

## Concert Tomorrow Culminates Clinic

A band concert tomorrow night will culminate the 25th summer band clinic conducted at Texas Tech.

Approximately 210 students have participated in the clinic this year, according to Prof. D. O. Wiley, Tech band director and clinic head.

**THE PROGRAM** will open at 7:30 P.M. on the Administration Building Green with a program played by the intermediate band which will be conducted by W. R. Wheeler, assisted by Beryl Harris and Don Eiring.

Program will include "The Challenge" by Hummel, "The Spirit of Progress" by Lynn, "Little Irish Suite" by Jackson and "The Yellow Rose of Texas" by Frank.

**FOLLOWING** the intermediate band's program will be an exhibition of baton twirling featuring about 50 baton twirlers from the classes directed by Bill Woods.

The concert band directed by

Fred R. Smith, assisted by Robert Taylor and Gary Garner.

**THE CONCERT BAND'S** program will include "Golden Eagle March" and "Moonrise" by Walters; "Goofin'" by Baroni; "Holiday Tune" by Whitney and "Belmont Overture" by Hermann.

The final program, the symphonic band, will be conducted by Comdr. Charles Brendler, leader of the Washington D. C., Naval Band.

**THE PROGRAM** will include "German Fidelity March" by Blankenburg; "Die Fledermus" by Strauss; "Music for a Carnival" by Grundman; "Action Front" by Blankenburg; "Elsa's Procession to the Cathedral" by Wagner; "Youth of Britain" by Coates; "March Folies Bergere" by Lincke and two sections of the suite "Passion and Paint" by Rene.

The concert will close with "Tulsa" by Richard Gillis, brother of Everett A. Gillis, Tech English teacher.

**NOPE, NOT A MIXED DRILL TEAM** — but a common sight on the band drill grounds for the past three weeks. These are a portion of the high school bandmen who have been attending the

annual summer clinic. The group will present its final concert tomorrow night on the Ad Building Green.

## Placement Bureau Is Helpful to Jobless

by JIM WALSH

Of the many campus services found at Texas Tech the placement bureau is one of the busiest and most helpful. Since last fall over 4,500 applications for jobs and job interviews have gone through the office.

Although the bureau, located in the Ad Building, helps many Tech students find part-time employment in Lubbock, the majority of its work is in scheduling interviews and graduating students for conferences.

**IN THE PAST**, engineers, chemists, mathematicians, physics majors and business majors have been in demand the most, according to Mrs. Jean Jenkins, bureau head. This spring over 213 companies visited Tech's campus in search of graduates to fill positions with their firms.

Not all firms come directly to Tech. In the Placement Bureau's office there are clip boards thick

with job offers for different majors. Each board covers a specific school and gives the job information from the different companies desiring workers.

**MRS. JENKINS** said that many companies have vice presidents in charge of college recruitment. These men send letters to the bureau which in turn notifies the different department heads. The department heads then schedule interviews for the students.

Engineering graduates are the most sought after students. Last year, for instance, Du Pont had over 2,000 jobs to fill, with Tech able to supply only a minute percentage of the need.

**BESIDES GRADUATE PLACEMENT**, the bureau finds job situations for students desiring part-time employment. Everything from bus boys to chauffeurs has been offered. Mrs. Jenkins warns, however, that the demand for jobs far outstrips the jobs that are available.

## If You Are Curious, Here's The Answer

In case you've been wondering what those trucks with the over-sized thread spools have been doing around the campus lately, they're laying new electric cable for the new dorms on the northwest side of the campus.

The new cable will provide electric power for the new men's housing. This is just one of many construction jobs going on at Tech during the summer months.

## Weather

Warmer weather for weekend activities is predicted by the U. S. Weather Bureau with temperatures slated to climb back into the 90s.

The bureau warns, however, that golfers, picnickers and other sun fanciers may expect partly cloudy skies and scattered showers.

## Second Summer Play Cast, Crew Selected

The cast and production staff for the Speech Department's second semester summer production, "Angel Street," have been announced by Ronald Schulz, acting head of the department.

