

SDX Offers Ski Holiday To Playmate, 10 Beauties

Entry Blanks Are Due By Friday Morning

By JOHN PETTY
Toreador News Editor

A fun-filled, three-day skiing holiday awaits the ten finalists in the La Ventana Extravaganza.

Miss Mademoiselle, the nine finalists and Tech's Miss Playmate will travel to Ruidoso, N.M., during the spring vacation for the expense-free trip to the Sierra Blanca Corp. ski resort.

Deadline for entering the beauty contest is tomorrow at 10 a.m. Entry blanks are to be turned in to Room 101 of the Journalism Bldg.

Preliminary judging for the beauty pageant will begin at 1 p.m. tomorrow in the Aggie Engineering Auditorium. Officials of Sigma Delta Chi, sponsoring organization of the pageant, expressed hope that the preliminary judging would be completed Friday evening, but that Saturday morning had been reserved in the event that the judges were unable to finish their selection of the 25 semi-finalists tomorrow.

Bob Taylor, president of Sigma Delta Chi, stressed the fact that the girls in the contest will be judged on beauty alone. Since the title of "Tech's Most Beautiful Girl" is synonymous with winning the contest, beauty will be the only factor judged.

Tech's Miss Playmate will be named Feb. 23 as a part of the La Ventana Extravaganza in the Lubbock Municipal Auditorium.

Any all-male organization may enter a Miss Playmate contestant. Playmate entries will be judged on pictures only and need not be at the preliminaries. Entrants must turn in an 8 x 10 glossy black and white photograph and \$1 to Room 101 in the Journalism Bldg.

Deadline for entering Playmate contestants is Feb. 21.

Tonight at 7:30, all girls who are entered in the contest are asked to be in the Aggie Engineering Auditorium for instructions on walking and turning procedures.

Also at tonight's meeting numbers will be assigned each contestant for judging purposes. Anyone unable to attend must have a representative there to pick up the numbers.

The preliminary judging will begin promptly at 1 p.m. tomorrow. Girls are required to wear bathing suits for this first round. A dressing room will be available for the convenience of the contestants.

Two panels of judges will be used in the beauty contest. A five-member panel of judges will be used in the preliminary contest, and three different judges will be used for the finals. In both cases, the judges' identities will remain a secret until the contest begins.

The 25 semi-finalists chosen in tomorrow's preliminaries will compete Feb. 23 for the title of Miss Mademoiselle in the La Ventana Extravaganza. The winner will be pictured on the color cover of the yearbook's Mademoiselle section. In addition to the ski trip, Miss Mademoiselle will be presented with a leather-bound photo album containing a pictorial record of the entire beauty contest.

Tickets for the Extravaganza will go on sale Monday morning in the Tech Union. Admission to the pageant is \$1 per student and \$1.50 per couple.

ONE OF THE MANY BEAUTIES

...hoping to be named "Miss Mademoiselle" at the La Ventana Extravaganza Feb. 23 is Gay Gillespie, Odessa freshman. Entry deadline is 10 a.m. Friday.

Dean Allen Composes First 'Original' Song

An original composition was aired for Techsians Tuesday night during the Tech-SMU basketball game.

The song was played in co-operation with the movement by the Student Council to have the official school song changed.

The composition, written by James G. Allen, dean of student life, and orchestrated by Dean Killon, assistant professor of music, was originally used by the Varsity Show five years ago.

"I wanted to write something for the students with a little bump," Dean Allen said. His intention was to get a lively song to be sung by students at games and festive times.

According to Wayne Underwood, Student Assn. vice president, the general reaction to the song has been favorable. The response to the request for original compositions has also been good, Underwood said.

Sockman Lectures To 1300

By JEANNIE BOOKOUT
Toreador Society Editor

An audience of approximately 1300 people fell silent when the stately white-haired Dr. Ralph Sockman rose to deliver his third talk in the '62 series of Willson Lectures at the Municipal Auditorium Wednesday.

Sockman immediately reassured his listeners of Tech students and townspeople that he was behind Tech all the way. "While it's true I'm a Methodist, I never attended SMU," he quipped in his opening remark.

Then the deep-voiced speaker grew serious as he began to unfold his ideas on "Life's Fifth Dimension." The widely-known minister emeritus, who speaks in word pictures and parables, compared the fifth dimension of human life with the shadow which follows each person wherever he goes.

He called this extension of personality the "shadow of unconscious influence." He compared this unconscious power with that of the conscious costly power of those who try to influence with speeches and advertising every day.

He called the unconscious individual influence a "hopeful sign" which goes beyond the "professional propaganda" thrown out to people. He stated that individual influence is a powerful force whereas people tend to resist conscious influence because it is authoritative in nature and comes in too great amounts.

"You don't have to be a wheel on campus or a dean or the president," Sockman said. "There is no person so unimportant on this campus that he is not influencing someone else. Everyone has a shadow."

He commended the attitude of student responsibility he noted at Tech, saying that a small amount of people can create the right spirit and others will follow.

Sockman ended with these words, "If you want to cast a shadow of influence get right with the light and the shadow will take care of itself."

Run-Off Fills Three Posts

In a run-off election Wednesday 473 students voted for Student Council representatives from the Schools of Arts and Sciences and Business Administration.

Larry Gibbs defeated Jim Deen, 81-58, for the Business Administration post, while Carolyn Davis and Sydney Gibbs gained the vacant positions in the School of Arts and Sciences.

'100 Plus' Participate In Tourney

Kip Glascock, intramural speech director, said Wednesday that over 100 students participated in the ten events comprising the Speech Tournament.

The events were after-dinner speeches, Bible reading, public speaking, dramatic speaking, radio, poetry reading and extemporaneous speaking.

In the tournament Gamma Phi Beta came out ahead with 119 points, and the Pre-Law Club and Chi Omega tied for second with 116 points, Fiji was fourth with 96 points, and Kappa Kappa Gamma fifth with 92 points.

In the first three tournaments the Independents placed third.

Making Superior ratings in radio speaking were Barbara Halley, Chi Omega; Bill Sherbert, Pre-Law; Mike Armstrong, Fiji.

Superior in dramatic interpretation was Susan Webber, Gamma Phi Beta; in Bible reading, Gloria Martin, Gamma Phi Beta; and Ann Mallan, Kappa Kappa Gamma; and poetry reading, Mary McClain and Jan Barton, Chi Omega, and Sally Parks, Pre-Law.

After dinner speaking had three Excellents. They were Mary Conner, Chi Omega; John Comper, Phi Delta Theta; John Cambell, Pre-Law.

Superiors in extemporaneous were Ginger Butler and Sally White, Gamma Phi Beta; and Hac Brummet, Independent. In persuasive—Karen Hale, Chi Omega, and Bill Sherbit, Pre-Law.

