NUMBER IX

BUFFS ANNEX FINAL FROM TECH ELEVEN

Matadors Lose Close Contest as Veterans Play Last Game

"Beat Buffaloes Bad" turned into a horrible boomerang and the W. T. S. T. C. Buffs administered a stinging defeat to the Matadors here Thursday in the season's final. Tech has no particular alibi, it just happened, and to the score of 12-9 the Buffs gored the Bullfighters.

In the final game of the year and their own final appearance on the Matador gridiron, Windy Nicklaus, Al Jennings, Marlin Hayhurst and Russell Dennison, made a desperate attempt to curb the onslaughts of the Buffs' advances but to no avail.

Levi Walker did some powerful kicking, getting the ball out of dangerous territory and far down into the enemy's location by a brilliant 82 yard boot. Walker was the real find of the game, and although he has played on one or two previous occasions he had never distinguished himself as he did Thursday. He is to be watched with a critical eye and if he does not make a real gridster the opinion of the five thousand fans who witnessed the game will go for naught.

The Buffs were unable to produce in the air, as their nineteen attempts were good for only four completions for a total of less than 70 yards.

Canyon scored in the first session when their right tackle recovered Woolridge's fumble on the Matador's three yard line and Crump bucked the line for the first six points. Effort to kick was futile.

Tech came back and soon had the ball on their one yard line by virtue of a pass to Woolridge. Nicklaus produced and made the first Tech counters by ramming the line.

The Buffs' second counter came in the second frame when the W. T. gang blocked and attempted to punt as Woolridge tried to get it going and by a succession of drives pushed it over the line.

Tech's next and final scoring came in the same quarter when Tech had the ball on the Canyon 20 yard line but lacked the punch to put it over. DeWitt dropped back to the 25 yard marker and booted a perfect goal. This ended the fireworks for the day and Canyon was happy.

(Look for "Buffs Win" on Page 3.)

Pre-Law Club is To Hear Member Of Lubbock Bar

The Pre-Laws will meet next Wednesday, Nov. 30, in what will probably be the last meeting for this term. The program promised by the Committee is very interesting, including an address by one of the foremost members of the local Bar association.

In addition the jury which has been deliberating for the last two weeks on the fate of Sline Clements, charged with bribery, will make its verdict known. Also several members who were admitted to the club at the last meeting will be given their chance to make their maiden speech, which will complete their initiation formalities.

Social Calendar.

- Tuesday 7:30 p. m. Sock and Buskin
- Wednesday 9:00 a. m. Convocation at Gym
- 7:30 p. m. Engineering Society at Textile Bldg.
- 7:30 p. m. Pre-Law Club
- Saturday 2:30 p. m. Engineers vs Aggies Intramural game.

Pugilist Classes Making Progress Says Instructor

Progress in the newly formed boxing department of the physical training unit, is very satisfactory, according to Mr. Sydney Knowles who has training in the manly art of self defense in hand.

"About fifty men are coming out to regular work-outs and their attitude and enthusiasm is commendable," says Coach Knowles. "Many of the boys are making splendid progress and are rapidly learning the fine points of the game. One fellow, a welter-weight, is the pride of the coach's heart, and he is expected to accomplish a great deal in the squared circle," he continued.

This fellow must go unnamed for the present but Knowles promises that he will take part in an exhibition bout at no late date.

Mother of Coach Payne Dies in Abilene Thurs.

Word was received by Coach Payne, assistant football coach of Tech, of the death of his mother, Mrs. Victor A. Payne, of Abilene, Thursday.

Coach Payne left immediately in his car for that city.

Funeral services were held at 10 o'clock Friday morning in Abilene.

Cosches Freeland and Higginbotham with several members of the Matador squad left Friday morning to be in that city for the services.

Coach Frank Bridges Arrives at Simmons

Frank Bridges, now head coach of Simmons University, arrived in Abilene Wednesday morning in time to see the Cowboys triumph over the Jackets. Coach Bridges has just completed his contract on the Pacific Coast and he came immediately to Abilene.

Aggie Students go to Amarillo for Study

Professor Renner of the Dairy Manufacturers' Department of Tech, took five of his students to Amarillo last Saturday at which time they visited the Mistletoe Creamery and were shown in detail the process in the making of butter.

The class afterward visited Metzger's Creamery, Pool's Milk Plant, and Malden Dairy Farm, these also of Amarillo.

B. Y. P. U. Convention Alamo City of Interest

The 1927 B. Y. P. U. convention was held in San Antonio, Nov. 25-2. This convention which was arranged for those college students interested in B. Y. P. U. work, had an especially attractive inspirational theme.

