

Connally's Message To Graduates

Med School Touched In Graduation Speech

Texas Governor John Connally, in the address he would have made at Tech's May commencement, touched on his reasons for vetoing the proposed medical school at Tech.

"Medical education may well be a part of your undoubtedly bright destiny — but if and when this comes, it should come to meet the overall needs and capabilities of the total system of higher education in Texas," said Connally in the prepared text he sent to each May graduate in June.

"Many of you were displeased, and you told me so, when I vetoed the establishment of a medical

school at Texas Tech. I understand that.

"It's not easy to make decisions which cause grief and dismay to your friends when they feel as strongly about their opinion as I do about mine.

"If I had passed my decision on the medical school solely upon friendship for the sponsors and admiration for this great college, I would have signed the bill.

"But I could not urge this state to establish a means of study and coordination of its educational needs — what I regard as the initial step toward true excellence — and then cast this conviction aside for the easier, more palatable course."

The means of study and coordination referred to is the new Coordinating Board for Texas' higher education. The Board was set up by the last legislature, and will take over the governing position in September. Connally is expected to make appointments to the board by August 1.

In April Connally vetoed a bill passed by both houses that would have established a medical school at Tech.

In the commencement message Connally praised Tech for its rapid growth, history and service to the state.

"Texas Tech has had an illustrious 40-year history. Few colleges in this nation can equal what has happened here. Few colleges in this nation have finer opportunities for the future. Inauguration of your law school two years from now

is only one example of the consistent growth of service Tech has provided and will provide."

The governor challenged the graduates to dedicate themselves to a united Texas. "I'm sure that sometimes as you survey the far horizons that surround you here, Austin seems far away — distant, disinterested and inclined to misunderstand."

He said this might have been true in an earlier age, but not now. Isolation, regional pride and sectional interest is a thing of the past.

Connally was scheduled to speak at last May's commencement service. In a letter accompanying the speech to the graduates, he explained in order to save having to call an expensive special session of the Legislature he decided to stay in Austin. Congressional re-districting was being discussed in the state's capital.

Attorney General Waggoner Carr filled in for the governor at the commencement.

Beckett Is Forum Topic

Mike Niemczyk, English teaching assistant, will speak on "Beckett's Profane Comedy" at Wednesday's noon forum.

Niemczyk will analyze the comedies of one of the theater of the absurd's most prolific writers. Beckett is the author of the controversial play, "Waiting for Godot."

The Noon Forum is sponsored by the Union Ideas and Issues Committee in the Mesa Room. A buffet luncheon will be served for \$1. Persons wishing to eat should sign up at the newsstand by 10 a.m. Wednesday.

Post Office Gets Award On Service

Tech Post Office was awarded the Nationwide Improved Mail Service citation last Friday for its work in gaining better service and reducing cost.