In Modern Speech the two Superiors were Bryan Williams, Fiji, and Jan Barton, Chi Omega.

MUSIC, MUSIC, MUSIC—Two Tech students listen to record albums and try to decide just which ones to check out. The Record Lending Library, a service of Tech Union, has albums from classical to jazz and they can be checked out just like library books. The library is located in the Program Council Office of the Union.

Each time a record is checked out, the student is charged a dime. The money collected goes into a fund which is used to buy new records for the collection.

The record library offers both stereo and hi-fi music. A new schedule is being set up for the spring semester.

Garner Says Stovall Fine

Mrs. Evelyn Stovall, Knapp residence hall counselor, is convalescing at West Texas Hospital after surgery last Thursday.

"She is doing well, and may have company now," Mrs. Dorothy Garner, assistant dean of women, said Wednesday.

During Mrs. Stovall's illness, Mrs. Emily Burden, assistant counselor of Knapp, is in charge of the dormitory.

AND THEN

by BookKout

Some wise ole philosopher once said we should be thankful for small favors. He was probably talking about things like six cent cokes and the bell that rings just as the prof has worked up his lecture to 150 words a minute. Or water sprinklers that don't hit passersby EVERY time and sunny skies in the middle of February.

There are other things to be grateful for like the occasional campus pedestrian who walks when the light is green and the fact that the new library will have at least one finished floor.

AND THEN

There are other small favors—one square foot of standing room if you happen to come to a Tech home game at 7:45 p.m. and the parking space with an inch on either side when you have one minute left before the dorm closes.

AND THEN

THERE'S the two days after Valentine's when even calorie counters can eat chocolates just for the sentiment and fur coats are as much in season as your new white bermudas.

AND THEN

Did you ever get the feeling your vocabulary has become somewhat limited since entering the doors of higher education? Like the times you get that uncontrollable desire to write down such descriptions as "It's the coolest deal yet," or better still, "It was really unreal," on your English themes.

Or utter those oft-heard words, "Well, I just can't believe that," to the dignified person who just said something to you and on top of it all, hasn't been near campus jargon since raccoon coats were top style.

AND THEN

THE LUCKY MISS who wins the La Ventana beauty pageant will not only receive the usual honors, but something new is in store this year. Sigma Delta Chi, sponsoring organization, has purchased a plush leather album to be filled with 8 x 10 portraits of Miss Beautiful in all her big moments at the contest for her own enjoyment.

And that's not all. The top ten beauties along with Miss Playmate will be treated to a three-day expense-paid trip to Ruidoso to frolic in the snow during Spring Vacation.

AND THEN

There are other events upcoming before the beauty pageant gets underway.

THIS WEEKEND will see pledges of KAPPA KAPPA GAMMA presented in the Tech Union Ballroom Saturday at 7 p.m. Afterwards there will be a reception and The Gents will furnish dance music for Kappas and dates.

Parents and friends of the pledges can attend a reception from 2 to 4 p.m. Saturday at the Kappa lodge, 2414-B Broadway Ave.

AND THEN

Tonight KAPPA ALPHA will be hosting a surprise Gayla at the Caprock Hotel and tomorrow night SIGMA KAPPA will entertain with a coke party.

PI KAPPA ALPHA fraternity isn't to be left out. Their weekend activities include a Valentine dance from 10 p.m. to midnight in the PIKE lodge.

AND THEN

It's a big day for CHI OMEGA Saturday. Tech's newest sorority will be installed at the Lubbock Women's Club Saturday afternoon following initiation Saturday morning. A banquet for the new initiates is set for Saturday night at the Caprock Hotel.

Sunday, Chi Omega will be honored with a formal reception from 3 to 5 p.m. in the Ballroom of Tech Union.

AND THEN

Not to be forgotten are the initiation ceremonies for 27 PI BETA PHI pledges Saturday afternoon at the Pi Phi lodge and 23 ALPHA PHI pledges in the Alpha Phi lodge.

Ensemble Plays At Award Dinner

The Tech Brass Ensemble will play for the Methodist Hospital Appreciation and Awards Dinner at 7 p.m. today in Memorial Hall of the First Methodist Church.

Colors Burst Over Snow-Covered Hills

In this time of change, American youth is constantly groping for new and exciting fields of release for their so-called suppressed desires. As this is the case, more and more of the campus set are finding releases for these desires by flocking to the snowy ski slopes of our nation. For the female of this set it provides an endless array of the very latest thing in colorful winter fashions.

The skiing slopes have become by far the gaudiest of all winter sportsland spots, and the feminine imagination has gone wild in the expression of color. In fact, there seems to be as much brightness, pattern and individual style on the snowy hillsides as there are on the sands of the Caribbean.

The classic uniform of dark colored pants and neutral parka which used to set off the serious skier from the frivolous amateur snow bunny are now almost eclipsed by the vividness of color which has invaded the ski slopes.

Most important in the feminine ski outfits are the unusual stretch ski pants. These pants have become especially interesting to the gentlemen for they are extremely figure hugging and show off the curves on the slopes.

In the past, only to be obtained through import at very high prices, these ski pants are now available in almost every price range. Most outstanding of the colors are the brilliant citrus tones — shades ranging from the lime color bordering on chartreuse to the palest of the pale yellows—all of which provide a remarkable contrast against the snow.

With these ski pants anything can be worn from a fragile-looking silk print shirt to colorful off-beat jackets which come from all over the world. This year the sweaters, under Norwegian influence, appear in a heavy hand-knit look with over-sized collars, and unusual detailing. The Norwegians having come up with a new method of printing knits, have made the sweaters more readily available than ever before.

To complete the ensemble, the maddest, bushiest fur hats available are added. The most popular types of furs used are the long-haired furs such as fox. These hats are a novelty and are chosen in a variety of sizes and shapes.

According to fashion consultants, most department stores are doing the largest part of their business in the after-ski clothes. These are clothes for those less brave souls who prefer staying close to the fire to the excitement of real skiing. Here the filmy silk print shirts become the topping for the ski pants and the soft kid boots are the foot wear for the evening.

Yes, these are times of change and what better changes could there be than the beautifying of the landscapes of our country through color on the female of the species.

SNOW CALLS FOR SKIING—Jimmie Bibb, sophomore from Wichita Falls, is one of the many members of Kappa Alpha Theta who took in skiing last weekend at Ruidoso, N.M. The occasion was the Theta retreat.

Tech's top ten beauties and the '62 Miss Playmate will get a trip to Ruidoso during Spring Vacation. These girls will be guests of the Sierra Blanca Ski Corp.

