

Religion Should Fit Life, Says Dr. Edwards

by CAROLYN JENKINS

"Being sure that the religion we have will fit every dimension of life," is the course of Dr. K. Morgan Edwards' topic "Living in Four Dimensions," currently being discussed in the Willson Lectures. The first lecture in this thirteenth series, "The Horizontal Push," was delivered yesterday

Dr. K. Morgan Edwards, featured speaker for the Willson lectures, will address the sororities and fraternities Wed. night at 6:15 in the Aggie Auditorium.

by Dr. Edwards. The distinguished, slightly graying teacher and pastor was introduced by Dr. E. N. Jones.

DR. JONES also introduced Mr. and Mrs. J. M. Willson, sponsors of the annual lectures.

Dr. Edwards explained that the "Horizontal Push" was the most

dangerous of the four dimensions because it is a struggle for power and materialism. We tend to push out horizontally on the surface of the earth and on life in our quest for things.

Different attitudes toward material things were expressed by Edwards in his lecture.

ONE ATTITUDE is that things are evil and we should try to avoid them. This attitude is held by a minority. Another held by millions is that things are evil yet we cannot extricate ourselves from them.

STILL ANOTHER is that things are neither good nor bad but just as people make them. In contrast is the attitude that things are primarily good; our problem is how to use these things so they will not destroy us.

TODAY, many grey-flannel suits are caught in the horizontal push. Parents are promoting materialism by pushing their children.

These children learn of the struggle of materialism at an early age when they are given material things rather than affection.

The more a man confines himself to the material realm, often the less happy he is, expressed Dr. Edwards.

God has richly blessed us in our economy but we must not fall down at the altar of these blessings. We must appreciate the good things of life rather than worship them.

IN CLOSING, the forceful and inspiring speaker said, "Put God where He belongs in your life and other things will fall into place."

The invocation for the first lecture was delivered by Cecil Matthews, director of the Methodist Student Center. Musical selections, "Fraternal Hymn" and "Jacob's Ladder," were given by Phi Mu Alpha Sinfonia, directed by Rex A. Pope.

TODAY'S LECTURE, "The Ver-

tical Reach," will be held in the Union Ballroom at 9 a.m. Invocation will be given by Rev. Davis M. H. Richmond, Presbyterian Student Center and Dr. Gerald W. Thomas, agriculture dean, will introduce the speaker.

"Depth Reception" is the topic for tomorrow's 10 a.m. lecture. Dr. Edwards will speak on "Breadth Expression" Thursday, also at 10 a.m. in the Union.

BULL SESSIONS will be held tonight in Horn Hall for Drane, Horn and Knapp; tomorrow night in Sneed Hall for West, Sneed, Gordon and Bledsoe; and Thursday night in Doak Hall for Doak and Weeks. Dormitory discussions will begin at 10 p.m.

Personal conferences with Dr. Edwards are being scheduled, beginning at 2 p.m. daily in Dean J.G. Allen's office.

THE WILLSON LECTURES have been held at Texas Tech since 1946, when the J. M. Willson fam-

ily of Floydada set up a fund to be used to bring a prominent religious speaker annually to the campus.

Through this fund of \$15,000 ten distinguished speakers representing almost as many denominations have given one or more series of lectures to students, faculty and Lubbock public. Mr. Willson has established nineteen such lectureships.

DR. EDWARDS, is pastor of the First Methodist Church in Pasadena, California. He has held other pastoral positions and was a lecturer in the Graduate School of Religion of the University of California.

Dr. Edwards received the A.B. degree from Lebanon Valley College, the B.D. Cum Laude from Drew Theological Seminary and the D.D. degree from the University of Southern California. He also holds the L.H.D. degree.

PREPARATION — Dr. K. Morgan Edwards, Willson Lecturer, prepares his talk on "The Vertical Reach," slated to be delivered this morning in Tech Union as part of this year's Willson Lectures.

TOREADOR THE TEXAS TECHNOLOGICAL COLLEGE

Vol. 34 Lubbock, Texas, Tuesday, October 28, 1958 No. 17

FOR VENTANA BEAUTIES

All-New Contest Slated

"This year's La Ventana beauties will be picked in a campus contest based on the annual Miss America Pageants," announces yearbook editor Billy Ellis.

"The new way of selecting beauties will give students an opportunity to watch the judging process and will provide another campus first for the new and different La Ventana."

Previously, pictures of the finalists were sent to a famous per-

sonality, who picked the beauties from photographs.

This year, La Ventana will give the judges a chance to see the entrants in person. The new approach provides for a local contest, similar to the usual Miss American Pageant, with exception of the talent portions.

LA VENTANA plans to secure the services of outstanding local and area judges who will pick winners on the basis of beauty, poise, charm and personality.

Preliminary date for the pageant has been set for Saturday, Dec. 6. Finalists will be chosen by the judges in a closed afternoon session, to set the stage for the main pageant that evening, tentatively

scheduled to be in Municipal Auditorium.

Plans for entertainment, in addition to introduction of the beauties, include background music by well-known combo, with an attractive setting or backdrop to compliment the finalists.

THE TOP TEN winners, which will be acclaimed the "1959 La Ventana Beauties" that night, will have due incentive for winning this year. The 10 beauties will be guests of a winter resort sometime before Christmas, for an all-expense paid holiday. Pictures for the '59 La Ventana will be taken at the resort.

To cover the proposed expenses this year, there will be a \$1 entry fee charged, and each organization will be allowed to enter as many girls as they wish, while individuals may enter themselves or their candidates.

PROPOSED deadline for entering the La Ventana Beauty Contest is Tuesday, Nov. 25. All names of entrants, along with the \$1 entry fee must be turned in to the Journalism office, J101, by 5 p.m. on that date. Information forms will be available for each girl.

The Publications Committee, in action Monday, approved the plan, and authorized Sigma Delta Chi, who will sponsor the contest, to charge \$1 for adults and 50 cents for students at the main pageant the night of Dec. 6. Proceeds will defray expenses for the winners' holiday.