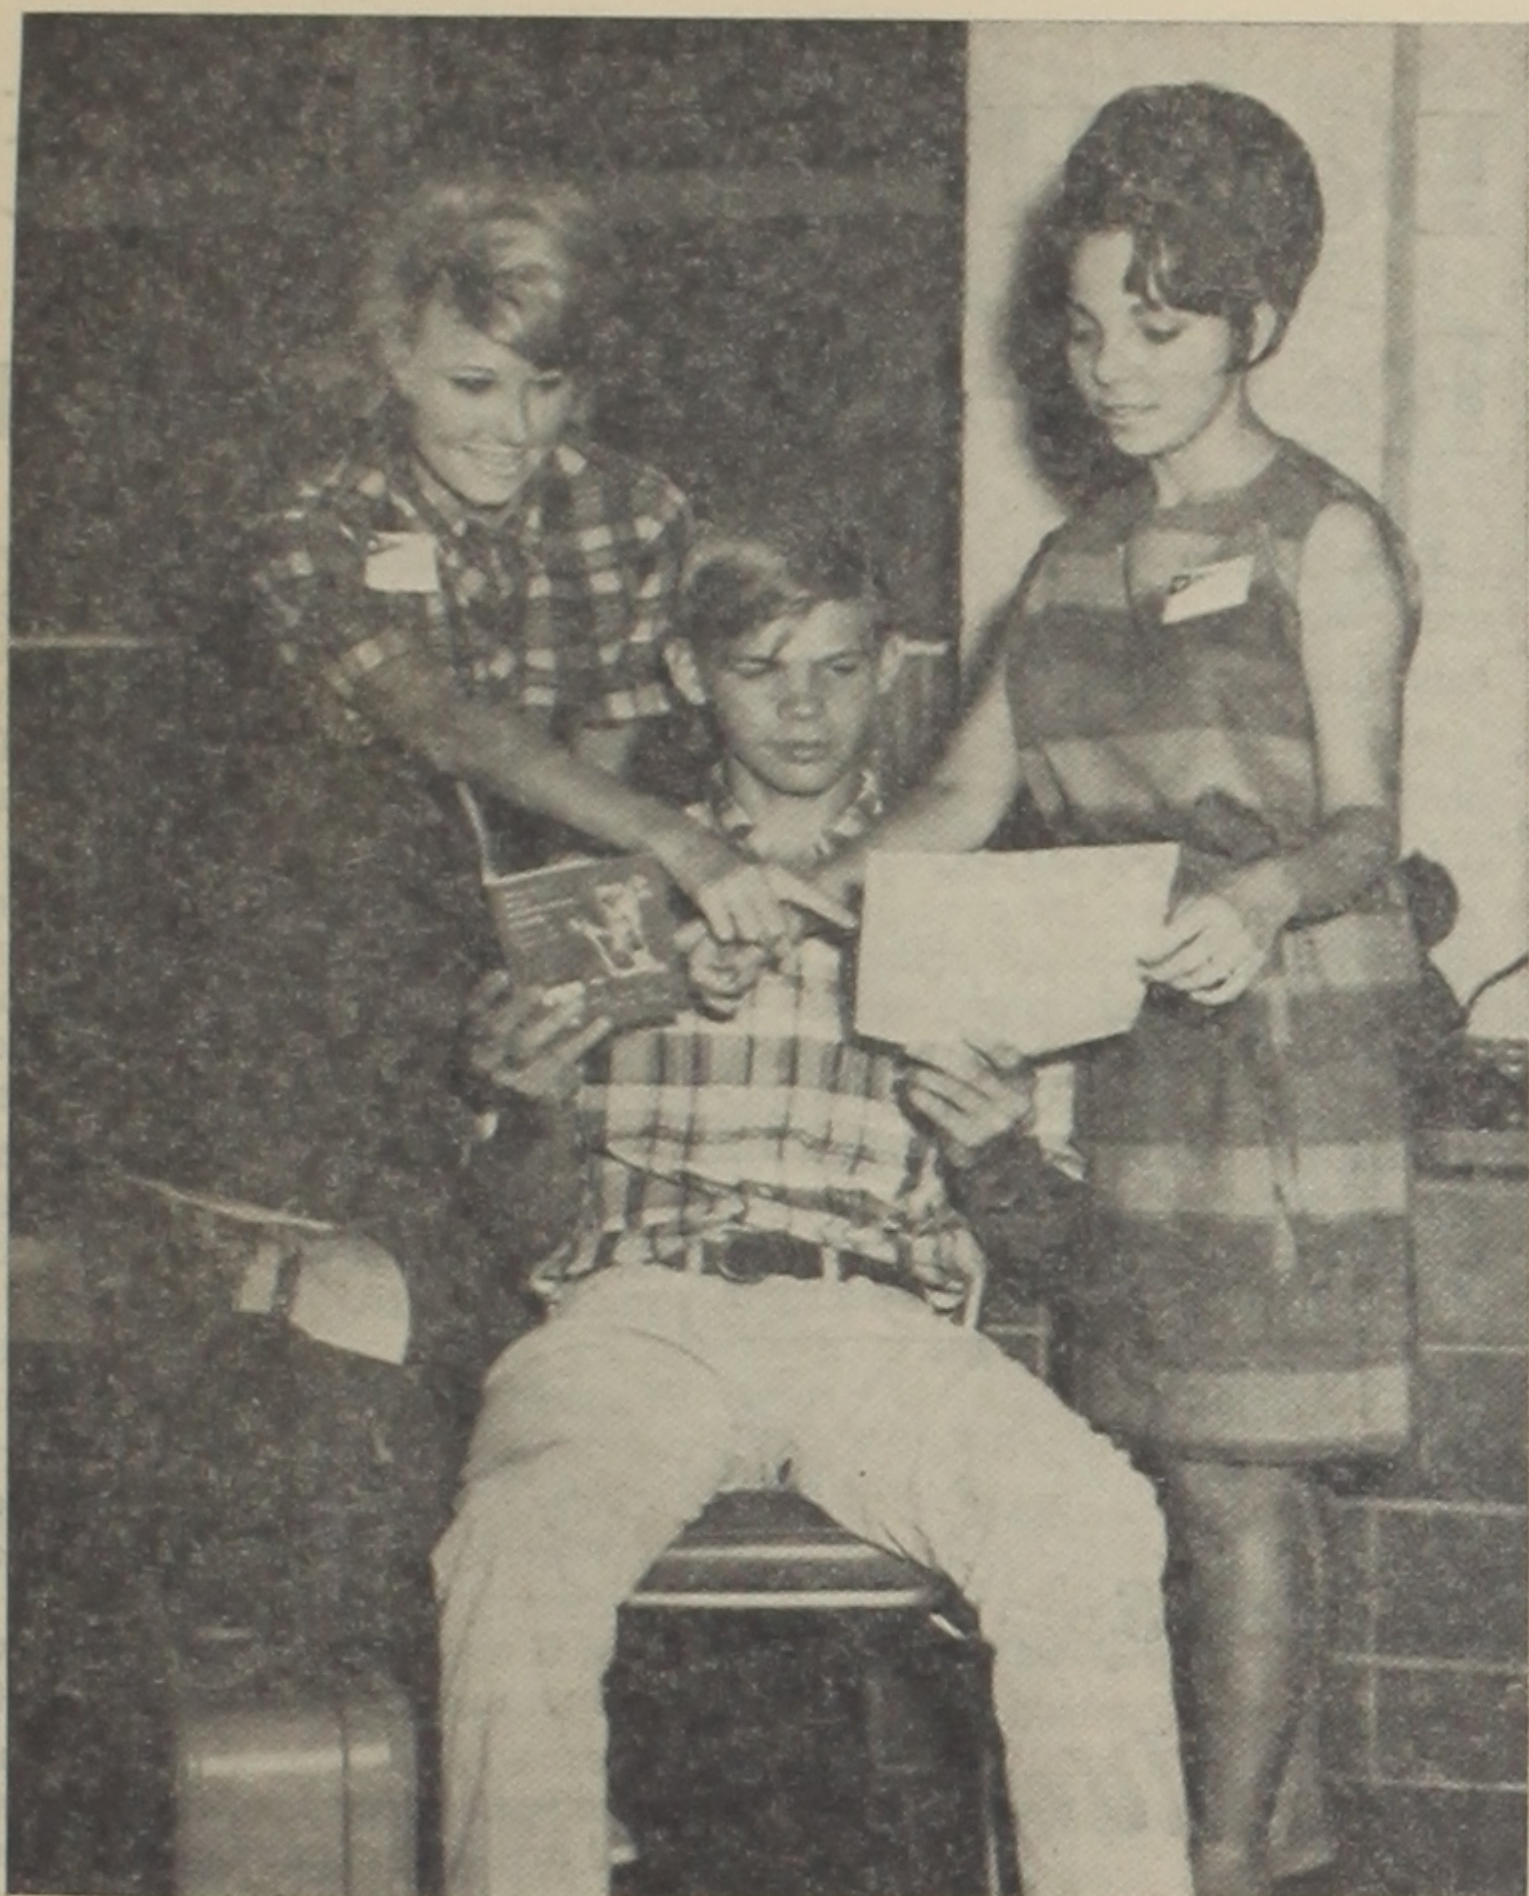

Under the supervision of Joe Winegar, the Tech Post Office was chosen above 24 other members of the Mail Users Council for this honor. The council consists of 25 firms in Lubbock which account for 25 per cent of Lubbock postal receipts.

This is the first award of this type which the Tech Post Office has received. "The Post Office workers have achieved good service by sending the mail from the campus on time and before the 5 p.m. rush caused by business firms," Winegar said.

The certificate carries the signatures of Postmaster General John A. Gronouski and Acting Lubbock Postmaster Ernest J. Ohnemus.

