New Registrants Get Fair Deal In Draft

Men who registered under the Selective Training and Service Act, July 1, and whose order numbers were determined in the National Lottery on July 17, are subject to the same rules of individual classification as the youths who were enrolled previously. General J. Watt Page, State Selective Service Director, emphasized today.

Under no circumstances will the new group of potential trainees be classified and considered for possible military training en bloc, the General declared. Each man will have his order number by which his local board will consider his classification and no local board can classify the individual registrant until his number is reached, except in case of volunteers, he said.

The second national lottery served as a guide for every local board to integrate its new registrants among those who registered last autumn, and that integration must be carried out so that the recent registrants will consider their classification only in a fair and equitable ratio to those men not yet inducted, General Page declared.

General Page pointed out that it was obvious that the new registrants who had received the relatively low order numbers would be classified sooner than those who had received higher numbers.

"I'd like to stress the fact again," General Page said, "that there isn't any difference between the treatment of the new registrants and the old registrants in any respect whatsoever. They are treated exactly alike. The same rules of deferment apply to both. Both have the same right of appeal. The interests of both are protected by the government in the same manner. And each case is considered individually when the registrant's order number comes up, regardless of whether he registered July 1 or previously."

ATTEND XIT REUNION

Judge James D. Hamlin and H. Y. Overstreet of this city were among attendants at the annual XIT reunion at Dalhart, the first of this week.

TO ALBUQUERQUE

Pete Murphy, who has been connected with the Texico Port of Entry for the past several months, resigned last week and went to Albuquerque, N. M., where he has recently purchased a small business.

Plenty of Peaches For Everybody

COLLEGE STATION—It is peach canning time in Texas! The trees are bending under the largest crop ever produced in the state and the most desired varieties for canning, pickling, preserving, or freewill eating from the fist will come down from the trees in the next 15 days. There are peaches for everybody—peaches for the cream, peaches for the Melba, and peaches for everything peaches are used for. One million bushels more of the luscious fruit than ever was grown in Texas before are beckoning the wayfarer to come and take them to the home pantries, the drying pans and the ice cream freezers; to mingle with the breakfast cereal, or make a dinner dessert that knows no peer.

Alive to the opportunity, J. F. Rosborough, horticulturist of the A. & M. College Extension Service, tells housewives to choose J. H. Hale and Elberta varieties for canning because both are freestone types. They hold their shape well when canned, and have a firm texture and a distinctive "peachy" flavor. The Frank, which will be ripe soon, is excellent for desserts because of its sweetness. The Indian variety is fine for pickles.

To hasten the job, it is easy to get the skin off peaches by placing them in a cloth sack and immersing them in boiling water until the skin slips easily, Rosborough says. Then plunge them in cold water and skin them.

Use firm peaches for canning, and for preserves choose those which are soft when pressed with the thumb. These have a little sweeter flavor, which is transferred to the preserves.

Eat peaches for health's sake, the horticulturist counsels. Yellow peaches are an excellent source of Vitamin A, which helps growth and is Nature's strongest defense against diseases of the nose and throat. Vitamin B also dwells within the peach. It increases appetite, stimulates digestion, and protects the body from nerve diseases. The fruit has a dash of Vitamin C too, along with a strain of Vitamin G. Vitamin C keeps the body in good condition, aids in resistance to infections, protects tooth and bone structure, and stimulates growth. Vitamin G is vital to delicate nerve tissues and maintenance of body vigor, and helps the skin and complexion.

"Eat more peaches today and every day during the remainder of the season as good value in the purchase of vitamins," he suggests.

WHEAT LOANS BEING MADE ON THURSDAYS

L. E. Wright, field supervisor of the Emergency Crop and Feed Loan Administration, stated today that applications for wheat loans would be received at the local office in Farwell, on Thursday of each week.

Mr. Wright said that the original plan to open the local office on Tuesdays and Thursdays had to be abandoned, due to the large territory to be covered, and for that reason the Faymer county office, located in the courthouse, would be open only one day a week—Thursday.

He said that payments on last year's loans were being received at this time, and he expressed himself as well pleased with the payments received from borrowers in this county up to date.

HELP NEEDED

Officials of the Farwell Parent-Teacher Association appealed for help this week in assisting in canning the garden vegetables now being harvested from the cafeteria garden. Fifty-two quarts of string beans for use in the cafeteria were put up Monday, and the ladies said that enough beans were ready in the garden now to fill several hundred quart jars.

The cafeteria room at the school house is being used to process the vegetables, but so far only a very limited number of workers have volunteered their services. It was pointed out that unless helpers respond immediately, many of the fresh vegetables will be ruined by becoming over mature. It has been freely predicted that unless the garden products are cared for, the cafeteria will be compelled to close down.

