

### Engin' Societies Hold Meeting

AIEE met with ASCE Tuesday night in the Engineering auditorium. Slides were shown and two sound films, "Television" and "Airways" from the Radio Corporation of America were shown.

Hubert Allen of the Texas-New Mexico Utilities company spoke on "The Revenue and Expense Dollar," a discussion of power rates.

### Make Your Dates From: The College CALENDAR

- TODAY**  
Las Leales dinner, 6:30, Hilton hotel  
Kappa Kappa Psi dinner and dance, Hilton hotel
- SUNDAY**  
Alpha Phi Omega, 2, 216  
Silver Key rush dinner, 6:30 to 9:30, Hilton hotel
- MONDAY**

American Chemical society, 7, CF

### When Musicians Were In Flour . . .

Gov. Wilburt Lee O'Daniel broadcasts from the governor's mansion in Austin with his Hillbilly band, before crowds of 350-400 persons in the double-drawing room paced by the greatest statesmen of Texas. Left to right in this photograph taken last spring are Gov. O'Daniel, Pat O'Daniel, Bundy Bratcher (with accordion) and Mike O'Daniel. The ear at the right belongs to Curly Perin, guitar player in the band.

### 'Champion' Hillbilly Band Member Taking Rest Cure 'Far From The Maddening Song'

**By BILL WOOD**  
How would YOU like to eat biscuits three times a day for two years?  
That's the price John Bundy Bratcher, Texas Tech junior paid for a job in Gov. Wilburt Lee O'Daniel's Hillbilly band. The first thing Bundy bought when he left O'Daniel's string section in Austin last May—even before he purchased a train ticket to Lubbock—was a pullman loaf of real, sliced bread.

Bratcher alternated between the organ and his accordion during the governor's Sunday morning broadcasts, but played the latter almost exclusively in the week-day programs.

**Pleases Flour Peddler**  
He began playing an accordion in 1934. Bratcher's first radio program was over KFYO in 1936 with Roy Rogers, now a Hollywood cowboy singer.

In January, 1938, one of W. Lee

O'Daniel's flour salesmen, making his Panhandle rounds heard Bundy and his accordion. He wrote O'Daniel recommending Bratcher for a job with the Hillbilly band.

Bundy's audition was a success and later that month he moved to Fort Worth and the now-famous flour mill of W. Lee O'Daniel.

The Hillbilly band opened O'Daniel's campaign in Waco about the first of May, 1938, and traveled 15,000 miles over the state before closing in Kilgore, July 23, 1938.

Bundy and the governor's two sons—Pat and Mike—were featured performers with the band. They traveled in a special bus, playing every important city in Texas with the exception of El Paso.

**Molly Collects**  
Molly O'Daniel, who was 15 years old last Tuesday, did not sing with the band—contrary to a few publicity-agent reports. Her by-no-means mental task was to collect

campaign contributions from the crowds.

After election returns were counted, the Hillbilly Boys became perhaps the most widely acclaimed string band in the nation. Park Amusement company of New York city offered them a 10-week contract at \$12,500 a week for a personal appearance.

However, the governor-elect turned thumbs down on the proposition, fearful of its political aftermath.

**Plays For Inauguration**  
Twenty-eight programs a week, both transcribed and personal appearance, the Hillbilly Boys made from WBAP, Fort Worth, and stations in Houston, Dallas and San Antonio. Transcriptions were sent to XEAW, Reynosa, Mexico, after the governor and his band moved to Austin.

O'Daniel's party arrived in Austin late Monday afternoon, Jan. 16. See CHAMP page 4

### HE Dean To Speak To Tech Coeds

Dr. Margaret Justin, dean of home economics at the Kansas State Agricultural college, will speak to the young women of Tech at 10 o'clock a.m., Feb. 23, at the home economics auditorium.

Dr. Justin's speech will concern the different fields open to the women of today. She is being sponsored by Phi U and Women's Press club.

The Lubbock branch of the AA UW will have a luncheon in her honor at 12 o'clock, Feb. 23, at 2005 Broadway. That evening she will go to Canyon to lecture there.

A native of Kansas, Margaret Justin received her first degree from Kansas State Agricultural college. She holds a B. A. degree from Columbia university and the degree of doctor of philosophy at Yale university. As a graduate student at Yale she held various fellowships, including one from the American Association of University Women.

Dr. Anna Powell will accompany Dr. Justin on the tour.

### Tau Beta Pi Prexy Visits Campus

C. H. Spencer, national president of Tau Beta Pi, will visit the Tech chapter Friday at which time a banquet will be given in the Hilton hotel.

Spring initiation for the honorary engineering society will also be held. Tau Beta Pi, which has 69 chapters in the United States, requires members to be in the upper quarter of their class.

### CAMERA CLUB MEETS

Prints of night photographs will be discussed at the meeting of the camera club at 7:30 o'clock Tuesday night at Reeves studio. Students interested in photography are invited. J. Q. Sealey, president of the organization, announced.