Organizations are asked to watch THE TOREADOR for further information regarding this latest development of the new, all new 1959 La Ventana.

L-V Still 'Shoots'

Tech students who failed to secure picture appointment before the deadline last week, but who want to be pictured in the 1959 La Ventana, may make late reservations by paying a \$1 "penalty."

Students needing appointments should come by the La Ventana office before Saturday noon to schedule their individual pictures. These late pictures will be taken three days only, Nov. 3, 4 and 5.

Fine Arts Festival Begins Next Week Groups Join Talents

by CLAYTON WHITE

Tech puts emphasis on fine arts next week when eight departments combine talents for the first Fine Arts Festival.

THE FESTIVAL is being sponsored by the Tech Union and the

departments of music, speech, women's physical education, allied arts, English, foreign language and applied arts.

"The Fine Arts Festival represents the fulfillment of a dream in program planning of some three

years for the Union by fusing the creative values in the area of arts and cutting all departmental lines in so doing," said James G. Allen, Dean of Student Life.

"THE PROGRAM is designed to satisfy the demand in union programming which will bring together the finest abilities in the areas of the arts in the student and faculty at Texas Tech," Allen added.

Kicking off the list of outstanding events at 3 p.m. Sunday will be a lecture by Richard K. Tracy, Tech allied arts professor, titled "What is Fine Arts." Afterward a reception will be held in the Anniversary Room.

THE SPEECH department's production of "Antigone," which was highly acclaimed by Dallas critics, will be held in the Aggie

Page 6, FESTIVAL BEGINS . . .

Attention Frosh

The deadline for Freshman cheerleader petitions is 1 p.m. tomorrow.

Petitions should be taken to the Student Council Office, according to Dennis McCarty, publicity chairman of the Freshman Council.

Candidates will meet in Ad 260 at 5 p.m. Friday to divide into groups for the try-outs which will precede the Nov. 2 elections at 2 p.m. in the Rec Hall.

"Antigone" Will Open As Part of Festival

"Antigone" as presented by the Tech drama department at the famous Margo Jones Theater at the State Fair will open in the Livestock Pavilion in connection with the Fine Arts Festival on Thursday, November 6.

THE PRODUCTION, as adapted by Lewis Calentiere from the play by Jean Anouilh, will also run Friday and Saturday on the arena-type stage, with the audience seated on four sides.

Tickets will go on sale at the box office in the Speech Building Monday for \$1 each. Tech students may obtain tickets by presenting I.D. cards at the office.

"ANTIGONE" concerns two brothers who kill one another over the throne of Thebas. On becoming king, their uncle Creon (as portrayed by Bud Thompson), orders one of them, Polynices, left unburied as a traitor. Anti-

gone (played by Anne Barasch) decides at the cost of her life, to bury him to grant his soul eternal life.

Other than Thompson and Miss Barasch, the cast includes Halcyon Hildreth, nurse; Bernard Landes, Chorus; Barbara Garnett, Ismene; Bob Nelms, Halmon; Bill Luck, Carl Darwin and Louis Young, guards; Don Taylor, messenger; Jay Thompson, page, and Elizabeth Hoyer, Eurydices.

THE SETS for the production were designed by Virginia Mahaley and Chairman Richard Hopson, Dewayne Cox and Larry Van Cleave built them.

Others on the production crew are Arthus Evans, stage manager; Darlene Dorrell, assistant director; Vera Simpson, property manager; Chairman Jo Morris, Cox and Roland Myers, lighting; Cheri Lauri, sound, and Gail Cooper, make-up.

Fellowships Available For 1960 Grad Work

The National Council of Mortar Board has announced the Katherine Willis Coleman Fellowships, awards of \$500, to be given for graduate work for the academic year 1959-60.

One Fellowship will be awarded to an active member of the present chapter of Mortar Board. Recipients must qualify as a candidate for an advanced degree beyond the bachelor's in an accepted university.

ANOTHER Fellowship will be given either an alumna or an active member.

The alumna recipient must not have graduated from college more than two years prior to the award and must not have previously attended graduate school.

The Katherine Willis Coleman Fellowships, named for a former National President of Mortar Board, have been awarded for several years to active members of the organization as an aid to graduate study.

APPLICATION forms or additional information may be obtained from Miss Daisy Parker, Mortar Board Fellowship Chairman, Department of Political Science, Florida State University, Tallahassee, Florida.

Application requests must be made by December 1, 1958.

Frosh Legislator's Life Is One of Havoc, Mayhem

The life of a legislator in a freshman girls' dormitory isn't quite the happy-go-lucky one it appears to be.

FOR INSTANCE, a certain legislator, after wearily trying to answer a million questions on "moving-in day," was going to her room to catch a few minutes quiet before she stepped back down into the lobby of tangled freshmen, parents and boys, boys!

She saw one of the young ladies on her wing with tears in her eyes and a look of total bewilderment on her face. The legislator, feeling sorry for her new charge, asked what the trouble was.

"I'M LOST. I can't find my room," wailed the girl. Finally the legislator was able to find the lost room number and, after safely showing the girl her way back, peace was restored.

Several days later a wing meeting was held. It was particularly

necessary because the girls hadn't been signing in or out.

THEY USED the fire escape, didn't know where to eat, and most important, the phone and lounge buzzers had been totally ineffective.

The meeting of dos and don'ts was held and naturally lasted a couple of hours.

The first serenade really had the dorm in a spin. The girls had just gotten settled for a quiet evening when boys march over and the "havoc" began.

Girls screamed and ran to the nearest window. After a few songs, the boys left a dorm full of swooning femmes. Two hours later the girls were still talking about that cute boy who was standing in the middle.

"YOU KNOW, the one that winked at me?" The girl was only on the third floor and it was pitch dark. What 20-20 vision!

Ghouls Ride Friday Night

All you Texas Tech ghosts and goblins can celebrate Halloween at the Union Friday night.

"Calypto Halloween" will be the dance theme in the Rec Hall from 8:30-11:30 p.m., with music provided by the Four Teens.