VIEWPOINT

By Bob Taylor

Interest and enthusiasm are strange and sometimes irrational feelings. It would be an impossible task to attempt to explain why some things excite our interest and why others leave us cold. A sense of values must surely have some influence on the presence and intensity of these feelings, and this only leads us to the purely philosophical question of what is important and why.

These thoughts came to me while I was watching Tuesday night's basketball game—along with about 10,000 other hysterical fans. There we all were, packed into the Coliseum watching two teams throwing a ball at one of two baskets. If the ball went through the basket our guys were throwing at, we all jumped up and screamed and clapped. If, on the other hand, the ball went through the other basket, we were uncontrollably depressed. When the game was over, their guys had thrown more balls through their basket than ours had through our basket—and all of a sudden all the enthusiasm was gone.

Why, then, should 10,000 of us have been so vitally interested in whether our team got more points than their team? The answer (which is not really an answer at all) is that we wanted our team to win. All of us love winners; it's exciting to be the best; and a winner almost always promotes an outpouring of enthusiastic interest.

ALMOST always. Dr. Ralph Sockman is very definitely a "winner." He is one of the most excellent speakers I have ever heard and he has a tremendous amount of knowledge and experience to share. Whether you are "religious" or not, Dr. Sockman has a lot to say because he talks about life, and all of us are living. It is a generally accepted fact that he is one of the country's great men and his appearance at Tech should logically have created an overwhelming and enthusiastic response. The sad fact is that it did not, at least as far as numbers are concerned.

If Tech students and faculty and the people of Lubbock were as interested in being intellectually stimulated by a man of Dr. Sockman's stature and ability as in watching an exciting game, we could have packed the Coliseum four days in a row and the administration would have been forced to

dismiss classes for all the lectures. But again that old sense of values creeps in, and we admit that interests differ and not everyone cares to hear these lectures. The fact that 2,000 people think it is worth the time (and the cuts) to spend an hour listening to Dr. Sockman is certainly no indication that 10,000 should do the same. It is interesting, though, to wonder about what is important (besides basketball) to the other 8,000.

For almost six months now the favorite pastime of Tech men has been watching coeds. Wherever there are boys, you can bet they are either looking at or thinking about beautiful girls. Now the time has come to decide which ten are the most beautiful at Tech. In the past this was done by sending pictures of selected girls to some famous personality who picked the "beauties" to represent Tech. This was a very easy way to get the job done, and it was unfair to the girls and to the student body.

As any girlwatcher can tell you, there's a lot more to beauty than pleasing features. A girl who looks great in a photograph may not be the least bit impressive in person. Therefore, Tech's beauties are now chosen at a pageant, where the judges see them live and in person and can take charm and personality into account.

The pageant also gives Tech's avid coedwatchers the greatest opportunity they could ask for—the chance to see the loveliest girls on campus in that most desirable of all surroundings, bathing suits.

Since the girls are the ones who are supplying the beauty, they will be amply rewarded for their efforts. The honor and prestige of being one of the ten most beautiful girls at Tech should be enough for any girl's ego, but in order to give them a little more than just enough, Sigma Delta Chi has arranged to send the ten beauties and Miss Playmate on a three-day, expense-paid ski trip to the Sierra Blanca resort near Ruidoso during spring vacation. (We're hoping spring doesn't come early to the mountains of New Mexico!)

One last thought: Tech has undoubtedly got the best-watered sidewalks in the state. Has anyone thought of watering the grass instead?

THOUGHT FOR TODAY—Wait until 1960!

—D. W.

At Texas Tech

Needed: A New Name

As time marches on, Texas Tech continues to twiddle its thumbs on the matter of a name change.

Recognized widely as an institution which accomplishes things in a grand way, Tech now finds itself failing to assert itself in an area of utmost importance.

The name—Texas Technological College—no longer fits. It is a misnomer. Texas Tech, is in fact a university and not a "technological" college. How then, can Tech ever hope to assume its rightful position as THE leading state school in the western half of Texas and one of the leading institutions in the Southwest?

Opponents of a name change can offer little basis for retaining Texas Tech. They generally always mention the Double T tradition.

Well, if these "tradition lovers" must have the Double T—let them. Let's find a name that would retain the Double T. A good example: Texas University of Arts, Sciences and Technology. The Double T would be there—University would be included too. Isn't that what we want—university status?

Actually, we should be willing to dump a few traditions in order to build the status of our school and our degrees. However, a compromise seems to be in order. Let's get the show on the road.

It's a sad case when the Ex-Students, faculty and student body can't agree on a name. Perhaps it points up a lack of planning and effort on the part of interested persons. Any way you look at it, it doesn't paint a pretty picture for the school.

Let's face it—somebody is going to have to do a little compromising. If they have the best interest of Tech at heart they'll get together and do it. If not, the institution will probably have to wait until they die, lose interest or finally see the light of day.

Texas Tech's Board of Directors will be meeting on the campus Saturday. These men could decide on a name change. After all, they make major decisions for Tech. However, we are sure they want to see some agreement on the part of the Ex-Students, students and faculty before they make any real decisions on the matter.

Judging from the past progress of the name change idea, we imagine the Directors will have a long wait.

It's a shame. Texas Tech will be the one to suffer.

RALPH W. CARPENTER
—Toreador Editor

Wear Red Clothing

Saturday Marks Big Day

The unnamed and indescribable fun people get from doing things *enmasse* is the motive behind many of our customs and fads. We seem to enjoy almost any sort of majority behavior—as long as the majority is a big one.

When this majority happens upon some form of activity so much fun that all wish to relieve it—a tradition emerges.

There's not really any other reason for having traditions. It's fun to do things when hundreds are doing the same.

Tech traditions come and go with the years as different groups accept or reject the actions of their predecessors. Some are as old as the Ad Building. Others die before their originators are graduated.

There's a traditional day coming up Saturday—a fairly new one—for which long life is predicted.

Saturday is the third annual "All I See Is Red Day."

On a like Saturday last year, between-class periods saw uninterrupted lines of red streaming across Memorial Circle. It was fun.

That night the Coliseum was aglow with red clothing for the Tech-SMU game.

Sponsored by the Saddle Tramps, the reason for the wearing of the red is four-fold.

First, "All I See Is Red Day" provides tangible evidence of Tech's much maligned school spirit and, by doing so, acts as its booster. What more obvious example of school spirit than the

participation of all the student body is such an exercise? Let those critics of Tech's school spirit be here Saturday!

Second, "All I See Is Red Day" promotes attendance to that evening's basketball game—this year against Arkansas. Tech is tied for first place, has already beaten Arkansas once and still has a very good chance to take the conference crown again this year. A solid mass of red wearing apparel in the stands Saturday night may appreciably aid this chance.

