

Final Enrollment Figures Show 38 More Men Studes Than Women For Summer

Slight Increase Registered Over The '42 Session

More Students Study Engineering, Arts And Sciences Lose

AS THE registration closed Thursday, Tech had 54 more students enrolled this summer than during last summer's first six week term.

The biggest increase in students was found in the engineering school with a 117 student increase. Last summer the Engineering school had 165 engineers and this summer the enrollment jumped to 282.

The Agricultural department was next in line with an increase of 7 students. This summer the Aggie department has 103 students against the last years figure of 96. Next in line is the Home Economics school with a jump of 4 students. This summer figure is 184 against the last summer school enrollment of 180.

The Arts and Sciences department was on the little end of the summer enrollment with a decrease in the registration in this branch of the school. This year the Arts and Sciences school has 782 while last year the figure was 855. This is a decrease of 73.

The men lead the women this summer in numbers with the total number of men registered 695 with an increase from last year of 61 students. The women show a decrease in the summer enrollment. This summer the women has 657 against 664 showing a loss of 7 women for this first six weeks of summer school.

West And Evans Receive Emeritus Titles For 1942

Both Educators Have Been At Tech Since Its Birth in 1925

Effective September 12, Miss Elizabeth Howard West and Dr. A. W. Evans will retire from active duty at their present positions, according to an announcement from President Jones' office.

Miss West came to Tech in its first year as head librarian and has remained at that position since. She received her B. A. degree from Mississippi State College for Women and a B. A. and M. A. from Texas university. The librarian emeritus will remain with the college in a research capacity.

Miss Emma L. Main, assistant librarian, will be the acting librarian. Miss Main has been with the college in her present capacity since 1926 and received her B. A. degree from North Texas State Teachers college.

Dr. Evans has also been here since the foundation of the college as head of the department of education and psychology. He holds a B. A. from Oxford college and an M. A. and Ph. D. from Texas university. As head of the department of education and psychology emeritus, he too will remain with the college in an instructional capacity.

Succeeding Dr. Evans as acting head of the department will be Dr. R. E. Garlin. Dr. Garlin has been here since 1927 and has a B. A., M. A., and Ph. D. from Texas university.

Dean Leidigh has been head of the aggie department since the school started in 1925.

Campus Beautification

A Techsan Speaks

—By Latson

FOR several reasons, the vanity of your columnist, the urge to speak, and mostly for the lack of material, students will be subjected to such an atrocity as this for the summer months. This initial column which is no doubt the essence of poor columnizing is the first one your writer has ever had the hard

luck to pen. Feeling that every paper should have at least one good column, we are trying to fashion one. Since a poor excuse is better than none at all, our attempts will be justified regardless of its response. An attempt will be made to present a personal touch to campus issues and affairs, and any suggestions any of you have to offer will be humbly appreciated.

But now to get to my subject for today, the campus beautification hallucination is in my mind the most important issue of the school.

Although plans are still in embryo form, possibilities for the beautification program here on the Tech campus are very bright indeed. Probabilities although not bright are to be seen in the minds of those working on the project.

Under consideration right now in a plan whereby students will be asked to donate fifty cents of their breakage deposit to a campus fund that will be handled by a committee conjointly of students and faculty members. If additional appropriations can be secured from benefactors over the state for such a fund, the only element to stop a program would be time itself.

A committee was appointed in May by the student council to outline some program, but as to yet the committee has had no action. Several members have been consulting with college officials, however, and the group will meet sometime next week to discuss their findings.

Should such a plan be passed on by a convocation of students, the revenue would amount to something like

\$1000 per year. If this money was concentrated to beautifying one particular part of the campus, the circle for instance, and each time revenue was received the project would spread a little, just enough to keep everything well done as we go it would not be but two or three years until the project would be spread over the entire campus, and Techsans could have a place to lounge about between classes on hot summer days and in the fall and spring of the year.

