## Senate delays Thomas decision one week

by JAMES ROWLEY  
THE ASSOCIATED PRESS

WASHINGTON — The Senate on Tuesday postponed its vote on Clarence Thomas' Supreme Court nomination for one week to investigate allegations he sexually harassed a former aide. Thomas "totally and unequivocally" denied the accusation.

The embattled nominee requested a delay to "clear my name" as several crucial Democratic supporters said they could not vote for him until the allegations were aired.

Senate Majority Leader George Mitchell said the allegations should be "publicly and fairly resolved."

Anita Hill, a law professor who says Thomas made repeated lewd remarks to her when she worked for him a decade ago, said she

would cooperate with the Senate. "I intend to go to Washington if it is requested," she said.

Thomas appeared a sure bet for confirmation until Ms. Hill's allegations became public over the weekend. Since then, several Thomas opponents have urged new committee hearings to investigate Ms. Hill's allegations.

Thomas supporters had initially fought a delay, but relented when it became clear there might be enough support for confirmation if the Senate voted Tuesday. "I can count," said Senate Republican leader Bob Dole of Kansas.

The decision to delay the vote capped a dramatic and remarkable day which saw the Senate agonizing not only over how to proceed with the nomination but also with the larger issue of its sensitivity to the issue of sexual harassment.

Even as they reluctantly agreed to the delay, Republicans vented anger that a private committee report on Ms. Hill's allegations was leaked to the media. Sen. Hank Brown, R-Colo., Judiciary Committee member, said he would demand appointment of a special prosecutor to investigate unspecified violations of Senate rules.

Under the agreement reached Tuesday night, the vote on the Thomas nomination was delayed exactly one week, until 6 p.m. EDT Oct. 15.

Mitchell said the delay was "to give time for further inquiry into this matter by the Judiciary Committee."

He did not specify what action the committee would take.

Seven of 13 Democrats who had announced their support for Thomas — Alan Dixon of

Illinois, Richard Bryan and Harry Reid of Nevada, Joseph Lieberman of Connecticut, J. James Exon of Nebraska, Wyche Fowler of Georgia and Richard Shelby of Alabama — all called for a delay in the vote.

If supporters forced a vote, "this senator would be in a position to vote against the nomination," Bryan said. Exon said he would either abstain or vote against Thomas if the vote were held Tuesday.

Danforth proposed that the Senate Judiciary Committee take testimony from Thomas and Anita Hill, the Oklahoma law professor who alleged that Thomas made repeated lewd remarks to her when she was his aide nearly a decade ago.

Senate Democratic Leader George Mitchell of Maine met privately with Dole and others as a growing number of senators urged postpone-

ment. Sen. Joseph R. Biden Jr., D-Del., chairman of the Judiciary Committee, reversing his earlier position, joined the call.

President Bush, asked in late afternoon if he was standing by the nomination, said, "You're darn right."

Thomas remained out of public view. Danforth released a sworn affidavit in which the nominee said, "I totally and unequivocally deny Anita Hill's allegations of misconduct of any kind toward her, sexual or otherwise."

"At all times during the period she worked with me, our relationship was strictly professional," Thomas said. "During that time and subsequently, the relationship has been wholly cordial, true," Thomas said in the affidavit he had signed earlier in the day. "I am terribly saddened and deeply offended by these allegations."

Abi Rhoades, left, Juan Carlos Mojica, center, and Lexie McGovern play "Perpetual Motion" in the KOHM-FM studios Monday. The trio are members of the Suzuki String Program and were taping a segment of Kids and Classics that will air Oct. 19 at 10 a.m. and Oct. 23 at 4 p.m.

## Veterans to be honored at Tech football game

by AMY COLLINS  
THE UNIVERSITY DAILY

Local military personnel who served in Operation Desert Storm will be honored during the Texas Tech football game against the Arkansas Razorbacks, Nov. 9 at Jones Stadium.

The activities planned for the recognition celebration include the Navy Seals parachuting into the stadium prior to game time, regiments of color guards and a special performance by the Tech band.

Desert Storm veterans are eligible to receive free tickets for the Nov. 9 game. Veterans must contact the Office of University News and Publications to receive free tickets which will be available until Oct. 15.

Military personnel eligible for the tickets must present a copy of their orders or Desert Storm medal citations before receiving the tickets. Veterans must also wear their uniforms to the game.

Melissa Workman, senior administrative assistant at University News and Publications, said the pre-game and half-time recognition celebrations are Tech's way of thanking those area servicemen who served in Saudi Arabia.

"Our office received a letter from a man named Edwin Childs whose nephew is a Tech student who served in Desert Storm," Workman said. "His letter asked for some type of recognition celebration for returning veterans from Tech and the Lubbock area."

Margaret Simon, director of news and publications, said this recognition is very important to returning veterans.

"Many of the Tech students who served in Saudi Arabia started returning to the Lubbock area around the

time of finals," Simon said. "This did not leave our office with enough time to plan any type of celebration for them."

Workman said the Mobil Oil Corporation has established a \$100,000 scholarship for Tech students who served in Desert Storm.

"We are hoping to get a representative from the corporation to present the check to Dr. Lawless during half-time," she said.

The halftime celebrations will include the Tech band playing anthems from each branch of the military who served in Saudi Arabia.

"The Tech band will form an outline of the United States," Workman said. "Representatives from the four branches of the military will stand inside the outline while their particular anthems are being played."

She said the Tech band will be playing "God Bless the U.S.A." for the half-time finale.

Workman said she has not heard from veterans of other wars such as WW II, the Korean War or Vietnam about their participation in this particular celebration.

"I realize some of these veterans may feel excluded from the celebration, primarily the free tickets," she said. "However, the large number of veterans in and around the Lubbock area simply means too many people for too little space."

Workman said the responses from the Desert Storm veterans' response has been positive.

"We have received word from 300 to 350 service personnel from Desert Storm interested in receiving their tickets," she said. "It seems they are very appreciative of the effort we have been making to recognize their service to our country."