Third, "All I See Is Red Day" shows appreciation for our outstanding ball team. It's had its ups and downs—to be sure—but at this point is still a formidable opponent for any group in the Southwest Conference. The ups and downs of team support have been more disappointing, perhaps, than occasional team losses. Here's a chance to prove the student body is behind that team, once and for all.

Fourth, "All I See Is Red Day" is fun.

The Toreador will be read in red Saturday. The Saddle Tramps have prepared 6,000 red crepe-paper streamers for use at the game. Coeds are selecting red outfits for the day. Radio stations, posters and public address systems are rallying for red.

Wear red Saturday.
Join the fun!

LITTLE MAN ON CAMPUS

OK, OK, I'M COMING! - BUT WHY CAN'T YOU JUST BLOW YOUR HORN? - THE OTHER FELLOWS!!

HARRY AND MARY

... are two members of a cast of over 60 actors, singers and dancers appearing in "The Music Man" at 8 p.m. today and Friday at the Municipal Auditorium.

'Music Man' Opens In Auditorium Tonight

By CAROL LEE PAGE
Toreador Staff Writer

"The Music Man," one of the biggest and brightest of Broadway musicals, will appear on the stage of Lubbock's Municipal Auditorium at 8:00 p.m. today and Friday.

The plot is built around the adventures of a traveling salesman, Professor Harold Hill, who comes to a small town to sell band instruments and uniforms. While there, he forms a band and tries to teach the children in the town to play his instruments. Many comic mix-ups, including a romance with Marian the Librarian, make this delightful award-winning play one of the most enjoyable to come from Broadway in a long time.

It's as American as the Fourth of July—and just as much fun!

Tech Music Department will present an all-Bach program at 3:30 p.m. Sunday at the Methodist Church. The program includes Cantata 150 and the powerful "Magnificat" with Evelyn McGarrity, Vivian Garets, Sandra Dowell, Charles Post and Cecil Green performing vocal solos. Charles Lawrie will play his newly-constructed harpsichord and Dr. Judson Maynard, the organ.

Thomas Mastroianni—pianist of the music department—will play at 8 p.m. Saturday at Lamesa High School Auditorium. His program includes works by Beethoven, Liszt, Scarlatti and Ravel.

During cast announcements for "The Cave Dwellers" Monday night, director June Bearden told of the season's last dramatic event, "Tonight At 8:30," a series of three one-act plays by Noel Coward. "Shadow Play," a musical fantasy; "Family Album," a Victorian comedy; and "Hands Across the Sea," a sophisticated drawing-room comedy will be directed by students. A narrator will help simulate "An Evening with Noel Coward" atmosphere.

The speech department recently received word of admission to two theater associations. They are the International Federation for Theater Research and the Texas Educational Theater Association. Good going, Tech players.

ing's appearance at the Municipal Auditorium Feb. 21. She is the funniest female you've ever seen. Remembered for her "Gentlemen Prefer Blondes" role, she brings to Lubbock's biggest stage a hilarious revue including impersonations of Marilyn Monroe, Marlene Dietrich and Tallulah Bankhead. Saw her

in Vegas. Just about died. Laughing.

Starting today at the Lindsey "A Majority of One" with Roz Russell and Alec Guinness offers weekend movie-mongers with about the best to be had Lubbock-wise.

Tech Ends Indoor Schedule With Odessa Meet Saturday

Texas Tech's final indoor track action of the season will be participation at Odessa Saturday night.

Coach Don Sparks' Red Raiders have run at San Antonio, Lubbock and Fort Worth. Their first outdoor meet will be the Southwestern Recreation Meet at Fort Worth March 3.

By events, the Raiders will enter:

60-yr. dash, Walter Cunningham of Galena Park and Franklin Wood of Stephenville; 880-yr. run, Guy Golden of Stephenville; 60-

yd. hurdles, Bob Swafford of Abilene and Ronny Biffle of Anton; mile relay, Curtis Hart of Andrews, Don Mason of Brownfield, Norman Danielson of Stanton, Swafford; shot put, H. L. Daniels of Marshall; broad jump, Roger Gill of San Antonio.

Tentatively, Cunningham will run the 300-yr. dash and Hart the 500-yr. dash.

Participating in the unattached category will be four Tech freshmen—Richard Vogan of El Paso, 60-yr. dash and broad jump; Jim-

my Walker of Seminole, shot put; Twink Terry of Amarillo, high jump; and Eldon Mongold of Amarillo, 1000-yr. run.

Tech Hosts Dads For Porker Tilt

If you see about 25 additional rosters in the Saddle Tramps section standing up when Tech scores a basket against Arkansas Saturday, you'll know that the board members of the Dad's Assn. are on hand.

Seats have long been sold out for the game, but since the board members are guests of the student body, spaces are being reserved for them in and near the section.

OIL & REFINING COMPANY

SCARLET Scatterings...

By CHARLES RICHARDS
Toreador Sports Editor

"LET'S SCHEDULE 'em on the road," was the cry from some of Texas Tech's basketball players Tuesday night after Southern Methodist had just added another chapter in the Red Raiders' late "lose at home, win on the road" storybook.

It's a complete reversal of the past few years when Tech was unbeatable in the Coliseum, but lost out in the conference race because of its inability to win on the road.

The Raiders now have their work cut out for them, and if they do come through it all with a conference championship, they'll deserve an A plus rating. They beat SMU, Arkansas and Baylor on the road to put them in the driver's seat, but the last two losses at home have put the pressure on Tech again.

Texas A&M and SMU are now tied with Tech for the lead, and of the three Tech probably faces the roughest schedule from here out—that is, unless you're one that now believes the home schedule is the roughest.

A&M and SMU both play three of their last five games at home while Tech is on the road for three of its five. Tech goes to Texas, Rice and TCU and plays Arkansas and A&M here.

WHAT PROBABLY hurt Tech more than anything else in the Tuesday game was the rally SMU put on in the first 10 minutes of the second half, surging from a 37-36 halftime lead to a 57-46 bulge. They outshot Tech, outrebounced Tech and in general left Tech at the starting gate.

When the Raiders finally did pull themselves together, they closed the gap to 57-56 only to find they couldn't score the go-ahead point. SMU pulled away again, and the ball game was over.

MAC PERCIVAL had a good night, scoring 24 points, 13 more than his average. At the same time, Harold Hudgens had trouble finding the right combination to the basket. Del Ray Mounts had a great night defensively.

Tech out-rebounded SMU in the first half 30-24, but the Ponies beat Tech on the boards 27-17 the last half to take a 51-47 control for the game. Hudgens was high for Tech with 13 rebounds, and Percival was second.

Tommy Stubbs, Texas Tech freshman from Fort Worth, had his day Monday.

Playing with Wayne Liles and Bill Wright of Slaton and Gary Littlejohn of Midland at Meadowbrook Golf Course, Stubbs scored his first hole-in-one.

