

**Bulk of Wheat
Going Under Loan**

COLLEGE STATION—Indications are that more than 90 percent of the 1940 wheat harvested in the major wheat counties of Texas will be placed under government loan.

Reports from county AAA offices and an inspection tour of the major counties indicate that nearly all the wheat producers in 123 Texas counties will take advantage of the loan offered by the Commodity Credit Corporation, P. C. Colgin, state wheat loan supervisor, predicted. During June, the first in which the loan was offered, 257 loans were made on a total of 205,436 bushels. The supervisor expects the amount of loan wheat to greatly exceed the 15,759-986 bushels, representing 10,807 loans, stored last year in both farm bins and warehouses.

Greater emphasis is being placed this year on the advantages of farm storage of loan wheat, and much of the wheat placed under the loan will be stored on the farm in counties eligible for that type of storage. Held over under the Extension of the 1939 loan were 187,452 bushels of wheat in farm storage.

Three main reasons why the loan is attracting more wheat this year than last were listed by Colgin: (1) the loan rate is equal to or a little above the current market price; (2) producers who availed themselves of the loan last year netted a profit by holding their wheat for a better market; (3) the loan makes it possible for the producer to realize some cash return immediately and at the same time keep possession of his wheat while awaiting a market upturn.

The upward trend in 4-H club enrollment in the United States which has been evident during the past few years was further accelerated in 1939 when 95,566 more boys and girls participated in 4-H club activities than in the previous year.

**Few Changes In
1941 AAA Program**

COLLEGE STATION—Few changes of importance to Texas were made in the 1941 AAA program as approved by the Secretary of Agriculture.

Such changes as were included were based on the recommendations of the national conference of farmer-committeemen and ranchmen held earlier in the summer.

Soil conservation and maintenance of adequate food and fiber supplies continue as the basic principles of the program, George Slaughter, chairman of the Texas state committee, declares, and still more latitude has been granted the county committees for adaptation of the program to fit local needs.

The \$20 minimum payment for each farm has been continued, the chairman pointed out, and an additional \$15 is available for planting trees. Thus, any farm can earn as much as \$35 by cooperating with the 1941 program.

In addition, on small farms where the maximum payment is not more than \$20, any part of the soil-building allowance may be earned by carrying out locally adapted conservation practices not included in the program where recommended by county committeemen. This provision will be applicable in designated areas only.

Encouraging feed production, the program provides that in areas where feed crops are not generally produced for market, any farmer may grow as much as 30 acres of soil-depleting crops without incurring a deduction for exceeding the total depleting acreage allotment.

In view of the substantial acreage reductions made by established cotton growers, not more than one per-

cent of the state's 1941 cotton allotment may be used for new grower allotments, a reduction from the two percent allowed in 1940. No payments will be made for cotton produced in 1941 on allotments for new growers, Slaughter said.

SANTA FE CARLOADINGS

The Santa Fe Railway System carloadings for the week ending Sept. 7, 1940, were 18,169 as compared with 18,511 for the same week in 1939. Received from connections were 5,844 compared with 5,355 for the same week in 1939. The total cars moved were 24,013 compared with 23,846 for the same week in 1939. The Santa Fe handled a total of 25,913 cars during the preceding week of this year.

Buck Ellison left with his parents Monday morning, for a week's visit with relatives in Las Vegas and Colorado.

Mr. and Mrs. I. L. Cone are living at an apartment until their new home is completed in Clovis.

Forrest Bell plans to leave the last of the week for school at Lubbock Tech.

Mrs. Eugene Gooch, Mrs. R. Snoderly, and Mrs. J. A. Parker visited Mrs. J. Armstrong last Friday.

Mr. and Mrs. Noble Glover are the proud parents of a baby girl, born Sept. 2nd.

Monk Horton and family moved to the I. L. Cone farm last week.

Mrs. Blanche Pierce has been staying in Clovis with her sister, Vivian Rogers, and receiving treatment for a nervous disorder.

Miss McCormick, primary teacher, was quite ill, Monday.

Bobby Finley was rushed to the hospital last week, suffering an attack of appendicitis, but an operation was not necessary, so he returned home.

The club ladies will entertain their husbands with a weiner roast at the home of Mrs. R. Snoderly, next Friday night.