## Federal cuts lead to termination of Tech NROTC Six-year-old unit under mandate not to accept incoming freshmen

by MARK YOUNGJOHN  
THE UNIVERSITY DAILY

Texas Tech's Navy ROTC unit dwindled down to 57 cadets this semester and is set to be terminated by 1995 as a result of federal budget cuts, said Cmdr. William Gwinn, professor of naval science at Tech.

Gwinn, 49, who assumed command of the unit in August, said the six-year-old unit has been under a mandate not to accept new freshmen since last fall. That group, now in their sophomore year, will be the last NROTC group to graduate from Tech.

"We're sorry to be going," Gwinn said. "The whole Tech community has wholeheartedly supported us. We've felt most welcome, and in some

way we hope we have contributed to the campus as a whole."

Lt. Cmdr. George Rayhons, 42, a 19-year Navy veteran, is executive officer of the unit. He moved into the office after Gwinn was promoted to unit commander.

"I was the freshman adviser to the last freshman class taken in," Rayhons said. He has been attached to the Tech unit for three years.

Gwinn said the closing of the Tech unit is part of a plan by the Navy to cut its active ROTC units down from 66 to 53. Under the nationwide plan, 16 units will be combined into eight units and five will be closed completely. The Tech NROTC unit is one of five units in the state of Texas. It will be the only NROTC unit closed.

Units at Rice University and Prairie View A&M will be merged together, with their headquarters kept at Rice. Rayhons explained one reason the Tech unit is being closed is because of its age.

"It's a new program and new programs are easier to close than old ones," he said.

Gwinn estimated the unit commissioned about 50 cadets into the Navy during its operation. He said the current size of the unit is noticeably smaller than its usual size of 98 cadets. The unit's last freshman class measured 28 cadets, 16 of which still remain with the unit.

In a statement released by the Navy, officials explained additional reasons for the cuts as an effort to geographi-

cally concentrate NROTC units to reduce operation cost.

The release said the overall cuts will save the Navy approximately \$18 million annually. In addition to the cuts in NROTC units, the release noted NROTC scholarships will be cut from the current 6,350 to 5,500 by 1998. A reduction in the size of the Navy also has resulted in less demand for Naval officers.

The Tech NROTC unit has 10 full-time military staff assigned to it. Members of the staff will be transferred to other units as cadets continue to graduate from the program. Gwinn replaced Capt. Virgil Jackson as the unit's commander. Jackson had served one year with Tech. Gwinn, a 26-year veteran, has been at Tech since May 1989.

## Army ROTC to introduce new battalion commander

by MARK YOUNGJOHN  
THE UNIVERSITY DAILY

Texas Tech Army ROTC program is introducing a new battalion commander and a new professor of military science this semester with the addition of Lt. Col. Frank Miller and Capt. Jeffery Decker to the unit's staff.

Miller came to Lubbock from Ft. Bragg, N.C., where he served on the quartermaster staff. He has been in command of the unit since Sept. 17, and replaces Lt. Col. E. Allen Carrigo.

Miller was commissioned from West Virginia in the ROTC program.

*I'm tickled to be here. I've found the folks of Lubbock very friendly. I'm looking forward to being productive with students.*

— Lt. Col. Frank Miller

He served 22 years in the Army and is a Desert Storm veteran.

"If it hadn't been for ROTC, where would I be?" he asked. "The Army has been good to me, I just want to give something back."

Miller brings to Lubbock his wife,

Kathryn, and their two children, 13-year-old Joshua and 11-year-old Timothy.

"I'm tickled to be here. I've found the folks of Lubbock very friendly and I'm looking forward to being productive with the students. That's the most

exciting part," Miller said. "What I hope to do is impart some of my experience with them."

Decker, 28, has been in the Army for seven years. He graduated and received his commission from Eastern Kentucky University.

"I wanted to come back and instruct and teach," he says. "They gave me a choice of 11 universities, and my first choice was Tech."

Decker was transferred to Lubbock from Schofield Barracks, Hawaii. His wife Sharon, and their two children, Donald, 8, and Timothy, 4, are with him in Lubbock.

## Who says there's no jobs to be found? Ask these guys ...

RUSSELL BAKER

If I'm reading the papers right, Robert Gates qualifies to become head of the CIA because he knew little or nothing about scandalous doings in progress there when he was Number Two on the organization chart.

By this test I'm just as qualified to run the CIA as Gates because I didn't know the first thing about the scandal either.

This is the second big presidential appointment to slip through my fingers this fall.

The first was the Supreme Court job soon to be awarded Judge Clarence Thomas for an impoverished boyhood during which he got along without indoor plumbing.

I hate to keep boasting about this, but I would have been willing to match my own childhood experience of outdoor privies against Judge Thomas's if President Bush and the Senate had come right out at the start and told everybody what they were looking for.

I would have liked the job too.

Who wouldn't?

You wear a handsome black robe that practically screams "Very Important Person" and sit on a high bench where you not only look down on lawyers but are licensed to torment them at your heart's content.

The Supreme Court needed me too. It already has so many conservatives there's nobody left for them to hiss when he tries to join them in the Supreme Court cafeteria.

What's more, I could show them how to repeal Roe v. Wade as well as the late Earl Warren in plain English so everybody could understand it.

Running the CIA, on the other hand, is not my kind of job.

I like to know what's going on. At the CIA, if I'm reading the papers right, you know what's going on, it's curtains, pal.

Only after hearing that Gates was practically totally out of touch with one of the shop's really big events-only then did the Senate's confirming committee move toward giving him the top job.

What kind of guy do you want running an intelligence operation?

Isn't it obvious? You want somebody who doesn't know what's going on right under his nose, as it were.

This stems from a philosophy of government that holds that if you're governed by people who know the score it's trouble, my friend, right there in Potomac River City, with a capital T, and that rhymes with C, and that stands for Carter, who was not only president but spent all his time trying to find out what was going on.

The new style was developed under the leadership of a recent president I shall not name, out of deference to popular sentiment, which would rather not think about him.

