

McKinley Elected Secretary

ROWENA MCKINLEY
Student Council Secretary

JACKIE WILKISON
Head Yell Leader

MAXINE CRADDOCK
AWS President

ANNA BAKER
Junior Council President

Jackie Wilkison Will Lead Yells Here Next Season

Craddock To Head AWS; Baker Junior Council President

Rowena McKinley will be the new secretary of the Student Council and Jackie Wilkison will be head woman yell leader for the school year of 1943-44. When the polls closed at 12 o'clock noon Thursday McKinley lead her opponents with 1,510 points, and Wilkison was in the lead over Marjorie Hall with 220 votes to 209.

Anna Baker ran second in the Student Council secretary's race with 1,292 points. Third place winner was Mary Lou Metcalf with 1,233 points, followed by Betty McCoy who received 1,217 points. Dorothy Miskimins was found to have 1,148 points.

Anna Baker won the campaign for president of the Junior Council with 367 points. Moseene Roberts followed in second place with 342 points. Beth Floyd came out third with 300.

Betty Rhea Caldwell became secretary of AWS with 95 votes. Marie Hunsucker, her opponent, followed with 73 votes. Francis Ford became treasurer with 116 votes, while her opponent, Evelyn Woodson, received 52.

Maxine Craddock became president of AWS with 100 votes and 68 going to her opponent Ophelia May Beall. Mary Stangel was voted as vice president of AWS with 89 votes while Jean McLaughlin received 79 votes.

Five of the candidates were unopposed. They were Jerry Beavers for student president, Maxine Craddock for vice president of student council, Elmer Hargrove for representative to the athletic council, Everett Dale for business manager. Billy Johnson was the only candidate for boy head yell leader.

Army Reservist Instructions Delayed

Orders calling enlisted army reservists may be delayed and in the meantime the several reservists who have been notified they will be called to active duty in the near future should remain in school until actual receipt of their orders, a telegram from the eighth service command to Dr. H. L. Kent, armed services representative, stated.

The president's office will relay the students' orders and will relay them on to the individual concerned. Any reservist leaving school should leave a stamped, addressed envelope with the president's office so that his orders may be mailed to him. Responsibility for receipt of his orders, after they are sent to the school, rests with each enlisted reservist.

As soon as calls have been received in the president's office, a bulletin will be posted naming the reservists receiving orders. Dr. Kent stressed the importance of leaving telephone numbers and complete data with his secretary located if he goes home for the week end.

After receiving their orders reservists will be sent to a reception center. Transportation and subsistence to the reception center will be paid by the Army and Navy. A reservist should take the transcript of his college academic record and a transcript of his ROTC record, if he has been a member of this military organization.

Upon arriving at the reception center, men will be given a complete physical examination, classified, and issued their clothing, equipment and military service record.

From reception center students will be ordered to a replacement and training center where they will receive their basic training. While there, they will be tested for Army specialized training. Those selected will be sent to a specialized training assignment and reclassification unit where they will be classified as to the course they are to pursue. This decision will be based on the student's aptitude.

From there they will be sent to the designated college under contract to the government for the carrying out of such a specialized training program.

Gustavus Adolphus college library will get \$100,000 this year from the Augustana synod centennial thank offering.

Manager Deadline For The Toreador Set Today Noon

The publications committee will hold its last meeting of the year Tuesday afternoon at 5, in room 214 of the press building. A. E. Strehl, chairman of the committee, announces.

The committee will discuss the La Ventana editorship appointment, appointment of a business manager for the Toreador, and the signing of annual contracts for next year, besides routine work.

Applications for the business manager position must be in the committee's hands before noon Saturday, Mr. Strehl said, to be considered by the committee.

Results Of Army, Navy Exams Sent To Headquarters

Results of Army A-12 and Navy V-12 tests taken April 2 have been sent in to the War and Navy departments, a letter from state office of the Army and Navy College Training program to Dr. H. L. Kent, administrative assistant, revealed Thursday.

"We have no authority to issue any results of Army-Navy tests given April 2 to individuals or to school officials. We make our reports directly to the Army and Navy," the letter stated.

Successful candidates included in the Army, Navy and "No Preference" quotas are being notified daily. Those students who did not pass the test given here at the college will be notified from the state office mentioned above on May 10 or later, according to instructions received from the Army and Navy departments.

The Texas Tech Red Raiders will close their spring football practice Saturday afternoon at 2:30 o'clock with a game regulation scrimmage. The original plan was to conclude spring work Friday, but the players wanted to go into Saturday and end their work with a scrimmage. Coach Morgan agreed to carry the spring work into Saturday. The public is invited to Saturday afternoon's scrimmage.

Students Called To Service After May 8 Get Credit

At a meeting of the administrative council Wednesday provisions were made whereby students enrolled in the spring semester who are inducted in the armed services before completing the semester may receive credit for the courses taken.

It was decided at this meeting that undergraduate students enrolled in the spring semester who are called into the armed services and leave the campus on or after May 8, will receive credit on courses in which their work up to date of induction entitles them to grades of A, B, or C.

Undergraduate students enrolled in the spring semester who are called between April 23 and May 8 will receive credit only on those courses where the quality of their work up to the date of induction entitles them to grades of A or B.

Those grades made lower than the ones mentioned above will be recorded as incomplete. However, such students will have a period of one year after discharge from the Army to remove the grade incomplete.

"The student receiving grades as above indicated must assume full responsibility for the completion of those courses which may be a prerequisite for more advanced courses," the council decided.

President Jones At Board Meeting

President Clifford B. Jones and W. T. Gaston, business manager, left Friday to attend a meeting of Texas Tech board of directors meeting in Ft. Worth today.

Besides ordinary routine matters to be considered, the board will discuss contracts for special training of military units on the campus, summer school budget, and will hear the yearly report on the proceedings of the college.

The three new members recently appointed to fill vacancies, Kyle Spiller of Jacksboro, A. G. Mayse of Paris, and O. E. Ratliff of Spur will attend a meeting of the board for the first time.

ROTC Promotions At Tech Given By Captain Weston

Captain H. D. Weston, assistant professor of military science and tactics on the campus, announced promotions in the Tech engineer and signal corps ROTC units.

Rayburn H. Haskins was promoted to the rank of first lieutenant by special orders issued April 23.

Promotions, which were the non-commissioned officers, include Halsey L. Hackett, Technical sergeant; John DeGarmo, Staff sergeant.

Promoted to sergeants were: Jack B. Collins, Andrew B. Hill, William N. Klepper, Edward D. McGehee, Walter F. Vernon, James L. Miller and John T. Ashford.

Those promoted to corporals were: Robert A. Brown, James D. Conley, Gwendol R. Cox, Motron S. Dismuke, Kenneth E. Drake, Richard E. Patterson, Glenn W. Reeves, Allen T. Stewart, W. C. Herr, Charles A. Dows, Kenneth R. Renner, Jerry T. Warren, Richard L. Rainey, Aubrey L. Shouse, Forrest E. Fitzpatrick, Harold W. Ballew, Robert L. Carr, William H. James, Jesse E. Bowden, Robert H. Daniel, Isaac C. Enoch, Jr., Clifford C. Gordon, Saint E. Henslee, Donald Kleinschmidt, Ralph H. Lindley, Franklin M. Tollett, Jr., Glenn A. Werhan, R. Hartwell Williams, R. Henry Williams.