He scored the ace on the 205-yard par three No. 4, using a five iron. The ball hit on the front of the green, took one bounce and rolled into the cup.

Stubbs went into the hole even par, came out two-under. The ace shook him up so much, though, that he took a bogey and double-bogey on the next two holes and finished the front nine with a 38, two over par—he was so rattled he didn't play the back nine. Stubbs has been playing since his sophomore year in high school.

\$5 Will Buy Foresight From 'Future Reader'

By KAY DUNLAP
Toreador Staff Writer

Is it worth \$5 to find out who can't stand the sight of you? Madame Della Fox, "Reader of the Future" can do it.

It seems that a large amount of the Texas Tech coed's allowance is going, not on clothes, but to keep this lady in business. For only \$5, Madame Fox will tell you who your friends and enemies are, who you will marry, if you have a chance to pass History 320 or if you should give it up now!

Madame Fox, or Della as we "regulars" call her, lives in a red and silver trailer. There is nothing more mystical about this little abode other than a curious looking shed with a big lock on it standing in back.

This could be an outhouse of some kind, as I don't know much about plumbing in trailers. Or perhaps it is a small fallout shelter just wide enough for Madame and her crystal ball.

I, personally, have had a reading from the madame and I must admit that her talent is startling! I, who have had my doubts about the Easter Bunny since birth, found myself awed by things the lady knew about me.

The first thought that ran through my mind was what a mint the madame could make if she had the least ounce of blackmail in her. But luckily she is quite a charming woman and everything she sees in your future is kept in strictest confidence.

She says she has had the power to foresee the future since she was a child. Although her personal life is never discussed, she did tell me that her children also have the gift.

During my reading, Madame sat with an adorable little Chihuahua on her lap which growled at me the whole time. It was such a little dog but yet I found it hard to keep my eyes on the crystal.

"Just as long as she keeps him on her lap..." I thought, but my hands began to sweat and I began biting my fingernails.

"I can see in the crystal that you are a very nervous person," Madame said. You know, it's unbelievable how she can judge character! The little dog kept on growling. I smiled at him, trying to create some kind of unspoken understanding with him.

I flashed him a I'm-with-youal grin but it just made him snarl louder so I forgot about it. You

can't make friends with everybody. Madame has another pet. A '61 white Cadillac sits next to her little trailer.

Madame Fox went to fortune-telling school. I had never heard of such a thing so naturally I was interested. But she wouldn't go into it. I asked her where it was and what the requirements were but she wouldn't say. Evidently everything must be kept secretive in the fortune telling business.

As I left Madame Fox's trailer I thought, "You don't really believe that stuff do you?" I won't tell you what I decided but I did make a mental note to check into this Easter Bunny business a little more thoroughly.

After all, I probably hadn't given the old boy a chance. And as for fortune telling school, well I X'd that idea. I would probably lose a lot of credits transferring.

ROTC Ups Six Cadets

Annual ROTC promotions were made Jan. 20 by the headquarters of the cadet brigade at Tech.

Rank promotion is based on cadet performance on the drill field and scholastic standing during the first semester.

Tech cadets receiving higher rank are Col. Michael M. Morse, brigade commander; Lt. Col. Larry L. Justice, commander—first battle group; Lt. Col. Robert N. Harris, commander—second battle group.

Lt. Col. Robert B. Kennard, commander—third battle group; Lt. Col. Virgil L. Wilson, commander—fourth battle group; and Capt. Gerald A. Brown, commander of the Tyrian Rifle Drill Team.

Music Department Presents Recital

Texas Tech's Music Department will present a Senior Recital at 4:10 p.m. today in the Music Bldg. Carol Lewis, violinist, and Jane Ann Henry, pianist, will play several selections from Mozart, Debussy, Chopin and Bruch.

Both girls are working on Bachelor of Music degrees.

'Union Monopolies' Questioning Will Occupy Tech Feb. 23-24

"Labor Union Monopolies" will be debated by two Tech debate teams at the Abilene Christian College speech contest, Feb. 23-24. Mr. Robert Dick, debate coach, will accompany the two teams composed of Wynette Johnson and Cleo Haston and Arthur Skibell and Harry Neuhardt.

Haston will also be entered in the original oratory contest. In the extemporaneous speaking contest Miss Johnson, Skibell and Neuhardt will participate.

Kip Glasscock and Richard Estran are preparing for the quarter final rounds of the TV debate which will be televised in Dallas on March 18.

Qualia Relates Experiences

World War I and the Peace Conference following it are a part of the life of Dr. Charles B. Qualia, professor of Spanish at Tech. American Commission to Negotiate the Peace. At the close of the War, Dr. Peace, was sent to Paris as an assistant to the American delegation. Dr. Qualia, who was attached to the American delegation.

From December 1918 to the spring of 1919, he translated French and Italian documents for the American representatives to the Conference.

These documents were the proposals and aspirations of the French and Italians at the end of the war, and as such were necessary in determining the American standpoint on policy-making.

Although he did not work directly with them, Dr. Qualia came in contact with President Wilson and Colonel House many times.

One of the most outstanding incidents that Dr. Qualia remembers was the reception for the various heads of foreign governments by the people in Paris.

"President Wilson got the biggest reception of all," he reflected. "To them he symbolized the hope of a lasting peace."

Dr. Qualia, who has mastered French, Italian and Spanish and has studied Latin and German, came to Tech in 1925 when the school opened. At the time he was asked to come to the new college, Dr. Qualia was teaching at the University of Texas.

His B.A., M.A. and Ph.D. were received from the University, but he has also studied in Spain and France at the University of Paris and the University of Lyon.

Raider Roundup

OPTIMATES

The Optimates, Tech Latin club, will meet at 7 p.m. tonight in the Anniversary Room of the Tech Union. Group pictures for La Ventana will be taken at this meeting.

AAUP

The Texas Tech chapter of the American Association of University Professors will meet in the Tech Union at noon today. Miss Dorothy McCoy, a member of the National Baptist Council of AAUP, will speak to the group.

Miss McCoy is head of the mathematics department of Wayland Baptist College, Plainview.

ALPHA DELTA SIGMA

Alpha Delta Sigma, national advertising fraternity, will hold its spring smoker at 7:30 p.m. tonight in the Tech Union Recreation Hall. All male students interested in advertising are urged to attend.

THURSDAY NIGHT FORUM

The Thursday Night Forum sponsored by the Ideas and Issues Committee of the Tech Union has been cancelled for this week according to Carol Bray, chairman of the committee.

SIGMA DELTA CHI

Sigma Delta Chi, professional journalism fraternity, will meet at noon today in the Conference Room of the Journalism Building.