The play will be presented July 21-23 in the Speech Auditorium. A psychological mystery set in England, "Angel Street," by Patrick Hamilton, was produced originally as "Gas Light."

The cast tryouts were conducted Friday through Monday.

The cast includes: Mrs. Manningham, Gail Cooper; Mr. Manningham, Jim Hennigan; Nancy, Jo Morris; Elizabeth, Darlene Dorrell; Rough, Bill Luck; Policeman, Richard Hopson.

The production staff is: Director Arthur Evans; assistant director, Benni Dunn; stage managers, Luck and Hennigan; set construction, Luck, Hennigan and Dwayne Cox; sound, Evans; costumes, Misses Morris and Cooper; properties, Morris Bruns; make-up cast; publicity, Cox and Hennigan.

## Final Weeks Crowded With Deadlines, Exams

Schedule for the last two weeks of the first summer term will be crowded with graduating student deadlines, classes Saturday, July 12, and final examinations July 14-15.

Registration for the second term will begin at 8 a.m. and end at 5 p.m., July 16.

July 8 is the last day to file personnel information forms and photographs at the Placement Office and to pay graduation fees.

Students who pay the fee after this date will not receive an actual diploma at Commencement.

Dormitory dining rooms will close for the first session with the serving of the noon meal July 15 and students without room reservations for the second term must vacate rooms by 2 p.m. Room occupancy for second term begins at the same hour.

After registration, classes begin at 7:20 a.m., July 17.

## Star Study Offered

A six-weeks class in "Intermediate Astronomy" will be conducted in July and August. The course is for teen-aged boys who have had algebra.

A minimum of 12 students is necessary to form the class and 20 is the maximum number that can be accommodated according to Donal Myrick, Tech junior physics major from Lubbock, who will teach the course.

Special attention will be given to the stars and stellar systems in the course. Lectures will be supplemented by movies, telescopes and the Planetarium located behind the West Texas Museum.

Enrollment fee is \$4. Boys from families with Museum Assn. memberships will be charged \$3. Registration will begin Monday at the museum office and will continue until 5 p.m., Thursday.

For additional information about the class call the museum office, PO 5-8541, Ext. 344.

## Dance Set For Union

A Western dance tomorrow night will end this week's activities at the Tech Union.

Cary Hobbs, KDAV disc jockey, will be master of ceremonies for the affair. Dress for the dance will be western or casual, according to Miss Larke Harrington, Union activities director.

Noble Anderson, well known in this area, will call the square dance slated in the Rec Hall from 7 to 8:30 p.m. today.

"The First Time" is the movie scheduled for Tuesday night in the Ballroom. Starring Robert Cummings, Barbara Hale and Bill Goodwin, the comedy tells of a young couple whose lives are turned topsy-turvy by a new arrival.

The Union will present a special event July 8, when Witkowska and Gillaspay perform. Miss Witkowska is an opera star and Gillaspay is a baritone who was a soloist in the Army Band and Chorus for two years.

**READY TO POINT THE WAY** for their bands this fall are these high schoolers who participated in the twirling clinic conducted the past three weeks

in connection with the Tech summer band school. A group of the twirlers will perform Friday night at the final concert of the bands.

## Final Exam Schedule

The examination schedule ending the first summer term has been announced.

### MONDAY, JULY 14

7:20- 9:50 a.m. Classes meeting 7:20- 8:50 a.m.  
10:20-12:50 p.m. Classes meeting 1:20- 2:50 p.m.  
1:20- 3:50 p.m. Classes meeting 10:40-12:10 p.m.

### TUESDAY, JULY 15

7:20- 9:50 a.m. Classes meeting 9:00-10:30 a.m.  
10:20-12:50 p.m. Classes meeting 3:00- 4:30 p.m.

Requested changes in the schedule of individual students will be considered by the dean of the school in which the student is registered.

## Meat Class Set in July

A short course in the art of meat preparation has been slated for the first part of July by Dr. Mina Lamb, head of the department of food and nutrition.

Participants will study the nutritive value of meats, including structures and compositions as related to cooking methods. Meat selection and storage methods also will be explained.