Foreign Language Picnic May 10

May 10 marks the date for the annual picnic to be given by members of the Foreign Language club. A French play will be presented at the picnic entitled "La Dame de Bronze et le Monsieur de Cristal".

Starring in the play will be Leonard Jansen, le monsieur; Mable Murray, madame; Betty Hurt, la princesa; Paul Berthelot, passandeau; Louis Beale, alique; and Betty Walling, le domestique. Mrs. William Dingus is sponsor of the club; however, Mrs. Martha E. Alden and Mrs. A. L. Strout, instructors in French and English, respectively, are to direct this production.

The play is a comedy and will terminate the club's activities for the year.

Stage Play, Picnic Tonight 6 To 10

Mackenzie Park Is Site Of Four-Hour Annual Celebration

Members of Sans Souci girls' social club and their dates will attend an annual hayride and picnic at Mackenzie State park this evening from 6 until 10 o'clock.

Members and pledges and their dates will be:
 Fern Brannen Keith Morgan
 Nina Byrom Ed Bowden
 Dolores Bizzell Eddie Poague
 Betty Rhea Caldwell
 John Robert Moxley
 Fran Crowther Robert Louis
 Margaret Jane Dill
 Charles Passmore
 Ruth Gray Tom Rogers
 Sue Grimes Owen Gilbreath
 Marge Hall James Venable
 Betty Herring J. R. Callahan
 Ophelia May Beall Jimmy Kilpatrick

Louise Ince Clay Wood
 Barbara Forrest Charles Washburn
 Mary Lou Metcalf Johnnie Hervey
 Jean McLaughlin Ted Ray
 Evelyn McLaughlin Gilbert Knox
 Phyllis McReynolds Marion Fox
 Dorothy Nell Swanson Roy Williams
 Dorothy Wright Bob Keasler
 Maryjo Turner J. D. Milner
 Chaperones are to be Mr. and Mrs. Robert Newell and Miss Jonnie McCreery.

Rowena McKinley Elected Prexy In Girls' Dormitory

Rowena McKinley became the president of the Women's Self-governing association when the polls closed Wednesday afternoon. She was unopposed for this office.

The following girls were nominated and elected with no opponents: Anna Baker, vice president; Eugenia Butler, secretary and Maxine Craddock, business manager.

Sarah Elland was elected senior representative. Rita Looney was her only opponent.

Betty McCoy was elected junior representative with no opponent.

Patsy Smith was elected as sophomore representative, opposed by Jane Thompson.

Lucille Melton was elected AWS representative.

Betty Savage Now Second Officer In Women's Army

Third Officer Betty J. Savage, 1940 graduate of Texas Tech, who is stationed at the First WAAC Training center, Fort Des Moines, Iowa, has been promoted to second officer, according to an announcement by WAAC headquarters at Washington, D. C. Her rank is now the WAAC equivalent to first lieutenant in the army.

Second Officer Savage received her commission Sept. 25 at Fort Des Moines, and is now executive officer of the bakers' and cooks' school there. Before enrolling in the corps she was an instructor in home economics at Stanton High school.

While attending Texas Tech, she was a member of the Student council, Home Economics club, Phi Upsilon Omicron, Alpha Chi, and Ko Shari social club.

A navy pre-flight school has been established at Wesleyan university.

Felipe Garcia Beraza y Raiz y Saenz de Baranda, a student from Mexico, is a junior at Macalester college.

Coed's Corner—

Play-Day Invitation Extended Tech Coeds

—By Kara Hunsucker

WRA and the physical ed department are staging the annual "Play Day" on Saturday—a day of games and sports that has an added meaning at a time when women must be physically fit. The program as outlined by the day will include tennis, jacks, volley ball, relays, ping-pong, archery, basketball, horse-shoes, badminton, and softball, in addition, to special stunts by the P. E. majors. Then at noon there will be a barbecue meal served on the football field.

All coeds are invited to attend this yearly function. Only a minimum charge of 25 cents is made, which entitles the girl to enter the various contests and to the noon meal.

In regard to Play Day and the emphasis it places on women's athletics, we ran across a humorous, and exaggerated version of a physical education major's life, written by a P. E. student at Texas U. Part of it runs like this:

Out of bed in the morning—up with the sun,
 Take a cold shower—the day has begun.

Drink a quart of milk and an egg or two—
 Keep physically fit for the red, white and blue.

So then for two hours of soccer skill drills,
 Then you take two more vitamin pills.

The class is over, you're really a mess
 But you're in a hurry, 'cause you've gotta dress.
 You know what the dean said about cutting class.

You start out for home in a long steady gait,
 Beans for lunch, you can hardly wait.

So when you get comfortably fixed at the table
 The telephone rings—you get up if you're able.

You drag to the phone and left the receiver
 To hear a voice saying, "Miss —has a fever.
 Would you mind taking her place for today?
 You won't have to do much; just let them play."

So you gather your belongings and rush right over
 For an extra hour on the fields of clover.

Then after dinner, you go in a tear
 And spend two more hours in the gym over there.

So listen, gals, and take my advice
 If you've been discouraged once or twice,
 If your weeks are filled with strain and strife—
 Take Physical Ed—it's really the life.

And West Texas' health-giving sunlight has an important part in the lives of Tech coeds, many of whom are now spending an hour or more daily in absorbing Vitamin A by taking sun-baths. With the dorm roof definitely banned for the sun bathing, girls have found another place south of the building, where the grass is soft and the sun is hot.

COED OF THE WEEK: To Betty Rhea Caldwell goes much of the success of the dances in the Varsity Show, for as director she spent many long hours leading the "chornases" in their various routines. A speech student with talent in dancing and dramatics, Betty Rhea is also the new president of Sans Souci.

Date of delivery of the 1943 La Ventana will be announced next week, Kara Hunsucker, editor, said Monday.

Proofs have been returned and most of the printing of the yearbook has been completed, she said. Engravings were sent to the printers in Iowa City, Iowa, this week.

In the last fiscal year, administration accounted for \$224,199 of the University of Minnesota's total expenditures of \$12,288,048.

Theta Sigma Phi Contest Won By Eleanor Cotton

Eleanor Cotton was announced as winner of an essay contest sponsored by Theta Sigma Phi, at the Matrix Table, departmental dinner for journalism students, Friday night at the Hilton hotel.

The contest was open to sophomore girls majoring in journalism and the subject chosen by Miss Cotton was "Why I Like the British."

She will be presented with a gold medal at the annual Women's Recognition service May 11.

The Matrix Table is an annual affair of Theta Sigma Phi, honorary organization for women journalists. The dinner was open to all members of the journalism department and their dates for the first time this year.

The program at the dinner consisted of skits presented by Theta Sigma Phi members.

Rice Named As Kemas President

Officers of Kemas club for the summer semester will be installed in a ceremony at a club meeting tonight at the Kemas house, 2304 Broadway.