MARIAN LEE MASON

### Mock Trial Set Tuesday Night In Doak Hall

Rumors today disclosed that new evidence which, according to Paul Castleberry, attorney for the defense, "would put the state's case to shame" in its charges against Ivan Block, Robert Stewart and David Carson who were indicted last week for kidnaping.

Three three men were still in jail today pending payment of a \$50,000 bond, said Maurice Poole, state prosecutor, who also intimated that new evidence had been turned up in the state's case. Block, Stewart and Carson were arrested last week after Marian Lee Mason, sophomore from Post, had been abducted from the Blue Lantern, Avenue hangout, and held 12 hours in a tourist camp near the outskirts of the city.

The trial will be held in the dining room of the Doak hall Tuesday night at 7:30, said Judge Mayo Boucher, who promises a swift trial and speedy justice.

### Navajo Relics Now In Museum

Indians Ranged As Far East As Paducah

The farthest east point that evidences of occupation by the Navajo Indian have been found is a boy's grave near Paducah recently excavated by staff workers of the West Texas museum.

Articles buried with the 7-or-8-year-old boy are characteristic of the Navajo. Two files, a hand-forged hammer, five Mexican silver pesos and an ornament made of circular pieces of silver called "conchos" strung on woven horse-hair, were buried with the boy.

Dr. W. C. Holden theorizes that the boy belonged to a party of Navajos who escaped from a camp at Fort Sumner where they had been detained and traveled across the plains in search of food. The boy perhaps weakened from loss of sleep, starvation and privation died in the lonely canyon and was buried under the cypress ledge. Time of the burial must have been shortly after the Civil War as the coins were dated 1863 and it is known that such a group of Navajos were detained at Fort Sumner shortly after the war.

The articles taken from the grave are on exhibit in the museum.

### State Director To Visit Campus

Miss Ruth Huey, state director of vocational homemaking in high schools, will make her yearly visit to Lubbock and the campus Monday, Feb. 19.

Homemaking teachers of Lubbock county will entertain Miss Huey with a dinner-meeting Monday evening at 6:15 o'clock at 2005 Broadway. Miss Margaret W. Weeks, dean of home economics, said.

Miss Huey will have an opportunity to meet faculty members at a buffet supper in her honor at the home management house on the campus Tuesday at 6:30 p.m.

While here, Miss Huey will have conferences with home economics faculty members both in the high schools and in Tech, and with student home economics education majors, Dean Weeks said.

### Former Football Player Promoted

Former Techman N. E. Trostle, the man who made the starting kick-off in the first football game Texas Tech played, has received appointment as acting city manager of Temple, according to information received recently by Dorothy Rylander.

Trostle, formerly of Shamrock where he attended high school, later attended Clarendon college and then enrolled in Tech when it opened in 1925. He became a member on Tech's first football team and made the kickoff when they played McMurry college at Abilene. He later taught school at Groom and engaged in engineering work in West Texas for several years.

He moved to Temple three years ago as PWA engineer on a sewer project. After being city engineer since 1937, Trostle was appointed acting city manager. Trostle received his bachelor of science degree here in civil engineering in 1931.

### Laine To Work In Allison Campaign

Morris Laine, 1939 journalism graduate, has gone to Levelland to work as publicity man for Alvin R. Allison in his campaign for state senator.

Laine has been with the Dickens County Times during the past few months.

### NAUTILUS DISCUSSED

The different paths of progress taken by chambered nautilus, a marine shelled invertebrate, will be discussed by Dr. Waldo S. Glock at 7:30 o'clock Tuesday night in Room C101 before members of the biology club. "Geological History of the Chambered Nautilus" is his subject.

### Ballet Russe 'Special Train' Arrives Monday For Matinee, Evening Performance; Classes Dismissed

By PUCKETT

Monday morning at 9 o'clock the Ballet Russe "Special" will steam into Lubbock, with four luggage cars loaded with scenery, props, costumes, trunks, musical instruments and electrical equipment and six sleepers loaded with 75 dancers.

It will require six 20-foot wagons, or trucks to haul the equipment to the high school where, at 11 o'clock, a stage crew of 15 will begin setting up the show for its matinee performance at 3:15 Monday afternoon.

All classes and laboratory sections are to be dismissed promptly at 2:30 o'clock and for the remainder of the afternoon. If instructors in charge of laboratory sections do not plan to attend the matinee, such instructors may, at their discretion, keep the laboratory open and available for those who desire to work during the performance, but no record of attendance need be made and no absences shall be reported.

In order that as many students as possible may be accommodated, student ticket will remain on sale at the business office in the Administration building until noon Saturday. Positively no student tickets will be sold Monday or at the box office. Students and town people holding season tickets are again notified that such tickets are good for matinee only and no season ticket regardless of its holder will be honored at the night performance.

