

Summer School Opens Here On June 1

Petroleum Engineers Hear John Rich April 10 Schedule Subject To Slight Changes

Noted Geologist Will Lecture On Continental Tour

Talk Will Include Problems Discovered In South America

"Problems in South American Geology, as Suggested by an Aerial Traverse," will be the subject of a lecture by Dr. John L. Rich, Saturday, April 10, at 2 p. m. in room D of the Chemistry building. He will speak before members of the department of geology and petroleum engineering. Rich is head of the department of geology at the University of Cincinnati, Cincinnati, Ohio.

His talk will be based on an extensive airplane trip around and across South America three years ago, during the course of which he took over 900 photographs from the air. Slides made from these photographs will be used to illustrate the problems under discussion.

Dr. Rich has had wide experience in investigating geological problems in the field. After receiving his doctor's degree at Cornell university in 1911, he spent seven years teaching at the University of Illinois, and working with the Illinois and New York State Geological surveys. He then entered the field of petroleum geology and from 1919 to 1931 he was actively engaged in field work, looking for new oil reserves. In 1931 he became a member of the geological faculty at the University of Cincinnati, and in 1940 he was appointed head of the department of geology and geography. During his teaching career he has maintained contact with petroleum geology, and has become recognized as an authority on the "Shoestring Sands" of Kansas. During the last year Dr. Rich was a captain in the Military Intelligence Division of the United States Army.

For years Dr. Rich has been an enthusiast over photography and the possibilities of working out geological and geographical aspects of his conclusions. He has combined these hobbies with an intensive study of South America before embarking on his trip, and thus was able to make it successful. He has recently published "The Face of South America" which covers the geographic and economic aspects of his conclusions. In his lecture he will cover the geological features he has observed.

In the course of his lecture Dr. Rich will discuss the causes of the unusual topography which makes Rio de Janeiro such a strikingly beautiful spot. He will also point out some unexplained problems regarding younger geological features in southern Patagonia and on the "Pampas" west of Buenos Aires. Dr. Rich flew above the major part of the Andean mountain system and will give his interpretations of several interesting features which he observed in this "backbone" of South America.

Two Ex-Students Married Thursday In Snyder Church

Miss Jeanne Taylor, daughter of Mr. and Mrs. Hugh Taylor of Snyder, and Pvt. Fred Bullard, son of Mr. and Mrs. E. U. Bullard of Snyder, took place Thursday night at the First Presbyterian church of Snyder. Rev. Hubert C. Travis, pastor, officiated in the single ring ceremony.

Both Mr. and Mrs. Bullard are former students of Texas Tech, and graduates of Snyder high school. Mrs. Bullard was a member of the Las Chaparrillas. She has been employed in the Scurry county A.C.A. office in Snyder.

The groom volunteered in the U. S. Army Air forces last summer and was recently transferred to Duncan Field, San Antonio.

The bride chose an aqua crepe ensemble and wore white accessories. She carried an orchid and a white Bible.

The couple will be at home in San Antonio after a short wedding trip.

Jackson Encourages All To Register For Placement

"Registration for teacher placement is very encouraging," Dr. Doyle D. Jackson, director, said yesterday. "Like everything else, due to the war and shortage of students, the enrollment is not what it has been in former years."

Dr. Jackson suggests that any one who would like to enroll should do so at once so credentials can be made ready for any prospective employer.

DR. JOHN L. RICH

Sear's Winners To Be Feted At Hilton Thursday

Scholarships Given To Aggies; One Girl Listed Among Group

Sears Roebuck scholarship winners will be guests at an informal dinner in the Hilton hotel tomorrow night at 7 o'clock.

Sears Roebuck officials attending will be J. C. Haynes, Atlanta, director of Public Relations in the southern region, E. K. Condon, Chicago, director of Public Relations; and Robert A. Manire, Austin, state director.

Either H. C. Johnson or R. G. McCord, Dallas office representatives, will inspect the college Thursday afternoon and attend the dinner that night.

No definite program has been planned, but each scholarship winner will introduce himself and tell his home town.

General arrangements for the dinner have been made by W. C. O'Mara, manager of the Lubbock Sears and Roebuck store.

A. H. Leidigh, dean of the agricultural division, will attend the banquet as a special guest.

Girls in the Home Management house are cooperating with the campus beautification committee by making improvements around the house. They are planting shrubs, flowers, and a Victory garden, and cleaning the yards.

WAAC Diet Equal To That Of Men

AC ranks. Women doing men's work needed and wanted man-sized meals. Tomato essence was not enough for women marching in the July sun, driving big trucks and little jeeps and sweating through the other activities of camp life.

Mess officers quickly returned to the army custom of serving a big meal at noon and a middle-sized meal in the evening. Happily, the mess sergeants stood by while the KPs dished out the familiar army meal of mashed potatoes, substantial meats and wedges of pie to the lines of hungry WAACs at mess.

Now nine months later, far over 10,000 WAACs pick up their trays at mess three times a day, fill them with as many calories as just as many men in any other army camp, and not a crumb remains at the end of the meal.

A typical dinner now may be green pea soup in beef stock, steaks in cream gravy, green peas, buttered potatoes, peach cup salad, bread and butter, apple pie,

coffee and milk. There's a second helping for those that want it. There's always on the mess table, too, a line of jars of peanut butter, jams and jellies which can be slapped on a slice of bread to fill in.

The WAACs at Fort Des Moines now eat in the Consolidated Mess, a double cafeteria that accommodates 2,500 and in 16 other mess halls which have capacities ranging from 350 to 1,500.

Feeding this crowd takes a lot of food. In one day, for instance, mess records show that WAACs consumed 495 pounds of bread, 4 one meal, 1,000 pounds of roast beef were eaten, 800 pounds of potatoes, 500 quarts of milk (milk is served three times a day) and 35 pounds of butter. These quantities of food come from the post commissary just as on any other army post. The commissary gets its supplies mainly from the U. S. army quartermaster depot in Chicago, except for milk and certain perishables which are purchased locally.

WAACs go through the cafeteria lines about 11 to a minute, mess officers have found, go to the tables farthest from the counter and dive in. They have been up since 6 a. m., have been through a full schedule of classes and drill, and they are ready for food—heartily food and lots of it. When they have finished eating they take their empty trays back to the counter, where precious few scraps are left, and return to their duties.

There is no after-dinner cigarette smoking allowed in mess—no after-dinner stories. If any group does loiter at the table, there's an eagle-eyed mess officer to prod the WAACs on. When the hall is filled with the exception of two tables, mess officers say, they know the first tables of WAACs should have concluded their meal. The food is well-prepared and attractive. The chefs achieve an especially nice variety in salads. There is no dreary day-by-day

Men Enrolled In Naval V-1 Take Exams April 20

Freshmen and sophomore students enrolled in the United States Marine Corps Reserve and all men in the Navy class V-1 who will have completed four semesters of college work by July 1, are to be given an examination Tuesday, April 20, to determine their aptitude and trainability for future active service.

