# Air Force plane crashes, at least 17 dead

By The Associated Press

ABILENE — A military refueling jet bound for Hawaii with 19 people aboard crashed in a ball of flames on takeoff Tuesday at Dyess Air Force Base, killing at least 17 people, Air Force officials said.

The plane's crew "never got it off the ground," said witness Vernon Wright, 19. "The first thing I saw was just the mushroom of the smoke."

Military dependents were among the 12 passengers on board, said Dyess spokesman Sgt. Al Dostal, but he did not know how many. The plane had a crew of seven, he said.

At least 17 were killed in the crash, said Lt. Col. George Peck at Strategic Air Command Headquarters in Omaha, Neb.

Military officials said they were recording the bodies as they were found and searching for the two missing.

"Any aircraft accident is bad, but the fact that there are as many fatalities (in this crash) makes it a particularly terrible one," said Maj. Dennis Pierson at SAC.

The KC-135A tanker plane, based at K.I. Sawyer Air Force Base near Marquette, Mich., was en route from Dyess to Hickam Air Force Base in Hawaii on a training mission, said Dyess Airman 1st Class Beverly Foster.

Some of those aboard were from Sawyer, said base spokeswoman Sgt. Anita Bailey.

"We're trying to get in touch with the families now but it's hard, because there's some confusion," she said. "We're waiting for confirmation that these people have been contacted."

Air Force officials said the plane crashed at 12:10 p.m. near the south end of the Dyess runway, near U.S. highway 277 about six miles southwest of Abilene.

According to officials who asked not to be named, the initial reports forwarded to Air Force commanders at the Pentagon and at SAC suggested the pilot of the ill-fated plane experienced some kind of problem during his take-off roll.

"It was toward the end of the roll and he apparently had no choice but to press on," said one source.

"But he didn't have the power to get up for some reason," added another.

The sources said the plane was carrying close to a full load of fuel — what the Air Force calls a heavy load — totaling 155,000 pounds. The tanker was scheduled to fly direct from Dyess to Hawaii and while en route, to refuel some F-16 jet fighters flying across the Pacific, the sources said.

Grass fires sparked by the crash burned for more than an hour around the plane, which came to rest tilted at about a 45 degree angle, a charred wing tipped toward the sky.