Those attending the San Antonio convention were: Mr. and Mrs. Irwin Coleman, Mr. Warren Huff, Mr. Robert Huff and the student secretary, Mr. Mason.

College Greenhouse Practically Completed

The college greenhouse, which has been under construction is practically finished. The greenhouse as completed will be modern in every respect. A heating plant has been built to furnish heat for the house. The house itself is constructed from steel and double strength glass with a concrete foundation.

The plant was built by the King Construction Company of Tonawanda, N. Y., who sent its own men to do the work.

Miss Rossie Beth Bennett, Tech '27 who is teaching in a Junior High School in Ft. Worth, spent the Thanksgiving holiday visiting Tech friends. Miss Rossie Beth is the sister of Miss Marguerite Bennett of the Business office.

TECH INTERESTED IN STUDENT VOLUNTEER MOVEMENT; PLAN TO SEND DELEGATION TO DETROIT

Tech and The Toreador Known in East

The Toreador has received a request for copies of the paper from a school in New Jersey. Thus, the fame of Texas Tech is spreading throughout the continent.

Two Showers in Honor of Recent Tech Co-ed Bride

A shower of nuptial gifts was presented Mrs. Russell Hardin, who before her recent marriage was Miss Evelyn Wilson, Tuesday evening of last week when members of Mrs. E. W. Camp's Sunday school class met with Mrs. Jimmie Webb, 1611 16th street.

The shower came as a complete surprise to the bride as the class was meeting to sew on clothes for a little girl.

Mrs. Webb was assisted in entertaining by her mother, Mrs. H. R. Harmon. A salad plate was served to Mesdames E. W. Camp, Will Ross, Miss Marguerite and Annette Hussey, Zula Mae Logan, Ann Ford, Flora Green, Lila Gibson, Willie Hawthorne, Othera McKinney.

Mr. and Mrs. Hardin were honored guests at a reception given in the home of Rev. and Mrs. E. E. White, last Wednesday evening. After a program consisting of solos by Edna Edger and Mr. Atcheson, a violin solo by Miss Dorothy McDonald, and readings by Virginia Ruth Smallwood and Elizabeth Camp, Mr. and Mrs. Hardin were given a shower of miscellaneous gifts.

Hot punch and cakes were served to about twenty guests.

Tech Fair Co-eds Sponsor Fair One At the Palace

The Y. W. C. A. will get a portion of the proceeds from the play "The Fair Co-Ed" which is showing at the Palace, Wednesday and Thursday of this week.

Tickets for the performances are being sold by Tech's fair co-eds and every hall in the four schools have girls stationed in them with the tickets.

Mr. Lindsey, manager of the Palace Theater, is advertising the show free of charge to the Y. W. C. A. and has been quite kind to give one-fourth of the amount the girls sell for each of the performances.

Everyone is urged to buy a ticket but to be sure and buy one of the green tickets as tickets bought at the box office will not count.

Marion Davies is playing in "The Fair Co-Ed" and reports of it are very favorable.

Amarillo Physician to Speak to Pre-Meds

Dr. J. H. Vaughan, of Amarillo, will address the Pre-Med club on the subject of the practice of medicine with the use of radium next Friday night. This is a rare opportunity for the students of Texas Tech to learn something about this new field of medicine and all those interested are invited to attend. Dr. Vaughan has a well equipped laboratory in Amarillo where he practices, giving especial attention to the treatment of cancer with radium.

The club meets at 8:00 o'clock in room 318 Friday night. All Pre-Meds are especially urged to attend.

Various groups on the campus have been interesting themselves lately, as to the prospect of sending a delegation to the Tenth Quadrennial Student Volunteer Convention which meets in Detroit, Dec. 28 to Jan. 2.

This quadrennial comes at the transition period in International Relations. It will face, fearlessly, the elements of weakness in attempts of the Church to carry the message to the world.

Some of the speakers on the program include: Francis Wei, a Chinese educator in charge of Tech's efforts to send a delegation to the convention. She is assisted by several committees, who are each responsible for a certain phase of the work of the body. The Committee on Business is composed of Wm. Sewell, chairman, Marguerite Bennett, Jack Maddox, Sam Womack; the Committee on Education is composed of Dayle Wallace, chairman, Baylor Durham. The Committee on Delegations is composed of Tom B. Morrison, chairman, Marshall Rhev, H. Y. Price, Jr.

