Marionettes Play Tuesday

Puppeteers Give Variety Program

Company Will Show How Puppets Work

The Tatterman Marionettes in a full length variety program entitled "Everything Under Control" will be presented Tuesday night at 8:45 o'clock on the Administration building green by the Summer Recreation committee. This performance will include the play, "The Melon Thief," as well as dances and musical numbers.

At the close of the program the audience will be given a special "backstage demonstration" during which they can see just how a marionette performance is given. The masking curtains will be removed, and a scene will be repeated with the actor-puppeteers in full view.

William Duncan has produced Tatterman Marionette shows for over twenty years, having appeared throughout the entire country in colleges, schools, clubs and more recently in army camps for the USO. The company has played more than 45,000 performances to an estimated 16,000,000 persons. The puppets were designed and carved in wood by the American artist, Roy Patton.

The Recreation committee will present "A Chump at Oxford" Wednesday night at 9 o'clock. This is a comedy, starring Laurel and Hardy.

The date of weekly band concert has been changed to Thursday night, and the final entertainment scheduled for the week is the informal all-college dance at the Gym Friday night.

Straying Dress Reaches Lost And Found Department

A clarinet is the most valuable of the straying articles that has been turned in recently to the college lost and found department in the registrar's office. Other valuables that are awaiting their owner's calling for them include a pair of glasses in a case, several purses, coats, raincoats, jackets, notebooks, textbooks, a biology dissecting set, a slide rule, and several pieces costume jewelry including ear screws, ankle bracelets, pins and a string of pearls.

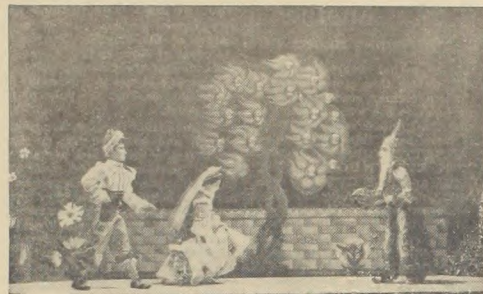

The jacket to a woman's pink two-piece dress has been turned in, along with a field artillery overseas cap. Miscellaneous items include fountain pens, colored glasses, a drawer full of scarves and gloves, keys, glass cases, compacts, cigarette cases, a compass and a slightly rusty bottle opener.

Students may have any article in the lost and found by stopping by and giving proper identification. After a book has been there a year it is turned over to the WICC loan library, and unclaimed miscellaneous articles are given to the Milam Orphanage, according to W. P. Clement, registrar.

Freshman Fag-Fiend Smokes Weed With Both Ends Lit

A Lubbock EE freshman, who gave his name as Sequoyah Perry, has added a new twist to the oldie about burning a candle at both ends. Perry claims to light his way with a tallow stick, but through a process best known to himself manages to smoke cigarettes when both ends are lighted.

He declares that he uses his peculiar ability solely as a parlor trick, denying that he is a habitual smoker.

Tatterman Marionettes as they appear on the stage

Sears Roebuck Awards Seven \$100 Scholarships

Seven Sears Roebuck scholarships of \$100 each have been awarded this week to agriculture students.

James T. Headstream, Roby; George Piller, Abilene; James Edwin Nieman, Wilson; and Ladell McAteer, Jayton, have already received half of the funds which were made available for the summer session. All are now enrolled in school. The other half of the funds will be available for the fall semester.

Elton Ray Taylor, Lubbock; Carl Dwyer, McLean; Clemon Montgomery, Sweetwater; and Kenneth Moulton, Dalhart, will each get \$100 during the 1944-45 term. Two more awards will be announced later.

The awards are made through the Sears Roebuck Foundation which every year distributes a sum of money to be used for educational purposes. The amounts vary and the allotment for Tech this year was cut because of decreased enrollment. Since 1938-39 when the first allotment was made to this college, from 12 to 20 students have been enabled to use the funds each year.

Students are selected on a basis of scholarship, leadership, character and ability by a committee of the agriculture faculty headed by R. L. Chappelle, head of the department of agricultural education.

Home Ec Women Complete Series

College home economics women presented the last of a series of eight radio programs Saturday over KFYO. The title of the programs was "Designed for Living" and the general theme was opportunities offered by the home economics division of Tech.

College women on the program committee were Reuby Rhodes and Mrs. Virginia Landewer; high school girls assisting were Norma Grace Reed and Jacqueline Reynolds.

