

**FINAL STEP**—Approximately 6000 students will get their class tickets stamped paid before registration for the summer session is completed. Ten

years ago the total registration for the long session was 6000 students.

## For Summer Session

# 6,000 Students To Register

A record enrollment of between 5,900 and 6,000, as many as attended the long session some 10 years ago, is expected for the first term of the summer session which began Tuesday.

Registration began Wednesday and will continue today from 8 a.m. until noon and from 1:30 to 5 p.m. There will be no late registration, stipulated Dr. Floyd Boze, dean of admissions.

Enrollment for the first term of the summer session last year was 5,326.

For legal resident students of the state of Texas, registration fee for a six-week term is \$25 for four semester hours or more and \$20 for less than four semester hours.

Classes will begin at 7:20 a.m. Friday. With the exception of this Saturday when all classes will meet, summer term classes will observe a 5-day schedule, Monday through Friday of each week. Classes meet for one and one half hours each time.

### Exam Schedule

Final examinations for the first term are scheduled July 8 and 9, with the first term ending July 10. The second summer term will begin July 12 with classes beginning July 14. Finals for the second summer term are scheduled Aug. 18 and 19. Commencement exercises will be conducted Aug. 21 for summer graduates.

Residence halls opened 2 p.m. Tuesday for occupancy and meals are now being served. Three dorms will be open for students enrolling for the summer session. For men, No. 9 will be open and for women, Wall and Gates will be open.

The normal load for a six-week summer term is six semester hours. A student will not be permitted to register for, or secure credit in more than 14 hours in two terms, including correspondence work.

### Entering Students

Students who have not done work previously at Tech will regularly enroll for a maximum of six semester hours, exclusive of one-hour physical education courses and one hour's credit in orientation.

A senior of superior ability and performance may, with the approval of his academic dean, enroll for 15 semester hours in the 12-week session if this arrangement will enable him to be graduated at the close of the current summer session.

## 10 Grants Available For Grads

Ten scholarships for graduate study are available to members of the 1965 graduating class through the Tech Ex-Students Association and the Tech Century Club.

Frank Calhoun, Ex-Students Association president, said, "We are pleased to make these scholarships available and hope they will encourage the ten young men or women selected to continue their education and seek an advanced degree at Tech."

The new scholarship program for graduate students will be in addition to the association's regular loan fund and scholarship program for needy and deserving undergraduate students.

The scholarships will be available to the top graduating senior in each of the five undergraduate schools for both spring and summer commencement ceremonies. The top student is the student with the highest grade-point average for all his undergraduate work at Tech.

To receive the scholarships the students must enroll in the Tech Graduate School.

## In Connally's Absence

# Carr Speaks To Graduates

Tech's 39th commencement Saturday night saw a record 1,296 students receive diplomas.

Texas Atty. Gen. Waggoner Carr, filling in for Gov. John Connally, told the graduates their education was just beginning.

"In the next 10 years, human knowledge will be double," he said. "It falls heavily upon you to stay abreast of these changes."

"Sometimes, many of the things you have learned will have to be re-evaluated and re-examined."

In addition to the bachelor's degrees granted, 12 doctoral and 100 master's degrees were awarded.

James Clark Huff of Lubbock was recognized as the top ranking student scholastically in the School

of Arts and Sciences. Huff, who completed his undergraduate requirements in three years, graduated with a perfect 4.0 grade point average. The fete was the first shown by college records.

Other top ranking students also were recognized. They were Roger Branson Lewis, Houston, agriculture; Harold Tyrone Black, Big Spring, business administration; Charles Creswell Orme, Duluth, Minn., engineering; and Sydna Jeannette Tidwell, Stephenville, home economics.

Honorary doctor of laws degrees were awarded George W. Dupree and Gov. Connally.

Dupree was a pioneer Lubbock attorney. He was given the degree because of his contributions to Tech and Lubbock.

Jack McClure presented the 1965 class gift to Tech's Board Chairman R. Wright Armstrong. The gift was a check for rare books for the Tech Library.

James G. Allen, dean of student life, was master of ceremonies for the program. Dr. R. C. Goodwin and the different deans of academic schools presented the graduates for their diplomas.

Gov. Connally was unable to make the commencement address due to important legislation in the Texas legislature.

**COMMENCEMENT SPEAKER** — Texas Atty. Gen. Waggoner Carr of Lubbock spoke at Tech's 39th commencement Saturday night. Carr filled in for Gov. John Connally who was unable to make the address because of important legislative matters in Austin.