This is the regular examination which Navy V-1 men were told they would be required to take during the spring semester of their sophomore year. Dr. H. L. Kent, liaison officer, has asked students to arrange to be excused from regular college classes all day Tuesday.

Navy V-1 men and Marine Corps Reserves will take the same examination; however, Marine Corps Reserves will not be required to take the whole examination as will the Navy V-1 men. But any marine reservist who desires as a matter of interest to take parts of the test required of him may do so with the understanding that scores made on those parts will not militate against him but might be of value as a basis of aptitude for certain courses of study.

Purpose of the examinations has not yet been revealed, nor have results, other than determining the aptitudes of reservists. The examination will cover work in English, algebra, geometry, trigonometry, physics and perhaps some arithmetic. An announcement will be made later giving the room or rooms and the hours in which the examination will be given.

Eleanor Mitchell Weds Sergeant In Sunday Ceremony

Eleanor Mitchell, daughter of Mr. and Mrs. Grover C. Mitchell of Lubbock, and Sgt. Amos P. Bond of LAFS, formerly of Clarksville, N. J., were married Sunday afternoon at 4 o'clock in the parlor of the Methodist church.

The Rev. Cecil R. Matthews officiated with a double ring ceremony. A bowl of white tulips on the mantle was reflected in a tall wall mirror. Louise and Jean Anderson lighted white tapers on either side of the centerpiece.

Proceeding the ceremony Joyce Watson sang "Because" (D'Hardelle), accompanied by the piano by Marian Chandler. As the vows were exchanged a string trio, composed of Misses Watson, Chandler, and Carolyn Reynolds, played "Liebestraum" (Liszt).

The bride wore a navy blue suit with corresponding accessories and a corsage of gardenias. For "something old" she wore a bracelet her father gave her mother before they were married.

The couple will be at home in Lubbock, and Mrs. Bond will continue her studies at Texas Tech, where she is a junior music major. She is a member of McDowell music club and Las Leales society.

Benson Receives Citation For Downing German Planes

Lt. William K. Benson, former Tech student and nephew of J. T. Shaver, associate professor of education at Tech, is to be cited for honors for having participated in the shooting down of ten German planes over New Africa, Lt. Benson, who attended Tech in 1936-37, majored in music before enlisting in the air corps two years ago. A former student at the Shriner Institute, Benson is now acting as bombardier of a flying fortress.

Marine Reservists Subject To Call In Near Future

Classification Will Determine Decision; Seniors Remain Here

Students in college now enrolled in enlisted Reserve Corps United States Army who have signed Marine Corps preference, and young men now enrolled in Class III (d) of the Marine Corps Reserves have been divided into three groups and may be subject to call in the near future according to their classification, the president's office announced Monday.

Classifications are as follows: Group I. Consisting of seniors who will receive their degrees by July 1, and are not expected to be called to active service in the Marine Corps on or before August 30. When called these reservists will be assigned to the candidate class.

Group II. Consists of juniors or seniors who may be expected to be called on or about July 1, and assigned to active duty as privates in the United States Marine Corps Reserve, and are to be assigned to further college training in one of the universities chosen by the Marines for such training.

Students in the above ruling, the Marines have announced that students who have one semester or less of college work to complete for a degree after June 1 may remain on inactive duty in college if they wish. This means those men choosing to complete a degree must attend summer school of 1943 to finish their required work.

Group III. Freshmen and sophomores who have completed less than four semesters of college work will be given a general intelligence screening test on April 20 (announcement regarding the test will be found elsewhere in this issue of the Treador). Successful candidates in this test, will on or about July 1 be placed on active duty as privates in the United States Marine Corps Reserve and assigned to colleges having the Marine Corps quota for further work.

Murphy-Zaglow Wedding Rites Read Saturday

In a ceremony read Saturday at 12:30 p. m. in St. Elizabeth's Catholic church, Andrea Murphy, daughter of Mr. and Mrs. O. S. Murphy of Palestine, became the bride of Lt. George A. Zaglow of Boise, Idaho.

The bride wore a powder blue silk dress and a matching off-the-face hat trimmed with a black veil. She carried a white orchid mounted on a white prayer book.

Tommy Jo Gooch was maid of honor. She wore a beige suit with pink accessories and a shoulder corsage of pink rosebuds. Lt. William Warren attended Lt. Zaglow as best man.

The couple left immediately after the service for San Marcus, where Lt. Zaglow will be stationed at an Army air base.

Mrs. Zaglow was a freshman arts and sciences student at Tech before her marriage. Lt. Zaglow was graduated from LAFS with the class 43-C.

One hundred eight recent petroleum engineering graduates at the University of Texas are now in the armed services.

Registrants For V-7 Are Allowed Another Semester

Naval Reservists in class V-7, who on July 1 lack only one term having completed their college course, will be allowed to remain on inactive duty until they have secured their bachelor's degree, according to information received Monday by Dr. Harry L. Kent, liaison officer here, from the chief of Naval personnel.

These reservists may continue in order to get their degree if they desire. However, the information stated, that those who have one term or less to complete for a degree and who do not express their desire to remain an inactive duty, will be placed on active duty along with all other V-7 students, in accordance with a schedule outlined in the communication received by the liaison officer.

The new Navy college training program is expected to start about July 1, and qualified students in V-1 and V-7 will be ordered to active duty as apprentice seamen under the program, with pay, subsistence and uniforms.

Senior Women Are Guests Of AAUW

Senior women students at Texas Tech and Lubbock High school will be guests at a meeting of the Lubbock branch, American Association of University Women, Saturday afternoon at 3 o'clock at the high school auditorium.

Mrs. W. B. Gates of the Tech foreign language department will be in charge of a program on a Pan-American theme. She will direct an "Information Please" on the 21 Latin American countries. Tech students taking part in the program will be Ruth Joan Conally, Dotty Walling, Jane Gilmore, Nell Marie Eckert, and Betty Hurt.

Mrs. F. C. Stanley will sing, Barbara Hale will give a Mexican dance, and Mrs. Ben Lewkowitz will play a cello solo.

'War And College' Is Title Of New Tech Bulletin

A bulletin, recently released by the college, entitled "War and the College" seeks to explain Tech's role in the educational program for the duration. The bulletin may be secured in the registrar's office.

Subject matter of the bulletin is divided into four parts: Question and Answers now Pertinent, Continuation of the Coeducational program and the Summer session of 1943.