For thrill inclined students, two horror movies, "Son of Frankenstein" and "Revenge of the Creature," will be shown in the ballroom at 7:30 p.m.

Other Union activities this week include the Tuesday Night Dance, 7 p.m. in the snack bar and the Wednesday Night Dance Instructions, 7 p.m. in the Ballroom.

Army ROTC Wins 'Shoot'

Texas Tech's Army ROTC won a three-way rifle match Thursday with a high score of 1,358.

West Texas State College's Army ROTC team came in second with a score of 1,352. Tech's Air Force Team scored 1,315 points.

Leon Ward was top marksman with 280 out of 300 shots.

Tommy Starnes, G. R. Brown, Irby Range, and Larry Justice are the other members of the winning team.

'Hop Cats' Hop In Tech Union

Techsans are urged not to forget the second record hop of the year — tonight according to Jill Nost, chairman of the Tuesday night dance committee.

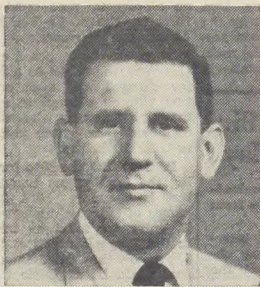

The hop begins at 7 p.m. and ends at 8:30 p.m. in the snack area of Tech Union.

Job facts from Du Pont

DU PONT PLANTS AND LABORATORIES IN 26 STATES OFFER VARIED JOB LOCATIONS TO TECHNICAL STUDENTS

BENEFIT PROGRAM MEANS ADDED INCOME

By E. H. Cox
Du Pont personnel representative

Don't forget the "extras" of an employee benefit program when you compare the job offers and salaries of different companies. At Du Pont, these extras mean added income that doesn't always meet the eye. They include life insurance, group hospitalization and surgical coverage, accident and health insurance, pension plan and paid vacation.

In addition, the Company sponsors a thrift plan. After two years of service, for every dollar you invest in U. S. Savings Bonds the Company sets aside 25 cents for the purchase of common stock in your name. Roughly, 60,000 of our employees are now participating in this plan.

If you have specific questions on Du Pont benefits, just send them to me. I'll be happy to try to answer them. E. I. du Pont de Nemours & Co. (Inc.), Room 12421 Nemours Building, Wilmington 98, Delaware.

EXPANSION PROGRAM OPENS UP MANY NEW CAREER OPPORTUNITIES

The location of your first assignment with Du Pont depends on your qualifications and on the openings in your field, but every effort is made to match the job and the location with your preference. The chances for a successful match are good.

Today there are men and women carving out careers with Du Pont at more than 75 plants and nearly 100 laboratories spread throughout 26 states. Last year the Company spent \$220 million for new plants and for increased capacities at existing installations. This year new plants have already been put into operation in Virginia and Michigan. Six more are under construction. Others are planned for the near future.

Most Du Pont units, it is true, are located east of the Mississippi. Company headquarters, for example, along with many labs and plants, are located in and around Wilmington, Delaware, which is a pleasant residential area within easy reach of Washington, Philadelphia and New York. But there are also plants and laboratories in California, Iowa, Kansas and Texas, and plants in Colorado, Missouri and Washington.

Wherever you're assigned, you'll be proud of the Du Pont Company both on and off the job. You'll find the people you work with friendly, stimulating, and active in the life of the community.

MECHANICAL ENGINEERING MOVIE AVAILABLE FOR A.S.M.E. MEETINGS

There's a great demand for mechanical engineers at Du Pont. In fact, the ratio of mechanical to chemical engineers is just under 1:2. Whether your chosen field is research, development, plant engineering, production supervision or sales engineering, you'll find a good future at Du Pont.

If you would like to learn in detail what mechanical engineers do in the chemical industry, arrange to see the Du Pont film, *Mechanical Engineering at Du Pont*. It is available at no cost for A.S.M.E. chapter meetings, fraternity house and dormitory showings. Write to Room 12421 Nemours Building, E. I. du Pont de Nemours & Co. (Inc.), Wilmington 98, Delaware.

SEND FOR INFORMATION BOOKLET

Informational booklets about Du Pont are yours for the asking. Subjects include: mechanical, civil, metallurgical, chemical, electrical and industrial engineers at Du Pont; technical sales, research and development. Just name the subject that interests you and send your name and school address to E. I. du Pont de Nemours & Co. (Inc.), Room 12421 Nemours Building, Wilmington 98, Delaware.

Frosh Men's Honorary Accepts Eligible Pledges

Qualified freshmen men interested in Phi Eta Sigma, men's honor fraternity, can apply for entrance into the organization at student life dean, James G. Allen's office.

He must complete a minimum of 12 hours. Grades in 1-hour courses not requiring final examinations are not included.

Any student wishing to be checked for membership eligibility may go by the student life office, as checking processes may student during either of his first fail to pick up all eligible individuals.

THE DRESS PARADE

In all my years of observing coed fashions—and I have been arrested many times—I have never seen such virtue, such dash, such *Je ne sais quoi* as can be found in this year's styles!

I am particularly enchanted by the new "baby waist" dresses which so many of you girls are favoring this season. How demure you all look in your "baby waists"! How sweet! How innocent! How colorful when your housemother lifts you up and burps you after dinner!

Another trend that leaves me limp with rapture is the oversized handbag. Goodbye to dinky little purses that hold nothing at all! Hurrah for today's sensibly sized bag with plenty of room for your makeup, your pens and pencils, your shelter half, your Slinky toy, your MG, and your Marlboros.

Did I say Marlboros? Certainly I said Marlboros. What girl can consider herself in the van, in the swim, and in the know, if she doesn't smoke Marlboros? What man, for that matter. Do you want a filter that is truly new, genuinely advanced, but at the same time, does not rob you of the full flavor of first-rate tobacco? Then get Marlboro. Also get matches because the pleasure you derive from a Marlboro is necessarily limited if unlit.

