

# WELCOME HOME, TECHSANS

## THE TOREADOR

Volume XXII X7142 Texas Technological College, Lubbock, Texas, Saturday, Nov. 29, 1947 Number 10

### Raiders Test Cowboys

EAT 'EM UP, RAIDERS!

Who: Texas Technological college and Hardin-Simmons university.

Where: Clifford and Audrey Jones stadium.

When: 2:30 p. m. today.

Prize: A Border conference championship and Sun Bowl bid.

Lineups:

TEXAS TECH				HARDIN-SIMMONS			
Joe Smith	Sr.	190	LE	169	Fr.	M. Steadman	
Bernie Winkler	Sr.	220	LT	237	Soph.	Leon Cooper	
Dan Pursel	Jr.	190	LG	194	Sr.	Jack Ellison	
Roland Nabors	Sr.	195	C	178	Sr.	John Cleveland	
Dorrell McCurry	Jr.	210	RG	202	Sr.	Joe England	
George Zoller	Sr.	190	RT	240	Soph.	S. Rowan	
W. Edgington	Soph.	190	RE	185	Sph.	R. McChesney	
Freddie Brown	Sr.	160	QB	176	Sr.	Al Johnson	
W. Maloney	Soph.	160	LH	163	Fr.	Wilton Davis	
Leete Jackson	Sr.	200	FB	185	Sph.	Virgil Turner	
Glenn Lewis	Jr.	190	RH	205	Sr.	J. C. Cook	

Officials:

Referee—Mike Williamson, Southwest Texas.

Umpire—Prentice Walker, North Texas.

Head Linesman—C. M. Brown, McMurry.

Field Judge—W. W. Connelley, Texas Christian.

### Crowd Of 20,000 Expected At Tilt

The grab-bag will be full of prizes this afternoon when Texas Tech's Red Raiders engage the Border conference defending champion Hardin-Simmons Cowboys in the inaugural game in Clifford and Audrey Jones stadium before an estimated crowd of 20,000 persons.

The Red Raiders are two touchdown underdogs in this all-important game which has the Border conference title and a bid to the Sun Bowl riding on every movement of the pigskin.

DR. W. M. WHYBURN Tech President

### Whyburn Extends Hearty Welcome For '47 Reunion

Dear Students and Ex-Students:

It gives me particular pleasure to greet the students and ex-students of the college at this Homecoming of 1947. Never in the history of the institution have our faculty and administrative officers had cause for greater pride in you or more satisfaction in having you together on the campus. Our pride arises from the notable successes that you are achieving and the high ideals that you are sustaining, both on the campus and throughout the world in which you live and work.

The knowledge that our students, as hosts, and our ex-students, as guests, have planned long and carefully to make this great Texas Tech reunion a dynamic reality, gives us kept happiness. With our students, ex-students and college staff working closely together in this manner, the future of the institution will be one of astounding achievements.

I extend you a most hearty welcome to a day filled with outstanding events and pleasant reunions.

Sincerely,  
W. M. Whyburn  
President

### Construction Of Naval Armory Begins On Campus In Two Weeks

Construction of a \$250,000 Naval armory to be built on the campus at Eighth and College is expected to begin in about two weeks, Naval officials announced. The building will house the Lubbock Naval reserve unit, which has been holding its weekly meetings in the Engineer's auditorium.

Angelo, Eighth Naval District Headquarters, New Orleans, will announce the winner of the bid, which usually goes to the lowest bidder, officials state.

**Navy Has Lease**

Lease for the site, south of the old stadium, was authorized by the Texas Legislature. Tech board of directors was empowered to grant a gratis lease to the Navy Department for one year, with privilege of renewing, according to W. T. Gaston, secretary.

Plans for the steel frame, prefabricated structure were drawn up by Clifford C. Cool of Midland. The armory will contain classrooms, a locker room, a complete galley and lounges for enlisted men and officers. Personnel will be instructed in radio, radar, electronics and electricity in Naval equipped workshops.

Contract bids for the construction were opened in Lubbock Nov. 7. Low bid of \$127,780 was offered by G&E Construction company of San Angelo, who has built similar armories at Wichita Falls and San

### Engineers Plan Sixteenth Show

Initial plans for Tech's sixteenth annual Engineering show were laid at the first meeting of the show's board of managers. The newly elected general manager, Wendell Mayes, jr., senior electrical engineer from Brownwood, said all indications point toward the presentation of one of the best shows in Tech's history.

The board of managers scheduled the 1948 show for sometime in April. Joe Luckett, publicity manager, announced.

While all added exhibits have not been announced, Mayes said the radio compass, radio-controlled car and the mechanical man will be among the new attractions.

Last year's attendance of 7500 is expected to be exceeded in the 1948 show, Luckett stated. In 1941 an all time attendance was marked up, totaling 8403. M. Kelly was the general manager of the Engineering show that year. The first show in 1929, under the guidance of J. Hewett, general manager, drew crowds totaling 2100. During the war years 1943-46 there were no shows.

**Radio Receiver Set Up**

A high frequency CW Naval radio station set up at LAAF and manned by reserve unit radiomen went into operation Tuesday night. Radiomen copy an "all station copy" broadcast from New Orleans, receiving instructions and information for the unit one hour and a half of the two hour training period will be taken up in radio, radar, electronics and drill practice with brigade control station in Dallas. The radio station will be set up in the armory upon its completion.

**CLEAN-UP DRIVE HELD**

One hundred students of different organizations gathered six pick-up loads of trash from the campus Saturday. Sponsored by APO and working with George Long, superintendent of building and grounds, the volunteer Techsians prepared the campus for Homecoming.

### Cowboys Have Strong Line

Hardin-Simmons, which was idle last week, will field a more balanced ball club this year than the one which rolled over the Raiders 21-6 last season. The Cowboys have an experienced line which has helped Hardin-Simmons to remain undefeated in conference play. Red Cleveland, center; Jack Ellison, guard; Leon Cooper, tackle; and Bob McChesney, end are four of the main pillars in this forward wall. Most of these men played against Tech last year and were responsible for stopping the Raider offense.