Suffice it to say that this White House pioneer brought not knowing what's going on right under your own nose to new heights when:

(1) upon meeting his secretary of housing and urban development in the Oval Office, he greeted him as "Mayor";

(2) under interrogation in court he could not recall his military chief of staff, and

(3) he failed to notice that the lieutenant colonel on the White House staff was running an illegal foreign-policy operation designed to finance the overthrow of a foreign government by selling U.S. weapons to another government so hostile to the United States that its agents kidnapped U.S. citizens and held them as hostages.

It will be a long, long time before we again see anybody in government reach such masterful heights of being totally out of it, but our governing classes continue to strive for it.

Consider the above-mentioned Thomas, for instance, who just a week or two ago declared himself so innocent of opinion on the abortion question that astronauts could scour the faraway planet Pluto without finding his equal in detachment from the passions of American life.

Gates of the CIA has apparently struggled in the same spirit to avoid knowing the score. I won't mention the name of the famous CIA scandal about which he achieved nearly total unawareness.

As an American, you hate being reminded of this scandal and, indeed, why should you be?

You're just as entitled to be totally out of it as those know-nothings in Washington, aren't you?

William Casey, the last government man aware of anything, including this scandal we don't want to know about, is now dead.

He was Gates' superior at the CIA. Upon dying, Casey took all knowledge of the scandal with him.

What a fine thing he did for the team.

## People will go where the money is

The "crisis" presented by Dr. E.R. Hall is nonexistent. "In order to fully understand the crisis you need more information." I agree.

Dr. Hall states that although the College of Arts and Sciences educates most students, the pay scale of professors in the College of Arts and Sciences is less than that of professors in colleges where outside employment is lucrative, such as the College of Business of Administration and the College of Engineering (who educate fewer).

The reasoning presented by Dr. Hall would tie pay scales to the number of students educated. Should this be the case, teachers at elementary schools and secondary schools would receive a higher pay than university faculty. No one would claim that the value to society of elementary and secondary educators is less than that of university educators, but their pay scales are less. Had Dr. Hall paid more attention in her economics courses, she would understand why her salary is less than that of professors in the College of Engineering.

The wages of a faculty member

are largely determined by supply and demand in the market OUTSIDE the university system. Dr. Hall complains that the salaries of professors who have lucrative employment outside of the university have greater salaries than professors inside the university. How true and how just! A person with a Ph.D. in management information systems or in electrical engineering is in such high demand in industry that they are most surely taking a pay cut in order to work in the university system. A person with a Ph.D. in Anthropology or Physical Education is in such low demand in industry that they are probably receiving an increase in pay to work inside the university. Just as in the outside market, the monetary compensation for those who are in high demand is also high, and those who are not in demand receive less compensation.

These outside economic forces find their way into the university system. In order to attract faculty in a high demand area, the university must offer greater monetary compensation. Most people will choose the employment that has the best economic outcome. If a person with a Ph.D. in MIS is offered a job in industry for \$40,000, why would they opt for teaching in a university that offers only \$30,000? Of course,

## MAILBAG

should a person with a Ph.D. in Geography receive an offer of \$25,000 in industry and an offer of \$30,000 in a university, why would they not choose the university? As wages in industry are greater for those with a Ph.D. in MIS, the wages will also be greater inside the university system. People will go to where the money is. If a university wants the people, it must offer the money.

Concerning the Permanent University Fund, although it may have its flaws, there is something that you, Dr. Hall, may do. The PUF provides higher salaries and better facilities in those universities that are a part of it. Should you wish to have those benefits, then perhaps you should seek employment at such a place. Should you be willing, you must also be able, i.e. you must be better qualified than others who also want the same thing. In a free market, you are free to choose your outcome, but you must have the ability. The PUF serves to attract those that are best qualified by offering higher wages. Because of the higher wages, the university is able to choose from the greater number of applicants, and to employ a better faculty. PUF is meant to ensure excellence, and it does so quite well.

We students also have the

opportunity of receiving the benefits of PUF. We can attend those universities that are a part of PUF, should we have the DESIRE and the ABILITY. We must move away from the thinking that rewards should be based on equity and not on performance. Ability should determine economic outcomes, not anything else.

The market provides a great mechanism for conveying information about supply and demand, and the market cannot and should not be ignored.

Salaries for educators should not be determined by societal good, nor by formulas that link salary with the number of students taught. The market provides the best and fairest mechanism for allocating monetary resources, so why ignore it. By the way, would you, Dr. Hall, lower the salary of Spike Dykes to your income level? After all, he does educate fewer students than you.

Should you do, Tech would most certainly be faced with employing a coach that is not of his caliber (although you may argue his caliber this season, you certainly wouldn't deny that a replacement who would work for \$35,000 would not be his equal). Let the market work.

Ty Brewer

## They did what they could to shore up Mikhail Gorbachev

A.M. ROSENTHAL

How swiftly and richly it has come - the first great

dividend of the disintegration of the centralized Soviet state.

Only a moment ago, the very idea of the collapse of Soviet central authority terrified the governments of Western Europe and the United States. They did what they could to shore up Mikhail Gorbachev in his struggle to keep the system working through maneuver, reform, tacking.

They failed. But destruction of the Soviet internal empire was no sudden miracle. It came about through hard decades of the rot of built-in corruption, of bravery and suffering by its opponents at home, and the long wearing away of the Kremlin's strength by the commitment of Western military and economic power to containment.

But when the centralized power of the Communist Party and Moscow began to fall apart, Western politicians and theorists for the most part were filled with fear rather than rejoicing.

But they tended to pass over or minimize the benefits that the end of central rule could bring not only to Soviet citizens but to the world. They were paralyzed either by anxiety of by their own past political insistence on the critical importance of Gorbachev and the Soviet state.

The first dividend, of course, is the steps taken by President Bush to pull back nuclear forward forces.

Fine - but they do have one strange gap. Why no provision for mutual inspection once they are matched? Inspection is important not

only for the United States but for the Soviet people, to make sure that no regional leader can squirrel away a shell or two. There's still time to patch up that hole.