Congratulations to Mr. and Mrs. Alvis Bell on the birth of a 7 1/4 lb. baby girl.

Grandma Jarrell was taken to Amarillo a week ago, but is not improving as fast as we'd like to hear. Jack Donehay was sick the first of the week.

50 THOUSAND YEARS

COLLEGE STATION—It took fifty thousand years of natural selection to produce the drought-resistant and nutritious perennials—the buffalo grass, grama grasses, big and little bluestems—on the Southern Great Plains.

Where they have been plowed under, man is beginning to realize the gigantic task nature had in growing them.

That, according to R. R. Lancaster, pasture specialist of the Texas A. & M. Extension Service, will be the theme of the Grassland Conference scheduled for Amarillo, Sep-

tember 5 and 6. In the scant span of a decade, scientists already are showing improvement on grasses nature took so long to produce, the specialist said before he left here to attend the meeting of technicians and ranchmen.

In its native state, buffalo produces both male and female species. Only female plants bear seed, and these will grow only when pollinized by a male plant. Scientists have already produced plants of a bisexual nature. Much progress has been made toward producing buffalo with upright seed stems—which will aid greatly in harvesting of seed.

Obtaining seed, however, is only one phase of the revegetation problem. Getting the grass started and keeping it protected while it gets the start are also problems.

The Amarillo conference, sponsored

by the Southern Great Plains Agricultural Council, is the fourth of five scheduled in the United States this summer.

FRIONA, TEXAS

**WARNING
Cream Producers**

Under the new Food and Drugs and Cosmetics Act that went into full force and effect on July 1, we have been warned by authorities as follows:

CREAM MUST NOT BE BOUGHT THAT IS CHEESY, MOULDY, YEASTY, FOAMY, RANCID, PUTRID OR THAT CONTAINS AN OILY FLAVOR.

We are convinced that the administration means business by this warning. Thousands of pounds of butterfat all over the country have been seized and destroyed.

- KEEP THE CREAM COOL
- KEEP THE CREAM CLEAN
- MARKET AT LEAST TWICE A WEEK and Preferably three times a week.

DO YOU KNOW that under the new federal food law the penalty when convicted of manufacturing butter out of old, cheesy, decomposed, filthy or unfit cream is a fine of \$1,000 or a year in jail or both, and the ante is jumped to \$10,000—three years in jail or both, if the violation is committed after a conviction for a prior offense—and to make a bad matter worse, the butter which is condemned is practically a total loss? It can only be sold for soap grease.

Please keep in mind we must refuse to accept cream that does not meet the requirements of the pure foods and drug and cosmetics act.

NOTABLE NEWS EVENTS IN PICTURES

FOUR OF A KIND—They gained fame when they were born, but new occasion has arisen. Badgett quadruplets are now aunts through birth of niece to oldest sister, Mrs. J. L. Jones, also of Galveston, Texas. They're Joan, Jeraldine, Jeannette and Joyce.

A RARE BLESSED EVENT—A rare event, which scientists say happens once in 100,000 times, occurred on Van Nuys, Cal., dairy farm as triplets were born to "Helen Dale Burk," prize cow.

Scarecrow Made Of Tin Cans

This unusual scarecrow was made by farmer J. Day, of Salinas, Calif., to protect his lettuce crop. Sally Johnson inspects the 'crow, made of tying tin cans to a revolving cross-bar which turns in the wind.

GETTING SET—September heat holds no fears for these college all-stars as they undergo training for game with Green Bay Packers in Chicago. On campus of Northwestern University, Coach Ed Anderson of Iowa demonstrated blocking with Stan Anderson of Stanford. Looking on are Nile Kinnick, Gren Lansdell, Bob Kellogg, Ben Kish, Ken Kavanaugh, Dom Principe and Vic Marino.

ASKING RAIN GOD FOR HELP—Twentieth Century version of the Indian rain dance—youngsters from New York Children's Aid Society beat tom-toms seeking relief from oppressive heat.

Army Mule Mustered Out

The cotton fields of Dixie will remain the stamping ground of this mule and 599 others purchased for the French army and left in Atlanta. The purchasing agents authorized sale of the 600 animals at public auction.

IT TOOK THE BEES—Neither rain nor sleet nor gloom of night, etc., can hold up the U. S. mail, but these bees did, for three days, in fact, as they camped atop mailbox in Sacramento, Cal. Pretty miss had to wait.