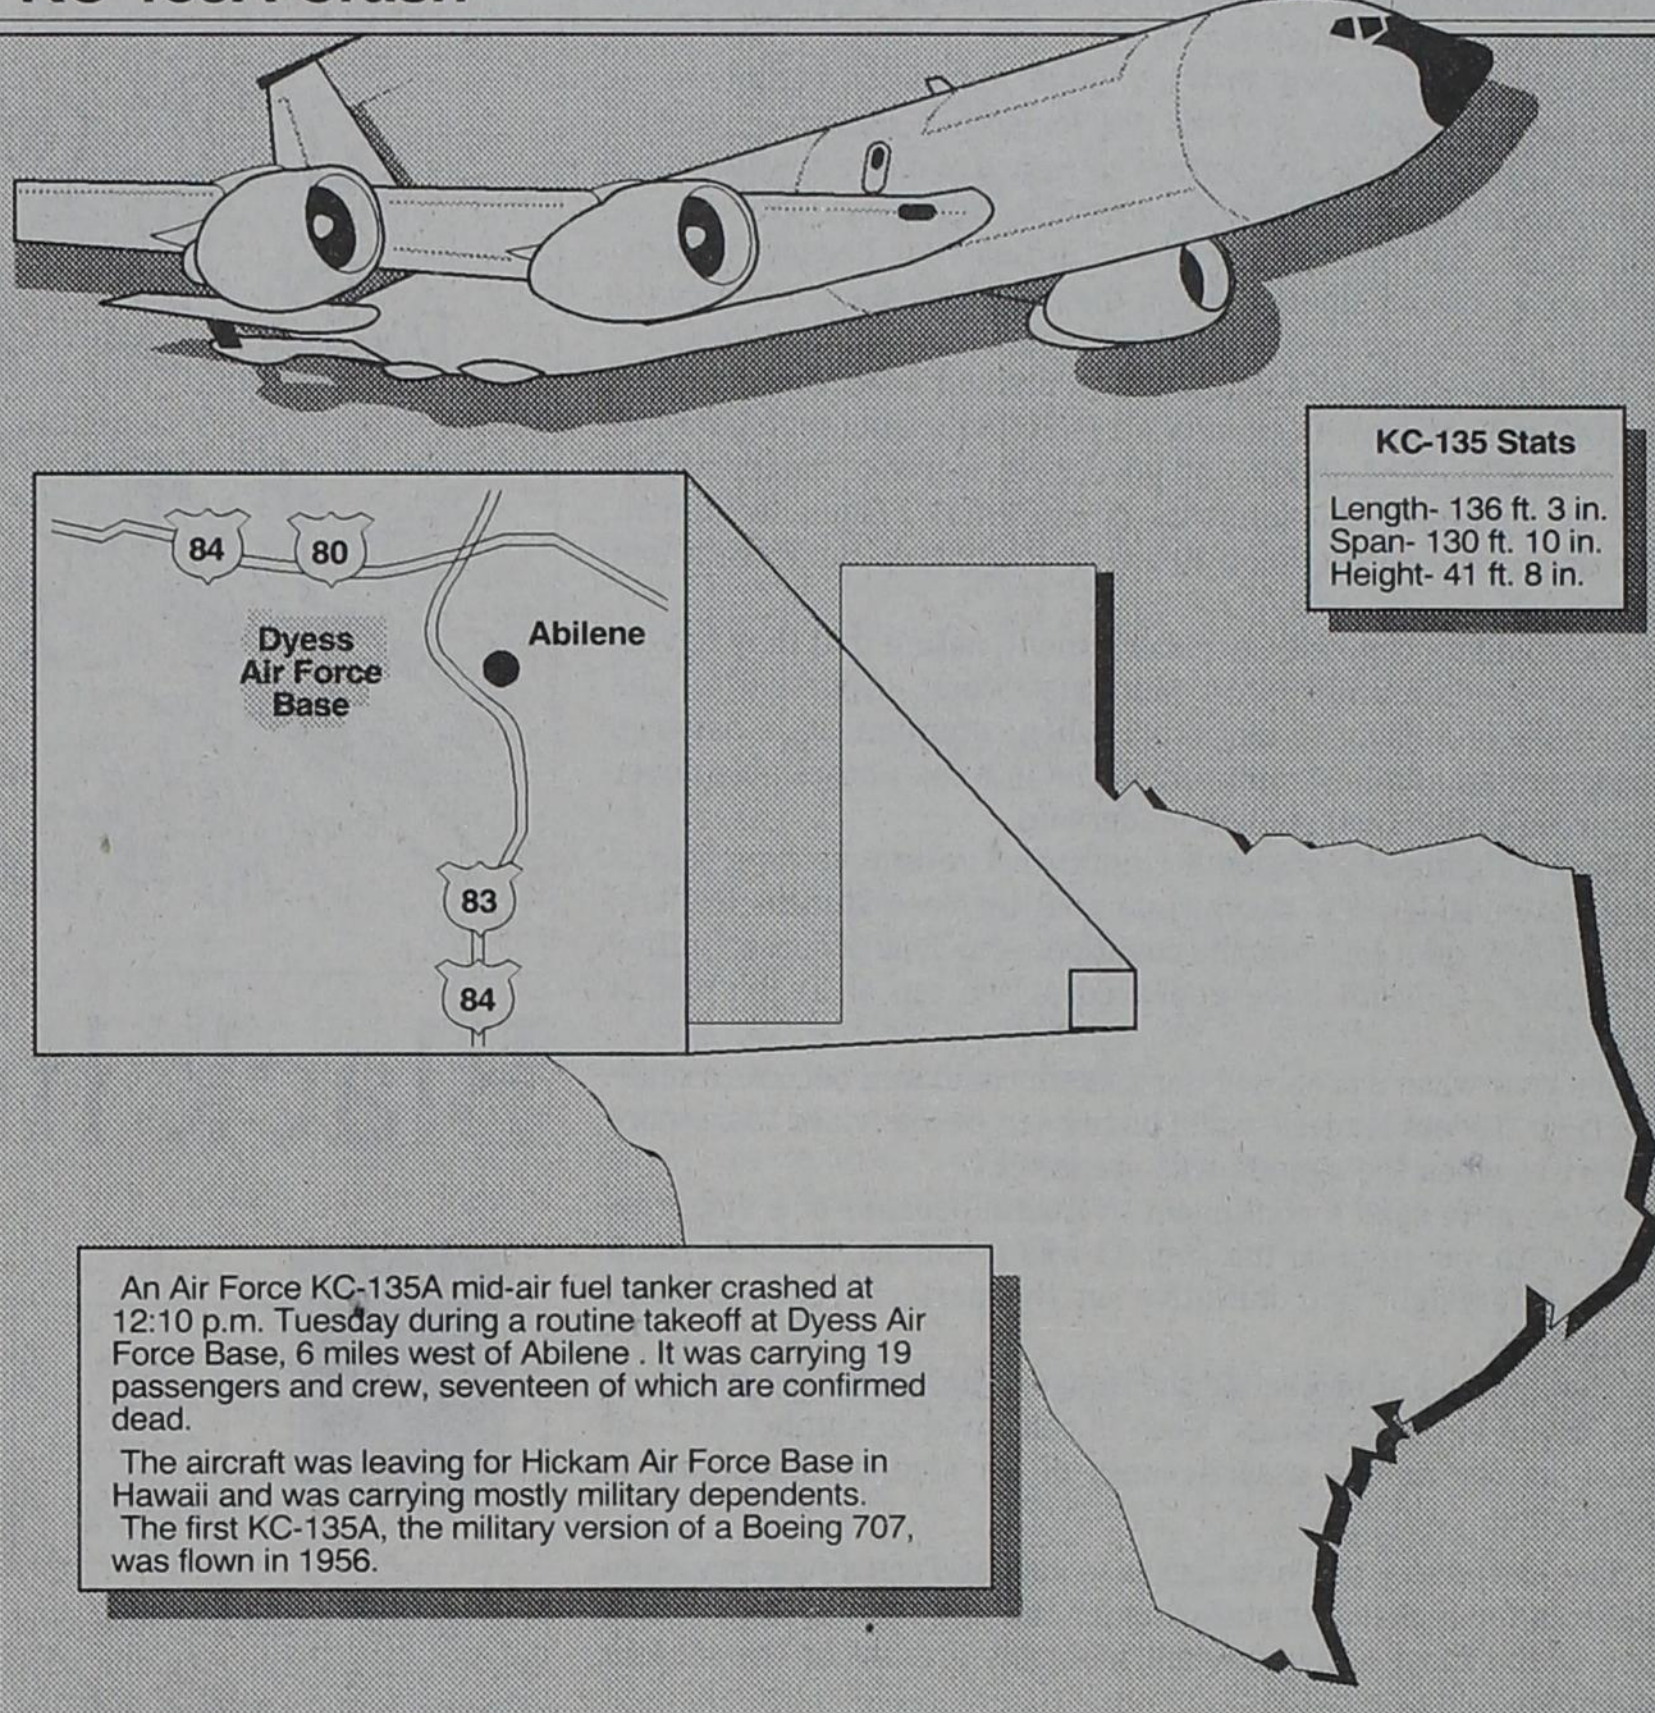

It was the second crash at Dyess in less than three months. A B-1B bomber crashed there Nov. 8. The four-man crew safely bailed out.

The maintenance record for the plane, powered by four Pratt & Whitney jet engines, was not yet available, Peck said.

The KC-135A, dubbed the Stratotanker, is the backbone of the Air Force's refueling fleet.

The aircraft, a military spin-off of the Boeing 707, normally takes a crew of four or five. It can carry a sizeable load of passengers even when carrying fuel.

## KC-135A Crash

**KC-135 Stats**  
Length- 136 ft. 3 in.  
Span- 130 ft. 10 in.  
Height- 41 ft. 8 in.

An Air Force KC-135A mid-air fuel tanker crashed at 12:10 p.m. Tuesday during a routine takeoff at Dyess Air Force Base, 6 miles west of Abilene. It was carrying 19 passengers and crew, seventeen of which are confirmed dead. The aircraft was leaving for Hickam Air Force Base in Hawaii and was carrying mostly military dependents. The first KC-135A, the military version of a Boeing 707, was flown in 1956.

## Measles epidemic

# 6,000 students possibly infected

By CINDY PANDOLFO and CAMERON MAUN  
The University Daily

Texas Tech officials called on students, faculty and staff members Tuesday to help thwart a possible campus epidemic of rubeola — the red measles.

Although student health physicians have identified only about 16 suspected cases of measles, Dr. Anthony Way, director of the city health department, said the number of exposed students could total as many as 6,000. No other outbreaks have been reported in Lubbock.

Dr. Scott Fry, director of Student Health Services, said several students with upper respiratory infections and a rash first were seen in student health. Fry said three or four students appeared recently who had typical measles symptoms. Another 15 students with atypical symptoms also have been identified, which Fry indicated is an exceptionally large number.

Fry said rubeola should not be confused with rubella, commonly known as German measles. Unlike rubella, which in pregnant women can result in birth defects, red measles pose no danger for unborn children or their mothers.

Because measles often mimic other viral infections, determining who has the disease is difficult. Even more difficult, he said, is preventing the spread of the disease.

"Measles is such a contagious disease," Fry said, "that if you are exposed, you are going to get it if you are not already immune."

Although infants are vaccinated for measles between 13 to 15 months of age, 10 to 12 percent still will be susceptible to measles because of the failure rate. A new vaccine was introduced in 1980 that is more effective. Fry said students immunized before 1980, however, remain at risk because of the failure rate of the original vaccine.

Fry said students who live in large numbers in closed quarters — such as residence halls — are at risk of contracting the disease. The high-risk group includes individuals under the age of 33 who live in residence halls and who were vac-

### Immunization Schedule

Because of a recent outbreak of Rubeola, Red Measles, Student Health Services has set an immunization schedule for students in the high-risk category:

Only students who meet the following criteria are considered to be in the high-risk category and will be the only ones immunized:

- Students who live or eat in the residence halls
- Students who are younger than 33 years of age
- Students who received measles immunization prior to 1980

High-risk students can receive immunizations at the following locations:

**Weymouth Hall, Weeks Hall & Stangel/Murdough**  
Wed. & Thurs. 12 p.m. - 4 p.m.  
5 p.m. - 7 p.m.  
Fri. 10 a.m. - 12 p.m.  
**Thompson Hall**  
Mon. - Fri. 8 a.m. - 5 p.m.

inated for measles before 1980.

"People who live off campus are angry because they want the vaccine and we can't give it to them," Fry said. "We must treat the high-risk group and those who we suspect have been exposed."

Red measles are characterized by a rash, fever, headache, upper respiratory infection, head congestion, body aches, malaise (listlessness), mild eye irritation, sore throat and a dry, hacking cough.

The fever and sore throat usually begin 10 to 12 days after exposure. The rash appears a few days later. Fry said the individual is extremely contagious from slightly before the symptoms appear until the fourth day following the appearance of the rash.

In severe cases, measles can cause ear infections or pneumonia. Students with those symptoms should avoid contact with others and call, not visit, a physician for advice, Fry said.

"Students should stay home until the symptoms abate," he said. "If they come to student health they risk infecting others, and there is not a whole lot that can be done."

An immunization program will begin today that will focus on all

students who live or eat in any of the dorms on campus. Fry said that because of a national shortage, the measles vaccine is difficult to obtain and the university will have a limited supply.

"We will have about 3,000 units of vaccine," he said. "We can try to get more if needed, but whether or not we receive more is questionable."

Fry emphasized that students who believe they have contracted measles should avoid contact with others.

"It is real important to stay in your room if you are not seriously ill," he said. "Students should not go to class just because they are worried about whether a professor will get mad. That is not a reason to go."

Fry said priority will be given to immunize athletes because they will be banned from travel if they contract the disease.

Donald Haragan, executive vice president/provost for academic affairs, said a memo will be sent to all faculty members today. Haragan indicated that faculty and staff will be asked to work with students who contract the disease.

# Judge says publicity makes jury selection difficult in North trial

By The Associated Press

WASHINGTON — Oliver North's Iran-Contra trial quickly ran into jury-selection trouble Tuesday, and the judge said there could be problems with "trialability of the case" because so many people had seen or read of North's testimony in congressional hearings.

U.S. District Judge Gerhard A. Gesell said only 16 of the first 54 prospective jurors indicated on questionnaires they weren't exposed to North's congressional appearances. The former White House aide testified to House and Senate investigating committees in 1987 under a grant of limited immunity from prosecution based on his testimony.