To return to coed fashions, let us now discuss footwear. The popular flat shoe was introduced several years ago when it became obvious that girls were growing taller than boys. For a while the flat shoes kept the sexes in a state of uneasy balance, but today they will no longer serve. Now, even in flats, girls are towering over their dates, for the feminine growth rate has continued to rise with disturbing speed. In fact, it is now thought possible that we will see fifteen-foot girls in our lifetime.

But science is working on the problem, and I feel sure American know-how will find an answer. Meanwhile, a temporary measure is available—the reverse wedgie.

The reverse wedgie is simply a wedgie turned around. This tilts a girl backward at a 45 degree angle and cuts as much as three feet off her height. It is, of course, impossible to walk in this position unless you have support, so your date will have to keep his arm around your waist at all times. This will tire him out in fairly short order; therefore you must constantly give him encouragement. Keep looking up at him and batting your lashes and repeating in awed tones, "How strong you are, Shorty!!"

Next we turn to hair styling. The hair-do this year is definitely the cloche-coif. One sees very few crew cuts or Irene Castle bobs, and the new Mohican cut seems not to have caught on at all. In fact, I saw only one girl with a Mohican—Rhodella H. Sigafos, a sophomore of Bennington. Her classmates laughed and laughed at her, but it was Rhodella who had the last laugh, for one night a dark, handsome stranger leaped from behind a birch and linked his arm in Rhodella's and said, "I am Uncas, the last of the Mohicans—but I need not be the last, dear lady, if you will but be my wife." Today they are happily married and run a candied-apple stand near Macon, Ga., and have three little Mohicans named Patti, Maxine, and Laverne.

Congratulations to Mr. and Mrs. Uncas and to all of you who have discovered the pleasures of Marlboro and Marlboro's sister cigarette, non-filter Philip Morris, both made by the sponsors of this column.

SHOWN ABOVE are Barbara Hawk, clothing major, and Miss Gerlach, asst. prof. of home-ec., arranging the historic costume collection which is now being displayed in the Home-Economics Building.

Historical Dolls, Foundations Displayed By Home Ec Department

No Tech girl who is interested in being well groomed should miss seeing the display now in rooms 257 and 259 of the Home Economics Building. The display is of historic costumes and corsetry approved by the Chicago Art Museum.

Formfit Company furnished the clothing-textiles department with twenty mannequins, each authentically dressed to represent fashions of her period in history.

Each figure stands 3 feet high, and faces show a definite likeness to historic persons. The hair styles and fabrics, too, represent the popular taste of each period.

According to Miss Gerlach, of the clothing department, the display serves several purposes. First, it stresses the importance of wearing proper foundation

garments in order to achieve a well groomed effect.

The department is also attempting to stimulate interest in the history of costumes course which will be offered next semester and is offered only once every two years.

The display also ties in closely with class projects of clothing

Page 6, DOLL DISPLAY . . .

Religious Council Appoints Five New Committees

Sandra Standefer, Jim Dinsmore, Tom Jenkins, Carl Crouch, Steve Noble and Mary Ann Girod have been named to committee chairman posts on the Student Religious Council.

Miss Standefer will head the worship and program committee. Working with her will be Max Macon, Jim Fisher, Arthur Berg, Douglas Pummill, Helen Anderson, Sallye Lemon, Linda Perryman and Charles Martin. Advisors are Louis Cobbs and C. C. Schmidt.

PUBLICITY committee chairman is Dinsmore. His committee members are Richard Estes, Fred Gloyna, Dorothy Tennant, La Britta Logsdon and Kent Simms. David Richmond and Dr. E. H. Lee are advisors.

Jenkins is chairman of the pro-

jects committee. Al Kovar, Morris Sheats, Julie Loomis, Gayland Daugherty and Carolyn Dopson are also committee members. Wayne Harris is the advisor.

HEADING THE 1960 Religious Emphasis Week committee is Crouch. Others on this committee are Von Ross Prah, Richard Steede, Len Fuqua and Bill Blann. Advisor is Fred Holt.

A new album that is making quite a mark for itself in the record world is "Sweet Tunes of the Fantastic 50's" by Earl Bostic. The selection of tunes is excellent, including such hits as "Ebb Tide," "Unchained Melody," "Blue Tango," "Autumn Leaves," and "Love is a Many Splendored Thing."

Ernestine Anderson has a new release "Hot Cargo," and Roy Hamilton sings "With all My Love." Hamilton's album has such songs as "Always," "Speak Low," and "Pledging My Love."

"Yes Indeed: Pat Boone," and "La Palome" with Billy Vaughn are two new releases on Dot.

The sound track from "The Big Country" and "Damn Yankees" may now be purchased.

These albums may be purchased at Wayne's Record Store. There are three stores in Lubbock: one downtown, one across from Tech, and one on 34th street which stays open until 9:00 o'clock every night.

Student Has Right To Know the Truth

OF THE PEOPLE, by the people, and for the people . . .

Government in the United States represents the best and most advanced governmental concepts in the world, and the basic theory of United States government at all levels is that the government is a servant of the people—not vice versa.

In order that the public be able to assume the important role demanded of it by this governmental concept, it is necessary to keep the public informed of all governmental doings.

The press and other news media assumed the responsibility of watchdog of the government and purveyor of news. In order that the people, and the press as its watchdog, be assured of its role in government, the first ten amendments of the United States constitution was adopted.

Government is present at all levels where people work together as an organization, and it is correct to assume that any United States government is subject to the American concept of government.

This holds true at Tech. The students, as persons who pay tuition and taxes, are personal representatives of others who pay taxes, form the public. The administration is the government.

As the public, the students have the right of "consent of the governed." And as is necessary elsewhere, the student public must be informed as to governmental decisions.

The student news media, following the American concept, must assume the responsibility of conveying news to the student body.

The student news media and student body, by one means or another, must inform themselves of the doings of its government. If the government is helpful in supplying information—all information—to the students through the news media or other ways, the public-government relationship will go much more smoothly.