## Graduate To Attend 'Floating University'

Becky Parker, co-editor of 1964-65 La Ventana, is one of four nationwide recipients of a scholarship to the University of the Seven Seas, the world's first floating campus.

Miss Parker, a retailing major and May graduate of Tech, will begin her study in October by boarding the M.S. Seven Seas, and will travel to 14 countries during the five-month period. Her course of study will be international trade and she will be editor of the University's yearbook the U7S.

The objective of the overseas program is to promote international understanding through combined travel and college-level study. The 16 ports of call will be in Europe, the Middle East, India, and Asia. A maximum of 450 students will make the trip.

The other three positions to be filled by the other recipients will be editor of the paper and magazine and business manager.

Working on student publications while in high school at Sabinal, Miss Parker became interested in journalism along with retailing. She entered Tech as a freshman and continued to work on various publications. Before being editor of La Ventana, she worked two years on Mademoiselle section and was

associate editor of that magazine in 1963.

Maintaining a 3.00 grade average, Miss Parker has made the Dean's Honor List twice. She was honored in Who's Who this year and attended the Sear's Tote Board last spring in Chicago, a college-age advisory board that commented on various fashions of the day.

BECKY PARKER

## Marmion Will Head Profs Club

Dr. Keith Marmion is the newly elected president of the Texas Tech Faculty Club. He succeeds Dr. Winfred Steglich.

Other officers who will serve in 1965-66 are Dr. Larry Graves, vice president; Dr. Mhyra Minnis, secretary; Ray Green, treasurer, and Adrian Vaughan, publicity director.

New members of the Board of Governors are John Baumgardner, Miss Phyllis Drake, Dr. Harold Simpson Jr., Charles Dale and Dr. Elbert Reynolds.

Faculty Club quarters are located in the Union Building.

The club membership elects officers annually and other members of the Board of Governors bi-annually.

## Newell Takes Leave To Work In Germany

Robert L. Newell, assistant dean of engineering has been granted a three-month leave of absence during which he will serve as an engineer with the C. Plath Co., a division of Litton Industries headquartered in Hamburg, Germany.

Newell plans to report to the Litton office in Bonn, Germany, about June 1 for a four-day briefing session before moving on to Hamburg. He will work on aircraft inertial navigational systems built by C. Plath for F-104 jet fighter planes used by NATO forces.

C. Plath also builds compasses and ground-controlled autopilots for aircraft and key units in ship control systems.

The Tech administrator-educator said that his duties would take him to the Litton installation in Freiburg, Germany also. He expects to work in University liaison between German schools and Litton as well as engineering.

During his absence, Newell's duties will be handled by Dr. Donald J. Helmers, Tech professor of mechanical engineering.

## ROTC Commissions 29 New Lieutenants

Twenty-nine Texas Tech graduating seniors took time from a busy pre-commencement schedule Saturday to don either Air Force blue or Army green uniforms and receive commissions as second lieutenants.

Seventeen became Army lieutenants while an even dozen will wear Air Force bars.

Two of the new officers, Terry Denzer of Alamo and Richard Linnartz of Lake Jackson, have been designated as distinguished military graduates by Tech's Army ROTC department.

The Air Force has named as distinguished graduates Robert Klinger of Lubbock, Samuel Gaston, Colorado Springs, Colo., and David Blakeley, Odessa.

All five distinguished graduates

will have the opportunity to accept regular commissions in either the Army or Air Force. Other graduates will receive Reserve Commissions.

Robert L. Cash, general manager of the Lubbock branch of Litton Industries, spoke at the Army ceremonies, at 10:30 a.m. in the Tech Union Ballroom.

Col. Dudley E. Faver, commander of Reese AFB's 3500th Pilot Training Wing, delivered the main address at the Air Force commissioning, also at 10:30 a.m. in the Aggie Memorial Auditorium.

Other new Army officers include Warren Bennett Jr., Pittsburg, Tex.; Douglas Cannon, Levelland; James N. Cook, Odessa; Donald Cunningham, Lubbock; Vernon

Danner Jr., Penwell, Tex.; Robert Henderson, Bellaire; Stephen Holt, San Antonio; and Bobby Kaerwer and Eldon Lawrence, El Paso.

Also, John Larow, Houston; George Marshall, Wolfforth; Darrell Phillips, Stinnett; David Pummill, Dallas; Richard Varnell, Midland; and Frank Williamson, Dalhart.

