

Pre-game festivities

Photo by Mark Rogers

The excitement was plentiful Monday night in Tech's 63-53 win over Texas A&M. Streamers fell from the rafters, balloons covered the Coliseum floor, and the Saddle Tramps, cheerleaders, and a partisan Tech crowd went home hoarse and happy. The Raiders next game is Thursday at Rice.

Rebels inflict Soviet casualties

U.S. group leaves for Iran

By the Associated Press

Anti-communist rebels, showing better organization and equipped with heavy weapons, have launched new attacks against Soviet troops in northeast Afghanistan's remote Badakhshan province, inflicting casualties on the Soviet units there, Western diplomatic sources in India reported Tuesday.

Meanwhile, explosions slightly damaged six oil pipelines in southwestern Iran's oil-rich Khuzestan province, Tehran Radio reported Tuesday. It was the eighth such incident in the past few days.

The radio also reported three Iraqis were arrested Sunday on charges of subversive acts in the region. It said

the Iraqis carried 10,000 rounds of ammunition, and had more in a hidden cache.

A day after formally assuming Iran's presidency, Abolhassan Bani Sadr was appointed chairman of Iran's ruling Revolutionary Council, the radio said in a broadcast monitored in London.

It said his selection was subject to approval from Iranian leader Ayatollah Ruhollah Khomeini, who on Monday officiated at the presidential ceremony and gave Bani Sadr his approval. Bani Sadr's appointment as head of the council appeared to be a further sign that he was consolidating his leadership position.

The Soviet news agency Tass confirmed an upsurge in attacks since last weekend in Badakhshan and two other eastern provinces, Nangarhar and Paktia. Its report did not mention Soviet troops, saying instead that Afghan soldiers were "liquidating" the "bandit gangs."

The Tass report also described the enemy as "well-armed," indicating that the ragtag contingents of Moslem tribesmen of just a few weeks ago may be giving way to a better coordinated rebel force.

In the Afghan capital of Kabul, some 100 shops burned down in a major fire early Sunday morning, Western

diplomats in New Delhi reported. They said reports spread in Kabul that the fire may have been set to cover up a looting spree by Soviet soldiers.

In other developments: Tass denied as "monstrous misinformation" reports by the Christian Science Monitor and Newsweek magazine that Soviet-led Afghan troops last April massacred more than 1,000 men in an eastern Afghan village whose inhabitants were accused of helping the rebels.

U.S. National Security Adviser Zbigniew Brzezinski ended two days of talks with Saudi officials in Riyadh, Saudi Arabia, and diplomatic sources there said the oil-rich kingdom is expected to help the United States finance a major program of military and economic aid for Pakistan as a result of the Soviet intervention in neighboring Afghanistan.

In a new reprisal for the Afghan operation, the U.S. Commerce Department blocked further shipments of phosphates used for fertilizers to the Soviet Union.

After talks in Paris, French President Valery Giscard d'Estaing and West German Chancellor Helmut Schmidt issued a statement calling the Afghan intervention "unacceptable," demanding that the Soviets pull out and saying East-West detente "would not withstand another shock of the same order."

An anti-communist Afghan militant, Zia Khan Nassry, told a news conference in Geneva, Switzerland, he has proposed to Arab oil states that they raise oil prices by \$1 a barrel to raise \$2 billion in military aid for the rebels, fellow Moslems, in Afghanistan. Nassry identified himself as chairman of the Afghan Islamic National Revolutionary Council.

A delegation of 50 Americans was to leave for Iran to meet with the Islamic militants who have been holding approximately 50 other Americans hostage at the U.S. Embassy in Tehran. Tuesday was their 94th day in captivity.

Oil Minister Ali Akbar Moinefar announced a delegation of Iranians would go to Moscow in the near future to review agreements on oil exports to the Soviet Union, the radio said. It quoted Moinefar as saying the delegation would hold preliminary talks to prepare a meeting between Iranian and Soviet officials but did not say when they would be held.

Bani Sadr pledged never to give in to force as a means of resolving differences between the central government and the autonomy-seeking Kurdish minority in northwestern Iran. He said he had personally intervened in peace talks between the government and the Kurds "to put the thing back in order" and end sporadic clashes in the region which have plagued Iranian leaders in Tehran over the past year.

UC programs poll

Draft reinstatement favored

By GARY WARREN
and KIM LEMON
UD Staff

Respondents overwhelmingly favored reinstatement of draft registration and the registration of women in a poll conducted Tuesday by the UC Programs Ideas and Issues Committee.

Of the 275 responses, 72 percent were males, while 28 percent were females. By a much wider margin, 92 percent of those who answered the poll were 18 to 25 years old. The remainder of the respondents were more than 25 years old.

And 75 percent of the respondents favored President Jimmy Carter's

decision to renew registration for the draft, while 24 percent disapproved.

A majority of 72 percent said they felt women should be allowed to register; 28 percent disagreed. On the question of women serving in combat, 76 percent disapproved and 24 percent agreed. Of the students answering the question, 200 were male.

By a narrow margin of 51 percent (130 respondents), students said they thought the government should exempt college students from the draft. Forty-nine percent (124 responses) disagreed.

On the question "If you were ever served a draft notice, would you abide by the request?", a large majority of 83 percent answered yes. Seventeen percent said no.

Explaining his agreement with Carter's decision, Ken Mampin said, "We enjoy our rights and freedoms in the United States. If we have to fight to preserve these freedoms, then we must."

"We need to be ready to defend our country—at this point, we're not," said Jenny Stude.

Paul Ruiz said, "I feel that Carter needs to follow a get-tough policy in the Soviet Union, and I feel that draft registration shows he is ready to follow through with that policy."

Susie Fischer agreed by saying, "I support nationalism and if it is necessary to go to war for the United States, I support it."

Jon Whately denounced Carter's decision. "Let the old bastards fight the war in another country. Ever read 1984?"

Beth Cambell said, "I believe you should never force someone into anything. I feel it is necessary to have more military force, then give GOOD reasons why we should be involved in the issue."

John Paul Jones, known already at

Tech for his dissident views, said, "The draft is wrong morally and is military archaic. The draft encourages adventurism and war...if you have a large army, you are much more likely to use it."

Nicky Fowler agreed saying, "This is a very important decision—let's not over-react because we will be responsible for our actions. Calling for the draft could be asking for war."

The physical inferiority of women was stated by most students as a reason for excluding women from forced combat. However, most also felt there were other jobs in the military which women could handle.

"I think there are many fields a woman could get into in the military—such as office and clerical work, record-keeping and coordination and secretarial work," said Kim Brakeley.

Paul S. Ruis said he favored placing women in combat. "For all these years, women have been screaming for their right to equality. Now is their chance. Where are the feminists now? If Israeli women can fight, who is to say that American women are inferior?"

Gretna Hopso said, "Women who apply for those positions should be allowed to fight in combat. It should be based on qualifications, not sex."

Michael D. Bird disagreed. "Women can greatly reduce the need for men in non-combat positions; in case of a holocaust, we might need the reproductive capability."

Lea Cay Sanders said, "I don't feel it's fair for either sex to be in combat, but I don't think women are physically able." However, she added that women should be trained "to defend our lives in case of attack."