A peep into the activities of this vast company of 125 people reveals a pre-show routine something like this:

**Flurry Of Activity**  
The productions to be used for that performance are drawn forth and trundled into the show house. The stage crew hangs the scenery; serpentine wires appear and spotlights, floodlight and other electrical paraphernalia are connected. Four wardrobe ladies unpack and four pressers heat their irons to unwrinkle the costumes. If "Giselle" or "Swan-Lake" is on the bill it means eighteen yards of tulle pressed in each costume. If it is "Seventh Symphony" it means that seven dressers will be on hand to help the dancers into costumes that needed more than

DANILOVA

### Student Council Bans Campaign Literature

Candidates Invited To Provide Entertainment

Following a ruling of the student council preventing distribution of circulars, handbills, small cards, bulletins and other advertising matter which might clutter up the campus, the Pre-Law club renewed plans for a general student convocation for publications offices. Tentative plans call for an assembly in the gymnasium Monday night, Feb. 26, where candidates might put on novelty sketches for entertainment.

### Dorothy Dix To Advise Students At Press Meet

Get your questions about love and romance ready if you are going to the Southwestern Journalism congress this spring because Dorothy Dix, one of the worlds great women reporters and columnists, will be there to address the conference.

The congress which is to be held in New Orleans, March 15-16, will feature Herbert M. Davidson, editor of the Daytona (Fla.) News-Journal. Davidson is chairman of the Committee on Schools of Journalism, Southern Newspaper Publishers association. Also, he represents the southern publishers of the National Council on Professional Education for Journalism.

Otis A. Brumby, publisher of the Cobb County Times, Marietta, Ga., is also slated to speak. Plans for special entertainment for members of the Southwestern Press club and student delegates are being made, according to Percy J. Stakelum, president of the club.

### Alpha Chi Gets 5 New Members

Five new members paid fees and were initiated into Alpha Chi, national honorary fraternity, at its regular meeting Thursday afternoon making total membership 97. New members were Lottie Reed, Helen Lyttle, Norman Foote, Howard Allen and J. T. Lamm.

Alpha Chi meets every third Thursday of the month, said Henry Gunter, president. Notices will be published in the college calendar and will be written on bulletins from now on, stated Gunter.

E. A. Mills, sponsor, said that several committees will be appointed to make arrangements for the spring semester banquet. He also urged that others who had been invited to join the club get in touch with him or Gunter. Being a member of this organization helps in getting a job when you finish college, he said. Last year's members who wish to join this year can get in for less than half the regular price, said Gunter.

### Mrs. Langford To Attend PE Meet In Birmingham

Itinerary of Mrs. Johnny E. Langford for the month of March includes Austin, Texas, and Birmingham, Ala.

The Health Education conference of Directors of Physical Education for College Women annual meeting will be held in Birmingham March 25 to 26.

The Southern District Convention will be held in Hotel Tuttle in Birmingham March 27 to 30.

### PLEDGES INITIATED

At their regular meeting at 7 p. m. Wednesday in the Administration building the Sans Souci club held its initiation of new pledges. Those initiated were Billee Chance, Etoile McLeod and Jane Farris.

### FLURRY OF ACTIVITY

The productions to be used for that performance are drawn forth and trundled into the show house. The stage crew hangs the scenery; serpentine wires appear and spotlights, floodlight and other electrical paraphernalia are connected. Four wardrobe ladies unpack and four pressers heat their irons to unwrinkle the costumes. If "Giselle" or "Swan-Lake" is on the bill it means eighteen yards of tulle pressed in each costume. If it is "Seventh Symphony" it means that seven dressers will be on hand to help the dancers into costumes that needed more than

YOUSEVITCHE

### It's Your Move ...

THERE ARE several things on Tech campus which are not a source of pride among students, but by far the greatest disgrace and eyesore is the gymnasium.

Four thousand students are required by the college to take four hours of physical education in a two-by-four frame shack where students freeze in winter, contract colds and even pneumonia from a windswept floor where no self-respecting farmer would keep his cattle without a high mortality rate or a visit from the humane society. But it seems to be good enough for Tech students.

The State of Texas has emphasized its disinterest in the matter of correction by repeated blue-penciling of appropriations necessary for construction of a decent building large enough to house students and provide needed equipment. However, there is a solution to the problem independent of the State.

While students are concerned with building a half million dollars worth of buildings for the State, they might as well include plans for a gymnasium. Liquidation of funds borrowed from private sources for the project might be retired in two ways:

First, a compulsory student activity would provide \$10,000 annually, enough to retire bonds on a gymnasium suitable to the needs within ten years.

Second, the student body could vote to assess a fee of \$2 per semester for each enrollee, raising \$16,000 annually for the construction of a gymnasium costing approximately \$150,000.

Erection of the gymnasium would provide a place for college dances, additional athletic events, convocations, presentation of plays, conventions and many other activities which are now prohibited because of inadequate space and equipment and for which local hotels, high school auditorium and miscellaneous halls are rented. In addition to these advantages, compulsory physical education would become a pleasure instead of a dangerous discomfort, minor sports would be encouraged and a suitable place for scholastic and athletic contests provided.