POST OFFICE RECEIVES AWARD — The Tech Post Office received an award for outstanding service with the new, improved postal system. The award was presented by Ernest Ohnemus, acting postmaster, to Joe Winegar, supervisor of mail at Tech. Peggy Parker, part-time assistant, is shown with Winegar.

TECH HOSPITALITY — Sara Logan, left, and Janice Richards, members of the Student Senate, go over information that Bob Fleming will need to complete his pre-registration. Fleming is just one of the hundreds of freshmen that have pre-registered for the fall semester.

For Counseling Study

Tech Awarded Grant

Tech has received a \$25,000 research grant from the Office of Vocational Rehabilitation to initiate a special study in the area of vocational rehabilitation counseling.

Dr. Paschal N. Strong Jr. has been named principal investigator and Dr. Beatrix Cobb co-investigator of the three-year project involving the evaluation and training needs of vocational rehabilitation counselors.

The first year's work will deal with approaches and techniques, the second year will emphasize actual work with individuals and the third year will be given to testing in the field, Dr. Strong said.

By the end of three years, the Tech team hopes to have a completely tested program which can be self-administered by counselors across the nation. The initial grant is expected to cover the first 12 months of research, with addition-

al funds available for subsequent years, upon application.

Programmed instruction will play an important role in the project, the Tech associate professor of psychology said.

Programmed instruction, defined as "a systems approach to education and training," is a technique by which students progress in a series of steps, from one concept to another.

"This technique involves the construction of logically presented material requiring the student to respond actively and giving him immediate feedback as to whether his answer is right or wrong," Dr. Strong explained.

To set the project in motion, two conferences will be held on the Tech campus in August, the first for vocational rehabilitation counselors and the second for supervisors from a five-state area including Oklahoma, New Mexico,

Texas, Arkansas and Louisiana.

"These meetings are expected to generate a task analysis and a series of objectives to be investigated," the director said.

Dr. Strong and Dr. Cobb are both widely known in the fields of programmed instruction and rehabilitation training.

Before joining the Tech staff in 1961, Dr. Strong worked with the U.S. Air Force rehabilitation training program and later helped organize a Lubbock company which was awarded an Air Force contract for training programmers. He also has served as consultant to the Air Force training command, evaluating and helping to set up new programs. He was for two years editor of the professional journal "AID" (Auto Instructional Devices).

Dr. Cobb is professor of psychology at Tech and director of the Rehabilitation Counselor Training Program at the college.

Cheerleaders' School Kicks Off On Sunday

Tech's second annual cheerleading school will begin Sunday, as 562 yell leaders and 18 sponsors from Texas, New Mexico and Oklahoma check in from 1 to 5 p.m.

Classes will begin Sunday evening and continue through Friday.

Tech Horse Hit By Car

Bowen's Devil, a quarter horse worth \$700 belonging to Tech farms, received a crushed leg when she was struck by a car Saturday at about 7:15 p.m.

Because of the seriousness of her leg injury, the horse had to be destroyed and an investigation into any further injuries was not made.

The accident occurred as the horse ran out of the fields and into the path of a car traveling 30 m.p.h. north on Flint Street near the 15th Street intersection.

The 15 instructors, 10 college women and five college men are being furnished by the National Cheerleaders Association. Edsel Buchanan, director of intramural sports, is directing the school.

Students will learn new cheers, demonstrate favorite cheers and create cheers of their own. They will also be shown pom-pom routines and skits and gimmicks to add life to pep assemblies. Lessons in tumbling, crowd control, speaking to a crowd and cheerleading psychology will also be offered.

Before the workshop ends at noon Friday, the cheerleaders will participate in a yell competition. They will compete in divisions according to the number of people on a squad. Presentation, coordination, originality, composure and the effect of movement in the cheer are the major points of the judging.

After daily classes are over the cheerleaders will be able to use the varsity swimming pool and tennis courts.

The yell leaders will be staying in Gates, Clement and Hulen Halls.

Grad Goes To Peru

Jean Jacobs, May graduate from Dallas, has been named a teacher-missionary to Peru by the Board of Missions of the Methodist Church. A foreign language major, Miss Jacobs will teach English in the secondary division of Colegio Maria Alvarado, a school operated by the Methodist Church in Lima where she expects to begin her three-year tour of duty in September.

