

Brubeck Quartet To Give Concert Tomorrow Night

"Progressive" jazz specialists, the Dave Brubeck quartet, will appear tomorrow at 8:30 p.m. in Municipal Auditorium.

The nation-leading jazz group, which has won more honors in the last five years than any other group, is sponsored by the Double T Association.

Brubeck, termed a "progressive" or "radical" jazz musician, has in his quartet Paul Desmond, piano, clarinet and alto sax; Joe Morello, drums; and Norman Bates, string bass. Desmond is a musician in his own right, having many recordings of his own. Brubeck plays the piano.

Tickets for the performance are on sale in the Tech Union and at Jones Stadium. Prices are from \$1.50 to \$2.50 for students and from \$2.50 to \$3 for off-campus persons.

Born in a musical environment, Brubeck rebelled against any formal music education in his youth. Having a basic knowledge of "harmony" he began setting in with a local band.

At College of the Pacific, he switched majors from pre-med to music. Then after time in service, further education in music and experience as a jazz musician, Brubeck and his group was joined by Paul Desmond in 1951.

Since that time the quartet has been leading the nation in the jazz field. It has consistently had "sell out" records and gotten top ratings by music magazines.

"Our tasks as jazz improvisors is to translate emotions into a musical language which deepens our understanding and awakens our senses," Brubeck said of his style.

He also thinks of an audience as a co-creator. He attempts to unify the audience into an entity and then the "creative experience" can be shared.

Though specializing in "progressive" jazz, the quartet plays all types.

MR. JAZZ — Dave Brubeck, the leader in modern jazz, will give a concert tomorrow night in Municipal Coliseum. His "progressive" jazz has brought his quartet many honors during the last five years.

FOR ARTISTS COURSE...

Players Will Stage 'Hamlet' In Coliseum

Campus drama enthusiasts and theater lovers over the South Plains will have the opportunity Monday to view "Hamlet" as done by the famed Canadian Players, a professional group of Shakespearean actors.

They appear in the regular Artists Course series at 8 p.m. in the Municipal Auditorium.

The drama group, under direction of Douglas Campbell, is touring the Western world this season from Stratford, Ontario, birthplace of the renowned Shakespearean Festival of Canada.

Unique Costumes Styled

The group will present a contemporary aspect to a traditional drama. They achieve this effect by costuming, which combines modern and Elizabethan styles. The drama is offered with only the barest minimum of props and the whole stage atmosphere is set to be one of informal concentration on a well-loved subject.

The players themselves put much of their own personality into portraying the Shakespearean characters. William Hutt, who plays the title role of "Hamlet," is favorably reviewed as a really "different" type of dramatic artist. Tiny Frances Hyland is said to "electrify" audiences with her distinct interpretation of "Ophelia."

Now in their third tour of North America, the players have been praised by publications all over the continent.

"The Canadian production rivaled the Andrea Dorea, at considerably lower cost," was the comment of the Durham Morning Herald, Durham, N.C.

Cited By Times

Brooks Atkinson of the New York Times said of their plays, "the most exciting series of Shakespearean productions we have had in North America in modern times."

"One of the most rewarding experiences has been to witness the growth of skill in the richly talented young company," wrote John Beaufort of the Christian Science Monitor.

The Lubbock appearance of the Canadian group fills the cancellation in the Artist Course series by the Dublin Players who were unexpectedly called out of the country for a season of tours abroad.

Students will be admitted to the production on presentation of activity books or for \$1. Tickets for townspeople will be available at the ticket office for \$3, \$2.50 and \$1.50.

Tech Faculty Grateful For Salary Hike Petition

By DALE JOHNSON
Issue Editor

Tech faculty members are grateful to students for instigating a petition for teacher pay raises, but in general they feel that the document will have little immediate effect.

The petition was initiated by Circle K and already more than 2,000 names have been sent to the legislature asking for rectification of the discrepancy in salary rates of the University of Texas and Texas Tech. University instructors receive as much as \$2,000 more per year than do Tech teachers.

One of the faculty interviewed stated that of 18 state-supported institutions of higher learning in Texas, Tech ranked eighth in pay scale. Tech is the second largest college in the state.

Several members of Tech faculty were contacted by phone yesterday afternoon and asked their opinion on the teacher pay hike petition.

Consensus was that the petition would have no immediate effect on the legislature, since biennial budget recommendations already have been made. Some felt that the petition might have a far-reaching effect on morale of the legislators toward the issue.

Faculty members seemed to feel that, though they would be the beneficiaries of the action, they also are in no position, as state employees, to push for pay increases. Many expressed the idea that students and parents, as taxpayers, ought to bring influence rather than the faculty and administration.

All faculty contacted expressed gratitude toward the "genuine sympathetic understanding" the students have expressed toward the problem. As one man said, "It's nice to know that they care."

However, another faculty member cautioned that student movements accomplish practically nothing. To this he added that ex-student action is a different matter, and that through the taxpayers a change eventually may be wrought.

Some staff members related that faculty members were leaving Tech due to the low-salary situation. Instances were cited of a public school in Texas offering a salary to a person with a bachelor's degree and no experience that

(See PETITIONS P. 8)

Spring Candidates File For Election

Announcement yesterday afternoon that 44 persons have taken out petitions for Student Council and cheerleader positions has assured a wide-open political campaign on the campus, culminating in an April 10 election.

Thirty-two students have announced for positions on the council while 12 are running for cheerleader places.

Candidates have announced for three of the four executive offices of the Student Council. No candidate has announced for secretary.

All petitions must be signed and returned to the council office by 5 p.m. April 3. No campaigning will be conducted before that time.

Candidates for president and vice president must have 90 or more semester hours. Business manager, secretary and cheerleader candidates must have 60 or more semester hours to be eligible to run. Representatives must be enrolled in the division they are representing and have 30 or more semester hours. All candidates must be regularly enrolled in 12 or more hours.

David Thompson and Wick Alexander are the only candidates for president and vice president, respectively. Two students, Frank Jones and Don Ledwig, have announced as candidates for business manager.

Arts and sciences candidates are Gerald Myers, Johanna Zourmas, See ELECTION P. 2

'On The Town' Ticket Sale Starts Tomorrow

Advance ticket sale starts tomorrow for the 1957 Varsity Show, "On The Town," according to Dane Grant, ticket sales chairman.