Contrary rumors which have circulated the campus recently, the bulletin stated the aims of the college to hold the regular program during the summer session and announced the schedule for the next long term beginning in September of this year.

It provides means whereby a student, by attending the regular sessions and summer school, can complete requirements for a degree in three years.

Provisions have also been made, according to the monthly bulletin, so that housing facilities will be available to all civilian students who attend college. It stated that the college would be open to enrollment of girls as well as boys.

Eighty-five students work part-time in servicing all departments of the Washington State college library.

Feed Experiment Reveals Method To Increase Gain

Tech Aqs Complete Research On Calf Feeding And Growth

Calves fed on unharvested milo yielded far greater profit than those fed sorghum silage, or sorghum fodder, or those pastured on native grass, the progress report for the first 90-day period of a feeding experiment, reveals.

Conducted by Texas Tech and the Texas agricultural experiment station of College Station, the experiment consists of three lots, each containing stocker calves and the fourth lot of calves which was added to the experiment to be fed on a 21-acre field of milo. Because of the labor shortage, the milo could not be harvested, W. L. Stangel, head of the animal husbandry department, said.

Object of feeding in lot 1 is to determine the value of summac sorghum fodder supplemented with one pound of cottonseed meal and one pound of alfalfa hay daily. Lot two is to determine the value of summac sorghum silage with the same supplements. The purpose of lot three ration is to determine the value of native grass with the same supplements.

Because the calves of lot four carried too much flesh to be stockers, that lot has been eliminated from the project. One calf has been removed from the lot, which was divided into two fattening pens of ten head each. The animals in one lot are to be fed cottonseed meal and the other peanut meal.

Purpose of the entire experiment is to compare summac sorghum fodder, summac sorghum silage and native grass as roughage for stocker calves grown in this area, Stangel explains.

At the end of the 90-day period, the feed cost per cwt. gain was \$8.77 for lot one, \$8.44 for lot two, \$30.29 for lot three, and \$7.57 for lot four.

Former Students Wed In Virginia

Announcement has been made of the marriage of Clothilde Jenkins of Lubbock and Lt. Jack Harris of Haskell, both former Tech students which took place in Williamsburg, Va., March 17. The Rev. Lewis H. Hevermule officiated.

The bride wore a white dress made with sweetheart neckline and a cap of white gardenias and lace. Her bouquet of lilies was centered with orchids.

The couple is at home in Richmond, Va., where Lt. Harris is stationed with a fighter squadron.

Mrs. Harris majored in government while attending Texas Tech. Lt. Harris received his bachelor of science degree from Tech in 1941. He received his wings and commission in the Army Air Corps November 10, 1942.

Guy Gives Books To Journalists

Charles A. Guy, editor and publisher of the Lubbock Avalanche-Journal, recently presented to the Texas Tech journalism department two volumes published by the Associated Press containing news stories and editorial comments concerning the monopoly complaint filed against AP by the government last year. Contents of the books were taken from newspapers all over the country, and copies of the publication were sent to member papers.

Cecil Horne, head of the department of journalism, said the volumes will be valuable to journalism students in research on freedom of the press, and that they will serve as a record of an important episode in journalistic history.

The books were Mr. Guy's second gift to the journalism library this year. Last fall he gave the department a bound volume of the rehearsal and initial editions of the Chicago Sun.

Mr. Guy has also given the journalism department complete files of Editor and Publisher, newspaper trade magazine, since 1933.

WAAC Diet Equal To That Of Men

AC ranks. Women doing men's work needed and wanted man-sized meals. Tomato essence was not enough for women marching in the July sun, driving big trucks and little jeeps and sweating through the other activities of camp life.

Mess officers quickly returned to the army custom of serving a big meal at noon and a middle-sized meal in the evening. Happily, the mess sergeants stood by while the KPs dished out the familiar army meal of mashed potatoes, substantial meats and wedges of pie to the lines of hungry WAACs at mess.

Varsity Show Threatened...

THE 1943 Varsity Show is being threatened!

This does not include a shortage of anything but common sense. Personal friendship is beginning to undermine the show to such an extent that the best persons available for the parts are being overlooked in favor of some other talent less capable of filling the part.

The higher officials of the show are probably in ignorance of this fact, but his been called to the attention of this publication by students, whose show it primarily is. We are not indicting the director but a few of his aides are taking it upon themselves to see that their personal friends get better parts than they merit.

This sort of radicalism in Texas Tech is both out-of-place and unwanted. Tech is a democratic school, and talent is supposedly based upon what a person is capable of doing and not upon how good a friend he is of some director.

We think it best that the students would look into these things themselves, as well as the director, and check upon the selections made by various members of the staff.

We do not pass judgment from our own view. We have heard the remark passed by one of the directors that he placed a person in a certain part knowing that there was another man present who could better do the job required. This sort of favoritism must go!

The Varsity Show was begun with the strict idea that it would be the students' show, and that it would be the best representation of talent that was available at Tech. Personal friendships and close friends were not supposed to enter into the castings either indirectly or directly. *The Toreador*, as a voice of the student association, has no intention of letting this slight pass unnoticed. It is, perhaps, too late to do anything about this disastrous happening. However, it might be to the students' advantage to know that it existed.

Students at Tech who do not hold public office, and who are not called upon to be closely connected with various functions have long been of the opinion that what happened was none of their business. They have comfortably stayed home and let the world go by. There is no better time than now for them to assert themselves. If every student would take it upon himself to check on activities such as this, and keep a careful watch for such happenings, persons would not be prompted to do such things.

One part may or may not make too much difference in the coming show. That is not a matter to be argued. The point that we strive to bring forth is that unfairness is being dealt to a few persons who really have talent that leans toward acting and music. Such a trivial slight might turn out to be quite a mistake before production now in progress reaches the stage and is ready for presentation.

Another fact leading toward the degradation of the third annual Varsity Show is that the script is being shown to members of the student association here who have no connection, directly with the show. The person doing this may see no harm in the fact that a few of his friends know what is to be presented before the rehearsals even begin. This is unfair to the rest of the student body, and very much an undesirable element on behalf of the other Varsity Show directors. The script is supposed to remain without exposition until the night of the show.

When students are allowed to read this script it cheapens the show as well as allowing students to decide whether or not it is worth going to see. We do not doubt that the coming presentation will be fully worth any money that students are asked to pay in order to see the show. But, we do not think it fair for a number of students to pass judgment upon the show.

Their tastes may run very different from the student body as a whole. Perhaps these few who have had the opportunity to read through the script will think the show unworthy of publicizing. They might even go so far as to talk the show "down." This would truly be an undesirable element. No student is worthy of judging for the rest of the student body whether the show will be a success or not. That is for the rest of the students to pay and see. No person's word should be taken on such a matter.