At Tech, where she was an outstanding student, Miss Jacobs was a member of Phi Kappa Phi, top honorary for juniors and seniors; Sigma Delta Pi, Spanish honorary; Pi Delta Pi, French honorary; Capa y Espada Spanish Club, and was secretary-treasurer of Le Cercle Francais, French club. She also was an active member and officer of Wesley Foundation in Lubbock.

JEAN JACOBS

Don Herzog Named Research Technician

Donald Herzog, senior from Wilson, plans to log plenty of hours this summer using what could be lossly called a "bug vacuum cleaner."

Herzog, an entomology student with aspirations to continue his education in graduate school, has been named research technician in charge of field sampling and data collection on a project which is designed to measure the effects of spraying under the boll weevil control program on non-target insects. Tech's entomology research

teammates, Drs. Donald Ashdown and Ellis Huddleston, have received notice of renewal of a \$5,000 one-year grant from the Plant Pest Control Division of the U.S. Department of Agriculture to finance this study.

The Wilson senior has spent and will continue to spend many hours in cotton fields in Lubbock, Garza, Crosby and Scurry counties with his "bug vacuum cleaner."

"We collect the insects with a D-Vac vacuum insect net," Herzog explained. "This is a portable, pack-mounted apparatus which sucks insects off plants in much the same manner that a vacuum cleaner sucks dirt off carpet."

"After the insects have been collected, we can take them to our laboratory and discover what effects, if any, the boll weevil spraying has had on beneficial insects."

Herzog indicated that the most numerous species of these beneficial insects included spiders, lady-bug beetles, hooded beetles, and scynus beetles.

Campus Briefs . . .

Jerry Peek Receives 2-Year Army Scholarship

Cadet Jerry D. Peek, a Tech student who has completed two years of ROTC, received one of the first two-year Reserve Officer Training Corps scholarships to be given by the Army.

Cadet Peek is one of 600 college students to win the scholarship, which was authorized by President Johnson under the ROTC Vitalization Act passed last October.

He was nominated on the basis of his academic, extracurricular, and ROTC record.

Through the scholarship, Cadet Peek will be given tuition, textbooks, fees and a \$50 a month allowance.

Dr. David Vigness, head of Tech's history department, has returned from Puerto Rico where he was a visiting lecturer in the final phase of the Peace Corps Training program for volunteers assigned to Ecuador, Bolivia and Peru.

Dr. Vigness lectured on Latin American area studies at the Peace Corps Training Center at Catholic University in Ponce and also visited training camps near Arecibo during his four-day stay.

The professor is coordinator of the Latin American area studies sector of the Peace Corps training program now underway at Tech.

Dr. Charles Riggs, professor of mathematics, has been named to a National Science Foundation panel which is meeting on Thursday through Saturday in Washington, D.C. Purpose of the meeting is to make decisions regarding allocation of summer Institute grants for 1966.

Dr. Willa Vaughn Tinsley, dean of School of Home Economics, is a guest lecturer this week at a curriculum workshop in Lexington, Ky.

A selected group of Kentucky high school home economics teachers are participating in the three-week workshop sponsored by the Kentucky State Department of Education at the University of Kentucky.

Dean Tinsley is scheduled to discuss the conceptual approach to teaching as it is applied to the curriculum in the food and nutrition phase of junior and senior high school home economics classes.

Wade Gets Extension On Grant

Dr. F. Alton Wade, geosciences professor, has received a \$2,760 grant from the National Science Foundation to continue research on "Geology of the Antarctic Horst Near the Shackleton Glacier" through Aug. 31, 1965.

This extension brings the total amount of assistance for the project to \$40,560.

Dr. Wade and a team of researchers and scientists made a trip to the Antarctic during late 1964 and early 1965 to obtain geological data on vast land areas including the Shackleton Glacier.

His research crew used many modern innovations, such as helicopters, to help them work faster and better. While in the Antarctic, they were supplied from the Navy's McMurdo Sound base.

The Tech researcher has made several journeys to the Antarctic, including one trip with Admiral Byrd.