LAZBUDDY

Mr. and Mrs. Alf Taylor left for East Texas, Saturday, to their home. They have been with Mr. and Mrs. George Taylor in the store for the past four months.

Mrs. J. O. Cantrell and father, of Clovis, are visiting R. James of Missouri, this week.

Mr. and Mrs. W. T. Cantrell of Plainview, are visiting J. O. Cantrell and children.

Mrs. C. E. Matthews returned from a Lubbock hospital last Wednesday, where she underwent a major operation.

Schultz tent show visited here Friday and Saturday nights.

Miss Lillian Treider, W. F. Wagon and Mr. and Mrs. Raymond Treider spent Sunday at Buffalo Lake, fishing.

Health Notes

By Texas Department of Health

AUSTIN—"Beware of house to house agents who would sell you merchandise under some high sounding name and claiming that it will cure all diseases known to affect man or beast," warns Dr. Geo. W. Cox, State Health Officer.

"By patronizing such people the general public is not only wasting its money but is often purchasing an article that may be dangerous to the safety of persons or livestock."

One of the more recent frauds uncovered by field inspectors of the State Department of Health concerns so-called "radio-active Cones". Agents for this company have been covering certain sections of the State zealously, and have been selling a product that is not only worthless, but, if used according to directions, would be very dangerous to the public health.

False claims have been made by salesmen peddling this product that it will not only cure all diseases, but if used continuously, will definitely prolong life.

Laboratory analysis reveals that this product contains radon in sufficient quantities and potency to be unsafe for children, and if used by adults frequently and in high dosage would be dangerous to their health.

Personnel of the State Department of Health are constantly on guard to protect the general public against such fraudulent practices, but to gain a greater degree of success every citizen should be extremely careful in purchasing any treatment, concoction, or device from persons who claim marvelous results from their fraudulent product.

"If you or your family needs medical attention, play safe, see a compe-

tent physician, and leave the quacks alone," concluded Dr. Cox.

MOST FAMOUS OIL FIELD TO CELEBRATE BIRTHDAY

BEAUMONT, Texas—Spindletop the most famous oil field in history, will have a birthday party this year. Discovered forty years ago when the Lucas gusher blew in with a roar heard around the world, Spindletop will furnish the theme for a national oil anniversary celebration, to be held here Oct. 9, 10, and 11, by the Texas Mid-Continent Oil and Gas Association.

Highlighting the birthday observance will be the dedication of a huge monument to be erected to the Lucas gusher and the pioneers of Spindletop. Made of Texas granite, the shaft is the result of the efforts of the Lucas Gusher Monument Association, headed by J. Cooke Wilson of Beaumont, and of scores of oilmen who have contributed to its completion. It will be the second tallest monument in Texas, yielding only to the stratospheric San Jacinto memorial.

Spindletop, first gusher oil field in the United States, was the beginning of the modern petroleum industry. It was found here in 1901 in such tremendous quantities that it could be used not only for lubricants, but also for fuel and power. As the inscription now being carved on the monument base points out, "Petroleum has revolutionized industry and transportation; it has created untold wealth, built cities, furnished employment for hundreds of thousands, and contributed billions of dollars in taxes to support institutions of government. In a brief span of years, it has altered man's way of life throughout the world."

In Texas, the petroleum industry has grown in the four decades until it is now the largest business in the State. Production last year was almost half a billion barrels from nearly 100,000 wells, and expenditures for

Oil Field Cash for USO

Roustabouts, drillers, producers, farmers and town people chipped in their change and put Hutchinson County more than \$500 over its quota for the United Service Organizations. Here J. C. Phillips (left), editor and manager of the Berger Daily Times, director of the USO drive for Hutchinson County, is handing E. B. Germany, Dallas, Southwestern regional chairman, a check for \$2,000. Germany flew to the Panhandle city to receive the check and to thank the Hutchinson County committee.

Texas labor, supplies, etc., totalled \$750,000,000.

Taking part in the birthday celebration will be leading oil men from all parts of the country, many of whom entered the business at Spindletop. Both the convention program and its entertainment will carry out the anniversary theme, according to Mr. Wilson, who is convention chair-

man. E. L. Smith of Dallas, is president of the Texas Mid-Continent Oil and Gas Association, research and service organization of Texas oilmen, which is planning the observance.

Denmark now has one-third fewer pigs than when Germany occupied the country. The Germans certainly have been getting porky.

LOOKING TO THE FUTURE

By JASON O. GORDON
County Agent

SCREWORM CONTROL

Livestock owners have reason to rejoice over the experimental work of the Bureau of Entomology and Plant Quarantine in the control of screwworm infestation in livestock. A new screwworm remedy known as Smear No. 62 seems to be just what the stockman has been wanting.