The new officers, elected last week, are Rudolph Rice, president; Carl Arnold, vice president; Nelson Nichols, secretary and Bill Anthony, treasurer.

Dress Makers In Advanced Course Making Dummies

Members of a class in advanced dress-making are making forms of their own figures to aid in remodeling clothes and making new ones. Dummies of this sort enable students to make clothes with greater accuracy and at lower cost.

The figure was made by cutting a plain, princess style pattern of heavy muslin, fitting them to the girls, and basting them together. The dummy forms were made of shaped cardboard covered with cotton knit fabric. Students say that they can be made at very little expense.

They plan to use the forms for draping and fitting garments for the rest of the semester.

Stangel Judge At Lamesa Stock Show Thursday

W. L. Stangel, head of the animal husbandry department, was judge at the Dawson county annual junior fat stock show in Lamesa Thursday. Entries were judged among livestock of 4-H and FFA boys of the locality and the county.

Only calves were entered in the show, as the club boys have already sold their pigs and lambs. Ten calves of extra high quality were on exhibit.

In connection with the show a War bond rally, sponsored and arranged by the Lamesa Lions club. Proceeds are to be applied on the Dawson county quota of \$319,000 in the second war loan drive. Business stores were closed most of the afternoon.

An auction sale of the show calves were held on the courthouse square immediately after the judging was completed.

The faculty of Northwestern university numbered 500 in 1920, as compared with 1,480 last year.

Eulamae Watson Crowned Queen At HE Festival

Eulamae Watson, junior student of Lubbock, was crowned queen of the home economics spring festival last night in Aggie grove. Flowers and colorful streamers were decorations for the affair.

Sixteen club girls, trained by Mrs. Johnnye G. Langford, head professor of women's physical education, and Mrs. W. A. Newell, secretary accompanist of the women's physical education, danced the wreath dance, the milkmaid dance and the traditional winding of the May pole. They were accompanied by violin and accordion music. Food for the picnic was prepared by sophomore foods classes under the direction of Miss Mayme L. Twford, associate professor of foods and nutrition, and Mrs. Neva Deen Bavousett, instructor in foods and nutrition.

Special guests included: President and Mrs. Clifford E. Jones; Deans and Mesdames James G. Allen, O. V. Adams, J. M. Gordon, A. H. Leidigh, R. C. Goodwin and W. C. Holden; Dr. and Mrs. Harry L. Kent; Messrs. and Mesdames W. T. Gaston, W. P. Clement, and Clifford Horn; and president of the campus clubs.

Chairman of the festival was Daphne Stevens. Miss Ella Mae Lyle, assistant professor of home economics education, is faculty adviser.

Film Librarian Will Speak Today In Plainview

Mrs. Janet M. McDonald, film loan librarian of the division of extension, will speak this afternoon to a joint meeting of two Plainview women's clubs. She will show six sound moving pictures. Mrs. McDonald's program con-

Home Ec Exhibits "Allied Dolls" During The Week

"Dolls of the Allied Nations" is the theme of an exhibit in the Home Economics building this week. The figures, typical of the countries they represent, belong to Miss Mabel D. Erwin, head professor of clothing and textiles.

The exhibit includes peasants, refugees and people from the Ryosan district. There is also a Russian festival costume made by Lenci. There is a Korean man and woman, a Greek boy and girl, Mexican peons, a Chinese actor, an English parliament member, Canadian nuns, Brazilian figures, a Balintawak man and a Negro man representing the Philippine natives, a Seminole Indian representing America with a typical American college girl. Also shown is a Chinese bride and groom and a baby doll.

These dolls are not representative of the countries they depict, only of the dolls of that country, Miss Erwin said. They range in value from \$24 to 25 cents, she said.

A University of Texas engineer, Luis Bartlett, is the inventor of a new and improved quick-freeze process and a ne wdehydration machine for fruits.

Russel Sage college has formed a nine-person war council composed of administration and presidents of student government and the three upper classes.

cludes the club year for the Browning and As You Like It clubs, who have heard several Tech faculty members talk on aspects of their year's study, "International Relations."

Today's program consists of films concerning Mexico and South America, and a collection of martial airs.

Col. Carl Caphton To Review ROTC

Tech Cadets March On Parade Thursday

Review Schedule For 11:00: Exhibitions Begin At 2:45

COLONEL Carl L. Caphton and his staff will review the Tech ROTC cadets Thursday, May 6 in the annual federal inspection. Features of the federal inspection that will be of most interest are the final review and the all-class demonstrations. Students will be allowed to witness these events, and the review is scheduled for 11:10 o'clock Thursday. The demonstrations will be from 2:45 until 4:30 p.m.

The annual federal inspection is held to improve the military departments of schools which are included in the National ROTC subsidies. Schools included must meet standards set by the government in order to receive their grants and allotments. Suggestions will be offered by Caphton. The corps will be graded according to governmental recommendations.

Caphton and his staff will be entertained by junior and senior cadets at the Hilton Hotel at a luncheon, Captain H. D. Weston of

Tech's ROTC staff, said. Features of the demonstrations will be: models of trenches, bridges and tank obstacles by the engineers, and radio, telephone and message center demonstrations by the signal corps cadets.

Other demonstrations include: close order drill, extended order drill, first aid, knots and lashings, area sketches, floating bridges, triangles, sand tables, sighting bar, compass, concerting, reconnaissance patrol and shears.

The schedule for the morning is as follows: 8:00-8:30—Inspection of first year

basic students, engineers and signal corps.

8:35-9:05—Inspection of second year basic engineers.

9:10-9:25—Inspection of second year basic signal corps.

9:30-10:00—Inspection of first year advanced engineers.

10:05-10:25—Inspection of first year advanced signal corps.

10:30-11:00—The inspection officer will visit Clifford B. Jones, President of the college.

Afternoon activities are: 12:15-1:15—Luncheon for inspection officer.

1:30-2:05—Inspection of second year advanced class, engineers.

2:10-2:30—Inspection of second year advanced class signal corps.

2:45-4:30—Practice demonstrations by all classes.

4:30-5:00—Inspection of military building, classes, supply, range facilities, clothing, arms, and equipment.

Weston makes the following announcement for schedule of attendance for all ROTC cadets. All students will be excused from classes. They are to report to the military building in their number four uniforms (OD shirts, pants—and khaki tie).

The schedule for reporting is as follows:

All first year basic cadets report at 7:45 a.m. for classroom inspection;

at 10:40 a.m. for review and formal inspection of entire unit; at 2:15 p.m. or earlier as specified, for demonstrations.

Second year basic engineers will report at 8:20 a.m. for classroom inspection; at 10:40 a.m. for review and inspection; and at 2:15 p.m. or earlier for demonstrations.

Second year basic signal corps will report at 8:50 a.m. for classroom inspection; 10:40 a.m. for review and inspection; 2:15 or earlier for demonstrations.

First year advanced engineers will report at 9:15 a.m. for classroom inspection; 10:40 a.m. for review and demonstrations and at 2:15 or earlier for demonstrations.