**Raiders In Poor Condition**

The Red Raiders are in their worst physical condition of the year as they face this crucial game. Ends Bill Kelley and Joe Smith received injuries in the New

**ARTIST COURSES SCHEDULED**

Three more Artist Course programs are scheduled during the remainder of the school year. A singer, a dance group and dual pianists are to perform. Prof. R. A. Miller has announced.

Christopher Lynch, noted tenor, will appear Dec. 13. Lynch made his debut as singing star on "Voice of Firestone" over NBC and is famous for his concerts, radio appearances and recordings. Mia Slavensky and her Ballot Variante will perform March 22, and Vronsky and Babin, dual pianists, will appear April 12 to conclude Tech's Artist Course activities for the semester.

### Romance Poses Problem To Boy

Romance can pose a big problem for a 4-year-old.

A fellow just that age attending Tech nursery school was smitten with a pretty little blonde just a year younger. Not of the bashful sort, he walked right up and kissed her in front of the whole school. But she didn't like it.

"Don't do that," she lisped, tossing her golden curls "I've just washed!"

## 4,000 Exes To Attend Dedication Of Stadium

### Officers And Directors Of Tech Ex-Student Association To Be Elected By Alumni Council At Breakfast Today

By MARY DEAN GRIFFIN Toreador Staff Writer

All previous Homecoming records are expected to be broken today when an estimated 4,000 exes return to the campus to renew old friendships, visit the faculty, and officially open Clifford and Audrey Jones stadium.

Alumni and Ex-Students council will be held at 8 a. m. today in the Hilton hotel. The council will elect Texas Tech Alumni and Ex-Students association officers and directors who comprise the executive board which functions for the council between meetings, said D. M. McElroy, executive secretary of the Association.

After being once postponed from Oct. 18 because of the fire which partially destroyed Clifford and Audrey Jones stadium last June, Homecoming got underway with a pep rally and bon fire last night. With the yell leaders receiving ample aid from the Saddle Tramps, the old stadium was burned in effigy atop the bon fire.

The Association council is composed of one representative from each local club or chapter; one member from each Texas Senatorial district; officers of the senior class; president of the junior class; and past presidents of the Association.

A breakfast and business meeting of elected members of the

At 8:30 a. m. and all day, except during the noon hour and the ball

### Stadium Dedication Plans Announced

Dedication ceremonies of Dr. Clifford B. and Audrey Jones Stadium at 2:15 p. m. today has been announced by Dean James G. Allen, chairman of the convocation committee. The 15 minute ceremony will be performed in the center of the field on the 50 yard line with the band in formation on the north half of the field.

At noon a buffet luncheon sponsored by the T. N. M. & O. coach lines will be held in the gym. The T. N. M. & O. lines were also hosts to the alumni luncheon last year.

Dr. Clifford B. Jones will be introduced by the president of the ex-student association and will give a speech of presentation to the board of directors. Charles C. Thompson, chairman of the board of directors, will receive the presentation for the board. President W. M. Whyburn will dedicate the stadium which will be followed by a pledge of responsibility of the student body by Bill Nugent, president of the student council.

The most colorful Homecoming parade in Tech's history will begin at 10 a. m. today. Thirty-two floats are entered on beautiful, educational and comic themes. The ROTC color guard will lead the parade. March music will be furnished by the Matador 107 piece band. The Hardin-Simmons Cowboy band, with the famed cow-girls and "Sheriff", are expected to participate.

Dean W. L. Stangel will officiate as master of ceremonies. The ceremony will be concluded with the playing of the Matador song by the band.

At 2:30 P. M. The climax of Homecoming will begin at 2:30 p. m. when the Red Raiders meet the Hardin-Simmons Cowboys for the fourteenth time. Sections D and E on the west stands have been reserved for exes. These seats are on the west side from the 43-yard line to the goal line on the north end of the field.

### Techsans' Temperatures Emanate Over College Building Amendment

One of the most heated issues to arouse Techsians in the past year was the controversial college building amendment and the subsequent court cases attacking the constitutionality of the amendment and the legality of the special election Aug. 23. Feeling was high prior to the election which saw the amendment passed by a margin of 5,213 votes.

Speer, Dallas. The hearing was originally set for Sept. 25. Arguments in the suit were delayed by the filing of a second suit by the same group, which contests the legality of the elections in six counties. Testimony in the first suit was postponed that both suits might be held concurrently.

The canvass showed 102,531 votes for the proposal and 97,218 against, with 14 counties opposing it and 107 favoring. No elections were held in three counties and no election returns were sent to the canvassing board from three counties, it was reported.

**Court Order Issued**

Also on Sept. 25, Judge Roy C. Archer issued a court order which, in effect, temporarily prevents certification that there is no litigation against the bonds authorized by

The heat of Techsians' discussions is at the barely-simmering stage now but is prophesied to show a rise in temperature when the court hearings begin. No date has been set for the hearing, which will be held in the 126th district court at Austin.

**Directors Meet In Called Session**

Board of Directors, which now includes three Tech alumni, will hold a called meeting today in Pres. W. M. Whyburn's office. No important business is on the agenda and the directors will spend most of the day with Homecoming activities, Whyburn said.

**Submits Four Proposals**

As Gov. Beauford Jester issued the proclamation of the official vote tabulation Sept. 8, R. Guy Carter, Tech graduate and Dallas attorney, announced that the amendment would be attacked in the courts on the grounds that it does not conform to constitution form. He said the amendment submitted five separate proposals whereas a single amendment can carry only a single proposal.

**Faculty Increased From 53 To 264**

Tech's faculty has increased from the beginning number of 53 employed when the college opened its doors 22 years ago this fall to a present teaching staff of approximately 264. This number is an increase of 51 over last year's staff which included 213.

### New Book Stacks Added To Library

The Library's \$50,000 book stacks with a capacity of 225,000 volumes was completed recently, stated Librarian A. S. Gaylord. Book allotment fund for the past year was increased from \$15,000 to \$27,000, this allotment meeting the standards of the American Association of Universities which requires a yearly expenditure of \$5 per student for books.

The plan desk and card catalogues were moved to the second floor and the former reference department on the same floor converted into a reserve and recreational reading room. Students now have direct access to reserve books with tables provided for study space in the reserve book room.