But if the government tries to block the flow of news which, in its estimation, would cause student disapproval if known, the student body will find it out in piecemeal, often incorrect, fashion, causing a bad relationship between the government and public.

For the best possible situation, the Tech government should be kept in the right perspective. We hope that better understanding will grow along this line in the future.

FICTION

Passing Help

by WAYNE GLENN

The truck had turned over on its side in the ditch. It was balanced precariously on the steep incline, still rocking with momentum.

When Laban braked to a stop the dust was just starting to settle. He turned to the woman beside him, "Stay in the car and watch the kids!" As he opened the door there was a snap and a flash of light. The truck had caught fire.

He ran toward the huge cab, shielding his face with his hands and arms. By the light of the

flames he could see the man caught under the fender and front wheels. He leaped to the pinnioned man's side.

Grasping the unconscious truck-driver under the arms, he strained to pull him loose. The man moaned in anguish. As Laban dropped him, there was a voice at his elbow, "Laban come on!" his brother tugged at his arm, "Dammit, come on! He's done for. You can't help him!"

"Grab his arms, Dude, while I lift this bumper!" The words were urgent and harsh.

Page 5, FICTION . . .

two party

Hard Time

mccarty

Quizzes are giving some people a hard time. Last week, a Tech coed was sitting in class nervously awaiting the upcoming test.

The whole situation got the best of her, and she fainted right in the classroom. A couple of men carried her out, and the quiz went on as scheduled.

It's a wonder that this didn't cause a chain reaction, with about 14 other nervous people falling out. It's also interesting to wonder what the grades were on this test. Oh well, so goes life at Texas Tech.

Lately, the Faculty Lounge, located just south of the Tech Union, has been used for several student functions. This is a very hospitable gesture on the part of the officers of the faculty organization which operates the Lounge.

It's certain that the students and members of the Union program committee appreciate being able to use this place for special occasions, and it serves to better the relationship between the teachers and students

All student organizations which deserve financial aid from the matriculation fees had better get on the ball. The deadline for allocation forms to be turned in is 5 p.m. Wednesday.

The forms, if not received through the mail, are available in the Student Council office. Each organization should include its activities, income and purpose on the request form.

We on the TOREADOR staff are still hearing complaints from students, different campus organizations and various departments about not being able to get news in the paper.

Let us repeat, for the best possible results in news coverage, these persons should inform the staff of news events between 1 and 3 p.m. on Monday, Wednesday or Friday, or still better, bring the news story over in person at the given time.

When you get to the Journalism Building, go upstairs to Room 206 at the north end of the hall. There, ask for Tommy Schmidt who is the News Editor. If, after this procedure, your news still does not get in, come to the Editor's office in J209, and the situation will be further discussed.

The Security Patrol at Tech, from all indications, has been doing a good job. Relatively few complaints from students have been heard by the TOREADOR, so things must be going well.

The people in charge, Dean Lewis N. Jones and Security Chief E. B. McKnight, deserve a pat on the back. Although the situation isn't ideal as yet, it is a vast improvement of previous traffic enforcement.

The Traffic Committee of last year also deserves a treat deal of credit for the present situation. They brought to light several of the needed changes which were enacted this year.

It came to light the other day that the new classroom building is expected to be ready for occupancy for next September. This seems like a rush job, and it is doubtful that the building will be completed by then, but it would be nice. Wonder what will happen to the student parking in that area?

What About It

tommy schmidt

One fact looms prominent on the campus of this college—Texas Tech's dormitory supervision is at its lowest ebb in years.

NOW I DON'T intend to waste my time considering the poor, almost unbearable and certainly inferior facilities of the new men's dorms. That's been discussed quite sufficiently in other circles.

No, the main problem, as I see it, is the age-old dilemma which has remained unsolved for so these many years—that being the not-so-tender morsels fed into the delicate stomachs of Tech students.

WELL, LET'S TAKE first things first. As for myself, I am currently being initiated into dormitory life, so my ability to compare may be somewhat hindered—at least personally. But one thing is sure, you won't hear me referring to my four walls and a sink as a "home away from home."

So, will dispense with my authority and opinion in favor of a short resume of my colleagues' feelings.

FOR INSTANCE, a lot of students feel that the cooks must be down to "the bottom of the barrel" in scraping up food for meals. Others disagree; they say it's just as bad at the top of the barrel as at the bottom.

I even heard one student say, in a moment of exasperation, that if the way to a man's heart is through his stomach, no wonder some of the people concerned aren't married. Of course, I don't know any of the personalities involved, so I shall refrain from mentioning any names.

WHAT STRIKES me as odd, however, are the prices charged for these meals whenever visitors eat in dorm cafeterias. Prices are and I quote a dorm cafeteria employee, 85 cents for weekday meals (excluding breakfast) and \$1.25 for Sunday meals.

These prices, to say the least, are unusual if not positively unique, especially when you consider that a meal of better quality can be had for less in almost any off campus cafe.

ALSO, if you'll notice, there is a substantial increase in price of the Sunday meal and those during the week. To be sure, the food is somewhat better on Sunday, but 45 cents worth? I doubt it. Maybe they contribute the increase to the table cloths and fancy lily-white napkins available every Sunday.

But whatever it is, one thing is certain, America's resources of carrots, English peas and beets must be unlimited.

The TOREADOR, official student newspaper of Texas Technological College, Lubbock, Texas, is regularly published each Tuesday, Thursday and Saturday morning during the two long terms, excepting holidays, by students of the College as an expression of student news and opinion only.

The TOREADOR is financed by a student matriculation fee, advertising and subscriptions. Letters to the editor represent the views of their writers and not necessarily those of the TOREADOR. Letter must be signed, but may be published without signatures in justifiable instances. The views of the TOREADOR are in no way to be construed as necessarily those of the administration.

Entered as second class matter at the Post Office in Lubbock, Texas, under the act of March 3, 1879.

Mighty legs and arms straddled and as Dude grabbed the driver's arms and pulled, the cab slid off the prostrate man. The unconscious driver out of the range of the truck, stumbling in haste. Laban let the cab fall, jumping back as he did. Just as he moved his foot turned and he moved forward instead. The truck piled over and he was pinned underneath. The gas tank exploded.