First year advanced signal corps will report at 9:50 a.m. for classroom inspection; at 10:40 a.m. for review and inspection and at 2:15 p.m. or earlier for demonstrations.

Second year advanced engineers will report at 10:40 a.m. for review and inspection; 1:15 p.m. for classroom inspection; and 2:15 p.m. or earlier for demonstrations.

Second year advanced signal corps will report at 10:40 a.m. for review and inspection; at 1:55 p.m. for classroom inspection and at 2:30 p.m. or earlier for demonstrations.

Northwestern university now has 1,916,565 square feet of floor space that is used for educational purposes.

Food Inspection Course Here Soon

A four day short course in food inspection will be conducted on the campus from May 31 through June 3 for home economics graduates interested in entering the food inspection service.

Dr. Ben M. Stuckey, assistant marketing specialist of the U. S. Department of Agriculture will be in charge, according to Miss Margaret W. Weeks, dean of home economics.

Two hundred University of Wisconsin men are receiving training designed to toughen them and acquaint them with the tactics of the army Rangers.

Knox college and the Galesburg (Ill.) Cottage Hospital School of Nursing are jointly offering a five-year combined course leading to the degree of bachelor of science in nursing and the graduate nurse certificate.

Gym Needs Protection...

BACK in dead, dead days beyond recall there originated a saying that he become as much a part of America as the Washington Monument. "Be it ever so humble, there's no place like home."

Located on the northern section of the campus stands a building that is truly humble in appearance and has long been a sore spot with the faculty and students of Texas Tech. The Double T gymnasium is truly inadequate to fulfill the needs of a growing institution such as this college has.

However, it is the gymnasium that represents Tech as it was, as it is, and not what it shall be. No matter how much we desire a new athletic center there is no hope for such until the war is over and enrollment again reaches its normal figures.

Yet, despite all of the facts presented above, there are a few students on the campus who are seemingly striving to deface the gym even moreso. The building in question has always been open to the various clubs on the campus as a place to stage their social functions. This is done to eliminate unnecessary expense and to give ample space for any size celebration these organizations wish to stage. And where, may we ask, is the gratitude?

We admit that students, the majority, appreciate the fact that they are allowed free use of the building. This majority attends functions there and carry on as they should. They attend to business at hand and depart leaving the gym as they found it.

No we consider the minority... tch, tch... They go to such functions, perhaps with no malice aforethought, but once they reach the gym they feel that they are free to do as they please, to destroy as much of the ramshackle structure as they wish. And some of them are able to accomplish about as much as the old building can take without completely falling in on the merry-makers.

We are asking students to refrain from such practices in the future. Not that The Toreador is a proponent of "Sunday-School socials," but we feel that a little better conduct on the part of a few Techsians will eliminate harsh action by college officials, relating to the use of the gym. As we have the gym for the duration, it should be the responsibility of each student to see that no further damage is done to that building. If this is done we can keep the gym looking as presentable as possible until that day dawns when a new Texas Tech gym will be erected that is fully equipped and planned to play host to any function that might be given, one that students can respect and protect with a great amount of pride.

Gossip Every Issue—

A Techsan Speaks

—By Barnett

NUMEROUS students have asked the editor the reason there is no gossip column in Saturday's issue. An attempt will soon be made to eliminate that, and it is the hope of yours truly that each issue of The Toreador will carry such a column.

The main problem that arises here is the fact that the Count has some trouble in accumulating enough gossip for the column when it appears twice each week. However, with the cooperation of interested students, I feel that it can be arranged for the illustrious proponent of campus chatter to put forth some sort of column in each issue.

In doing so it will be necessary for the students to volunteer copy for said column. In the Press building there is a small mailbox for campus mail. It stands in the hallway, and is available to every student. If individuals will drop some note of scandal they know in the box marked for The Toreador, it will be published in the forthcoming column. It would be appreciated by the editor if this scant news-note would have the signature of the sender. It is not for publication, but will eliminate unsavory gossip that will have to be cut out of the column.

A reminder from the writer to students that each of these columns is read closely by the editor before they are printed. Any news that I so judge as casting bad reflection on the person in question will be omitted from the paper. It is for the enjoyment of the majority but not for the total embarrassment of a few.

For such news to be in the Wednesday paper it must be in the Toreador box by Monday noon; for Saturday issue the same time on Thursday. No person will know who sent the news in, with the exception of the Count and myself. If it is printed all responsibility is accepted by the editor. It is my hope that students will cooperate to the fullest extent in the next two weeks of publication in making the paper a much more interesting one to read. There are but four more issues, and it is my hope that they will be the best edited by yours truly, although it will be admitted that they will not have to be too good to better the examples set in the past.

Also in turning in news for the gossip column, personal contacts will be as good as letters. Merely tell the writer, or any of the staff members some choice bit of gossip and if it meet the standards set above it will appear as stated. Remember that no reference to the sender will be made if it is so desired by the students.

Gladys Merrill, senior, is the only co-ed at Washington State college currently majoring in animal husbandry.

Library Contains Lone Brazilian Short Story Book

Texas Tech library is the only library in the United States that has a copy of "Contos brasileiros: colligidos por Alberto de Oliveira e Jorge Jobing." The librarian at the United State Naval Academy at Annapolis has written the library asking where they got the book, saying that they needed a copy. "Contos brasileiros" was presented to the Tech library by Dr. Eunice J. Gates, associate professor of foreign languages. It was sent to Dr. Gates by the Instituto Nacional de Livro from the Ministerio de Educacao e Saude, Rio de Janeiro, Brazil. The book is a collection of Brazilian short stories written in Portuguese.

Radcliffe college is offering two \$500 fellowships for training courses in personnel administration.

TECHNICAL TIPS FOR

TECHSANS

Bottles for Accessories

Who would think empty bottles could make attractive accessories to be used in the home? Yet it can and has been done in the applied arts classes at Tech. Take any bottle, some tempera paints, water colors, regular paint or even nail polish, some imagination in the field of design, and the result is an attractive and colorful decoration for any part of the home.

Some results of the efforts of applied arts classes are a Florence flask attractively painted with a flower design, a vinegar bottle filled with gravel and covered with a painted design, and a whiskey bottle dressed up in multicolored flowered design to become an attractive decoration for any home. One large round bottle was filled with blue colored water and with very little effort a base for a lamp was created.

War time and such creative art run hand in hand, due to lack of materials and money and they supply attractive but inexpensive accessories in the home.

Victory Model Mattresses

Grandmother's plush feather mattress placed on an ordinary springs was ample in her day, but times change and mattresses and springs have changed with them. A few years ago innerspring mattresses were quite the thing. But now the war has brought another interesting change along this line. Students in Mrs. Edna W. Buser's textile economics class have been studying some of these changes. The new victory model mat-

tresses are now constructed of rolls of felted cotton to increase their elasticity and take the place of innersprings.

Ordinary springs are being replaced by wooden ones that have been treated in such a way as to give them that certain resiliency which is required to make springs and mattresses comfortable.

The students have also learned that not only are mattresses made from cotton but they can be stuffed with plain corn shucks, hair from horses tails and wood shavings.