Tech professional library staff is more than doubled this year as result of provisions in the new library budget. Graduate credentials in library science can now be required of all librarians, Gaylord said, since minimum salaries here are now distinctly higher than required of the American Library association.

The Library has been designated as an official document depository for the United States government. A documents section was established to arrange and care for the collection of U. S. documents, he said.

The flag pole which was in the center of the circle is to be placed at the College avenue entrance to the campus.

## Joe King Faces Trial Monday For Reckless Driving

Pre-Law club trial of Joe King, charged with reckless driving and assault with a motor vehicle, will be held at 7:30 p. m. Monday in the Engineering auditorium.

Bill Nugent, president of the Student association, is reported resting well in a local hospital where he was taken after being struck by a motor vehicle while crossing in front of the library about 9 a. m. Wednesday morning. An examination of Nugent revealed

he had a fracture of the right humerus, compound fracture of the right tibia, leg bruises and superficial cuts and abrasions, according to information released by the hospital.

Witnesses of the accident said a car coming from the north struck Nugent as he turned after being hailed by Bryan Lovelace who intended to take a candid picture of Nugent, who last week was named to "Who's Who in American Col-

leges and Universities" for the second consecutive year. The car, which witnesses described as a "cut-down jalopy," sped on. About two hours after the accident, city patrolmen arrested King, senior business administration student, at his apartment and charges of reckless driving and assault with a motor vehicle were filed against him.

Joe Gipson, defending attorney, said Friday that there was no doubt of his client's innocence, although King had told him, "Sure, there was a triangular love affair linking Nugent, Band Queen Judy Pollard, and me. But so what?"

EYE-WITNESS PHOTO—Bill Nugent, Student association president, is pictured at left as the car driven by a hit-run driver passes over his body. The picture was made by Bryan Lovelace, arts and sciences student, who had attracted Nugent's attention to snap a candid shot. The vehicle struck

Bill Stevens, prosecuting attorney, had offered the love affair as possible motive for the accident. The Monday night mock trial conducted by Pre-Law club is open to all students.

Fifty-two people were added to the teaching staff this year and five former faculty members, including four that had been on leave of absence, returned. Mrs. J. G. Allen, assistant professor of journalism, Dr. Charles D. Evans, professor of history, Mrs. Charles D. Eaves, assistant professor of accounts and finance, Dr. Merrill A. Stainbrook, professor of geology, were those who had leaves of absence. J. Fenton Harding, who was an instructor in civil engineering in 1929-30, was again hired for that job this year.

**Harmon Heads DM**

Dr. Kenneth Miller Renner, head of the department of dairy manufacturing, who died early this fall, left the only department head vacancy to be filled. L. G. Harmon, dairy manufactures professor, was made acting chairman of that department.

Arts and sciences headed the divisions in new faculty members having 26 additions. Engineering was second with nine, agriculture and commerce both followed with six additions while the home economics division had five new faculty members.

An Agricultural Economics club has been formed on the campus with Ray Bowen as its first president.

### H-SU Cavalcade Is Band Theme

"H-SU Cavalcade" is the theme of Texas Tech's band's performance at halftime of the football game today, Prof. D. O. Wiley has announced.

First part of the period will be used by Hardin-Simmons Cowboy band, its rope twirling cowgirls and famed white horses. Then the Tech band, led by Drum Major Hubert Burgess, will take the field to form "Hi, Exes". The band will play several Hardin-Simmons college songs starting with those used 30 years ago and bringing them up to the present time, while executing various formations.

The musical salute is dedicated to Rupert N. Richardson, president of H-SU, who will be guest of Tech President W. M. Whyburn. Playing of the Matador song while in double T formation will conclude performance of the Tech band, which is directed by Wylie with the assistance of Joe Haddon, lecturer in music.

The annual freshman shoe race will be held at the end of the band performance if there is sufficient time before the football team's return to the field, Wylie said.

### Faculty Increased From 53 To 264

Tech's faculty has increased from the beginning number of 53 employed when the college opened its doors 22 years ago this fall to a present teaching staff of approximately 264. This number is an increase of 51 over last year's staff which included 213.

Fifty-two people were added to the teaching staff this year and five former faculty members, including four that had been on leave of absence, returned. Mrs. J. G. Allen, assistant professor of journalism, Dr. Charles D. Evans, professor of history, Mrs. Charles D. Eaves, assistant professor of accounts and finance, Dr. Merrill A. Stainbrook, professor of geology, were those who had leaves of absence. J. Fenton Harding, who was an instructor in civil engineering in 1929-30, was again hired for that job this year.

**Harmon Heads DM**

Dr. Kenneth Miller Renner, head of the department of dairy manufacturing, who died early this fall, left the only department head vacancy to be filled. L. G. Harmon, dairy manufactures professor, was made acting chairman of that department.

Arts and sciences headed the divisions in new faculty members having 26 additions. Engineering was second with nine, agriculture and commerce both followed with six additions while the home economics division had five new faculty members.

An Agricultural Economics club has been formed on the campus with Ray Bowen as its first president.

Tech's greatest victory, in points, was the third game in 1925 when Wayland college was defeated 120-0.

THE TOREADOR

The Toreador, student newspaper of Texas Technological college, is published every Friday on the campus of Texas Technological college at Lubbock by the associated students of the college.

Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under the Act of March 3, 1879.

Editorial offices, Press Building, Rooms 103, 105. Telephone: College switchboard; Night editor, 8548.

DR. WALTER J. HOWARD

Announces The REMOVAL OF HIS DENTAL OFFICE To 2116 BROADWAY Phone 4253

Work Completed In Attempt to Gain AAUW Approval

"The last obstacle in Tech's recognition by the American Association of University Women was removed, as far as we know, when we were recognized by the Association of American Universities, in November of last year," says President W. M. Whyburn.

The Recreation hall, the infirmary and other improved facilities will make our case stronger, he says. AAUW recognition means a great deal to women graduates who wish to join this organization.

Year Sees Increase in Contents, But Not Building, Of Tech Museum

West Texas museum has enlarged only in its amount of exhibits and not in size during the past year. With an office and a storage and preparation room the remainder of the one-story basement building being used for exhibits.