Duststorms would not be as prevalent everytime a little whirl wind passed over the campus and picked up some of the now plowed dirt. People living on the edges of the campus have complained time after time about the dust that was picked up as the wind passed over the barren ground.

While on the topic of campus beautification, it might be well to point out that dormitory crews have been busy the past week watering lawns and spading flower gardens. But the various trees that have been set out on the campus are suffering from acute negligence.

Climatic conditions of the plains are well suited for plant growth with the exception of water facilities. The trees over the campus are as arid as powder and unless something is done quickly, those we already have will be dead.

The effect of water on tree growth is evident on the boulevard approaching the Textile building. Where the trees have been watered they have grown to respectable size, while trees at the south end of the string which were set out at the same time, are still of the size that makes them appear more like scrub bushes than trees.

Government Studes Have Crowded Year

By HELEN JOY SMITH
Toreador Staff Writer

THIS school year has been one of numerous and varied activities for the government department. Faculty members, students, and clubs have been "going strong" all year in order to make their department well-known on the campus.

Dr. Benjamin Bock, instructor, has been giving a weekly commentary on national and international events over radio station KFYO for the past year. J. W. Jackson has spent a great deal of his time accompanying the golf team on their trips to surrounding campuses. H. C. Pender has been acting head of the department and has been very active in the Lion's club in his position as District Governor.

The two departmental clubs, Pre-Law and International Relations club have had a full program for the 1941-42 school year.

The Pre-Law club presented two trials for the entertainment of the student body. The fall semester the Defense won a heated suit concerning the ever-present triangle. Dorothy Dell Scheihagen jilted her suitor, Raymond Goodrich, to date Leon Hughes. The enraged Goodrich shot Hughes and the law suit followed.

The spring semester trial, conducted entirely by girls in the club, arose after a heated argument between Drs. Blitz and Davis over who was the best cyclist and who had the

Naval V-7 Opens To Married Men Between 19-27

Collegians Must Be Single; Graduates Are Allowed Wives

The United States Navy has opened its V-7 training program leading to commissions as deck and engineering officers, to married qualified college graduates between the ages of 19 and 27. College juniors and seniors who are married will not be considered for the course under the new revision. Unmarried candidates of the Reserve Midshipman's school must remain unmarried for the duration of their training. Currently the candidate enlists as an apprentice seaman and becomes a midshipman after one month's training.

When acceptable college graduates in the V-7 age group are enlisted they will be sent to Notre Dame University for a thorough 30 days physical hardening program, serving as apprentice seamen at \$21 a month. On the completion of this course they will be assigned to one of the three officers' training schools with the rank of Midshipman, paying \$65 a month. When sworn in as an Ensign the young officer's pay will be \$183 a month with allowances.

There is no authority for the payment of allowances for Midshipman's dependents in the Naval Reserve. Each married candidate, therefore, must furnish a statement signed jointly by himself and his wife that his dependents will be adequately provided for while he is in training.

According to Lieutenant L. S. Poor, officer in charge of the Dallas Office of Officer Procurement, recruiting would begin immediately throughout Texas. Enlistments will be made both by the Dallas Office of Naval Officer Procurement and other Navy Recruiting services.

Renner Conducts Butter And Cheese Industry Meeting

The West Texas and Eastern New Mexico butter and cheese industry had a meeting at the Lubbock hotel Tuesday to discuss the plans of maintaining high quality of cream in the industry during war time.

K. M. Renner, head of the dairy manufacturing department and State Director for Quality control was in charge of the meeting.

The object of this meeting was to draw up plans to allow the cream manufacturers to conserve mileage and rubber as well as gas for the duration

Allen Announces Deadlines For Tennis Entries

Tuesday, June 16, has been set by Dean James G. Allen as deadline for entries into the summer tennis tournament, which will include singles and doubles for men.

This summer there will also be a singles and doubles tournament for women, either or both, according to interest shown by them.

Peckham To Head Casa Linda Girls

Casa Linda elected the officers to serve the first six weeks of summer school June 11 in order to continue the self-governing policy of the co-operative house.