By this time there were several cars parked along the ditch. People were starting to gather around the still flaming truck. Dude slumped by the limp truck, looking woefully at the bus wreck.

A man walked up beside Dude and said, "That was the bravest thing I ever seen."

Dude put his head in his hands and moaned, "That's my brother over there under that truck." He'd been there for hundreds of years of pent up resentment and anger jumped in his mind. "He's dead because I saved this man here. A man who didn't even know." Dude was crying.

The man squatted beside Dude and said, "Greater love has no man that he lay down his life for a stranger."

Dude raised his head, "Don't make him any less now does it? He's dead just the same."

The man said, "He's in a place than this world now should think about that one let sorrow and grief over you."

"Don't bother me now, may not the time or place."

The man said, "I'd like to help if I can."

"Help! I've been helped by you all my life. You've helped so much that we loaded everything we had in our car and up and started to leave the street."

The man stared at the ground and was silent.

... Fiction Techsans Talk Back

Mighty legs and arms strained, and as Dude grabbed the driver's arms and pulled, the cab slowly lifted off the prostrate man. Dude dragged the unconscious truck-driver out of the range of fire, stumbling in haste.

Laban let the cab fall, jumping back as he did. Just as he moved his foot turned and he fell forward instead. The truck toppled over and he was pinned underneath.

The gas tank exploded.

By this time there were several cars parked along the ditch. People were starting to gather around the still flaming truck. Dude was slumped by the limp truckdriver looking woodenly at the burning wreck.

A man walked up beside him. "That was the bravest thing I've ever seen."

Dude put his head in his hands and moaned. "That's my brother over there under that truck." Two hundred years of pent up resentment and anger jumped in every word. "He's dead because he saved this man here. A man he didn't even know." Dude was crying.

The man squatted beside Dude and said, "Greater love hath no man than that he lay down his life for a stranger."

Dude raised his head. "That don't make him any less dead, now does it? He's dead just the same."

The man said, "He's in a better place than this world now. You should think about that and not let sorrow and grief overcome you."

"Don't bother me now, man. It's not the time or place."

The man said, "I'd like to help if I can."

"Help! I've been helped plenty by you all my life. You've helped so much that we loaded everything we had in our car and pick-up and started to leave the state."

The man stared at the ground and was silent.

Dude said, "Mister, that's Laban's family over there with my wife. That woman crying so much, she's his wife. She can't sit down and eat beside you. And see those kids there beside her. They can't go to school with your kids. And now he's died to save you."

The man groped for words, "I know it's hard to bear but God's ways are strange and sometimes unexplainable. Take consolation from the fact that he is in a much better place now. Try not to strike out in anger. Be tolerant of mere men such as we."

"Tolerant! Don't you talk to me about tolerance. I know what you say. Love thy brother! Have mercy and pity! I know what you do too. Get a man down and drive as far into the dirt as you can! You wouldn't let Laban come to your church. Why should you let him in your heaven?"

The man said, "It's not my heaven, it's God's heaven."

Dude jumped to his feet, "It's God's earth too mister. Even though only us men are on it."

He started walking toward the small group of people standing by themselves.

Editor,

At the outset of this onslaught I would like to say that as one of the species so recently labeled "A Tech Girl" I have withstood quite a tussle with my conscience before writing this in answer to "The Spastic". I take my pen in hand in defense of my fair sex on this campus, regardless of the effect stooping to such conflict may have on my female ego.

The fact was long ago established that in spite of the seemingly toothsome 3 to 1 ratio in favor of the feminine element on this campus, 1 male out of every three is already engaged or married, 1 is an engineer and unavailable socially, and the third is plain not interested or not interesting.

I will be the first to support the claim that there are some mooses in the dark recesses of the girls' dorms, but there also some quite available girls who have been thought quite attractive in other circles, besides being clever, alert, intelligent, good companions, etc. Just because a girl is not a campus beauty or

does not have a graceful metatarsal arch or other physical attributes, she sits in the dorm weekend after weekend pursuing such delightful pastimes as writing retaliatory articles to the Toreador or swatting flies to keep her mental equilibrium.

I might also state that even our beloved alma mater has its share of male mooses, whatever the consensus of masculine opinion may be. I have also come to the conclusion, and I have done considerable observation along this line, that 25% of the men hereabouts are plainly "Askeered" of being accosted by one of the fair sex.

I agree with "The Spastic" when he states that the blame rests with the boy. I do not say that the odds are even, I merely wish to state quite emphatically that the natural resources are not exhausted. Every boy can not expect a date every weekend with Janie Norris, Sherry Stafford or one of their counterparts; similarly the girls cannot expect a date with some young Apollo. To be more truthful, many of them cannot expect a date at all unless they import their own.

I speak for the girls who do not think of themselves as idols, but rather the girls of Texas Tech who are beginning to wonder if they are girls.

Buck up boys—remember a faint heart ne'er won a fair lady.

'Bad Pad' Called Home By Five Men Students

by H. T. BARNES

Does the name "Bad Pad" mean anything to you? To five Texas Tech students it's home away from home.

"Bad Pad" is a three-bedroom house in Arnett-Benson, where three seniors and two sophomore students live.

At first glance the house seems the same as any other on the block, but once inside the visitor sees the home for what it is — a co-operative type of housing.

Visitors soon find that to come in the daytime is of little value. No one is home until around 5 p.m. Then everyone starts arriving at the same time.

Supper is the first big event of the day. All are together for this one meal. Each man has one night a week to cook the meal

and wash dishes. Everyone takes joy in heckling the cook of the night.

After supper all settle down for reading, studying, radio, TV, watching and various other pastimes. One room-mate has a ukulele which he frequently strums to entertain, sometime distract the others.

One gripe is that people are always calling up and asking, "Is this Wilson's Feed Store?" House occupants assure callers it is not.