Late Techsan's Family Gives Books In Memory of Son

Mr. and Mrs. J. O. Lilly, Elbert, have donated the textbooks that belonged to their late son, W. T. Lilly, to the college for the use of any needy student, according to President Clifford B. Jones.

Their son was a student in the division of engineering during the years 1937-41. A member of the Perry Command, he was killed in action last July 15.

Guest Conductor Will Direct Band

Milburn E. Carey will be guest conductor for the third concert of the Texas Tech summer band. The concert will be Thursday, June 22 at 8:30 p.m. on the lawn east of Textile Engineering building.

Carey is the director of Phillips university band at Enid, Okla. He has B. M. and Master of Music degrees from the University of Illinois. He manages the greatest of all band festivals—the Tri-State Band festival at Enid—and has a national reputation as a conductor and player.

Among the numbers will be "Overture to Rienzi," Wagner; "Valse Triste," Sibelius; "An American Rhapsody," Wood; Thunder and Lightning Polka," Strauss, arranged for band by Carey; "Four Leaf Clover," Irving Berlin; "Phillipian Festival March," King; and "USA Armed Forces March," Fillmore.

Both the junior and concert band played for the concert Tuesday night. Guest conductors for this concert were Herbert Lindsey, director, Whiteface High school band; Orland Butler, director, Cushing, Oklahoma, High school band; and Dale McCook, director, Seminole High school band.

War Veterans Petition Council For Recognition

Texas Tech War Veterans association petitioned the Administrative council for recognition yesterday after organizing and electing officers Monday. Charles Senning, Spur senior, was elected commander of the club.

Other officers are Henry Pederson, vice commander, Troy Davidson, secretary, Wiley Brassell, finance officer, and Bill Kennedy, sergeant at arms. Dr. L. B. Cooper, education and psychology professor, is sponsor.

The War Veterans association is composed of men who have seen service in World War II. It will meet again Monday night at 7 o'clock in room 216 of the Administration building, according to Senning.

Aims of the organization as set forth in its constitution are "to foster and perpetuate a one hundred per cent Americanism; to inculcate a sense of individual obligation to our school, community, and nation; to make right the master of might; to safeguard and transmit to posterity the principles of justice, freedom and democracy."

"To strive for continuation of improvement in our school so that our members in years upon return to Texas Tech may find a more demo-

Textile Engineering Offers Scholarships

Graduating seniors will meet in room 220 of the Administration building at 5 p.m. to elect officers and discuss pertinent business. Maxine Craddock, student president, will preside until a president is chosen.

Tech Army Men Participate In War Loan Parade

All men in uniform on the campus will participate in the Fifth War Loan parade Saturday at 2 o'clock. The ROTC, ASTPR and 3086 AAF College Training unit will be the Tech representatives.

Bands from LAAF and SPAAF; men and equipment from both airbases; and army, navy, and marine recruiting stations located in Lubbock, will make up the parade. The parade will start at the City Hall and proceed up Broadway to Avenue Q. The college units will march on up Broadway to the college and the others will turn off at Avenue Q.

In the annual ROTC inspection by Col. B. H. Colner early in April, Tech was given an excellent rating which is the highest awarded a college unit. This is the eighth consecutive year that Tech ROTC has received this rating. There were only about 90 men in the ROTC this year, whereas there were about 300 last year.

Langford Succeeds Weston On Activities Committee

Mrs. Johnnie Gilkerson Langford, head of the department of physical education for women, has been named to the faculty Social Activities committee, according to an announcement made by President Clifford B. Jones. She succeeds Capt. Henry Dale Weston, who has been reassigned.

Freshmen Will Receive Awards

Students Selected In Open Competition

Scholarships in textile engineering will be offered high school graduates for the first time next year 1944-45. The textile engineering scholarship committee announces a number of freshman scholarships of \$200 will be given to one student from each high school meeting the requirements.

A transcript of the student's record should be sent to the registrar of Texas Technological college, and he should write to Prof. L. E. Parsons, department of textile engineering, for a scholarship application blank.

These scholarships may be used for tuition and other fees, both required and optional; for loss and breakage deposits; textbooks; equipment and such other expenses of the recipient as may be approved by the committee.

Recipients of these scholarships will be selected in open competition and strictly on the basis of scholastic and personal qualifications, after undergoing such tests and interviews as the committee may require.