Chris Beadley said, "If men must go through the horrors and cruelty of war then I see no reason why women shouldn't have to do the same thing."

Regents to consider staff reductions

By PAM WEIGER
UD Reporter

A major item on the agenda when the Tech Board of Regents meet in regular session Friday will be a resolution calling for a reduction in the number of Tech employees.

Gov. Bill Clements has asked all state

institutions to pass a resolution in support of his goal to reduce state employees by 25,000 over a four-year period beginning Jan. 1, 1979. The resolution to be considered by the board involves the governor's short term objective of a 5 percent reduction of employees by Aug. 31, 1980.

The resolution states that the Board

of Regents support Clements' attempt to reduce the number of employees. It also calls upon the Tech president to develop a plan to achieve the reduction. But according to Dan Williams, interim vice president for Finance and Administration, such a plan would be extremely difficult to develop.

"We just don't know the actual number of employees because it changes every day," Williams said. "The governor's approach to this is not the most ideal method."

Lee Stafford, a Tech regent, said he thinks careful management would allow the majority of the reduction to be met by not hiring personnel. He said the governor also recommended that assistance be provided for relocating personnel.

Stafford said he anticipated that the resolution would be passed. He said Clements requested that any institution that did not pass the resolution notify him by Feb. 1. Since that deadline has passed, Stafford said, he believed the Board would pass the resolution.

"What we're going to do is basically pass the resolution and try to stay within the guidelines," Stafford said. "We're not going to say a certain amount of positions must be terminated by a certain date."

Williams said it was presumptuous on the part of Clements' staff to assume that the board would meet in time to comply with the Feb. 1 deadline.

"We just can't meet that deadline and there is no legal basis for the governor to require this," Williams said. "The regents do not necessarily have to pass the resolution."

"It's a problem of definition of terms," Williams said. "The only way we'll know for sure whether we've met the 5 percent reduction is to look at the figures on Aug. 31, 1980."

Williams said the 6.2 percent reduction figure reported earlier this month was derived by looking at a "snapshot" of the payroll system on Jan. 31, 1979, and again on Dec. 31, 1979. This showed that Tech had paid fewer people, but some positions have been filled since that time, he said.

Williams said his office is using data based on the payroll system at Tech. Since employees resign and new employees are hired every day, the system is not truly accurate, he said. If an employee resigns in the middle of the month and a new employee is hired the next day, the payroll system would show two employees in one position for the month.

The governor's office is using data from the comptroller's office, Williams said. Employee count is based on the number of checks paid out of the office. Some employees are paid out of two different appropriations, and thus two checks are issued. The result is a count that shows two employees for one actual employee, Williams said.

Agenda scheduled for Friday board meeting

Tech's Board of regents will meet Friday in regular session to discuss a resolution calling for possible reductions in Tech employees and other university business.

Meeting first as the board for the Health Sciences Center, the regents will consider recommendations of faculty members for academic tenure and for promotion.

The Finance Committee will seek authority from the board to authorize and approve expenditures from appropriated funds and approval of a statement of general policy to govern granting of tuition scholarships.

Campus and Building Committee will present for approval plans and contracts for authorization to receive construction bids for Phase II of the Regional Academic Health Center at Amarillo.

Reappointment of 11 members of the Tech Medical Foundation also will be sought.

The Committee of the Whole will consider a policy statement on services by members of the board on support and advisory groups that assist the Health Sciences Center.

As the board for the university, the Regents will consider recommendations of faculty members for academic tenure and for promotion, as well as a degree program leading to the master's degree in wildlife sciences.

The Finance Committee will present a proposal for appointment of an engineering consultant to study utility problems on campus.

Campus and Building Committee will seek approval of lease of land to the U.S. Department of Agriculture for construction of the Soil Moisture and Plant Stress Research Laboratory and for the naming of the Student Recreation Center.

The Committee of the Whole will discuss a policy statement on the University's purpose, one on development leaves, another on The Museum and one on services of board members on support and advisory groups which assist the University.

The Athletics Committee will seek establishment of a maintenance program for Jones Stadium.

The regents will host a public reception for new President and Mrs. Lauro F. Cavazos Friday afternoon, 4:30-6, in the University Center Courtyard.

NEWS BRIEFS

stocks

NEW YORK (AP) — The stock market finished mixed Tuesday in a session marked by a late upswing in steel issues and some other blue chips.

The Dow Jones average, off more than 2 points in early trading, closed with a 1.53 gain at 876.62.

New York Stock Exchange volume totalled 41.88 million shares, down from 43.07 million Monday, as the pace of activity continued to ease from January's record volume.

The Dow Jones industrials would have shown a loss but for the showings of its two steel components — U.S. Steel, which was up 1% at 21% as of the 4 p.m. close in New York, and Bethlehem Steel, up 1% at 25%. Among other steel issues, Inland Steel was up 5% at 33; Armco 3% at 31, and Republic Steel 1 at 25%.

weather

Fair Wednesday. Partly cloudy Wednesday night and Thursday. A slight chance of rain Panhandle and extreme southeast. A slight chance of rain, south plains Thursday. Highs Wednesday near 60. Highs Thursday upper 40s.

Center for blind lacking funds, equipment going unused

By REAGAN WHITE
UD Reporter

About \$20,000 in equipment to help blind students at Tech is not being used because the Center for the Visually Impaired cannot afford a trained person to teach blind students how to use the equipment.

The equipment includes six Optacons, machines which transform printed material into electronic impulses a blind student can be trained to "read." The optacons have not been used since December, 1979, when the optacon teacher left the center, according to Nancy Hayes of the Texas Commission for the blind. Hayes said the teacher quit because she was not making enough money.

"She quit at the end of last semester to go to work for the Tech museum. She needed more money," Hayes said.

The funds for the center come out of the Library's budget, according to Ray Janeway, director of library services. Janeway said the money to train optacon teachers is just not available.

"Prospective teachers are sent to Palo Alto, California, to be trained how to teach optacon skills to the blind students. This training costs as much as \$1000."

Janeway also pointed out that a very special individual was needed to instruct blind students in the use of the optacon. "There are some special challenges associated with teaching the blind. For instance, some blind students have to be taught the shapes of

the individual letters before they can begin to perceive these shapes on the optacon," he said.

"An optacon teacher needs to be enthusiastic about the program. Without a great deal of concern for the students and real determination to help them, an optacon teacher cannot do an adequate job."

Doing an adequate job in the Center for the Visually Impaired is something Janeway feels strongly about. "Either Tech is going to run the center, and run it reasonably well, or not run it at all," he said.

The reason Tech may not be able to continue the program is simple—there is not enough money, Janeway said. "I have a limited budget to work with, and I am not allowed to go in debt. With the funds available right now, I have to make a choice. 'Do I close the Library on Sundays or hire and train another optacon teacher?'"

"The university is going to have to make some priority judgements," Janeway said.

Although the administration does not want library hours reduced, expenses continually increase, Janeway said.

"I use 10,000 hours of student labor every year in this library. While the minimum wage has risen 27.5 percent in the last two years, appropriations for the library have increased only five percent," Janeway said.

Janeway indicated the university would have to decide whether or not to appropriate additional funds to put the

optacon program on solid financial ground.

Blind students at Tech feel strongly about having to do without the optacon while the Tech authorities decide whether or not to maintain the program.