Jasmine Tea Served

Jasmine tea that came from China was of great interest to residents of the Home Management house when Dr. B. C. Ling, research worker in child development, prepared a Chinese meal for them recently. The tea was sent to Dr. Ling by her father in China. It has a flower odor and a delicate fruit flavor and is served without cream or sugar. The tiny pasmine flowers opened and floated in top of the tea in the pot.

"It is nice to make the tea in cups and have the flowers float on the top," Dr. Ling told the girls. "It makes the cups very attractive."

The meal was prepared from chicken and vegetables, seasoned with Chinese sauce and spices. Residents, wishing to carry out the Chinese customs, served rice in place of bread and fruit for dessert. The Chinese seldom put anything on the table other than the food they eat, Dr. Ling said, so the fruit served as a centerpiece and dessert.

Tiny Tommy Is Growing

Tiny tot Tommy who tipped the scales at 5 pounds and 13 ounces when he was deposited in the Management house crib last October, is a big boy now. Today he is a husky 6-months-old young man, weighing 13 pounds and 13 ounces. He sits up in his crib and in his bathtub, kicks with great gusto, laughs, coos, howls, and in general proves the healthy state of his muscles and lungs.

Tommy's 21 mothers and Miss Frances Urban, house director, are duly proud of their child's accomplishments, and are especially cheery over the fact that he has gained weight so rapidly. Normal gain for a healthy youngster is to double in weight between birth and six months. Tommy out-distanced that record by two full pounds and five ounces, because he needed to. He weighed just one ounce more when he came to live on the campus with the home economics seniors than he did at birth two weeks previous to that.

J. F. McDonald, director of extension, will represent Tech at the meeting of executive committee, deans, and directors of National University Extension association in Chicago May 11 to 13.

Meeting of officials is being held this year in place of the annual conference. War time conditions have made the conference impracticable.

Topics to be discussed at the meeting are "What We Are Doing to Aid in the War Effort" and "What is Our Responsibility in Educating for the Peace that is to Follow the War?"

The association is made up of 56 institutions of higher learning including all state universities, a few state colleges and independent colleges and universities.

Tech has been a member of the association since 1931.

Resin Research Now Being Made Here

Milton Simmons Conducts Experiments In Labs Here

By PAUL BERTHELOT
Toreador Staff Writer

WORK in the textile department's research laboratories today is being directed toward the use of resins and woven or unwove fabrics. Milton Simmons, research assistant, Texas cotton research committee, has been working with unwoven materials.

The resin industry has expanded into over a billion dollars enterprise, Simmons said. Work of the Tech department is to try to find a way to successfully blend resins with cotton and make it adaptable for apparel. Properties of both materials are retained in the blended product. The question is, according to Simmons, whether or not enough of the properties are retained.

Duties of the research committee include bringing the use of common resins into the Texan mind. Much of this work has been done in the East but Texans know very little about the advantages of the products. Another duty of the committee is to try to get the resin industries to use cotton in producing their apparel products, thus creating a new market for Texas cotton.

Resins offer an entirely new field for textile processing, and through various means it is imagined that many new effects can be produced. They also offer Texas cotton an opportunity because it makes no difference whether the cotton is of a long staple type or

short staple, such as is grown in Texas.

Economic justification of the new process, Simmons said includes creation of new fabrics, new methods and processes utilizing more cotton, new industries and consequent new created wealth. The cotton farmer and all workers connected with the production of cotton, distribution of the cotton fabrics, are benefited. The whole standard of living is raised. Another justification is that it offers the opportunity of using low-grade, short staple cotton for creating new industrial, mechanical, household and apparel fabrics for hundreds of new applications.

Simmons pointed out that a great number of things after the war will be made of resins. Especially at this time it is almost certain that new automobiles will be made of plastics, which are resins. The war has stopped the advance of the industry at present because all industry must be devoted to the war and it can be imagined that it will advance again after it is

Foreign Language Club Plan Picnic For May 10

Members of Foreign Language club will meet in Aggie grove on the evening of May 10 for their annual picnic. Preceding the picnic there will be a presentation of a French play, "La Dame de Bronze et le Monsieur de Cristal" by members of the club.

Twenty-five University of Texas faculty members have been assigned to duty as instructors for the new naval aviation preparatory school at the university.

Mrs. Matilda C. Wilkin, oldest living graduate of the University of Minnesota, recently observed her ninety-seventh birthday with a party.

Each resin must be studied carefully before the experiment is begun because they must be suitable to the process both chemically and physically. Simmons said that the proportion must be figured out mathematically before beginning and the qualities must be tested after the product is completed.

Since this is an entirely new field, new methods must be found to blend the two materials by impregnation, penetration, and modification of the cotton fiber.

ing Drills Close For Red Raiders

Man-Power Is Biggest Problem For Tech Coaches

Morgan Optimistic About Incoming Men For 1943 Season

Coaches Dell Morgan and Polk Robison brought their 1943 Texas Tech Red Raiders to the end of spring drills Friday afternoon with light scrimmages. They packed away football equipment for the coming four months. A football team at Tech is expected for next season if the war will allow it at any school in the country. In any case the Red Raiders are ready to field a team, although inexperienced for the most part. They will be as capable as any other wartime eleven.

Principal reason for the early curtailment of the spring grind was the man-power shortage, the coaches explained.

Coach Polk Robison said that a shortage of tackles had kept the team from heavier drills, with the lack of men causing shifts to be made in the line that coaches deemed unwise. During the past few drills as few as twenty-three players have reported for practice.

This drop was caused somewhat by the recent calling to service of all army reservists, and also failure of some men to report due to the feeling that they will be in some branch of the armed services before next fall. These men felt it unnecessary to report for spring drills as they would be unable to participate in the 1943 Red Raider game schedule.

High school graduate of some quantity are expected to join the squadmen returning next fall. These graduates are expected to fill in many vacancies left by older athletes going into service.

Coach Morgan stated that the principal purposes in conducting the spring training was to condition both these players who plan to enter the armed forces in the near future and those who are planning to return to Tech in the fall and continue their athletic careers here. Both ends, he believes, have been accomplished.

Dean Ivan C. Crawford of the University of Michigan college of engineering has been named technical adviser and consultant to the training division of the navy.

Annual Play-Day Opens Here Today

Registration Begins At 8:00 In Tech Gym

Beginning with registration in the gym at 8 o'clock this morning the thirteenth annual play-day for women on the campus will be held today under the direction of the Women's Recreation association and the department of physical education for women.

All college women are invited to participate in the day's events. Those who attend will be excused from classes. Tickets for the affair are twenty-five cents each.

After registration and a general assembly from 8 until 9 o'clock in the gymnasium, athletic events will begin. Tennis singles and doubles, jacks and volley ball will start activities.

At 10 a.m. relays, ping-pong singles and doubles and archery competition will begin.

Barbecue lunch will start at eleven o'clock.

A barbecue lunch will be held on the Tech field at noon for the play day participants.

After lunch, volley ball, buck rone and tumbling and dancing will begin. Last sports on the day's menu will start a 2 o'clock and competition will begin in horse-shoes, badminton and softball.