They must be eligible to enter without condition the division of engineering. Entrance requirements include three units of high school mathematics not including general mathematics, and one unit of physics.

President Clifford B. Jones appointed Karl Hobbittzelle, member of the board of directors, O. V. Adams, dean of engineering division, and L. S. Parsons, acting head department of textile engineering on the committee. Their job was to present the matter to persons who might be interested in giving scholarships, select students to receive the scholarships and administer the funds.

Persons receiving the scholarships will live in the college dormitories if space is available, unless living with relatives. Further information on this scholarship plan may be obtained by writing to the department of textile engineering, Texas Technological college, Lubbock.

A modern gentleman, apparently, is one who can't bear to see a woman standing in a crowded bus—so he shuts his eyes.

Keeping Up With The World

WE ARE introducing this week an interpretative news column by Dr. Charles Dudley Eaves, professor of history. Dr. Eaves, who was included in the Tech faculty the year the college opened, has consented to present world news in a nutshell for the benefit of students who are really interested in what is happening in the big world around them, but who just cannot seem to be able to roll out of bed in time to purchase one of the few available daily papers on the Avenue.

Techsans have long felt a need for a column like the one Dr. Eaves will be presenting weekly. College students, who should be among the best informed young people in the nation, are notoriously ignorant about current events. We hear countless news casts, via the Blue and other networks, but radio news has a way of being lost amid the hum of conversation around us. We have heard of Generals Alexander and Montgomery, but do we know where they are leading their forces? Probably 80 per cent of us do not. Dr. Eaves is giving us information that will help us to understand and to converse more intelligently about the progress of the war in this highly condensed and easily assimilated column.

We remind students who would like further news and comment of the informal reading nook in the Library just east of the loan desk. Here daily papers are available as well as current issues of such magazines as *Newsweek*, *Atlantic Monthly*, *Current History*, *Survey Graphic*, *Fortune*, *Harper's*, *The New Republic*, *Business Week* and the ever-timely *Reader's Digest*.

By means of columns, editorials and articles in these newspapers and periodicals, we may keep ourselves informed of current happenings if we wish. We at Tech are fortunate in having easy access to the works of the best thinkers of today. It is to our advantage that we utilize our opportunities.—E.H.M.

Life With The Exes

Ensign Mary Clark, now in the WAVES, is taking a four month course in an Aerial Navy school at Shawnee, Okla. Ensign Clark received her degree from Tech in 1939 where she was an outstanding art student, her work being used on magazine covers extensively. She received her commission in February, 1943.

Lt. Charles A. Carrigan, 27-year-old pilot on an AAF B-17 Flying Fortress, has been awarded the Air Medal with 9 Oak Leaf Clusters for "meritorious achievement while participating in aerial flight." He is now stationed in Italy and flying under the leadership of Maj. Gen. Nathan B. Twining. He is a veteran of missions over Italy, Austria, Rumania, Yugoslavia and Greece.

The promotion of Francis H. Cummings, of Borger, from first lieutenant to captain has been announced by Brig. Gen. Edmund W. Hill, commanding general of the Eighth AAF Composite command in Northern Ireland.

Seven former Techsans received commissions as bomber pilots in graduation ceremonies last month at four Central Flying Training Command advanced schools in Texas and Oklahoma. Lt. Thell B. Fowler, Jr., who attended Tech during 1938-40; Lt. Edward B. Moore, who attended during 1939-40; and P.O. Joe T. Kunkel, who attended during 1942-43, received their wings at Pampa. Two former students, Lt. David L. Collins, who attended during 1942-43, and Lt. LeRoy Olask, who attend-

ed Tech during 1941-43, received their wings at Altus, Okla. Capt. Gwen T. McPerson, who was enrolled in Tech between 1937-41, received his wings at LAAF, and Lt. Bryon D. Black, Tech student during 1940-41, graduated at Frederick, Okla. P-O Albert Bassinger, who was registered here in 1942, was commissioned as a fighter pilot at Aloe field.

Miss Betty Brooks, who received her Master of Business Administration degree here, has been appointed an instructor in business administration at the College of Mines, El Paso, for the summer session. Since 1942 she has been an instructor of secretarial duties at Tech and at Mary Hardin-Baylor college at Belton.

Lloyd J. Holloway was commissioned a second lieutenant in the Army Air Forces June 10 after completing bombardier training at the Carlsbad, N. Mex. Army Air field. As an officer in the AAF ready for active duty, his destination is not disclosed.