A few years ago the cowboy had to carry so many different bottles of material to be used in doctoring screwworms he usually would neglect the important items in control. Today one small can of Smear No. 62 is all that is needed.

Bureau of Entomology and Plant Quarantine bulletin E-520 discusses the life cycle of the screwworm fly as follows:

"The screwworm passes through several distinct stages. Eggs are laid by the adult fly; the eggs hatch into worms; the worms develop and when mature they drop from the wound and enter the ground, and lie immobile in their hardened outer coverings. From the ground the flies of the new generation emerge and lay more eggs.

The young worms of the screwworm fly require a wounded warm-blooded animal for their first 3 days of development. The early stages of the worms have never been known to develop in dead animals. Should an infested animal die after the worms are 3 or more days old, the worms will continue to develop in the carcass the remaining 1 to 7 days required to attain full growth.

"The developmental period from eggs to mature adult flies capable of laying eggs is about 3 weeks under most favorable conditions, or about twice the time required for development of the most common carcass-breeding blow-flies. Under less favorable conditions, the developmental period in the ground is lengthened; but the fly has no true resting or hibernating stage, and the flies must emerge from the soil usually in less than 60 days or die. The percentage of survival and emergence from the soil is usually low, if cool weather retards development for more than 40 days. No adult flies are likely to survive 2 months. Cold weather (below approximately 55°F) prevents adult fly activity, and temperatures below approximately 20 degrees F kill adults in a few hours. Because there is no true hibernating or dormant period in any stage of the life cycle of the screwworm fly, it cannot survive any period of 4 months without producing at least one generation."

If it were possible to destroy the worm during the first 3 days of his life, the screwworm fly would be completely exterminated. This seems impossible to do, but livestockmen in this territory could perform surgical

M. OLIVER

O. M. "Mark" Oliver assumes new official position with the Panhandle & Santa Fe Railway, in this territory, as assistant general passenger agent. He is a member of a pioneer Texas family and one of the youngest officials in the country to hold such an important position. His headquarters are in Amarillo.

operations from October 1 to May 31, and avoid all wounds between June 1 and September 30, and retard infestation of the fly.

The formula for preparing Smear No. 62 may be secured at the County Agent's office.

The number of persons required to run the railroads of America increases or decreases according to railway traffic earnings. When railway revenues were at their peak, in 1926, the Class I railroads employed an average of 1,779,275 persons. In 1933, the low year of the depression when railway revenues were at their lowest, they employed an average of 971,196 persons. In 1939, the average number employed was 987,943.

YES, ACCIDENTS WILL HAPPEN...

KARL'S AUTO CLINIC

NEW OIL that gives GOOD OLD OIL-PLATING

far Outlasts 5 other big brands in Desert War of Endurance

Oil-Plated engine proves good for more than Double the Mileage averaged by rivals in Daring Death-Test... Certified

Plenty of good old pre-streamline cars with OIL-PLATED engines still pass your house quietly... pass newer cars on the road... pass oil-inspection many a time without needing a quart. That's because inner engine parts have been kept OIL-PLATED by the strong magnet-like action that won't let OIL-PLATING quickly drain down. Even through the nights, OIL-PLATING stays up to its top-most point—on guard against wear in advance! Yet this famous OIL-PLATING—based on the Conoco Germ Processed oil patent—is merely one factor in today's great success of the new

CONOCO Nth MOTOR OIL
—Lasted 5,683 miles longer than next-best oil tested in Death Valley

Conoco Nth oil invited itself straight up against 5 other representative oils in an all-out test to the death... unbiased... Certified. The graveyard was cruel Death Valley—so hot you can't sweat. 6 everyday coupes were used—all alike. Each got one 5-quart fill of some one competing oil—locked in by the Official Referee. Then under strictly equal conditions all cars sped without added oil, till engines cracked up.

The weakest oil gave up while Conoco Nth still had 8,268 miles to go... Certified. All 5 rivals together averaged 7,057 miles less than Conoco Nth oil... Certified.

Real difference—from a Real source

Two modern synthetics are in new Conoco Nth oil. Now think of modern vitamin synthetics, making up for some

of Nature's life-givers lost in modern food processing. Similarly, the latest oil refining methods destroy some of Nature's life-givers. But today full life is brought back—more than generously—by the two Conoco synthetics.