Advance tickets for students are

Tuesday Is Deadline For Caps, Gowns

Tuesday is the last day for both seniors and faculty to order caps and gowns at Tech Bookstore. Orders for senior invitations should also be placed by that date.

It is also the last day for seniors to pay the \$5 graduation fee, if a diploma is to be received at June commencement. The student must take his cashier's receipt at once to the dean of his school.

Tuesday is also the last day for refunds on \$5 graduation fee to candidates who will not graduate on June 3. A student not graduating should notify his dean in writing.

75 cents and for non-students, \$1. Tickets at the door will be priced at \$1 for students and \$1.25 for non-students.

Tickets will be on sale in Tech Union daily and downtown at Hemphill-Wells, Dunlap's, and Sears-Roebuck.

The \$3,000 production is to be presented in Lubbock Municipal Auditorium April 12-13.

Members of the Varsity Show staff not yet announced are: Fred Griffin and Dan Pavillard, scenery; Ken Lockhart, stage manager; Martha Sue Bridges, costumes; and Harvey Mallory, lighting.

Several members of the "On The Town" cast gave an excerpt from the show for a Plainview High School assembly last week. They will present the same type of program for the Levelland Chamber of Commerce this week.

These trips are being made in the interest of advance ticket sales, according to co-publicity chairman Patti Hill.

SALARIES AND SIGNATURES — go hand in hand as Circle K petitioners seek names for their petition raising teachers' salaries. Signers left to right are Judd Hewlett, Bob Vaughn, Jerry Weinke, Don Avery, John D. Hays and Jim Childs. The 2,000 signatures already obtained were mailed to Austin early Tuesday.

Staff Photo by Harold Crews

WUS INTEREST LAGS...

Non-interest is throwing out the WUS program at Tech.

Not only non-interest from students, either, because that is to be somewhat expected in any campaign launched to raise money.

However, the only obvious interest shown so far in the 1957 program is being exhibited by about four students and two student organizations. They have had exactly NO cooperation from student leaders, faculty members or administration.

The World University Service is an all-student organization all over the world which has been backed at Tech for the last five years, but without a little backing from the powers-that-be, it will be impossible to continue it at Tech.

Tech WUS workers are not being allowed to put up containers in the women's dorms because "students don't want to contribute to everything that comes along." Still Knapp, Horn and Drane legislatures voted to contribute and participate in the WUS drive this year.

Workers in the Hungarian crusade placed containers in almost every available spot; KTTCC has literally sprinkled containers over the campus for the cancer drive—which is not even a student-sponsored drive, but a community-sponsored one. Has any program ever been deprived of placing containers over the campus and in the dorms before now?

Granted containers won't bring in a million dollars, but every little bit helps—the WUS goal is only a measly \$500. Compared to \$4,000 that Techsians raised for Hungarian relief, that's not much. And WUS money goes to further the education of students in many foreign countries, not just to one country's refugee relief.

WUS helps stimulate awareness among American students of their membership in the world university community. It presents an effective challenge and a concrete opportunity for demonstrating fellowship with students in other lands.

The four individual students and two organizations who are backing the WUS drive are to be highly commended, but by themselves, they will never reach the \$500 goal.

Will a lack of interest and cooperation stifle the WUS program at Tech?
—Joan Abel

Spring Fever Moves Into High Gear

Spring, the time a Techsian's fancy turns to romantic thoughts, is due to take its toll when the fever starts spreading.

First symptoms are when the Union becomes filled to overflowing at all hours and grade books are crowded with A's, which incidentally, aren't grades. An upperclassman stated his sentiments by saying, "I just want

to go out and drink a little beer, lie under a shade tree and kill time. I'll take a book along to lay my head on, and then think subconsciously how I'm going to pass the next quiz."

The spring fever bug plays no favorites; it bites coeds also. A beautiful young lass said flatly, "I don't like to go to class because it's too confining. I like to be outside swimming, playing golf or picnicking."

Her companion was brief, but more concise. "I like to spend all my time with my steady."

"To me, spring is an insight to a goal — getting the heck out of here for a few months," says a typical married veteran.

A West Hall protegee relates that he likes to lie in the sack and sleep, then in the afternoon pick up a Drane Hall doll and go to Mackenzie Park and just take it easy.

The average student representative says, "Springtime makes me drowsy and lazy. I like to lie around, drink a few beverages, take no exercise at all, and look at the women passing by. I hate to go to class because I can't stay awake."

An instructor summed things up by saying, "Spring is when the teachers can't teach or the students don't study. I don't know which."

Placement Service Has Teaching Jobs

Current teaching opportunities in Latin America have been announced by The Placement Service.

March listing of vacancies in American-sponsored bi-national, non-profit schools in Latin America is on file.

Openings include the following fields: administration, mathematics, science, English, elementary education, physical education, music, library work, kindergarten.

Most of these positions open during the summer as of Sept. 1, although in one of two cases the school year runs from May 15 to March 1.

Persons interested should inquire about applying through the Committee on Latin American Teaching Opportunities at Tech.

LITTLE MAN ON CAMPUS by Dick Bibler

TECHSANS TALK BACK

More thanks for the copy of the petition and the note that you sent recently relative to the salaries of professors at Texas Tech and the University of Texas.

Certainly, it is gratifying to know of the interest being shown among the students at Texas Tech regarding this matter. For many years, as a legislator and as a private citizen, this has been a problem on which I have done a great deal of work.

It is difficult to understand why professors at the University of Texas would be paid so much more than those at Texas Tech or any other institution of higher learning, and we hope that these matters can be adjusted satisfactorily to all concerned during this session.

I would like to assure you, in the event there is not enough money available to put into effect

the necessary increases in salaries, that I, as your State Senator, will work and vote for an additional tax with which to make better salaries possible.

Again, many thanks for your letter, and please feel free always to contact me when I can be of service.

Sincerely,
Preston Smith
Senator

Rodeo Team Sets N.M. Competition

Tech's rodeo team will see action April 12 through 14 at New Mexico's A&M's 12th Annual Intercollegiate Rodeo in Las Cruces.