Former Red Raider star, Will (Joe) Albright, who recently received his wings from the Marfa Flying school, has reported to Las Vegas, N. Mex.

First Lt. Joe F. Rives, co-pilot of an Eighth AAF Flying Fortress, has been awarded the DFC for "extraordinary achievement" while participating in more than a score of heavy bombing assaults in Germany and the occupied countries of Europe. He already held the Air Medal with three Oak Leaf clusters. He was a student at Tech

From.... I

2 Another

By COUNT MEOUT

It seems that every week the Count notices that more and more of Tech's former students like to come back to see what all goes on during the summer semester. Those who were back this week included ANNETTE GIBSON, HELEN MIXON, EVELYN JONES, MARY MIXON, and PAT HUTTON is expected. One of the happiest of all to be back was LEHMER GRAHAM who is now back in civies.

But the Count just can't get over KIDY COLE still wearing DON KLINESCHMIDT'S Sox in even though he is in Grand Prairie working. He'll be here the 23rd, though—so maybe that's a good reason to have long distance taffy cases.

It's really good to start the summer season off right with the good crowd and music that were at the first summer dance last Friday night. So, it should be a good symptom that all of the dances will start off with a big bang.

And speaking of good music reminds the Count that TED CREGAR and his fiancee look like they should have been stepping out together all semester because it's so natural to see them together. She is the transfer from T. S. C. W. who is so cute—ADA RUTHER HILBURN.

Last Friday PEGGY KEMP was escorted by JOE KING, BILL COPPER, and JIMMY WILLIAMS to the dance. Hmmm, three dates to the same function in these days and times.

JAMES SON, who was a fish last fall, has been visiting since he's been docked and got to come to his home town, Plainview.

So many girls were camped this week that it looked as if all of the couples who were going steady had broken up because the fellows were out on the Avenue at night by themselves—or at least, without the usual company.

Saying goodbye is becoming more and more the thing of the day since HOOPER STILES is leaving for the Navy. TRUITT BOLES is leaving for med-school Sunday with RANDY RUTLEDGE and BOB ARNOLD, and DAN YOUNG and RICHARD DICKEY are going to the Coast Guards soon.

And since we are mentioning people who are leaving the Count must mention that LOU METCALF left last week for Dallas for a month's training before going on to New York to work.

Just ask JEAN NEWMAN why she is so happy and she will tell you that it's because JERRY GOLF will be in Lubbock Saturday on a leave from the Navy.

BETTY WALTERS got to talk to her fiance who is in the Navy—so the day looked brighter to her than it had for a long time.

And it should be mentioned that UMPY ROBINSON and BECK BECHTOL are counting the days before he goes to the Navy's V-5 school July 1.

Tonight is another Friday night—so I hope the Count sees as many good people at the dance in the gym as were there last Friday. And what about you freshmen fellows who go over to see what it is all about—why don't you start dancing with some of the girls. That's a swell place to meet people.

When the clubman walked off with another member's umbrella, he was merely providing for a rainy day.

When he entered the service, July 12, 1941.

First lieutenant Weems D. Jones has been reported missing in action by the war department. He is said to have been lost in a raid over Germany on April 29.

The World at War

British, Russian and U. S. Troops Surround Nazis

by Dr. Charles Dudley Eaves
Professor of History

IN THE wee hours before dawn on Tuesday, June 6, Lubbock was awakened by the sound of screaming whistles and the ringing of bells. The long and anxiously awaited "D" day had come at last. The greatest amphibious operation in world history moved across the choppy waters of the English Channel to the coast of Normandy. It was the beginning of the Norman conquest in reverse. It was a crusade to liberate Europe from the yoke of the Nazi beast.

An enormous fleet of war planes blasted and softened the defenses for invasion and a sea armada of twelve battleships and over six hundred other warships afforded a barrage behind which the tough commandos and doughboys stormed the mine infested shallows and beaches. Four thousand vessels had brought them over. A vast fleet of gliders and carrier planes landed glider troops and paratroopers behind enemy lines to seize bridges, disrupt enemy communications, and to blast enemy defenses. Tough British, Canadian, and American veterans of the African and Sicilian campaigns commanded by General Bernard L. Montgomery seized a sixty mile strip of the French coast along the east side of the Cherbourg peninsula. At week's end, they had pushed inland as far as twelve miles at some points.

