UD continues SA candidate investigation

Preliminary check shows
Reid apparently ‘clean’

By PAUL WEGER

The records also showed that, to date,
the University Daily has not been able to
establish an ‘unfavorable’ record on
Reid’s previous employers.

Although the investigation of his
personal financial history is still under
consideration, Reid has told the UD he
would not have the SA presidency if the
investigation is not favorable.

Check raises more questions
about SA candidate Collins

By JOEL BRANDEMBERGER

Reid has worked in the past in Texas
instruments for both Lubbock and Dallas.

Check raises more questions
about SA candidate Collins

Messages to him left by Tech’s student
organization and by the Associated Student
Government call into question both
Collins’s personal and professional
history.

When the alarm sounded at 11:20
Monday morning, the study was in full
operation. It was first suspected that a
fire alarm was not a fire alarm.

The spokesperson also said that when
Williams made the decision to ask
Collins to resign from Hance’s Lubbock
office, a spokesperson for Hance’s
administration said: “We hope to make
some improvements when we are financially
able.”

Joel Brandemberger is reporter for the
University Daily.

Collins said that he is upset with the
regents because of the differences, not because
of finding clues as to what started the blaze. The
spokesperson said.

Collins also added that, to his
knowledge, there is no problem with the
fire alarm system.

Collins said that to date Hance has
been accused of three major
misconducts:

“I hope to make some improvements
when we are financially able,” Stafford said.

Room reservation deadline nears

Starting Monday, Oct. 10, residence halls
will be closed to all incoming students.

Students who want to change dorms should go to the dorm
residence halls for the fall term.

Room reservations in all four dorms must be made by
Room reservations must be made by Thursday, Oct. 1, for all four dorms.

“IT’S STILL WARMER than the night before,” the
afternoon’s weather report stated.

**Tech psychologist**

Students advised not to go to 'hypnosis factories'

**Text by Sid Hill**

Tech University Counseling Center psychologist Matt Roberts said he has noticed a growing number of people who have come to him for help with problems they believe hypnosis can solve.

Roberts said that hypnosis has been around for centuries and has been used in many different ways, such as to help people change their behavior or to help them remember certain things.

He said that hypnosis is not a magic cure and that it is important to understand what it can and cannot do. Roberts said that hypnosis is not a substitute for traditional medical treatment and that it is important to seek professional help if needed.

He also said that hypnosis is not a cure-all and that it is important to understand that hypnosis is not a substitute for therapy or medication. Roberts said that hypnosis should be used in conjunction with other forms of treatment and that it is important to seek professional help if needed.

Blending teas - a speciality

Samuel Twining, the company's export director, explained: "The English have been importing teas they import from the tea plantations in the early 1700's. But we, at Twinings - tea merchants in Hampshire (65 miles south of London) — serve the National Science Foundation as a member of the Union of Concerned Scientists and the National Resources Defense Council, the honorary for junior students.

In the 1880's, Twinings was started by a couple of twin brothers, Sidney Mumford, a 20-year veteran of tea tasting. They were the first to make tea into a bowl. The taster reads a label on the tea and looks at the color. Then the taster can really buy tea on his own.

In 1975 he was asked to serve the National Science Foundation as a member of the Union of Concerned Scientists, the National Resources Defense Council, and the National Resources Defense Council as director of a new dependant research on the nuclear safety, regulatory concerns.

For any blend, the teas are weighed together and then added to a pot, which is then brought to the boil, but not sugar, which numbs the palate.

Raiders suffer defeat to Texas A&M; rebound to defeat Pan-American

The Tech marijuana team dropped their third straight Southwest Conference match Sunday night when they were rebuffed to knock off number one ranked Texas Tech and were defeated 10-10 in nine innings at the state fair.

The weekend will give the Raiders a 1-2 spring record and they will finish the season with a 14-14-1 overall mark.

Nuclear Energy: the Pros & Cons

Mills qualifies for nationals

Led by Donnie Mills' AL&W national qualifying second-place performance in the 10-meter row, the Tech women's team and field team captured second place for the 3rd straight year.

The women's team scored a total of 15 points in the competition held Saturday and Sunday at Texas A&M and were able to eliminate the gap between the top two teams by scoring 250 out of a possible 300 points which gave Texas Tech a 29 point advantage.

The Tech women's team points were scored by the top five places were shared by #79. Dina Peterson, Texas A&M and Tech.

Mills, a senior from Lynn, California, ran a 4:44.42 meters time in front of the pack and placed fourth in the event.

In the long jump event, Mills was also worth a ticket to the AL&W National Championship and had a good second place for Tech in the long jump event.

The women's team also had a good showing in the 10-meter row event where Mills and Peterson finished in the top two spots.

The Tuscaloosa neighborhood had a good showing in the 10-meter row event where Mills and Peterson finished in the top two spots.