Cannon, Cunningham, Henderson and Phillips will be commissioned in Signal Corps, Bennett and Cook in Quartermaster Corps, Danner, Varnell and Williamson in Corps of Engineers; and Linnartz in Transportation Corps.

Holt and Pummill received commissions in Armor; Kaerwer in Artillery; Larow and Lawrence in Ordnance; Marshall in Chemical Corps and Denzer in Finance Corps.

Air Force cadets commissioned include, in addition to the trio of distinguished graduates, Richard Baird, El Paso; Guy Davis, Levelland; Gary Jackson, Coffeyville, Kans.; Sammy Martin, Bryan; James Milam and Michael Ragsdale, Lubbock; Richard Ramage, Spade, Tex.; Robert Rauschuber, Iowa Park and James Sharp, Plainview.

Baird, Davis, Gaston, Jackson, Klinger and Martin will enter the Air Force pilot training program. Milam and Sharp are headed toward navigator training.

Blakeley and Ramage will be assigned to scientific duties with the Air Force Systems Command. Ragsdale and Rauschuber have received educational delays in their reporting dates to work toward post-graduate degrees.

## Holden Resigns Position To Teach U. S. History

Dr. W. C. Holden, who has guided the destiny of the West Texas Museum since its inception 36 years ago, will resign as its director, effective Aug. 31, to devote full time to teaching history at Texas Tech.

The impressive Museum of Southwestern history and archeology currently is located on the northeast side of Memorial Circle on the Tech campus.

Under Dr. Holden's leadership, it has become an important herald of Southwestern heritage which attracts some 20,000 school children annually plus thousands of other students and campus visitors.

Dr. Francis Earl Green will become director of the Museum Sept. 1.

Green's appointment was announced jointly by Dr. R. C. Goodwin, Tech president, and Robert Snyder, chairman of the Museum Board.

Dr. Green is an authority on the geology, paleontology, and archeology of the Southern High Plains, with emphasis on the past 50,000 years.

Dr. Holden will continue to teach American history and special seminars at Tech.

# Eaton Receives Fulbright Award

Robert Eaton, Texas Tech senior from Burkburnett, has been awarded a Fulbright Scholarship for a year's graduate study in Paraguay, becoming the second Tech student to receive a Fulbright grant to South America for 1965-66.

The foreign language major will do a special study on "The Influence of the Indian Language on Spanish and Portuguese" at the National University of Paraguay at Asuncion.

Announced earlier was a similar award to graduate student Richard Brown, 2612 31st St., Lubbock, who will do research in music in Brazil.

His chosen project will involve learning Guarani, an Indian language indigenous to the country and designated, along with Spanish, as one of the official languages of Paraguay.

Guarani has been in general use as both a spoken and written language since the early-day Jesuits recorded the folklore and customs of the Indians in phoenetic Spanish, Eaton explained.

No newcomer to South America, Eaton spent 1963 in Brazil at the University of Sao Paulo where he completed a cultural study under a New York University Junior Year Grant.

He plans a career in language research. Interested in languages since he studied Greek and Spanish on his own while still a student in high school, Eaton branched out into other areas in college. In addition to Spanish and Portuguese, he studied German (in which he has a minor), as well as French and Latin.

His parents are Mr. and Mrs. Lyle C. Eaton, 516 Dot Ave., Burkburnett.

## For Summer

# O'Brien Takes Position

Dr. Coleman A. O'Brien, Texas Tech assistant professor of animal husbandry, has accepted a three-month summer appointment as a research associate at the agricultural research facility jointly operated by the University of Tennessee and the Atomic Energy Commission in Oak Ridge, Tenn.

Dr. O'Brien's appointment begins in early June and runs through early September. He will concentrate on the reproductive physiology of farm animals in general and sheep in particular. He also plans to study the effect of irradiation on certain farm animals.

The Tech faculty member has published one handbook and 15 technical articles. He has received a considerable amount of mail from many countries inquiring about a simplified method for fertility testing in male sheep and goats.

The study at Oak Ridge will be a continuation of this research.

Dr. O'Brien also has worked on the effect irradiation has on the fetus being carried by female sheep

and goats. He indicates that his findings might have future medical application for humans.

Born in Cisco, Tex., Dr. O'Brien received bachelor and master of science degrees in animal husbandry and a Ph.D. degree in animal physiology from Texas A&M University.