The Americans on the right wheeled around north toward Cherbourg itself, the great French port so ardently needed through which to pour heavy armament for the titanic battle impending against Marshal Rommel's quarter of a million reserves rushing up to throw our expedition into the sea.

In England millions of other troops stand ready to pour into France under an air umbrella of thousands of bombers and fighters. In Italy General Alexander's tough legions have captured Rome and chased Kesselring's broken army in a wild chase for sixty miles up the peninsula toward the Po valley into France or eastward into the Balkans. In Russia, crouched like a giant leopard ready to spring at Hitler's throat, is the mightiest army the world has ever seen, made up of millions of veteran Russian

soldiers bent on revenge for crimes perpetrated by the Nazis on the sacred soil and people of Holy Russia. From the south, therefore, a fast moving storm approaches Hitler's "Festung Europa", from the east a hurricane is ready to be unleashed, and from the west a tornado has already struck the shores of France.

The three most powerful nations on earth, the British Empire, Russia and the United States of America, with millions of the best equipped and toughest troops in the world are moving in for the kill. This summer we shall witness the greatest battles in world history. Students and faculty of Tech have a grandstand seat from which to witness by press and radio the greatest era in the history of man.

By autumn Hitler's Germany should begin to wither and to falter; by year's end it should crash to the dust. Then Russia and the British Empire will join the United States in the grand assault on Tojo's Japan. The preliminary moves are already being made. By October 1, we should be back in the Philippines and by Christmas we should have a path blazed through the Pacific and through Burma to heroic China.

"Oh, Lord, how you made me jump!" is said to be the first sentence uttered by the very first grasshopper.

Prohibitionists claim that the water wagon has saved many men from biting the dust.

Coed's Corner

Coeds Take Wedding Gowns For Preferred June Wear

By Margaret Long

ONCE in a while Coed's Corner breaks down and discusses such chummy subjects with the femme members of the campus as styles and fashions . . . and it seems that time of the year has rolled around again.

Moving down the fashion list, it seems that past and present coeds are universally voting for white satin with a touch of veil and fresh flowers as its preferred costume of the season. One of the most recent ex-Techsans to add another to the wearing of satin and orchids is the former Peggy Emsd who was married Monday night in Lamesa to Ens. W. B. Crawley, June Annapolis graduate.

And then there is the coed who thinks the weather is too warm for knitting, so she is finding another way to be patriotic this month and is doing some typing and filing at the Red Cross office. Girls with a little time and who want to be helpful can always be used in the local Red Cross office.

"Use it up," "Wear it out," "Don't buy more" are phrases that we are hearing over and over these days. These words we discover can apply to breakfast room curtains as well as leftover food and last winter's shoes. One coed now wearing a particularly pretty chintz skirt tells us that it was made from the curtains which had seen their day at the windows, so now she has a new skirt.

Women's magazines are telling the women of today that at last they have a chance to prove their capabilities in the world of today . . . in education, science, philosophy and business. Then we pick up a daily paper of a large daily circulation, and here staring at us is this . . . "We look to the women now in this time of need for help," then it goes on to intimate that women cannot do the job. The assumption seems to be that women are too frivolous, too self-conscious to do the jobs set before them. Every woman now working in any field owes it to herself and to others to do the very best she can, whatever the position she may take. So Tech coeds, let's remember that we can do the job and resolve on being graduated to do the best we can, whatever the job we take, for Tech, for other women, for civilization.

Expressing typical campus conditions these days are these eight lines taken from the "Megaphone":

When the draft began in '41
We girls that we'd have fun!
Our viewpoint changed in '42.
We longed for someone who'd be true.
In '43 we all began
To yearn for any "manly" man.
In '44 it's not the form—
We'll take it if the Body's warm!

WAVE Frances Ford Trains At Hunter College, N. Y.

Frances Ford has reported for "boot training" at Hunter college in New York City. She was inducted into the WAVES just after she received her degree in commercial art in May.

Miss Ford was president of Ko Shari last year and took an active part in AWS as treasurer. She was secretary of the senior class and also a member of the Gargoyle society.

Lydia Duff Is Secretary To T. N. M. & O. Manager

Lydia Ann Duff, '43, charter member of the Psi Delta chapter of Sigma Tau Delta, national English fraternity, and a former Junior council member, is now serving as secretary to Jess Stevens, manager of Texas, New Mexico, and Oklahoma Coaches, Inc. Her home is in Lubbock.