In a meeting Thursday the girls selected the following officers to govern the house for the first six weeks: Miriam Peckham, social director; Vera Thormann, business manager; Emily Sifton, president; Edna Prange, secretary - reporter; Ona Bavousett, work chair-

Crotian Tamburitza Ensemble Will Appear Here Thursday In Replacement Of Marionettes

Croatian Tamburitza Ensemble, composed of four members who will appear on Tech Artist course next Thursday night on the Ad building green, featuring Croatian, and classical numbers. The Ensemble is directed by Charles Elias and include members of this family. Many hours of practice playing together was received in the old country when the family gathered to furnish their own music and entertainment.

Artist Program Is Composed Of Family Artists

Tamburitza Oldest String Instrument In Christian Nations

ON THE Artist Course program next Thursday night the Croatian Tamburitza Ensemble has been scheduled to take the place of the Tatterman Marionettes who could not appear. The Ensemble has appeared on programs from Maine to Florida, New York to California and from New Brunswick, Canada to British Columbia and will be heard on the Ad building green next Thursday night starting at 8:30.

History and legend has it that the Tamburitza is the oldest string instrument in use by a Christian nation, being devised by Carpathian mountain shepherds more than fifteen centuries ago. The instrument originally consisted of no more than two strings stretched on a piece of wood and was called a "dangubica", meaning "the passing of the day." Caravans often passed through the Carpathian mountains on their way to and from the orient and the shepherds evidently heard about the lute of Persia, Arabia and Egypt, because the dangubica finally took the shape of this instrument.

The shepherds finally migrated into other territories and became known by several different classifications, among which was the Croats. The dangubica was retained as a household instrument by the Croats, but improvements followed rapidly and many different forms came into being among which were the Bugaria and the "Brac", from which all of the present eight members of the tamburitza family of instruments have come.

The Balkans, called the crossroads of the East and West, have been influenced by both Oriental and Occidental social and religious customs. Confusing the dangubica with an instrument the Turks had, called the "Tambour", the instrument was given the name "Tamburitza" which it retains to this day. This also explains why Oriental themes, like gypsy airs, so often are inextricably woven into Slav compositions.

In Jugo-Slavia it is the custom for families to assemble and play their own music and furnish their own entertainment and for many years Charles Elias, Sr. and his family played together. When this family migrated to America, their music was found to be so beautiful and novel and their years of playing together had produced such a perfection of ensemble playing that they were persuaded to enter the professional world.

The company today consists of four members, including Charles Elias Jr., director, and Martha and Anne Elias. All are accomplished musicians on the tamburitza as well as other well known instruments, and are graduate of music college.

Tech Dairy Farm Announces Route

The college dairy started making a new round starting June 10. This new system is to divide the town into two parts and to make one route one day and the other route the other day.

The first route is to north of 19th street to College avenue. The other route is to be south of 19 street and west of College avenue. This includes Sunday.

This is to conserve the equipment in the Dairy Manufacturing department in the war effort.

This month the North route will run on the even days and the South route will be run on

Summer Help For Farms Is Needed

The Texas Tech Agricultural department is having trouble securing enough labor to work on the farm this summer. Due to the war condition the students are staying at home and working at other places, and a shortage of farm help is serious.

In past years the students have taken care of the Tech farm but this year due to the war there is a shortage in all of the farm labor problems, and in the college it is acute.

odd days. Next month the South route will be run on the even days and the North route will be handled on the odd days.

Mobile Dental Unit Visits Tech Campus

A MOBILE dental unit, under the direction of the Texas State Health Department, visited the Tech campus Thursday. It was parked in front of the Library Building and open to all. It leaves this morning.

The State Department of Health has begun a program to demonstrate a practical and economical method of teaching dental health to the youth and general public. This program was brought about by the realization of the prevalence of dental diseases throughout the state, and believing that it is only through adequate educational program that a satisfactory situation can be obtained.