Visitors are always welcome and subsequently pop in and out. Quite frequently the curb in front of the house is referred to as looking like a used car lot.

The place is well supplied with four radios, a TV set and a record player spaced in various parts of the house.

The "Bad Pad," while quite different from most homes in the neighborhood is just as much a home to its occupants.

AG Grads Get Fellowships

Three Texas Tech students have received graduate fellowships under a joint agriculture research program between Texas Tech and Texas A&M.

Harold Mathes, agricultural economist from Harper, Kan. will work on "Economics of Cotton Harvesting" with Dr. John Thomas, assistant professor of agriculture economics at Tech.

Bob Kennedy, from Portales, N.M., is working on germination of cotton as affected by fertilizers and defective bolls in cotton.

Boyce Bryan, from Ralls, is working with drought range grasses which may lead to revegetating poor range land. Chester Jaynes, assistant professor of agronomy, heads this project.

The students are 1958 Tech graduates.

... Festival Begins

Pavilion at 8:15 p.m. Nov. 6, 7 and 8.

Lubbock Municipal Auditorium will be the scene for the Tech Music Show at 8 p.m. Nov. 5 The show is presented through the combined efforts of the Tech orchestra, choir and singers. The main attraction will be the "Faure Requiem."

OTHER EVENTS will be the Tech Stage Band under the direction of Keith McCarty presenting a jazz concert in the main lounge of the Union at 4 p.m. Nov. 6.

A modern dance concert will be held in the Aggie Auditorium Nov. 3-4 showing the evolution the dance has made as an art form and exhibits will be shown in the Union all week, along with many activities featured during the Festival week.

What makes world go round is the temptation to attempt something that can't be done and to succeed.

The trouble is that if a good time was had by all, nobody remembers where he was or whom to thank.

Opportunity Knocks For Tech Seniors

Seniors graduating this spring may make appointments for job interviews at the Placement service after 2 p.m. today. Interviews for these positions will begin Monday, Nov. 3.

Interested persons should inquire further with their departments for specific information regarding the positions available.

Many position available are in the engineering fields. Jobs are open in the product engineering department which is the design and development of the manufactured product. Field testing, experimental work and engineering service positions are also open.

OPPORTUNITIES for graduates in the engineering and physics field include research positions in aerodynamics, propulsion, aircraft structures, instrumentation, combustion and hydrodynamics.

Chemistry majors may apply for jobs which include production, laboratory work, process engineering and plan engineering. These chemical plants are located in several different states and some foreign countries.

CIVIL engineers may find assignments in propulsion, flight tests, design operations, electronics and development. One company has contracts for the development, design and manufacture of a new means of marine propulsion suitable for atomic powered ships.

Petroleum engineers may secure jobs in production, pipe line or research and development departments. Some companies produce, transport, refine, and mar-

ket oil and natural gas and related companies.

Geology majors, with at least 35 to 40 hours of geology including sedimentation structure and stratigraphy and strong grades in mathematics and physics, will find openings available in these fields.

GRADUATES in the accounting, economics, finance, office management, personal management, marketing, retailing and home economics departments will also find openings. Positions available are for department managers, operating managers, accounting and credit managers, field auditors and various other positions.

... Doll Display

The students are required to design and drape a modern-day costume using a prominent female figure of history as an inspiration.

The final purpose of the display is to provide general education for all students.

The earliest figure represented is Elizabeth I, Queen of England from 1558-1603. Of particular interest is the metal and wire undergarment she wears which is typical of her era.

Next represented are Catherine the Great, Empress of Russia, 1762-1798; Marie Antoinette, Queen of France from 1770-1793, who wears an ostrich feather head-dress and her hair powdered typifying the taste of this period.

Also featured in the collection are likenesses of Josephine and Eugenie, Empresses of France during the nineteenth century; Queen Victoria of England; and Mary of England who wears a veiled head-dress which was first introduced during her era.

Concluding the presentation of foreign figures is Elizabeth II, present Queen of England, who wears a white embroidered gown with a strapless bodice which might well have shocked her predecessors.

American figures represented which should be of interest to students include Pocahontas, Indian Princess of the late sixteenth century; Martha Washington, American First Lady, 1789-1793; and finally a figure representing the modern trend in fashion which is familiar to all of us.

The display will be in the offices through this Friday and all students are invited to examine the collection.

Miss Gerlach and Miss Beitler, also of the clothing department announce that the exhibit will be followed by a demonstration on buying and fitting foundation garments. All clothing classes will meet jointly for the demonstration.

Union Displays Water Colors

A traveling water color exhibit composed of the works of 38 leading national and international artists is being displayed through Thursday at the Tech Union.

The exhibit, sponsored by the National Assoc. of Women Artists, is from the Argent Galleries in New York.

Display works feature a cross-section of art, as all types are represented.

Few 'Mural Teams Unbeaten

It's the halfway point in the intramural touch football schedule and very few teams have unblemished records.

In the dormitory league, Dorm No. 6 and Gordon Hall will be going into Monday's games with perfect records. They each have three wins to their credit.

In the fraternity league, Phi Delta Theta is undefeated in league competition with a 4-0 record. They are the only team with a perfect record. Sigma Alpha Epsilon was undefeated until their 6-0 loss to Pi Kappa Alpha Sunday.

In the independent league two undefeated teams met Sunday with the Roman Rushers rocking the Big 11 with a stunning 20-0 victory. The Big 11 just couldn't seem to hold the Rushers as they romped to the lop-sided score.

