General Seeks to Relieve Drain Upon Farm Labor

Urges Draft Boards to Consider Deferments; Lack of Boats Limits Shipments Of Foodstuffs to England.

By BAUKHAGE

National Farm and Home Hour Commentator.

WASHINGTON. — You would be surprised at the people in Washington who are worrying over the farmer's worries which have been increased by the emergency. The chief worries are two: The drain of farm labor caused by the draft and the demands of the defense industries; the inability, because of defense priorities, to get the labor-saving devices which the farmer needs to replace human hands.

In a top-floor office of a converted apartment house overlooking the Potomac I found a sandy-haired Hoosier who is doing some of that worrying. He is concerned with the problem of "maintaining an adequate supply of farm workers for production of essential foods required for national defense."

He did not write those words just quoted. Secretary of Agriculture Wickard wrote them. The sandy-haired gentleman is not even in the department of agriculture. He is a general in the army. What is more he is head of the organization which has been drawing "heavily upon the supply of farm labor." He is Brig. Gen. Lewis B. Hershey, acting director of the Selective Service system.

But that is only half the story. Lewis Hershey is farm-born and farm-bred and although his official duties are concerned only with the selective service, he is unofficially

BRIG. GEN. HERSHEY

familiar with the other problems which affect the farmer.

The draft is his business and he has told draft boards all over the country to give "serious consideration to individual claims of men engaged in agricultural pursuits for occupational deferment from military training."

Farm Workers Important.

"One reason why so many young fellows are in the army today instead of working in the fields," said General Hershey to me, "is because even the farmers on the draft boards, when a husky lad comes along and says he is willing to join the army do not realize how hard it will be to replace him.

"It is a lot easier to teach a young town boy the skills so he can replace a man taken away from the production line in a factory than it is to teach him how to farm," said the general.

"You can't just tell a green hand to hitch up the wagon and go down and get a load of corn. You know yourself that a farmer can do in three hours what it takes a green hand 10 hours to do.

"It's hard enough to keep the boys on the farm anyhow these days," the general went on. "They don't like to stick their noses into the hot side of a cow in July when they can get a job in a factory, work until five o'clock, and then get off and go to the movies. They soon get enough cash to make a down payment on a car and the first time they come home in it to see the folks they take two or three other young fellows from the neighborhood back with them."

But somebody has to feed the factory workers and the soldiers.

"We have got to have food," General Hershey concluded, "and the draft boards will have to learn to answer the question: Where can we get another man to replace the farmer

worker before they accept him for military service."

When Lewis Hershey talks about trying to replace a man on the farm he knows what he is talking about. He still owns a farm—his share of what is left of his Mennonite grandfather's original 360 acres in Steuben county, Indiana.

Grandfather Hershey came to Steuben county from Pennsylvania whither his ancestors had immigrated from Switzerland in 1708.

Twelve hundred men out of Steuben county, Indiana, left the plow to go to the Civil war. One out of six came back to the farm. It was natural that young Lewis Hershey, back in 1911 joined the national guard. You may remember the national guard went to the Mexican border in 1916 and it was only a jump from there to France. That jump took young Lieutenant Hershey away from the farm but his roots are still there and he still talks the language. He knows the farm is a vital part of our defense.

Food for England Waits at Docks

Another problem of the emergency is feeding the British.

There was some consternation expressed in the department of agriculture when it was learned that the first food ship from the United States under the lend-lease law did not arrive in Britain until almost three months after the bill had been passed. Reports from London reflected this surprise, too. It was suggested there that perhaps the United States might institute cheeseless and creamless days in order that Britain might be supplied.

The ship carried 4,000,000 shell eggs, 120,000 pounds of cheese and 1,000 tons of flour. This seemed a drop in the British food bucket.

But the records now reveal that the department of agriculture had \$70,000,000 worth of food on or near the docks and has had ever since shortly after the lend-lease act became a law. The trouble has been lack of ships.

There has been some surprise, too, over the fact that shell-eggs, which might be considered almost as perishable as shells, were sent instead of powdered eggs.

Lord Woolton, food minister, who met the ship, tasted the cheese when it arrived and said it was quite as good as the English cheddar. He did not taste the eggs and some folks wondered — for they were NOT shipped cold storage.

Radio Artist Works His Own Farm

Information grows in the strangest places in Washington. The other day I learned a lot about moles and how to feed yourself from your own farm from Bud Ward. Of course, the information did not cover sugar and coffee growing, nor, in this case, meat, though Bud tells me he will have plenty of pork by spring besides what he is going to sell.

I forgot to say who Bud is. Well, I will tell you later. He has a farm over in Virginia. It's the kind of a place that people stop to look at when they are out driving.

Bud does all the work with the help of Mrs. Ward and the baby, Amelita.

She is not a baby any more, the way I first knew her. Now she is a young lady and pretty enough to make any star of stage or screen or radio envious.

Bud says the family had a surplus of fruit and vegetable and chicken to put up over 500 cans—that is glass jars—of food last year.

"Sometime," Bud told me the other day, "we put up 25 or 30 cans in the evening, after we get home from the studio."

And that reminds me. I was going to tell you who Bud is. Well, he and Mrs. Ward and Amelita run one of the most popular weekly programs in Washington. In fact they have two, and one annual, international blue network show, "Congressional Children."

The "National Children's" program is weekly and it consists of children—and I mean children—little tots some of them who can hardly talk.

All three of the Wards have their part in running these programs.

Oh, the moles! Well, I have to let that go until next time.

GOVERNMENT PAYDAYS

Twice a month 167,000 Washingtonians have money in their pockets — on government paydays. A large number of these people who know that they will be pensioned at 60, or after 20 years' service, are affected the same way and the first thing they do is make for the bank. Some of them just deposit their checks. Others cash a goodly share of them.