Bush's decisions were realistic, minimally risky now, and a step toward even more important stand-downs. That is plain and so should be this: they would have been impossible if Gorbachev had succeeded in maintaining the Soviet central structure in command.

The disintegration of central power allowed Bush to talk reciprocity not with a handful of top, never-elected apparatchiks who controlled Soviet military and political decisions but to representa-

tives of the republics. They have everything to gain in getting rid of all or many nuclear bombs-including the blessings of their voters.

So Bush said let's not spend years negotiating, let's act. He knew that Gorbachev could not negotiate right now, forget years to come and that only the republics act at all.

Yes, there's trouble ahead for many of those republics. Some of their leaders are dreary Communist hacks. Boris Yeltsin himself owes the world an explanation of precisely how he feels about Pamyat, a Russian Fascist group - no more lackadaisical ambiguities. He knows how to make himself clear

when he wants to. Certainly, the ethnic hatreds that festered under Communism are breaking out.

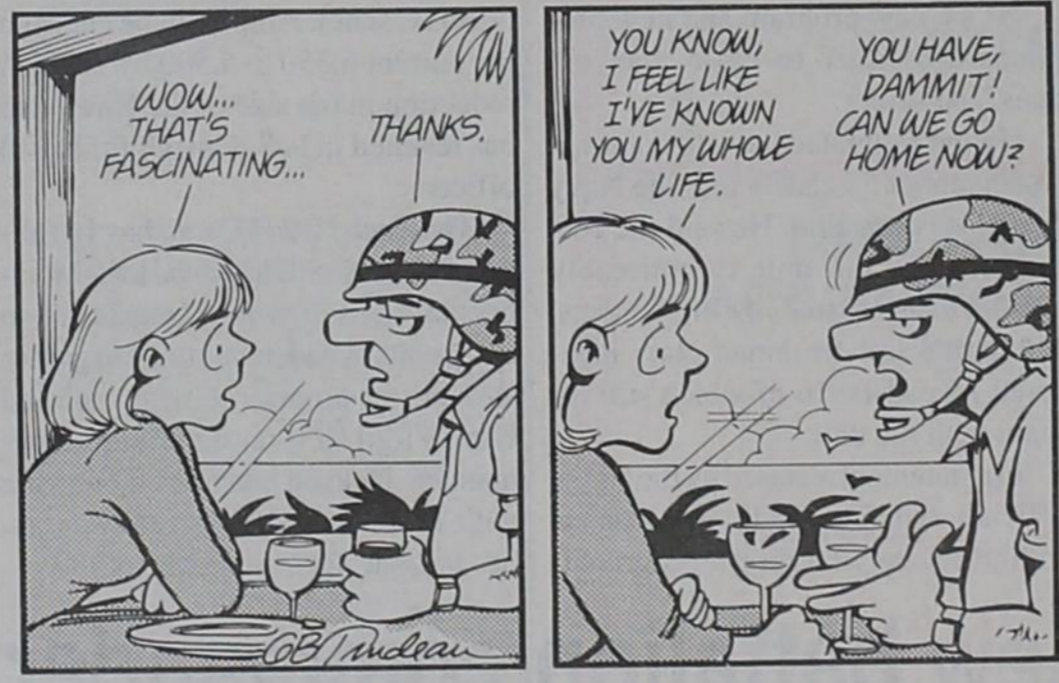

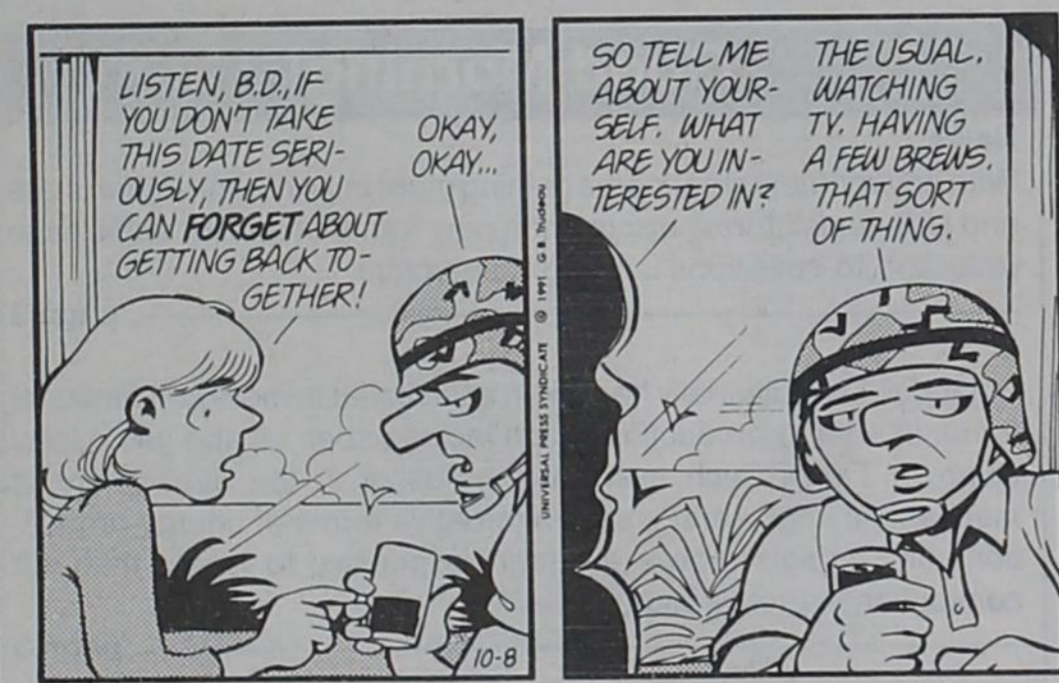

Be sure that Western politicians and specialists will again say, to see or deal with it we must protect, or resurrect, whatever is left of the Soviet central system.

But political freedom in the former Soviet Union - from regional repressions or central dominance - is our affair. Political freedom is the one best barrier to civil or international war. It is the garden that bears the dividends of peace and tending it should be very much our business.