Team members and events they will enter are: Brandon McReynolds of Andrews, riding bareback broncs and bulls; Dave Hopper of Lubbock, entering steer wrestling, bareback, saddle bronc and bull riding; Tom Neff, calf and ribbon roping and bulldogging; Bill Baker of Rocksprings, riding bulls and saddle broncs; Bill Phinizy of Lamesa, entering the calf and ribbon roping contests; and Ray Bunnell of San Angelo, riding saddle broncs, bulls and bareback broncs.

Accompanying the team will be two alternates and sponsor Koy L. Neeley, associate professor of animal husbandry.

FACULTY BABY CONTEST TO AID WUS CAMPAIGN

Faculty Baby Picture contest, sponsored by the World University Service, is set for today and Thursday in the Union.

Students and faculty may vote for the prettiest boy and girl baby for one cent a vote at the polls set up by Junior Council members. Proceeds go to the fund, according to Shirley Hamlett, chairman.

Winners will be announced at Thursday's Hospitality Hour.

Theme Revealed For Open House

"Home Economics: A Double Future" will be the theme for this year's Tech Home Economics Open House, April 12-13.

Approximately 3,000 invitations will be sent out this week for this 20th annual event.

Work of the 900 students enrolled in the School of Home Economics will be displayed in exhibits of home economic education, clothing and textiles, food and nutrition, child development, applied arts and home management.

Displays will emphasize the application of a home economics education in the home or in a profession. Objectives of the show are to interest students in other majors to take home economics courses and to show the public what the field offers.

Those heading committees are Gwendolyn Gowens, Lubbock; Martha Benn, Abernathy; Barbara Smith, Lubbock; Jorene Clement, Amarillo; Dixie Howell, Hixon; Priscilla Baumgardner Jacobson, Lubbock; Shirley Larser, Pampa; and Yvonne McDaniel, Memphis.

Dean Leaves For Education Meet

Dr. Willa Vaughn Tinsley, dean of home economics, left today for Washington, D.C., to participate in the National Conference on Nutrition Education.

Dean Tinsley will speak on the "Problems, Strengths, and Weaknesses of Nutrition Education at the Elementary School Age" during the first session April 1. She will serve as summarizer of evaluation on the last day of the conference, April 3.

This is the second such conference at the national level called by the Nutrition Programs Service of the United States Department of Agriculture and the Interagency Committee on Nutrition Education and School Lunch.

Dean Tinsley also took part in the first conference, called by the War Food Production Board in the early part of the war, at Terre Haute, Ind.

TOREADOR

The Toreador, student newspaper of Texas Technological College is regularly published each Tuesday, Thursday and Friday on the campus at Lubbock by the associated students of the College, and is financed by student activity fees, advertising and subscriptions.

Tech Hosts Clinic; Grasilneck To Speak

Dr. Harold B. Grasilneck, instructor in psychiatry at Southwestern Medical School of the University of Texas, will be principal consultant for the diagnostic clinic on "Medical Health In Democratic Leadership" to be held on the Tech campus Friday.

Speaking of the purpose of the conference, Dr. Robert Anderson, assistant professor of psychology, and a conference coordinator said

discussion will center around how groups can be made healthy.

"People feel certain needs in a group and yet programs in clubs often are not geared to meet their needs. The result is that only a few people take part and feel that the group is meeting their psychological needs," Dr. Anderson stated.

The conference, one of several scheduled for the area this spring, is open to any person interested in problems of program planning, Dr. Anderson said. All groups are continually faced with the problem of how to stir members into active participation, he continued.

"It is a sign of mental health to have sound, balanced interest-provoking programs in all kinds of organizations," stated Dr. Per Stensland, adult education department head and also a conference coordinator.

Grasilneck also will advise the Tech psychology department in the improvement of its program in counseling psychology.

Registration for the clinic begins at 9 a.m. and the morning session will begin at 9:30 in the Union workroom. The meet will adjourn at 4:30 p.m.

Dr. Anderson issued an invitation to any campus clubs to attend the conference.

Engineers Discuss Research Institute

Formation of an Engineering Research Institute on campus was discussed last weekend at a meeting in the Union attended by representatives of industry, science and Tech officials.

Purpose of the organization would be to further Tech's service to industry and the nation.

Goals for this organization would be: better communications between industry and technological education; research accomplishments to stimulate area and statewide growth; an adequate supply of high-level trained personnel; and support of an outstanding staff.

Such an organization would offer to industry a continuing supply of top grade engineering graduates who have had experience in research and an enlarged operation to provide talent and facilities for contrast research.

The institute would also offer conferences for exchange of ideas, discussion of current problems and information on results of a program of basic research. Another advantage would be a place to center research in problems of community interest as well as statewide and national problems.

'Mighty Casey' Rehearsals Scheduled For Friday Night

Rehearsals begin Friday night for Schuman's operetta, "The Mighty Casey", by a nine voice cast selected last week by the music department faculty.

Student directors for the production, to be presented May 6, 7

and 8, are Bruce Jackson and Kay Adkins. Newly chosen cast members include Carl Mathis, playing Thatcher; Cecil Morris, portraying a baseball fan; and Chuck Pijan, playing Charlie in place of his brother Brett.

Paris are still open for a few girls for the dance team. Those persons already chosen for the team include Clyde Carroll, Ken Prickett, Stan Powers, Carlton Holloway, Lynetta Jacobs and Mariana Wilson, choreographer.

Mu Phi Epsilon Members Present Original Composition Recital Tonight

Thirty outstanding feminine voices will be raised in song Friday evening as members of Mu Phi Epsilon, national music sorority, present a recital of original compositions by distinguished sorority alumni and members.

Under direction of Sandra Hemmle, the presentation is scheduled for 7:30 in the Music Building Recital Hall.

Program will feature vocal soloists, Carol Schultz Carther; Louise Crook, Sarabeth Simpson and Dorothy Pijan as well as two compositions by Tech students: "How Do I Love Thee?" by Roberta Elliott and "I Hate Classical Music" by Carole Jean Delaney.

Another highlight of the evening will be an instrumental ensemble composed of Glenda Harris, flute; Kathy Veazey, clarinet; Jean Pipkin, viola, presenting "Hebraic Poem" by Mary Jean van Appledorn, assistant professor of music. Miss van Appledorn will accompany the group at the piano.