The plan of this program is half educational and half clinical. A staff dentist is assigned to each trailer. The trailers are equipped with built-in cabinet features, new modern chair, cabinet and sterilizer, air compressor, water tank with air pressure, built in seats, wash basin, necessary instruments and supplies, emergency foot engine, etc.

This is available for counties having health units or nursing units or nursing services affiliated with the State Department of Health. It is also for rural and small town schools. Educational features are for larger cities. The plan is approved by the local dental society of county dentists. Local dentists agree to inspect all children of schools to be included. Schools are notified as to the date they will be visited.

Slime Shingles Indicate New Area For Summer Fish

CONGRATULATIONS Fish! You have shown that you want to get the Tech spirit...

For the first time in the history of the school, as far as THE TOREADOR is able to learn, you summer school freshmen have established a distinction between yourselves and upperclassmen.

You will be able to ask questions that a freshman is entitled to ask without fear of ridicule. You will be able to ask a girl for a date without first getting a formal introduction.

Formerly the students who first attended summer school before entering the fall semester were handicapped when school began by having to assume a rank below that which they had been accustomed.

That is what the fish caps are for. It is not an emblem to be ridiculed, and you couldn't exactly call it an emblem of respect.

There is a possibility that by fall, freshmen girls can be persuaded to wear "beanies"; if this can be done then the democratic spirit of Tech will be insured for quite a while.

Again THE TOREADOR congratulates you freshmen, your readiness to accept an insignia that is frowned on by some unthinking persons assures the older students that the school spirit we pride so highly is not dying.

TECH can have the most beautiful campus in the Southwest! Not through the waving of a magic wand, nor by merely hoping for such, but through a little hard work on the part of a few and a few pennies on the part of many.

The constant sorespot in the eyes of all Tech students can be erased if students will voice such an opinion and contribute a few cents to its cause.

Because of the constant increase in enrollment and the lack of building facilities to care for the increase, funds have been inadequate to secure a decent campus beautification project.

If each student would contribute a nominal fee to the development of the campus, within a few years, we would point to the circle in front of the Ad building with pride.

Recently THE TOREADOR outlined a plan to secure this money, but due to recent action by Tech's Board of Directors, the plan fell through.

In all probability a measure will be voted on by the students next September whereby the individual student may voluntarily apply a portion of his breakage deposit to a fund that will be used as is deemed fit by a joint committee of faculty and students.

If different students will talk this plan over, consider it and draw a conclusion, it is evident that some procedure might be instigated.

Literature, both secular and religious, fiction and non-fiction, is becoming deeper in its philosophical implications, says Dr. C. M. Granskou, president of Augustana college.

"Writers are showing a tendency to dig deeper, to be more serious, and to attempt to indoctrinate in moral and spiritual truths," Dr. Granskou says.

Whether we are at the beginning or the end of an era and whether the war will mean a new revolt from moral and ethical standards are questions that confront us, Dr. Granskou asserts.—ACP.

Loyola Students Consult Textbooks For Lone Quiz

Students of Loyola university of the South (New Orleans) have quit kicking about examinations.

The Rev. R. Jerome Mullin, S. J., gave his philosophy class a lone question for their examination. They groaned.

Then he told them to consult their text books and notes, and to use the library for reference. They felt better.

Then he said, "Hand in your papers in two days."—ACP.

"The Invaders" Heads Program At Local Movies

—By Leon Hughes

Here comes the invaders... ruthless... relentless... merciless... like thieves in the night... contemptuous of their victims... arrogant in their strength... scorching in their fury! They meet heroism... courage... defeat. All this is portrayed in the vivid motion picture which took 18 months in the making, 52,000 miles of ceaseless travel... and the inspired acting of an incomparable cast of thousands, "THE INVADERS", starring Laurence Olivier, Leslie Howard, and Raymond Massey. The picture was produced by Michael Powell from a story by Emeric Pressburger... the story in brief concerns shipwrecked Nazis off the coast of Canada who try to get to the then neutral United States and the adventures they had in so doing... the picture opens tomorrow night at the preview screened in the newly remodeled Palace...