And then they make for the stores. You can imagine what happens to Washington's shopping district. With millions for defense and a

Summer Play-Clothes Program Conveys Exciting Fabric News

By CHERIE NICHOLAS

PLAY clothes! Let's talk about play clothes for the theme is a most fascinating one. More triumphantly, more spectacularly than ever before in the annals of fashion lore are the designers answering the challenge for play clothes that will add to the picture of golfing, tennis, hiking, swimming, motoring, and all the other sports that go to make perfect days of outdoor playtime.

A significant thing about modern play clothes is that they have a way of making one keenly fabric-minded. That saying about necessity being the "mother of invention" applies perfectly to modern play clothes' fabric production. Scientific processing is achieving materials that are as near 100 per cent perfect as is humanly possible in the matter of washability and wearability which are guaranteed to be practically non-fading, non-shrinking, non-wrinkling and all the other qualities demanded for apparel that must withstand the ravages of strenuous wear.

It is interesting to note the rise to high style distinction that is taking place among fabrics once considered of low degree. There's denim, for instance, once synonymous with commonplace workaday overalls, now playing a star role as media for the smartest tailored suits that a socialite in the smart set might don this summer in town or for country club wear. By the way, when you go shopping in the sports departments take a look at the swank slacks and shorts made of yellow denim. Top these with a vivid calico-patterned print blouse or a jacket quilted of bright figured glazed chintz and you will rank high in any fashion parade.

Carrying her tools in the pockets of a blue denim culotte outfit the pretty young miss pictured to the left in the illustration of smart play clothes is tending her flowers in most picturesque attire. Note the cotton braid trim that adds a dash

of color to the huge pockets and the wide shoulder straps. A bolero to protect her shoulders and a quilted apron to protect her knees are also included in this cunning outfit.

The pinafore pair shown in the background will cheer the heart of every mother and daughter. These pinafore types should be an inspiration to home sewers in that they are so easy to make. The professional looking nicety of the edge seaming is achieved in a jiffy with a little edge stitcher found in every modern sewing machine kit. The full gathered finish given to the back-buttoned skirt is only a matter of minutes with the gathering foot attachment. The same material is used for both—a striped denim. The two outfits cost but a trifling sum to make, they promise much joy in the wearing and besides mother-and-daughter costumes are fashion's pet theme this year.

Up to the last season or so the great problem with fabricists has been to produce white materials that will come out of a brisk tubbing or cleaning process as white as when new. Welcome comes the message of white rayon pique sharkskin which is proving ideal for tennis frocks and for white suits and afternoon dresses. It is this snow-white pique sharkskin that is used to make the tennis frock shown in the foreground of the group pictured. Here is a fabric that is sure to stay in top form, having been tested and approved for wearing and cleaning satisfaction. It adds an exciting note of interest because this dress was designed by Alice Marble, national tennis champion, making it authentic news as to what's what in smart action fashions.

(Released by Western Newspaper Union.)

Chintz Housecoat

Enthusiasm for cottons in the fabric realm has crescendoed to a new high this season. The importance of cottons in the fabric realm is simply breath-taking not only because of the transcendent loveliness of cotton weaves but there is no call of the mode be it ever so humble or an event ever so festive and formal but that there is a cotton fabric that will tune into the picture perfectly. Moss roses never looked prettier in real life than they do on the cotton chintz housecoat pictured. The graduated border idea of the print makes it possible to achieve interesting effects at the shoulders and waist and in the skirt.

Non-Crushing Fabric Made From Cotton

In these vacation days of outdoor activities and week-end trips more and more the desirability of clothes made of non-crushing and non-wrinkling wash materials is recognized.

A cotton that has come valiantly to the rescue is the new boucle weave and designers are certainly making wide use of it in dresses and in suits. You just tub it, shake it out and let it dry and presto! It is all ready to wear looking as fresh and as well groomed as new.

Dressmaker Bathing Suits

Recall Fashions of 1890s

The fashion trend in bathing suits is to dressmaker effects done in most any material one might choose. Taffeta is especially good style; so is flowered or striped jersey. The knitted suit is a particular favorite. So definite is the dressmaker styling that one is reminded of fashions that held forth in the gay nineties. The difference between "has been" and modern styles is found in shorter ruffled bloomers, shorter (much shorter) skirts and open midriff effects.

In elastized types the princess silhouette is a favorite and even newer is the one piece ballerina elastized satin types. The Hawaiian influence is seen in large floral effects.

Knitted Cape

As everyone knows, fashion's spotlight is on capes and the vogue will continue during the fall and winter. The latest reaction to this trend is the enthusiasm, expressed for capes in the knitted realm. Why not begin to knit now so as to be among the first to come out in a knitted cape this fall. You can buy capesuits now that look as if hand-knit if you prefer.

Bovina Happenings

Mr. and Mrs. Oscar Venable and daughter, Sarah Marie, visited in the Vester Venable home in Texico, Sunday.

Mr. and Mrs. J. T. Hammonds were business visitors in Farwell, Monday, where Mr. Hammonds received medical care.

Several people from here attended the celebration at Buffalo Lake, Sunday. Among them were Aubrey Brock, Chester Norton, and others.

Mr. and Mrs. William Hastings and sons moved back to Clovis, Monday, where they will make their home.

Mr. and Mrs. Bob Johnston were business visitors in Amarillo, Monday, attending a meeting of grain dealers.

Ezra and Ernest Englant, and their families, were called to the bedside of their mother, in Lubbock, Saturday evening, where she is seriously ill.

Mr. and Mrs. Buck McCuan and daughter, Faye Dell, left Sunday for a vacation.