At Texas A&M, he was an honor student during each semester of his undergraduate tenure and finished first in his graduating class in 1944. He served as an instructor at that school for two and one-half years before moving to Texas Tech in 1947 as an assistant professor of animal husbandry.

The Tech educator left the campus to serve as a conservationist with the Soil and Conservation Service of the U.S. Department of Agriculture from 1948 until 1955.

## GRADUATES & ALUMNI

# Panhellenic Gives To Library Friends

Texas Tech's Panhellenic Council, coordinating board for the 12 social sororities on campus, has been added to the list of member organizations of the recently organized Friends of the Library at Tech.

"The Council takes pride in contributing toward this new enrichment program which will make

## Toreador Sets Office Hours

Summer editor for the Toreador is Pauline Edwards, a sophomore journalism major from Lubbock. Managing editor is Winston Odom, senior journalism student from Brownfield.

The Toreador will come out weekly on Friday morning during the summer. Editor's hours in Journalism Bldg., room 102 will be 1-5 p.m. on Wednesday and Thursday. Miss Edwards said that any students who would like to volunteer writing services may see her at that time.

possible the purchase of rare and unusual volumes for the Tech library," said Panhellenic Council president, Becky Wilson, Olney junior, in presenting the group's \$100 check to Phil Simpson, president of Friends of the Library.

Organized only three months ago under the sponsorship of the Tech chapter of the Association of University Professors, Friends of the Library already has received more than \$4,000 in memberships and gifts, Simpson noted.

Dues are \$10 per year with several types of memberships available. An individual may be a contributing member by making a gift of \$15 annually, a sponsor for \$50, a patron for \$100, a life member for \$1,000 and a benefactor for generosity or service above \$1,000. Groups may become organizational members by contributing \$100 per year.

Recent additions to the library made possible by the funds include an edition of the Works of Dryden (Non-Such Press) in six volumes, the Hampstead Edition of The Works of John Keats in eight volumes, and a volume of the Seymour edition of The Works of Charles Dickens, published in 1900.

University. Approximately 70 pieces of art by contemporary artists of Norway are included. The exhibit is the second in a series of three. The first was Contemporary Prints from Japan. The third will feature prints from Greece.

## Judith Shuler Receives Graduate Study Grant

Judith Shuler, Texas Tech senior from Borger, has been awarded a U.S. Department of Public Health Service grant for a full year's graduate study in 1965-66. A top student, Miss Shuler has a 3.77 grade point average and is a member of Sigma Alpha Eta, speech and hearing honorary.

The speech and hearing therapy major will do a special study on "Neurological and Sensory Disease" in Texas Tech's graduate school beginning in September. A graduate of Borger High School, she attended Frank Phillips Junior College as a freshman and sophomore before transferring to Tech.

### For First Term

# Union Schedules Events

Tech Union has scheduled several activities for the first term of the summer session including one special event and two noon forum discussions.

Three free movies will be shown in the Coronado Room of the Student Union, beginning Friday with "Raintree County," June 18, "Houseboat" will be shown and June 25, "Cat on a Hot Tin Roof."

The first dance for the summer session is scheduled June 11 from 8:30 to 11:30 p.m. in the Student Union snackbar. The Impacts will play. An afternoon dance has also been scheduled for June 30 from 4-5 p.m. with the Vets playing. The afternoon dance will also be in the snackbar.

The first noon discussion will be next Wednesday from 12:15 to 1:30 p.m. in the Union, room 209. Dr. Zudhi Faruki, assistant professor of philosophy, will speak on "Religion East and West." Following Dr. Faruki's lecture the program will be open for discussion. Price for the luncheon is \$1 and those who plan to attend should sign up at the Union newsstand by 10 a.m. Wednesday.

The second noon forum is scheduled June 23 with Captain Robert Paradis of the Tech ROTC program speaking on "Viet Nam in Perspective."

As a special event, the Union will sponsor an appearance by the Kaleidoscope Players, who will do "Robert Frost on Stage," a presentation of the poetry of Robert Frost. This will be their fourth year to appear on campus. The program scheduled July 1 will be free.

A film series, "Film Vamps of the Past," will begin June 21 with Marlene Dietrich in "Song of Songs. Other films in the series are June 22, Clara Bowe, "Love Among the Millionaires;" June 23, Carol Lombard, "We're Not Dressing;" and June 24, Mae West, "She Done Him Wrong." All movies will be shown at 8 p.m. in the Coronado Room.