For the betterment of the show, and for the discontinuation of such radicalism and smallness, we suggest that steps be taken by the director of the show, as well as the Varsity Show committee, to assure the students, who will pay for the show, the best possible production that can be staged at Texas Tech in these critical times. It would be little trouble for officials to eliminate such an occurrence. Persons not closely connected with the show would know no difference and no person's position as a student here would be hurt. As it now stands, and if the action is noticed by more and more students, the person committing these slights will truly be unpopular among the rest of the student body.

For the defeatism of such action at Tech, and for the building of a bigger and better Varsity Show for 1943, we again suggest that action be taken to alleviate a happening that is a black mark upon the forthcoming presentation as well as a black mark upon the democratic system at Texas Tech.

"THE high-strung, intensely ambitious man who may have been driving himself to ulcers in his business may find military life a haven of peace. Others will do the planning for him. He'll relax, forget his personal schemes, and presently find army chow goes through his food canal without so much as a whimper, much less a growl."—*Dr. Walter C. Alvarez, professor of medicine at the Mayo foundation of the University of Minnesota, says the army can help stomach aches.*—(ACP).

Inter-Club Softball—

A Techsan Speaks

—By Barnett

RECENTLY received in this office was a letter concerning the wearing of slacks. The sender had taken it from another newspaper, and had asked that her name be withheld from the paper when the story was published.

We cannot, under any circumstances, publish such articles without knowing the publication from which it was taken. It is one of the laws of journalism, one of the few, that we know, that no story should be published without a credit line given the publication from which it came.

This article concerning the recent visit of Madame Chiang Kai Shek to her Alma Mater, Wellesley College. It said that no teacher could stand in front of a group of students and tell them that they should not wear slacks, because the greatest woman in the world had done so. The article also stated that what the students learn and not what they wear that is important. Included also in this story was the old saying that clothes do not make the woman.

This is all well and good, but whether Chiang Kai Shek's wife wears slacks, or a quilted robe, does not necessarily apply to Tech. The Toreador has no definite policy concerning slacks, although two letters, both of which have been printed relative to this subject. This writer feels that it makes little difference whether girls wear slacks or not. The issue has come about by one or two persons who demand that something be done about it. Having been long forgotten about long ago by students and there are no girls wandering about the campus in a rage because they are not allowed to don more masculine looking looking clothes. In fact, it has been noticed by this writer that several girls wear them anyway. Not necessarily to class, but during moments of recreation, they wear them. If the ban were to be raised chances are that there would not be two out of every ten girls who would attend classes attired in the more "comfortable" manner.

Slacks in themselves are hardly an issue for the student body to get up in arms over. The writer feels it very inferior to many other issues that might be raised upon. It held much more importance in a great woman. She has done much toward the defeating of the Japanese march through the Orient. But her visit to the United States was not to settle a controversy on slacks wearing at Texas Tech. It held much more importance in world affairs. The writer feels that the subject would be of much value to the entire student body if it were dropped entirely. So we sign "30" on who should wear slacks and where, because some great lady "dove" her hair and gave the under graduates of her Alma Mater a thrill.

A professor at Chicago university recently brought up the subject of racial differences. He says that these prejudices were inventions of the human race, and lay upon the outer shell of human beings. He stated that the war effort was being slowed considerably by white persons refusing to work beside a negro.

During peace time the race problem has always remained discreetly in the background. Now, when there is such a good chance for causing disunity in this country, the subject is brought to the front every day.

No labor leader, or person of high office in this country's government, has ever mentioned the fact that the war effort is being slowed because of friction between negroes and whites. The problem is an old one, and we admit it is fast coming to a head.

Yet, we see no cause for it to be pushed into the midst of a nation that is too busy trying to win a war to worry whether negroes should still use the back door and

if these young men can't stand disciplinary action in college?" "Pupils must be taught to obey first and then there should be a hardening of the curriculum so that the pupil is forced to develop adequate work habits."

MARION, Ind.—(ACP)—Kings of Old Testament times never went off to war, reports Dr. J. T. Chappell of Marion college. Solomon received 32 tons in one year; the Queen of Sheba left 7 1/2 tons to her successor; David 250 tons as well as 500 tons of silver, 500 tons of bronze, 2,400 tons of iron.

Dr. Chappell also reports that iron is mentioned 95 times in the Bible; tin 5 times; bronze 152 times; lead 9 times; brimstone 15 times; and copper once.

CHICAGO—(ACP)—The world no longer will need the aid of the scientist a dozen centuries hence, Dr. Ralph Linton, a visiting professor of anthropology at the University of Chicago, says, for by that time there will be no more scientific worlds to conquer and science will "know all the answers."

"Already there are indications the number of basic inventions is decreasing," Dr. Linton said. "Once we have tapped, for example, all the sources of energy, including atomic energy, there simply won't be any left to tap."

MILWAUKEE, Wis.—(ACP)—Another sign of the times at Marquette university is announced by the Rev. Raphael C. McCarthy, president, of abolishment of the requirements for a one-year hospital internship by students in the school of medicine before they receive their doctor of medicine degree.

AMERICAN HEROES

BY LEFF

With the bomber pilot killed, the co-pilot seriously injured, both left motors shot away, left wing on fire and a swarm of Jap Zeros all around Col. L. G. Saunders took over his bomber's controls above Bougainville, escaped the Zeros and saved his seven remaining crew members' lives by a crash landing on the water at 95 miles an hour. Navy craft rescued them.

They give their lives—You lend your money. Buy Second War Loan Bonds.

U. S. Treasury Department

CAPITAL to CAMPUS

ACP's Jay Richter Reports from Washington

WASHINGTON—(ACP)—When today's collegians come home from the wars to resume their education, they are virtually assured of real academic credit for their experience and training in service.

That idea is not new. Veterans of 1918 got credit when they came back. But the way American colleges and universities go about it this time may be new and much better.

At the end of the first World War, colleges lavished credit on students returning from service. It was "blanket credit" then. The amount depended only on time served under arms or rank at demobilization.

Of course such "blanket credit" has nothing to do with educational achievement or competence. Indeed, colleges vied with each other in the amount of college credit granted the returning heroes. To the veterans, however, this enthusiasm was hardly a boon. Many were assigned to academic levels beyond their reach and promptly flunked out. In other cases, there was no adequate recognition of increased competence. When peace comes this time, leading educators are determined, it's going to be different.

Service men and women have at least four broad educational opportunities while in uniform. There are hundreds of technician and officer candidate schools. Almost half of all enlisted personnel go to one or another. The Armed Forces Institute, cooperating with 79 colleges and universities, offers off-duty education by correspondence. Orientation courses and informal off-duty instruction in camp recreation programs likewise have marked educational value.