Mrs. W. O. Cherry and children left Saturday for a short vacation to visit relatives.

Joe Langer and son, Fred, were Farwell business visitors, Wednesday.

Mr. and Mrs. Buren Vassey visited

her mother, Mrs. W. B. Beech, in Hereford, Sunday.

Hinton Blalock returned to his home here Saturday, after working the past few weeks in Friona.

Jack Carr, of Amarillo, was a business visitor here, Wednesday.

Mrs. Oscar Venable, Sarah Marie, Elton Venable, Marie Langer and Mr. and Mrs. Chester Venable and children were Clovis shoppers, Wednesday.

Mr. and Mrs. J. T. Hammonds were visitors in Farwell, Tuesday evening. Mr. and Mrs. Herbert Potts have moved into one of the Cash Richards residences.

Miss Dortha Hopingardner, who is employed at Farwell, visited her parents, Mr. and Mrs. Jay Hopingardner, the past weekend.

Mrs. Aubrey Brock and daughter, Nina Jo, were Clovis shoppers, Wednesday.

Fred Henry and Aubrey Brock went fishing at Fort Sumner, Sunday. Mr. Brock, experienced fisherman, didn't make a catch, while Mr. Henry, who never fished much before, made a good catch.

Mr. and Mrs. French Crook and family, who have been employed at Deming, N. M., have returned to their home here for a few days, and will then visit relatives in Kansas.

Ovy Sisk, who has been employed in Florida for the past few weeks, returned here, Thursday.

Miss Gwen Rhinehart, who has been attending school at Albuquerque, is visiting her parents, Mr. and Mrs. O. W. Rhinehart.

J. C. Denney is on the sick list. Mrs. Bud Queen left Wednesday for a trip to Clifton, Arizona.

Mrs. Pete Queen, of Fort Sumner, visited friends here, Wednesday.

Mr. and Mrs. Walter Free, of Denver, Colo., visited in the G. E. Free home over the weekend.

Mr. and Mrs. Rouel Barron and son, Don, Mr. and Mrs. Dick Free, Mr. and Mrs. G. E. Free, Mr. and Mrs. Walter Free visited Troy Free in Amarillo, Sunday.

Floyd Englant and family, of California, arrived here Sunday to visit his parents, Mr. and Mrs. Ezra Englant.

Mr. and Mrs. Otis White, of Hereford, visited here Monday.

Bobbie Kelley visited over the weekend at Hereford.

Mrs. J. D. Wilkerson of Hereford,

visited here Tuesday.

Mr. and Mrs. A. S. Holmes and family are visiting in the Chink Green home in Portales, this week.

The grandchildren of Mr. and Mrs. Will Parker are visiting here this week.

Elton Venable and Miss Marie Langer were Clovis visitors, Sunday.

OKLAHOMA LANE

Bridal Shower Given

A very lovely bridal shower was given in the home of Mrs. Joe Donelson, Thursday, honoring Mrs. Bill Johnson, nee Miss Helen Bolton. Hostesses were Mesdames Harold Carpenter, Sam Sides, Sterling Donalson and Miss Ruth Donalson.

Various games were played and contests held. Mrs. Sterling Donalson presided over the bride's book. Refreshments of ice cream and cake were served to: Mesdames Will Foster, E. F. Johnson, James Roach, Jack Roach, Sam Sides, Joe Donalson, H. C. Atkins, Joe Roberts, A. B. Wilkerson, Ellis R. Barry, D. W. Carpenter, Hugh Tucker, Bill Hubbel, C. L. Evans, Sterling Donalson, Joe McWilliams, Harold Carpenter, Frank Hromas, L. Grissom, Levi Johnson, Johnnie Gennings, Martin Kreigel, Ed Meeks, W. E. Verner, Joe Bacon, Charlie Summers, Jim Billingsley.

Misses Margaret Ellen Billingslea, Glenna Roberson, Joe Veta Billingslea, Billie Jean Roach, Carrie Etta Grissom, Betty Rose Johnson, Geraldine Verner, Lola Grissom, Frances Roach, Bessie Ruth Caldwell, Evelyn Hromas, Ginger Massongill, Mary Foster, Atla Norton, Loraine Hromas, Ruth and Louise Donalson, Ruby Mae Barber, Edith Roberts, Rita Wilkerson, Ida Jean Berry, Jenny Bolton, Ruth Bolton.

Those sending gifts were: Mesdames Arthur Bolton, Gail Hendrickson, Ernest Hromas, Ernest Foster, C. A. Johnson, Sam Billingslea, Robert Rundell; Miss Ernestine Foster.

Mr. and Mrs. David W. Sides and children, who have been visiting relatives and friends here for the past ten days, returned to San Antonio, Friday night.

Mr. and Mrs. H. C. Atkins have moved to the Lester Norton house in Texico.

Health Notes

By Texas Department of Health

AUSTIN—National defense training courses in water and sewage plant operation are now being offered as part of the curricula in the University of Texas, A & M. College, and Texas Technological College, according to Dr. Geo. W. Cox, State Health Department, as a national defense measure, and are tuition-free.

The courses provide three months of full-time training for water treatment and sewage plant treatment operators. The courses were designed to meet the need of additional trained water workers and sewage operators to serve in municipal plants and in the plants of military and naval establishments.

The courses include instruction in principles of water treatment, sanitary water analysis, water treatment, plant operation, principles of sewage treatment, sewage analysis, and sewage plant operation. Practical application of sanitary problems is being stressed, and much of the course has been designated as laboratory work in the water and sewerage plants of nearby municipalities.

That each student may obtain the maximum benefits from the defense course, enrollment has been limited to fifteen students per school.