When girls start experimenting with an unorthodox hair-do, they should bear in mind that Goliath died from a bang on his forehead.

Twenty Attend Annual School For HD Agents

The annual food conservation training school of district two met Tuesday and Wednesday with twenty county home economics building. The school, under the direction of Mrs. Martha Buterial, assistant state demonstrator and Mrs. Kate Adell Hill, district agent, both of extension service at A&M college, was a study of care, repair and adjustment of pressure cookers; oil and cleaning of sealers; methods of freezing foods, and safe care of equipment.

The school, according to Mrs. Hill, is conducted in accordance with the war effort to preserve food and produce needed food. Demonstrators who attended were Miss Estella Robel, Snyder; Miss Clara Pratt, Lubbock; Miss Lucille Shultz, Plainview; Miss Mabel Ann Manley, Post; Miss Sybie Gidden, Tulla; Miss Grace Patterson, Muleshoe; Miss Edith Wilson, Floydada; Mrs. Myrtle Dickie, Nogg, Lamesa; Miss Mozelle Reast, Brownfield; Miss Mary Grindstaff, Seminole; Mrs. Ruth W. Marshall, Crosbyton; Miss Fannie Brown Eaton, Levelland; Miss Leila Petty, Dimmitt; Miss Vara Crippen, Amberst; Miss Carolyn Dixon, Tahoka; Miss Dorothy Cresslin, Morton; Miss Helen Edwards, Lubbock; emergency war food assistants, Mrs. Mabel Tucker, Lamesa; Miss Graham Hard, Lubbock; Mrs. Marsh Watson, Plainview.

Alvis Tabor Takes Position With Paducah High School

Alvis Tabor, senior student in agriculture from Morton, is leaving soon for Paducah, where he will teach vocational agriculture in the high school.

Ex-Techsan Sends Japanese Curios To Tech Museum

By ALICE WRIGHT
Toreador Reporter

A collection of Japanese articles picked up from the battlefield by an ex-Techsan is on display at the West Texas museum. Capt. Forrest Winford Jones, 1941 graduate of Lubbock, sent the articles to his wife after the battle of the Marshall Islands, when he was a lieutenant in the Fourth Marine division which occupied Roi Island on Feb. 2, 1944.

The collection includes two flags, one from a Japanese carrier and one belonging to the Imperial Marines. Pieces of tin plate from a Zero show part of the rising sun emblem. A set of wooden blocks marked with Japanese characters were used for playing a game. Candy, cigarettes, a label from a saké bottle, letters and a book which may be a diary are among the smaller items.

There is also an ammunition case cut from a dead Jap, the size of which indicates that he was a small person. A rifle, longer than an American rifle, also includes a bayonet with its case. There is a sailor's blouse and an officer's cap. Among the articles of clothing, the most interesting are two "belts of a thousand stitches," as they are known. A Japanese soldier's mother stands on a streets and gets 1,000 different people to take a stitch in the belt and make a wish for her son. They are considered good luck charms, and are worn wrapped around the body under the uniform.

Captain Jones came to Tech from Haskell institute and majored in agricultural education. He also played football and was known as "Chief" to the fans. After graduation, he taught agriculture in Muleshoe High school.

And then there was the freshman who thought people could get liquor in jail because the place was surrounded by bars.

The sword-swallower was disturbed when somebody in the circus audience pointed out a girl inhaling a Camel.

La Ventana Artist Visits This Week

Fred Beasley, 18, of the merchant marines was visiting on the campus Tuesday. He has a 12 day furlough after making one voyage. He has been to Panama, Cuba, and around the Caribbean sea on an army transport ship. A submarine followed the ship one day and the transport dropped depth charges.

Beasley says he is just an ordinary seaman who paints and swabs decks. He entered the service last February. He attended Tech during the summer and fall of 1943 as a freshman engineer. He did all the art work, including the cover design for the 1944 La Ventana.

The expression "Well, I'll be blowed!" originated when the bass-horn exclaimed as the orchestra began playing.

Ft. Worth FHA Representative Praises HE Grads

Miss Rebecca Myers, of the Federal Housing program at Ft. Worth, who visited in the home economics department Saturday, stated that she was quite pleased with the work of Tech's graduates who are working as home counselors. She added that there is a great need for more counselors at the present time, and predicted an enlargement of the low cost housing projects after the war.