The group will visit local packing plants and observe meat marketing from slaughter through inspection, grading and processing. Each student also will do actual cooking, observing the influence of grade on cooking quality.

The course is scheduled July 1-3 and 7-8.

## Farm Shop Class Ends

New farm shop skills, including instruction incorporating hand tools, jointers, painting, masonry and farm structures are being taught in a short course which ends tomorrow.

Twenty-two persons are enrolled, most of them vocational agriculture teachers. Prof. Ira Williams, Tech agricultural engineering department head, is in charge of arrangements for the course.

Instructors are Bob Craig, Texas A&M farm shop specialist; Leland Bradley of the American Zinc Institute, New York City; John Koester of Portland Cement Association, Austin.

## LeGendre Gets MA

A 1955 Tech graduate, Joseph R. LeGendre, has received a master's degree from Oklahoma State University.

LeGendre, an animal husbandry major, wrote his thesis on a study of the effect of certain supplements and additives to steer fattening rations.

## Infirmiry List

Jean Bacon, freshman speech major from Bronco, was the only patient in the Infirmiry Thursday morning. She is the daughter of Mr. and Mrs. A. H. Bacon.

Dullness is contagious, I think. Imperial Magazine

You don't get without giving, and that includes gossip at the hairdresser's.

Imperial Magazine

I used to scoff at plays and books with happy endings, but lately I have begun to demand them.

Imperial Magazine

## BSU Party Slated

The annual Baptist Student Union watermelon party is scheduled Tuesday at 6 p.m. in Mackenzie Park.

Signs will be posted at the East Broadway entrance pointing the way to the picnic site. BSU members and others who desire to attend are invited.

## To Satisfy The Ladies — Doak Gets Face-Lifting

Doak Hall is getting a feminine touch in preparation for occupancy by upperclass women in the fall semester.

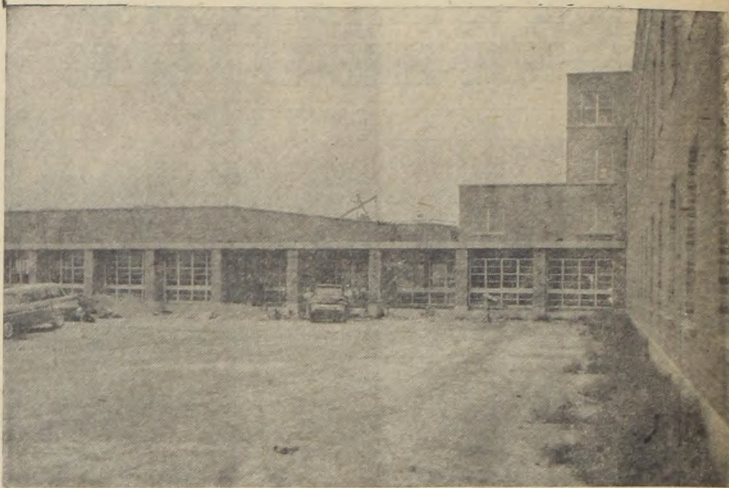

Venetian blinds are replacing shades on all windows and a complete redecoration program is being carried out this summer. Repainting of the entire interior, refinishing of some of the furniture and the buying of new furniture, primarily chairs, will ready the dormitory used by men, for women students by Sept. 1.

New men's dormitories, located

## Sneed Slates Jam Session Wednesday

A dorm mixer jam session is scheduled for next Wednesday night. Bill Blann, publicity chairman, has announced.

The dance will start at 7 p.m. Entertainment will be provided by a jam session type band organized from Sneed Hall.

A HEAD-ON VIEW of one of the dining rooms in the new men's dorms on the northwest portion of the campus is afforded by this picture. Although

rooms will be ready for occupancy in early September, only one of the dining halls will be open until later in the fall.