"We are getting ripped off," said Bertha Avila, a blind student at the center. "Texas State law 504 requires handicapped students be given the opportunity to receive the same education as anyone else."

"Janeway said the optacon is not included in this law. I don't understand why not."

Avia also said she thought Janeway is not working to hire a teacher for the optacon. "And I would certainly want to learn how to use the optacon if there was a teacher."

Jim Gatteys, another blind student at Tech, said Janeway has questioned whether or not Tech should encourage more blind students to come to Tech because of the extra expenses involved in teaching the blind.

Money remains the critical question concerning the optacon program. Whether the funds to sustain the program come from reduced library services, increased state appropriations, or if the program will be tossed out the window for lack of cash, is being left up to the Tech administration. The problems in the center have been referred to Charles Hardwick, vice president for academic affairs.

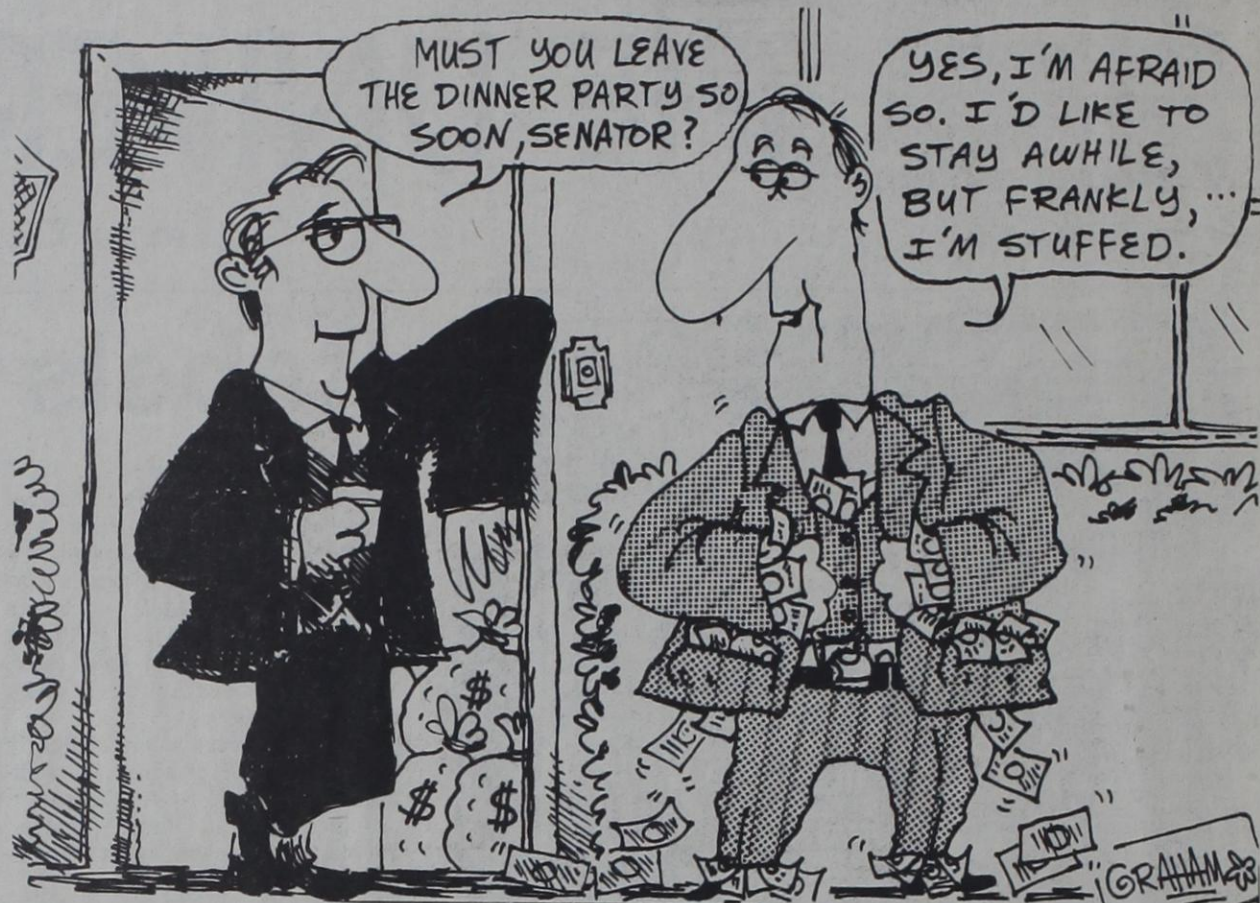

Chivalry still lives, my dear

Shauna Hill

EDITOR'S NOTE: Must be read with a Southern accent. Oh, fiddledeedee. Here I am a bonafide Southern belle stuck in the middle of the 20th century. I know I'm being silly to complain, but my mama brought me up to expect certain things from persons of the opposite gender. Now, mama didn't actually TELL me I'm supposed to sit prettily upon my pedestal, but that's what she meant when she said to let men do all the little courtesies. You know what I mean, sugar. Little things like opening doors, handing me in and out of cars, fetching and carrying at parties, toting books up those terrible long flights of stairs and lighting my slender little cigarettes. But then those nasty liberationist bra-burners came along and burst my bubble. They started hollering things

like "equal pay for equal work," "equal legal rights" and, worst of all, the "Equal Rights Amendment." Now how am I going to make men think I'm helpless, sweet and need pampering, if they know I can work, live and think on equal terms with them? It just can't be done my dear. Somebody went and destroyed the myth we upper income females have been leaning on for years. The women without money or rich husbands have always had to work, but at least it was housework and not anything strenuous like thinking or working at a REAL job. I just don't know what to do. Dear President Carter just might draft us women for the next war. He probably won't do anything silly like put us in combat, but he sure could make life miserable by making us work and do something for this nice old country. Mama said that's outrageous and that every gentleman

worth her snuff should call on her little old congressman, sit on his lap, and convince the dear man not to allow such a silly thing. That's what mama said. But since when has a REAL Southern belle done exactly what her mama said? Never, my dear. You see, mama raised me right, but she didn't raise me lonely. I went to school, read newspapers and books, watched television and even found a job that didn't have a thing to do with raising babies. And I found out there's more to being a woman than just being the object of habitual, meaningless courtesies. Now, I still appreciate a man who is polite and kind and doesn't forget I'm a woman. But then again, I try to be polite and nice to everyone. Chivalry doesn't have to die, it just has to grow to include both sexes. Caring and courtesy work two ways, you know.