Holders of athletic tickets or those paying the bond fee would unquestionably derive their money's worth from the benefits and advantages of a new and well-equipped gymnasium. The addition of a swimming pool would in itself be worth the additional cost. Where in this entire section of the country could a person swim indoors, winter and summer, for \$2 a semester?

This is a matter to be considered seriously by every student. Consider also that instead of saving money the student is actually paying in health and recreational advantages by maintaining a frame shack which may be condemned as unsafe at any time.

### You Can Vote ...

IT IS LESS than two weeks before publications offices for 1940-41 will be filled with new heads by student votes.

Last year the largest number of students that has ever voted at Tech was represented in the election. Only 1600 voted. What about the 1700 hundred that didn't vote? That's what we would like to know. It is the student's privilege to go to the polls and show his choice of candidates for campus offices. It is his duty. Unless he does his part in casting his vote for some candidate, he has no reason to complain about the way these offices are conducted the following year. Voting costs nothing, takes only a few minutes. Anyone enrolled as an undergraduate can vote in the publications election.

Because this school is a democratic institution with equality for all, each student is cheating himself of being an integral part of the institution by not voting. Only by making his vote count can he exercise the rights that become his when he signs his registration papers. He is taught in high school that some of the evils of government are caused by the fact that only 51 per cent of the qualified voters of the United States go to the polls on election day. Surely a college student should realize that the majority of his fellowmen are fair, honest and sincere in their desire to benefit this institution, that only a minority represents that which is detrimental. The way to beat such minorities is through the vote of the average student.

His duty should be exercised Feb. 29 by his going to the ballot box in one of the main buildings and voting for the persons he thinks can best serve this school and can solve its problems. We urge that every undergraduate student of Tech go to the polls and vote in the coming election.

### High Hat Is Right ...

HOPEFUL sign is the failure of 72 out of 114 social club pledges to maintain a sufficient grade average to allow them to become initiated.

For years some rigid requirements governing participation of students in social clubs have been needed. Only of late have pledges been held to a minimum scholastic average before becoming members. In the future it may be safely said that the making of a good grade average is as much a condition for membership in a social club as appearance and personality.

Those who failed this semester may maintain their pledgeships. However, clubs are cooperating with the college in demanding that a student first satisfy scholastic requirements before entering upon a social program which necessarily involves added distractions and responsibilities quite aside from the business of getting an education.

Like national fraternities, Tech's social clubs are laying down conditions for membership which will elevate the standards of the clubs and reflect credit upon their members.

### Beautify The Campus ...

BEAUTIFICATION of Texas Tech campus is one of the many problems facing legislators and administrative staff at the present time. In the face of dire need of additional buildings, and state appropriations which could make them possible, nevertheless we should not neglect the idea of making our campus attractive.

Prof. James H. Murdough, president of the committee for campus beautification is now working on plans, limited, of course, by finances, which may change the general appearance of the campus much as a bit of well-placed dabbling and smearing changes the appearance of battleships.

Suggestions which might be constructive are the planting of shrubbery along the drive from College avenue to the circle and along other driveways on the campus. The area bounded by the circle might be elevated to four or five feet above surface, shrubs, grass and flowers might be planted there with a monument typical of frontier life mounting the heights.

Out buildings, store rooms and miscellaneous shacks might be whitewashed, repaired and set in order of good appearance. An attractive front entrance which might induce strangers, tourists and visitors to enter and enjoy further beauty would be a great help to greater acquaintanceship and growth of the college.

Many other improvements could be mentioned which would be of more inherent value, but the most apparent is what concerns the average onlooker. Why not, therefore, make the outward appearance attractive to the visitor? The time element will of necessity enter into the matter of improving campus appearance; nevertheless, it is a goal to work toward. If the student body and members of the faculty would become beautification-conscious, there might be a phenomenal improvement made on the campus in record time.

### Disappointment Comes ...

LAST semester THE TOREADOR carried several editorials urging that officials make arrangements to keep the Library building open on Sundays. However, nothing progressive was done to help the condition of students who have to do most of their studying on Sunday afternoons.

Several polls were taken, and it was found that many students work downtown on Saturday afternoons and are not able to get off in time to get a book from the Library before 5 o'clock. For this reason students are often forced to spend the weekend lying around when they could just as easily be catching up on some needed studying. Many professors and teachers assign most of the outside work for the following week over the holiday so that students will have more time to work on them. They fail to reason that some of them can't arrange to get reserved books out of the Library before closing time Saturdays. Other students who, perhaps, have no studying to do would like to do some educational or recreative reading on Sunday but do not have the books and magazines available at their residences.

A close checkup has revealed that the cost to keep two students hired and keep the building open on Sunday afternoons from 1 to 6 o'clock would be nominal. Heating and lighting expense would be very little for this semester since the weather will soon be warm and the reading rooms can be lighted adequately by sunlight. The greatest expenditure would be hiring two students to work at the loan desk, and this would not be enough to bankrupt any department of the college.