FRIDAY NOON FORUM

Dr. Robert Rouse, head of the economics department, will speak at the Friday Noon Forum on "The Common Market." Reservations should be made in the Tech Union by 10 a.m. Friday.

FRESHMAN COUNCIL

The Freshman Council will hold its regular meeting today at 6:30 p.m. in Ad. 280. All members who have not had their pictures made must attend.

CIRCLE K

Texas Tech's chapter of Circle K International will act as host for the Region 7 workshop Saturday. Representatives from other schools in the district will attend this meeting.

DOUBLE "T" ASSN.

The Double "T" Assn. will have its formal initiation at 7 p.m. Thursday in the Double "T" Lounge in Jones Stadium.

SOCK AND BUSKIN

Dan Johnston, professional magician, will perform magic tricks at the meeting of Sock and Buskin at noon today in the Greenroom of the Theater Workshop.

All members, pledges and others interested in any phase of the theater are invited to attend.

SING MEETING

There will be an Intrafraternity sing meeting today at 5 p.m. in Music 202 for all social sorority and fraternity presidents and song leaders.

SPACE, MISSILE & JET PROJECTS AT DOUGLAS

have created outstanding career opportunities for

SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

Servo-Mechanisms—relating to all types of control problems

Electronic Systems—relating to all types of guidance, detection, control and communications

Propulsion—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

Environmental—relating to air conditioning, pressurization and oxygen systems

Human Factors—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

Heat Transfer—relating to missile and space vehicle structures

Structures—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.

Aerodynamics—relating to wind tunnel, research, stability and control

Solid State Physics—relating to metal surfaces and fatigue

Space vehicle and weapon system studies—of all types, involving a vast range of scientific and engineering skills

Tech Hosts Ag Meet

Agricultural chemical dealers, distributors, processors, manufacturers and farmers converged upon the Tech campus Tuesday for the annual Agricultural Chemicals Conference.

Registration at Parkway Manor Tuesday kicked off the three-day meeting sponsored by Tech, Texas A&M, Lubbock Chamber of Commerce and West Texas Chamber of Commerce.

"What's New in Agricultural Chemicals," a panel discussion, highlighted the afternoon meeting. Insecticides, fungicides, harvest-aid chemicals, livestock feed additives and sorghum midge were featured.

The conference will be concluded today by a panel discussion on "Results of Soil Fertility Research in 1961."

'One Wife Enough' Relates Exchange Student From Iraq

by JOE HAMILTON COWEN
Toreador Staff Writer

"From the moment of my arrival in Lubbock I have not felt as a stranger; in fact, I feel as if I have been here all my life," Zameal Al-Zahawi, foreign exchange student from Iraq, said when asked about his first impressions of the United States.

"The United States has given me a feeling of freedom of speech and action which is certainly unlike that of my country," Al-Zahawi, whose home is in Baghdad, continued.

Besides his interest in chemistry, and his hobby of photography, Al-Zahawi also enjoys hunting, driving sports cars, sailing and listening to music of Verdi and Bach.

According to 26-year-old Al-Zahawi, it appears that teenage

marriages and divorces are much more common in the United States. In Iraq, a young man does not— as a general rule—consider marriage until he is financially and emotionally able to bear the various encounters of matrimony.

"In fact, there is very little dating in our country unless the families of both the boy and girl know each other very well; even then it is not looked upon favorably," said Al-Zahawi. "This idea is gradually changing, especially among college students. Some people of the United States seem to think that we have harems. This is not true, for we feel that one wife is enough."

Asked what the Iraqi people think about the communist situation, Al-Zahawi said that communists were at first welcomed after the revolution in 1958—but now

his people realize that communism is against any religion and is really slavery.

It is his personal opinion that communists will not get into a hot war with the United States, but he does feel that they will certainly try to use metaphysics to conquer the free world.

Al-Zahawi added, "Communists are experts in twisting around stories and situations and blaming the United States for things that do not actually occur."

"I would like to thank the International Hospitality Committee for making me feel at home," Al-Zahawi concluded, "and my deepest affection goes to my host family, Dr. and Mrs. J. E. Loveless, who have shown me around Lubbock and have done their best to keep me happy and make me feel as one of the family."

IRAQI EXCHANGE STUDENT

... Zameal Al-Zahawi, is studying chemistry at Tech. After graduation, he hopes to do research work in chemistry on molecules and molecular weight.

Al-Zahawi's father, physician Salima Al-Zahawi, was once minister of social affairs in Iraq. An older brother, Wisam—a graduate of UCLA—is vice-consul at the Iraqi Embassy in London. His younger brother, Masin, is assistant director of a tourist agency in Baghdad.

Dr. and Mrs. J. E. Loveless, Lubbock physician, are Al-Zahawi's host family in the United States.

We're looking forward to meeting you

We'll be on the campus on the dates listed below, ready to give engineering and science seniors information on space-age careers in a dynamic industry. If you are looking for a company offering assignments on programs of unique interest and career potential, you'll be interested in the advantages Boeing can offer you.

Boeing, for instance, is a major contractor on such advanced programs as the Saturn S-1B advanced first stage booster, the Dyna-Soar manned space glider, the solid-fuel Minuteman ICBM, and the Bomarc defense missile system. Boeing is also the world's foremost designer and builder of multijet aircraft, including the eight-jet B-52H missile bomber, the KC-135 tanker-transport, the C-135 cargo-jet, and the famous Boeing 707, 720 and 727 jetliners. In addition, Boeing's Vertol Division is one of America's leading builders of helicopters.

Research projects at Boeing are under way in such advanced fields as celestial mechanics, solid state physics, nuclear and plasma physics, flight sciences, space flight and propulsion.

Expanding Boeing programs offer exceptional opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. At Boeing you'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

Drop in to your Placement Office and arrange for an interview. We're looking forward to meeting you!

Thursday and Friday — February 15 and 16

Ex-Raider Halfback Also Plays Guitar

by TOMMY SEAY
Toreador Staff Writer

Robert "Bake" Turner, a former star halfback for Tech and now a member of the track team, not only excels in sports, but is also quite a musician.

Turner is a talented guitarist and harmonica player. He plays everything from Spanish music to ballads and folk songs. He prefers popular music and rhythm and blues. "Malaguena," a Spanish piece by Ernesto Lecuona, is his favorite instrumental.

Turner began playing the guitar when he was a freshman in high school. He learned from friends who played and he says he "never opened a book" while learning. When he first began, Turner practiced "day and night" and learned "quickly."

"It seemed fairly easy and the

longer I watched my friends, the more interested I became," Turner said.

Group singers are his favorite recording artists and he enjoys learning the music of the "Platters," "Brothers Four" and the "Kingston Trio." He is also an avid fan of Burl Ives.