Women should fight in 'liberated' war

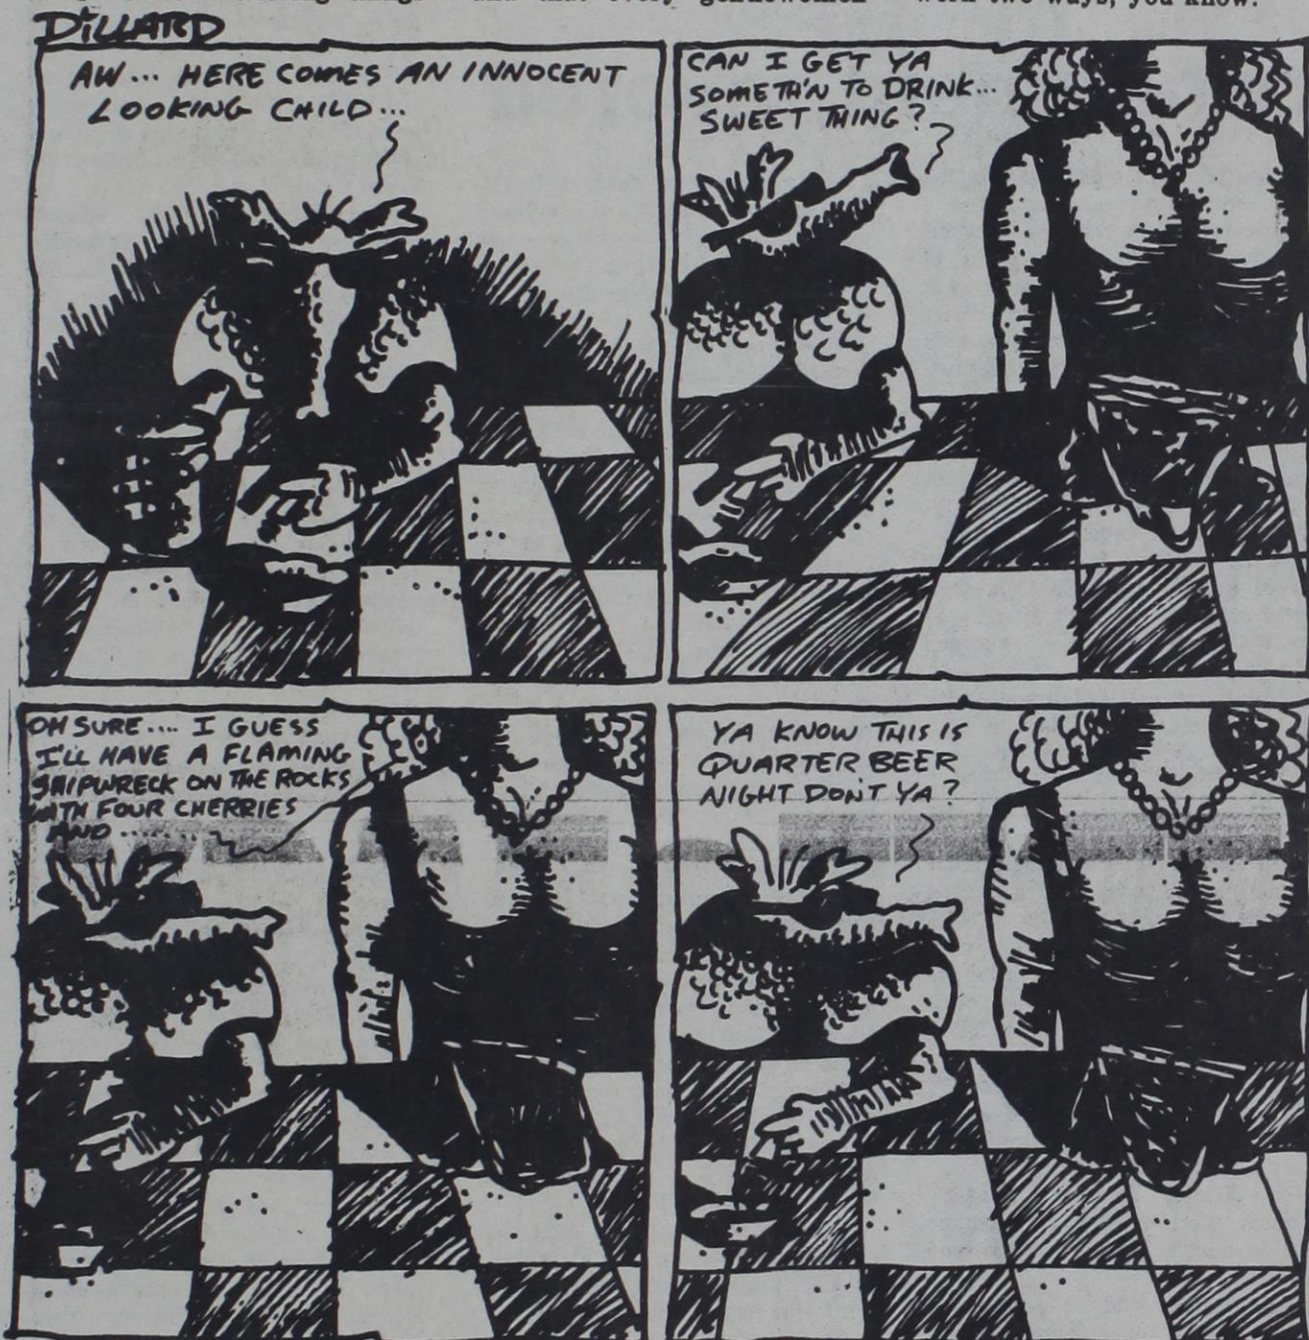

Donna Rand

Okay ladies! Us career-minded and liberated women have been standing up for what we believe in for some time now. Up to now we haven't really been put to the test to show just how much we believe in equal treatment and equal pay. Well, lo and behold the time has come. I've never been the gung-ho women's rights supporter but I do believe in equal pay for an equal job and I think a woman has the right to show what she can do. If she is just given the chance. With the threat of war looming before us the question of the draft has once again been brought to the public's mind. And now we are wondering if

the equality we've been asking for will be extended to the armed services. We've fought to fit in men's shoes, but can we wear their black boots? While it is true that women have been training beside young gents in the armed services for some time now, the law prohibits females from holding positions that may require combat. There is of course a need for people to do the desk work and pass out kool-aid to the tired troops, and that may be exactly what the ladies who have volunteered had in mind. However, I believe there are quite a lot of women, as well as men, who say they want to fight for their country and mean it literally. Many of us are willing to postpone our education or career for the sake of the

States, but we want it to be worth our while. I don't see myself spit-shining my boots at a base in Georgia when I could be earning a living at a job that I've studied hard to get. The current law prohibiting women from engaging in combat would probably take at least a year to change through legislative action. This could be delayed even longer by the high-ups who don't want a new law to change things around. If the draft notice has my name on it sometime in the near future, I wouldn't high-tail it to Canada or wade across the rio to Mexico, but I'd be barking all the way to the barracks. Potato peeling and rising before the sun aren't activities I consider too beneficial to my country.

DOONESBURY

Letters:

Basketball chance

To the Editor:
It seems that once again the Tech student body is losing a good coach because of an athletic director. This is one of the strongest traditions we have, along with student apathy. Because of Title IX, the strength in women's basketball is shifting to the larger schools, where there are as yet no established powers. We have a chance to start something big here at Tech. The starting five for the women's team is young and gives a solid foundation on which to build. But if we lose Coach Benson we will lose that foundation. Her coaching ability has been proved, yet she was fired. There must be a rule at Tech allowing us to keep only the mediocre coaches — the good ones we must get rid of. Coach Benson, the athletes, and the student body all deserve better than this. The only way to keep Coach Benson is to get organized and prove that the students aren't quite as apathetic as rumored. We need to begin right now to stop this continual short-changing of coaching talent, unless we want people to start telling Red Raider jokes instead of Aggie jokes.