"The State Health Department wishes to commend the University of Texas, Texas A. & M. College, and Texas Technological College for their cooperation in making these courses possible, thus supplying trained professional water and sewage plant operators at a time of national emergency when the need for such personnel in Texas is particularly great," Dr. Cox concluded.

age plants of nearby municipalities.

LEGAL NOTICES
THE STATE OF TEXAS
 To The Sheriff Or Any Constable
 Of Parmer County, Greeting:

You are hereby commanded to summon the unknown heirs of Isabel Fennel Jones, deceased, and their heirs and legal representatives, to appear at the next regular term of the District Court of Parmer County, to be

held at the courthouse thereof in the town of Farwell, on the second Monday in July, A. D., 1941, being the 14th day of July, A. D. 1941, then and there to answer a petition filed in said court on the 9th day of June, A. D. 1941, the file number of which is 1222, in which suit Lee H. Sudderth is plaintiff, and the unknown heirs of Isabel Fennel Jones, deceased, and their heirs and legal representatives, are defendants, the cause of action being alleged as follows:

Plaintiff alleges that on the 1st day of April, 1941, he was and still

is owner in fee simple of the following described premises, to-wit:
 The Northwest Quarter (NW¹/₄) of Section Thirteen (13) and the Northeast Quarter (NE¹/₄) of Section Fourteen (14), Township Nine (9) South, Range One (1) East, in Parmer County, Texas.
 That on such date the defendants unlawfully entered upon such premises and disposed of them.
 Plaintiff prays for his damages, for title and possession to his land and for general relief. His suit being a straight suit in trespass to try title.
 You are hereby commanded to so summon the defendants, and to serve this citation, by making publication of such citation once in each week for four consecutive weeks previous to the return day hereof, in a newspaper published in your county; but if no newspaper is published in said county, then in the nearest county where a newspaper is published.
 Herein fail not, but have you before said court, on the said first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.
 WITNESS, D. K. ROBERTS, Clerk of the District Court of the County of Parmer, State of Texas.
 GIVEN under my hand and the seal of said court, in the town of Farwell, this 9th day of June, A. D. 1941.
 D. K. ROBERTS,
 Clerk of District Court,
 Parmer County, Texas.

A cooperative hospital at Amherst offers hospitalization service to families in that vicinity at a cost of \$25 per year for four persons it will serve 200 families.

TEXAS RATES HIGH AS SHORTHORN STATE

Fifth in the nation last year and seventh for the first 6 months of this year is the record of Texas as a Shorthorn state as determined by the number of new members in the American Shorthorn Breeders' Association, Chicago, Ill., according to word from the Association office.

Though the same states as last year are represented in the high 10, only the first three—Iowa, Illinois and Indiana—repeated their last year's winnings. Pointed out is the even distribution of new business among leading states, there being a difference of but 13 new members between fourth and tenth position.

The top 10 states in new memberships are: (1) Iowa, 58; (2) Illinois, 57; (3) Indiana, 50; (4) Oklahoma, 53; (5 and 6) Missouri and North Dakota, 31 each; (7) Minnesota, 28; (8) Texas, 26; (9) Kansas, 25; (10 and 11) Michigan and Ohio, 20 each.

Says Shorthorn secretary H. J. Granlich, this year is seeing the most new members, the most sales, and the most pedigree recordings for the breed in over a decade. Up to May 1, 539 new memberships have been received, which is a 7 percent increase over last year's sensational 74 1/2 percent increase over the year before.

Pedigree recordings for the first half of the year are coming in, at a 12.3 percent greater clip, and transfers, which are the index of business being done by breeders, are up a substantial 19 percent over the very good 1940.

Even more significant of trends in the livestock industry, thinks Granlich, is the fact that the total 1940 income from Shorthorn public auctions exceeded by 43 percent the figure for 1939. Last year those stockmen who held auction sales gained a total of \$200,000 more than in the previous year, yet prices remain on a soundly profitable basis for both buyer and seller.

MILK The Most Nearly Perfect Food

NO ONE EVER OUTGROWS THE NEED FOR MILK

BETTER SAFE THAN SORRY

By Jason O. Gordon
 County Extension Agent

The farm manager who adopts the slogan "Better Safe Than Sorry" in the production of clean, wholesome milk, need never worry about that phase of his farm business. The production of good, clean milk should always be the first consideration, because the family uses milk and milk products for food.

The cow is responsible for producing good milk. It is the duty of the "milker" to see that (1) the cow is clean, (2) the place where the cow is milked is clean, (3) the milk pail and storing cans are clean, and (4) his hands are clean. The job of milking the cow has always been a difficult task, and most people do not stop to think that health is being endangered when he neglects the many factors that make up cleanliness. The four named above are merely suggestions. There are hundreds of things that make good or poor milk.

The body of the cows, especially those parts of the belly, flanks and udder that are just above the milk pail, should be carefully cleaned with a good brush. Carefully wipe the udder, teats, flanks and belly with a clean, damp cloth. This is done to be sure all dust is removed.

The stall where the cow is milked should be cleaned daily. A regular stall or shed should be provided to milk in, and the cow should not be allowed to enter this stall except at milking time. A few minutes work before each milking time will be necessary to keep the stall perfectly clean.

A small-top pail should be used to prevent dirt from falling into the bucket. This also prevents the cows' tail from becoming wet with milk, then a slap in the milker's face. Plenty of scalding water should be used freely on all milk containers before using them.

Many times the person doing the milking will mix up each cow's feed, then start the milking process. If all other points of clean milking are to be carried out, the person doing the milking should see that his hands are clean. Plenty of soap and warm water will do the job. Dry the hands and milk the cow with "dry teats." The use of water, of milk, to moisten the teats while milking, encourages SORE TEATS. Once the habit of "dry milking" is formed, the milking process becomes much easier.