Campaign For Brick

In the fall of 1940 the "Give a Brick" campaign was inaugurated with the results that \$2,526 in cash and about 24,000 common bricks were donated.

One of the high spots of Tech football history was in 1936 when the Red Raiders took Texas Christian, Sammy Baugh and all, 7-0.

McMillan Relates Dangerous Experiences Of African Hunt

By ANITA OLIVER Toreador Staff Writer

"I am thankful to be alive to tell in my own words what happened on Oct. 5, 1947," said Bill McMillan, former Tech student from Lubbock, who returned Nov. 12 with his family from a four-month hunting trip to Nairobi, Kenya Colony, East Africa.

Exes Of 1925-26 May Recall Whyburn As Math Professor

By BETTY RAMSEY Toreador Staff Writer

Dr. William Marvin Whyburn's math class may strike a familiar note with Tech exes of 1925-26 visiting the campus today—especially if they have recollections of learning their quadratic formulas and algebraic equations under his supervision as an associate professor of mathematics on the first faculty of Texas Tech.

to spit. I thought it just too dangerous so I shot it. One of these cobras can catch a zebra at full gallop. The recipient of the poison, which is spit at the prey's eye, is instantly blinded, thus giving the cobra a chance to attack. It is one of the two animals in the world which is not afraid of man."

"The most thrilling climax of our hunt was the killing of the second lion," Bill added. "We spotted it at 5:30 one afternoon, and since a real sportsman does not shoot after dark, this left me about thirty minutes. I lay on my stomach on a cactus-like plant for 25 minutes, during which time I did not move the cross hairs of my gun off the lion which was crouched in the tall grass with only the top of his head showing. Everything was against me—poor target, poor light and great distance."

"Finally I decided it was then or never, for we were to break camp the next morning and return to Nairobi. I shot, and at the report of the rifle he dropped. The guide and I ran toward him to put on the finishing touches if he were only wounded. Suddenly the whole jungle became alive with the roar of lionesses and young cubs. With our attention called to an expected attack from a nearby lioness, I thought I had a fleeting glimpse of my wounded lion diving into the donga. In all the confusion, the direction of my lion was lost."

"With the whole party thinking the lion had been wounded, we threw rocks, shouted and fired into the thicket to provoke him so he would charge us and we could kill him. After 35 long minutes of this, we returned to camp, knowing only that we would have to return the next morning to face the unpleasant task of hunting a charging, wounded lion. The following morning we went back to the scene, moving cautiously with safeties of our guns off. Our natives hunted for signs of blood; every move was tense. All of a sudden, with a shout from Dad, we found, to our surprise and relief, that the lion had never moved from the time I fired that first shot. With thanks to God that no one had been hurt, we broke camp."

Various other big game trophies collected on the trip include: the leopard, a killer at heart; the Cape buffalo, next hardest to the elephant to kill; thick-skinned rhino; rare lesser kudu; Grevy's and common zebra; waterbuck, rean antelope, oryx; Grant's and Thomson's gazelle; gerenuk; and little fleet-footed dikdik.

From Where You Sit

HAVE A SEAT Dear Editor:

This may be bringing up ancient history but I believe it is worth mentioning, and hope you feel that it is worth a few lines in The Toreador.

Last summer The Plainsman's column in the Lubbock paper made some very disparaging remarks about Tech's campus which I can't quote verbatim; but it ran something along the line that "Tech campus is the biggest weed patch this side of the African bush country." Now, I'll admit that the Campus Beautification committee has a fertile field to work on. But I know, too, that the committee has tried and is trying to make more rapid steps forward in the direction of a good-looking campus.

But is it fair to print such a remark without noting improvements on the campus? I haven't been around long enough to know but I've talked to exes who've returned after several years away from Tech and they have all been amazed at the campus's greatly improved appearance. And I've been here long enough to know that we have a lot to show since last year.

Maybe I'm just prejudiced on the subject of Texas Technological college, but I think it's the doggonest best school I know anything about (and it is one of four colleges I have attended). Even though I know there is a lot that needs doing around here, I'm proud of us, by golly.

That's how it looks from where I sit, and I'd like for the critics to ask the exes how it looks from where they sit. To further run your good phrase into the ground, how does it look from where you sit? Sincerely,

A Techsian in every sense of the word. From where I sit—ditto—The Editor.

BOMBS AWAY

About seventy people attended the pre-organization meeting of Tech Flying Club last Friday afternoon. Of those attending, about half do not hold licenses of any sort, but are definitely interested in flying.

Why couldn't the college consider a flight training program? With three private flying schools in Lubbock, possibly some plan could be worked out with one of them. West Texas State has a regular college sponsored ground school and flight training program and grants college credit to those taking it.

I think such a project is worthy of consideration by the college administration, and I personally, would like to see such a program started by the spring semester. Very truly yours, Joe W. Seay.

Pupil Shows Teacher How

By RAY COOK Toreador Sports Writer

"Pupil shows teacher how," is the case of T. I. Brown and his younger brother, Ben. T. I., senior for journalism major, began teaching Ben to bowl in 1939 while Ben was still in high school. T. I. was then enrolled in Tech and bowling on a local team.

"The first year Ben was so awkward in his delivery that he couldn't stand up. Frankly, I didn't have much hope for him," T. I. stated. "But now Ben, sophomore electrical engineer, is a national figure in bowling. T. I. hasn't been able to equal his brother's scoring power since the war."

Recently Ben bowled a perfect game while teaming with T. I. in a match with Leroy Behrens, military science instructor, and George Tate, graduate of 1937. Ben and T. I. lost the match, 441-453. Ben's former teacher bowled 141.

Placed In Every Tournament Since Ben's return from the service he has placed in every tournament entered. Sunday he placed first, second and third in an Abilene doubles meet while teaming with three different men. He placed sixth Bowler's day in San Antonio last year after beating Buddy Bomar of Chicago and Ned Day of California. Both men are national bowling champions; Day has won the national matched game championship five times.

Honored By Traditional Dance "That night, natives honored me with their traditional dance, which is given for the elephant killer. I felt somewhat like a king for I had got the world's greatest trophy."