The editor reserves the right to edit and/or hold from publication any letter. Letters will be edited for spelling, grammar, punctuation and space.

# Sun not shining on solar power energy

by JULIE COLLINS  
THE UNIVERSITY DAILY

Solar power traditionally has taken a backseat to more conventional forms of energy production which include coal, oil and gas.

Jerry Dunn, Texas Tech associate professor for the department of mechanical engineering, says alternative forms of energy production such as solar power are more expensive to initiate than the conventional energy sources.

Currently Tech is not pursuing research in the field of solar power. Approximately six years ago, Tech worked in conjunction with the U.S. Department of Energy on the Crosbyton Project to develop and use solar power without the expensive price tag.

"The project did succeed in making electricity that was used on-campus, but it was not the most promising economically," Dunn said.

Federal funding for solar research projects diminished after the Carter Administration and funds were moved to other alternative energy projects including energy generated from wind-mill farms.

Likewise, tax reductions for homeowners who installed solar shields were halted during the early 1980s.

Timothy Maxwell, associate professor for mechanical engineering, said solar energy has received a bad name in recent years due in part to the tax reductions available for homeowners.

Tax incentives led many homeowners to solar power but opened up many less than reputable companies to exploit those homeowners, Maxwell said.

Faulty equipment, not the efficiency of solar power, has disgruntled many Americans as to its effectiveness in

## Researchers exploring alternative fuels

by JULIE COLLINS  
THE UNIVERSITY DAILY

With environmental concerns gaining more importance among state and U.S. legislatures, discovering new forms of fuel for vehicles to reduce auto emissions is being researched.

Tim Maxwell, Texas Tech associate professor for the department of mechanical engineering, said alternative fuels such as methanol- and ethanol-based fuels may someday be used along with the conventional form of fuel which is gasoline.

While still in the exploratory stages, alternative fuels for vehicles may help slow the depletion of world oil reserves.

The fuels may have a positive effect on the environment, due to a reduction in car emissions.

"Methanol-based alcohol fuel is already in use at the Indianapolis 500," Maxwell said.

"Currently, everything is still set up for gasoline, and ethanol and methanol are a lot more expensive to process," Maxwell said.

Likewise, not enough of these al-

ternative fuels are being made for use in vehicles and there is low demand for alternative fuels.

Benefits of methanol-based alcohol include decreased chances of "engine knock" due to methane's high octane rate.

The fuel also produces improved horsepower and reduces emissions from cars, making it environmentally sound.

*Everything is still set up for gasoline, and ethanol and methanol are a lot more expensive to process.*

— Tim Maxwell

Tech is conducting research in the field of methanol-based fuel. Funded by the Department of Energy and Fel-Pro Inc., the project will examine ways to adapt methane for use in cold weather.

In the future, solar power could be implemented in industrial factories rather than being used primarily as an energy savings device for homeowners.

"Most homeowners use solar power only four months out of the year as a heating process for their homes. Industrial companies could use solar power 12 months out of the year," Dunn said.

He said the sun, unlike conventional forms of fuels such as coal and oil, will be around for a long time and

Presently, motor vehicles that run on methanol-based fuel often will not start immediately, if at all, on mild to cold days.

"Methane does not vaporize well in cold weather," Maxwell said.

"Likewise, methanol-based fuels erode rubber and plastic on cars," he added.

The project will consist of taking the engine of a car, breaking it down and replacing old or worn parts with new parts.

The engine will then be re-assembled and measured for its amount of engine power, fuel economy and emissions.

Using only methanol-based fuel, the car will be driven for approximately two years.

The engine will then be disassembled once again to test the wear of engine parts caused by the methanol-based fuel.

"We want to test the damage of the car to see if it is still in as good condition when we started to drive the car," Maxwell said.

Professors and students in the department of mechanical engineering will conduct project research.

this could stir U.S. industrial markets to explore solar energy. Industrial markets could receive tax breaks if solar power is implemented, as well.

Exploration of alternative and conventional forms of fuel may need to work together in the future to ensure the United States will continue to have a viable energy source, he said.

"People need to realize solar energy is not the answer to the energy question," Dunn said.

We need to utilize various forms of energy for use in the future," he said.

## Student organizations introduced during Home Economics carnival

by STEPHEN ARMOUR  
THE UNIVERSITY DAILY

Students interested in the diverse clubs and organizations within the College of Home Economics and across the Texas Tech campus are being encouraged to attend the Home Economics Organizational Fair, "A Carnival of Opportunities."

The fair, hosted in the El Centro lounge from 6 p.m. to 8 p.m. Thursday, is open to anyone interested in attending, said Joanne Frantzen, treasurer of the Home Economics Council, the sponsor of the event.

"This is now the second year for the fair," Frantzen said. "There will be numerous booths that will be representing all the organizations."

Frantzen said the only organization not represented is the Home Economics Council, which is a representative body made up of all organizational presidents. She added that the fair is designed to introduce students to the College of Home Economics.

"We want new freshmen to feel they are a part of the college," said Mary Reeves, director of external relations for the college. "Freshmen are often busy with their general education requirements, and often they don't even have classes in the home economics building."

"It is a type of recruitment," Frantzen said. "We want people to know what the college has to offer."

Admission to the fair is free and

events include a pie-eating booth, a cake walk, bobbing for apples and shooting out flames with a water gun.

Frantzen said door prizes also will be given away.

"Last year, we had about 150 people attend the fair," Frantzen said. "We hope to have just as many or even more attend this year."

"People who attend the fair are not obligated to join," Frantzen said. "However, in order to be eligible for a door prize, people must take the ticket they will be given when they enter and have it stamped by all the booths. That way we can guarantee that people visit all of the organizations."

Frantzen added that a person must be present to receive a door prize which will be given away between 7:30 p.m. and 7:45 p.m.

Frantzen said all food and games are free. T-shirts sold by the Home Economics Council will cost \$10.

The presidents of the various organizations will make a small presentation that will give a general overview of the organization, its purpose and admission requirements into each of the organizations.