Sports will continue throughout the rest of the day. Play day is held each year in the spring by the women's physical education department and the Women's Recreation association. The department urges that as many coeds as possible attend the annual fete.

General managers for the day are Mrs. J. G. Langford, head of the department of physical education for women, Miss Margaret Baskin, Miss Velma Floyd and Mary Martha Sufall.

Other members of the club and instructors of the physical education department will serve as judges and officials.

Marketing Class Visit Groce Furniture Store

Dean J. O. Ellsworth, dean of the division of commerce, will take his junior and senior marketing students to Groce Furniture store this afternoon. S. W. Groce, manager of the store, will talk to the students on the problems of buying and selling furniture under war time conditions.

College Fencing Team Will Enter SWC Meet May 8

Four members of the Red Raider fencing team and their coach, George Beakley, will be in Dallas May 8 and 9 to participate in the Southwestern fencing meet. The meet will sponsor college competition as well as allow entries from North American Aircraft, Beaumont Shipyards, the Dallas YMCA and others.

Techians who will attend the meet as participants are Tommy Folks, Stewart Dismuke, Arvis Helton and Robert Scott.

Money was appropriated by the Student council at a recent meeting to cover expenses of the trip. Heretofore, no money has been allotted for this purpose.

Last year, the newly organized team made Southwest conference history by defeating their champion, Baylor university. At the end of the season, the Tech team had defeated most of the Southwestern teams but because of a lack of funds had to forfeit its last and championship match with Texas university.

Guthrie Receives Navy Commission

John Guthrie, 1936 civil engineering graduate, has recently been commissioned in the U. S. Naval Reserve as a lieutenant, junior grade. He has been ordered to active duty in Virginia, J. H. Murdough, head of the civil engineering department, said.

Guthrie has previously been employed by the state highway department in Fort Worth.

Who's Who for 1942-43 lists 31,692 men and women noted in American life. Of these, 22,302 are college graduates and 5,622 are members of Phi Beta Kappa.

Lubbock Baseball Season To Continue

Army Sponsor Teams Here During Summer Despite War

BASEBALL season in Lubbock will continue this year despite the folding of the West Texas-New Mexico league. The Lubbock Army Flying School and the South Plains Army Flying School have organized teams and will carry on for local baseball fans in the city and at Tech. The first game open to civilians will be staged Sunday afternoon in Hubber Park. One will be played at the South Plains base for the benefit of soldiers.

Little is known about either team as it will be their first public appearance Sunday, but practices have been staged daily at the two fields in preparation for the coming contests. The game will begin Sunday afternoon at 2 o'clock.

S-Sgt. Spencer Skogstad, who last season managed the LAFS crew, is now pilot of the South Plains aggregation, while the LAFS nine is now under the direction of Sgt. Sam West, a former big leaguer. Assisting West with his LAFS club is Sgt. J. G. Goober Keyes, ex-Lubbock high school coach.

West, who will be playing manager of the Fliers, is the only major league star on either squad but both boast many players with ample semi-pro and minor league experience.

This week-end's game will be the first of a 34-game series for the SPAFS team. The Lubbock Flying school has not yet announced their schedule, with the exception of the eight games to be played with the South Plains base.

Sgt. West announced a tentative line-up for the Fliers Thursday, with his own name omitted from the starting nine. It is expected,

however, that he will see action before the game is over.

A pitcher for the opener Saturday, with one of the other following the next day, is to be decided with a choice of one of four right handers: T-Sgt. W. G. Hardwick, Sgt. James Wilson, Sgt. Leland Wood and Sgt. Raymond Eastman. Sgt. Buster Dixon and S. Sgt. R. F. Bowman are contesting the catchers berth, while Lt. E. J. Denison and M-Sgt. J. J. Bartek are scrapping for the shortstop position.

The other post being wrestled for is the third base slot with Pvt. Gilbert Norman and T-Sgt. Paul Holmes as the contestants there. A dispute for first base will be settled between Sgt. John Cuoco and Sgt. A. E. Teusink.

Fairly certain to be starters in the week-end games are Pfc. Norman Volz in center field; Lt. Philip Sansome at second; S-Sgt. C. M. Elwood in left field; and S-Sgt. Mickey Campbell in the right field position. Admission will be free for both games.

The University of Hawaii's paper, the Ka Leo O Hawaii, which automatically was discontinued after the bombing of Pearl Harbor, has resumed publication.

Las Leales Stage Tea Sunday; Honor Guests, Members

Las Leales, honorary organization of junior and senior women students at Texas Tech, entertained new members and guests with a tea Sunday afternoon from 3:30 to 5 o'clock at the home of Dean Margaret W. Weeks.

Mary Sparks, retiring president, presented the guests to a receiving line composed of Dean Weeks, Ophelia Mae Beall, Dean Mary W. Doak, Evelyn Woodson, and the new members: Anna Baker, Eugenia Butler, Lois Chambliss, Sarah Eiland, Betty Floyd, Monda Hamilton, Marie Hunsucker, Glenna Jack, Mary Jane Johnston, Rowena McKinley, Virginia Lee McSpadden, Rita Mooney, Betty Jo Morgan, Rachel Patterson, Moore Roberts, and Helen Ruth West.

Miss Mabel Erwin poured. Old members also in the house party were Ophelia Mae Beall, Maxine Craddock, Eleanor Mitchell Bond, Evelyn Woodson, Edith Poole, Ruth Joan Connally, Morraine George, Katherine Weeth, Elizabeth Young Oglesby, Evelyn Cooper, Erlene Dowell, Ermauld Floyd, Mary Sparks, Dorothy Stephens, Doris Nell Tippitt, Helen Walker.

Newly elected officers are president, Ophelia May Beall; vice-president, Evelyn Woodson; secretary, Sarah Eiland, treasurer, Edith Poole; reporter, Rachel Patterson; historian, Marie Hunsucker; parliamentarian, Rowena McKinley; AWS representative, Glenna Jack; Paul Whitfield Horn Memorial Loan representative, Maxine Craddock.

Farewell To Seniors Will Be Theme Of Club

"Good-bye Seniors" will be the theme of the regular Home Economics club meeting Tuesday at 7:30 p.m. in Annex G. Miss Margaret W. Weeks, dean of the Home Economics division, will speak to the group.

Officers for the coming year will be installed and a style show from the clothing department will also be included on the program. All club members are urged to attend.

The women's service corps at Washington State college has 123 members who are being fitted for membership in auxiliaries of the armed forces.

Rotary Club Fund Reaches \$9000 After 20 Years

Growing from \$300 in 1923, the local Rotary loan fund now amounts to \$9,000. Approximately 1100 Tech students have been assisted by the loans, which total \$50,000, Dean J. M. Gordon, chairman of the fund announced.

First funds for student loans were earned by presentation of a minstrel show starring members of the Rotary club. After the first year the fund was maintained by donations from members.