Gesell decided to hear arguments on how much exposure to such testimony ought to be allowed before a possible juror was disqualified. He said he would rule today.

As proceedings began, North, dressed in a dark suit, sat at the defense table. He had testified to Congress in his ribbon-bedecked Marine uniform but has since retired from the service.

North's trial on charges of lying to Congress, shredding evidence and conspiring to commit tax fraud "arises following a period of fairly in-

tense publicity on television, newspapers, magazines" which will continue, Gesell said.

He quickly excused the first five prospective jurors after all said they had been exposed to North's 1987 testimony.

One said she had the television turned on and was aware of North's immunized testimony, in which he detailed activities in connection with which he is now accused of crimes. Another prospective juror said she had monitored North's congressional appearances "rather continuously." Two others agreed with the judge's characterization that they had been "interested" in North's testimony. A fifth said she may have seen portions of North's congressional appearances "once or twice a week" during the time he testified.

North's attorney, Brendan Sullivan, also sought to rule out as jurors anyone who in recent days had seen North's congressional testimony replayed in news reports as the trial start neared.

John Kecker, who heads the prosecution team for independent counsel Lawrence Walsh, said he wanted to present arguments on the process of automatically disqualifying prospective jurors because they thought they might have been exposed to North's testimony.

The judge said he wanted to consider "how we're going to deal with this problem." He said, "This relates to the triability of the case."

According to Gesell, most of the first batch of prospective jurors responded "yes" to questions asking them if they had seen, read or listened to any part of North's congressional testimony.

The questionnaire each of the prospective jurors was told to fill out carried a written warning not to read or listen to anything about North. It also asked whether they know or have any connection with any of 195 people whose names have come up in the Iran-Contra case, including former President Reagan and President Bush.

Gesell wants to find 50 people out of a pool of 300 who have not been exposed to the congressional testimony of North or other witnesses at the congressional hearings.

Indicted last March, the retired Marine lieutenant colonel and decorated Vietnam veteran is the first figure in the Iran-Contra affair to come to trial.

He could face up to 60 years in prison and \$3 million in fines if convicted of all 12 crimes with which he is charged.

# Board approves RHIM degree

By DAWNA COWAN  
The University Daily

The Texas Higher Education Coordinating Board approved the Texas Tech restaurant, hotel and institutional management master's degree program Friday with no questions asked, said Interim President Elizabeth Haley.

The board approved the program without hearing presentations from Haley and Fred Smith, human resources director of Marriott Corp. in California, she said.

"We were prepared to make presentations, but the Coordinating Board's staff gave a positive recommendation and the board voted without hearing our presentations — and that was the better position to have," Haley said. Friday's approval is the first of two

review processes through which the program must pass, she said.

"The first review is really the most important," she said. "They review the academic content and just the whole idea."

Haley said the second review, which will concentrate on the financial status of the program, should go favorably as well.

In other business, the Legislative Budget Board eliminated a \$36 million proposal for additional funding to be used to implement the Texas Academic Skills Program (TASP).

The budget board deleted the proposed funding in an effort to prepare a reduced budget.

Tech would have received approximately \$677,000 of \$36 million, she said. To implement the state-required program at Tech in the first year will

require \$1 million.

"At this point, the legislative budget has been reduced, but there is a lot of negotiation forthcoming before the end of the legislative session," Haley said. "We're not opposed to TASP. We're very concerned about the importance of this program, but if the state isn't going to fund it, the program should be canceled or postponed."

Haley said costs for implementing the program would include a reporting and tracking system that requires the university to report students' performance on the TASP to high schools. Remedial classes for students failing parts or all of the test will require new teachers, extra advisement and counseling, she said. New technology such as computer programs for individual learning also will be needed.

## Student interests fail to capture attention, earn representation

With education thrust into the spotlight, 1989 promises to be an important year for Texas Tech if student leaders recognize potential ramifications for the university of the many important decisions to be made in Austin.

Student leaders from 30 other state university campuses — realizing the seriousness of the 1989 legislative session — went to Austin to lobby as the Legislature convened to make new laws and to hammer out a biennial budget for the state.

Tech was not represented in Austin this year because student leaders opposed a single item on the agenda of the student coalition of schools that sent representatives.

The Texas Student Coalition, the student lobbying group in Austin, included on its agenda a resolution asking legislators to create a student position on all governing boards of higher education to represent the interests of students. Placing a student representative on the Tech Board of Regents is far from a bad idea.

Tech leaders opposed the endorsement, noting that they have a "super" relationship with administrators. Apparently, the possibility of looking to the future when communication between students and administrators might be less than hospitable never occurred to the Tech student leadership.

Even if fighting for students' rights to serve on governing boards was not considered a worthwhile goal by Tech student leaders, other issues addressed by the coalition — such as proposed tuition increases — should have appeared at the top of Tech's list of priorities.

In a year when a proposed tier system could well become a reality, Tech student leaders would have been well-advised to be more assertive when the agenda was prepared.

Refusing to send a contingent to Austin because of a disagreement with one item on the agenda was a blunder that reflects a lack of foresight and initiative on the part of Tech's student leadership.

Now, instead of projecting the image of being third or fourth on the list of top universities, Tech is relegated to number 31 — at least as far as the assertiveness of its student leadership is concerned.

The University of North Texas — one of Tech's primary competitors for higher tier status under the proposed system — had one of the most active student lobbyists present at the student coalition.

Other smaller universities are busy presenting their students' priorities and concerns to lawmakers, while Tech students receive no representation because of a questionable concern. If student relations are so tranquil with administrators, those administrators certainly should see no problem in allowing a student representative on the Board of Regents.

Tech students must demand a better showing from their elected leaders in the future.

The University Daily encourages the officers of the Student Association, in conjunction with other student leaders, to formulate a plan of action to show Tech's interest in the university's future. Failure to do so can only bolster the position of people who insist Tech is a haven for mediocrity.

## Black history needs observance

### Society ignores achievements

Marva Thornton  
Guest Columnist

At my high school the students of the honors English program were responsible for putting together events for Black History Month, a task in which I was proud to take part. (Black History Month is a month of the year, February, in which blacks are recognized for their contributions to society.) I look back on those times because one year an incident occurred which greatly increased my appreciation for prominent black leaders who made a path for me not only to follow, but to become a "trailblazer" myself.

This particular incident demonstrated to me the ignorance of a kind of people who fail to look past the color of one's skin to see a human

being capable of contributing to society just as any man or woman.

That particular year a student said to me, "Why do you people have a month out of the year for this when your people haven't done anything for America?" At first I was extremely angry; then I proceeded to educate this non-Afro-American on the contributions made to society by blacks. Of course this non-Afro-American had no idea what I was talking about, so I told him to go to the library and enlighten himself on their many contributions.

After this experience I began to closely examine the content of many books used in our school system, and I found that they were incomplete — incomplete in that they didn't reflect the presence and activities of Afro-Americans or the land of their rootstock, Africa. The Negro pilgrimage began in Africa, but the biggest degree of unfaithfulness in

reality arises with the origin of civilization.

Indeed, most history books include the ancient Egyptians, but what they fail to mention is that ancient Egypt was a black civilization. Yes, it was. Therefore, I offer you prominent Negroes of the ancient Egyptian civilization.

First there was Narmer, the first Pharaoh of Egypt. He was responsible for unifying Upper and Lower Egypt for the first time. Also there was Zoser, Pharaoh of the Third Dynasty, and Cheops, Pharaoh of the Fourth Dynasty and builder of the Great Pyramid.

I could continue to identify many other prominent figures of ancient Egypt, but my point is that history has not been completely represented. Of course, we do see the contributions of blacks such as Dr. Rev. Martin Luther King Jr. and Frederick Douglass in American history books,

but there were so many before them. Particularly, John Derham, the first Negro physician in America, Onesimus, a slave responsible for smallpox inoculations, and many, many others.

It is this type of misrepresentation that justifies the celebration of black history in February. Afro-Americans must push for the appreciation of the Negro in the growth and development of America and in all of society.

Currently, blacks are portrayed as being pimps, prostitutes and dope pushers. Granted, there are those who participate in such activities, but not the entire race. We are doctors, lawyers, engineers, teachers and entrepreneurs.

But if you must see me as a pusher, I deal pride, not dope. I want you to hold your head high and not be high. We must be proud of our contributions in the past and those to come. In the words of the Rev. Jesse Jackson, "Keep hope alive."

Thornton is a senior telecommunications major from Dallas.