"Some of the organizations are open only to people in the college," Frantzen said.

"But others like the Association of Substance Abuse Specialists and the International Association of Financial Planners are open to students outside the college."

TIAA-CREF on SOUND RETIREMENT INVESTING

**HERE'S WHY THE SMART MONEY AT TEXAS TECH UNIVERSITY IS GOING WITH TIAA-CREF AS IF THE FUTURE DEPENDS ON IT.**

Because it does. Smart investors know that your future depends on how well your retirement system performs. TIAA-CREF has been the premier retirement system for people in education and research for over 70 years. We have enabled over 200,000 people like you to enjoy a comfortable retirement. And over 1,000,000 are now planning for the future with TIAA-CREF.

**LOOK FOR SECURITY, GROWTH AND DIVERSITY.**  
Security—so the resources are there when it is time to retire. Growth—so you'll have enough income for the kind of retirement you want. And diversity—to help protect you against market volatility and to let you benefit from several types of investments.

**HERE'S WHAT YOU GET WITH TIAA-CREF.**  
TIAA offers you the safety of a traditional annuity that guarantees your principal plus a specified rate of interest, and provides for additional growth through

dividends. For its stability, sound investments, and overall financial strength, TIAA has received the highest possible ratings from all three of the insurance industry's leading independent agencies.\*  
CREF's variable annuity offers opportunities for growth with four different investment accounts, each managed with the long-term perspective essential to sound retirement planning.

**EXPERIENCE. PERFORMANCE. STRENGTH.**  
Your future is protected by the largest private retirement system in the nation. We currently manage over \$95 billion in assets.

**SEND NOW FOR A FREE RETIREMENT INFORMATION KIT**  
Mail this coupon to: TIAA-CREF, 5215 North O'Connor Road, Suite 350, Las Colinas, TX 75039. Or call 1 800-842-2733, ext. 8014.

## Tech looking to stop Faber, Mulkey combo

by LEN HAYWARD  
THE UNIVERSITY DAILY

Since Mike Jones took over the head coaching job of the Texas Tech women's volleyball team, the Red Raiders have compiled a record of 15-6 in Southwest Conference play.

Five of the six losses in SWC play have been to the Texas Lady Longhorns, and the other loss was to tonight's opponent, the Houston Cougars.

Tech will try to improve on its 0-1 SWC record (13-3 overall) at 7 p.m. at the Lubbock Municipal Coliseum. Tonight's match is the second contest of the season for Tech in the "Bubble."

The Cougars enter the game with a 12-5 season mark and 1-0 SWC record after beating Baylor in four games Oct. 2.

Houston is 2-2 on the road this season.

"Houston has a very good team," Jones said. "They are very physical. They have some kids that can jump, they are big and they probably have the best athletes in the conference. I can say that about Houston every year, but it is still true. They have some really good players."

Leading Houston into the match is 6-foot-1-inch sophomore Karina Faber from Sao Paulo, Brazil. On the season, Faber has 605 attacks and converted 258 into kills for a hitting percentage of .348.

She also leads the Cougars in blocking with 87 blocks and 11 solos.

Faber will be lining up against Tech's sophomore middle blocker Erica Ruegg, who was named Whataburger Player of the Week for her performance in the Arkansas State

tourney.

Ruegg enters the match averaging 1.60 blocks per game after her 18-block performance during last weekend's tournament.

Another player who has played well for the Cougars this year is sophomore outside hitter Ashley Mulkey of Amarillo Tascosa.

Mulkey, who was highly recruited by the Raiders but opted to play for the Cougars, has played in 63 games for Houston and has 140 kills this year. Mulkey also has a .348 hitting percentage, with 84 blocks.

"Mulkey has already been the conference player of the week twice this year," Jones said.

"(She is) a player that we recruited real hard, and it came down between us and Houston, and unfortunately, we did not get her here."

Senior outside hitter Sabrina Zenon and junior setter Rochelle Kaaiahi will be looking to repeat last week's performances in the tournament.

Zenon enters the match with 165 kills and a .189 hitting percentage. On the year, Kaaiahi has 541 assists and is averaging 9.66 per game.

Chris Martin is leading the team in hitting percentage with a .309 average, and 127 kills.

Martin also leads the team in kills in SWC play after the Texas match with 15 and a .382 league-only hitting percentage.

"They are the next best team in the conference with us and Texas. I think we are the three top teams in the conference. This is a match we need to all come out and play well in, and hopefully we will be 1-1 in conference. That makes it real important for us," Jones said.

## Sports brief

### Contest held for new SWC logo

With the withdrawal of Arkansas from the Southwest Conference, SWC athletic officials are looking for a new logo. Any student in a SWC school may submit a design for the new emblem to Southwest Athletic Conference headquarters. All entries should be submitted to: SWC Logo Contest c/o Fred Jacoby, commissioner, 1300 West Mockingbird Ave. Suite 444, Dallas, Texas 75247. The winner will receive a one-year academic scholarship, including tuition and fees, to his or her SWC school. The deadline is Oct. 21.

### Women's golf team finishes sixth

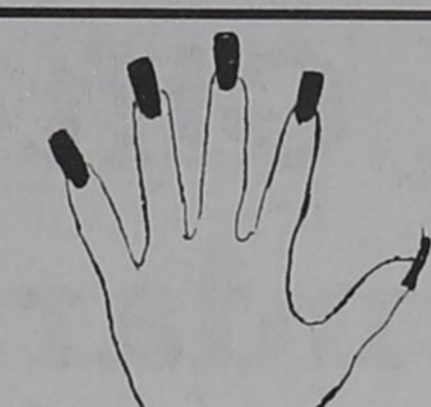

The Texas Tech women's golf team placed sixth in the Neva-McCall Alabama Women's Intercollegiate Championship Sunday-Tuesday. The team shot a collective score of 1024, led by April King, who shot a 249 and tied for 14th individually in the three-round tournament. Kansas won the competition with a 941.

### Parallel workout

A student works out on the parallel bars during open gymnastic time at the Student Rec Center. Gymnastic equipment is set up on Wednesday and Sunday evenings from 7 p.m.-10 p.m. during the fall semester.