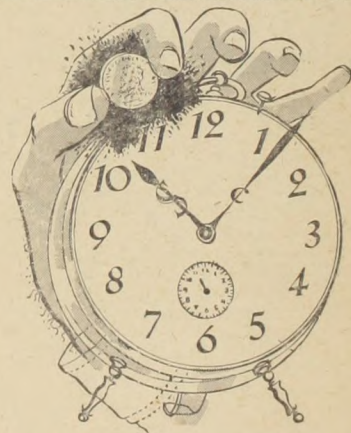

"YES, I KNOW YOU HAVE THE SAME ANSWERS AS SMITH — YOUR ANSWERS ARE WRONG BECAUSE YOU TOOK A DIFFERENT TEST."

## Chemistry Professors Engage in Research

If you are concerned with the benefits of the thermal decomposition of chromium amines, you might consult Dr. W. W. Wendlandt of the chemistry department.

Dr. Wendlandt is one of three Texas Tech chemistry professors currently engaged in research projects. Studies are also being made by Dr. J. A. Adamek and Dr. Henry J. Shine.

"We conduct such projects and which are of particular interest to us as individuals," Wendlandt pointed out. "Information obtained cannot be used immediately in the classroom, but may be pre-

## Star Gazers

### Public Demonstrations

Public demonstrations will be held in the Planetarium behind the West Texas Museum on two more nights this summer, Dr. W. C. Holden, museum director has announced.

The planetarium is a Spitz type equal to performances given by larger ones in Dallas, Chicago and New York. While the stars are paraded on an artificial sky, complete with sunrise and sunset Donal Myrick, Tech junior physics major and president of Pyros-Tech's rocket society, will give a lecture on the different stars and constellations and explain their relative positions in the sky.

Theme of the programs will be "Stars on a Summer Night," explained.

## Tech Faculty

### Member Lectures

#### In California

Dr. Thomas G. Manning of the Tech history staff is a visiting faculty member this summer at Claremont (Calif.) College, a graduate institution.

He is teaching two history courses: "American Scientific Thought in the 19th Century" and "Problem Approach to American History since 1870."

## Chemistry Professors Engage in Research

If you are concerned with the kinetics of the thermal decomposition of chromium amines, you might consult Dr. W. W. Wendlandt of the chemistry department.

Dr. Wendlandt is one of three Texas Tech chemistry professors currently engaged in research projects. Studies are also being made by Dr. J. A. Adamcik and Dr. Henry J. Shine.

"We conduct such projects which are of particular interest to us as individuals," Wendlandt pointed out. "Information obtained cannot be used immediately in the classroom, but may be pre-

sented on the graduate level in years to come."

Shine recently began a study of the production of acetoxy radicals in the thermal decomposition of hydroperoxides in acetic anhydride solution. He is also working with the photolytic rearrangement of the oxime acetate of seven-nitro-alpha-tetralone.

The organic compound of boron and neocotions of enolates is the subject of research being done by Adamcik.

Wendlandt is also working with the construction of a high temperature solar furnace.

## Star Gazers Present Public Demonstration

Public demonstrations will be held in the Planetarium behind The West Texas Museum on two more nights this summer, Dr. W. C. Holden, museum director has announced.

The planetarium is a Spitz type equal to performances given by larger ones in Dallas, Chicago and New York. While the stars are paraded on an artificial sky, complete with sunrise and sunset, Donal Myrick, Tech junior physics major and president of Pyros—Tech's rocket society, will give a lecture on the different stars and constellations and explain their relative positions in the sky.

Theme of the programs will be "Stars on a Summer Night."

Starting time will be 8 p.m. July 21 and August 11.

After the demonstration, visitors will have a chance to see the stars and planets through Tech's 6-inch reflector type telescope. Planets in view at that time will be Jupiter with four visible moons, Saturn with two moons and its mysterious rings, and Venus which will be visible to the west early in the evening.

Admission to the shows will be 25 cents for school children, 50 cents for adults or presentation of a Museum Assn. membership card. Children under school age would not be able to enjoy the program because of the technical explanations given in the lectures.

## Tech Faculty Member Lectures In California

Dr. Thomas G. Manning of the Tech history staff is a visiting faculty member this summer at Claremont (Calif.) College, a graduate institution.

He is teaching two history courses: "American Scientific Thought in the 19th Century" and "Problem Approach to American History since 1850."