## Opinion

### Too much 'heat' mars abortion debate

To the editor:

It is difficult to know whether The University Daily's opinion of abortion, as expressed by its editorials and by its choice of what to run in the letters column, is reflective of that of the Tech community as a whole.

It is not difficult to see that abortion is one of the most wrenching of all political issues and that arguments about it all too often generate searing heat but no light. I want to implore Tech students to strive for light as they consider their opinions.

There are few "don't knows" on the abortion question in the American population; although a majority of Americans seem to favor the pro-choice side, many at both poles hold very intense opinions indeed.

When opinions are intensely held, little persuasion takes place — our most angry or impassioned arguments will not convince the equally impassioned friend who disagrees with us to change his or her views.

And the issue will not go away. It did not go away when Roe vs. Wade (1973) was handed down, and if Roe vs. Wade is reversed, the fight will only be multiplied fifty-fold, as the battle is carried into every state.

Abortion has been legalized, recriminalized and

legalized again throughout the Western world for the last 400 years, and women have sought abortions since the dawn of western civilization. We carry a special responsibility with an issue so enduring and divisive.

So please think carefully and deeply. Try to avoid sensationalizing the issue or falling prey to those who do; the half-truths and nasty one-liners do no good.

Remember that the abortion decision, like one's religious faith or the choice of a marriage partner, touches one in one's most private self.

It is a deeply personal decision, and we must remember that to make such a decision for another per-

son — to compel someone to end a pregnancy she wants, or to compel another to bear a pregnancy against her will — is to remove her control over her life and replace it with ours.

That is how grave the issue is.

Aim for light, not heat. Try to see that reasonable and moral people can differ. Try to seek a solution — one that serves both sides' view of what is just — in an atmosphere of mutual respect and civility.

## Clements says taxes will damage state's economic development

By The Associated Press

AUSTIN — Gov. Bill Clements, in his final state of the state address, Tuesday said economic development remains his top priority and urged the Legislature to avoid raising taxes, which he said would stall Texas' recovery.

"I re-emphasize that our economic development will be placed in jeopardy by increasing any taxes," Clements told a joint House-Senate session.

In a 28-minute speech that some lawmakers said often lacked specifics, Clements urged the mergers of numerous state agencies, including several in criminal justice and one which oversees financial institutions. He also backed the proposed mergers between the University of Texas and Texas A&M with South Texas institutions.

But the governor, who says he won't seek re-election, said the key to continuing successes of the past two years is to leave taxes alone.

"The bottom line is we do not need a tax increase. We must reach a consensus on the budget that fits within our commitment to maintain our economic recovery. A tax increase will choke it off," he said.

Some lawmakers have said an additional \$1 billion will be needed over the \$45 billion in state revenue projected for the 1990-91 budget period.

Clements indicated support for plan offered by Comptroller Bob Bullock that would give the Legislature that \$1 billion by shifting some state

monies from various special funds into the all-purpose General Revenue Fund.

Clements, the only Republican governor this century, said 329,000 more Texans are working now than in 1987 and said continuing that growth is the major goal of his final two years in office.

"At this time in our history, we have no higher purpose, no greater mission than to enhance and expand our economic development," he said. "We must not settle for second best. We cannot be satisfied with what we have achieved. We must dedicate ourselves to building a state economy in which every Texan who wants a job has a job."

Saying the state's economic progress is closely tied with Mexico, he announced a meeting with Mexican President Carlos Salinas in Mexico City on Feb. 15.

Clements, for the first time, publicly backed merger of both Pan American University campuses into the University of Texas System, and merger of the University System of South Texas into the Texas A&M system.

The governor also backed "flexible tuition" proposals, which would allow Texas college and university regents to set tuition charged at their schools.

He repeated his \$39 million proposal to reward public schools for making academic gains and reducing the dropout rate and drug and alcohol abuse. He endorsed Bullock's proposal to sell about \$600 million in state bonds and use the proceeds for classroom construction.

Clements also said the Legislature

should "carefully consider" the issue of funding equity between property-poor and wealthy school districts.

But the governor failed to suggest where additional money might come from and offered no specific recommendations for ending the disparity between rich and poor districts.

Sen. Kent Caperton, D-Bryan, was among those who said the speech left him wondering about such details. "To the extent that he's laid out some specific ideas, it's a good message. Now we need to find out what's really in them," Caperton said.

"He did not give us any kind of specifics on the school finance situation. I'm not sure what specifically he has in mind," added Sen. Gonzalo Barrientos, D-Austin.

Turning to the subject of crime, the governor said Texans demand action.

He endorsed mandatory flat-time sentences for repeat offenders, mandatory drug testing and drug treatment as a condition for parole, forfeiture of assets by convicted drug dealers, and increased penalties for assaulting police officers.

While indicating support for such prison alternatives as "boot camps," alternate facilities for minor parole violators and intensive supervision of parolees and probationers, Clements also urged lawmakers to back a \$200 million bond issue for prison construction.

He said that while prison alternatives are needed, so are extra cells.

"Let no one misunderstand, Texans insist violent criminals do their time," he said.

The governor, who spent an estimated \$12 million on his 1986 cam-

## Hobby concerned about education

By The Associated Press

AUSTIN — Gov. Bill Clements and state lawmakers may be headed for another tax showdown, but legislators Tuesday generally gave the governor high marks on his state of the state speech.

"I think the governor made an excellent speech. He touched on all the things that needed to be touched on. I thought it was extremely constructive," said Lt. Gov. Bill Hobby.

But Hobby, a Democrat and leader of the Senate, disagreed with Republican Clements' conclusion that a tax increase would choke Texas' economic recovery.

"It's much more important to maintain quality in public education and higher education. That's more important to the economic future of Texas than our very low tax load," Hobby said.

Sen. Kent Caperton, D-Bryan, chairman of the Senate budget writing committee, said he sensed more cooperation from Clements than in the 1987 session.

"I see a much more cooperative

attitude than we saw two years ago. He was much more combative and adversarial. (Now) he sensed more, I think, that we are partners in the legislative branch, and these problems are all of our problems," Caperton said.

In 1987, Clements kept lawmakers in special session in a bitter standoff on whether to raise taxes. During his election campaign, Clements promised to veto any tax increase, but eventually signed a \$5.7 billion tax increase, the largest in state history.

In his speech before a joint House-Senate session, Clements indicated a tax hike could be avoided through shifting some state monies, using funds currently tied up in tax disputes and issuing bonds for prisons and public school construction.

But Hobby and Caperton questioned whether the spending needs of the state could be met without a tax increase.

"I hope there's some room there for compromise, and negotiation — if we get to that point," said Caperton.

Clements has agreed to accept a

preliminary budget proposal that calls for spending \$43.7 billion over the next two years. But leading state lawmakers say this budget falls \$1.1 billion short of maintaining the current level of state services.

The proposal would cut higher education from a previous recommended increase, but still represents an increase over current spending by 2.3 percent. Hobby said such a proposal, "would be unacceptable. That would harm the state."

But when asked if a tax increase was needed, Hobby said, "I don't know."

House Speaker Gib Lewis, D-Fort Worth, said he will be looking toward the governor for guidance on how to balance the budget.

"He's (governor) going to have to come up with ways to finance it, whatever it is," said Lewis, but he added he was optimistic a tax hike could be avoided. "It will be very difficult to do, but I think we can do it. We just have to have a can-do spirit," he said.

He recommended that the Texas Finance Commission be "restructured and strengthened" to oversee the banking, savings and loan and consumer credit industries.

The tide of reform is sweeping across the political landscape of Texas and bringing with it an urgent call for limits on contributions," he said.

He recommended that the Texas Finance Commission be "restructured and strengthened" to oversee the banking, savings and loan and consumer credit industries.

## U.S. at risk, faces literacy decline, expert says

By STACY ALBRACHT  
The University Daily

Jonathon Kozol, an author and illiteracy expert, believes the inability to read a simple story to a child is a concern to everyone in the United States.

Kozol, who spoke at Texas Tech Tuesday night, said a homeless, illiterate young woman once said, "It matters, believe me it matters."

The young woman, Kozol said, is correct. Illiteracy matters.

"I wonder every time I get on a plane whether or not the guy who checked the fuel line can read," Kozol said. "Produce grown by farmers is another concern because of the pesticides that are now being used. I wonder if that farmer could read the labels on the pesticides he used."