"ENGLAND EXPECTS EVERY MAN . . ."—London schoolboys do their bit in England's war effort. Using a home-made barrow, these youths collect scrap metal for war industries.

ROAD CLOSED—A street in Orleans, France, literally choked with debris, shows terrific blasting given town by Nazis' huge bombers.

FALL COCKTAIL SUIT—This black velvet, copper and gold embroidered cocktail suit worn by Hedy Lemarr was designed by Adrian. Pencil-slim skirt is topped by long jacket.

Our Boys and Girls

AUNT MARY, Editor, Route 5, Box 88, Fort Worth, Texas.

WHITHER OUR YOUTH

The boys and girls of America face a world somewhat different from the old order of things. Europe is now dominated by totalitarianism. Standards by which mankind have lived for centuries are swept away. England alone is battling to preserve democratic as against totalitarian rule. There is a wide gap between the two schools of thought. Totalitarian is the desire and opinion of one man ruling the desire and opinion of many. Democracy, on the other hand, lets the people rule, recognizes the right of each individual to have a say in the affairs of government.

I am afraid, we in America have taken our liberty too much for granted. We have permitted the other fellow to "do our thinking," have been lulled into a false sense of security and self-sufficiency. During the next year we will hear much about patriotism, but we must distinguish between "flag waving" and true love of country. God has said, "Not all those who say, 'Lord, Lord,' are my true followers." The same is true of America; not all those who cry, "I love my country," really love it.

However, we can know the true patriot by what he DOES. Is he willing to make sacrifices of his personal comfort for the safety of his homeland? Will he criticize his government, the officials and others in high places only when he can offer constructive criticism? Will he show love and respect for the flag? Will he keep his body strong and mind clean that he might be ready to defend his country against an aggressor? Will he reverence God and hold to the ideals God has set forth in His great book? He will do well who lives by these ideals today.

Love to all,
(Signed) AUNT MARY.

TELL US ABOUT YOUR VACATION

It would be very interesting to know what my readers have been doing during the summer months. I am sure many of you have had grand trips and experiences. Wouldn't it be fun to share those experiences with your neighbor? Of course, by your neighbor I mean all the readers of this page. Send in your letter now about your vacation. We would like to print it on this page. Address Aunt Mary, Route 5, Box 88, Fort Worth, Texas.

Here is a letter from Bennie Maddox, Route 2, Italy, Texas.

"Would like to tell you about a trip I took to San Antonio with my brother and his wife. We went there in July. The scenery was beautiful. Going there we bought a watermelon in Austin which we enjoyed very much. On arriving in San Antonio we found a nice place to stay and then went to a show. The next day we visited Randolph Field (one of the largest airplane fields in the United States). We also went to Fort Sam Houston. I thought Breckenridge Park was the most beautiful place I had ever seen. The day we started home we got up early and stopped at New Braunfels for breakfast. As we passed through Austin we stopped and visited the capitol building. We went up to the dome and it was really a beautiful sight. I certainly enjoyed my trip and I was glad my brother took me with him and his wife. I live on the farm and am a girl twelve years old."

Thank you, Bennie, for your nice letter. I am sure your many friends can travel right along with you when and if they read this account of your trip. We are grateful that you were willing to share with us your good time. I hope to receive many more letters about a trip or some interesting summer experience you might have had at home. Write me real soon.

Kiddies-Can-Do-It My Uncle Cobb Shinn

UP in the Clouds. is a very good title for the picture that you are going to make. Starting with a circle you build on to it and around it. The first thing you know you have made a drawing of a balloon. Then add the clouds and birds. If you like, use your water colors and crayons to color it.

FRIENDLY HOBBY CLUB

I am proud that the membership of the club has increased during the summer. We have nearly a thousand members in our Hobby Club at this time. I wish we might have more Charter Chapters in different towns. If you are now a member, send in for plans to organize such a club. It's lots of fun being the President of a Hobby Club and it makes you many more friends. Why not send for this information today? Merely send us the request along with a stamped, self addressed envelope and we will send you full particulars.