The health of the cow determines the health of the family. Our first thought may seem to cover a lot of territory, but it is a proven fact that Bang's Disease in cattle causes Undulant Fever in people. If the dairy cow is fed the right kind of feeds she may maintain her health, and build up a resistance for contagious diseases of all kinds.

Yes, MILK IS THE MOST NEARLY PERFECT FOOD—IF man will do his part to make it CLEAN.

SANT' FE CARLOADINGS

The Santa Fe Railway System carloadings for the week ending June 14, 1941, were 22,316 compared with 19,211 for the same week in 1940. Received from connections were 7,051 compared with 5,106 for the same week in 1940. The total cars moved were 29,367 compared with 24,317 for the same week in 1940. The Santa Fe handled a total of 30,089 cars during the preceding week of this year.

1 FILL LASTED 13,398 MILES - Certified

Then how long is a quart of this great New Motor Oil?

STRAIGHT FROM SIZZLING DEATH VALLEY COMES YOUR ANSWER...

The lock-guarded engines of 6 coupes faced the Death Valley desert with oil exactly up to "Full." Not a drop could be added. The destination of all 6 identical everyday engines was ... Death!

Here were 6 high quality motor oils getting the same strictly fair opportunity to show how long they'd let an engine live on one exact fill and no more.

Down in Death Valley—hotspot of the U. S. A.—every car sped at 57 miles an hour, till its oil gave out and the engine smashed. The brand of oil that used up quickest was outlasted 8,268 miles by a revolutionary new oil in this impartial, certified test. This new oil exceeded the average mileage of the other 5 oils by all of 7,057 miles! Certified. This longest-lasting oil in the test, which your car can have today—at popular price—is new

IMPARTIAL

Latest available products of 5 leading competitors bought retail by Referee.

New everyday coupes used—identical. Broken-in alike. Engines taken apart for Referee—to assure uniformity.

Cars tuned alike. Same Death Valley route for all. Drivers rotated to even up on skill.

One fill per car. None added. Engines under lock—under scrutiny—every mile.

CONOCO Nth MOTOR OIL with its Man-made new Economy aid

The record long life that defied Death Valley comes from a new laboratory creation ... man-made ... called *Thialkene inhibitor*. Its action in some ways suggests Vaccination—which puts the right protective substance on guard to keep a trouble from even starting on you.

The trouble aiming to start on motor oils lurks in the engine's normal firing. Filth is formed that tends to start the oil "festering." First one drop spoils—then two drops "catch it"—then four—then sixteen—faster, faster, FASTER. Soon oil stamina is sapped; the engine suffers, and cries for quart after quart ... but not

when the worst of this "festering" attack is nipped in the bud—inhibited—by the life-giving *Thialkene inhibitor* in new Conoco Nth motor oil.

Now you'll never rashly exceed the proper oil-change period for your car and driving conditions—any more than you ignore traffic rules just to "get away with it." But Certified Proof from the desert that new Conoco Nth could outlast the other oils in the test by as much as 161%, gives you more than mere hopes of long Summer mileage between quarts. Change to Conoco Nth—at Your Mileage Merchant's Conoco station ... today. Continental Oil Company—Pioneers in Bettering America's oil with Synthetics

AND CONOCO Nth OIL OIL-PLATES YOUR ENGINE!

Long the keystone of Conoco success, OIL-PLATING comes from another great Conoco synthetic ... man-made under the famed Germ Processed oil patent. By magnet-like action, OIL-PLATING is bonded to inner engine parts. Then it can't all drain down—not even overnight—not while you're using Conoco Nth. So OIL-PLATING is on guard against wear in advance! ... and helps mileage, as it did in Death Valley. An OIL-PLATED engine is one more economy you get from a change to popular-priced new Conoco Nth oil.

CONOCO Nth MOTOR OIL

CERTIFIED I hereby certify that the Death Valley Test and related work were thoroughly and fairly conducted. Engine Destruction occurred in each case at the mileage stated.

Mrs. Floyd Bocox and children left Saturday for Oklahoma to attend the funeral of her sister.

Mrs. J. Smith, of Dallas, arrived last Friday to make an extended visit with her son and family, Gordon Smith.

The Methodist church had its picnic at the park Sunday afternoon, but due to the rain, had to leave sooner than planned.

Mr. and Mrs. Willie Hett and son, Bobby, of Ferris, Tex., and Mr. Hightower and Mrs. Norwood and daughter, of Electra, came in Sunday evening and surprised Mr. and Mrs. John Hightower with a short visit. They returned home Tuesday.

Mrs. Floyd Martin spent Saturday with home folks in this community.

Mr. and Mrs. Fred Kays are expected in this week for a short visit with his parents, W. P. Kays.

Little Mona Barnes is spending this week with her aunt and uncle, Paul Barnes.

Mr. and Mrs. Alvis Bell spent Sunday with her parents, Mr. and Mrs. Spencer Jarrell.

About 6,640 bales of low grade cotton have been allocated to 21 manufacturers to be used in making high grade writing paper under the United States Department of Agriculture's cotton paper program.