A call is sent out for all those who are interested in the meeting and who are desirous of going as delegates to see Mr. McCullough, Miss Ivo Wilson, or Tom B. Morrison, and arrange for a personal conference. It will be seen that Tech must work with all possible speed as some colleges in the country have been studying in preparation for this convention for some two years. Among the many colleges which have already registered a full

(Turn to "Detroit" on Last Page.)

Thanksgiving Service Last Wednesday Morn

Impressive services were held at the regular convocation hour last Wednesday. The band first played several selections, after which the audience joined in responsive reading and in singing. Mr. Adams read the first Thanksgiving Proclamation for Dean Miller who was incapacitated by a severe cold. Dean Leidigh read the proclamation of President Coolidge.

Miss Pendleton gave a reading, "Revelation," announcements were made and the group disbanded to the tune of a recessional march by the band.

Sock and Buskin to Hold Unusual Program

The Sock and Buskin Club will meet on Tuesday evening of this week, at 7:30 p. m. in regular session.

Instead of the usual program, a play, an unusual program, as yet not announced, will be given as the entertainment feature of the meeting.

With the initiation of 30 new members into the club recently, the membership limit of 112 has very nearly been reached, and other students wishing to become members of this club will have to make application for admittance by tryout at an early date, as the remaining places in the club will be filled by competitive tryouts.

NOTICE SOPHOMORES

All Sophomores are requested to call at the business office at their very earliest convenience.

Miss Evelyn Scarborough spent Thanksgiving with her sister, Mrs. S. W. Smith, of Plainview.

Mr. and Mrs. Studehalter, accompanied by Miss Bessie League, Mr. Fowler, and Mr. McKay, made a Thanksgiving trip to the fossil country. They reported an excellent trip.

Pauline Wherry Instructs Class In Scout Work

Miss Pauline Wherry, regional director of Girl Scout work, is to give a course in leadership in Texas Tech during the interval between November 28 and December 3rd. Miss Wherry is a graduate of Texas University and reports have it that she has achieved notable results in her field.

According to reports which come to Tech from other schools in which Miss Wherry has conducted classes, she is to give lectures on the psychology of the teens, talks on organization of girls' camps, and instructs in preparation of camp fire menus.

The course has been given in some three hundred colleges during the past year. Miss Wherry, herself, presenting the courses nearly fifty times. On completion of the course each girl receives a certificate of leadership.

While at the college, Miss Wherry is to be entertained in College Inn. Hours for class-work are to be arranged by conference with the individual interested.

Mr. Stangel off to International Show

Professor W. L. Stangel, head of the Department of Animal Husbandry, left last Wednesday for Chicago, where he will attend the International Livestock Exposition. He will be gone about five days.

The International Livestock Exposition is the greatest livestock show in the United States, and exhibits come from all over the world. Mr. Stangel, who is one of the best livestock judges in the State, visits this show each year.

Sophomore Ball to be Invitation Affair

The stage is set for the Sophomore ball. At a meeting of the second year class last week final and definite plans were made for the holiday ball which is to be given in the Gym on December 9th.

Members of the Committee on Arrangements say this dance is to be the most elaborate affair of the entire season. Decorations symbolic of the holidays will be carried out.

Contrary to rumors which were circulated on the campus, there will be no admission charge. Invitations, however, are to be secured only from members of the Sophomore class.

Press Club Hears Address by Miss Horn Wednesday

Before a small but interested group of the Press Club, Miss Ruth Horn gave a very interesting talk on book reviewing, at the last meeting Wednesday night. She gave many examples of the different methods used. To the indifferent person it is sometimes hard to distinguish between the real legitimate book reviewer and professional who in reality is only writing advertisements for some publishing house or some author. These are detected by their superfluous words and high sounding and catchy phrases that appeal to the emotions. They do not criticize but give only the most interesting parts of the book.

Plans were discussed for the next magazine supplement to The Toreador, which will be published some time in January, or earlier if there is a sufficient demand for it.

Basket Ball Team to Continue Working Out

The basket ball squad will continue workouts all week even during the absence of Coach Payne. The football season over, all attention is now centered upon the basket ball squad and prospects are very bright for an exceptionally good season.

All members of the squad are expected to report each night at 7:30.

SUMMER TERM PLANS BEING CONSIDERED

Enrollment for 1928 May Reach 1200 if Plans Develop

During the past week the Summer School Committee met to consider plans for the summer session of 1928. Preparations for the Tech's third summer school are going forward at a rapid rate. At the present time plans are dependent only on the amount of the financial aid the school will receive from the state.