U.S. Secretary of Education

Lauro Cavazos, former Tech president, estimates that 27 million Americans cannot read, and that number grows by about 2 million people each year. Of that number, 1.5 million come from the nation's high schools.

Half of that number are high school dropouts. Others graduate but still cannot read above the junior high level.

"If functionally literate means the ability to read road signs and labels, there are about 25 to 27 million illiterate people in the U.S.," Kozol said. "But if functionally literate means the ability to understand the editorial content of a newspaper or to read and be able to retrieve the past, then there are closer to 60 million illiterate adults."

Kozol said 45 percent of all adult Americans do not read a daily

newspaper and that only a portion of that number do not read newspapers by choice.

Worldwide, the Japanese population heads the list of daily readership with 575 of every 1,000 people reading a newspaper daily.

In the United Kingdom, 421 of every 1,000 people read a newspaper daily, and 408 of every 1,000 citizens in the Soviet Union read a newspaper daily.

In the United States, only 269 of every 1,000 people read daily.

Although \$200 to \$400 annually is required to teach one illiterate adult to read, state, federal and local funds provide only \$12 annually to educate each illiterate person in the United States.

"We are a nation at risk," Kozol said. "As a nation we are facing a collapse in literacy."

## Congressmen feel heat over pay hike

By The Associated Press

WASHINGTON — Texas congressmen are finding tea bags and scathing letters in their mail as they answer House Speaker Jim Wright's poll on whether, in their heart of hearts, they really want to vote on a \$45,500 pay raise.

Until Tuesday, Wright and other House Democratic leaders had indicated there would be no House vote on the 50 percent pay raise before Feb. 8, meaning it would take effect automatically and boost their salaries from \$89,500 to \$135,000.

But now Wright is seeking the advice of House members, asking them to "Tell me how you really feel," and promising to be faithful to their wishes while keeping the answers confidential.

"Sure he's feeling the pressure, sure he's feeling the heat," said Rep. Ralph Hall, a Rockwall Democrat

who has signed on to seven bills against the pay raise. "He's a speaker, he's a Texas speaker, and he's been a friend of mine for over 50 years. I don't think he ought to fade all the heat. He might as well give us a vote and that would take the heat off of him."

"It's no time for a pay raise," said Hall, whose mail is running nine to one against the raise.

"This has put everybody in a bad situation — they're either greedy or incompetent (for not voting)," Hall said.

A Democratic staffer who spoke on condition of anonymity said Wright's poll has created a firestorm for members who had been outspoken in favor of the raise.

"They can't put the phones down," the staffer said. "It has created a tumult." Staff in some offices are "going banshee."

Several Texas Democrats, including Reps. Martin Frost and John

Bryant of Dallas and Charlie Stenholm of Stamford, said they were pleased to see the speaker's poll. All agree the 50 percent increase is excessive.

"I think he wants to know what people's true feelings are and I think he's getting mixed signals from the membership," Bryant said. "His role in this has been one of attempting to do what's right for the institution. He's been getting so much conflicting advice he wants an honest statement from each member."

"There's going to be a vote. There is no way to avoid a vote on this issue," predicted Stenholm. "We can run but we can't hide. I don't want to do either."

Frost said Wright has been taking "all the criticism" but with the poll "he'll be able to find out for certain what a majority wants."

Frost says he's getting "a fair amount" of mail and the sentiments are intense and strongly expressed.

# Program uses high tech to reach students

By AUDRA SPRAY  
The University Daily

The Institute for Child and Family Studies Telecommunication Intervention Program (TIP) at Texas Tech will assist in meeting the educational needs of 7,500 handicapped preschoolers by May, the program director said.

Mary Tom Riley, director of the Institute of Child and Family Studies, said the program provides individual education plans (IEPs) for teachers of handicapped preschool children.

"This is mandated by law," Riley said. "You cannot teach a handicap-

ped student unless they have an IEP."

Although Riley designed the TIP program in 1977, the program did not receive funding for several years, she said.

"People didn't believe in the high tech approach," she said. "Every two or three years I would write a proposal, but they would say it was impossible."

The program was rejected four times before beginning operation in October 1985.

Psychologist Tommy Tidwell said the program focuses on children with conditions of speech, language,

health, hearing and visual impairment and emotional disturbances.

Using a toll-free 800 number, TIP clients enter data through a modem and receive needed information the same day, Riley said. In cases where clients do not have computers, clients mail in a form and a response is returned by overnight mail. Clients also may call the 800 number and speak directly to a staff member.

The child's chronological age, the suspected handicap and developmental age or test results or observations are required.

"The telephone conference is the most popular and is very successful,"

Tidwell said.

The TIP program also has a materials-lending library of 3,000 audio-visual aids, toys and learning kits that may be loaned and delivered overnight, she said.

"We deal primarily with teachers in Head Start or other early childhood programs," Riley said.

The program serves federal region six — Louisiana, Arkansas, Texas, Oklahoma and New Mexico. Riley said the program is funded by the Administration for Children, Youth and Family, which is part of the U.S. Department of Health and Human Services.

## News Brief

### Groups provide cholesterol screening

The recreational sports department will sponsor a blood cholesterol screening clinic from 6:30 a.m. to 9 p.m. Feb. 16. Results for total cholesterol, HDL cholesterol, triglycerides and a calculated LDL cholesterol will be provided. Fasting 12 hours before screening is recommended for accurate test results.

Seminars will be conducted at 12:15 p.m. and at 5:30 p.m. March 1 to discuss results. The cost is \$8. Those interested should register by calling 742-3352 by Feb. 16. For more information call 742-3351.

The South Plains Regional Chapter of the American Red Cross will sponsor a blood cholesterol screening clinic from 10 a.m. to 9 p.m. Friday and Saturday at South Plains Mall.

A \$5 fee will be charged for a quick, painless and accurate test. The finger stick method is used to obtain blood for the test, which requires no fasting. Results can be obtained in three to five minutes.

For more information contact the American Red Cross at 765-8534.

### Professor selected as editor for journal

The Southwest Education Council for Journalism and Mass Communications has selected John Schweitzer to serve as editor of the *Southwestern Mass Communications Journal*. Schweitzer is director of graduate studies in the School of Mass Communications at Texas Tech.

Jerry Hudson, Tech director of mass communications, will resume the position of managing editor for the journal.

## New service promotes Tech

By AUDRA SPRAY  
The University Daily

Promoting the university is the goal of a new program adopted by the College of Arts and Sciences Ambassadors, says Paula Brashear, arts and sciences external relations director.

The Speakers Bureau will provide ambassadors to speak to various schools, clubs and civic organizations about Tech, she said. The ambassadors serve as liaisons to the community, alumni and prospective students, she said.

The basic reason behind the new program, Brashear said, is to show the results of education at Texas Tech.

"It's to let people meet and hear students from Tech," she said.

The new program warranted intensive training, Brashear said.

"They had to take a three-semester-hour speech course especially for ambassadors," she said. "Everything in the course was geared toward helping them become better prepared and informed."

The speakers will present information that will be surprising and interesting to prospective students, Brashear said.

"For example, our theater productions have consistently accumulated more wins in competition than any other university in Texas," she said.

The college also is taking applications for ambassadors for the 1989-90 academic year. Of the 15 ambassadors in the program, six will graduate in May, she said.

Applicants must have a 3.0 grade point average, display outstanding verbal communication skills and upright character and personality that reflect well on the university.

A letter of recommendation from a faculty member also is required.

"Freshmen and sophomores are preferred," Brashear said. "However, juniors and seniors will be accepted."

Each ambassador is required to work an average of two hours a week, including a weekly meeting, Brashear said.

Application forms can be picked up in 202 Holden Hall. For more information call 742-3834. Deadline for application is March 1.

## Tech faculty disapprove official English proposal

By CORTCHIE WELCH  
The University Daily

Several Texas Tech administrators and faculty members have stressed disapproval for a proposed constitutional amendment that would establish English as the official language of Texas.

Jerome O'Callaghan, an assistant political science professor, said he disagrees with the bill because a bilingual population would be an asset to the state. Callaghan said he believes the only purpose of the bill is to eradicate languages of the non-English-speaking population.

"It is not American to not be tolerant of the diversity in our country, particularly in Texas," Callaghan said.

O'Callaghan said passing the amendment would be a step backward.

"We pride ourselves of being the melting pot of all nations," he said.

State Rep. L.P. Patterson, D-Brookston, sponsor of the legislation, said the bill enables everyone in Texas to learn English.