The problem of educators is to appraise such educational experience objectively and to grant credit that does justice to educational standards and competence of the veteran. Machinery to do this has been blueprinted and approved by important institutions. The plan would work simply. On demobilization, a soldier, W.A.A.C. or other service man or woman would apply to the Armed Forces Institute for examination and guidance. The Institute would obtain full information on the person's record, then test him to measure his educational competence and special-

EDUCATION ELSEWHERE This business of being a master race isn't as simple as it looks. For instance you have to acquire a little knowledge to supplement inborn superiority before your inferiors notice the difference. Also, your mastery may slip away from you and need recreating later on.

Or so it seems from Nazi actions in Poland reported through channels that may not be disclosed for security reasons. There Nazi officials are undertaking re-education of Polish children of German origin to make them appear superior to the Poles.

As the Nazi governor of the Radom administrative district put it: "The Germans in this country must acquire a certain amount of knowledge in order to appear superior. Although their German ancestors once came here as superiors, the German spirit must be created anew. The German children who became Poles must again be re-educated as Germans."

There's a new prerequisite for admission to Croatian universities, according to the Nazi-controlled Zagreb newspaper, Hrvatski Narod. No girl student will be admitted to any university unless she can offer proof of 12 months' service in the Nazi female labor service.

Jack McDonald Is Here This Week On Fulbright

Jack McDonald, who received his BA degree from Tech in 1940 from the department of commercial art, is home on furlough for a week. His father is J. F. McDonald, director of extension at Tech. The former is stationed at the University of Chicago where he is receiving training in advanced meteorology and where he is working toward a commission as a second lieutenant.

2...Another

By HELEN DUFF

(This column has been passed around like a hot potato ever since it has first appeared in *The Toreador*, and during the past two weeks it has gotten hotter than usual. For this reason it has been pitched and caught again. Another reason for the change of writers was due to the fact that some people do not have a sense of humor and because Annis Durham doesn't want Cotton Allen to find out where she was on March the 17th.—Helen Duff.)

JEAN ETTA DODGE and BERNICE COCANOUGH are afraid that people will take incidents that occurred at the College Club dance seriously so let it be known that they are still innocent. The little brunette that you have been seeing with soldiers all the time and ED BLITZ some of the time is ROSEMARY BURNS and not Miss Anderson... ANDRE MURPHY ZAGLOW was the happiest girl in Lubbock Sat. when she left with her new hubby.

PHYLIS BOWEN has been getting around plenty since LEE BAUGH left town... CHARLES WASHINGTON and BARBARA FOREST have been standing so long that we won't even need to include them this time... BILL HERNDON and HELEN PEMBERTON, who have been at it steadily, have now broken up and BILL joined the bachelor's ranks with J. L. GAUNTLE.

The persons who took the church census Sunday were probably surprised at the answers they got from Techsans. Some few, they say, didn't even know whether they were a member of a church or not.

And to PETE, LAFS graduate of a few weeks ago, go MARIE STREET'S fondest regards and a life sized portrait of herself... It has been rumored that BETTY MCCOY has the measles.

NEVISA SON is certainly a one woman USO for the pre-flight boys... and MARY ANN WORLEY and EDNA EARL PARKER are doing their part to build morale too.

Schools Collect Clothing For Russian Relief

Educational authorities and school system officials of two states and more than thirty cities in every section of the U. S. have sponsored campaigns to collect clothing which will be shipped through Russian War Relief, Inc., to civilian sufferers in the war-torn areas of the Russian front.

State-wide drives were initiated by educational officials in Kentucky and Georgia, where more than 350,000 boys and girls of elementary and high school age set a goal of 2,500,000 garments.

Georgia's "Share Your Clothes with Russia" campaign was sponsored by the Georgia State Department of Education, the Georgia Education Association and the Georgia Congress of Parents and Teachers.

Kentucky's "Clothes for Russia" drive was also sponsored by the State Department of Education, which granted George Yates, principal of the Versailles High School, a leave of absence to supervise the clothing collection.

The pattern in Kentucky and Georgia was duplicated in cities throughout the country. Washington, D. C.'s School Board distributed a leaflet to children in the public schools urging them to bring clothing which would "Help a Hero by Helping a Hero's Family."

Robert L. Haycock, acting superintendent of schools in Washington, in a letter to all school officers, wrote: "The civilian population of Russia has played a tremendous part in the great war effort against Germany but at an unbelievable cost to themselves. The great suffering of the Russian people is common knowledge; they are in dire need of the everyday necessities of life. Some of this suffering we can alleviate. The school officers ask the cooperation of the school teachers and pupils in this drive for clothes for Russian War Relief."

Among other school systems which are cooperating with Russian War Relief, Inc., in clothing drives are those in Allentown, Pa., Cincinnati, O., Detroit, Mich., Portland, Ore., Champaign-Urbana, Ill., and St. Louis, Mo. In addition, university and college officials are sponsoring drives at the University of Illinois, Brown University, Lassel Junior College, Barnard College, Pennsylvania State University, College, Smith College, Westminster College, Antioch College, the University of Cincinnati, Boston University, Hamilton College, Hood College, the Connecticut College for Women, Wellesley College, Princeton University, Carleton College, Cornell University, Wheaton College and Northwestern University.

Reports to Russian War Relief national headquarters, Carter pointed out, emphasize that teachers are finding in clothing collections a basis for special studies on Russia.

Wyoming Downs Longhorns In Kansas City Tourney Finals

Texas Wins Over Washington U. In Opening Game

Hargis Is Sparkplug Of Longhorn Quintet During Both Games

Wyoming's highly favored Cowboys won the Western division finals of the NCAA basketball tourney held at Kansas City over a surprising herd of Texas Longhorns with a narrow margin of four points in a free throwing 58-54 thriller Saturday night.

In Friday night's opener Texas university thrilled a crowd of 6,000 fans with a strutting comeback and win over a favored Washington university quint 59-55 and Wyoming won another closely contested victory over the Oklahoma Sooners 53-50.

John Hargis, lanky Texas all-conference forward, proved to be the difference between the two teams in the fading minutes. In a two man scoring race the Longhorn ace dropped 30 points, including 10 out of 12 free throws through the Washington baskets; while Washington's Morris was able to mass 22 for the losers.

After trailing 33-28 at half-time, the Longhorns paced by Hargis and Buck Overall, who had 15 points for the night's encounter, hit the comeback trail and burst their team into a lead that they protected until the game's end.

Saturday night all John Hargis could do was not quite enough. The Texas ace shot 29 points through Wyoming's baskets, but the Cowboys went on, regardless, to brand the Steers.

Wyoming will carry western hopes to Madison Square Garden when they will meet Georgetown in the NCAA finals.

A startling final stretch drive by Wyoming enabled them to take an uphill battle from a worthy opponent.