It is time that some definite action be taken to dignify the position of Tech's Library, and make it the student's study room rather than treating it like a modern Parthenon, useless except to a limited group.

"I love you. Your eyes are galaxies of stars, your lips crushed cherries from the garden of the Gods." Other famous lines are Mannerheim, Maginot and Seigfried.

A Canadian college student has transferred to the University of Georgia because she wanted to learn more about the country described in "Gone With the Wind."

Donald and Maurine Nordlund, brother and sister, earned perfect grades at Midland college last semester.

## THE TOREADOR

THE TOREADOR, student newspaper of Texas Technological college, is published every Wednesday and Saturday on the campus of Texas Technological college at Lubbock by students of the Journalism department.

Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under the act of March 3, 1879. Editorial offices, Engineering building, 3, 4, 5. Telephones: college switchboard: Night Editor, 1286.

Special To Hollywood—To Find Out How A Dinosaur Goes Listen to Martin Dies!

When a movie studio gets in trouble, it's news. That is just what Hal Roach Studios is in out "Grapes of Wrath Way." Out there a picture is in the making entitled "1,000,000 B. C." and would you believe it—they forgot what kind of a noise a dinosaur makes! So, like a lot of wise guys, he writes college scientists and historians, to find out what kind of guttural to punch on the celluloid.

### We Introduce

O. A. St. Clair, professor and head of department of industrial engineering and engineering drawing. He was born in Kansas and lived in the north before coming to Tech in 1934. After graduating from the Armour Institute of Technology in Chicago where he received his B. S. and E. E. degrees, he was employed in electric railway work for three years. Other positions he held include designer for the U. S. Gypsum company, chief engineer for the Beaver Products company and chief engineer for the Atlantic Gypsum company of New York. Mr. St. Clair is a member of the SPEE, the ASME and the Lubbock Technical Club. He says that he is too busy to have hobbies.

### And ...

Robert P. Vail, instructor in mechanical engineering since 1937. He attended St. Johns University, Knox College and the University of Minnesota, where he obtained his B.M.E. and M.S. degrees in mechanical engineering. Before coming to Tech, he was with the Smith Welding Equipment corporation and the Northwest Research Laboratory as research assistant. He also taught in the University of Minnesota. Mr. Vail belongs to the SPEE and says that his main hobbies are hunting and fishing.

### In The Mail Pouch

Editor, THE TOREADOR,  
On days when I have a lab that I do not enjoy, I go home and turn on my radio to listen to soft music that should come from there to soothe my tired nerves and what do I hear but some blasted "fiddlin" stuff commonly called music.

In the mornings when I get briskly out of bed and feel very kindly toward everyone, I turn on

### League Of Nations Seeks Students To Help With '40 Fair

The League of Nations association is once again to have the privilege of staffing the League of Nations Pavilion in the 1940 World's Fair. We are seeking students with both a knowledge of and an interest in international relations to volunteer their services as guides for a limited period of time.

A large percentage of the people who came to the Pavilion last summer were especially interested in having the exhibits explained to them. The guides served the double purpose of welcoming all visitors and conducting them through the Pavilion, explaining the work illustrated in the various rooms. The Pavilion gives an honest evaluation of the work of the

League of Nations. It is comprised of six rooms: the first treats with the development of the concept of international cooperation; the three rooms which follow are devoted respectively to the health, social and economic work of the League; the fifth room deals with disarmament and the political and legal work of the Council of the League and the World Court; and the sixth room, the Rotunda, symbolizes the aims and purposes of the League. Students who are interested in the possibility of doing this work can apply for further information to the League of Nations association, 8 West 40th Street, New York City

# Raiders Sweep Mines Series; Wind Up With '66' And Hirsutes

## Raiders Face Champion Club

After a one-night stand in their own back yard, Texas Tech's basketballers continue and conclude a two-game series with Phillips '66' Oilers tonight in Borger.

The Raiders are breaking into big time competition in playing the powerful Oilers from Bartlesville, Okla. For three years they have rated among the nation's best, always placing high in the National AAU tournament, only recognized national sawoff. In 1937 they placed second, in 1938 they finished third and were back in second slot in the 1939 tourney.

They compete in the Missouri Valley AAU league, conceded to be the most powerful independent basketball loop in America.

Chuck Hyatt, acclaimed by many experts as the greatest player the game has ever known, coaches the Phillips team. Hyatt was practically a fixture on the All-American team from 1925 to 1937, when he finished his playing career.

The Phillips team has piled up 110 victories against 23 losses in the last three years.

Practically every member of the team has been picked on All-American at one time or another. Perhaps outstanding is Joe Fortenberry, center, twice All-American and member of the 1936 world's champion Olympic team. Fortenberry played at West Texas State Teachers during his college days.

The Techsians return home for a two-game series with House of David Wednesday and Thursday. These two games will conclude the home schedule.