Rod Schoen, associate dean of the Tech law school, said the amendment is not warranted because the non-English-speaking sector is entitled to equal protection under the law.

Eliverio Chavez, an assistant pro-

fessor of classical and romance languages, said the bill would be an absolute drawback if the amendment becomes law. Chavez said the First Amendment guarantees the right to express opinions in any language.

The proposed legislation, Chavez said, is a manifestation of paranoia.

"People are politically afraid that Hispanics may break away and have too much power," he said.

Chavez said he thinks the bill would be an intrusion on the Hispanic communities' interests — such as bilingual programs, Hispanic newspapers and television programming.

Resorting to a government mandate making English the official language is unnecessary, said Roberto Bravo, an associate professor of Spanish.

"I feel that this proposed legislation is some form of cultural discrimination," Bravo said. "It is implying that if you want to prosper in the United States, you better learn English."

Bravo said the bill has been brought to legislation because there is fear of political organizations being divisive.

Bravo said that according to predictions, more than half of Texans will be speaking a foreign language in the year 2050.

## Spring softball teams organizing

By BETH GEORGE  
The University Daily

When springtime is in the air, many a young man's, and a young woman's, fancy turns to baseball. Or slow-pitch softball, as the case may be.

The Lubbock Parks and Recreation Department is gearing up to organize the 1989 Spring Softball League.

Any one who is interested in organizing a team for the spring season should plan to attend one of the managers' meetings at 8 p.m. Feb. 7 and Feb. 9 at Hodges Community Center at 41st Street and University Avenue.

Teams may be organized by any person who will be at least 16 years old by March 1, said Beau Denson, athletics supervisor for the Lubbock Parks and Recreation Department.

An average of 350 teams register with the league each year, Denson said.

Each team manager will be responsible for recruiting his or her own team and registering the team with the league, Denson said.

Team registration will begin Feb. 20 and continue through March 3. Each team must pay a \$210 registration fee to help cover the cost of field lights and rule books.

The league guarantees each team 10 league games which will be

scheduled on the nights the team requests, Denson said. The league provides lights, umpires and scoreboard personnel for each game.

Teams must comprise at least eight players, but up to 20 may be included on the team roster. Each team will be able to choose its own name, Denson said.

Teams may be either all men, all women or co-rec. Co-rec teams must have an equal number of men and women.

Different skill levels have been organized so teams can be matched with competitors of equal ability,

Denson said. The levels range from low, for teams that have novice players or may not have played before as a group, to expert, for teams Denson described as "superplayers."

Each team must supply its own equipment, but the league will provide team managers with a scorebook and rule books from the American Softball Association and the city league.

Tournaments are organized throughout the season to add some flair to regular league play, Denson said.

This season's tournaments will include the Jack and Jill Co-rec Open, a fast-pitch tournament for all-male teams and the Us vs. Them Tournament, which pits the umpires against the players.

Teams registered with the city league will be eligible to play in regional and state softball tournaments, Denson said.

The spring season will open April 3, and the manager or representative of each team should plan to attend the manager's meeting for a complete explanation of the Spring Softball League rules and requirements.

## Letterman's 7th

David Letterman invades the prime-time airwaves at 8:30 p.m. Thursday for his show's seventh anniversary special on NBC.

The sixth anniversary of "Late Night with David Letterman" received an Emmy nomination, and with the lineup for this year's show, the results should be just as good.

A number of fast-paced exchanges with some of Letterman's famous guests from past shows will be shown. Included among those guests are Cher, Eddie Murphy, Madonna and Arnold Schwarzenegger, just to name a few.

During the past seven years, Letterman has had more than 200 animals perform on his Stupid Pet Tricks segment. Several of the best tricks in recent years, including Augie, a dog that drinks milk out of his master's mouth, will be spotlighted in the course of the show.

Other "Late Night" classics, such as the Velcro suit, the Alka-Seltzer suit, the monkey cam, the hydraulic press and the legendary five-story tower, will be shown at various points during the 90-minute festival.

Letterman's biggest guest of the evening comes to the show live from Florida. The Goodyear blimp Enterprise will be relaying various shots of Florida to NBC's Studio 6A, from which the event will be televised.

Adam West was born William West Anderson on Sept. 19, 1928, in Walla, Walla, Wash.

### Trivia

Ethel Merman appeared on "Batman" as villainess Lola Lasagne.

Burgess Meredith played the Penguin, the most frequently seen villain on "Batman."

## Cutoff date extended

By TIM WEINHEIMER  
The University Daily

The 1989 Miss Texas Tech Scholarship Pageant will take place at 7:30 p.m. Saturday, March 11, in the University Center Allen Theatre.

Sponsored by the Texas Tech Residence Halls Association, the pageant has extended the deadline for applications. Applications for the scholarship pageant must be submitted by 5 p.m. Thursday. Pageant applications can be picked up in the Residence Halls Association office in 128 Doak Hall. A total of 14 applicants had turned in applications as of Tuesday afternoon, according to pageant director Leslie Davis.

"All applicants are required to meet certain guidelines," she said. Davis said all the pageant rules and regulations are outlined in the application contract.

Requirements such as a minimum 2.5 cumulative GPA, full-time student status and dance experience are some of the basic rules for persons wishing to enter the pageant.

A panel of seven judges from across the state with professional experience in pageant competition and training will judge the pageant. Contestants must complete the three parts of the competition which include the personal interview process, swimsuit competition and evening gown competition, Davis said.

The new 1989 Miss Texas Tech not only will receive more than \$1,500 in scholarships and prizes contributed from various local businesses, she also will have the opportunity to compete in the 1989 Miss Texas Pageant in San Antonio this August.

"Texas Tech and Texas A&I University are the only two universities in Texas that send a contestant to compete in the Miss Texas pageant," said Davis. "It's really prestigious."

Endorsements for local businesses supporting the pageant add to the list of opportunities for

Tammy Owens

the new Miss Texas Tech. "In addition to numerous prizes, Hallmark Gemstones has once again donated a ruby Double T pendant to be awarded to the winner," said Davis.

The current Miss Texas Tech, Tammy Owens, will be turning over her crown to the 1989 Miss Texas Tech during the March 11 festivities.

Masters of ceremonies for the evening will include John Griffith of FM-99, Kevin Pipkins, hall director of Bledsoe and Sneed halls; and Rich Dabney, hall director of Hulien/Clement halls.

Davis encouraged all women who wish to enter the contest to do so. According to Davis, more than 150 application forms have been sent to all the student organizations.

"The Canterbury Club, Student Foundation, and Block and Bridle are three new organizations that have entered this year's competition," said Davis.

Pictures for late applicants need to be taken at Robert Suddarth Photography on Thursday, Davis said. For more information, contact Leslie Davis at 742-4809.

## Tech men's tennis team springs into tough slate

By JOEL BROWN  
The University Daily

Texas Tech men's tennis coach Ron Damron and his players are looking forward to a few unfamiliar faces.

The Red Raiders will begin a long-awaited spring season Friday after competing with nobody but themselves each day since October. And along with the new competition comes the hope that Tech has not lost the momentum it carried into the interim period.

"Right now we're just pleased to be playing somebody besides ourselves," Damron said. "It's hard to see how you're playing when you're playing each other so much."

Where Tech's strength lies, Damron said, may be in the consistency of all his player's abilities.

"We are very even, and I think that's very good for us in case you lose somebody," he said. "Players one, two, three and four are so close, and five, six, seven and eight are about even."

In singles play, junior William Dopson and senior Nathan Ritchey will anchor the No. 1 and No. 2 posi-

tions, while sophomore Matt Jackson and freshman Fabio Walker will be third and fourth. Senior John Sullivan, freshman Michael Slauson, junior Steve Kordas and freshman Charles Bailey make up the fifth, sixth, seventh and eighth positions respectively.

"As most teams go, we don't have a really dominant No. 1 player. (Dopson) has a type of game that can win matches at No. 1, but he's got to prove himself."

Regardless of how Dopson or the rest of the players perform in the coming weeks Damron does not expect to shuffle the lineup.

"I've got a lot of confidence in William. I think he's earned the right to play No. 1. I can't see anybody else on the team playing better at No. 1 than he would do," Damron said.

Tech's doubles will consist of Dopson/Jackson at No. 1 and Walker/Slauson and Kordas/Bailey at Nos. 2 and 3.

"We're still pretty young. I'm hoping our guys will respond to the competition and not be too awed by it. I don't think they will," he added.