Tech graduates who are now home counselors are: Mrs. R. A. Burford, Lubbock; Mrs. Ruth Carter Wilson, Miss Elizabeth Chenoweth and Miss Vera Thormann, Orange; and Miss Charlotte Belew, Port Neches.

Advice to folk who indulge in profanity: swear off.

CAPTAIN CLENE SAYS:

Your Wardrobe will score a Victory if it has been cleaned by VOGUE CLEANERS

VOGUE CLEANERS

1209 College

Save KITCHEN FATS Give ammunition to a soldier!

To save kitchen fat seems a trivial thing, a small job compared to the tasks the soldier performs in battle. Yet if the housewife does not help by saving waste fats, the soldier can do nothing, for without ammunition he is helpless.

West Texas Gas Company

Tech Works With City In Recreation Program

The Tech Gym will be open on Monday and Thursday nights for sport activities sponsored by the City Recreation department, according to a recent announcement by Dr. Clifford B. Jones, college president. The program, while primarily designed for college students and members of the campus mili-

tary detachments, will be open to townspeople and soldiers from the local air bases, according to Dr. Jones.

Instruction and practice in badminton will begin Monday night from 8 until 9:30 o'clock. Badminton clubs will be organized later and the program will be climaxed

LAAF Noses 2-3 Win Over Raiders In Softball Clash

Hayes And Handey Score For Techsans In Seven Inning Tilt

Lubbock Army Air field proved to be the best Tuesday afternoon when the Texas Tech Red Raiders met that team in a seven inning softball match in front of Tech Gym. The service team turned up on top in a narrow 3 to 2 victory.

In the opening frame the Raiders picked up and early one run lead when Hayes singled to get on base, and Don Grove pounded out out of the infield to score Hayes.

In the second inning the LAAF batters caught on to T. M. Cox's pitches and scored two runs to pull ahead of the collegians. Swick was the man who tied the ball game in this frame when he drove a long hit between right and center fields to romp around the bases. Fincher then got on base with a hit, and Tempesti lifted one to the outfield to score the runner. This gave LAAF a 2-1 lead and ended the only lead held by the hosts.

In the sixth inning both teams scored, with the Raiders tying the ball game in the first half of that frame. Gene Handey reached first base with a hit. A fumbled ball by the third baseman put him on third with Barnett on second. Then Rush sacrificed to score Handey and tie the game at 2 all.

In the last half of the inning the service team once again pulled ahead with Jarret of LAAF scoring by way of a long sacrifice fly by Lyons, which dropped into the center fielder's hands, but Jarret beat the throw to home plate.

Lockwood pitched the first six innings for the service team, with T. M. Cox going all the way for the Raiders. In the last inning Hayes substituted for the Army team and whiffed three batters in quick succession to end the game at 3-2. It was the second meeting between the two teams this summer, with the Army winning the first game also.

Wilkowske Visits Campus On Leave From Navy

Howard Wilkowske, dairy manufactures graduate of '40, was visiting on the campus last week. He was on leave from the navy after service in the Atlantic. Wilkowske took a master's degree here in 1942.

by a city-wide tournament, according to Mr. Hamilton, of the City Recreation department.

An announcement has not yet been made concerning the activities to be held on Thursday nights, but they will probably consist of dancing and social games, according to Mr. Hamilton.

Raiders Losing Bechtol To Longhorns This Fall

By BILL BARNETT

Texas Tech will continue its lend-lease war-time program during the 1944 football season by again furnishing D. X. Bible and his Texas University Longhorns with another Red Raider star. Last season J. R. Callahan paced the Southwest Conference champions to a title and made history for the Longhorns, while this year Hubert Bechtol, outstanding star of the 1943 Raider squad, will report for football at the University as a member of the Naval V-5 cadets stationed there.

Bechtol announced his intentions early this week after receiving orders from the Navy to report for

duty on June 30 at the Central Texas school. Bechtol states that he will be stationed there for at least 12 months and modestly said, "I want to see if I am good enough to make Coach Eible's traveling squad."

The 6 feet 2 inch Lubbock lad scales around 190 pounds, and besides being an excellent defensive end, is also a glue fingered passer and a fast powerful runner. The son of Mr. and Mrs. J. E. Bechtol, 2114-25th street, Hubert was named All-State by United Press in his 1942 high school season as well as receiving All-District I honors. He completed his first year at Tech in May.