Club Rules

1. There are no fees or dues now or at any time.
2. All that is required is for you to fill out the coupon below and mail it at once to Aunt Mary, Route 5, Box 179-B, Fort Worth, Texas.
3. You will receive your membership card, list of instructions and secret code as soon as we get your coupon.
4. You may join as many as three departments, but NO MORE. The departments are as follows: (A) Friendly Correspondence, (B) Sunshine for Others, (C) Stamp Exchange, (D) View Cards, (E) Miscellaneous, (1) Coins, (2) Curios, (3) Souvenirs, (4) Butterflies, (5) Clippings, (6) Books, (7) Postmarks and (8) Magazines.

HOBBY IDEAS

A doll is the oldest and best-loved companion from Toyland. It has also proved to be one of the best liked subjects for collectors. Here are a few suggestions for some unusual character dolls that hobbyists may add to their list.

For a RAG DOLL take a strip of cloth four inches wide and a yard and a half long and toll it fairly snug. This stands for the body. About an inch from the top is tied a thread to make the neck. Above this make a face on the cloth with paints or crayons. Now (Continued top next column)

Here is a picture of a new member with her pet calf. She is ANNE DAWSON, age 10, of Texhoma, Oklahoma. The name of the pet is Sparkler. Welcome to the club, Anne. Give Sparkler some oats for us.

make four smaller rolls and sewing on two for arms near the neck and the other two on the other end of the body for two legs. The doll is now ready to have her clothes made and put on. On the head sew a mass of black thread raveling which will look like curly hair, especially when a hair ribbon is tied on. Sew a small piece of black cloth on the bottom of the feet to look like shoes.

Clothespins can be very lifelike if handled properly. Make a boy and girl clothespin doll each. Water-color paints will make the faces and also paint the boys' suit of clothes right on the wood of the clothespin. The girl's dress is easily made and fastened to the neck of the clothespin as well as tied in at the waist line. The hat is glued to the top of the pin. A suggestion for Halloween favors would be like the clothespin doll dressed in yellow and black crepe paper.

A witch doll can be cleverly made by taking a candy lollipop for a foundation. Take a piece of medium-weight paper, cut it in circular fashion and tie to the stick a short way down from the end. The paper should come to the end of the candy part and give it balance so as to stand up. On top of the stick put a marshmallow on which has been marked a face with hot chocolate. Make a yellow crepe-paper dress, tying it around the neck and waist. Over this put on a black crepe-paper cape. Tie a few whicks for the broom into a tiny brush and place on a toothpick. Stick this into the front of the dress. The hat should be made of black paper, pointed at the top and with a brim. With small black streamers tie this hat on a marshmallow head. Though this doll is ferocious-looking, she is very good to eat and would make a nice place gift at a dinner party.

LAST GREAT UNKNOWN REGION

Scientists and foresters are getting ready for exploring the last great unknown region of the United States—a region where animals and birds have never laid eyes on a man, where the sun never shines on some of the ground, where shrubs grow so thick it is impossible to walk, and where even crawling is difficult.

No, this wilderness is not buried in the depths of the Rockies—it is scarcely more than an hour's ride from the important cities of Ashville and Knoxville, and only 12 hours ride from Washington. Some 150,000 acres of this virgin forest lie along the boundary between North Carolina and Tennessee in what is now the great Smoky Mountain National Park.

That such a wilderness ex-

ists is known to few men, while no man has ever fully explored its depths. A forester who has cruised timber in this jungle estimates that there are 75,000 acres of forest as unspoiled as when Columbus first discovered America.

One hundred different kinds of trees have been found in the park, 150 species of shrubs, 563 different kinds of flowers, 200 kinds of birds, and 35 kinds of animals and reptiles, including deer and bear.

In this jungle are spruce trees 175 feet high and estimated at 600 years old. With the spruce stand hemlocks seven feet in diameter, and beneath these larger trees, birch forms almost a solid canopy, while rhododendron 25 feet tall grows so closely between the trees that pas-

sage is impossible to a man without first clearing the way.

The Federal government is now protecting this mountain wilderness against fire, the ax and the hunter. It is also building new roads and bridge paths so that Americans can enjoy the untamed beauty of our newest national park without too much roughing.

Folks looking on this vast expanse of untamed nature can have a better appreciation of the quality of the early American stock; for it should be remembered that the entire United States was such a wilderness 300 years ago, and that the orderly and more or less civilized country we now live in was carved from raw nature.

I can do all things through Christ which strengthened me. Phil. 4:13.