### Library Posts Summer Hours

Summer hours for the Texas Tech Library will become effective Friday, according to James Platz, associate librarian.

Due to early classes, the library will open at 7:10 a.m. and close at 10 p.m. Monday through Thursday. On Fridays and Saturdays the library will open at 7:10 and close at 5 p.m. The library will be closed on Sunday throughout the summer.

# Southwest Collection Laminates Old Papers

Lamination, a process by which very old documents may be preserved in their original form, is finding new favor among regional archivists.

The process successfully captures not only the facts, but the flavor of a bygone era — a magic ingredient highly prized by historians, pointed out the director of Texas Tech's Southwest Collection. "In our haste to preserve as much as we can in as small a space as possible, we do not want to overlook a major need of the research writer — the actual feeling of the time period he seeks to interpret," observed Sylvan Dunn.

With this important factor in mind, the director implemented a program to preserve certain, carefully selected records by lamination, to be used in conjunction with microfilm and other types of copies to give depth and breadth to the historical picture.

High on the Southwest Collection's priority list will be a complete file of The Lubbock Avalanche-Journal, dating back, if possible, to the beginning of publication soon after the turn of the century, together with copies of

The Toreador which details the day-to-day history of the college community.

Old documents, chipped and brittle with age, have the ability to carry the researcher back to the scene of action.

To begin the lamination process, each leaf is de-acidified by immersion in a mildly alkaline solution (magnesium bicarbonate) in order to neutralize the excessive acid content. (Acid is one of the major deteriorative agents causing decay in newspapers.)

Minor repairs are made before each page is laminated between sheets of cellulose acetate and reinforcing tissue. Special equipment is employed in the lamination by which simultaneous application of heat and tremendous pressure fuses the paper, acetate and tissue into a homogeneous solid.

The finished product is neat, extremely flexible and pleasant to handle with a dull finish that makes for easy reading. A binding margin allows for rebinding, if desired.

**NEWSPAPER AIDS HISTORIAN** — Dr. Lawrence Graves, Texas Tech professor of history, discusses events reported in a 1910 edition of The Lubbock Avalanche with Mrs. Ida Pittman of the staff of

Southwest Collection. Pages of the early-day newspaper, preserved by lamination, prove to be a rich source of information about pioneer life on the South Plains.

## Openings Available For Speech Clinic

Texas Tech's Speech and Hearing Clinic has openings for clients with hearing problems, particularly in the division for adults, Dr. William K. Ickes, director, has announced.

Persons of all ages are eligible for the services provided by the evaluative, therapeutic and training center located in the north wing of University Theater on campus.

Hearing evaluations for prospective candidates will be conducted during the first summer term, which began Tuesday and will run through July 12.

Applicants are requested to call the director, PO2-8811, Ext. 2155, and arrange for a hearing evaluation, the first step in admitting clients for treatment.

Equipment in this modern testing facility includes an audiometer operated in a "free floating" sound room to insure maximum quiet,

### CHEMISTRY AWARDS

Deborah Gail Johnson and James Clark Huff, both of Lubbock, have been awarded the two top awards given by the Texas Tech chemistry department.

where applicants are given a hearing test by means of pure tones to determine the exact type and degree of hearing impairment.

Recommended therapy and training in the rehabilitation program is provided by student clinicians enrolled in the speech and hearing therapy curriculum at Tech.

## Off-Campus Dorm Okayed

Texas Tech's Board of Directors has approved the principle of men's off-campus dormitories constructed with private capital, with the stipulation that the college will write certain regulations for operating such dormitories, the Tech Public Information Office emphasized Monday.

The statement was issued in response to questions received Monday on the status of such projects.

The regulations, which will be announced later by the college, will spell out the conditions which will enable the college to approve such housing.

# Campus To Hum With Summer Activities

The campus at Texas Tech is expected to hum with unusual activity during June, July and August.

In addition to thousands of full-time students, college officials have made detailed plans for the throngs of adults and school-age youngsters who will come for from two days, to two weeks, to two months of lectures, clinics, workshops and short courses of special interest to them.

### Reasons For Interest

Why this mushrooming interest in summer study?

Reasons are many and varied, according to the National Association of State Universities and Land-Grant Colleges' Office of Research.

High school graduates, aware of the "college crush," are anxious to take advantage of the relatively less crowded summer classrooms. Regular students indicate they want "to pick up extra credits to lighten the load next year."