"The most thrilling climax of our hunt was the killing of the second lion," Bill added. "We spotted it at 5:30 one afternoon, and since a real sportsman does not shoot after dark, this left me about thirty minutes. I lay on my stomach on a cactus-like plant for 25 minutes, during which time I did not move the cross hairs of my gun off the lion which was crouched in the tall grass with only the top of his head showing. Everything was against me—poor target, poor light and great distance."

Various other big game trophies collected on the trip include: the leopard, a killer at heart; the Cape buffalo, next hardest to the elephant to kill; thick-skinned rhino; rare lesser kudu; Grevy's and common zebra; waterbuck, rean antelope, oryx; Grant's and Thomson's gazelle; gerenuk; and little fleet-footed dikdik.

During their trip, the McMillans covered about 25,000 miles and visited such places as London, Marseilles, Malta, Cairo and Khartoum. Bill will return to Tech next semester.

# Red Raiders Complete Successful Schedule

Lose To Powerful SWC Grid Teams

By JAN BLACKWELL  
Toreador Sports Writer

Today the Red Raiders will complete one of their most successful football seasons since 1941, the year they were defeated by Tulsa 6-0 in the Sun Bowl. The 1946 Tech eleven posted a more impressive record of eight victories and three defeats with three Southwest conference teams (SMU, Baylor and Texas A&M) falling before the gridiron might of the Matadors. True, they have lost four games this year, but these set-backs have been administered by powerful Southwest conference teams that were out to avenge past year's defeats suffered at the hands of the Matadors.

Tech has won five of the nine games played to date and has scored in every game except the 33-0 shellacking by mighty Texas university. In winning these contests the Red Raiders tallied 158 points while the opposition was scoring 209.

**No Breather On Schedule**  
The Red Raiders faced a schedule in which there was not a single breather; one in which their opponents might roll up lopsided victories if the Raiders thought of the next week's tussle instead of their adversary of that week.

They played six inter-sectional games, four teams from the Southwest conference, one from the Big Seven conference and one from the Missouri Valley conference. Of these games they won two while losing four. This record is more pleasing when one stops to consider the fact that Tulsa, downed by the Raiders, won the Missouri Valley crown in a walk, while Denver, also beaten by Tech, placed second to nationally recognized Utah university in the Big Seven conference.

**Season Record Given**  
Tech's Southwest conference foes were four of that areas most powerful elevens. Texas university is ranked seventh nationally and was defeated only by the champion SMU Mustangs 14-13 in an upset. The other three teams have played strong inter-sectional teams and have managed to win a majority of them. Notable among these games was the 7-7 tie which Rice held the Rose Bowl bound Southern California Trojans (the only blot on the Trojans otherwise perfect season).

Texas Tech and Hardin-Simmons have a unique history behind their games. Tech has met the Simmons team 13 times, and true to superstition lost the unlucky thirteenth game in 1946; score, 6-21.

Tech Red Raiders have defeated the Simmons Cowboys six times, lost five games to them and tied them twice—yet Hardin-Simmons outpoints Tech 76-100.

# Conference Title Hangs In Balance

(Continued from Page 1)

Mexico tussle which might prevent them from seeing as much action as they would otherwise. Tackles Bernie Winkler and Billy Joe Russell are on the doubtful list after being roughed up in the Lobo game. Backs Freddie Brown, Tech's ace passer and field general; Ralph Earhart, number one place kicker; leading punter Zac Henderson; and Calvin Stevenson are not expected to see too much duty due to injuries. Ray Crenshaw, quarterback, and Costin Bufkin, halfback, were hurt earlier in the season and will definitely not see action.

Tech is faced with a gloomy picture indeed, but they will be out to preserve a record which has not seen a Hardin-Simmons eleven conquer a Raider team on its home field since 1932. The Tech-H-SU rivalry began in 1926 with 13 games being unredeemed in that period of time. Tech has won six of these contests while losing five and tying two. Never have the Matadors won by more than 13 points, and they have scored more than nine points only three times. Neither team has scored more than 21 points in any of these games with Tech scoring a total of 76 points to 100 for the Baptists.

A comparison of wins over common Border conference foes this season:

H-SU	Opponent	Tech
27-6	West Texas	21-13
35-7	Arizona U.	41-28
33-7	New Mexico U.	26-20

## Techsans Foresee Matador Triumph

By RAY COOK  
Toreador Sports Writer

Tech "whipped out" Hardin-Simmons 21 seasons ago 10-6 in a thrilling dedication of the new stadium. It wasn't Homecoming but the combination of the two this year insists on a Raider triumph. With earnest faces, students and exes both are predicting another Tech victory. Enthusiasm is high and sincere and the predictions which follow are both hopeful and generally conservative.

Clint Formby, arts and science senior: "We will win 14-13."  
Jim Easley, freshman "aggie": "I think Tech will win 13-7."  
Andy Willingham, junior engineer: "They are going to have to appear for games was the reason, Philbrick added.

Team	W	L
Eagles	4	0
Knats	3	0
Little Stinkers	3	1
Mustangs	3	1
Red Bandanas	2	2
Skamps	2	1
Tomcats	1	2
Wildcats	3	1
Owls	3	1
Bobcats	0	3
Tigers	0	4

Hardin-Simmons can boast of a three-year victory period over the Raiders from 1923-30. Tech can boast of a four year victory over the Cowboys 1933-35 and 1941. The two teams didn't meet from 1935 to 1941.

Royal Ferguson, class of '37: "Tech will win 19-14."  
Charles W. Ratliff: "21-6 Tech; if the Raiders have the support of the students."  
I shall now turn my head, shut my eyes and hit four keys: "32-24 favor of Tech."

**G. B. MORRIS**, above, who ranked high as a Texas Tech tackle in 1933-34, came back to Tech this fall as assistant coach. From 1935 to 1942, he was assistant mentor at Breckenridge high school, entering the army in 1942 for assignment as Head Coach and player on the Lubbock Army Airfield football team. In January, 1945, Morris went overseas in the athletic program. He was assistant coach of the undefeated AAF team of the Pacific that fall. Morris assisted with spring training at Breckenridge in 1946, moving to Highland Park as assistant coach that fall. He joined the Tech staff during the past summer.