Gene Tierney took the long way around in getting into a role that she was best suited for, but she is to be seen at last in a young modern role in the comedy, "Rings on Her Fingers" with Henry Fonda and Laird Cregar... Tierney is a former debutante of New York and started out in a play called "Mrs. O'Brien Entertains"... after several other roles on Broadway, she was given much older roles, not those of a young modern... in "Rings on Her Fingers" she plays the role of a shop girl turned into debutante when she is to be used as bait to trap a millionaire into parting with his cash... Sure enough Tierney ends up with Fonda, is broke after the crooks succeed, but what follows is pure comedy and that would be telling... the picture is showing at the Lindsey Friday and Saturday... directed by Rouben Mamoulian produced by Milton Sperling, it is a story by Ken Englund from an original by

AIM TO GET THE BEST OUT OF YOUR COOKING

Follow These Rules:
Roast meat at low temperature in your Gas oven and reduce shrinkage.
Remember that the flexible Gas flame can be regulated to any degree of heat you need, eliminating scorching and overcooking of food.
Use any remaining vegetable liquids in soups, gravies, sauces, or cold in tomato juice.
Plan one casserole dish a week to use left-overs.
Cook vegetables by the "waterless" method for which your Gas range is especially suited. The flexible Gas flame will give you the exact degree of heat you need.
Bring vegetables to boiling point quickly over full Gas flame, then turn flame low and cook gently.
Keep utensils covered and do not use soda in vegetables. Do not pre-heat your Gas oven or broiler too long. Remember, Gas is fast.
Plan complete oven and broiler meals, to make full use of Gas.
Avoid using small pans on large or giant top burners.

The Old Swimming Hole Offers Dangers

Health Agencies Open Up Safety First Campaigns

AS SUMMER rolls around, state health offices and insurance companies keep sending out material to be used in a campaign for safety-first measures to be observed in summer sports.

Some of the rules outlined by Dr. Geo. W. Cox, Texas State Health Officer are as follows:

1. At least one hour should elapse after a meal before entering the water.
 2. Upon first indication of fatigue, come ashore and call it a day. Don't re-enter the water.
 3. If becoming chilled, leave the water immediately.
 4. Do not enter the water when overheated.
 5. Learn to float. This is most important.
 6. Never attempt to rock a boat in a spirit of fun. (Or in any other spirits.)
 7. Never swim in water that may be polluted. Swimming close to or even a few miles below sewage outlets is inviting the possibility of acquiring diseases.
- "Excursions, picnics, and swimming parties contribute much to a healthy, happy, normal life, which is especially desirable at this particular time when the whole nation is tense and under strain," Dr. Cox said.

Summer Students Children To Be Cared For In Gym

Recreational hours for children of Tech students will be sponsored by the women's physical education department this summer according to an announcement by Mrs. Johnnie Langford, head of the department. Miss Margaret Baskin will be in charge.

The story telling hour will be held Tuesday evening from 7:30 to 8:30 on the grass green back of the gymnasium. Saturday from 9:30 to 10:00 a. m. there will be a class of rhythmic activities in the gymnasium.

The classes are for the children of students enrolled in the Tech summer school and there is no charge.

Seven Tech Engineers Named To Graduate Course

Westinghouse Gets Top Ranking Engineer Grads

The engineering department of Texas Tech has turned out many success stories, but there is a real one on the books when it was learned that seven engineers of Texas Tech, six graduates this June, will join the staff of Westinghouse, in the graduate student course or for electrical test work.

This year Westinghouse chose nearly 500 students from the ranking 1942 graduates of colleges and universities throughout the country and of this number seven were from Tech. It was more than fifty years ago that this graduate course was established to bridge the gap between the academic preparation of college and university courses and actual productive work in the industry. In the course, about six to 10 months are devoted to helping the graduate find the particular job for which he is best suited.