PHOTO BY GREG AND BETH HENRY

## Rec Sports Briefs

### TOP TO GO ON POOL

Beginning today, the Recreational Aquatic Center is CLOSED. We will be putting the roof back on the pool and if everything goes well, we should be back in operation on Tuesday, Oct. 15. The Men's Gym pool hours are as follows:

Wednesday .....	12 noon-1 p.m.
Thursday .....	12:15 p.m.-1:15 p.m.
Friday .....	12 noon-1 p.m.
Saturday .....	5:30 p.m.-8 p.m.
Sunday .....	5:30 p.m.-8 p.m.
Monday .....	12 noon-1 p.m.
.....	7:30 p.m.-9 p.m.

### BASEBALL TEAMS ADVANCE

The second week of Recreational Sports' month-long Baseball Tournament continued Sunday with three more teams advancing toward the championship and two teams staying alive in the consolation bracket.

Opening play on Sunday morning saw the Diablos out-hit the Church Sox and hang on for a 9-7 win. The Diablos now play the Shrieking Eels on Saturday in the winners bracket. The number one seed, The Other Guys, advanced to the quarter finals with a forfeit win over the Conference Cafe. They will play The Crew Sunday morning. The Crew edged BVF 1-0 in a classic pitching duel.

In consolation bracket games, the Beer Nuts eliminated Good Luck, 8-3, while Hay's Rejects scored six runs in the last two innings to defeat Joe Knows 9-6.

The tournament continues this weekend with the finals scheduled for Dan Law Field on Oct. 19.

### INJURY CLINIC TONIGHT

The weekly injury clinic with Dr. Robert Yost, Orthopedic Surgeon at the Texas Tech Medical School, continues tonight at 7 p.m., in room 201 of the Student Rec Center. This is a free service provided by Recreational Sports and Dr. Yost.

Dr. Yost and his orthopedic residents will examine students with athletic type injuries and give advice on treatment and care. For additional information, please call 742-3351.

### TRAP & SKEET AND DISC GOLF ENTRIES TAKEN

Rec Sports is planning a "Big" weekend for Oct. 12. Entries are now being taken for the Fall Trap & Skeet Shoot and Disc Golf tournaments in the Rec Sports office, SRC 202, during regular office hours.

The Disc Golf tournament is set to begin with check-in at 10 a.m. behind the Student Recreation Center at the dumpster in the parking lot, Saturday, Oct. 12. The Disc Golf tournament is a 27-hole tournament held in conjunction with Lubbock Hacky-Sack and Frisbee festival. All Tech students, faculty and staff may enter the Men's or Women's college divisions.

Trap and Skeet enthusiasts need to fill shells and oil their weapons to prepare for Saturday's Trap and Skeet Shoot. The tournament is set to begin with check-in at 1 p.m. at the South Plains Gun Club, 1 mile north of Reese AFB entrance gate on W. 4th Street. All Tech students, faculty and staff may enter Men's and Women's divisions for both trap and skeet. Each contestant will shoot a minimum of two rounds at \$3 per round (25 birds). Contestants should provide their own gun and ammunition. Ammunition may be purchased at the Gun Club and guns may also be rented. For more information regarding the Disc Golf and Trap/Skeet tournaments come by the Rec Sports office, SRC 202

### RACQUETBALL TOURNAMENT SET

Rec Sports is now taking entries for the Fall Intramural Racquetball Tournament in the Rec Sports Office, SRC 202. The tournament is set to begin this Friday, Oct. 11 with the earliest matches set for 4 p.m. that afternoon. The tournament is set to run through Saturday afternoon, Oct. 12. Closing time for entries is 5 p.m. on Thursday, Oct. 10 and each team entry must be accompanied by a \$3 ball fee. Men's and Women's Open Divisions are available for 'A', and 'B' and 'C' level players.

### AFAA AEROBIC INSTRUCTOR WORKSHOP

Anyone interested in becoming certified by AFAA — a national certification association on Saturday, Oct. 19 should contact the Fitness/Wellness Center at 742-3828 as soon as possible. The cost is \$179. An extensive workshop will be held on Oct. 20 — the cost is \$65. Call 742-3828 for details.

### REGISTER NOW FOR NON-CREDIT CLASSES

Several non-credit classes begin shortly through the Fitness/Wellness Center. Beginning Racquetball meets Mondays and Wednesdays beginning Oct. 14 from 4:45-6 p.m. Register by calling 742-3828. This class is free. Several Weight Training classes begin the week of Oct. 21. Both Men's and Women's Weight Training classes are offered — each class meets twice a week for five weeks. There is a \$5 charge for these classes and you must register in person in the Fitness/Wellness Center. Class times vary from early afternoon until late weekday evenings. Inquire at 742-3828.

### FITNESS/WELLNESS WORKSHOPS

Rate Your Plate — nutritional analysis will be offered Oct. 10 from 3-7 p.m. Bring your breakfast, lunch or dinner menus and see how healthy your diet is. This is a free drop in activity. Road Trip!!! How to change a Tire — will be offered Oct. 10 at 4:30 p.m. This is geared towards women who travel alone and do not know how to change their car tires. Please register at 742-3828 — this class is free. Health Risk Analysis — a computer-generated lifestyles assessment will be offered from 3-7 p.m. on Oct. 14. This is a free, drop-in activity and includes blood pressure screening. Free Drop-in Glaucoma screening will be held from 2-5 p.m. on Oct. 18.