FRATERNITY LEAGUE		
Team	W	L
Phi Deltas	4	0
ATO	3	1
Kappa Sig	3	1

SAE	3	1
Phi Gams	2	2
PI K A	2	2
Phi Psi	1	3
Sigma Chi	1	3
Sigma Nu	1	3
Deltas	0	4

DORMITORY LEAGUE		
Team	W	L
Dorm No. 6	3	0
Gordon	3	0
Dorm No. 5	2	1
Dorm No. 7	2	1
West	1	2
Bledsoe	0	3
Sneed	0	3

INDEPENDENT LEAGUE		
Team	W	L
Roman Rushers	4	0
Delta Sig	2	1
Big 11	2	1
Ch. of Christ	2	1
DSF	2	2
Tech Vets	1	3
Rodeo Club	0	3

SUNDAY'S RESULTS

Tech Vets 6 — DSF 0
Roman Rushers 20 — Big 11, 0
ATO 1 — Sigma Nu 0
Fijis 14 — Deltas 0
Kappa Sigs 6 — Phi Psi 0
Pikes 6 — SAE 0
Phi Deltas 20 — Sigma Chi 0

TODAY'S SCHEDULE

(All games at 5 p.m.)
DSF vs. Church of Christ (G-2)
Roman Rushers vs. Rodeo Club (R-1)
Big 11 vs. Tech Vets (R-2)
Bledsoe Hall vs. Dorm No. 5 (G-1)
Dorm No. 8 vs. West Hall (D-5)

WEDNESDAY'S SCHEDULE

(All games at 5 p.m.)
Fijis vs. Sigma Nu (D-5)
ATO vs. Kappa Sigs (G-1)
Deltas vs. Pikes (G-2)
Phi Psi vs. Phi Deltas (R-1)
SAE vs. Sigma Chi (R-2)

Petitbon Tops Tulane Attack

Richie Petitbon, 6 ft. 3 in., 200-pound junior Tulane quarterback, will lead the Green Wave attack Friday night when they collide with Texas Tech's Red Raiders at New Orleans.

FOLLOWING the Navy upset, Petitbon's passing mark was 31 completions in 55 attempts for 276 yards and one touchdown. He has a 32.5 punting average, has rushed for 160 yards, scored 24 points on four TDs, intercepted two passes and has a 30.1 yard per return average on six kickoff returns, including one 75-yarder against Mississippi.

He had excellent nights against Texas and Ole Miss, and it was

his outstanding play that paced the Wave in its 14-6 upset victory over the then nationally-ranked (No. 6) Navy.

In the Navy game, Petitbon scored two touchdowns, rushed for 88 yards, hit two out of four passes for 24 yards, led a demon defense by personally knocking down three Navy aerials and making eight individual tackles and five assists.

WHITNEY MARTIN of the Associated Press said, "He played a wonderful game. He runs hard and is shifty. He called excellently. I'd have to say he's the best back I've seen this season." Martin has also seen Army's brilliant Pete Dawkins in operation.

There have been other adjectives to describe Petitbon — sensational, savage and remarkable. All of which spell plenty of trouble for the Red Raiders come Friday night.

In case of tie, the winner will be the contestant who gives the score nearest to the actual outcome of the game.

Tech Begins Work

Texas Tech's Red Raiders went through a touch workout yesterday and another one was on tap for today as Friday night's engagement with Tulane in New Orleans drew nearer.

The Raiders took Saturday off and went through conditioning drills Sunday.

Still slowed by injuries are tackles Phil Williams and Jim Henderson, end Jerry Selfridge and halfback Floyd Dellinger.

The Tulane battle will see some line-up changes as Gerald Seemann has been moved from end to guard and fullback Bob Witucki has been sent to end.

SCRIBE SPEAKS ON PENALTIES

Refusing a penalty doesn't mean the offended team refuses to let the other team be penalized. It means that instead of a yardage penalty, they will "take the down."

For instance, a team is offside on third down, and made no yardage, leaving eight yards to go for a first down. The offended team would normally refuse the penalty, making it fourth down with eight yards to go. This situation, therefore, calls for a punt by the first team.

But suppose they made six or seven yards on the play leaving fourth down with only three yards to go for the first down. In that case, the offended team would take the penalty.

Refusal of a penalty usually depends on the situation. Team A is thrown for a six-yard loss on the first down in addition to being offside. When a penalty is called, the down remains the same and the team is penalized from the line of scrimmage, not where the ball was when the whistle blew.

In this case taking the penalty would make it first down and 15 yards to go, so team B would refuse the penalty making it second down and 16 yards to go for first down.

Outlook

By BILL DEAN

Upsets, Upsets, all over the place.
This team, that team, falling from the race.
How do you figure it my friend?
I don't figure, I just wish it would end.

How do you figure it? I doubt that there has ever been three successive weekends in the history of college football so frequented by upsets and surprises.

In the past three weeks Oklahoma, Notre Dame, Michigan, Michigan State, Auburn, Georgia Tech, Tennessee, Clemson, Houston, Army, Navy, Tulsa, Oregon, Baylor, Texas and Wisconsin — just to mention a few — have felt the cruel sting of the upset.

And the scores have been equally amazing. For instance, who would have thought Minnesota would have beaten Michigan 54-24 or that Rice would have slammed Texas 34-7. You just can't figure it friend.

The transfer of Gerald Seemann from end to guard leaves me scratching my head. Here we have a boy who is tied for the scoring lead, is the leading pass receiver and has started at end for the past year and a half. So we move him to guard.

The move was, of course, to make up for the loss of Jerry Don Stockton and Kelley Gilbert. It was designed for the good of the entire team. I hope so.

Couldn't help but smile over the Dec Weaver Show Sunday. On the program were Joe Kerbel and J. T. King from Tech; Bill DuBose, head coach at Monterey High School; and Eck Curtis, athletic director for the Lubbock Public Schools.

King, DuBose and Curtis are all former aides at the University of Texas. DuBose is a former rival of Kerbel, who was at Amarillo last year.

Part of the conversation centered around Arlan Flake, the outstanding quarterback for Monterey. DuBose pointed out that Flake has been the starting signal caller for the Plainsmen for the past four years.

I'm sure both King and Kerbel would like to see this boy head Tech's way. It so, they should also know that while Flake is a fine football player he is also considered an outstanding prospect as a baseball pitcher.

The loss of the two guards, Stockton and Gilbert, also point up how the loss of Ed Strickland before the season started hurt. Of course then we didn't need Strickland, the starting guard all last year, at that position then so we moved him to third team center.