UD bigotry

To the Editor:
This letter is in regard to The University Daily's blatant bigotry. The editorial cartoon of Wright-Graham concerning women in the military is a glaring example of the sexist culture of West Texas. One may not consider this cartoon an example of bigotry until one makes a comparison. If the question facing the president and Congress right now was whether or not to draft Hispanics or blacks, the responses to the battle call might be paralleled if the Hispanic replied "Hey, man, could you ask them to hold it down, I haven't finished my afternoon siesta," or the black might respond "I haven't finished my watermelon yet, Sarge." Surely, we can all recognize these responses as the stereotypes of bigotry. If either cartoon of the black or the Hispanic had been printed, most would consider it to be in bad taste. Why is it that in 1980, we have yet to reach that point with women. The cartoon in Monday's edition is only a minor example of the stereotyping and exploitation practiced by the UD consistently.

Sugar and spice

EDITOR'S NOTE: The following letter also was signed by 16 other persons.
To the Editor:
Dear "ladies" of Tech. Whatever happened to sugar and spice and everything nice? If you look around, sugar and spice are the most obvious things that are "gone with the wind." "Everything nice" in a "lady" only surfaces when she is trying to further her ego. Men are very consistent animals. "Ladies" are the ones who are confused and trying to change their roles in society. Men spend most of their time simply trying to adjust to make "ladies" happy and contented as cows. Well, we gentlemen are tired of it. You "ladies" make up your feeble minds. Either get back in the home and start washing dishes, scrubbing floors, and having babies OR stay in school, open doors for yourselves, get ready to war for your country, and most of all SHUT-UP!

Food service

To the Editor:
I am a resident of Hulenclement and pay about \$1500.00 to live here and, unfortunately, eat here. Why is my hard-earned money spent so foolishly on this stuff called food? Beats me, and yes I am calling the people in housing and in food service fools. Either housing is embezzling money, or the food is bought

from the guy on the corner. Well, these people involved in food service took up my meal ticket. I tried to find out why. I asked myself, why the cover-up? Am I a criminal? Did they take it because of my tasteless jokes about the food? Of course not. They took it up because someone over in housing confused me with someone else in the dorm. Imagine that, me confused with someone else! What a joke.

In the meantime I suffered (?) without food for a day. Food management did apologize to me, but I wondered how many other people could be mistaken for someone else. Face it, this is serious. Here are my solutions to cope with this problem. The people in food service are controlled like puppets from housing. We all know how computers make mistakes.

Moment's Notice

I.T.V.A.
The meeting for convention interns will be tonight in Room 109 of M.C.E. at 7 p.m. All those working the VEGAS convention must attend.

Alpha Kappa Psi
Alpha Kappa Psi will meet at 8 p.m. tonight in room 109 of the Law Building. There will be a meeting for members at 7.

Ag Council
Ag Council will meet at 7 p.m. tonight at Pasa's Pizzeria. Everyone is invited to attend.

Pre-Pharmacy Club
The Pre-Pharmacy Club will meet at 7:30 p.m. tonight in room 221 of the Chemistry Building. Speaker will be Abbot Representative Norris Cloyd.

S.O.B.U.
The Student Organization for Black Unity will meet at 7:30 p.m. tonight in the Senate Room of the UC.

Phi Alpha Theta
Phi Alpha Theta, the International History Honor Society, is holding an initiation drive through Feb. 18. Requirements are: completed 12 hours of history with a 3.0 and an overall GPA of 2.75. For more information contact the History Dept. office at 742-3744.

Campus Girl Scouts
Campus Girl Scouts will be selling cookies from 5-7 p.m. today in the Wall-Gates lobby. Cookies sell for \$1.50 a box.

Circle K
Circle K will meet at 7:30 p.m. tonight in Room 208 of the UC.

BA Council
BA Council will meet at 6:30 p.m. tonight in Room 169 of the BA Building.

COE Student Council
COE Student Council will meet at 4 p.m. tonight in Room 235 of the Administration Building.

IFC
The Inter-Fraternal Council will meet at 7:30 p.m. tonight at the Phi Psi Lodge, 1802 Broadway.

Continuum
The Continuum will meet at 7 p.m. tonight in the Reference Room of the Library for library tour for students over 25. Call Jodie Morris to sign up a 742-2192.

Video Tape Committee
The Video Tape Committee of UC Programs will meet at 7:30 p.m. tonight in Room 128 of the UC.

Open Rush
All girls interested in open rush must sign up in the Dean of Students Office, 163 Admin. Building by 5 p.m. Friday, Feb. 8.

Toastmasters
Toastmasters will meet at 7:30 p.m. Thursday in Room 160 of the BA Building.

Rodeo Association
The Rodeo Association will meet at 7:30 p.m. Thursday in the Ag Auditorium. Officers will be elected. Latter-Day Saint Student Assoc. is sponsoring an open house from 10 a.m. to 3 p.m. Thursday in the Senate Room of the UC. The theme is the Book of Mormon. All Tech students are invited to come by and learn more about the Mormon Church.

Freshman Who's Who
Applications for Freshman Who's Who are now available in the Freshman Council Office in the UC. Application deadline is Feb. 29.

Libertarian Society
Students for Libertarian Society will meet at 4:30 p.m. Wednesday in Room 127 of the UC. Draft, American foreign policy and economy will be discussed.

Phi U
Phi Upsilon Omicron members need to pick up information sheet on Phi U office door in the Home Ec Building.

TSEA
Texas Student Education Assoc. will meet at 6:30 p.m. Thursday in Room 173 of the Home Ec Building. All Education majors welcome.

IVCF
Inter Varsity Christian Fellowship will hold the spring retreat at Buffalo Gap near Abilene this weekend, February 8-10. For more information contact Eddy Post 742-6693.

Campus Crusade
College Life, sponsored by Campus Crusade for Christ, will meet at 9 p.m. Sunday in the Athletic Dining Lounge. Everyone is invited for fun, fellowship, skills and refreshments.

AED
The Honorary Pre-Med, Pre-Dental Society will meet at 7 p.m. Thursday in Room 101 of the Biology Building. There will be a program and business meeting.

Michael Cook Living off campus Rights, responsibilities of tenants, landlords

Are you aware of your rights and responsibilities as a tenant in Texas?

WHEN YOU rent a house or apartment, even if you don't have a lease, the law requires your landlord to fulfill promises and guarantees tenants certain rights. The landlord may own the building but it is YOUR HOME.

The landlord must keep areas used by tenants in safe condition, including stairs and other areas. Also, a landlord must keep your home in safe and livable condition. Hot water, heating and plumbing should be adequate. If your home is not kept in livable condition, you should contact the State Health Department.

A landlord must let tenants enjoy their homes. The landlord has no right to come into your home without your permission except in an emergency (such as fire) unless your lease says he may do so. Otherwise, he is trespassing. YOUR landlord must tell you about any problems in the building that he knows about, such as leaky roof or faulty plumbing. If he deliberately conceals this type of information, you may consider the lease void and move out without paying any rent.

The landlord cannot keep you out of your house for any reason. If you are locked out by your landlord he must leave a note saying where the key is. You are not required to pay back rent to get the key. If you still can't get the key, you may call a lawyer or the police.