### THINK SNOW — SKI MAINTENANCE OFFERED

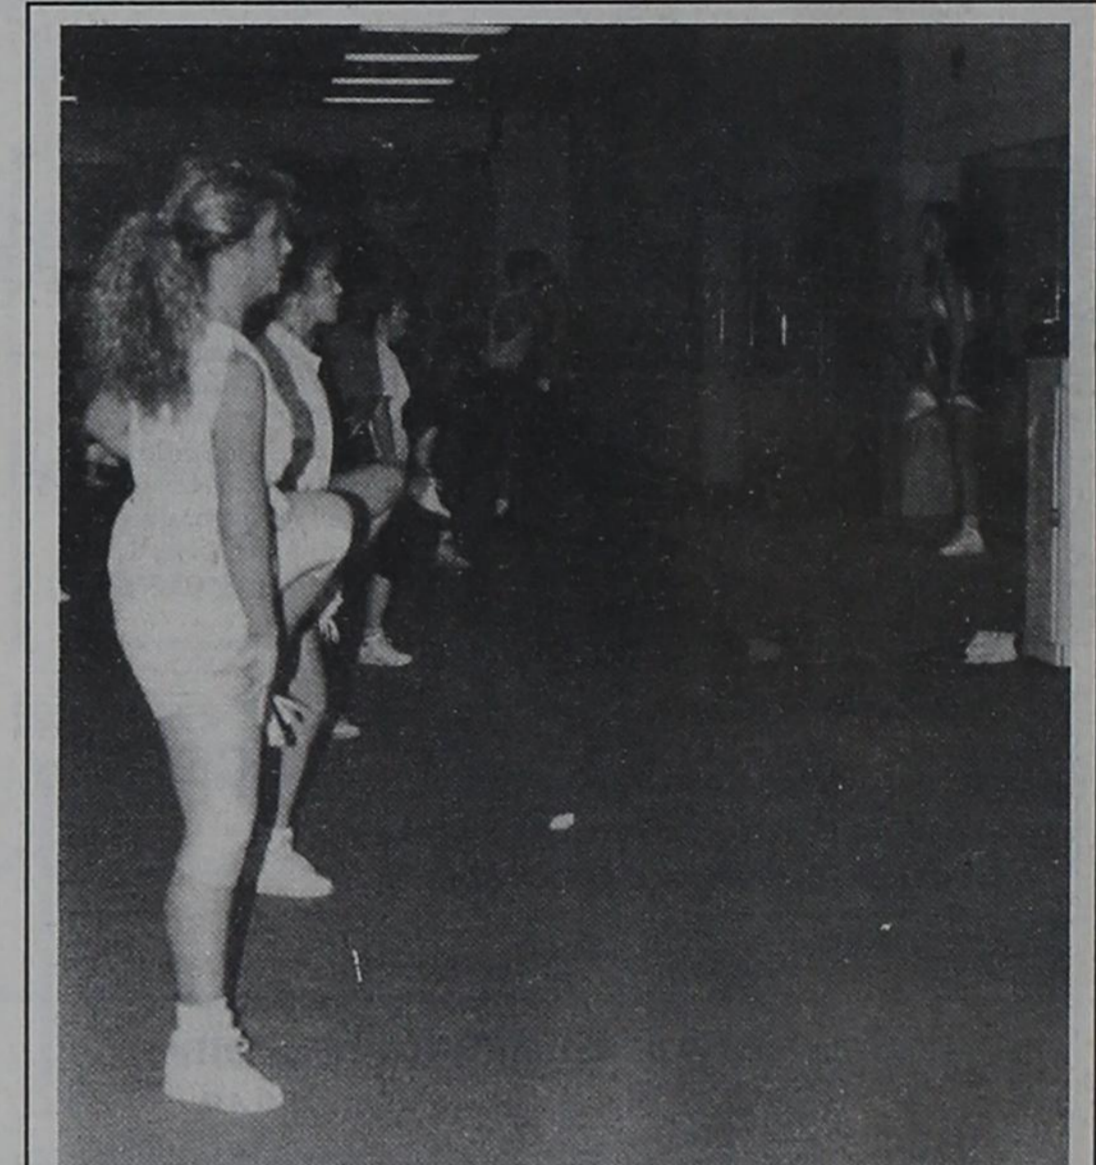

Although it is still warm outside, ski season is fast approaching. The Recreational Sports' Outdoor Program will be offering downhill ski maintenance workshops in the north entrance lobby of the SRC. Come learn how to petex, file and wax your skis FREE. (You may also leave them overnight, and we will do them for you for \$15.) Upcoming workshops are tomorrow and next Wednesday from 2-4 p.m.

The Outdoor Program is also planning a ski trip to Steamboat Springs, Colo., during the Christmas Break. The trip is January 5-10. Included in the ski package is ROUND TRIP TRANSPORTATION, 5 NIGHTS LODGING, AND A 4-DAY LIFT TICKET. The cost is \$299. Come by the Outdoor Shop (SRC 206) to sign up, or call 742-2949 for more information.

### STEP AEROBIC CLASSES ADDED

Due to the high student demand for Step Aerobics, the Rec Center has added four new Steppin' Out classes to the fall schedule. New classes will be offered at 3 p.m. on Monday and Wednesday and 8 p.m. on Tuesday and Thursday evenings. All classes will meet in the Lower Level Multi-purpose Room in the Rec Center and will begin Monday, Oct. 14

Present Steppin' Out classes meet Monday through Friday at 4:15 p.m. and 5:30 p.m. In addition, there is a Sunday class at 4:15 p.m.

### Step it up

Students respond to the instructor during one of the many aerobic classes held daily at the Student Rec Center.

### CHESS MASTER SETS DEMONSTRATION

Recreational Sports has set a demonstration of Diagnostic Chess for next Sunday, Oct. 13, beginning at 5 p.m., in classroom 201 of the Student Recreation Center. International Chess Master, Mehrdad Pedram, a junior biochemistry major, will conduct the demonstration. Mehrdad Pedram will discuss diagnostic techniques of playing chess and then play 10-15 opponents simultaneously. His opponents will range from beginning novice to current members of the campus Chess Club. All chess enthusiasts of all levels of play are encouraged to attend.

Intramural Sports will also take entries for the 1991 Intramural Chess Tournament. Men's and Women's Open divisions will be offered for 'A' (advanced) and 'B' (beginners) players. There is no fee and swisse' pairings will be used for the three-week tournament. For more information, stop by the Rec Sports Office, SRC 202 during regular office hours.