Last summer a total of \$47,350 was appropriated for the operation of the school during vacation time. At present \$15,000 is all that is available for the 1928 session, but Dr. Horn, after a recent talk with the governor, expressed himself as being very optimistic as to the possibilities of getting \$32,000 more for the summer school.

Dean Gordon, in going over the histories of Tech's past two summer schools, pointed out that in 1926 Tech enrolled 336 pupils during the summer term, in 1927 there were 678 pupils enrolled during the vacation term. Thus, with an increase of over 100 per cent in one year, the Dean feels if Tech gets the necessary money to run on, an estimate of 1200 students for the coming summer will not be out of reason.

More Students Will Come

He bases this large prospective increase in the enrollment on several factors. Mr. J. F. McDonald, head of the Department of Correspondence Instruction, has been making various contacts with persons not now in school but who are interested in continuing their education as resident students at a later date. Thus from this source Tech will secure many new students. Further, the recent change in the Teachers' Certificate law gives teachers an opportunity to extend their certificate by attending summer school. Despite the report which has been circulated, that work in teachers' colleges alone will be acceptable for such extensions of teachers' certificates, it is readily seen by a perusal of the law, which is given below, that work in any "institution rated as first class" will be accepted for such extension.

(Turn to "School Law" on Page 2.)

ENGINEERS TO MEET

There will be a meeting of the Engineering Society Wednesday, Dec. 30, at 7:30 p. m. at the Textile Engineering Building. A number of very important business matters will be discussed in this meeting, according to the president.

Astronomy Class to be Continued in Winter

The class in Astronomy which was begun this term will be continued during the winter term, according to a statement by L. V. Robinson, who teaches the course. In order to arrange for the accommodation of more students the hour at which the class meets has been placed at 8 p. m. on M. W. F.

The class is non-mathematical in content, considering the constellation, the effect of the theory of Relativity on the science, and further, the class considers the bodies of the universe which have only recently been discovered. It is interesting to note that the nearest of these planets is some 700,000 light years away from the earth.

Many points taken up in the course of the class work are such problems as: The nature of Matter; the evolution of the stars, and kindred topics related to the field of astronomy.

TECH AND TEXAS.

CHEMICAL MANUFACTURING AND TEXAS PROGRESS

W. T. Read, head of the department of chemistry at Texas Technological College, writes for the October number of Chemical and Metallurgical Engineering an article on chemical manufacture in Texas. He notes that the present value of chemical production in this State is in the neighborhood of a million and a half dollars per year. In other words, it ranks far below other manufacturing enterprises, notwithstanding the fact that the raw material, water, fuel, labor, climate, markets, transportation, and other factors involved, are highly favorable in Texas.

Mr. Read's explanation is that the chemical factory is by its nature an adjunct either to the industry from which it draws a by-product as its raw material or else to industries which consume its finished product. It is a sort of liaison industry. As group interests gather, chemical makers find their ideal conditions for operation.

Mr. Read next notes that Texas with 4.4 per cent of the country's population has only 1.3 per cent of its manufacturing. This means, he says, that the consumption for manufactured products is here awaiting the establishment of plants which can take advantage of shorter distances and lower freights. This is the explanation of the increase of manufacturing in Texas—or at least it is a highly important consideration in that expansion. And Mr. Read sees the coming of chemical plants as the concomitant. The combination of raw materials, growing manufacturing industries in need of chemicals, and the proximity of the Gulf outlet to the sea with excellent ports make Texas attractive ground for enterprises who look forward to the opportunity to grow up with the State. Mr. Read concludes:

A State that grows a third of the Nation's cotton and clips a large part of the Nation's wool and mohair and spins and bleaches and dyes very little of it; a State that produces a large share of American vegetable oils and refines only a small part of them; a State that has clays, limestones, glass sand, gypsum, salt and sulphur; a State that has unlimited petroleum and natural gas resources, vast beds of lignite, to say nothing of the best labor, ample transportation, fine harbors, growing markets, and a thrifty and progressive population ready to back industry with money and technically trained leaders, is bound to have an important future in chemical industry.—Dallas News.

The foregoing editorial and a full three column article on Dr. Read were carried in The Dallas News of last week. Thus, Texas Technological College and its instructors are brought before people of the State.

WHY NOT CO-OPERATION?