## Wanted

We want news. We can't offer you a monetary reward, but we can offer you the satisfaction and service of seeing your information in print.

If you have any item on the news side, whether it be an announcement of a party or dance or the report of a crime or anything between—call The Toreador, PO 5-8541, Extension 424, or PO 3-1773. Or just drop by and tell us in person.

Whatever the method — keep us in mind!

GUESTS LAST WEEKEND on the Rob Brown ranch near Throckmorton were Joe Winegar, mail and mimeograph employee; his son, Roy Winegar; Mike Jones and his father, Lewis N. Jones, Tech's dean of men. They caught about 18 fish, weighing

on the average of two pounds each. Other guests were David Thompson, Tech student body president 1957-58, and Wayne James, field secretary for the Ex-Students Assn. Rob Brown and his wife, Peggy, are former Tech students.

## Two Week Orchestra School Starts Monday

Texas Tech's Summer Orchestra School — which gets underway Monday — will be climaxed with a final concert July 12 at 7:30 p.m. in the Tech Union Ballroom, Paul Ellsworth, chairman of the school, has announced.

More than 150 intermediate and high school students have enrolled for the annual school that will have as a guest conductor Abraham Chavez, Jr., outstanding violinist, teacher and conductor from El Paso.

CHAVEZ IS NOW concertmaster and assistant conductor of the El Paso Symphony Orchestra.

All rehearsals will be held in Tech's Music Building where the high school orchestra will be playing Brandenburg Concerto No. 4 by Bach, Ellsworth said. He added that special tryouts will be held for high school violinist to play the solo violin part in the concerto.

OTHER HIGH SCHOOL rehearsals will include the Holberg Suite of Grieg and five pieces for strings by Hindemith, he said.

The intermediate orchestra will play "Overture to the Rival Sis-

ters" by Purcell and "Jig" by Arne.

MUSIC AND PRACTICE will not be all for students attending the school. Recreation plans include a swim party at the Sea Horse Swimming pool and a skating party at the Fair Park Skating Rink.

Ellsworth said that the parents and public are invited to attend the free concert to be held July 12 in the air-conditioned Tech Union Ballroom.

IN ADDITION TO CHAVEZ, the faculty of the Tech Summer Orchestra School will include Mitchell Zablony, concertmaster of the Lubbock Symphony and director of the Monterey High School Orchestra; Paul Lovett, outstanding professional musician and director of orchestra and band at Matthews Junior High in Lubbock; George Robinson, co-chairman of the Tech Summer Orchestra, distinguished violinist, and director of the Hutchinson Junior High Orchestra; Mrs. Katherine Wells, violinist, member of the Lubbock Symphony and teacher of strings in the Lubbock Public Schools; Mrs. Rowena Stennis, principal cellist with the Lubbock Symphony Orchestra and teacher of strings in the Lubbock Public Schools; Mrs. James Vickers, vio-

linist, member of the Lubbock Symphony and string teacher in the public schools, and Paul Ellsworth, chairman of the Tech Summer Orchestra School, director of the Tech Symphony Orchestra and teacher of strings at Tech, and Randall Raley, one of the original faculty members of the school.

## Dial Wins Scholarship

Iris Dial won the \$100 Panel-lic Scholarship for 1958-59 at Texas Tech.

This scholarship is awarded each spring to a Lubbock high school graduate.

Miss Dial graduated in the upper quarter of her class from Tom S. Lubbock and plans to major in psychology at Tech.

Some of us smoke as much as ever, but one sign of uneasiness is that we empty the ash tray often because we don't like the guilty sight of our indiscretion.

—Beckett News Letter

## Brunson Seeks Info

Bill Brunson, Texas Tech researcher and history professor, is seeking information concerning the Texas Land and Development Co. which played an important part in the agricultural development of the Panhandle and the South Plains.

The information gathered could be turned over to the Panhandle Plains Museum, or the Southwest Collection at Tech if the owner wishes. Brunson added that it is not necessary to keep the material, if the persons who have any material about the concern will allow Brunson to study useable material, it will not have to leave the owner's possession.