George Louis Arensman, Dallas, who will get his degree in August, 1942, as a Bachelor of Science in Industrial Engineering, was the only Techman to be appointed that has not already received his degree. He transferred from North Texas Agriculture College, where he was president of the Engineer's society. While in Tech, George has been a member of the Engineering Society, Industrial Engineering Society, Newman club and Phi Theta Kappa. In the course at Westinghouse, he expects to specialize in works management.

Glenn Morris Davidson, Abernathy, who took a degree this June as a Bachelor of Science in Electrical Engineering, will enter the course, making plans to specialize in testing. While in Tech, he was a member of American Institute of Electrical Engineers, Engineering Society and Torch and Castle.

Carl Raymond Garner, Dalhart, also took a degree as a Bachelor of Science in Electrical Engineering, will enter the course, specializing in works management. While attending Tech, Garner was a member of Engineering Society and A.I.E.E.

Eugene E. Goodwin of Lubbock took his degree in Bachelor of Science in Electrical Engineering and while in the course plans to specialize in testing. He was cadet major of the R.O.T.C. his senior year and was secretary of the Society of American Military Engineers. He was also a member of the student branch, American Institute of Electrical Engineers.

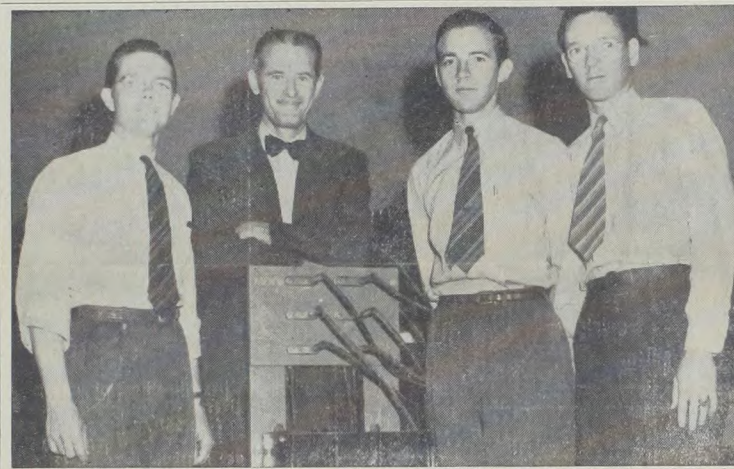

James Gilbert Wilhite of Slaton also was chosen for the graduate course after taking his degree this June as a Bachelor of Science in Electrical Engineering. At Tech he was a member of A.I.E.E., Engineering Society and the tennis team and worked on the annual Engineer's show. In the course he plans to specialize in design and attend the University of Pittsburgh part time.

Woodrow Wilson Wiseman, Haskell, graduated this June as a Bachelor of Science in Mechanical Engineering and will enter the graduate Westinghouse course to specialize in design. While attending Tech he was active in work on the annual Engineers' Show, a member of American Society of Mechanical Engineers and of Engineering Society.

Taking a degree in Bachelor of Science in Industrial Engineering, Robert Kendrick of

PICTURED HERE with Prof. Willard F. Gray, of the engineering department are left to right: John K. Wright, son of Mr. and Mrs. J. N. Wright of 3021 Yamparika Street, Vernon, Texas; James G. Wilhite, jr., son of Mr. and Mrs. J. G. Wilhite of 905 South Eleventh Street, Slaton, Texas; Ronald Duff, classmate, who expects to graduate in August; Glenn M. Davidson, native of Chillicothe, Texas, and son of Mr. and Mrs. Mack C. Davidson of Tuco Station, Abernathy, Texas, and Professor Gray. Wright and Wilhite expect to become members of the Westinghouse graduate student course. Davidson hopes to specialize in testing.