The rest of the recital will be composed of choral members accompanied by pianists Jan Higinbotham and Patsy Pence. The recital is open to the public without charge.

The sorority glee club will sing "Invocation" and "Awake, O Zion" accompanied by Miss Higinbotham at the piano.

Next on the program is "Hebraic Poem." After "Hebraic Poem" Miss Carther will sing "October Wind," "Realization" and "To A Gypsy." Miss van Appledorn will be at the piano.

Intermezzo for "Two Pianos" will be played by Yvonne Skinner and Miss Elliot. Louise Crook will sing "I Hate Classical Music," accompanied by Miss Delaney. Miss Elliott will accompany Miss Simpson in "How Do I Love Thee."

Miss Pijan, supported by the glee club and accompanied by Miss Higinbotham will present "Niche Dub Song," a characterization piece, will be sung by Miss Crook. "Mu Phi Epsilon Creed" and "The Triangle" presented by the glee club, will end the program. Miss Pence will be at the piano for the final numbers.

Librarians Attend Dallas Convention

Three Librarian delegates are attending a Texas Library Convention in Dallas.

Due to return Saturday are: Frank Temple, catalog librarian; R. C. Janeway, librarian and Mrs. Laura Willwater, order librarian.

The convention gives professional librarians a chance to meet and discuss library problems. Each group of delegates may present a paper of proposed changes of the present library system in any form.

Temple will present a paper entitled, "The Effects of Purposed Changes in Cataloging on Texas Tech." This will establish a plan to simplify the catalog and make it more useful.

The paper edited by Temple will appear in the Library Journal.

Students Present Afternoon Recital

Presented in a Sunday afternoon junior recital at 2:30 in the Music Building Auditorium will be Richard Watkins, baritone, and Yvonne Skinner at the piano.

Watkins will sing a medley of Italian compositions: a Mozart aria, a romantic repertoire including music of Schumann and Brahms; and a series of American tunes by Williams and Brahms; a series of American tunes by Williams and Bridge.

Miss Skinner will play a Chopin Nocturne; "La Cathedrale Engloutie," Debussy; and the second movement of "Sonatine" by Ravel.

40 Tri Delt's Return Home

Delta Delta Delta sorority returned to the campus Tuesday afternoon after being snowbound for almost four days.

Forty members and three sponsors of the sorority had been attending the Tri Delt spring retreat in Ceta Canyon near Happy, when the blizzard brought snow and freezing weather to the South Plains.

The back room of the chapel in Ceta Canyon housed the group. Even though they were snowbound, the girls were never uncomfortable from the cold or lack of food, said Kay Liner, a representative of the group.

The Highway Department and the Tri Delt chartered bus reached the girls Tuesday morning. Highways had been cleared by snowplows Monday night. The group had to climb out of the canyon to reach the bus.

POSITIONS AVAILABLE ON PUBLICATIONS

Students interested in a position on the Toreador or La Ventana should turn in their application to the Publications Committee immediately.

Union's Fourth Anniversary Celebrated During March

By NITA HEDLESTON
Toreador Staff Writer

"Let's go to the union" is a common statement on the campus. The Student Union building, which this month celebrated its fourth anniversary, is a popular gathering place for both students and faculty members.

The modern interior of Tech Union houses many campus activities and many school organizations take advantage of its meeting rooms and large ballroom.

Usually all of the tables are full so it's necessary to locate a friend and join him at his table. Most of the tables are crowded with as many chairs as possible to go around them.

But the Union is not only a gathering place for students. There are innumerable activities which keep the building humming both day and night.

The Union Program Council has various committees designed to plan activities to interest every student. Well-known movies are shown every Monday night in the Union ballroom, dances are held on Fridays, exhibits attract a great deal of interest in the Union lobby and other things such as lectures

by world travelers and a Toastmasters Club are sponsored. Even square dancing is held for those who enjoy it.

Tech Union has come to be a place where students can relax and enjoy themselves. Just off the lobby they can find plenty of soft chairs with all the latest magazines near by. There is also a television set which is kept going full blast most of the time. Often a group of students are gathered around the piano playing and singing.

Something just added to the Union program is the Raider Revue held each Sunday afternoon. Since supper is not served in the dorms on Sunday night, students can go to the Union and eat and be entertained at the same time. Each week a different program made up of campus talent is offered.

Besides the regular Friday night dances, fraternities and sororities use the ballroom for many of their large dances during the year.

There is always something going on at the Union. It may be the meeting of a fraternity or sorority or a convention of chemical experts.

"A big company works for me..."

JOHN D. EVANS, University of Pennsylvania, 1952

"I began working on a training program for General Electric in the summer of '52. Right now, I'm 'Employee and Plant Community Relations Manager' of my company's new plant in Burlington, Iowa. One of the advantages I found in working for a big company such as General Electric is that, because of its size, it is able to give me, and other college-graduate employees like me, a wide variety of training and experience in any one of 159 plants all over the country. Through an extensive on-the-job training program, it is providing me with the opportunity to become one of the top men in my field, and I know that as long as I apply myself to each job, I'll keep moving up. The way I look at it, General Electric is helping me help myself. That's why I say I'm working for a big company, but a big company works for me, too."

size. 27-year-old John Evans is just one example of the thousands of college graduates at General Electric, each being given the opportunity for self-development so that he may grow and realize his full potential.

As our nation's economy continues to expand in the years ahead, thousands of young people of leadership caliber will be needed to fill new positions of responsibility in American industry. General Electric feels that by assisting young people like John Evans in a planned program of personal growth, we have found one way of meeting this need.

A Manager of Employee and Plant Community Relations at General Electric holds a responsible position: he handles employee benefits, health and safety, training, wage and salary administration, and community relations.

Campus Organizations Schedule Social Weekend

Dances and trips are the main events to be sponsored by campus organizations this weekend.

KAPPA ALPHA THETA

Kappa Alpha Theta's spring dance will be a "Bridley Murphy Dance" tomorrow at the Caprock Hotel from 8 to 11 p.m.

It is a "come as you were" costume dance, and best costumes will be chosen. Decorations will be tombstones with black silhouettes and epitaphs of the members.

Playing for the dance will be the Kingsmen Combo.