Brunson would like to see letters, diaries and pictures with mentions of the company and 1912 newspapers with any such mention.

The information when gathered would reveal how the Panhandle and South Plains developed.

## Shelden Teaches Fabric Workshop

New methods of creation in fashion and home decorations will be explored during four Tech workshops this summer, announced Dr. Gene Shelden, head of Clothing and Textiles.

Monday through Friday, a five-day study of fabrics will be given. Lessons will teach how fabrics are made and how they should be cared for.

Newer methods of clothing construction will be studied in a course given July 7-11, Dr. Shelden said she will emphasize short cuts and commercial techniques

that can be applied to home sewing.

Participants will learn how to make careful figure measurements and patterns.

The weeks of July 16 to August 2 will be used to teach creative design through drapery. Muslin and other fabrics will be used and participants will make dress forms and garments.

Upholstering furniture will be taught August 4-23.

Further information can be had by contacting Dr. Shelden in the Home Ec. Bldg.

## Museum Affords Pleasure For Visitors, Residents

Summertime, when the livin' is easy, means things are livelier than ever in the West Texas Museum at Texas Tech.

Vacation time brings a special flow of visitors, many of them from far away places, as Lubbockites and other South Plainsmen bring them by for a look at the Peter Hurd mural and many other exhibits that give an idea of what the area is like and has been like.

In addition, area people — who have seen the Museum's permanent exhibits many times — are in for a look at special art exhibits or a try at a summer short course.

Two such courses have been in action this past week.

Albert Mirovitch, famed Boston pianist, gave some special demonstrations in the Museum last week.

Mr. and Mrs. Charles Lindstrom of d' Young Museum in San Francisco have been conducting a South Plains Art Guild Workshop in the Museum. The course will continue through June.

Lindstrom is teaching adult classes in the South Plains Art Guild Workshop being held partly in the Museum. Mrs. Lindstrom is teaching the children's classes, which have more than 100 participants divided into five sections. The youngsters are painting objects in the Museum.

If you haven't been by the Museum recently, here's a quick survey of what's currently showing.

Feature of the historical gallery is a music box collection loaned by Mr. and Mrs. C. T. McLaughlin of Snyder. Nearby are the reproductions of early-day rooms in the area, a West Texas dugout house and a reaper.

The Life of the Plains gallery tells the story of the area from the days of Indians through those of Spaniards, cowboys and later farmers and other modern plainsmen.

Featured are exhibits on life of the Commanche Indians and cowboys. Of special interest to children is the story of Funny Feather, an Indian boy.

A focal point in the agriculture and water exhibit is a Eclipse windmill.

For Tech exes, there's a replica of a buffalo robe with the institution's history depicted on it.

Drawing attention in upstairs galleries are two art exhibits.

One is a collection of French prints from the post impressionist period. Loaned by Mr. and Mrs. Henry Speck of Lubbock, it features work by Picasso, Cezanne, Matisse, Miro and others. It will be in the rotunda gallery through June.

The other exhibit in the art gallery includes 25 prize-winning pictures from the American Watercolor Society.

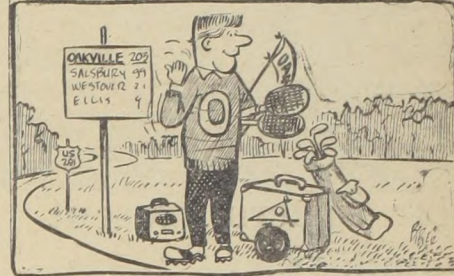

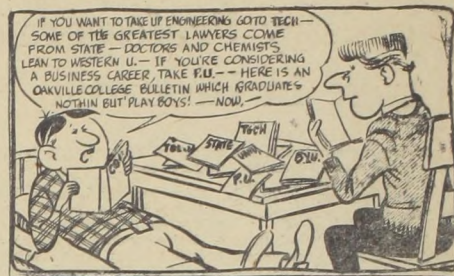

Painters represented with scenes from Maine to Mexico include Fred Whitaker, Greta Matson, and John Costigan.