Other members of the Phillips team are: Raymond Boling, Donald Lockard, Lloyd Tucker, Donald Shields, Bill Martin, Frank Groves, Frederick Troutwine, G. R. A. Lewis.

## Dairy Head To Discuss Cream

Prof. K. M. Renner, head of the department of dairy manufactures, will give a short course on color and flavor of ice cream in Fort Worth, Tuesday, Feb. 20, at a meeting of manufacturers and jobbers of Fort Worth and Dallas.

Exhibits of chocolate, peach and strawberry ice cream will be given special study, and manufacturers will exhibit samples of their products for criticism. Flavors and colors with special "sales appeal" will be given attention of the members, and "negative color appeal" in ice cream will also be studied, to aid manufacturers in selection of color that will raise the customer's appetite to a degree comparable to that of a hungry wolf.

## Pledges Of Band Frat Initiated

Initiation for the pledges of Kappa Kappa Psi, band fraternity, took place Thursday at 7 p. m. in the Textile building. Pledges initiated include James Williams, Durward Boyd, Hunter Brannon, Woodard McDonnell, Gene Nickel, Norman Wiley and Jack Boone. Charles S. Eskridge, director of the Lubbock high school band, was made an honorary member of the fraternity.

Officials: Hambright and Miller.

## Techsians To Try To Clip The Hairy Ones On Gym Floor

Texas Tech's Red Raider basketballers conclude their regular schedule next week, meeting House of David in a two-game series on the local floor Wednesday and Thursday.

The Whiskered Ones from St. Augustine, Fla., are captained and coached by Bill Steinecke, veteran of ten years with the team.

Steinecke is a former major league baseball player, graduate of De Paul university. Other members of the squad are Ham Hamilton, six years a member of the Davids Clyde Mitchell, six-and-a-half foot center; Joe Hiraba and Buster Kinard hold down the forward spots.

Tech is tentatively entered in the Southwestern tournament at El Paso this month, but the athletic council must approve before it is official. Otherwise the House of David contests are the season's finale for the Raiders.

## Tech Wins In Two Thrillers

Border Conference basketball as exemplified by its leading team, Texas School of Mines, took a setback from an ex-member this week. Texas Tech took a 31-29 decision from the Muckers in the local gym Tuesday night, making it two in a row. They won Monday night, 52-32.

In contrast to the opening game, when Tech took a big lead and held it all the way, the two teams matched shot for shot until late in the game. Mines led at half, 10-9, and were ahead 19-17 in the middle of the fourth period.

Too many missed free shots cost both teams heavily; either could have won easily had it sunk all its penalty tosses.

Three players, Lasseter and Mora of Mines and Roper of Tech, were ejected because of excessive personal fouling. Referees Ed Hambright and Hack Miller started tooling at the beginning and didn't let up all the way.

## White, '39 Raider Grid Leader Ends Career

### Akey Opens Golf Classes Thursday

Professional Charles Akey of the Lubbock Country Club inaugurated weekly golf instructions Thursday in rear of the Texas Tech gymnasium. Coach Pete W. Cawthon announced that these golf classes will be conducted each Thursday afternoon from 3 to 5 o'clock. Professional Akey will furnish clubs to students who have none.

Arrangements for Akey to serve as golf instructor were made at a meeting attended by President Clifford B. Jones, Coach Pete W. Cawthon, Golf Coach J. W. Jackson, Dean J. M. Gordon, Tom Gaston and Charles Akey.

Students taking this course will be excused from any PT classes they might have regardless of what hours they are scheduled, therefore receiving PE credit in 114 or 214.

These golf classes will be staged weekly through May 15th and a fee of \$3.50 for the three months will be charged. This fee is payable at the business office. Members of the faculty who have not heretofore played golf are also eligible for Akey's classes. Akey will conduct separate classes for boys and girls.

## First Industrial Grad Gets Job

Carl Bechtold, first industrial engineering graduate of Tech, has received a position as designer and construction engineer with Lubbock Steel works, Lubbock, according to information received by O. A. St. Clair, head of industrial engineering department.

This department which is only five years old graduated Bechtold in 1938. He was engaged in Soil Conservation service with the federal government at Tulsa until about two months ago when he went to work for the local firm.

## YOUNGS ATTEND FUNERAL

Dr. and Mrs. A. W. Young have been called to Dayton, Iowa, to attend the funeral of Mrs. Young's father.

## By BILL WOOD

From 15 returning lettermen, members of the Southwest's highest scoring football team in 1938, they named him captain.

He was rugged, speedy, clear-thinking; unanimously opined one of the greatest guards in the business. Then hard luck struck, and with the beginning of spring finals he underwent a critical operation for stomach ulcers.

Raiders and intimate followers of Red Raider football fortunes checked him off their preferred lists.

"Few men could even survive that operation," they said. "None could get ready for football in two months."