The problem of compiling news from all parts of the campus has long proven to be one of serious consideration on the parts of the members of the Chronicle staff. Professors in some departments and students as well, seem indifferent in giving aid. Reporters are conscientious in covering all parts of the campus where news may originate at various times during the year. The main trouble seems to be that some of those sources of news do not wish to co-operate with the Chronicle in an effort to provide a publication which will be truly representative of all parts of the campus. They either are "too busy," or do not wish to be disturbed when reporters call upon them. In some cases when they do acquiesce and attempt to give some information, which may be of service to the institution, they are not accurate in their assertions and give hazy statements which are difficult to shape into a story.

Since this paper is the only medium by which students may become acquainted with various activities on the campus, those persons who have available any item which may be of news interest, should feel obligated to submit this to the reporters for publication. The Chronicle is one of the University's great advertising mediums and in view of this all happenings on the campus are sent to many colleges throughout the United States and Canada.

A little co-operation on the part of those people would aid materially in printing news of campus interest.—Utah Chronicle.

The Editor of the Utah Chronicle seems to have been having the same difficulties that abound in every college publication office. The Toreador, however, has no complaint to make of the way members of the administration, faculty members and officials, cooperate. Our complaint is, rather, on the side of the students who are not satisfied with the kind of news published, the amount of news published, or the kind of news not published. They are perfectly capable of sounding the old anvil chorus without thinking that they might be able to secure the kind of publication they want if they would cooperate and express themselves by doing a bit toward making The Toreador just like they want it.

The Toreador is the loud-speaker of the entire campus. Make it your own personal publication.

Intramural Meet To Bring Three Schools Together

With varsity football in the background of oblivion, attention turns to the scheduled intramural football struggles which are to feature the athletic prowess of the three schools in a series of games, as follows: Engineers vs Ags, December 3; Engineers vs Liberal Arts, December 7; Ags vs L. A., December 10.

The Engineers, who captured the title for intramural grid work in 1926, are making a strong bid for a repetition of last year's performance. The Engineers have elected Sams and

Bergfeld to captain the destinies of their eleven. Windy Nicklaus, three year letter man of the Varsity, is putting them through their paces.

The Aggies have not elected their captain as yet, but they are plentifully supplied with coaches. Vaughn Corley is line mentor, Al Jennings is watching over the ends and Percy Walker is taking the destinies of the backfield in his hands. The Aggies are promising some strong competition.

Elson Archibald, who has the Liberal Arts in hand, is as close fist as "Doc" Stewart, he will not give out a thing. Judging, however, by the men going out for the team, the L. A.'s will make a strong bid for honors. Preacher Calloway is line coach for the team.

School Law.

(Continued from First Page).

TEACHERS' CERTIFICATES S. B. NO. 44 CHAPTER 40.

Be it enacted by the Legislature of the State of Texas:

Section 1. Any person holding a teacher's certificate of any grade or kind which has not expired at the beginning of any summer school of any State Teachers' College or any other institution rated as first class by the State Department of Education in this State, shall have the right to have such certificate revived and continued in force for a period of one year by taking four courses or subjects and passing in same at such summer school session of a State Teacher's College or any other institution rated as first class by the State Department of Education in this State. Upon successfully passing such four courses or subjects, the President of the College shall certify to same and attach his certificate to the teacher's certificate so held by such person, and thereupon such teacher's certificate shall be presented to the State Department of Education and upon the payment of one dollar fee by the holder, shall be renewed and continued for one year from the beginning of the ensuing school year after taking said four courses; provided the word course or subject herein specified shall mean one-third of a regular nine month's course.

Section 2. The fact that our laws should permit teacher's certificates to be revived and continued for another year by taking four courses or subjects in a State Teachers' College or any other institution rated as first class by the State Department of Education as provided in this act, and the fact that this act should take effect as soon as possible, creates an emergency and an imperative public necessity that the constitutional rule requiring bills to be read on three several days in each House be suspended, and said rule is hereby suspended, and that this Act shall take effect and be in force from and after its passage, and it is so enacted.

Approved June 8th, 1927.

Effective 90 days after adjournment.

HOW IT FEELS TO BE A SENIOR

Being a senior in college must be like eating too many green apples in the spring. One is bound to show it. It is a feeling that is equaled in this life only when a guy gets a note from the dentist that it will not be necessary to come back anymore. It is so rare and elevated and refined—or, at least, it is supposed to be.

It is usual in an article of this kind to tell by what laborious steps one climbed the ladder to the top of the rung. It is customary to be a little modest in recognition of the fact that so many of us have let a lot of things get by us and that there were a number of accomplishments we might have realized that we never shall.