A popular exhibit in the hall of natural history is "The Lord's Supper" done in mother of pearl.

The Museum also maintains a souvenir desk where brochures, post cards and other mementos of the area may be purchased.

## Branch Receives Check

A check for \$550 has been presented to the Lubbock Branch of the University of Texas Post Graduate School of Medicine for lectures its members gave for Texas Tech graduate students in vocational rehabilitation counseling. Dr. Robert Anderson, program director, has announced.

Dr. Sam C. Arnett Jr., dean of the Lubbock Branch, accepted the check from the U. S. Department of Health, Education and Welfare, in the name of some 30 medical and eye doctors in Lubbock.

Arnett said the funds will be used for furthering post graduate medical education in the West Texas area. Arnett, who has been dean of the Lubbock Branch for six years, also said that he is retiring from that post July 1. Dr. W. H. Gordon will be his successor.

Local doctors gave a series of 37 lectures on medical subjects ranging in scope from burns and cancer to speech defects and heart disease to Tech graduate students during the spring semester.

## Instructors Do Summer Research

While one member of the Texas Tech biology department is telling world scientists about his research in chromosomes this summer, other Tech biology faculty will be in field work ranging from the Canadian river to the East Coast.

Dr. J. C. Cross, Tech biology department head will present a paper on original research at the 15th International Congress of Zoology July 22 in London at the British Museum of Natural History.

FIRST OF THE TECH faculty to attend the Congress, Dr. Cross will tell more than 2,000 scientists about "Chromosomal Evolution in the Heteromyidae and the Geomyidae" (pocket rodents). The report will tell of his basic research in the number of chromosomes found in the tiny mammals.

Dr. Russell W. Strandmann, professor of biology, will be on the staff of the annual Institute of Acarology at the University of Maryland. The institute opened Monday and will continue through Aug. 1. This is the sixth year Strandmann, an authority on spider mites, has been on the institute staff.

DR. DONALD TINKLE is using an American Philosophical Society study grant to continue study of turtles in Louisiana and Florida. Tinkle is an assistant professor of biology at Tech.

Another assistant professor of biology, Dr. Vernon Proctor, will teach courses in algology and aquatic plants at the Oklahoma Biological Field Station this summer. This is the second summer Proctor has been on the University of Oklahoma staff at the station, located on Lake Texhoma.

## Tech Signs 4 Netmen

Tech's freshman tennis team should cause Raider net fortunes to look up as Coach George Philbrick has announced signing of four top high schoolers.

John Gottschell of Midland is one of them. He has won the Junior Davis Cup at San Angelo, the Midland Jaycee Tourney and the Waco Open. Gottschell is currently being honored in Sports Illustrated Magazine and in Texas Tennis Official Magazine.

The other newcomer is Gerald Breneman who is currently residing in Hawaii. Breneman has been the number one singles and doubles player for the past three years in high school tennis. He has been undefeated in high school sectional tennis. His parents teach in Hawaii.

Dale Milburne is another new addition to the tennis team. He is a graduate of Amarillo High School and has been in the singles finals in 4-A competition.

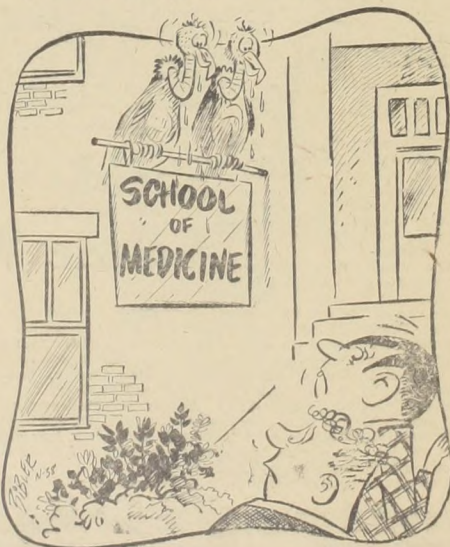

Another new addition is Weston Wolff of Odessa. Wolff has been doing a fine job in tourneys all over the state, according to Philbrick.