"I enjoy playing the guitar because it gives me a sense of accomplishment and it is a good means of relaxation," he said. "It is enjoyable to occasionally entertain rather than be entertained," he continued.

Turner plays almost all string instruments with the exception of the violin. He has recently taken up the harmonica and plays popular songs and polkas. His favorite selection is "Cherry Pink and Apple Blossom White."

Turner, Alpine senior, is majoring in secondary education.

TETA Admits Tech Group

Texas Tech's speech department was admitted to the Texas Educational Theater Assn. Saturday at the annual TETA meeting at Howard Payne University in Brownwood.

Ronald Schulz, associate professor of speech, reported that the committee that visited Tech a month ago felt that Tech's speech department should be admitted. However, the committee did not approve of some of the facilities and the "inadequate theater."

Dance Will Move To Old Ballroom

The Western Dance, previously scheduled for 7:30 p.m. Friday in the downstairs Union Ballroom has been changed to the upstairs Ballroom.

Music for the dance will be provided by Jimmy Mackey and the Texas All Stars.

When Spring Arrives

By CLAUDIA RANEY

When spring arrives on campus,
Up North or way out West,
Books and cares are forgotten
And students take a rest!
When it's springtime on the Gulf Coast,
And the folks are drenched in sun,
All the boys and gals face seaward,
And journey to Galveston.
When spring sweeps through the Rockies,
The college kids all know
They'll be victims of spring fever,
Although they still see snow.
And when spring infects the Yankees,
They do not weep and wail;
They just hop in jeeps and sports cars,
And head for Fort Lauderdale.
And what do we do in Lubbock
When spring sweeps through the Rockies,
Most Techsans flee to the great outdoors
For a rest long overdue.
Most coeds don bright bathing suits,
And, with sun tan oil in hand,
Loll leisurely on large beach towels,
Hoping for a tan.
Kids flock to ol' Mackenzie;
They swarm to Buffalo.
These places were nice last winter,
But they're even better with no snow.
No longer need the coeds fight
The strong cold wintry blast;
Long woolen coats and furry gloves
Are now things of the past.
We welcome you, dear Mr. Spring—
Your warm sun and blue skies;
And we hope that you are here to stay;
You're a sight for our sore eyes.

New low-cost luxury in two just-out Chevy II Nova sedans

• Luxury and low cost have never been more beautifully blended than in these two newest additions to the Chevy II line! Like their running mates—the Nova 400 Sport Coupe, Convertible and Station Wagon—they have the same more-for-your-money features that have made Chevy II the winner of *Car Life* magazine's Engineering Excellence Award for 1962. Soft-riding new Mono-Plate rear springs, proved in the equivalent of 2,000,000-plus test miles. Thrifty 6-cylinder engine

that gets more "git" out of a gallon of regular. Body by Fisher roominess that fits big families and small parking places. An easy loading vacation-sized trunk. New ideas that save on upkeep. Plus trim, tasteful styling, inside and out. See the smart, sassy, saving Chevy II Novas—and the other sensibly sized, sensibly priced Chevy II models—at your Chevrolet dealer's.

Group Of Drane Girls Adopts 'Ugly Duckling'

Playing nursemaid to a small, neglected duck has become the weekend pastime of a group of Drane girls.

Sam, as he has been dubbed, is suffering from a broken wing, a crooked neck and by now indigestion from having been fed so much. After having received a few handfuls of sweet rolls and bread Sam now becomes enthusiastic when his caretakers arrive.

Besides feeling him the girls are probably Sam's only friends. Due to his physical deformities the other ducks have ostracized him from their social life.

Not being allowed to swim and frolic with his fellow ducks, Sam has developed a severe complex which has resulted in a self-conscious head shaking ritual.

His pondmates have become jealous of his popularity and when Sam receives his daily bread the other ducks swarm him hoping to take the food from his mouth. This could possibly account for the crooked neck.

Adopted not because of his beauty but his physical unattractiveness Sam undoubtedly hopes to remain the visitors' favorite mascot.

Cox Supports GOP, Tries For Governor

(EDITOR'S NOTE: To help acquaint Techsians with the candidates who are seeking the governor's chair this year, the Toreador presents the first in a series of stories on these candidates.)

by PATSY ROHRDANZ
Toreador Staff Writer

"After prayerful consideration, I have concluded that I can best serve Texas and the nation . . . and the future of my children . . . by supporting and working in the Republican party," was the deciding announcement of Jock Cox, 39 year old Republican campaigner for governor, Sept. 10.

Jack Cox, a conservative leader in Texas politics, is a native of Breckenridge where he still resides as vice president of a drilling company. Cox holds a B.S. degree in government from North Texas State University.

Cox has long been in the public eye and is much in demand as a speaker. Since the end of World War II, he has traveled over 400,000 miles and made over 2500 speeches principally on Americanism. An estimated 200,000 people have heard him speak in person. Cox, father of two teenagers, waged a campaign for governor in 1960 that produced 619,000 votes—almost 45 per cent of the total votes cast.

Some of his many honors include "Man of the Year" in 1950, voted by residents in Stephens County; President of Texas Service Station Association; three times guest speaker at Freedom Forums of Harding College, Searcy, Ark.;

DROPS END FEB. 27

According to the registrar, students wishing to drop a course and retain a "W" should do so before Feb. 27.

HOWARD TOURS

The Original Study Tour to the Pacific
1962 SUMMER—14th Year

HAWAII UNIVERSITY SUMMER SESSION
UNIVERSITY CREDITS AVAILABLE
56 DAYS only \$569 Plus Tax \$9

Earn university credits while enjoying summer in Hawaii. Price includes steamship outbound, jet return to West Coast; Wilcox Hall residence on campus, and greatest diversification of parties, dinners, entertainment, sightseeing, cruises, beach events, and cultural shows; plus necessary tour services. Air or steamship roundtrip, and Waikiki apartment-hotel residence available at adjusted tour rates. Optional neighbor island visits and return via Seattle World's Fair.

ORIENT STUDY TOUR

SAN FRANCISCO STATE COLLEGE
CREDITS—UNIV. SUMMER SESSION
79 DAYS only \$2298

A new concept of study tours—a banafide university program. Also, with us you enjoy and "live in" the Orient—not just see it. Includes Hawaii, Japan, Formosa, Philippines, and Hong Kong. Price is all inclusive, with services ashore all first class throughout. Evening events are just as important as daytime sightseeing. We challenge comparisons. Ask for our 16-page brochure for valuable Orient information.

EUROPE

Howard Tours, Inc. is a Pacific specialist, therefore does not operate college tours to Europe. Instead, for Texas students who wish travel to Europe, we offer the Eur-Cal Tours which we represent as sales agent. Each year a good number of Texas students join the Eur-Cal Tour, the most popular and outstanding student tour on the West Coast where it originated. Visit or call us for more information. Above rates are from New York.