**TIPP MOONEY**, above, former Chicago Bear professional, was the second new addition to the Tech Coaching staff this fall. He serves as backfield coach for the Men in Red. He earned collegiate letters at Altus, Okla., Junior College, Oklahoma Baptist university and Abilene Christian college. He joined the Bear organization in 1942, playing his first year in Wichita, Kan., and from 1943 to the middle of the 1946 season as halfback and fullback with the Bears. The latter part of last season, he served as backfield coach of the Akron farm club, and assisted at Baylor university last spring.

**MAXEY MCKNIGHT**, above, a Tech graduate, saw service in the right halfback slot for the Red Raiders last season. He is back this year as coach for the freshmen Picadors.

**WILLIAM BROWN**, above left, who quarter-backed Alabama to a 24-0 win over Washington State in the 1931 Rose Bowl, is in his second year as assistant coach and trainer for Tech. He called signals for Alabama three years, trained the Keesler Field athletes in 1943 and 1944 and the Fort Worth Sky-masters in 1945. Brown was head coach of Dothan, Ala., high school for eight years and is brother of filmster Johnny Mack Brown.

**DELL MORGAN**, left, is serving his seventh season as head mentor of the Matadors. For most of his career at Tech, Morgan has been forced to work with inadequate war material, not knowing from game to game which of his players would still be on hand. Nevertheless, his record stands today at 36 wins, 3 ties, and 32 losses. His best years came prior to the war in 1941, when his team won nine and lost two, and last season with eight wins and three losses. Morgan is a recognized authority on the T formation, which he has used exclusively since 1945. He was graduated from Austin college in 1925, where for three years, he was a lineman and fullback. In 1926, he was head coach of the Quanan, Texas, high school team, moving the following year to San Antonio to play professional baseball. In the fall of 1927, he became assistant to Henry Frnka, then Head Coach of Lubbock high school. In 1930, he shifted to Texas Tech as Assistant Coach, filling the position for four years. He subsequently served as line coach at Auburn, then at Rice Institute, before coming to Tech as head coach.

## STAFF SLANTS

This is the season of high flying bowl rumors. The prognostications have reached Tech campus with the arrival last week of a bid to play in the Sun Bowl IF the Raiders defeat Hardin-Simmons. Wild and varied guesses have been made as to the Matadors' possible opponent if they become the host team for this annual classic. Rumors have reached us that Tech's opponent will be Virginia university if they will accept the bid. Virginia is well qualified for the honor. This year they have won seven games, while losing two. They lost to Pennsylvania university 19-7 and North Carolina 7-2 in an upset.

An interesting sidelight in the event of that Virginia tussle is that President W. M. Whyburn's brother is head of the math department at Virginia.

Hardin-Simmons possesses an enviable record in the Border conference. The Cowboys have never lost a Border conference game since their entrance in this football circuit in 1941. Texas Tech defeated Hardin-Simmons that year 7-0, but the Raiders did not play a representative schedule and the game was not considered a conference struggle. H-SU tied Tech in 1942, but beat the Raiders in 1946 for the first time since 1932.

Our bold statement of the week: Don't be surprised if Joe Coleman, head football coach of Odessa's state champion Bronchos, accepts a position as assistant football coach at Baylor university as soon as Odessa's days as a State power wanes.

Our pick for the team to watch in the approaching Border conference basketball race is West Texas State. The Buffaloes have gathered some of the most potent basketball talent that any Border conference college has been able to lure within the past few years. We have room to mention only a few but these are enough to frighten opposition coaches. Coach W. A. "Gus" Miller will be faced with the problem of placing these all-stars in his starting team which is overflowing with returning giants and veterans: Sammy Malone of Stratford, Bill Birdwell of Dimmitt, Charles Kitchens of Childress and Don Woods of Clayton, New Mexico.

Coach Polk Robison has whittled his original turnout of 75 basketball prospects to a spirited squad of 25, including 13 returning squadmen, nine freshmen and three transfers.

The 1947-48 season will launch.

## Picadors Subdued In Muddy Battle

Eleven vicious Aggies from Lawton, Oklahoma's Cameron Junior College, took over soggy Tech field Friday, Nov. 21, and smashed the Picador defense, 33-6.

Tech's freshmen gridsters found the Aggie offense completely out of their class in the first two periods. A stiffened resistance limited the Oklahomans to only one score in the last half, however, and the future Raiders rebounded in the fourth period to mark up their only tally.

It was the tenth win for the favored Aggies, who have made it a perfect season this year by racking up three or more touchdowns per game against all opponents. The Picadors, in a shorter season, beat New Mexico Military Institute 13-7, battled the Hardin-Simmons reserves to a 0-0 tie, and fell prey to this powerful Cameron machine.

## College Club, Keys And Sociis Upset Opponents Sunday

College Club remained the only threat to the leading Wranglers by beating Kemas by a score of 6-0 in the intramural touch football league.

Silver Key upset favored Centaurs by a 7-6 score in Sundays games at Tech Stadium. Broken fingers and bloody play saw the Centaurs go down in defeat before a determined Silver Key eleven.

Socis defeated Los Camaradas by a 13-0 count. Wranglers didn't play this week.

Next games will be played December 7.

Standings	W	L	T

## TO THE OLD GRAD...

Today will bring a re-kindling of old friendships and memories of your College days at Texas Technological College. We welcome you back to this glorious occasion, your Annual Homecoming, to renew the spirit of the "good old days."

Your Alma Mater has made great strides in the past and the future could not be brighter. One of the great traditions of your college days was, and is, the Texas Technological College Official and Standard Senior Ring... a Ring symbol of all of the things that this great institution stands for... The one thing that has not changed through the years.

If you did not secure your College Ring during your senior year you can still avail yourself of this opportunity. Write for a descriptive folder showing styles, weights, finishes and views. Pre-war Ruby stones are again available... a minimum deposit... you can order for any year or degree... handy order blank attached for necessary information to placing order.

Just drop a note to...