A landlord may not cut off your utilities if you are paying the utility company directly. Even if you don't pay your own utilities, it is considered an unsafe condition if they are cut off. Again, call the State Health Department.

No one can refuse to rent to you on the basis of your race, sex, national origin, or religion. This is discrimination. If you feel this has happened to you, call the office of Housing and Urban Development (HUD) in Lubbock at 762-7265.

FOR a landlord to evict anyone, he must deliver a written "notice to vacate." This may be any kind of written note saying that the landlord wants you out. He may give you 1-30 days to move. YOU DO NOT HAVE TO MOVE. Next you'll receive an official eviction notice with a court date on the back. Go to court on the date assigned to you and the judge will decide when you have to move.

A landlord may not evict you by force or violence for ANY reason. If you lose in court but don't move out, the sheriff will have to move you, not your landlord. If your landlord tries, call a lawyer.

As a tenant you also have certain obligations to your landlord. You may sublease only with the landlord's permission. You may not withhold your last month's rent, thinking the security deposit will cover the amount due. If you withhold rent, you may be sued for triple the amount, plus lawyer's fees. As long as you live somewhere, you must pay rent. If you want to move, you must give notice equal to your rent interval. If you pay by the month, you must give 30 days.

Renting a home is a two-way street. The laws are made to protect both landlord and tenant. If you feel that something is wrong, try to work it out with your landlord. If the problem is not solved, talk to the proper authorities.

Opportunities

Yes you Can

A "Can Do" attitude is apparent the moment you arrive in Austin. The Highland Lakes invite you to enjoy a myriad of water sports such as skiing and sailing. Top-notch educational facilities, including the University of Texas, staunchly uphold a tradition of excellence. A positive outlook is everywhere...the Capital Building, the transportation system, the low cost of living...it's a way of life in Austin.

We've developed the same approach at the Motorola MOS Division in Austin, challenging electronics professionals to be the best you can be at what you do. And, one reason we're among the leaders in the semiconductor industry is because we believe that "Yes you can," if you try. As an electronic engineer, you'd find the environment at Motorola stimulating and rewarding, much the same as the city of Austin.

The opportunities are now, so do something positive. We will be interviewing on your campus February 18. To arrange for your interview, or for more information, please contact the placement office.

Balloon invasion

Tech spirit came down from the rafters of the Lubbock Municipal Coliseum as a barrage of streamers, balloons and good old fashioned cheers preceding Tech's Southwest Conference clash with Texas A&M Monday.

Religion, art intermingle in course

By DONNA RAND
UD Reporter

The influence of "religion on art" and "art on religion" will be emphasized in a month-long course in Medieval Christian Art beginning Tuesday and ending March 11. Hari Vishwanadha, an English department research assistant, will teach the course. The course is sponsored by the Division of Continuing Education. Vishwanadha, a native of India, has traveled extensively in Europe and attended summer school in Norway and Austria where he studied European Art History.

Two major periods, the Romanesque and Gothic, will be emphasized in the course, because of their influence on later styles of art in the Western world, Vishwanadha said.

"The styles of these two movements represent the intermingling that took place

between religion and art," Vishwanadha said.

Vishwanadha hopes the study of this mingling will show how Middle Age art has survived. According to Vishwanadha, man has two basic drives: the desire for beauty and the desire for something spiritual (or something directed toward a supreme being). Religion and Medieval Christian art represent a superb example of this, he said.

Samples of art will be shown during the course through slides and pictures depicting Medieval architecture, paintings, sculptures and other crafts. Emphasis will be placed on the churches of the period which contain a conglomeration of these art forms, Vishwanadha said.

"The church held a central position in Medieval society. It was the economical and political power base because

of its enormous wealth and alliances with kings," Vishwanadha said. "The church had the control of the best talent in the society."

Although the upperclass of the time funded the artists' work and appreciated it more than the lower class, artists viewed their work as an example of the entire community. The artist was a spiritual representative of the community, Vishwanadha said.

"What is so amazing about this art is that no matter what religion you belong to, this synthesis will appeal to you," Vishwanadha said. "It can cross religious gaps and deeply move people."

Vishwanadha plans to return to Europe and pursue his hypothesis of the religion and art synthesis by studying other art forms in religious societies.

"This approach of studying Medieval Art puts us one step closer to understanding the roots of Western culture," Vishwanadha said. "The best way to understand the heart of Western culture is to understand important periods such as the Medieval cultures."

Students interested in registering for the course should contact the Division of Continuing Education at 742-2354.

Briscoe to dedicate Tech exhibit

Former Texas Gov. Dolph Briscoe will dedicate the opening of the sheep-goat, wool-mohair exhibit at the Tech museum Thursday, according to John Anderson, director of Tech's Food and Fiber program.

Ribbon cutting ceremonies will begin at 5 p.m. at the museum. The sheep-goat exhibit is one of three exhibits at the museum sponsored by the Food and Fiber National Institute of Achievement, Inc.

Briscoe's family has long been involved in the sheep and goat industry, Anderson said. While in Lubbock, Briscoe will pay tribute to the Hall of Achievement honoree, Fred Eatwood of Sonora. Eatwood will be honored at the "Taste of Texas" dinner Thursday at the Memorial Civic Center following the ribbon-cutting ceremonies.

The dinner will feature Texas agricultural products prepared for Food and Fiber by the Texas Department of Agriculture.

ROTC award

Gregory Paul Koenig, Tech ROTC student from Hereford, has received the George C. Marshall ROTC Award sponsored jointly by the U.S. Army and the George C. Marshall Research Foundation.

Cadet Koenig, son of Mr. and Mrs. Mark Anthony Koenig of Hereford, is a senior agricultural engineering major. He is a graduate of the U.S. Airborne Training School at Fort Benning, Ga.

The George C. Marshall ROTC Award honors the distinguished service of Gen. Marshall as Army Chief of Staff, 1939-45; Secretary of State, 1947-49; Secretary of Defense, 1950-51; and recipient of the Nobel Peace Prize in 1953.

Each Marshall ROTC award winner receives a special certificate of achievement and the authorized Marshall biography.

Recipients also will attend a conference on national security issues in Lexington, Va., April 17-19, sponsored by the Marshall Foundation. They will participate in roundtable discussions led by outstanding military and civilian authorities.

Dads meeting

The Midwinter Trustees Meeting of the Tech Dads Association will be Feb. 16. Activities will last from 9 a.m. until 3:30 p.m. in the University Center, said James G. Allen, executive director.

The meeting will include orientation of new trustees, coffee with Dads Association scholarship recipients, standing committee meetings and a luncheon.

Included in the afternoon activities will be a business meeting of the Executive Committee, coffee and Executive Committee meeting with chairmen of committees present.

Summer study offered

The department of Germanic and Slavic languages at Tech is sponsoring a 5-week summer study program in Vienna, Austria June 2 through July 5. Students will attend classes at the Kinsky Palace, an 18th century structure in Vienna, to earn six semester hours of credit, said Thomas Bacon, program director.

Vienna and Austrian life and literature will be the topic of one course, and advanced spoken German will be the second course. Students already fluent in German may choose an independent research project in Austrian or German Literature, Bacon said.

Participants will stay in private homes throughout Vienna. A few field trips outside of Vienna will be made. Any other travel will be up to each student, he said.