LEGAL NOTICES

THE STATE OF TEXAS To The Sheriff Or Any Contable Of Parmer County, Texas, Greeting: YOU ARE HEREBY COMMANDED to summon, by making publication of this citation once each week for four consecutive weeks previous to the return day hereof in some newspaper published in Parmer County, Texas, if there be a newspaper published therein, and, if not, then in the next county where a newspaper is published, FRANK M. OTTO and wife, HEPSIE OTTO, CLIFFORD C. PATCHIN and wife, JESSIE PATCHIN, HARVEY W. HADDIX and his wife, or wives, the name, or names, of whom are unknown to plaintiff, W. D. JOHNSON and his wife or wives, the name, or names, of whom are unknown to plaintiff, F. W. JOHNSON and his wife, or wives, the name, or names, of whom are unknown to plaintiff, L. O. SMALLIDGE and his wife, or wives, the name, or names, of whom are unknown to plaintiff, the unknown heirs, devisees, and legal representatives of each and all of the aforesaid defendants, and the unknown heirs, devisees, and legal representatives of each and all of said defendants, to be and appear before the District Court of Parmer County, Texas, for the 69th Judicial District of Texas, at the next regular term thereof, to be begun and holden at the court house in Farwell, Parmer County, Texas, on the second Monday in July, A. D., 1941, same being the 14th day of July, A. D. 1941, then and there to answer the original petition of E. K. Warren & Son, filed in said Court on the 6th day of June, A. D., 1941, in a certain suit pending in said Court styled E. K. Warren & Son vs. Frank M. Otto, Et Al, No. 1221, on the docket of said Court, wherein E. K. Warren & Son, a Michigan corporation with a permit to do business in the State of Texas, is plaintiff, and Frank M. Otto and wife, Hepsie Otto, Clifford C. Patchin and wife, Jessie Patchin, Harvey W. Haddix and his wife or wives, W. D. Johnson and his wife or wives, F. W. Johnson and his wife or wives, L. O. Smallidge and his wife or wives, the unknown heirs, devisees, and legal representatives of each and all of the aforesaid defendants, and the unknown heirs, devisees, and legal representatives of each and all of the aforesaid defendants, are defendants, the nature of plaintiff's cause of action being as follows:

Plaintiff sues in trespass to try title, alleging that on or about January 1, 1941, it was lawfully seized and possessed of the following described real estate, situated in the Counties of Parmer and Bailey, State of Texas, to-wit:

The North 132 acres of Section No. 88 in Capitol League No. 585, in Block Y, of W. D. and F. W. Johnson's Subdivision No. 2, in Parmer and Bailey Counties, Texas,

holding and claiming in fee simple said property; that on said date the defendants unlawfully entered upon and ejected plaintiff from said premises and unlawfully withheld from it possession thereof to plaintiff's damage in the sum of \$264.00; that the reasonable annual rental value of said premises is the sum of \$264.00; that plaintiff holds title to said premises by virtue of regular and unbroken chain of conveyances from the sovereignty of the soil.

Without waiving the foregoing plea, plaintiff also pleads that it has title to said premises by virtue of the three year statute of limitation; also by virtue of the five year statute of limitation, and also by virtue of the ten year statute of limitation.

Plaintiff prays for judgment against each and all of the defendants for the title and possession of the above described premises, for its rents, damages, and cost of suit, for writ of possession, and for such further relief, general and special, in law and in equity, as it may show itself entitled to receive.

HEREIN FAIL NOT, but have you before said Court on said first day of the next term thereof, this Writ, with your return thereon, showing how you have executed the same.

GIVEN UNDER MY HAND AND SEAL OF SAID COURT at office in Farwell, Texas, this 6th day of June, A. D. 1941, which is the date of issuance of this writ.

D. K. ROBERTS, Clerk, District Court, 69th Judicial District, Parmer County, Texas. By: DOALVA WHITE, Deputy. (SEAL)

FARM STANDARDS GROW WITH REHABILITATION

Farm families in 47 West Texas counties, including Parmer county, with standard rehabilitation loans from the Farm Security Administration, have increased their average yearly net income 44 percent from \$549 to \$788, it is revealed by a nation-wide survey just completed in Washington, and comparing FSA borrowers' 1940 status with their condition before coming into the program.

Results of the survey were received this week by Frank Seale, county FSA supervisor, from Rex B. Baxter, state director of this agency's rural rehabilitation program.

Purchasing power of 4,435 standard rehabilitation borrowers in the 47 counties included in the survey was increased by \$1,082,521.

The families are making satisfactory progress in the repayment of their long-term loans. They have thus far paid \$3,555,622 into the Federal Treasury in loan installments out of \$6,688,57 borrowed, although much of the money does not fall due for four or five years.

Mr. Seale said the average FSA low-income borrower could not be considered a top ranking credit risk, since this agency makes loans only to families who cannot obtain adequate credit elsewhere.

"This repayment record is a tribute to the honesty and industry of needy farm people working with FSA," Mr. Seale declared. "There is ample evidence that the majority of them are getting back on their feet and becoming permanently self-supporting."

In large measure, Mr. Seale explained, much of the progress is due to the advice and technical guidance in sound farm and home management which accompanies each Farm Security loan.

On the basis of last year's operations, the average FSA borrower in West Texas produced \$300 worth of

goods for home consumption, as compared with \$155 before coming into the FSA program.

Home produced goods included 429 gallons of milk per family; 386 pounds of meat; and 255 quarts of vegetables and fruit canned for the winter.

In addition to the rural rehabilitation program, Farm Security is carrying out the Bankhead-Jones Farm Tenant Act, which provides a limited number of loans to competent tenants, to enable them to buy family-type farms.

During the first three years of this program, it was learned, FSA has made 79 such loans in West Texas. The purchase loans are made for periods of 40 years at 3 percent interest.

Another important phase of FSA's rehabilitation program, Mr. Seale explained, is the adjustment of the family's old debts.

"Local Farm Debt Adjustment committees are set up for this purpose. They have no legal authority to compel adjustments, but by bringing the farmer and his creditors together in a neighborly way, they usually are able to help both parties reach a friendly understanding and settlement."

Mr. Seale said this service is free to all farmers, whether or not they are rehabilitation borrowers and, he added, creditors as well as debtors may apply for assistance.