Teachers utilize their summer vacations by returning for refresher courses or to work toward advanced degrees. Other individuals from all walks of life welcome the enrichment program offered in special institutes and workshops as a means of updating their knowledge and skills.

In response to this "thirst for knowledge," Tech will offer more than 20 summer short courses, institutes and workshops, in addition to some 800 regular courses rang-

ing from freshman to graduate levels.

Getting underway the first week will be a Biology Teachers Institute, June 4 to Aug. 5, co-sponsored by the National Science Foundation and the School of Arts and Sciences. Directed by Dr. Earl D. Camp, the course will offer 9 semester hours of credit.

A training course for community teachers and leaders who will participate in Project Head Start will be conducted June 7-11 by Mrs. Estelle Wallace, acting head of Tech's department of home and family life, and Mrs. Charlotte Camp, assistant professor in the department.

A Peace Corps Training Center will be operated June 21 to Aug. 21 for 90 trainees from American colleges and universities. Designed for college students between their junior and senior years, the two months of training will enable the volunteers to begin active duty much sooner after graduation, said Dr. Martin P. Kyre Jr., director.

### Art Workshop

Running concurrently with the first three weeks of the summer term will be an Art Education Workshop, June 1-18, offered by the School of Home Economics. Planned for teachers, recreation leaders and youth workers, the workshop

may be taken for periods of one, two, or three weeks.

Other June offerings of the School of Home Economics include a workshop on Advanced Food Production Management, June 3-16; a School Lunch Workshop for school lunch cooks, managers, supervisors and others interested in the school lunch program, from June 7 to 11; a workshop for Small Hospital Food Service Workers, June 14-25; a Color and Design Workshop for home demonstration agents and others who work with adults, June 21-July 9, and an FHA Officers' Leadership Workshop for high school student-officers of Future Homemakers of America, on June 15 and 16.

Tech's Summer Band Camp for high school, junior high and elementary students will offer a five-part program for the various age levels. The high school division for band will meet June 7-18, the high school division for chorus, June 21-25, and the high school division for orchestra, June 21-July 2. Sessions for junior high and elementary school divisions will be June 28-July 9 for orchestra and July 12-23 for band. The keyboard division will meet July 26-Aug. 6, and the dance division, June 21-July 2.

### Journalism Workshop

Aided by grants from the Newspaper Fund, Inc., and the Wall Street Journal, the department of journalism will hold a photo-journalism workshop for high school and junior college teachers from July 14 to July 28. Twenty workshops, representing nine states, have already been assigned to the short course, said W. E. Garets, director.

The department of journalism and the Southwestern Council of Student Publications will join in sponsoring a photojournalism workshop for students and teachers,

Aug. 2-6, and the eighth annual newspaper and yearbook workshop for high school students and teachers, Aug. 9-13.

A Dramatics and Forensics Workshop for high school students will be conducted by the Tech speech department, July 18-31. The program will include study and practice of effective speech, voice, diction, personality development, role-playing, bodily action and development of good speech habits.

The speech department will offer a coordinated workshop, Directing School Speech Activities, July 14-31, designed to provide practical experience for teachers.

### Home Ec Short Courses

The School of Home Economics will offer four short courses in July. These will include a course on Consumer Concerns About Food, July 1 to July 6; a course entitled Work With Low-Income Families, July 7-13; a short course on Advanced Problems in Human Nutri-

tion and Foods, July 13-30, and a Clothing and Textiles Design Short Course, July 13-30.

The Home Economics School will sponsor a Workshop for Cosmetologists, July 5-8. Planned in cooperation with the Texas and National Hairdressers and Cosmetologists Association, the workshop will offer instruction in hair styling, principles of design, human relations, and merchandising.

Scheduled July 23-30 is a three-week workshop in Home Economics Research Methods designed for home economists in teaching, business and government service.

A workshop on Job Training in Vocational Home Economics, Aug. 2-20, will place emphasis on the needs, resources, qualifications of teaching personnel, pilot studies, experimental programs, curricula, working relations with community agencies, and other divisions of vocational education affected by the Vocational Act of 1963.

## Intramural Deadline Set

The Intramural Department has announced that entries for the summer program will be taken until June 14.

Competition for the summer will be in individual sports only. Play will begin as soon after the deadline for entry as possible.

Sports in the summer intramural program are table tennis, tennis, golf, badminton, horseshoes, paddle ball, space ball and handball.

Students interested in competing may obtain information from Edsel Buchanan, director of intramurals.