SHOWN HERE with Prof. William F. Helwig, of the engineering department are: Left to right—Carl R. Garner, son of Dr. and Mrs. Floyd E. Garner, of 605 Rock Island Avenue, Dalhart, Texas; Professor Helwig; Eugene E. Goodwin, native of Houston, Texas, and son of Mr. and Mrs. E. E. Goodwin, 1307 Avenue X, Lubbock; and Woodrow Wiseman, son of W. H. Wiseman, rancher, of Haskell, Texas. Garner and Wiseman expect to become members of the Westinghouse graduate student course. Goodwin hopes to specialize in testing.

Mutual Problems Named Theme Of State Meetings

A series of regional Selective Service-Agriculture meetings will be held throughout the State during the next two weeks, it was announced by General J. Watt Page, State Selective Service Director. Mutual problems relating to essential agricultural production and manpower procurement

Vernon will also enter the course. In Tech, Wright was vice president of both Alpha Phi Omega, and the Industrial Engineering Society. He was also a member of Engineering Society, college band and Chemical Engineering Society. He is to specialize in works management.

for our armed forces will be the subject of these regional joint meetings, General Page said.

Participating in the conferences, which have been arranged through the cooperation of State Agricultural Commissioner J. E. McDonald, will be representatives of the National and State Selective Service System, State Department of Agriculture, United States Department of Agriculture, County War Boards, U. S. Employment Service, County Farm Demonstration Agents, and agricultural and livestock organizations.

The schedule follows: June 12, 7:30 P.M. Adolphus Hotel, Dallas June 16, 7:30 P.M., St. Anthony Hotel, San Antonio

June 17, 7:30 P.M., Nueces Hotel, Corpus Christi June 19, 7:30 P.M., Rise Hotel, Houston

Major James S. Coatsworth, Occupational Advisor from National Selective Headquarters, will be one of the principal speakers at these meetings. Commissioner J. E. McDonald will personally represent the State Department of Agriculture. Representing State Selective Service Headquarters are Lt. Colonel John R. Banister, Deputy State Director, who will preside over the meetings; Colonel Dwight Horton, Lt. Commander James P. Crowder and Major Gupton Morgan, of the Occupational Deferments Section; and Lt. Colonel D. B. Burns, Chief of the Classification Division.

Kid Development Courses Sponsor Different Talks

The refresher course in child development will bring two guest speakers to Lubbock June 16 and 17 to talk to the class on the problems of child development and an insight to the working of nursery schools. Elizabeth McGuire of the State Department of Health and Health Factors of Nursery Schools.

Mildred Hoskins of the Child Welfare division of the State

Department of Health will talk on the Child Welfare Division of the State Department of Health and Home Visiting.

The purpose of these out of town speakers is to give the students background in directing nursery schools that are being started by the federal, state and local governments. This course is also to give the students background of social, mental and physical development of children, and to give the students a chance to learn the nursery school techniques, according to Mrs. Sannie Callan, head of the nursery school.

A. H. Leidigh, Dean of the Agricultural division, was operated on Wednesday morning at the Lubbock General Hospital. Thursday at noon he was reported by the hospital as doing as well as could be expected.

All you need to learn is to OBEY!

DON'T LET THIS HAPPEN HERE

You know the story of Axis "dictatorship"—the lesson is there for all to read: Schools and colleges closed—or turned into breeding grounds for lies and hate.

Freedom of speech—*verbotten!* Freedom to choose your friends—*verbotten!* . . . All you need to learn is to obey!

Now they would attempt to put the yoke on us—on you. It must not happen here! Whatever the cost, the Axis must be smashed. Your part, as a college student, is clear. You may not be behind a gun today, but you can help today to give our soldiers, sailors, and marines the weapons they need for Victory.

Put your dimes and dollars into fighting uniform now by buying United States Savings Bonds and Stamps. You'll help not only your country, but yourself—because you are not asked to give your money, but to lend it. You can start buying Bonds by buying Savings Stamps for as little as 10 cents. Start buying today—and keep it up!