Saturday night's opener saw Oklahoma defeat Washington for third place honors.

The Wyoming-Texas box score:

TEXAS	FG	FT	PF	TP
Overall, f	5	4	3	14
Hargis, f	11	7	3	29

Steers Bombast Kelly Fliers In Seven Innings

In a slugfest between the Texas Longhorns and the Kelly Field Fliers in San Antonio last week, the game had to be called at the end of the seventh inning because of the time with Blair Cherry's Texas boys leading 20-12.

In the game that was marked by several long scoring rallies, the Longhorns led off in the first and got two runs for their efforts. The Fliers added six runs in the first inning and the Steers came back with six more in their half of the second, while the Fliers managed only one in their part of the inning.

From this point on, the Steers were never headed, marking up four in the third, four in the fifth, three in the sixth, and two in the seventh.

The game swung back and forth in the early part with the teams leading alternately, but the Steers settled down, tightened their defense and led the game.

On the mound for the Longhorns was Joe Medina who was relieved in the last half of the first during the Fliers' six run outburst by Dalzell. He finished the game.

Two Flier hurlers were batted from the pitchers box.

Rex Travis, regular catcher for the Longhorns, was unable to play because of an arm injury. Captain Grady Hatton took over for him, pulling himself out of the short stop position. Ed Zunker filled in at short.

The squad goes to Randolph Field Friday to meet their Ramblers in the second game of the San Antonio service series this week-end.

Canyon Gives Up "Buffalo Courts"

West Texas State's athletes are giving up their home for the duration as well as all of their athletics.

Since 1935, Buff athletes have lived in Buffalo Courts, a unique dormitory which was started by Al Baggett, "the man with the rocks." The edifice is built of native stone, 143 tons of petrified wood, and other materials which were gathered from here and there.

The West Texas State Buffaloes assisted with the labor and a tourist court-like athletic department dormitory was completed in 1935.

Last week, the West Texas boys moved out of their home for a decade and turned it over to the Army of the United States for quarters for their men.

A new place, the Pon Lodge, was secured to house the boys for the rest of the semester. Forty boys moved into ten rooms. Good natured boys have nicknamed the new home, their "Bastille."

University of Wisconsin students invested \$13,854 in war stamps and bonds during the first semester.

College Club Is Close Winner In Softball Contest

Wranglers End Game With Three Men On Base, 2 Runs Short

Sunday afternoon the Wranglers and College Club members crossed bats in the inter-college softball tournament, and when the dust blew away the College Club boasted a 7-5 victory.

The College Club shaped a Wrangler rally late in the fifth inning when they had Evans, Hoke and Kerr on base. Trout, Wrangler center fielder, stepped up to the plate and committed the worst error of baseball, that of going out in the last inning with three men on.

Only once did the Wranglers seriously threaten the lead main-

tained by the College Club. That was in the fourth when they made five runs and left two on before they were retired. Hoke, third baseman for the Wranglers, led things off with a stinging single, that when the batting order got back around to him again retired his side by making the last out.

For three innings C. C. Pitcher Hargrove held the opposition to three scratch hits, and in the second he completely blanked the Wranglers.

Donaghey, C. C. third baseman, led his teammates off with a hit. Schweitzer and Stewart followed suit bringing in three runs in the first inning giving them a lead that they never relinquished except for a brief period during the fourth.

The batteries for the College Club were Hargrove and Schweitzer, and the for the Wranglers Tommy Breeding, Troy Colwell and Owen Gilbraith.

The score by innings:

College Club	1	2	3	4	5
Wranglers	0	0	0	5	0

Texas Relays Slated To Be Held April 3

Nineteen Colleges Scheduled To Appear In Annual Classic

THE Annual Texas Relays, possibly the nation's top outdoor track and field carnival, will be run Saturday, April 3, for the sixteenth time. Clyde Littlefield, director of the relays, said today that 500 athletes are expected to participate in the event.

The latest count shows that 19 colleges and universities, eight service teams, five junior colleges, and 30 high schools from all over the southwest have filed for places in the colorful meet.

Many of the big names of the circuit, who are in the service possibly very far from any stadium, will bow out to the younger men; therefore, the show is likely to be the most closely contested of them all.

Oklahoma A&M, Louisiana State and Texas university are the university class favorites with Oklahoma university riding a very black horse.

The Oklahoma Aggies are counting on setting up a new mark in the university mile relay abolishing the one set by Chicago in 1929 at 3:13.4 and tied Louisiana State in 1940.

In the college division, East Texas State figures to take the mile relay and set a new mark. North Texas State now holds the record in that event at 3:18.3 set in 1940.

Most interest will be focused on the hurdles when Bill Cummings, Rice's national champion of the 120-yard #highs, meets nationally recognized Doug Jacques of Texas university. Two other prominent bidders for hurdle recognition are Pete Watkins, Texas A&M, and Ralph Tate, Oklahoma A&M.

Watkins, lanky bespectacled Aggie star, has been working all year with the main purpose, that of setting a new mark in the high jump at the relays in mind. The record stands at 6 feet 7.8 inches held jointly by Don Boydston of Oklahoma A&M and Dub Waters of Baylor.

Garland Brides of Howard Payne will oppose Texas' Max Minor, Stand Tharp and Bert Lindsey in the special 100-yard dash. Oklahoma will also enter two men in this event.

Sprint relay honors are held currently by Texas, although Rice set the current mark at 4:1.1 in 1941. Minor and Jackie Field were members of the Texas team that won the relay last year.

Weight event top bidders will apparently be Jack Sachse of Texas, Bill Blackburn of Rice and Bill Henderson of Texas A&M; how-

Steers Meet Owls In Opening Game

The Southwest Conference baseball race which bogged down last week while the Aggies were being inducted into the Army will get under way this week-end with Texas university meeting Rice Institute at Houston in a two-game series.

Defending champions, Texas A&M and Rice were scheduled to start the fireworks this season with a doubleheader at College Station, but Coach Homer Norton found that seven of his Aggie team would be busy with the Army and asked for a postponement until they could get back in school and be ready to participate.

Rice and Texas will start the season while Rice will meet the Aggies April 6 and 7.

This week the Aggies will play two with Randolph Field and Duncan Field at San Antonio. Previously the farmers have played two service teams while Texas has played four.

Bob Williams of Southwest Texas State had defeated both Sachse and Henderson previously.

Centaur's Down College Club To Take Tourney Lead

Melton Gains Close Decision Over Foes

Hargrove And Company Meet First Defeat In Tournament

ONCE again it was Skeezix Martin who spelled defeat for Centaur's as he blasted out a home run in the last half of the final inning in Monday afternoon's game to give the Centaur's a victory over the College Club, and to place his club in the lead of the inter-club softball race.