## White, '39 Raider Grid Leader Ends Career

Throughout his college grid career Dixie White has been known for his steam-roller blocking and scrapping defense. He was as full of fire as the City of Chicago in 1871.

He drew three letters in Raider football; played against West Virginia's Mountaineers in the Sun Bowl game of 1938, and against St. Mary's Gaels in the Cotton Bowl clash in 1939.

## White, '39 Raider Grid Leader Ends Career

Today he is general supervisor of La Fonda football dormitory, an extremely responsible position, trusted and respected by his teammates and coaches.

## White, '39 Raider Grid Leader Ends Career

Dixie White will not pursue further grid honors through professional football, but intends studying petroleum engineering.

## White, '39 Raider Grid Leader Ends Career

But, certainly Dixie White can be listed in the top bracket along with such brilliant stars of yesterday as Pete Owens and Walker Nichols.

## White, '39 Raider Grid Leader Ends Career

To say that he is Texas Tech's greatest right guard would be unfair not only to him but to others who have played that position in the past and to those who will play it in the future.

## Student Referees

J. W. Partin, pictured above, referred the Lubbock county interscholastic League basketball tournament at Cooper high school gymnasium this weekend. Tourney began Thursday night, ends tonight. Winner will represent Lubbock county in the district tournament in Tech's gymnasium next weekend. Partin is a senior arts and sciences student.

In 1935 he was named captain of the Westerners. The next fall he followed Huffman to Texas Tech's freshman team.

Throughout his college grid career Dixie White has been known for his steam-roller blocking and scrapping defense. He was as full of fire as the City of Chicago in 1871.

He drew three letters in Raider football; played against West Virginia's Mountaineers in the Sun Bowl game of 1938, and against St. Mary's Gaels in the Cotton Bowl clash in 1939.

Today he is general supervisor of La Fonda football dormitory, an extremely responsible position, trusted and respected by his teammates and coaches.

### Roaming Around TRENDS AND TOPICS

By JOE PIERCE  
Toreador Sports Editor  
Stray glances around the campus sports field:

Basketball: Last time around for the 1940 basketball team out at the mule barn Wednesday and Thursday when they play House of David. There may be more games this year, but not on the home court. How about everybody coming out to see them—you'll enjoy them Whiskered Wizards, too... Gonna be an independent tourney over at Ralls and a couple or three Tech teams will be in it... Kerr Brothers, Bull Necks or whatever they choose to be called will be there... Scott, Flusche, McKnight, Hill and Company won the Southland tourney a week ago.

Baseball: A new setup for intramural baseball is in prospect this season... Instead of trying to run off a round-robin schedule as heretofore, there'll be a month or six weeks of challenge games, which don't count towards determining a champion, then a single- or double-elimination sawoff to pick a winner... Tech will probably be represented in the West Texas Amateur Athletic association baseball league... Coaches Cawthon and Smith have given permission for their athletes to play

baseball this year, so Tech can probably rake up a pretty fair nine.

Volley ball: Don't laugh, but we're gonna have a volley ball team over here at the TOREADOR, and we bet we can beat the faculty. What do you say, Doctor McKay? If enough interest is shown in the game, Doc Spears will sponsor a tournament some time in March... Maybe you didn't know volleyball is one of the most scientific of all sports... although as

a spectator's game, it's just about at the bottom.

Football: We notice in the papers that a lot of schools have started spring training... Among them Rice, whose new assistant coach, Dell Morgan, usta be fresh coach at Tech... Remind us to ask Bill Parlier when Tech starts spring workouts... Nice-looking bunch of junior college transfers floated in to begin the second semester.

Flash! Martin Dies finally gets around to running down Hollywood communists. Hal, do you still want to know what kind of a noise a dinosaur made?

reserved rooms at the Capitol hotel, but O'Daniel, in a dither over politics, got his directions reversed and rented a room in the Herring hotel—owned by Col. E. O. Thompson, who ran against him for governor.

Gets Buttermilk Malt Shortly after checking into the Herring, O'Daniel ordered a malted milk suit to his room. The service was fine—the drink arrived shortly, and O'Daniel took an appreciative gulp of the beverage. It had been made with buttermilk.

Upon discovering his mistake in hotels, the governor fled to the Capitol so hurriedly he forgot to take his Sunday suit. Col. Thompson forwarded the garment with his personal regards to the flour merchant.

Bundy Bratcher currently is a staff musician at KFYO, playing for Hop Halsey's programs and making personal appearances with Wiley Walker and Gene Sullivan.

He plans to return to Austin next year, and when you ask him whether he'll re-join the Hillbilly Boys he'll say, "Maybe, but if you then mention biscuits, he'll say..."

"I haven't made any definite plans just now.

Campus Extension Courses To Start

English, History, Math And Business Ad Offered

Final announcement concerning the following extension courses to be offered on the college campus were made by Janet McDonald, head of the extension dept., at a meeting Tuesday night.