Students from any college or university may qualify, for it is not restricted to Lubbock or Texas. Applications for loans are first made to Dean Gordon who submits the requests to a committee. After the committee approves a loan the student makes a note which must be signed by two persons who will guarantee payment. A service fee of 50c will be deducted from the first loan. Five per cent interest is charged until maturity and 10 per cent on both principal and interest until the first payment is made. Notes are made for one year and may be renewed if necessary.

Loans, not often amounting to over \$100 to each person per year, may be used from any thing from board to books, registration fees or room rent. They are made to upper classmen with high scholastic records who have already proven their ability.

The present committee that interviews students for loans includes: Chairman, J. M. Gordon, Dr. M. C. Overton, Jack Randall, Dr. C. J. Wagner, Walter Posey and Asa May.

Stroup Relics Exhibited Here In Tech Museum

Exhibited in West Texas museum are three cases of old relics belonging to the Stroup family and loaned to the museum by Mrs. Glen Stroup.

Included in the collection is an old blue match holder, powder par and dresser set, and a vase with inlaid gold design. There are some lodge badges, one bearing the date 1900.

There are two slates and several old school books, a family album, a miniature picture album, and the old family Bible. There are several photographs, one of a man in a Confederate uniform. An old kerosene lamp and reflector and two wool lap robes of horse and buggy days in the exhibit.

Among the dishes are saucers, tea coasters, salad plates, salt and peppers, and a big rolling pin. There is a big shaving mug with the Stroup name on it.

Several handmade tablecloths, dollies, and handkerchiefs are in the collection. "Great-grandmother's" black velvet-beaded cape is included.

The oldest items in es exhibit are a clock made in Germany belonging to a great-great grandfather of John Glen Stroup; a muzzle loading rifle, powder horn and container for bullets, and hunting tools used in Revolutionary War and made in Germany; an Equidius Klatz violin with bows and case made in Germany in 1790 and owned by the Stroup family for 130 years.

Home Ec Letter Released Soon

The May issue of the Texas Home Economics Newsletter will be off the press the second week in May, the editor, Miss Bernice D. Borgman, assistant professor of child development, has announced.

This paper goes to all members of the Texas Home Economics association. Assisting Miss Borgman are: Miss Ella Mae Lyle, assistant professor of home economics education and made in Germany; an instructor in clothing and textiles; Mrs. J. Bateman, teacher in junior high school; and the home economics journalism class, under direction of Mrs. Louise C. Allen, assistant professor of journalism.

Blitz Announces Chorus Practice

Dr. Julien Paul Blitz, head of the music department, has announced that all students of chorus should be at the College Avenue Baptist church Monday night at the regular meeting time for the last meeting.

At this meeting the student's cards will be stamped for the last time and taken up so grades depend on student's attendance. Dr. Blitz further announces all chorus students will not be required to sing at Recognition service to be held May 11, but those students wishing to sing at this time may do so by singing at these services. Those interested in doing this must see him Monday night and he will also announce the students who will sing at Recognition services.

Program Given For Grain School Here On May 11

The program for the grain-grading school to be held here May 11 has been completed.

E. A. Miller, extension agronomist from College Station, visited Tech several weeks to discuss plans for the school with Dr. A. W. Young, head of the plant industry department, County Agent E. E. Johnson and Don Jones of the Lubbock agricultural experiment station.

"Relationship between Grain Supervision and Inspection" will be discussed by H. N. Holmes, federal grain supervisor of Fort Worth. F. T. Dines, director of Texas Wheat Improvement association with headquarters at Amarillo, will speak on "Wheat Improvement."

R. E. Karper, who is in charge of sorghum investigations at the Lubbock Experiment station, will lecture on "New Varieties of Sorghum."

An illustrated talk on grain-grading will be delivered by W. B. Combs, senior marketing specialist whose headquarters are in Chicago. He will also explain the grading of soy beans. H. C. Van Dever, manager of Wichita Mill and Elevator company of Wichita Falls, will speak on "Good Grain Storage Practices."

Other schools, under the leadership of the federal grain supervisor of Fort Worth, are to be held the same week in Vernon, Plainview, Amarillo, and Perryton. All who are interested in seeds may attend the school, Dr. Young stated.

Renner Assists In Conducting Short Courses

Prof. K. M. Renner, head of the department of dairy manufactures, assisted in conducting three one-day short courses for butter and cheese manufactures Tuesday, Wednesday and Thursday. Meetings were held in Amarillo, Fort Worth and San Antonio.

Mart G. Pederson, associate professor of dairy manufactures, also assisted in the Amarillo meeting. "Development of Quality Improvement Program of Butter and Cheese in Texas for 1943" was the subject of Professor Renner's talks to the dairy manufacturers. He prepared several posters urging manufacturers of dairy products to strive for an increase in quality production.

Professor Renner conferred with members of the health department in Austin regarding state regulation of dairy products. Today he will talk with officials of Waco health unit concerning the health program and will inspect milk plants at Abilene and Brownwood.

The Harvard university department of fine arts is offering a special six-week evening course in industrial and civil camouflage.

From.... I

2 ... Another
By COUNT MEOUT

At the matrix table dinner last night were cute imitations and "take-offs" on the PUBLICATIONS COMMITTEE, BILL BARNETT, PAUL BERTHELOT and others.

Maybe it's clear to some, but we haven't been able to figure out the P. B. SHANNON, MARY MENON STANGEL, CREED COFFEE triangle.

MAXINE BEASLEY runs around with lieutenants from the local air fields while her one and only is going farther and farther away.

Congratulations to the VARSITY SHOW cast and directors for their production and especially to the orchestra and director, JAMES WILLIAMS III.

FRANCES WATSON has a ring from a certain lieutenant at the air base and we hear the date is May 15.

TRINKA NORMAN is "off" the pre-flight student's days.... they say it's because one took her to a baseball game they were playing recently... he got so enthralled with the game that he forgot to take her home.

We also hear that JERRY LAP, RICK and BOBBY EUBANKS have set a date but we can't find out exactly when... maybe August.

BETTY JO WAGNER MOON and husband JACK MOON were back visiting on the campus last week... They were both quite popular while in school.

One of the pre-flight students has a big black DE SOTO here with him that MARY ANN WORLEY just loves to take care of.

Market Students Hear Three Talks

Allan Benton, manager of Dalby Motor company spoke to junior and senior marketing students Wednesday afternoon on the place of the motor industry in war time. Following the talk Benton conducted a tour of the business establishment.

J. G. Wilkerson, manager of Cooler and Cold Storage plant spoke to the marketing students the same afternoon on the place of the cooler and refrigeration in the marketing of foods.

Friday afternoon Mrs. Ruby Stewart, traveling sales manager of Dalby Motor Lines spoke to freshmen business administration students.

National Service Life Insurance Offered Students

Government Places Men On List When They Begin Flying

By Staff Sgt. Wallace Britt

Each student should know and understand the importance of National Service Life Insurance as offered by the government to the armed forces of the United States. Under the five year level premium term rates are from \$6.64 per thousand dollars for applicants 18 years of age to \$0.70 per thousand dollars for applicants 29 years of age. These ages apply to most members of this station. Even pay life or thirty-pay life are approximately double those of the five year level insurance.