Farm Security, it was pointed out, offers many other kinds of help to low-income farm families, such as loans for community and cooperative services, whereby farmers can have facilities jointly which none of them could own individually; loans for water facilities purposes, and so forth.

"In making America strong," Mr. Seale concluded, "The Federal Government is not neglecting to improve living standards, health, sanitation and economic conditions of the low-income farm families. Farm Security, by assisting the low-income families in rural America, is contributing

LOOKING TO THE FUTURE

By JASON O. GORDON County Agent

BUG AMMUNITION

It is normal to expect a certain amount of damage from certain orchard and garden insect pests, but conditions are favorable this year for more trouble than normal. We better be prepared for an emergency fight.

CONTROL MEASURES are more effective than actual combat. A spraying or dusting schedule, properly followed, would be much more economical, and a higher percentage yield of fruits and vegetables would be realized. Too often we wait until the BUGS are doing damage—then expect the impossible of a given spray or dust.

To control CHEWING INSECTS, use a STOMACH POISON . . . on SUCKING INSECTS, use a CONTACT SPRAY.

Calcium arsenate or a dust containing 0.5 to 0.75 per cent rotenone which does not leave a residue poisonous to man, will control most of the common insect pests. These insecticides are of about equal value in controlling leaf-eating worms and flea beetles. Calcium arsenate is poisonous to man and MUST NEVER be used when there is danger of any poison remaining on the market product. A good rule to follow on the choice of a poison material is to use a rotenone dust when there is any question as to whether it is safe to use calcium arsenate.

To control LEAF-EATING WORMS use a spray mixture of 2 pounds arsenate of lead, 3 pounds of soap, and 50 gallons of water; or

calcium arsenate dust early in the season and a rotenone dust as the crop approaches maturity.

To defeat the harlequin bug, squash bug, cucumber beetle, and tomato fruit worm, use rotenone as a dust or spray. The rotenone should be used in combination with sulphur and the mixture should contain 0.75 to 1.0 per cent of rotenone.

Conditions are favorable for a fruit crop this year. Don't let the bugs pick your crop. Start a spraying schedule and follow it closely.

I have ordered some EXTRA SPECIAL bulletins that give detailed instruction for using poison materials in controlling insect pests. Why don't you call at the office for your copy? One of these bulletins is "Controlling Insect Pests of Grapes."

Have you bought your defense bonds yet?

CODSEN PRODUCTS

NEW MEXICO EASTERN GAS COMPANY
June 18, 1941

Dear Friends:

More than a million young Americans are now in military training camps. Many local men are included in this number. They have given up good jobs for twenty-one dollars a month . . . comfortable homes for tents . . . personal freedom for rigid army discipline.

These young men are making sacrifices in order that you and I may be protected. Some few of them are, or will become, officers. Most of them, however, necessarily will remain in the ranks, constituting the great democratic army of a great democracy.

Many of these soldiers will be coming home on leave from time to time for short visits. We should greet and honor all of them with as much enthusiasm as if they were Colonels or Generals. There is no place in this new democratic military service for snobbishness—no place for worship of high-sounding titles. The private soldier is doing just as much for us as is the high-ranking officer. His sacrifice is, in many instances, even greater. Isn't it up to us to realize this and to let the soldiers know we do realize it?

Sincerely

Albert S. Johnson
President

Texas Wheat Farmers Attain Parity Goal

COLLEGE STATION—For the first time since the early 20's when the farm depression hit American agriculture, Texas wheat farmers who cooperate with the 1941 farm program are going to reach their approximate parity goal on this year's crop.

"That's what the new Department of Agriculture wheat loan program, plus 18 cents for wheat parity and conservation payments, means to Texas wheat farmers," Fred Rennels, assistant state administrative officer in charge of the AAA office, declared.

Since wheat farmers approved marketing quotas by a majority of 80.8 percent in the national referendum May 31, with 94 percent voting favorably in Texas, the 85 percent of parity loan becomes mandatory under the law.

The wheat loan rate, which represents an average national loan value to farmers of about 98 cents a bushel, is based on the July 1 parity price for wheat.

The primary purpose in announcing the loan now, Rennels explained, is to give producers in the early wheat areas the same advantage producers in the later wheat areas will have. Wheat harvesting is under way now in some sections of the state and will reach a maximum volume in the next week or two.

The loans, as in previous years, will be made by the Commodity Credit Corporation, and the state and county AAA committees will be responsible for local administration of the program.

All growers planting within their wheat acreage allotments will be eligible for wheat loans on all the wheat they produce. Farmers who exceed their wheat allotments will be eligible for loans at 60 percent of the regular loan rate applicable to cooperating producers in that particular county on wheat produced on excess acreage.

The loans, with interest at 3 percent, will be made up to December 31 and will fall due April 30, 1942. The loans are callable on demand.

Loan rates to farmers are based on terminal rates, taking into consideration the location, handling charges, grade, and quality of the wheat.

The basic loan rate for Texas is based on wheat stored at Galveston, Rennels said. This rate, which has been announced previously, is \$1.17 per bushel on No. 2 hard winter wheat with the average loan value to Texas estimated at about 94 cents per bushel with added premium for protein.

The price will vary in different counties since the average freight rates applicable to various counties differ because of distance from terminals. For instance, the AAA official pointed out, No. 2 hard winter wheat in Dallam and Sherman counties will be 90 cents per bushel, while No. 2 hard winter wheat from Bell and Navarro counties will be 99 cents per bushel if the wheat is stored in the respective counties.

For all grades of yellow hard winter wheat, the loan value per bushel is 2 cents less, 3 cents less for light smutty wheat, 6 cents less for smutty wheat, and mixed wheat three cents less. The loan value for mixed wheat containing 10 percent or more of a class other than hard winter or red winter wheat may be obtained from the special representative of the Commodity Credit Corporation in the respective areas.