But every time we get modest people seem like they are willing to take us at our word. In this scholarly document we shall tell the truth. It is not that we care for the truth particularly but in an issue in the truth and modesty, we prefer the truth every time. Freshmen, strict adherence to this principle has been the keynote to our success.

Being a senior in our young life means nothing more or nothing less than being faced with the prospect of having to go to work in about three more terms. In the College it has been brought to our attention once or twice that we ought to behave like a prospective teacher. When one gets to be a senior he realizes that it won't be long until he will have to behave like a real teacher. It's a good thing.

for our part, that we enjoyed our youth.

The average senior of course made his mark by studying a little longer than he was supposed to have. I never did like to be average in anything. I studied just a little less than was prescribed. I had to do it to protect my health, because every time I thought about studying, it made me sick.

I have made it a rule in life to try to have as much fun as possible. Sometimes it has not been so possible, but now that I am a senior, perhaps I can safely admit that I have had some fun in my day. If I were a freshman I would make it a rule to laugh as much as possible. And if work interfered with laughter, well I wouldn't have a nervous breakdown from overwork.—North Texas Teachers Campus Chat.

Sort-o'-Serious.

We wonder what a man would say if he had to keep the house in order and his wife persisted in flicking her cigarette ashes here and there, over the freshly swept and polished floor.

Conscience is that thing which eventually conforms itself to the most selfish trait in one's life; that eventually brings itself to square with the individual's viewpoint; that ultimately yields to the individual's over-powering ambition. Conscience is terribly and dangerously flexible.

A headline says "Woman makes bond after man meets death." Her next "make" will probably be a movie contract unless she's unfortunate in the contour of her face and the shape of her calves.

And it looks like the jellybean is destined to supplant the old time cowboy, at least he is the chap most concerned in keeping his eye on the calves.

It is dangerous to inform the country that Congress is likely to slash \$400,000,000 from the tax bill and thereby save to each man, woman and child in the nation \$3.48, because each man, woman and child in the nation may decide to spend the \$3.48 in advance.

But we are not going to give credence to the report of what Congress is about to do until Uncle Sam sends us a check for our part of the saving.

If it is true that silence is golden then we are able to understand why gold is often referred to as hush money.

A defender of youth contends that the trouble is not with our young people but with the old folks. We agree. Many a girl thinks she has reached the sparking age when her parents decide that she has passed the sparking age. It is the parents who err.

We prefer, of course, always to be right, but if we had to choose, we would prefer that all persons have the absolute liberty to think and to vote as they please than oblige them, by compulsion and coercion, to conform to any man's or any party's or any church's standard, no matter how "right" that standard may be.

We don't want to see the new Ford advertised as an uncommon car, for that would indicate to us that the great "Common People" in this country were passing, and we don't want to see them pass, for we have always been pretty strong for the "Great Common People." Fact is, we are one of them.

Buffs Win.

(Continued from First Page.)

Neither team proved to have any particularly good offense in the last two frames but played a fairly good defensive game.

Line-up and summary of Matador games:

W. T. S. T. C. (12)	Texas Tech (9)
Hazelwood (c)	l. e. White
Logan	l. t. Carpenter
Golden	l. g. DeWitt
Huckaby	c. Corley
Boyles	r. g. Reed (e)
Henry	r. t. Vermillion
Ward	r. e. Jennings
Christian	p. Woolridge
Strain	l. h. P. Walker
Wilson	r. h. L. Walker
Crump	f. Nicklaus

Officials: Fullingim (Baylor) referee; Bristow (Oklahoma U.) umpire; Woodward (Fordham) head linesman.

Substitutions: For Texas Tech—Hardy for Woolridge; Hayhurst for R. Walker; Waller for Hardy; Pickett for Hayhurst; Harris for DeWitt; Dennison for White. For Buffaloes, none.

Punts: Woolridge and L. Walker punted 13 times for Tech for a total of 377 yards and an average of 29 yards. Two punts by Woolridge were blocked. Strain, Crump and Wilson punted 13 times for the Buffs, for a total of 500 yards and an average of 38.

First downs: Tech 7; Buffaloes 5. Passing statistics: Tech attempted 17 passes, completing six for a total gain of 69 yards. Two were intercepted, the others were incomplete. Buffaloes attempted 19 passes, completing four for a total gain of 68 yards. Two were intercepted, the rest being incomplete.

Penalties: Buffaloes were penalized six times for a total of 40 yards; Tech was penalized three times for a total of 15 yards.