In charge of the dance is Carolyn Tapp, social chairman, and the arrangements committee. Members of the arrangement committee are Beverly Gentry, Judy Gristy, Beverly McCormick, Carolyn Wilmeth, and Penny Randal.

CIRCLE K

Eight Tech Circle K members will attend the Texas and Oklahoma Circle K District Convention at Baylor this weekend.

This convention is an annual affair at which 18 Texas and Oklahoma colleges and universities are represented. Business at the convention will be to elect officers and set up a program for the coming year for collegiate Kiwanians.

Attending the conference from Tech will be Don Avery, district lieutenant governor, Dave Burger, Jim Chiles, Judd Hewlett, Don Ledwig, Joe Stephens, Howard Wallace and Talmadge Wright.

The Tech group will leave Friday with the Wayland representatives to the conference.

MILITARY BALL

Ticket sales for the annual Military Ball, which will be held April 13 at Tech Union Ballroom, will begin Monday.

Tickets will cost \$1.50 per couple, and all Tech students may attend. The semi-formal affair is sponsored by Scabbard and Blade, honorary military organization.

ALPHA CHI OMEGA

Alpha Chi Omega will have its dinner and dance at the Palm Room. The dinner will begin at 6:30 p.m., and the dance is scheduled from 9 until 11.

Alpha Phi's dance is to be at the Hillcrest Country Club. The dinner is set for 6 p.m., while the dance will be from 9 until 11.

PHI GAMMA DELTA

Phi Gamma Delta fraternity will also have its annual retreat at Ceta Canyon Saturday and Sunday.

Speaker will be E. J. Tarbox, Tech graduate and student at Baptist seminary in Fort Worth. Remainder of retreat will be used for discussion groups about various phases of fraternal life.

Grades Deadline Set For Saturday

Mid-semester reports from instructors are due in the Registrar's office Saturday by 5 p.m. W. J. Clement, Registrar has announced.

Grades will be released to students next Thursday, Clement said.

Charm Courses Continue; Union Sets Hoedown, 'Strutter's Ball' Socials

Charm courses, square dancing and ballroom dancing will head the list of Union activities tonight and tomorrow.

"Hoot Owl Hoedown" will be the square dance in the Rec Hall at 7 tonight.

George Hughes and the Fiddle Masters will play for the dance. Intermission entertainment will be provided by a square dance club from Puducah.

Third in a series of programs by the Tech Charm School will be held tonight from 7 to 8:30 o'clock. The school, which is divided into Esquires, Inc. for men and Charm, Inc. for women, has been designed especially for the benefit and instruction of Tech students.

Mary Louise Riley of the Merriam School of Business will present the program for the Esquires tonight. Previous programs featured correct dress and business etiquette, given by Hemphill-Wells and Marion Sanford. The Esquires will meet in the Tech Union Ballroom.

Program on cosmetics and make-up will be given by a representative of Luzier Products for the Charm, Inc. meeting. Last week a program on hair styles was given by Orene of Lubbock and the week before feature a program on modeling by Eugene Bandzevicus. Tonight's program will be held in the ballroom lounge.

Last week over 200 persons were present for the charm courses. Peggy Malinak, chairman of the Hospitality Committee which sponsors the event, says that even greater attendance is hoped for tonight.

Kay Carter will furnish the music for the "Darktown, Strutter's Ball" in the ballroom tomorrow from 8:30 to 11:30 p.m.

The Bowman Brothers will be featured during intermission at the Friday night dance.

Phi Gamma Delta Sponsors Olympics

Have you ever wanted to attend the olympics? The "Fiji Olympics" will be held Saturday April 6 at 2 p.m. on the lawn in front of Drane and Horn Halls. Major attraction of the olympics, which is sponsored by Phi Gamma Delta is the invitation to all women's organizations on the campus, except the Major-Minor Club, to participate.

Events in the feminine version of the olympics include tug-o-war; 3-leg race; towsack race; egg toss; egg balance; pie plate discuss throw; pogo stick race.

A large traveling trophy will be awarded to the team winning the meet. This trophy must be won three times to be kept permanently. Plaques will be given to the teams winning first and second. Entrance forms should be handed in as soon as possible to Duane Miller in Gordon Hall or mailed to Fiji Olympics, Box 4006, Tech Station.

First Place Ties In Softball Tourney

There are ties for first place in both of the women's softball leagues, according to the last scores compiled.

Pi Beta Phi with three wins and no losses is tied with Horn who has two wins and no losses. Kappa Alpha Theta with three wins and no losses is tied with Knapp who has three wins and one loss.

Results of today's games are Delta Gamma 14, Alpha Chi Omega 17, and Knapp Hall 13, Alpha Phi 0.

Results of games played March 26—Kappa Kappa Gamma 15, Alpha Phi 10; Kappa Alpha Theta 12, Knapp Hall 9; Alpha Chi Omega 8, BSU 4.

No games has been scheduled for Thursday.

Friday's schedule is—Zeta Tau Alpha vs. Pi Beta Phi; Sigma Kappa vs. Casa Linda; Delta Delta vs. Horn Hall; and Delta Gamma vs. Kappa Alpha Theta.

Monday games are—Gamma Phi Beta vs. Casa Linda.

Tuesday games are—Zeta Tau Alpha vs. Horn; Sigma Kappa vs. Delta Delta Delta.

THE PULSE-POUNDING SAGA OF DE WITT CLINTON, AMERICAN

Let us today turn our eager young minds to the inspiring story of De Witt Clinton, one of the greatest figures in American history and—unaccountably— one of the most neglected.

He taught Phonetic English to 12 million Indians

De Witt Clinton (sometimes called Aaron Burr) first made himself known to fame in 1756 when Governor William Penn commissioned him to survey the forests of the Western Reserve. (One is inclined to wonder what in the world Governor Penn could have been thinking of, for De Witt Clinton was eighteen months old at the time.) However, the little chap did remarkably well. He surveyed as far west as Spokane, teaching phonetic English to more than twelve million Indians along the way, and then, tired but happy, he became Johnny Appleseed.

Later, he became a keelboat and sailed home to enter politics. He tried to join the Greenback Party, but his back wasn't green enough, so he joined the Whigs.

He was offered the Whig nomination for the presidency, but declined with the celebrated statement: "If nominated I will not run; if elected I will not serve."