Damron said he hopes the

## Raiders' season hits new Lowe

# Lanky center trying to break 'junior jinx'

By JOEL WEST  
The University Daily

Wes Lowe did not have a "sophomore slump."

Instead, the 6-10, 210-pound center/forward for Texas Tech is having what could be termed a "junior jinx."

After playing in 28 games as a freshman, Lowe had an exceptional sophomore season, figuratively exploding offensively near the season's mid-point. The Mesquite native averaged 10 points and almost six rebounds per contest. Four times he scored 20 points or more. He was the only Raider to start every game.

He posted a career high against SMU with 27 points on Jan. 23, 1988. Four days later against Texas A&M in Lubbock, he surpassed that with 28 points.

Judging the improvement he made from his first year as a Raider to his second, many thought Lowe had a chance to become a formidable post in the Southwest Conference in 1988-89.

But to say that this season for him has been a disappointment may be an understatement.

Lowe is playing 10 minutes a game so far and has only eight total points in seven conference games. Half of those came against Texas on Jan. 18. Lowe's season-high scoring output was 14 points against Purdue in the Raiders' second game.

For the season, he's averaging 3.8 points and 2.3 boards per outing.

Lowe, who said he does not believe his defensive play is suffering the same slump, has had a rough time of late offensively. In four of Tech's last five SWC contests, he has not scored a point. He did not even play in the Tech-TCU battle Jan. 22.

It was the first time since Dec. 4, 1986, that Lowe did not enter a game.

"I got off to a slow start the first of this season and things weren't going the way I thought they should be. And that kind of got me down," Lowe said. "Like, 'What's going on, what's wrong here? Why am I not doing this?'"

"I came in and had high expectations for this year. You've got to have high expectations coming in as a junior," said Lowe, a member of the GTE All-SWC academic team last season.

File Photo/The University Daily

File Photo/The University Daily

## Down Lowe

Despite a mild output so far, Tech's Wes Lowe remains confident his fortune will change for the better. Lowe says it's a matter of time before he returns to last season's level of play.

Lowe said the transition to playing with junior-transfer center J.D. Sanders (which resulted in Lowe moving farther away from the basket when both are in the game) was not the easiest.

"I think it took a lot to adjust to. And the fact that I thought I wasn't playing the way I thought I should be got my confidence down," he said. "Then I started pushing too hard."

However, Lowe said he could not pinpoint the time when he could tell when his performance was slipping.

"I don't think there was any one point in time where I thought, 'Gosh, look at this,'" he said.

When Sanders was benched for a one-game suspension against SMU, Lowe found himself starting again. He hoped to use the time to regain some lost ground and more important, confidence.

But it was not realized. Lowe took a pass inside and got by his defender for what appeared to be an easy lay-in. But like a train bent

for derailment on an infinite track, the ball took a trip two-thirds around the rim and fell into a Mustang's waiting hands.

"That was probably more indicative of how my night was going," said Lowe, who finished 0-4 that evening.

"I get a chance to start again and come out and show something. I was just real uptight. I was too tense. I was not comfortable."

Many Tech fans voiced their opinion by booing. Others empathized, or possibly answered his detractors, with a standing ovation.

"I didn't notice it (the booing)," he said. "When I get in the game, the only things that I can hear is what's on the court and what the coaches are saying."

The lid that was on the basket for him against SMU apparently followed him to College Station Saturday.

With 3½ minutes left in the first

half, Lowe took a pass on the right side of the key and drove to the basket for a slam dunk. But the ball hit the rim and shot 15 feet in the air past the three-point line.

It was his only shot of the game.

"That was one of those fluke deals," he said. "I was up high enough — maybe too high — that's what some people said. It just hit the back of the rim."

Through all the adversity with his performance and the fans, Lowe said he believes the off-play eventually will come to an end.

"Now that I'm not starting, people aren't expecting anything from me and that's going to relieve some of the pressure that I was feeling," he said.

"I just need to relax and play my game the way I played it last year. It's bound to improve sooner or later. I've just got to keep a good attitude and keep working hard."

# Pressure on Tech's arms once again

Brad Walker Sports Editor

Provided that Mother Nature does not decide to go ahead and allow us a winter season, albeit a late one, and dump some snow on the "Hub of the Plains," I will be able to begin my intense religious season a little before Easter.

This weekend brings with it the opening of the 1989 college baseball season. Hallelujah.

Snow may disrupt Texas Tech's opening series with New Mexico on Saturday at Dan Law Field. That may be the price, though, Red Raider coach Larry Hays has to pay for scheduling games before major league pitchers and catchers even report to their pre-season training camps.

I realize, of course, that Tech's basketball teams are hardly through half of their Southwest Conference seasons. And I realize, too, that you're more apt to go watch the roundball Raiders because they play indoors — the way sports ought to be played in February. However, with any new season comes hope and optimism; that's what has me thinking of Tech baseball.

Hays begins his third season at Tech after an impressive tenure down 19th Street at Lubbock Christian, which saw his Chaparrals win a NAIA national championship, not to mention beat Tech. He finally has rid the team of unwanted leftovers from former coach Gary Ashby's squads. This team is one that he wants.

The question is: will it be a team opposing hitters want, too? In the past the Raiders were loaded with lumber but unarmed for defense. There is a permanent "help wanted" sign above Tech's bullpen.

As usual, bats are in no short supply and the pressure is at the mound. Returning pitchers from last year's 34-25-1 team — Kurt Shipley, Eric Kleinsorge, Rodney Steph and Kevin Kirk, et al — must pitch at a level not seen in Lubbock in years if Tech is to seriously challenge the upper division of the SWC.

# Third straight win looms ahead

By JEFF PARKER  
The University Daily

Winning streaks for the Texas Tech men's basketball team have not lasted too long in recent years. The Red Raiders will be going for their third straight Southwest Conference win, however, when they make their first trip to Baylor's new Ferrell Center tonight in Waco.

Tech has not won three consecutive games since the 1986-87 season saw wins over Midwestern, Houston and Rice.

After back-to-back victories against SMU and Texas A&M, the Raiders have moved to 8-10 for the year but more important, 3-4 and fifth place in the SWC standings.

Tonight's game marks the midway point of league play. The second half favors the Raiders, who find five of their remaining eight games at home, including games against high-flying Arkansas and Texas.

Coach Gerald Myers said Tech is beginning to mature and is improving due to hard work and overcoming adversity.

Baylor trumped the Raiders last year 91-49 in the Bears' former den, the Heart O' Texas arena, but trails Tech 47-27 in the overall series.

C-40	Joey Fatta	6-8, Fr.																														
G-25	Melvin Hunt	6-3, So.																														
G-24	Donnell Hayden	6-1, Jr.																														

Gene Iba's Bears feature talented guards in Donald Hayden, Michael Hobbs and Melvin Hunt but are led in scoring by forward Julius Denton, who is averaging 13.9 points a game. The Bears are young, with only one senior on their roster versus six underclassmen.

Still, Myers believes Baylor cannot be taken lightly. "They are a well-coached team that plays sound basketball," he said.

The Raiders finally got the road monkey off their back by traveling to College Station and defeating the Ag-

gies 75-68. Tech had not won on an SWC opponent's home court since Feb. 4, 1987, when they defeated Rice 79-63.

Myers said the squad went into the Aggie game with the same frame of mind as any home game and outplayed A&M on its home floor.

Todd Duncan came off the bench against the Aggies to hit seven of nine shots, four of five from three-point land, for 18 points. Center J.D. Sanders provided the inside muscle by scoring 19 and maintained his spot as the top field-goal percentage shooter in the conference.

# Tech women may begin to roll

By JEFF PARKER  
The University Daily

After numerous ups and downs this season, the Texas Tech women's basketball team finally may have won the "big" game to get the Red Raiders rolling.

Tech, now 9-9 overall and 3-4 in Southwest Conference play, defeated highly favored Texas A&M 84-77 in what possibly was its best effort of the season. A&M was the second-place team in the league with only one SWC loss until Saturday.

Tech assistant coach Linden Weese said the A&M game was the best execution he has seen from the Raiders this season.

"It was the best game by far they have played this year," Weese said.

Tech faces a hard-luck Baylor squad at 5 p.m. today in the new Baylor Ferrell Center. Baylor, 3-14 and 1-6, is coming off an 86-51 loss to Houston at Hofheinz Pavilion Saturday.

The Bears feature 5-11 junior forward Maggie Davis-Stinnett, who is averaging 21.5 points and 10.2 rebounds a game. Stinnett was picked by several publications as an honorable mention All-America candidate before the season.