Score by quarters:
Buffaloes 6 6 0 0—12
Texas Tech 6 3 0 0—9
Touchdowns: Crump and Christian for Buffaloes; Nicklaus for Tech.
Field goal: DeWitt place-kicked one from the 25 yard line.

Bull Bellows

By S. N. McClothlin

Although the Bull is a little late in starting his bellows he will try to make up for lost time by bellowing long, loud and lustily.

This is bellow number one. Take it for what it is worth.

Oh! Texas Tech! To you we lift our voices in song,

To you we sing, oh, Alma Mater, the praises of glory,

To you, and you alone, is all our loyalty given.

With eager ears we listen for the story

Of your success, and we long, oh, College Mother dear,

To see you to fame and honor driven.

Only a few more weeks until the end of the term, already the Bull is getting a trifle shaky in the knees.

But it won't be long now... Finals, fears and tears and then heigho for jolly old Saint Nick.

But even closer is Thanksgiving. Yumm Yumm... Already the Bull can smell that turkey dinner, and here's hoping he gets to taste it as well as smell it.

Only last week I heard a cute little Freshman girl from away down in East Texas where the tall timber grows make the remark that the only thing she didn't like about West Texas was the queer habit the landscape has of becoming so freely mixed with the atmosphere. I think the above mentioned Freshman needs to acquire a little grit, and that she has come to the proper place to get it. So quit kicking, fish, quit kicking.

Although the freshman may be rather dumb, we heard a lowly fish pull a pretty good one on an exalted sophomore the other day. They were standing in the corridor when I happened to pass and hear the fish make this remark to the soph: "When I look into your eyes time stands still. The soph evidently thought the fish was trying to make love to her (so did I) and began to be very much thrilled. After a few more wisecracks the fish asked: "Do you know what a diplomat is?" The soph tried to look wise and finally had to admit that she did not know.

"Well," replied the fish, "I'll tell you. If a boy tells a girl that time stands still when he looks into her eyes he is a diplomat, but on the other hand, if he tells her that her face would stop a clock, he is a darned fool."

If you can't get the point of that don't let it worry you, I can't see it myself.

When Ye Editor of the mighty pub-

lication known as The Toreador asked me to start this column he evidently didn't realize what he was letting his gentle readers in for. I'd just like to request that you don't murder him —(or me, either).

The Bull has heard it reported that the Matador basket-ball squad is going to be a humdinger. Power to 'em.

I read a mighty true saying in some newspaper the other day. Plain fact of the matter is: there is more truth than poetry. The saying was this: "Some folks don't wait to be led into temptation... They crash the gates!"

Oh, my! At last the terrible ordeal is over. I've had my mug mapped for the annual. They said they weren't going to make any more pictures for the annual after Nov. 15. Well, I don't guess they will make any more for the annual or anything else until they get another camera.

Student Opinion.

To Clear Halls of Unnecessary Noise
If some member of the faculty would make a strong, forceful speech to the student body and make them realize the need of quiet halls for profitable study, the student body would co-operate.

When the school, as a whole, knows that so much confusion and talking in the hall will disturb a fellow student a great deal of the noise will be stopped.

If students can be shown that the corridors of their college are not places to meet and discuss subjects not related to college work, many of them will not be found there except when they must meet classes.

When a strong college spirit prevails among the students and they realize that their school is not to be made light of they will cease so much of their useless congregations. The students should know that to have real college spirit it is not only necessary to be full of pep at various games but that they must also have respect for the more serious minded people who come here to learn.

If those students who feel that they absolutely must talk with others during class hours would meet in the archedway or at the back of the building, where the sound would not reverberate throughout the halls, those desiring to study would find it much more profitable.

Once the students begin to meet on the outside of the building the tendency will be to move away from the building instead of entering it.
—Fay Foote.

How the Congestion of the

Corridors Could be Remedied
Many timid freshmen are often late at their classes because of the badly congested hallways. These corridors were built for use as a passageway between class rooms, and not for a lovers' paradise.

This condition could be remedied by the students and by them only, for it is the students who cause such a congestion and confusion.

In the first place all students who do not have any special business in the corridors should have enough honor for his or her schoolmates to refrain from gathering in social groups, but pass outside of the building and converse out there in the broad place which God made for that purpose.

Students should keep to the right side of the corridors as much as is possible, and should advance, not in groups of four abreast, but in single or double file. They should walk fast enough to prevent anyone having to pass them, and should go to the room of their next class or to the study hall, if it is impossible for them to do this, then they should quietly pass out of the corridors in order that students who so desire could study or pass to their classes on time.
—Rankin Reynolds.