# Construction Soars On Campus

### Four New Dorms Double Capacity When Completed

About \$4,000,000 is being spent in constructing four new dormitories which will more than double the normal capacity (two students per room) of the four old dormitories. Sneed, West, Doak and Drane halls house 320 students each and cost about \$340,000 each, the business office said.

The east unit of the new dorm for women was open in September when the regular school year began, and the girls now living in Doak hall will move into the west unit Dec. 2. Miss Mozelle Craddock, dormitory manager, said this week. Boys will then be housed in Doak, moving in Dec. 3, she said.

### Men's Dorm Completion Dates

The east unit of the new dorm for men is scheduled to be ready by the opening of the second semester, Miss Craddock said. She added that she had received a report on dorm progress Monday and that the west unit of the boys dorm would not be completed during this school year but should be available by the opening of the 1948 fall term.

Reservations for the east unit of the boys dorm will not be taken until after Christmas, she stated, adding that the uncertainties involved in building at present make it necessary to add "maybe" to any statement concerning completion.

### Furniture Moved In

Furniture is being moved to the second and third floors of the west unit of Women's Dorm No. 3, and furniture for the east unit of Men's Dorm No. 3 will be here before the next semester opens, Miss Craddock said. Kitchen equipment is here now for the men's dorm, she said.

The four new dorms have the external appearance of being only two buildings, but each of the buildings contains two separate units, each unit having a separate dining room but sharing a common kitchen. An outstanding feature of the new dorms is the modified X shape which eliminates inside rooms.

A number of inquiries have been made by officials of other colleges regarding the new dormitories. Since school opened in September, three college presidents have inspected the dormitories, President W. M. Whyburn said.

## Rec Hall Welcomes All Students For Regular And Special Events

"All students eligible to all things at all times" is the policy of the new Recreation hall, as stated by Dean James G. Allen, director of activities. The hall, constructed of three army surplus buildings, is located one block south of the Administration building.

The hall opened Oct. 20 on a 10 a. m. to 9:45 p. m. schedule daily except Sunday. A juke box is available for dancing at all times, two ping pong tables are set up and periodicals are kept in the hall. Francis Bearden, Tech graduate and assistant dean of men, serves as director, and Curtis Barrett, city recreation director, Joe Bob Foster and Pat Farris assist with the program.

### Cafeteria Opened On Campus Oct. 27

Serving of the first meal Oct. 27 marked the official opening of the privately operated cafeteria in the army surplus building south of the Recreation hall.

Doubt that a cafeteria would be open on the campus this year because of the financial failure of one in 1946 was dispelled when Ray Simmons, former owner of a downtown restaurant, leased the building from the college for three years. Simmons installed plumbing fixtures, made interior decorations and put in one of the finest kitchens in town.

Breakfast is served from 7 to 9 a. m., lunch from 11 a. m. to 2 p. m. and dinner from 5 to 7 p. m., with the fountain and snack bar staying open until 9 p. m.

The cafeteria serves private dinners and banquets to clubs or groups. Any of the three dining rooms may be rented for private parties.

### Clement Conducts Test On Veterans' Records

A comparison of the records of war veterans who entered college without completing high school with those of the same age group who received high school diplomas is being conducted by W. P. Clement, Tech registrar.

Clement, who is chairman of the committee on special projects for the American Association of College Registrars, is directing the nation-wide study for that association in an effort to see if high school graduation is the best criteria for predicting success in college.

The study is made possible on a large scale because many war veterans who did not complete high school are now attending colleges throughout the nation after passing general education development tests, Clement explained.

### Amendment---

(Continued from Page 1)

The amendment. The order was in the form of a temporary injunction restraining Secretary of State Paul Brown from "tabulating, estimating or canvassing" the returns until the court cases are decided.

Although the official canvass of the election had already been made, Judge Archer said existing statutes governing court procedure in election contests made the issuance of the order mandatory. The issuance of the court order was termed by Associated Press as "a first quarter touchdown for opponents of the building amendment in the court contest of the election."

### Questioned On Five Points

Validity of the amendment was questioned in the first case on the grounds that it contained five issues: (1) Whether the Confederate pension tax should be changed from seven to two cents; (2) Whether the 5-cent difference should be reallocated for the purchase of bonds to be issued by the 14 state colleges other than the University of Texas and Texas A&M; (3) Whether a special five cent ad valorem tax should be levied to pay off such bonds; (4) Whether the state ad valorem tax should be lowered from 35 to 30 cents; and (5) Whether the University of Texas and Texas A&M should be permitted to issue bonds to be purchased out of the permanent University fund.

The state's answer contends that the Texas constitution does not limit the legislature or the people to one subject in a constitutional amendment; and, "not waiving the above," contends that the college building amendment contains but one subject "as that term has been defined—providing for buildings and other permanent improvements for state supported colleges and universities."

### Second Challenge

The second challenge brought against the amendment includes the contention that the amendment failed of adoption because votes in six counties were illegal. It is alleged that in these six counties, Texas, El Paso, Galveston, Hill, Moore and Taylor, 18,015 affirmative and 9,657 negative votes were cast.

Votes in those counties were challenged on the grounds that the proposed amendment was not published prior to the election in weekly newspapers as required by law. The second suit reiterates the first charge that the amendment was not presented in constitutionally required form, and contends further:

(1) The amendment was not printed in entirety upon the ballot as required by statute; (2) the description of the amendment con-

## 33 Army Buildings Secured For Tech During Past Year

War surplus property valued at "over a million dollars," according to Pres. W. M. Whyburn, has been obtained, gratis for the most part, for Tech during the last year, largely through the efforts of S. T. Cummings, purchasing agent. President Whyburn praised Cummings for his excellent work in obtaining for Tech property which it could not otherwise have afforded.

This property that has been acquired has made Tech's great expansion in enrollment possible because of extra classrooms supplied and larger heating systems for these converted barracks it made possible. Many of Tech's courses have been improved because of the superior laboratory equipment Tech has got through this war surplus property campaign, officials say.

The most obvious of the property secured for Tech are the 33 army barracks which have been converted into classrooms, laboratories, storage space, a \$17,000 infirmary, a cafeteria and Recreation hall. True they don't carry out the Spanish Renaissance theme of the permanent buildings, but they make possible education for many people who might not have had one otherwise.