English 4316, Structure and Appreciation of the Novel. For writers, students and teachers. First meeting to be held Tuesday night, Feb. 20, at 7 o'clock, Room 216, Ad. building. Instructor is Dr. Benjamin Cunningham.

History 430, Development of the Social Life of the Old South. Tuesday night, Feb. 20 at 7 o'clock, Room 114 Library building. Instructor is Dr. Wm. Curry Holden.

Business Ad 4310, Income Tax Accounting, a practical course for business people and others. Tuesday night, Feb. 20, at 7 o'clock, Room 219 Ad. building. Instructor is Prof. Haskell G. Taylor.

Plane Geometry, high school course for college entrance requirements, Tuesday afternoon, Feb. 20, Room 212, Ad. building. Instructor is Dr. L. F. Ollman.

All classes will be open to enrollment this week. Fee per course, \$15.00. Checks may be post-dated.

New Ag Course Established Here

A short course to be taught at Tech for butter manufacturers was arranged at a meeting of the West Texas and New Mexico butter producers and dairy farmers Thursday afternoon.

The program adopted also includes a series of meetings of producers throughout West Texas at which increase and improvement of production of milk per cow will be discussed, a short course for cream buyers at several places in the area and an explanation of the program of the Texas Dairy Products association, Inc.

K. M. Renner, head of dairy manufacturers, recommended the program. President Clifford B. Jones addressed the group briefly and Mart G. Pederson of the dairy manufacturers faculty discussed tests for composition of butter.

Those present will attempt to apply the program to their communities and will attend another meeting next month.

Mackey Finds Rain Affects Arizona Tree Ring Growth

Rainfall for January, February and April has most influence on tree ring growth in a certain region of Arizona, Pat Mackey, junior engineer who is carrying on research in the geology department, has found.

From extensive rainfall records for a 40-year period for the region being studied he is making a comparison of ring growth and rainfall of each month to determine the correlation between tree rings and time intervals. The effect of rainfall and the most influential time intervals are being studied.

He is also testing the refinement of a new method of correlation to replace the common Pearsonian method, which is random sampling, or taking the medium of a large number from a limited number, as is used in sample ballots. This method is not legitimate for a continuous time sequence. From the rainfall record which he has a new method for correlating data accurately can be worked out, Mackey believes.

'Gone' Will Come

Vivien Leigh, who according to propaganda reports The Toreador has received from the Confederacy, will play the part of Scarlett O'Hara in the "Gone With the Wind" production starting a week's stand at the Palace Feb. 25.

Keys Enter Rush Week With Rush

Entertain Rushees At Dinner Next Sunday

Opening rush week Silver Key members alumni and pledges entertain rushees Sunday at 6:30 o'clock with a dinner at the Hotel Lubbock. The Silver Key plaque and shield will serve as decorations.

Members attending are Jack Wells, Bob Snyder, Leon Keene, Sumner Reed, J. H. Brewer, Ned Bradley, Jimmie Brown, Dexy Suduth, Max Rutledge, Joe Davidson, Paul Redding, Ralph Balanz, Roger Kuykendall, Amatus Chamberlain, Billy Baskin, Bert Leverton, Troy Picken, Bob Sams, Dale Walker, George Duval, L. D. Whitely and Lee Michie.

Students Judge In Clothing Contests

Students in the methods of teaching clothing class of Miss Mabel Erwin, head professor of clothing and textiles, are training to judge in clothing contests in nearby towns.

This work is in preparation for judging at the state home making rally which is held yearly. This year the rally will be in the Baker and Adolphus hotels in Dallas, April 24, 25, 26 and 27.

High school students in the field of home economics attend this rally, according to Miss Margaret W. Weeks, dean of the home economics division. College home economics students act as judges in the contests.

Recently the class members acted as judges for the clothes made and modeled by the class of Mrs. Jessie Bakerman at Junior high school.

Y Sells Tickets To 'The Mikado'

Members of the YM-YWCA are in charge of ticket sales for "The Mikado," coming to Tech theatre Feb. 26 and 27. The tickets will sell for 20 cents. Tech student reduction tickets are not accepted for this performance.

The Rev. Marshall Rhew of Abertony heads a discussion group in the Y office every Tuesday afternoon. The discussion of the life and teachings of Jesus is open to Y members and all others who are interested.

Stude Population To Be Checked

Students at Tech will be closely checked by the census bureau here in Lubbock and in their home towns, according to an announcement from the bureau post here.

Boys and girls who have no set residence as their home will be enumerated as being from Lubbock. Students will be checked by the census taker in their home town and here at Tech both to make sure that no one is overlooked, reported the bureau post. Enumeration will start April 1.

Mail

Continued from page 2 the radio and hear the same kind of (censored) music.

Why do we have to listen to that type of stuff at all hours of the day when we could hear better recordings than that? It seems that something could be done if anyone cared to help in any way.

It has been quite awhile since we have had any real stir up out here so why not launch out on a new kind of plan to rid the air of this annoying racket, name of "hillbilly music"?

A Music Lover.