Teaching Atheism In Schools?

Book Hassle Rages

AUSTIN (AP)—Charges of atheism, subversion and coercion flew last week as witnesses with highly divergent political opinions appeared before the House Textbook Investigating Committee.

The committee, investigating history textbook content, heard several witnesses contend that Communists were succeeding in subverting history as taught in Texas schools.

Mrs. Louise Gardner of Houston told the committee that progressive education was born in this country when the American educator John Dewey was invited to

Russia to observe the Communist system.

"Look at the inroads UNESCO has made in our schools. Doesn't it look as if we're succumbed to the one-worlders? We've got to get back to Christian moral principles."

Mrs. R. J. Adams of Corpus Christi said she had three specific objections to matters concerning the selection of textbooks:

"1. I object to the fact that teachers on the textbook committee are expected to pass on the qualities of textbooks which they have not had ample time to examine.

"2. I object to the fact that while prayer in the name of the one true God is being effectively eliminated from our national life by clergymen who do not identify themselves, a militant atheism is being covertly insinuated into the curriculum of the public schools.

"3. And I submit that these policies follow a clearly recognizable pattern. While these un-named clergymen apparently have the parents, contrary to the laws of sympathetic ear of school officials, nature and nature's God, are being excluded from determinations governing the education and training of their own young."

Cox Supports GOP, Tries For Governor

(EDITOR'S NOTE: To help acquaint Techsians with the candidates who are seeking the governor's chair this year, the Toreador presents the first in a series of stories on these candidates.)

by PATSY ROHRDANZ
Toreador Staff Writer

"After prayerful consideration, I have concluded that I can best serve Texas and the nation . . . and the future of my children . . . by supporting and working in the Republican party," was the deciding announcement of Jock Cox, 39 year old Republican campaigner for governor, Sept. 10.

Jack Cox, a conservative leader in Texas politics, is a native of Breckenridge where he still resides as vice president of a drilling company. Cox holds a B.S. degree in government from North Texas State University.

Cox has long been in the public eye and is much in demand as a speaker. Since the end of World War II, he has traveled over 400,000 miles and made over 2500 speeches principally on Americanism. An estimated 200,000 people have heard him speak in person. Cox, father of two teenagers, waged a campaign for governor in 1960 that produced 619,000 votes—almost 45 per cent of the total votes cast.

Some of his many honors include "Man of the Year" in 1950, voted by residents in Stephens County; President of Texas Service Station Association; three times guest speaker at Freedom Forums of Harding College, Searcy, Ark.;

DROPS END FEB. 27

According to the registrar, students wishing to drop a course and retain a "W" should do so before Feb. 27.

HOWARD TOURS

The Original Study Tour to the Pacific
1962 SUMMER—14th Year

HAWAII UNIVERSITY SUMMER SESSION
UNIVERSITY CREDITS AVAILABLE
56 DAYS only \$569 Plus Tax \$9

Earn university credits while enjoying summer in Hawaii. Price includes steamship outbound, jet return to West Coast; Wilcox Hall residence on campus, and greatest diversification of parties, dinners, entertainment, sightseeing, cruises, beach events, and cultural shows; plus necessary tour services. Air or steamship roundtrip, and Waikiki apartment-hotel residence available at adjusted tour rates. Optional neighbor island visits and return via Seattle World's Fair.

ORIENT STUDY TOUR

SAN FRANCISCO STATE COLLEGE
CREDITS—UNIV. SUMMER SESSION
79 DAYS only \$2298

A new concept of study tours—a banafide university program. Also, with us you enjoy and "live in" the Orient—not just see it. Includes Hawaii, Japan, Formosa, Philippines, and Hong Kong. Price is all inclusive, with services ashore all first class throughout. Evening events are just as important as daytime sightseeing. We challenge comparisons. Ask for our 16-page brochure for valuable Orient information.

EUROPE

Howard Tours, Inc. is a Pacific specialist, therefore does not operate college tours to Europe. Instead, for Texas students who wish travel to Europe, we offer the Eur-Cal Tours which we represent as sales agent. Each year a good number of Texas students join the Eur-Cal Tour, the most popular and outstanding student tour on the West Coast where it originated. Visit or call us for more information. Above rates are from New York.

Teaching Atheism In Schools?

Book Hassle Rages

AUSTIN (AP)—Charges of atheism, subversion and coercion flew last week as witnesses with highly divergent political opinions appeared before the House Textbook Investigating Committee.

The committee, investigating history textbook content, heard several witnesses contend that Communists were succeeding in subverting history as taught in Texas schools.

Mrs. Louise Gardner of Houston told the committee that progressive education was born in this country when the American educator John Dewey was invited to

Russia to observe the Communist system.

"Look at the inroads UNESCO has made in our schools. Doesn't it look as if we're succumbed to the one-worlders? We've got to get back to Christian moral principles."

Mrs. R. J. Adams of Corpus Christi said she had three specific objections to matters concerning the selection of textbooks:

"1. I object to the fact that teachers on the textbook committee are expected to pass on the qualities of textbooks which they have not had ample time to examine.

"2. I object to the fact that while prayer in the name of the one true God is being effectively eliminated from our national life by clergymen who do not identify themselves, a militant atheism is being covertly insinuated into the curriculum of the public schools.

"3. And I submit that these policies follow a clearly recognizable pattern. While these un-named clergymen apparently have the parents, contrary to the laws of sympathetic ear of school officials, nature and nature's God, are being excluded from determinations governing the education and training of their own young."

ENGINEERS and SCIENTISTS:

... APPLY
YOUR
TECHNICAL
TALENTS
TO
SPACE AGE
POWER
ADVANCEMENT

We invite you to investigate the exciting and rewarding career opportunities now available to qualified engineers and scientists at Pratt & Whitney Aircraft . . . world leader in flight propulsion systems for 36 years.

Your technical talent could be applied to a variety of stimulating and far-ranging programs. For example, continuing development effort on air-breathing and rocket engines—exploring new avenues in advanced aerospace, marine and industrial power applications—or probing the fringe areas of knowledge in magnetohydrodynamics . . . thermionics and thermo-electric conversion . . . hypersonic propulsion . . . fuel cells and nuclear power.

WE WANT THE OPPORTUNITY TO GIVE YOU A COMPLETE PICTURE OF OUR COMPANY. OUR ENGINEERING REPRESENTATIVES WILL BE CONDUCTING INTERVIEWS ON YOUR CAMPUS THURSDAY, FEBRUARY 22, 1962.

The next step is yours. Consult your college placement officer for an on-campus interview or write to Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Connecticut.