But the Whigs only nudged each other and said, "That old fox, he's just playing hard to get." So they nominated him anyhow, and sure enough he did not run, but he was elected anyhow, and sure enough he did not serve. In fact, he was elected to a second term, which he also did not serve. However, only a few top Whigs knew there was nobody in the White House. The rest of the country thought that the President was confined to his room with a wrenched knee. For a while people sent "Get Well" cards, but soon everyone forgot and turned their attention to important matters like opening the west, inventing the buffalo, and the Black Tom Explosion.

After two terms as President, De Witt Clinton entered Yale and took up smoking. He tried several brands of cigarettes until he found the one brand that pleased him in every particular—Philip Morris, of course!

(You knew I was going to say that, didn't you? Well, of course you did, especially if you are a Philip Morris smoker, for if you are, you know what a sweetheart of a smoke Philip Morris is—how full of rich, natural flavor, how natural and mellow, how long size and regular. And if you are not a Philip Morris smoker, you've got a treat coming. Light one soon. Light either end.)

Upon graduation from Yale, De Witt Clinton became commissioner of baseball and smoked and loved Philip Morris Cigarettes for the rest of his long and distinguished life, and when at last he was called to his reward, his friend Old Hickory (Daniel Webster) stood up in the Senate and said, "How sad that De Witt Clinton must now be forever separated from his beloved Philip Morris!"

"Nay!" cried Pitt, the Elder (Henry Clay), bounding to his feet. "We need not separate De Witt Clinton and Philip Morris. I know how to keep them together always!"

And, sure enough, if you will look at the blue federal tax stamp on your pack of Philip Morris, guess whose picture you'll see. De Witt Clinton's! That's whose!

© Max Shulman, 1957

The makers of Philip Morris, who bring you this column each week, don't subscribe to Old Max's historical data, but we sure admire his taste in cigarettes. You will too. Try a new natural Philip Morris today!

LEARN WHILE ASLEEP!

At last science has found a way for you to learn languages, vocabulary, facts, figures, memorize lessons—all while you sleep. TECH NETTERS — Pictured above is the 1957 Red Raider tennis team, which goes after its fourth win of the season this afternoon at Canyon against West Texas State. In the front row are: freshman Bill Pfluger of Eden, junior Dick Spiers of Kermit, freshman Bob Macy of Carol Gables, Fla., and sophomore Johnny Kniffen of Clyde. In the back row are: Coach George Philbrick, sophomore Scott Cantine of Amarillo, junior Billy Edd Gowan of Wichita Falls, and junior David Kent of Amarillo. The varsity, all returning lettermen, took victories over North Texas, Texas Christian, and Southern Methodist last week. Border Conference runners-up last year, the Raider netters' only loss was to East Texas in their season opener.

Raider Netters Play WT

Tech's Red Raider tennis team resumes play this afternoon in Canyon, when Coach George Philbrick's netters take on the West Texas State Buffs in the first meeting of the two teams this season.

The Raiders are now 3-1 for the year, thanks to a successful road trip last week, in which they swept three matches, blanking North Texas State and Texas Christian, 7-0, and SMU, 4-2. In the first two meets last week, only one match went beyond straight sets, as Tech played heads-up tennis.

Billy Edd Gowan will be playing No. 1 singles for the Raiders this afternoon. Gowan lost his first match of the season Saturday at SMU, bowing to the Mustangs' Matt Merphy, 7-5 and 6-4. In his previous three matches, Gowan had been extended to three sets on only one occasion.

Playing No. 2 singles for Tech will be David Kent. With a 2-2 record, Kent was the other Raider loss to SMU, extending his opponent, Hayden Schilling, to three sets before losing, 3-6, 6-3, 6-3. Kent's two victories have been in

straight sets.

Tech's No. 3 singles player is Dick Spiers, who has a fine 3-1 mark for the year. His only loss was in his first match of the season, when he extended Tom Haney of East Texas, 4-6, 9-7, 10-8. Spiers has been extended beyond two sets only one time in his three wins.

No. 4 singles are being handled by Johnny Kniffen, who also has a 3-1 match record. Kniffen's loss also came against East Texas, and his three victories have all been in straight sets.

SHULTON New York • Toronto

Tech Nine Will Play Cowboys Twice

The varsity baseball team will meet Hardin-Simmons at Abilene Friday and Saturday. The baseballers carry a 1-2 record into the game.

Righthander Leo Chase, who beat the Cowboys 11-2 last week, will face the Cowboys Friday. Coach Beattie Feathers will send Houston Powell against the Cowboys Saturday.

Having lost to Texas Christian in the season opener, 4-2, Chase has a 1-1 record. Powell lost in his only start 17-5 against TCU.

Walter Bingham, first basemen, is the leading hitter with five hits for 12 trips to the plate for a percentage of .417. Catcher Cullen

Hunt is four for 11 for a .364 average.

Frosh Notch Fifth

The frosh baseball team won its fifth straight game 3-2 over Odessa JC yesterday as Billy Tombs went to the mound as a relief hurler to notch the win.

Rob Hill sewed up the game in the top of the sixth when he singled Bruce Boyd home from second. Hill paced the Picador hitting attack with two singles and a double. Tech committed four errors and gathered seven hits.

Odessa JC garnered three hits while committing two errors.

Beattie Illustrious

By BILLY EDD GOWAN

Toreador Feathers

Beattie Feathers, head coach and assistant football coach, had an illustrious wonderful world of

All-American and 10-time All-American honors have been bestowed upon Beattie Feathers for his football coaching. The All-American came in 1933, in his senior year at the University of Tennessee.

The following year he led the Chicago Bears to a professional football record of 13-0-1, a record which stood until 1935 when it was broken by Steve

Named to Hall of Fame

Feathers, who coached the famous Bronko Nagurski pro football team for seven years, playing in 1947. His fine professional record led to his being named to the Pro Football Hall of Fame in 1955. He coached the Chicago Bears to a 13-0-1 record in 1935.

What might have been an impressive baseball career somewhat hampered by a shoulder injury caused him to play in 1934. Feathers played with the Chicago Cubs, but he had a shoulder injury that kept him out of the game until 1936. He played for Knoxville of the Southern League in 1936, and was with the Jackson team in 1938-39.