The cost will be approximately \$2000. Applicants should contact Thomas Bacon, program director, or Theodor Alexander, faculty sponsor, within the next few weeks at 742-3282.

Students should have one year of German.

Yuck!

Gary Walters, Darren Walker, Terre Finley and Clara Crockett rehearse a 'yucky' scene from Neil Simon's play "The Good Doctor." The play will be presented by the Backstage Dinner Theatre in the UC Theater at 7:30 p.m., Friday through Sunday. Tickets are \$5 for Tech students with ID, \$6.50 for faculty and staff and \$7.50 for the general public. Tickets are on sale until 4:30 p.m. today at the UC Ticket Booth.

Photo by Mark Rogers

'Good Doctor' deadline nears

By PAM MALONE
UD Staff

Today is the last day to purchase tickets for the Backstage Dinner Theatre's production of Neil Simon's "The Good Doctor." The play opens at 8:30 p.m. Friday and runs through Sunday.

"The Good Doctor," directed by Richard Privitt, a Tech graduate student, is a collection of Russian author Anton Chekhov's stories put into play form by Neil Simon, said Paul Richards, UC Program Advisor.

"The Good Doctor's" cast includes Clara Crockett, Terre Finley, Steve Scheur, Darren Roy Walker and Gary Walters.

"The cast we have is very talented," Richards said. They are not drama students, but they have an interest in the theater and the Backstage Dinner Theatre gives them the opportunity to perform.

"This type of play is a lot

harder to do," cast member Darren Roy Walker said. There are five people who portray several different characters throughout the play, he said.

"For example, in one scene I am a loud boisterous character. Then I have one minute to run backstage and change to return as a quiet conservative character," Walker said.

"You have to be careful about switching roles," he said. "You don't want to use stereotypes of people because once the audience recognizes

the stereotypes they tire of them fast."

The performance is about two hours long and includes an intermission, Richards said. A Russian-oriented dinner served before the performance includes fried herb fritters, roast chicken with walnut sauce, homemade Georgian cheese bread and Charlotte rouse and is included in the price of the ticket.

The audience will be on-stage with the performers, Richards said.

"It is a set upon a set," he

added. The Backstage Dinner Theatre would like to create an environment of the theater for the audience, Richards said.

Some people have never seen the backstage of a theater and seating the audience on stage allows them to be in the limelight with the actors.

Tickets for the dinner performance are on sale until 4:30 p.m. today at the UC Ticket Booth. Tickets are \$5 with Tech ID, \$6.50 for faculty and staff and \$7.50 for the general public.

Cast, crew assembled for Tech TV show

The cast and crew have been assembled for the first full-length dramatic television production in the history of the Mass Communications department. Production will begin Monday on "The Haunting of Mary Shelley," an original drama for television written by Ross Wells, a Tech graduate student.

The cast includes Alice Doggett as Mary Shelley, William Durham as Percy Shelley, Charles Swift as William Godwin, Linda Wells

as Mary Jane Clairmont Godwin, Tracy Carter as Claire Clairmont, Barte Masciarelli as Lord Byron, Rick L'Amie as John Polidori, Julia Roberts as Mary Wollstonecraft.

Featured cast members include Charles Badley, Chuck Cilny, Trina Olssen, Sam Steph, Terry McGee, Troy Warden, Valerie Ingle, Dean Martin will serve as crew head and camera operator. Other crew mem-

bers include Jess Pollard, assistant cameraman; Rick L'Amie, music; Charles Swift, locations manager; Terry McGee, sets and properties. The production is written, produced and directed by Ross Wells.

Faculty consultants for the thesis production are Dennis Harp, Telecommunications Division; Ralph Sellmeyer, associate chairperson of the mass communications department; and Ken Davis, English department.

Weight training aid to Tech's baseball program

By JEFF REMBERT
UD Sports Writer

Don't worry if you overhear Tech baseball players bragging about their "190" or "210."

If those numbers represented batting averages, those players would spend more time on the bench than on the field.

The 190s and 210s probably represent the weight the players are lifting in Strength Coach Russ Polhemus' baseball weight-training

program. Polhemus joined the Tech athletic staff in April 1979, and he works with all Tech athletes on weight-lifting and conditioning. He's held similar posts at Georgia Tech and Tennessee.

THE TECH WEIGHT room is located under the West stands of Jones Stadium.

Last fall Polhemus developed a five-week weight-training program for the baseball players. The program received favorable

reactions from the players and coaches, and there are plans to hold a five-ten-week session during the season.

"We've used weights during the off-season, but we've never used them during the season," Tech head baseball coach Kal Segrist said. "Since we have the facility and equipment, we're going to try to continue weight-training on a cut-down basis but still utilize the weights the best we can during the season."

THE BASEBALL WEIGHT program is the first of its kind at Tech.

"Baseball has always been kind of negative with regard to weights," Segrist said. "It was felt (by coaches) that weights restricted the ability to stretch and the supple movement that you need for

baseball. "To a certain extent it has been proved that if the weights aren't used properly, they can do this."

"It's a fallacy that because you lift weights you aren't flexible," Polhemus said. "By lifting, you gain more strength and gain more speed. Your reaction time is better."

REACTION TIME improves because feedback to the central nervous system is hastened, according to Polhemus. He attributed slowness to weak skeletal muscle structure.

"It used to be that the only thing available in weights were free weights, and you had to have a place for those," Segrist said. "They were very awkward because they took up a lot of room, and you can get

hurt if you do not know how to use them properly."

New developments have improved weight-training during the past few years. The first of these developments was the Universal Gym.

THE "GYM" is a compact weight-training apparatus that allows an athlete to go through a full workout in a small area. The weights are adjustable, and they are built into the gym. The gym's safety factor is very high.

The latest development in weight-training is the Nautilus system. Its development helped weight-training popularity skyrocket.

The Nautilus system is pre-programmed to allow a full range of motion. Polhemus said the specialization makes the system more efficient.

SEGRIST SAID the utilization of a full range of motion has helped do away with the idea that weight-training inhibits flexibility. "Some coaches still have a negative idea about weights," Segrist said, "but most coaches, to some extent, utilize programs."

Another factor that has helped weight-training popularity has been support

from professional athletes. The most noted of these athletes is Boston Red Sox center fielder Fred Lynn.

Ever since his rookie season in 1975 when he hit .331 and drove in 105 runs, Lynn experienced a "drop-off" at the plate when August and September came around.

BECAUSE OF THIS drop-off, Lynn engaged in the Nautilus weight-training program after the 1978 season.

He hoped the weight training would help him improve his stamina so he could stay productive throughout the six-month long baseball season. Lynn's 1979 batting statistics tell the story.

He led the American League with a .333 batting average. He tied teammate Jim Rice for second place in the AL home run race with 39. His 122 runs-batted-in were the fourth best total in the AL.

ALL THREE STATS were personal highs for the 27-year-old Lynn. Apparently, the weight-training worked.

"As far as endurance," Lynn said at the end of August, "I actually seem to be stronger. I'm not tired and I've stayed reasonably healthy."

Polhemus said the Tech baseball players are doing what's called moderate to low resistance exercises. The exercises involve repetition but they are not taxing. Polhemus, however, does not employ the Nautilus system exclusively. He said

that a good weight-training program should employ the best features of all weight-training apparatuses and systems.