The five year insurance has no war clauses which restrict payment to beneficiaries, unless the insured is killed in the act of a traitor or under conditions which are considered not in line of duty. Converted to one of the other three plans, the policy accumulates cash and loan value after being in effect one year. This also is payable only on death of the insured.

In order to be designated as beneficiary, a person must be wife, child, parent, brother or sister of the insured. If the beneficiary is under thirty years of age, payment will be made in 240 equal monthly installments at the rate of \$5.51 for each \$1,000 of insurance. If the beneficiary is over thirty years of age, payments will be made in monthly installments for 120 months in all events, and continuing during the remaining lifetime.

Under existing regulations, as soon as a student is placed on flying status the government automatically issues insurance for \$10,000, to be in effect as long as the student is required to make regular flights. If he has insurance amounting to \$10,000 on entering flying status, the government pays his premiums during the time he flies.

Despite the fact that the insurance is paid for as soon as the student becomes a flyer, it is each man's responsibility to see that his family is protected during the period of pre-flight.

Consolidated Agent Here To Interview Applicants

Joe Ellis, representative of employment department of Consolidated Vultee Aircraft corporation in Ft. Worth, is on the campus today interviewing applicants for the second course in pre-factory aircraft drafting to be taught at Tech.

Class opens Monday with H. H. Katz as instructor.

"Ladies In Retirement" Presented Here May 13

"Ladies in Retirement," the play to be produced as the annual Tech presentation by students on May 13, is also being presented by Northwestern university, Miss Helene Blattner, director, said. This play was chosen as the April production to be staged in the University theatre at Northwestern.

Rigby Resigns Position Here To Become Ensign

Dr. Fred Rigby, instructor in mathematics, has resigned his position to accept an ensignship in the United States Naval Reserve. Dr. Rigby has been ordered to active duty in Florida. C. B. Jones, also a professor of mathematics, is leaving. These vacancies will be filled by regular members of the faculty until June 1 when new instructors will be employed. J. N. Michie, head of the math department, announced Thursday.

Four students who have been studying Japanese at Southern Methodist university have been accepted by the intelligence division of the army.

THE ECHELON Day By Day

By Day

LIEUTENANT Stanley L. Spellberg, until recently well-liked commander of Group Two, now is acting as assistant Post Exchange officer at LAFS, reported happy with his new job . . .

Our Air Corps detachment seems unaware of the fact that Tech's regular semester will end within a month, closing the regular classes until summer session opens. This means the end of some of the activities we have enjoyed here, and also the departure of a good many of our "friends" for the summer. Better start thinking of some way to entertain yourselves during the long summer months, men; might be pretty lonesome around here . . .

One of our new squadron G men should know a bit about the Army; he is Ralph A. Lewis, Jr., son of Major and Mrs. R. A. Lewis, of Austin, Texas. The Major now is on duty somewhere in England with the U. S. Quartermaster Corps.

Cigars were swapped for congratulations in squadron A last evening. The Major now is on duty somewhere in England with the U. S. Quartermaster Corps. Cigars were swapped for congratulations in squadron A last evening. The Major now is on duty somewhere in England with the U. S. Quartermaster Corps. Cigars were swapped for congratulations in squadron A last evening. The Major now is on duty somewhere in England with the U. S. Quartermaster Corps.

Few of us know it, but the man who blows "Taps" for us each evening is Pvt. Leonard Semrick, squadron C. Before entering the service Lennie played a hot trumpet down in the home of the blues, New Orleans.

This new squadron G seems to have no end of talent for such a small group; now they spring a movie star on us. Pvt. George Neise formerly was a featured player for 20th Century Fox and also was a special events announcer for Columbia Broadcasting System. In the epic film "Air Force," Neise portrayed the communications officer at Hickam Field, Hawaii, and in his G. I. drawer he has a picture from Shirley Temple commenting on another film, "It was a nice working with you, George."

Pvt. Neise is a graduate of the University of Wisconsin and Culver Military Academy. He calls himself the "grandpa" of the cadets, since he is 26 years old, but his buddies here are anxiously awaiting release of "They Raid At Night," a commando picture in which he starred.

(Sounds like good material for those summer plays you plan, Sergeant Lentini!)

The Detachment non-coms are

Student Saltz No New-Comer In Khaki Clothing

Warren E. Saltz, new student commander of the squadron G flightjigs who shipped in from the Sheppard Field "dust bowl" last week, is no new man at army routine. Beginning in 1938 he served a two-year hitch in the National Guard (Air Corps). By 1940 he had earned a specialist rating in photography and was acting drill sergeant.

In 1940 when the draft board beckoned, Saltz went into uniform again for nine months at Fort Lewis, Wash., but was honorably discharged and returned to the University of Washington. The next time he decided to beat the draft board to the punch and enlisted in the Air Corps.

After a few weeks chewing dust in the Sheppard Field "Cow Pasture" and a day's journey, "destination" unknown, the detachment's newest student officer ended up at Tech.

Larson, Rigby Report For Active Duty With Navy And Coast Guard This Week

Drs. D. M. Larson and Fred D. Rigby, of the government and mathematics department, left this week for active service in the Navy and Coast Guard.

Dr. Larson left Thursday for New London, Conn., where he will enter Coast Guard officers candidate school. Dr. Rigby and his family left Monday for Florida, where he will receive an ensign's commission in the Navy.

'Know Your Non-Coms Corner' Introduces Sergeant Cafiero

Sgt. Ray Cafiero, tactical non-commissioned officer in charge of squadron F, hails from the borough of Manhattan. He attended public schools 8 and 95, where he says the kids were so tough they cut their eye teeth on black-jacks. Finding the neighborhood a little too rough, his parents sent him to Lady of Mount Carmichael parochial school, where he graduated.

Choosing printing for a vocation, Sergeant Cafiero attended Queens Vocational High school four years, becoming business manager of the school paper, a lieutenant of the school police and winning a certificate of merit in journalism. After graduation he went into the printing business, but soon decided to enlist in the Army.

The Sergeant enlisted June 6, 1938, as a chauffeur and worked his way up to company armorer-artificer, or gunsmith. He has been on maneuvers in both Virginia and Louisiana and also was stationed in Tennessee and at Ft. Bragg, N. C., claims that life in a pup-tent in the heat of the swamps is no picnic.

At the end of his term of enlistment June, 1941, he received an honorable discharge from the Army, but after three months he missed his old buddies and life in the infantry, so he sought the nearest recruiting station and tried to re-enlist. It was months before he was able to get back in, finally becoming a drill instructor at Camp Upton, Long Island, N. Y. Later he was sent to Randolph Field, Texas, to lecture on firearms to the Air Corps. He came to Lubbock from there on February 18, 1943.

Sergeant Cafiero's favorite diversions are sports and debating. He claims he would rather have a good argument than eat. He hopes to see some action in this war, and says, "I admire the men who wear wings on their chests. It shows they're really in this scrap, and you've really got to have something on the ball to own a pair."

The Sergeant doesn't have any plans for after the war. He says he'll just wait and see what happens, then make up his mind as to what he wants to do.