In 1941-42 Feathers coached at Appalachian State University. In 1943, when he was in 1943, when he was manager at Kings Appalachian League.

The hall-of-famer North Carolina State became head football coach in 1944. His 1946 and 1947 teams led the nation in defense for eight years, leading the Ft. Jackson team before coming to Tech in 1954.

Head Coach in 1954

Feathers was named head coach here in 1954. He resumed the sport after many years. He 1956 had the first winning season of the school's history, with a record of 8-1 and losing seven games.

This year for the first time in his career Feathers has divided his time between coaching a freshman football team, with the hope that baseballers can play

'Mural Chosen'

Decided To

The Athletics will play Phi Delta at eight this afternoon in the college intramural championship.

Phi Delta Theta made by defeating the Phi Kappa Phi team 65-57 Tuesday. Monday and Dennis Atkin made by defeating the Phi Kappa Phi team with 11 points, followed by Brewer with 9. Higley for the All Stars Hester with 9 points, and Don Lu with 8 points.

The Athletics drew the finals after defeating Phi Delta in a 37-35 overtime game. The All Stars Hall in another semifinal game, 38-37. Phi Delta became champs with over SAE.

In the championship Delta will start Monday. Dennis Atkin, and Dennis Calbert.

The Athletics will play Panagan, Bob W. Clark, Bill Turnbow, and Lerma.

Beattie Feathers Has Had Illustrious Sports Career

By BILLY ELLIS

Toreador Feature Editor

of the Southwest Conference in the near future. Helping Feathers

Beattie Feathers, head baseball and assistant football coach, has had an illustrious career in the wonderful world of sports.

All-American and Hall of Fame honors have been bestowed upon Feathers for his football achievements. The All-American selection came in 1933, in his senior year at the University of Tennessee.

The following year, while playing for the Chicago Bears of the National Football League, Feathers set a professional record in rushing, with 1,800 net yards. The record stood until 1948, when it was broken by Steve Van Buren.

Named to Hall of Fame

Feathers, who teamed with the famous Bronko Nagurski, stayed in pro football for the most of seven years, playing from 1934 to 1940. His fine professional and collegiate record led to his selection in 1955 to Football's Hall of Fame, the highest honor that can come to a grider in the United States.

What might have been an equally impressive baseball career was hampered somewhat by a bad shoulder caused from his football playing. In 1934 Feathers earned a tryout with the Cincinnati Reds, but the bad shoulder kept him out until 1936. He played the outfield for Knoxville of the Southern Association League in 1936-37, and was with the Jackson, Miss., team in 1938-39.

In 1941-42 Feathers coached baseball at Appalachian State. His last year of actual competition was in 1943, when he was player-manager at Kingsport in the Appalachian League.

The hall-of-famer went to North Carolina State in 1943, and became head football coach there in 1944. His 1946 and 1947 teams led the nation in defense. Feathers was head coach at N. C. State for eight years, leaving in 1951. He coached the Ft. Jackson, S. C. Army team before coming to Texas Tech in 1954.

Head Coach in 1954

Feathers was named head baseball coach here in 1954, as Tech resumed the sport after a lapse of many years. His 1956 Raider team had the first winning record since resumption of the sport, winning eight and losing seven.

This year for the first time Feathers has divided his squad, having a freshman and a varsity team, with the hope that Tech's baseballers can play as a member

as assistant baseball coach this year is Paul Orlosky, former minor league. Born on Aug. 20, 1909, in Bristol, Va., Feathers attended high school and played his first football at Bristol High. He is married to the former Inez Williams. The Feathers' have three daughters: Betty Jane, Marla Lynn (a freshman at Tech this year), and Brenda Inez.

"What's it like to be in

BUSINESS ADMINISTRATION AT IBM?"

Two years ago, Robert Everett asked himself this question. Today, as Administrative Assistant to the Divisional Controller, Bob reviews his experience at IBM and gives some pointers that may be helpful to you in taking the first, most important step in your business career.

"What's it like to work for a big, expanding company like IBM? What would I be asked to do? Would I get ahead fast?" These were some of the questions that filled Bob Everett's mind as he faced up to the big problem, "How can I put my M.B.A. training to the best possible use?"

Bob came directly to IBM from Cornell in July, 1955, with an M.B.A. in finance. He was immediately assigned, with twenty-nine other M.B.A.'s, to a Business Administration training program. This six months' program comprised general orientation in the entire IBM organization, a six weeks' field trip to the

Developing a new system

Syracuse branch office and several months at the Poughkeepsie manufacturing facilities. There he gained a functional knowledge of IBM machines, particularly the 700 series of giant electronic computers.

His training completed by January, 1956, Bob was assigned to the Methods Department as a Methods Analyst at IBM World Headquarters in New York City. Here, with the cooperation of operating department personnel, he worked on the development of systems and procedures for the various Division areas. In addition to normal methods techniques used in developing systems and procedures, he studied these projects in terms of possible machine application for either IBM high-speed giant computers or conventional accounting equipment. One project was the study of the Machine Ordering procedure with the objective of simplifying and mechanizing it and at the same time improving the source information to provide for a more complete analysis of sales and production backlog.

Filtering out the "hot" projects

Promoted the same year

By December of the same year, Bob was promoted to his present job—Administrative Assistant to the Controller of the Data Processing Division. "The first function of an Administrative Assistant," says Bob, "is to filter out the 'hot' projects from those that can be handled later. You follow through on projects assigned by the controller and keep

Keeping the boss posted

him posted on their progress." Bob's new position affords a pleasant diversification of work: charting divisional responsibilities of the controller's function . . . plans for decentralization . . . costs of regionalization . . . summarizing key financial and statistical information for presentation to top management.

Bob points out that there are many areas in Business Administration at IBM for men with an M.B.A. or a B.S. in accounting: corporate, general, and factory accounting; internal audit; methods; payroll and taxes. Administrative and management positions constantly open up at World Headquarters, IBM's 188 branch offices, many plants and laboratories.