The Centaur's had recently defeated the Silver Key club when Martin came to bat in the last inning and drove in the winning run. For four innings in Monday's battle it was nip and tuck with the College Club finally pushing in a run when Elmer Hargrove looped a long drive into left field, and then rounded the bases to score. It was the first run of the game, and broke a three inning deadlock.

The Centaur's excellent fielding drove the College Club to tie in the second half of the same inning scored to tie the score. Hervey got on base when Bob Hargrove failed to put a four ball across the plate thereby walking the batter. Hervey advanced on second on an error, and then scored on a second error a few minutes later.

College Club fielders stopped the rally before it was begun and came to bat with determination to unlock the score. Buster Melton, who showed superior form in the pitcher's box during the game, was backed by excellent fielding and the first three men who came to bat to face Melton's whistling heaves were thrown out at first.

In the closing inning the Centaur's had to score to win. They were the last to bat, and the College Club was playing the infield tight. Melton was the first man up for the team at bat, and rattled a "Texas Leaguer" over the head of the roving fielder and advanced to second base on the hit. Martin, who has become noted for his ability to hit in the "clutch," was the next man up. He did not fall his fans, and his long drive went over the up-stretched arms of the left fielder and rolled even farther from the fielder's hands. By the time the ball was recorded Melton and Martin had both crossed the plate, and both teams were on their way home.

On the other end of the field, the Wranglers were meeting defeat at the hands of the Los Cams. This game proved not so thrilling, and quite a bit one-sided, although the game was never a cinch for the Cams.

In the first inning the Cams began a hitting rally that appeared at first sight to be never-ending. They scored ten runs before the startled Wranglers woke up and forced them into field.

For the following four and one-half innings the Wranglers fought hard to overcome the top-heavy margin against them, but it was to no avail. The Cams had the game tucked away, and though their performance at the plate from that time on was nothing to marvel at, they kept the score down with their fielding.

The Wranglers finally pushed across five runs, but that was the best they could do. In the last half of the closing minutes, the Wranglers had high hopes of catching up with the Cams. But the winners downed the first three men who came to bat and went home with the victory safely sewed up.

Caldwell and Glibreath were the battery for the Wranglers, while Hawkins and Wright were pitcher and catcher, respectively, for the winning team.

All other games after this time were played too late to meet deadline but if club officials will bring them to The Toreador office they will be printed in Saturday's issue.

Huey Visiting Campus; Will Lecture Here Today

Miss Ruth Huey, state director of home economics education, has been on the campus yesterday and today conferring with the home economics faculty and students. Today at 11 a. m. she will address the senior lecture section. Individual conferences with faculty members have been arranged, Dean Margaret W. Weeks said.

Plasma Now Plays Big Part In War Of Saving Lives

Red Cross Service Contributes Much Toward Our Victory

During the past two years thousands of college men and women from all parts of the country have made a contribution to the Red Cross of which they may well be proud. This contribution consisted of a voluntary donation of blood. Collected at the request of the Army and Navy, these donations are processed into plasma and serum albumin and used on the world's battlefields to help give our wounded a better chance at life.

The Red Cross Donor Service has opened the eyes of many to the real significance of the Red Cross. Through it thousands who are unable, for a variety of reasons, to join the fray are sending their blood to the very battle lines where it is doing yeoman service.

There is no question but that plasma is working miracles on the fighting fronts. Great numbers of men who in the last war would have died of their wounds are being saved because someone back home took the time and trouble, and that's all it takes, to visit one of the 31 Red Cross blood donor centers. Army and Navy medical authorities from the Surgeons General down are unstinted in their praise.

"It is astounding but perfectly true that the Navy is losing less than one per cent of the wounded at Guadalcanal," Rear Admiral Ross T. McIntire, Surgeon General of the Navy, recently reported. "In the first war more than seven per cent of the wounded died of their wounds. These figures exclude men killed in action."

The wounded, he said, are flown to a hospital on an island several hundred miles away. Before being moved, often on the battlefield, they receive first aid and frequently blood plasma transfusions to stop hemorrhage and reduce shock. Surgeon General James C. McGeorge of the Army, after a recent inspection trip to North Africa, cited as an example of the effectiveness of plasma transfusions a case in which 400 men were badly burned on a ship during one of the landings on that continent. "They treated those men with primitive field equipment," General McGeorge said, but between midnight and 8 o'clock the next morning everyone had been properly cared for and only six of them died. Blood plasma gets the credit to a very large degree."

Plasma is that part of blood from which the red and white cells have been removed. By a process of evaporation it is reduced to a powdered form and needs only to be mixed with distilled water to be ready for use. Packed in hermetically sealed tins along with a bottle of distilled water and the necessary tubing and needles for mixing and administering, it is impervious to jungle heat. There is no question of delays for blood typing, as plasma is universal and it requires but moments to mix and administer.

So effective has the use of plasma proved that the Red Cross has been requested to furnish 4,000 donations in 1943. Like the 1,000,000 donations collected last year, they will be used with telling effects along our battle lines, on our ships at sea and in our military hospitals.

Interscholastic League Meets

The District Interscholastic League will not meet on the Tech campus this spring as in the past. Although the college would like to cooperate, all facilities for such an event have been turned over to the army. Dr. Garlin, head of the education and psychology department, announced this week.

Texas Tech was also requested by the State Educational department at Austin to hold a regional meeting this spring, but the college was forced to refuse, because it cannot accommodate such a meeting.

Approximately 100 judges from the college would be needed if the district meet were held and their time is now filled with the instruction of Pre-flight students explained Dr. Garlin. Class rooms and athletic facilities are also being used by the army.

"College officials regret that they must refuse the privilege of having the district meeting on the campus this year, but at present the army must have first consideration," said Dr. Garlin. "When normal times return the college hopes to again be host to the League meet."

Clean-Up Week Proclaimed By Texas Governor

Governor Coke R. Stevenson has named April 4 to 10 Health and Clean-Up Week by official proclamation, and expressing his approval for this act, Dr. Geo. W. Cox, State Health Officer, declared recently. "The old adage that 'cleanliness is next to Godliness' from the practical standpoint is well worth emphasizing."

Cities and towns in Texas will observe this week by conducting clean-up programs of far-reaching range. Scheduled to be included in their activities are cleaning, draining, graveling streets and alleys, cleaning parks and playgrounds and clearing up vacant lots.

"Destruction of mosquito breeding places and fire hazards, and the proper disposal of garbage and trash will be encouraged," Dr. Cox said, "as well as a thorough spring house-cleaning for cities and homes. Good housekeeping and other sanitary measures demand the prompt removal of all waste matter in and around yards and homes in order to keep the premises clean. This will eliminate fire hazards and help to prevent the spread of many diseases, and no doubt much serap metal will be collected which will aid our war effort."