Some of the less conspicuous but equally important property procured is in the form of machine tools, mechanical laboratory equipment, electrical laboratory equipment, office equipment, office furniture, auditorium furniture, trucks, a bus, tractors and three steam boilers.

### Training Program Of ROTC Expands

Tech ROTC has been extended to offer training in the Infantry, Air Corps, Signal Corps, and Engineering Corps, which opens ROTC to all students of all departments, says Lt. Col. L. C. Adams, head of ROTC and professor of military science and tactics.

ROTC now includes 360 cadets and a staff of nine officers and eight enlisted men. To accommodate the additional units and members, ROTC utilizes one of the temporary buildings west of the Administration building.

All cadets are issued officer-type uniforms, elementary students in green with overseas caps and advanced students in green and pinks with service caps.

"The military science department will be open during the Thanksgiving holidays and will be glad to see all who are interested in observing the changes and improvements which have been made," Colonel Adams said.

## Tech, A&M Start Research Program

Texas Tech and Texas A&M College have launched a long-range cooperative research program to determine causes of cattle death resulting from grazing winter wheat, on 8,600 acres of land at the Pantex Ordnance plant near Amarillo.

Tech will have a residing director in charge of the planting and farming, and A&M has a veterinary in charge of laboratories and biological experiments, states W. L. Stangel, Tech dean of agriculture and director of the farm.

Ground has been seeded and laboratories set up, but due to the short grazing season expected this year little conclusive experimentation will take place soon, he stated.

### Home Ec Division Chosen For Undergraduate Study

Division of home economics at Texas Technological college was selected as one of the colleges throughout the United States for a study of undergraduate programs by the Committee on Criteria for Evaluating College Programs of Home Economics of the American Home Economics association.

Open House which had been discontinued during the war, was resumed last year. Nearly 3,000 people attended from Lubbock and nearby counties. Plans are now being made for the 1948 Open House, it has been announced.

Four new Bendix washing machines have been installed in Women's Dorm No. 3, and coke machines are in all the women's dormitories.

Latest statistics have revealed that 50 percent of the people who marry are women.

## Council Officers Release Reports On Campus Funds

Reports on four campus funds were given this week by Clint Formby, Student council business manager, and Earl Sears, Council vice president.

Student Union Building fund totals \$7,629.34 in cash and bonds, Formby said. The fund was increased \$1,500 last spring from the proceeds of the Varsity show.

Campus Beautification fund has \$1,870.19, stated Sears, who is chairman of the Campus Beautification committee. Definite plans for use of the fund have not been made, but some Council members have suggested that the knowledge and forces of various departments on the campus should be utilized in the project. They suggest that the horticulture department could be called on for planning and for carrying out some of the plans, and could continue this work. Horticulture department, Buildings and Grounds committee and Campus Beautification committee could work together, they say.

Campus Lighting fund contains \$131.24, which will be used toward permanently lighting the Administration building when materials are available, Sears stated.

Student council fund has a balance of \$8,926.34, Formby said. This sum includes \$7,248.36 which was called in last summer from organizations which receive allocations from activity fees. During the war some organizations accumulated surpluses from the allocations, which are made by the Council, he explained. Use of the funds is to be determined by the Council.

A war surplus, 33-passenger bus was bought by Tech recently for the transportation of laboratory groups on field trips and other worthy purposes.

A workman was unhurt recently after falling 40 feet down an elevator shaft in the library building.

## PLACEMENT SERVICE ESTABLISHED FOR TRAINED TECHSANS NOV. 1

A complete placement service to aid Techsians in securing desirable positions has been in operation on Tech campus since Nov. 1, President William M. Whyburn said. It is an important addition and will provide service for trained Techsians in all fields, Dr. Whyburn stated.

The college committee of placement service is headed by Mrs. H. M. Jenkins, registrar.

MRS. HARMON JENKINS

Mrs. Jenkins said that senior students and graduates are invited to fill out applications for employment which would serve both as applications and as registration. The blanks will include personal data, previous experience, other qualifications, and possibly pictures in the future. She urged that those seeking employees as well as those seeking employers make use of the service. Mrs. Jenkins may be reached by phone, letter or by personal calls in her office, Ad-108, during regular office hours.

Formerly Employed Here "We are quite fortunate in having secured Mrs. Jenkins as secretary to the placement committee," Dr. Whyburn stated. "In addition to her wide acquaintance throughout the region, Mrs. Jenkins has a

- Saturday, December 6**
- Silver Key
- Rec Hall dance, 8:30-11:30 p. m.
- Canterbury club dance, 8 p. m., Seaman hall
- Ko Shari patroness open house for club members, 7:30-9 p. m.

## Medical Service Provided By New Compulsory Fee

Fulfilling a 22-year need, Tech's infirmary opened Nov. 12 with facilities for care of 20 persons, after the dispensary had begun operation in late September.

Space for both infirmary and dispensary was furnished by army surplus buildings located north of the Press building. Cost to the college was \$17,500; \$3,000 going for surgical supplies and equipment and \$2,500 being spent to provide a kitchen in the infirmary. S. T. Cummings, purchasing agent, said.

The long-awaited medical service is provided by compulsory activities fee which has been increased to \$15 each semester. A student judged by Dr. James G. Morris, part-time college physician, to need hospitalization (not including conditions which require the services of specialists or surgeons) may stay in the infirmary up to seven days each semester without charge. Students must pay a fee for each additional day the physician requires him to stay.

The infirmary is not a substitute for a hospital, officials stress. It will be used for treatment of mild illnesses and as a place of observation to determine need for hospitalization. The staff, which is to have 16 members, is under the supervision of Mrs. Marion H. Funk.

Vaccinations, treatment of minor illnesses and examinations are given in the dispensary. Registered nurses and nurses aides are on duty 24 hours each day.

tained on ballots used in mechanical voting machines differed from mandatory provisions of statutes and the Senate joint resolution proposing the amendment; (3) irregularities in publication of the amendment existed in numerous counties throughout the state; and (4) no elections were held on the amendment in Frio, LaSalle and McMullen counties, contrary to express provisions of state statutes.