Why Bob picked IBM

Bob made a careful study of existing opportunities before selecting IBM for his career. He had a dozen campus interviews; took nine company tours. IBM's M.B.A. program interested him—because, as he says, "It gave me a chance to review the entire company before starting an actual line assignment." He was intrigued by the increasing use of data processing equipment in finance and he knew that IBM was a leader in this field. Salary-wise, he found IBM better than many, but it was company growth potential that motivated his choice. "Opportunity certainly exists

"Opportunity certainly exists at IBM"

at IBM," he says. "Growth factors alone will account for many new executive positions. A second factor is the trend toward decentralization, which also creates new jobs. These factors, plus IBM's 'promote-from-within' policy, add up to real opportunity."

IBM hopes that this message will help to give you some idea of what it's like to be in Business Administration at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists, mathematicians and Liberal Arts majors in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Sales Assistance. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of College Relations, Mr. P. H. Bradley, will be happy to answer your questions. Write him at IBM, Room 10002, 690 Madison Ave., New York 22, N. Y.

'Mural Champions Decided Tonight

The Athletes will play Phi Delta Theta at eight this evening for the college intramural basketball championship.

Phi Delta Theta gained the finals by defeating the All Stars 45-35 Tuesday. Monroe Henderson and Dennis Atkins led Phi Delta with 11 points, followed by Vernon Brewer with 9. High point man for the All Stars was Wendell Hester with 9 points. Morris Scales and Don Lucy had eight points apiece.

The Athletes drew a bye into the finals after defeating Gordon B in a 37-35 overtime semi-final game. The All Stars beat Sneed Hall in another semi-final game, 39-37. Phi Delta became fraternity champs with a 39-37 win over SAE.

In the championship game Phi Delta will start Monroe Henderson, Dennis Atkins, Vernon Brewer, Dennis Calbert and Clayton Cook.

The Athletes will start—Charles Flanagan, Bob Wittick, Jim Clarke, Bill Turnbough and Carlos Lerma.

New Sprinkler Systems To Be Completed; Will Cut Expenses, Grow Better Lawns

Sprinkler systems being laid around the men's dormitories will be finished this week, says William Godwin, superintendent of care and maintenance of grounds.

HE Display Features Texas Designers

Jewelry, weaving, and silver by three Texas designers and craftsmen will be displayed in the Texas Tech Home Economics Building beginning tomorrow.

Included will be a display by Francis Stephen, Pharr public school art instructor, who is noted for his work in jewelry.

Some of his articles on exhibition will be a "Shepherd" bracelet, "Mad King and His Flowers" pendant, "Bull and Matador" ring, and ring centrifugal cast.

Stephen attended Oklahoma University, Colorado Springs Fine Art Center, and American Academy of Art, Chicago.

Also on display will be work by Mrs. Florence Hickman, weaver of Dallas. Included will be two silk, mohair and wool stoles; a cocktail jacket; a beret; lounging slippers; and upholstery fabric (designed and made by Mrs. Hickman). Mrs. Hickman studied weaving, color and dyeing in San Francisco.

A display by Wiltz Harrison, associate professor of art at Texas Western College, will include silver articles such as a large bowl, a small creamer set, and a small pitcher. Other articles will include a 18K gold card case, a ladle spoon, child's set, two knives, and set of pictures.

Sampson Publishes Automation Article

We have little assurance that automation will be all blessing.

That's the observation of Dr. Roy J. Sampson, Texas Tech assistant professor of economics, in an article in "Current Economic Comment," published by the University of Illinois.

The problem of automation, a process whereby a machine does a task without human supervision except for maintenance, is one of the most serious challenges facing out economy today, Sampson points out.

He says our handling of this problem during the next few years could influence our well-being for decades to come.

The main problems as Sampson sees them involve the possible effects of automation on employment and distribution of products.

A horse and buggy fallacy is Sampson's term for the argument that present workers will be displaced by automation, but that these same workers will be replaced by an equivalent number engaged in producing and servicing the new machines.

PETITIONS . . .

(Continued From P. 1) was exactly the same a Tech instructor with a master's degree and 11 years experience was receiving.

Also, a Tech graduate with a master's degree and no experience went into a position in industry that paid almost twice as much per annum as did the position of the head of his department.

Although only a few of the Tech of the Tech instructors are leaving-instructors are leaving to accept higher salaried positions, most of the personnel interviewed felt if a better position came along they would not be hesitant to accept.

One instructor said he felt there was especially a trend toward the young, unhindered instructors leaving for better jobs. This was not so true with older, more established teachers having homes in Lubbock, he pointed out.

This project, begun three weeks ago will be completed early this week. Such projects are begun as the budget and time allows. Purpose of these sprinkler systems is to cut down the water expense, to cease lowering water pressure in the dorms, to aid in the prevention of dust and to grow nice lawns.

Water consumption for the past five fiscal years has been reduced considerably each consecutive year. Last year's water usage was reduced to less than half of the amount used the fiscal year 1951-52 although enrollment was greater, rainfall was about the same and total acres in turf were almost doubled.

Total water consumption for the 1951-52 fiscal year was 214,771,000 gallons whereas water usage last year was 101,783,000 gallons, turf acreage increased from 96 to 180 acres during the five-year period also enrollment had increased by 2255 students. Increase in the use of the quick coupling sprinkler system, such as is being laid around the men's dorms, will aid in lowering the water consumption. During the five-year period, this sprinkler system has spread from 25 acres to 119 acres last year.

GETTING HIS CHARACTER SKETCHED — Shown above is John Benner, sophomore English major from Dallas, having a character sketch drawn by cartoonist Juan Avila. Looking on in the background is Delbert Sanders, junior English major from Wilson. (Photo by Harold Creswell)

Faculty, Students Will View Cancer Film Next Week

Two films are to be shown to male student and faculty members and one to female students and faculty as part of Tech's Cancer crusade.

The Tech program is part of the American Cancer Society's annual campaign, according to Tom Stenis, associate professor of electrical engineering and campus crusade chairman.

The two films on internal cancer common in men will be shown at 5 p.m. today at Tech Union. Both films are 30 minutes long.

The film on female cancer will be shown Tuesday at 5 p.m. in Tech Union.

A member of the medical society will also be present to answer questions.

"Public education is a very important part of the Cancer Crusade. Those who take advantage of the educational films will be helping in the crusade," says Stenis.

Softball Meeting

There will be a meeting of softball officials at 7 p.m. Tuesday in the gym, according to Edsel Buchanan, intramural director.