Tech's Reena Lynch, who was a second-team All-SWC pick last year and has struggled offensively at times this season, broke out of her shell to hit seven of 10 floor shots and score 15 points against the Aggies.

Freshman Jennifer Buck and junior Stacey Siebert continued their tough inside play in College Station. The A&M contest was the fifth consecutive game in which either Buck or Siebert has led all Raider scorers.

Buck maintained her hot hand, making eight of 11 from the field and

six of nine free shots for 22 points. Siebert hit nine of 14 attempts for 21 points.

Weese also praised the defensive performance of guard Tammy Walker on A&M's Donna Roper. Walker held the All-SWC pick and preseason All-America to making only seven of 17 shots from the field and a below-average 17 points.

"Even though Baylor is below us in the standings," Weese said, "we are going to have to play well to keep them there."

# Yeoman may retire soon

By The Associated Press

HOUSTON — Bill Yeoman, former Houston head football coach, is expected to retire from his university fund-raising position by early March. The details of Yeoman's retirement, however, are not yet complete, school officials told the Houston Chronicle.

"It's going to happen," a source said Monday. "It's now just a matter of time."

Yeoman is in the third year of a four-year, \$412,000 contract. After he leaves, he is expected to be compensated according to his individual retirement options.

Yeoman and school President Richard Van Horn declined to comment on the former coach's future.

Yeoman, who coached the Cougars

for 25 years, has served in the fund-raising post since he retired from football coaching in 1986.

The Cougars were placed on three years' probation in December by the NCAA for recruiting violations. Yeoman's direct role in the improprieties and his initial reluctance to cooperate in the NCAA inquiry were noted in the association's report.

The NCAA probation, the school's third since Yeoman took over the Houston program in 1962, prohibits bowl game appearances for the next two seasons and live television next year. The sanctions also include a reduction in Houston's allotment of scholarships.

The NCAA indicated the penalties against the Cougars would have been harsher had several steps not been taken to improve the integrity of the athletic program.

# Netters tabbed 7th

Continued from page 6

Raiders, picked seventh in the SWC preseason ITCA coaches poll, can use the inexperience to their advantage.

"We're hoping because we are a young team that folks will overlook our ability and maybe take us for granted a little bit," he said. "It's gonna help us a lot to be the underdog."

Four SWC teams were ranked nationally in the preseason poll — No. 7 Texas, No. 13 TCU, No. 15 Arkansas and No. 19 SMU.

# Martin resigns

Texas Tech Athletic Director T. Jones announced Tuesday that Donna Martin has resigned as Tech head volleyball coach effective May 15.

Martin, who during her four years at Tech compiled a 60-54 record, was the Southwest Conference Volleyball Coach of the Year in 1987 after leading the Red Raiders to a second-place SWC finish — the Raiders' best-ever league finish. Tech completed season play with a 13-18 mark in 1988 and placed fifth in the SWC at 3-7.

Jones said he would like to have the position filled before Aug. 1.

# Ruggers open spring season with win

The Texas Tech rugby club began the spring season on a winning note Sunday as it beat San Angelo 38-12 in Lubbock.

Tech, which finished 9-4 last fall, was led by Willis Marshall and Rodney Dokie, with two tries apiece, and Andrew Bush, who added one try.

## IM BRIEFS

### Rec Center provides fitness testing next week

The Rec Center will have Fitness Testing on Wednesday, Feb. 8 and Thursday, Feb. 9 in the Lower Level Multi-Purpose Room of the SRC. There are 5 tests — cardiovascular step test, skinfold percent body fat, flexibility, blood pressure and abdominal endurance (sit ups). You may choose to do all or just those you wish. The test will be repeated in March and April so you can see your fitness progress. Times are Wednesday noon-1:15 p.m. and 4:30 p.m.-5:45 p.m. and Thursday 4:30 p.m.-5:45 p.m.

### Orlandos sponsors Valentine Day fun run

Show your special person that you really care — run the two mile Valentine's Day Run on Tuesday, Feb. 14 at 5:15 p.m. This run is sponsored by Orlandos and dinners for two will be awarded to the fastest and the couple closest to their combined predicted score. There will be drawings for pizzas — so individuals are also encouraged to run. Be creative this Valentine's Day — and you may win dinner on Orlandos.

### Blood cholesterol screening test

The Student Rec Center will again have blood cholesterol screening on Thursday, Feb. 16 from 6:30 a.m.-9 a.m. There is an \$8 charge for the tests which will give you total cholesterol, HDL cholesterol, LDL cholesterol and Triglyceride counts. There will be two seminars on Wednesday, March 1, to discuss the results. Please call 742-3352 by Tuesday, Feb. 14 to reserve a spot.

### Take the challenge, register for health program

It is not too late to register for the Physically Fit Techsians — a program that promotes healthy living by challenging you to exercise on a regular basis. Participants predict the number of points they can achieve during the semester through various cardiovascular exercises. If the goal is achieved, you receive a t-shirt. An added incentive is the group goal — get three or more of your friends to register and if 75 percent make their goals, you receive an additional award. Registration ends Feb. 10 — so don't delay.

Art Sanders leads one of the many aerobic fitness classes offered each day at the Student Recreation Center. Classes range from the Easy Goin' to Waist Crunchers with different classes offered throughout the day beginning at 6:45 a.m.

### Mountain Bike race scheduled

Sunday, Feb. 12 will be the date of the Orlandos Mountain Bike races to be held near the Student Rec Center. There will be several classes open only to Tech students, faculty and staff and then two open classes. You may ride in as many as classes as you are eligible for. Prizes are graciously donated by Orlandos Restaurants. Entries are available in the Rec Sports Office — enter now or between noon and 12:45 p.m. on race day. Races begin at 1 p.m.

### Rec center open for early bird workout

To cater to those early risers, the Student Recreation Center is now open at 6:30 a.m. Monday — Friday. There is an Early Bird Aerobics meeting from 6:45 a.m.-7:40 a.m. each day. There will be an I.D. worker present, so please remember your I.D. and enter through the north entrance. Start off your day with an early morning workout.

### Ski trips brought to you by the Outdoor Program

Come enjoy one of the fastest growing winter sports with the Outdoor Program this weekend. Join us in a Cross-Country skiing trip to Red River, N.M. Offering both aerobic exercise and beautiful scenery, cross-country skiing has something for everyone. The Outdoor Program will provide transportation, skis, lodging, half day lessons, and track fee, all for the trip price of \$65. Ski along the groomed trails of the Enchanted Forest Cross Country Ski area one day and then downhill the next. Cross Country skiing is growing rapidly in popularity, so don't miss out on your chance to join in on the fun. Call 742-2949 or come by room 206 of the Rec Center before 5 p.m. TODAY. (only five spots remaining)

Other Ski Trips this semester include:

Skiing at Rio Castilla, N.M. — "The Best Kept Secret in New Mexico" offers long runs, bowls, skiing and friendly people. Snowboarding is allowed. Feb. 17-19, \$95 includes: transportation, skis, lodging, and lift ticket (only four spots remaining).

Skiing at Angel Fire, N.M. — Enjoy some of the finest skiing available in New Mexico at Angel Fire Ski Resort. We'll be staying in the Legends Hotel at the base of the mountain. Fine dining, comfortable atmosphere and hot tubs make these accommodations perfect for the ski enthusiast. Feb. 25-26, \$50 includes: transportation, skis, lodging and lift tickets.

### Lockers available for rental

Just a reminder that the Rec Center offers new lockers to those who would like to exercise prior to work or school. During the spring semester the Rec Center will open at 6:30 a.m. Monday through Friday for early users. Locker rentals will continue for participants who have not had a chance to purchase a locker for the semester. Rental hours are Monday through Friday, 7:30 a.m.-4:30 p.m.

### Stairmaster — Lifecycle reservations

Stairmaster and Lifecycle reservations can be made for one day in advance by calling 742-3352 or for same day use by calling 742-1995.

The Student Rec Center offers activities for just about everyone; so take a break from work or studies and come by the Rec Center for exercise and relaxation.

### Gymnastics available Wednesday and Sunday

Open gymnastics hours are available 7 p.m. until 10 p.m. Wednesday and Sunday evening in the Men's Gym. Supervision and instruction is available both nights. Students interested in working out need only show up at the gym to participate. Normally open gymnastics is held at the Student Rec Center but during the busy winter months all activities are moved to the Men's Gym.