JUST CAN'T DO IT — A boy finds it hard to stay up with the girls in twirling class. The students are here for a summer band camp which includes instrument instruction, twirling, drum majoring,

rhythm and theory, stage band and small ensembles. The camp will close with a public concert at 7 p.m. today in Tech Union Ballroom.

Piano Clinics Begin Monday

Sidney Foster, concert pianist and Indiana University professor, will conduct a three-day piano teachers clinic and a two-week workshop for junior high and high school piano students at Tech.

Both the clinic and workshop will begin Monday.

Foster will discuss and demonstrate the pianistic ideas which are the basis of successful performance and teaching. Piano contest materials to be used in the Lubbock and Amarillo areas will be featured

in the master coaching and demonstrations.

"Foster, whose reputation as a pianist is world-wide, possesses a warmth, wit and understanding which make him a great teacher," according to Thomas Mastroianni of the sponsoring Tech music department.

Foster has recently returned from a tour of Russia, where his success as a pianist was immediate and overwhelming, Mastroianni said.

The student workshop will fea-

ture a film of a master class conducted by Rosina Lhevinne, distinguished piano instructor of Juilliard School of Music and teacher of Van Cliburn. The film showing at 1:30 p.m. Wednesday, Aug. 4, will also be open to registrants in the teacher clinic.

Tuition for a student or teacher is \$20. Individual instruction in piano or organ also will be available through Mastroianni or Dr. Judson Maynard of the Tech music faculty. Sessions will be in the Tech Music Building.

Tech Student Receives \$2,500 Chemistry Grant

Don Taylor, graduate student studying toward a Ph.D. degree in chemistry, has been awarded a one-year \$2,500 grant from the Eastman Kodak Company.

Taylor, a native of Odessa, came to Tech in Sept., 1963 to begin work on his doctorate. He received a bachelor of science degree in chemistry from the University of Texas and also attended Odessa Junior College.

Taylor's grant is part of \$6,000 awarded to Tech's chemistry department as part of the company's education program.

The awardee, a member of the American Chemical Society, was a teaching assistant during his first year at Tech. Last year, he concentrated on research.

While at Odessa College, he received a Sears-Roebuck Foundation scholarship. Taylor also received a summer grant from the Robert A. Welch Foundation in 1964.

Taylor was included in Who's Who in Colleges and Universities. He also holds membership in Phi Theta Kappa national honorary.

Dr. Smith Will Visit Africa

Dr. Van Mitchell Smith, associate professor of history and specialist on African affairs, leaves Lubbock today on a month's tour to Africa.

Dr. and Mrs. Smith will be making their third trip to Africa and their second tour as members of the American Committee on Africa. Scheduled to leave New York City Tuesday by plane, the Tech couple will begin their tour at Dakar. After Senegal, the four weeks of travel will include stops in Ghana, Guinea, Nigeria, the two Congos, Rwanda, Uganda, Tanganyika, Kenya, Egypt and to Algiers before returning home by way of Paris the last week in August.

At many places Dr. Smith will have an opportunity to renew associations with government leaders, resident directors of projects and educators whom he met on previous trips in 1961 and 1964. He also will visit on the campuses of five African universities.

The current tour will be the couple's first time to visit Guinea and Uganda, their first glimpse of Lake Victoria, source of the Nile, and Dr. Smith's first opportunity to examine the situation in Algiers, a rather tense spot at the moment. Of particular interest to the West Texans will be a trip to the Volta River Dam in Ghana, a multi-million dollar construction project to provide water for arid regions.

Dr. Smith returned to Lubbock earlier this week from Austin where he was visiting lecturer at

ing their third trip to Africa and their second tour as members of the American Committee on Africa.

Speech Clinic Starts

Emphasis is on "learning by doing" at Tech's High School Speech Workshop currently underway.

Approximately 50 high school speech students are participating in the varied program including dramatics, declamation, debate discussion, extemporaneous speaking, poetry reading, radio and television experiences.

The two-week workshop, which began July 19 and ends July 31, is held in conjunction with the workshop in directing school speech activities currently underway at Tech for high school teachers in dramatics and forensics.

Dr. P. Merville Larson, head of the speech department, is director of the student workshop. The group is divided into two sessions, one on dramatics and one on forensics, with a maximum of 25 in each class.