Ideas Elsewhere.

"THE ANNUAL DRUNK."

"Football week ends, with Ann Arbor filled to overflowing with alumni and visitors, as well as students and supporters of the visiting team, have been characterized by those who are not afraid to face the facts as "annual drunks." Even in a center of learning, the mistaken impression still exists that a football victory should be celebrated with an over indulgence in intoxicating liquors and a defeat forgotten by the same process.

Liquor is the most detrimental force with which the university has to contend in conducting football week ends that will be enjoyed by both students, home coming alumni, and guests. Games at Perry field are frequently marred by the disturb-

Back Home.

DR. PAUL W. HORN

President Horn returned yesterday from Houston, where he has been attending the Association of Texas Teachers which met in the city during the past week. While in Houston, Dr. Horn invited the Texas Association of Colleges to hold their 1928 meeting in Lubbock.

ance caused when men under the influence of liquor are removed from the stands. Endless trouble has been caused when Saturday night parties, either fraternal or otherwise, have been reduced to mere drunken brawls by the presence of liquor. Countless accidents have occurred when automobiles, driven by men who were in no condition to drive, have crashed on the Detroit highway, or elsewhere. Liquor is the active and destructive foe of the football week end and not its chief auxiliary.

Michigan is not alone in facing this problem. Practically every university in the country is trying to develop a sane and practical attitude toward intoxicants, with varying degrees of success. The evil is readily seen; the remedy cannot be found until the students themselves take the proper stand in the matter, refrain from drink, and lend popular support to the efforts of the authorities to handle the situation.

Regardless of the expediency of the federal prohibition amendment, regardless of the individual's attitude on the subject, the fact remains that it is the law of the United States and as such deserves the support of the citizens of this country. Where should one expect to find loyal citizens if not at the home of a state university? There is no middle ground—no opportunity for argument.

When a student of the university errs, he does not suffer alone—he drags his fraternity and his university to disgrace with him. There is no better example of community life than is offered on the campus.

There are no arguments in favor of the use of intoxicating liquors on such occasions, yet the continual repetition of past spectacles is tolerated. Public opinion is a mighty influence—when its support is withdrawn from the "drunk" and lined up on the side of law sobriety, the efforts of those who are working for the best interests of the university will bear fruit, and dry football week ends will be inevitable. It is an individual problem and should be treated as such by each individual in Ann Arbor or the Navy game, whether he be student, alumnus, or guest.—The Michigan Daily.

Mr. and Mrs. Wallace Cox and Mr. and Mrs. Burwell Cox of Haskell were here Thursday to visit Burwell C. Cox, Jr., Tech freshman.

Mrs. Garwood Bowers, who was Miss Edith Carter, of last year's Senior class, was in town for the Thanksgiving game.

PERSONALS

Miss Nova Matthews, a student in Tech for the past two years, spent the week-end with Miss Orene McClellan.

Ruth Officer, one of the 1925 La Ventana beauties, was in Lubbock for the Tech-Canyon football game.

News has been received here of the marriage of Miss Ilene McFarlane, former Tech student and College Inn girl, to Mr. Sloan Osborne.

Miss Weeks and Miss Erwin are representing the School of Home Economics of Tech at the State Teachers' convention in Houston.

Mrs. Mary W. Loak, Dean of Women, attended the meeting of the State Teachers' Association which convened in Houston last week.

Miss Lucille Gill visited in New Mexico the past week-end. She was accompanied by her parents.

LUBBOCK BUSINESS COLLEGE

1303 1-2 TEXAS AVE. PHONE 335

ATTENTION, Young people who are planning to attend a business school during the coming winter need not wait until the first of the year to start. You may begin your course with us any day you wish. Our work includes a great deal of personal and individual instruction, and the backward pupil is not expected to recite with those who are more advanced.

We extend to you a cordial invitation to visit our school and observe the work we are doing. You will find that you can get exactly the course you want and at less than half the cost of "going away" to some other state, or to some large city.

COURSE OF STUDY

Shorthand, Bookkeeping, Typewriting, Spelling, Business English, Rapid Calculation, Penmanship, Posting Machine, Model Office Work, Salesmanship, Commercial Law and Banking.

POSITIONS SECURED FOR GRADUATES

The uniform success of our graduates in securing and holding responsible positions has established this school in the confidence of its patrons and the general public, and we are thus better prepared to help our graduates because of the increasing number of calls that we receive for stenographers and bookkeepers. Write us for any further information desired, or better still, call at the school.