Other commodities benefiting from the 85 percent of parity program include cotton, tobacco, corn and rice.

Be loyal to home town interests!

AMBULANCE PHONE 1000

Johnson-Bayless
Funeral Home, 921 Pile, Clovis

had not made up their minds about their choice, now only 5 per cent admit they are uncertain.

The Governor, according to public opinion as recorded by the surveys in previous polls, was strongest early in May, before he had decided to enter the race. Until May 19, when he announced, other candidates had cut heavily into his following, Mann and Dies both being ahead of him. O'Daniel's plunge into the campaign brought back to him a short-lived spurt that placed him at the lead again, according to a quick telegraphic poll two days after he had announced. Since then his support has tapered to about even with Mann's. Here is the three-poll tabulation of the shifts as the campaign has progressed:

	-Per Cent-		
	May 4	May 19	June 8
Dies	27.9	26.2	23.7
Johnson	9.3	17.6	19.4
Mann	28.2	26.8	27.0
O'Daniel	32.8	22.4	25.6
Others	1.8	7.0	4.3

Mann's Vote Steadier

Mann's proportion of the votes has been notably the most steady. But it is incorrect to say he is definitely leading the big four. In all scientific sampling there is a variable, the probable margin of error, that must be taken into account, no matter how precise in the distribution of ballots among poor and rich, young and old, men and women, etc. So far, Texas Surveys have never varied more than 4 per cent, when their figures were compared with actual election returns. But absolute accuracy is impossible. Texas Surveys are its opinions, but it does not claim infallibility. In this poll the chances are 997 in 1,000 that the range of error is no more than 4 or 5 per cent, one way or the other.

It is correct to say, however, that the Attorney General appears to be in the most favorable position, for his heaviest support comes from the most populous sections of the state, North and Northeast Texas, as well as the Panhandle and the South Plains areas. There he enjoys a slight majority.

The Governor, on the other hand, has no majority in any large section of the state. He has substantial support everywhere. His followers are not concentrated as they are for Johnson in Central Texas and for Dies in Southeast Texas.

The surveys staff of trained interviewers covered the state during the middle of last week for this poll. The report, therefore, measures what effect, if any, President Roosevelt's speech and the acute world crisis have had on the race, which Time magazine has called "the biggest United States political sideshow since the presidential campaign last fall." —(Reproduced from Dallas News of Sunday, June 8th).

Gerald Mann Leads Race For Senate, Says Dallas News

By JOE BELDEN
Editor, Texas Surveys of Public Opinion
(Copyright, 1941.)

AUSTIN—The Texas senatorial race has developed into a free-for-all.

A new state-wide poll conducted this week by Texas Surveys of Public Opinion shows that the electorate distributes its percentage in this manner:

Gerald C. Mann	27.0
Gov. W. Lee O'Daniel	25.6
Martin Dies	23.7
Lyndon Johnson	19.4
Others	4.3

Most significant in this new study is new evidence that the Governor is not running away with the contest, even after three weeks of active campaigning. Attorney General Mann apparently has taken the lead, but it is such a slim one that it would be statistical folly to say he would win if the election were held today instead of June 28th.

Here manifest is confirmation that O'Daniel faces the most powerful field in his political adventures—something that Texas Surveys, by using a scientific cross section of the electorate, alone has with mathematical accuracy been able to discover and point out repeatedly.

Congressman Johnson seems to be the man responsible for the remarkably even distribution of the votes at the present time. His consistent climb from a mere 5 per cent to nearly one fifth if the electorate today, has without a doubt forestalled the efforts of nearly all the other leading contenders. He is now and for the first time to be considered a dangerous opponent, for he is only some 4 percentage points behind Dies.

If any tears are to be shed over these figures, they should emanate from the cohorts of Martin Dies. He is the candidate who, it may be reasonably certain to say, has lost the most ground. The first Texas Surveys poll on this race showed Dies had strong spontaneous support everywhere, but campaigning seems to be producing a different picture. The less well-known candidates also have fallen back, Dr. John R. Brinkley—since withdrawn from the race—being the only one to receive as much as 1 per cent.

Whereas a month ago 9 per cent

Demonstration Club Notes

By Special Staff Reporters

Oklahoma Lane Club

The home demonstration club of Oklahoma Lane will meet in the club room, Friday, June 20. All members are urged to be present for an important business session.

Oklahoma Lane Junior 4-H Club

The Junior 4-H club of Oklahoma Lane will meet in the school basement on Friday, June 20, at the same time the ladies' club meets.

The sponsor requests all members bring patterns for nightgowns, quilt pieces, and samples of home work.

AIR CORPS ENLISTMENTS OPEN

High school graduates who are ambitious to become pilots in the Regular Army Air Corps now have the opportunity. Even if their educational qualifications will not permit them to become commissioned officers, they still may fly Army planes and may look forward to careers as pilots.

All they need to do is to enlist in the Army Air Corps and this course of training will be open to them after July 1st, 1941, as soon as administrative details can be arranged. They will be taught to fly and they will be paid while learning. After they have qualified as pilots their futures as Regular Army pilots are assured.

All this is made possible by a bill which has just passed Congress and which has been signed by the President. It authorizes the Secretary of War to detail men for training and instruction as aviation students, in their respective grades.

All qualified young men who are interested should apply to the U. S. Army Recruiting Station, Postoffice Building, Lubbock, Texas. Let's Go America, Keep 'Em Flying.

Americas should think for themselves, urges a writer. They do—as any baseball umpire will sadly testify.

American railroads transported 111,056 officers and men during the month of April, using 364 special trains.