Dr. Cox urged that all Texans cooperate in making Health and Clean-Up-Week a complete success since its worthwhile objective is to lessen needless losses by fire and help maintain the highest possible health level in this State.

Civil Service Jobs Now Opened

CIVIL SERVICE SPECIALISTS for work in connection with the preservation of significant records for the Nation, are sought for Federal employment, the U. S. Civil Service Commission announced today. Salaries are \$2,600 to \$5,500 a year.

The duties include determining what records should be preserved and methods of preserving them, preparing chronological accounts of the origins, authorizations, administrative structures, developments and other events of possible historical significance of particular agencies, recording and describing noteworthy inter-agency relationships, etc.

Applicants must have completed all requirements for a bachelor's degree in a college or university of recognized standing. Courses totaling 30 semester hours must have been completed in the following subjects: history, geography, economics, political science, sociology, statistics, and social anthropology, at which at least 12 semester hours must have been in history.

Research experience or college teaching in a social science field in which the historical and evolutionary approach was emphasized, is required. In general, for the assistant grade at \$2,600 a year, one year of such experience is needed. Six months of this must have been in American historical research involving use of government or business documents or administrative records, which resulted in the production of one or more reports demonstrating a thorough knowledge of historical research methods. Graduate study may in some cases be substituted for experience. Additional experience of higher quality is required for positions which involve increased responsibility.

Appointments will be to positions in Washington, D. C., and other cities in the United States. There are no age limits and no written examination will be given. Applications will be accepted at the U. S. Civil Service Commission, Washington, D. C., until further notice, but qualified persons are asked to apply immediately. Applications and complete information may be obtained at first and second class post offices, from all civil service regional offices, and from the Civil Service Commission at Washington, D. C.

Applications are not desired from persons already using their highest skills in war work. War Manpower restrictions on Federal appointments are given in Form 3989, posted in first and second class post offices.

Coed's Corner—

Pre-Flight Students Now Have Monopoly On Coeds

—By Kara Hunsucker

THE pre-flight students will literally "have the floor" Thursday night in the gym when Women's Inter-Club council opens its series of three dances to benefit the student union fund. There'll be no dates for the affair, but the soldiers will find at least 100 girls to dance with from 6:30 until 8:30 o'clock.

With proceeds from the 45 cents charged each soldier, WICC will purchase war bonds for its second annual drive. Although the council never expects to raise sufficient money to pay for even a portion of the type of student union building needed for Texas Tech, it does hope to stimulate interest in the movement, and also to eventually help furnish the rooms and buy a few things that will not be included in the hoped-for appropriation from the state.

Two companies of pre-flight students will be invited to attend the dances for each of the three successive Thursday evenings. The first affair tomorrow night will be sponsored by Las Vivarachas and Las Chaparritas.

An otherwise peaceful week, with its perfect weather for spending the afternoons riding bicycles or strolling over the campus is somewhat dimmed by mid-semester tests that teachers are piling on students before the reports go in Saturday.

Which reminds us of the student who finished a test paper, writing at the bottom, "During this exam, I was unable to catch anyone looking at my paper. Further, I wish to state that my own frantic SOS signals were entirely disregarded."

Then here's a parody with a rather sad note: Your shaking pencil writes and having writ Stops dead; nor all your hopes

Can answer more than half of what is asked, Nor all your billing made a D of it.

SCATTERINGS: In the new classes of cadets of LAFS is Hubert Moseley, former Tech student, well-known on the campus. We know that Eleanor Mitchell must have made a beautiful bride; she's the picture of poise. College Club was glad to welcome Lt. "Doc" Rolf to the annual spring dance last Friday night.

Also on the campus during the week-end were Virginia Kennedy and Milton Joyce, here for the Ko Shari presentation; they're working at Big Spring.

The time for choosing new members of the various honorary organizations, such as Forum, Junior Council, Las Leales, Phi U, and others, is at hand. Congratulations to those chosen for Junior Council and Las Leales, which have already been announced. Newly-elected members of Phi U and Forum are revealed following their initiation ceremonies.

It won't be many more days before AWS officers are elected; in fact, part of the candidates have already been chosen by the council. Coeds should be considering whom they want as their campus leaders next year.

Alpha Psi Omega Initiates Incoming Members Thursday

Formal initiation services for new members of Alpha Psi Omega, honorary dramatics organization, will be held at 6 p.m. Thursday evening in the Hilton hotel. Following initiation, members will have dinner there. New members to be initiated are: Marguerite Nobles, Leonard Jansen, Dick Miller, Morrine George, Mona Pierce, Arnold Mathias, Reverdie Ater, Brunette Harper, Ruth Monk and Billie Louise Berry.

Flowers Becomes STSTC President

Dr. J. G. Flowers was officially inaugurated as president of the Southwest Texas State Teachers College Saturday, March 27, as the climax of a two-day program.

Dr. Flowers, who succeeded Dr. C. E. Evans last September, is the last of three new teachers college presidents to be inaugurated. A native Texan and former student of San Marcos college, he was president of Lock Haven Teachers College in Pennsylvania before coming to Texas.

Dr. L. A. Woods, state superintendent of public instruction, was among those appearing on the program at the inauguration.

Dowell Speaker At Meeting Of AIEE Last Monday Night

Kenneth Dowell, assistant supervisor of the Engineering, Science, Management, and War Training program, spoke at the regular meeting of the American Institute of Electrical Engineers Monday night on "Tin Plating of Radio Frequencies."

Graduate Finishes Course

Evelyn Patty, 1941 graduate of the division of home economics, has completed a six-month accelerated course for hospital dietitians at the Walter Reed hospital in Washington, D. C.

Wing Of Japanese Plane Exhibited In Tech Museum

On exhibit in the West Texas Museum is a souvenir of World War II, a small portion from the wing of a Japanese "Zero" plane.

The fighter plane was shot down in New Guinea off the coast of Australia. The zero was strafing the field where Lt. H. L. Porterfield of the Army Air Forces, was, and was shot down. It burst into flames. After the fire had gone down, Lt. Porterfield tore off a piece of the metal from the wing while it was still hot.

When he came back to the states he gave it to a friend and it found its way to Jeff Lewis, a Tech student, who gave it to the museum.

University of Minnesota's outlay for instruction and research in the last fiscal year was \$6,286,439.

Seven Seniors Move Into Home Management House

Residents of the Home Management house are changing this week, as seven senior students move in. They will live there until the end of this semester. They are: Margaret Asher, Eleanor Hays, Vera Thorman, Gola Grace Laughter, Irene Feussel, Evelyn Stalcup, and Gwendolyn Lam.