COMPLEMENTING THE Nautilus system are free-bars, dumbbells and a Hydrogym apparatus. "They work on their forearms, hands and shoulders because there's so much throwing involved in baseball," Polhemus said.

While everyone on the team basically goes through the same program, different players concentrate on certain areas of their training. The pitchers try to strengthen their biceps and triceps, the large muscles in the upper arm.

"We don't lift as much as the other players do," Tech pitcher Chuck Johnson said.

"We need to be lanky and loose like swimmers."

"Our arms are not hurting as much."

THE INFIELDERS concentrate on improving their quickness and reaction time. The outfielders try to improve their hitting by striving for more physical power and speed.

Shortstop Brooks Wallace and outfielder Larry Selby both agreed they felt stronger because of the weight-training program. Wallace said the training should help the players down near the end of the season with regard to stamina.

"The coaches say the athletes are enjoying the program," Polhemus said.

"They (the athletes) are stronger, and they are playing better."

McCray: Tech's all-around athlete

By JEFF HOLLOWAN
UD Sports Staff

When you're female and you want to play basketball, sometimes it's hard to get an even break.

For Gwen McCray, the freshman basketball player from El Paso, the break came when she came to play at Tech.

The 5-8 McCray has led the Raiders to a 16-6 record and was the team's leading scorer and second leading rebounder, until an ankle injury sidelined her for two games.

Currently McCray is tenth in the state in scoring, shooting 46.8 percent and averaging 14.7 points a game. She is just one of the three freshman standouts that make up Tech's own version of the "three basketeers." McCray teams up with 6-1 center Pam Stone and the fiery 5-4 1/2 guard Vicki Lee.

"Getting these three players at once has to be Tech's biggest recruiting coup," said Tech coach Gay Benson.

"Combining these three with the experience of Louise (Davis, Sr.) and Rose (Penkuns So.), we have been able to develop into a team that must be reckoned with."

"The most valuable aspect of all McCray's abilities is that she'll run when we need to, and we have to run to win," said Benson.

McCray knows that she is a basic part of the team's philosophy, because without her, the team can still win but they seem slower, more sluggish.

"I can run all game long if I have to," said McCray. "Coach Benson wants us to be a running-type team, and I

think that in order for us to beat some of the tougher teams in the nation, we're going to have to fast break and put the ball up a lot."

McCray is an outstanding all-around athlete who participated in three sports in high school — volleyball, track and basketball. She was state champion twice in the long jump and four times in the high jump, clearing 5-11 and setting the state mark for women. She led her Parkland High School squad to a 32-4 district title, averaging 19 points, 11.4 rebounds and five assists a game.

"Gwen played point guard, wing and center in high

school," said former coach Larry Vanley. "She played against many six-footers, but there wasn't a girl in El Paso that could out-jump her."

McCray was recruited heavily by many other colleges and junior colleges, including state powers Stephen F. Austin, Wayland Baptist and Texas A&M.

"Gwen is the best all-around athlete I've recruited at Tech," said Coach Benson. "Her ability to excel at other sports only helps her in developing her basketball skills."

McCray has not decided whether or not she will be a

multi-sport participant, but according to Head Track Coach Jarvis Scott, "she could really help out the team during the outdoor season."

With her jumping skills, she could become the best high jumper ever at Tech. But for now, McCray would just like to do her best for basketball. She has set for herself the lofty goal of becoming an All-American while playing at Tech.

"I'm really concentrating on our team play and passing. We've all got our shots down pretty well, we just need to develop our court sense about where everyone should be at a given situation," she said.

McCray UH runner ineligible

HOUSTON (AP) — University of Houston sprinter Rich Edwards, the defending Southwest Conference 100- and 200-meter champion, has been declared scholastically ineligible and will not compete in track this season.

Edwards, a two-year letterman from New Britain, Conn., established career best times of 10.18 and 20.57 seconds in winning both the 100- and 200-meter events at the SWC championships last spring.

Recreational Sports

Club upholds Tech tradition

Lacrosse in West Texas? You bet! Phil Marshall, Bill Kozar, and Jim Chapman began promoting lacrosse at Tech in 1974. They managed to put together a group which has been very stable, very consistent, and very competitive.

Most of the players on the lacrosse team, as in the past, learned the game here at Tech. The coaching has come from the several experienced players who have offered their time to enhance the sport.

The club is a charter member of the Southwest Lacrosse Association. It competes in a full spring schedule. Tech has always had a winning season in league play, and last year the team was named champion of the Southwest Lacrosse Association with a perfect 6-0 record.

Lacrosse, the oldest game in North America, was originally played by the Indians of the Northeast hundreds of years prior to the arrival of the first explorers from Europe. The game began as a religious festival — a test of strength and endurance for "The Great Spirit."

The conditioning and training necessary proved to be excellent preparation for combat. The game tested a brave's fitness for battle.

The French missionaries who witnessed this game were struck by the resemblance of the curved wooden playing sticks to one of the vestments of the Bishop's rank — the crosier. The game was therefore dubbed "La Crosse."

Today, the game is divided into four 15-minute quarters. The playing field is 60 yards by 110 yards in size. The object of the game is to score more goals than the opposition by throwing, batting, or kicking the ball into the goal with the stick or crosse.

Teams are composed of Midfielders, Attackmen, Defensemen, and a goalie.

Join a gathering of the "tribes" on a sunny, spring afternoon and take in an exciting game of lacrosse.

Tough going

Joe Powell of Pi Kappa Alpha finds passing to a teammate a little more difficult than he bargained for as Kappa Sigma defenders close in on him. The action occurred in

last week's intramural basketball competition. The Pikes won the shootout, 38-34.

Sports briefs

"SATURDAY MORNING LIVE"

This week's "Saturday Morning Live" competition will feature a four-a-side co-rec volleyball tournament.

Entries must be turned in by 5 p.m. Thursday. The tournament is open to all students, faculty, and staff.

The competition will take place this Saturday morning at the Men's Gym.

MASTER'S SWIM PROGRAM

The Recreational Aquatic Center will begin a Master's Swim Program this semester. This program is designed for the swimmer 25 years of age and older.

A registration period will begin Sunday for all interested students, faculty, and staff members. The program is free. The first meeting is scheduled for March 6.

Anne Goodman, Tech's women's swim coach, will sponsor the group and hold workout sessions.

FITNESS CLASS

A morning fitness program began at 7 p.m. Monday at the Aquatic Center. Bob Brown, an Aquatic Center supervisor, is conducting the program.

To join the class, call 742-3897 or sign up in person at the Aquatic Center. The class is free and will meet every Monday and Wednesday morning from 7-8:30 during the spring semester.

OFFICIALS MEETING

A meeting will be held at 2:30 p.m. Sunday for all officials interested in joining the Tech Officials Association. The Association is open to all active officials and off-season officials.

IM SCHEDULES

Men's intramural horseshoes and handball schedules are ready and may be picked up in the Recreational Sports Office, Building X-17.

Helping hand

Danny Reed (far left) and a pair of Pi Kappa Alpha teammates help injured Pike Mike Collier off the court in a recent intramural basketball game with Kappa Sigma.