One of these will make Conoco Nth motor oil keep your engine OIL-PLATED. The other will check the effect of foul leftovers caused by every engine's normal firing. This commonest of all oil troubles is now checked—inhibited—by Thiakene inhibitor... Conoco Patent 2,218,132. But why technicalities?—when you know the Certified Economy record of Conoco Nth in Death Valley. You'll never Death-Test your Conoco Nth oil, nor make your car try other proving-ground tortures. You'll still drain and refill at recommended intervals. But knowing that one fill of Conoco Nth outlasted the other Death-Tested oils—by 74% all the way up to 161%—you can figure on a long time between quarts of Conoco Nth oil. Change today—at Your Mileage Merchant's Conoco station. Continental Oil Company—Pioneers in Bettering America's oil with Synthetics

CERTIFIED I hereby certify that the Death Valley Test and related work were thoroughly and fairly conducted. Engine Destruction occurred in each case at the mileage stated.

H. W. Jacklin
Consulting Engineer,
who during Academic year is Professor of Automotiva Engineering, Purdue University

IMPARTIAL

Latest available oil of each competitive brand bought retail by Referee.

New stock coupes all alike; broken-in alike; tuned alike; handled alike. Engines had been taken apart for Referee—to assure same conditions for all oils. Same route for all. One fill of oil per car. None added. Engines under lock—under scrutiny—every mile.

Texas-New Mexico Utilities Company

Wheat Quotas For 1942 Proclaimed

COLLEGE STATION—Wheat farmers will be given an opportunity to vote in a national referendum next spring on whether they want to continue wheat marketing quotas. Fred Rennels, assistant state administrative officer of the AAA, has announced.

This announcement by Secretary of Agriculture Claude R. Wickard is being made now to give wheat growers ample time to make plans for 1942 plantings before seeding time, Rennels continued.

In accordance with the AAA Act, a proclamation must be made prior to May 15 of any marketing year when it appears the wheat supply will exceed a normal year's domestic consumption and exports by more than 35 percent. The national referendum which will be voted on before June 10, 1942, must be approved by two-thirds of the farmers voting, before quotas will be in effect on that year's crop.

"Since marketing quotas on wheat serve to protect loan collateral, government loans would not be made on the 1942 crop if marketing quotas were voted down," the AAA official explained.

Wheat quotas are in effect for the first time on the 1941 crop as a result of the 81 percent favorable vote in the national referendum May 31. Texas farmers approved quotas by 94 percent. Approval of quotas made loans at 85 percent of parity possible. The 1942 national wheat acreage allotment of 55 million acres was announced May 22, and Texas farmers have been issued allotments totaling 3,748,141 acres.

The carryover we will have on July 1, 1942, as a result of our above normal yields and reduced exports, is going to be the largest on record for the United States and a 1941 crop even as low as 358 million bushels would bring the supply up to the

quota level," he said. American wheat farmers face the same problems confronting wheat growers in other exporting countries, but nowhere have the farmers as effective and as democratic a program to protect their prices, Rennels said, pointing out that American farmers are getting far better prices for their 1941 crop than farmers in other wheat exporting countries.

The purpose of marketing quotas is to divide a limited market equitably among all growers, and to protect wheat prices and income by keeping part of the surplus off the market until needed. When producers plant within their specified allotments, they make adjustments at seeding time and may continue to market their entire production in the normal manner. Producers who exceed their allotments when the wheat is planted are called upon to adjust marketings. The smaller of the normal or actual yield on the acres in excess of the allotment is subject to penalty.

The marketing penalty, which is intended to discourage marketing of excess wheat, amounts to 50 percent of the basic loan rate. For 1941, the national average loan rate is 98 cents, making a penalty rate of 49 cents.

The penalty on excess wheat may be postponed if the excess is kept off the market and stored under bond, or it may be avoided if the wheat is taken out of market channels by delivery to the Secretary of Agriculture for relief purposes. Or, it may be converted into free wheat in which case it will be the amount by which a producer seeds below his allotment for next year, measured in terms of his normal yield, or the amount by which his next year's actual production falls below the normal yield of his allotted acres, Rennels said.

VITAMINS AND EYESIGHT

COLLEGE STATION—A warning to parents to be certain their children are getting plenty of vitamins is being voiced by Dosca Hale, specialist in parent education and child development. She says when a child goes without the right food for too long, the lens of the eye may cloud over, and blindness may result.

The specialist tells this story. Some worried parents recently had their five-year-old child's eyes examined. The child had complained that his eyes itched and burned, and the parents had observed his eyes were sensitive to light. They thought he needed glasses. Instead of putting glasses on him, the doctor gave the child a big dose of vitamins and put him on a diet which was exceptionally rich in vitamins.

"Vitamins keep eyes seeing well and feeling well," the doctor said. "We know of nothing else that will do this."

This is the diet he recommended: A quart of milk every day, an egg a day, a serving of whole grain cereal every day, plenty of fresh green and yellow vegetables every day, yellow fruit or tomatos every day, and some liver, fish, and other meats several times each week.

Here are some other facts the doctor gave these parents:

Some children "pile" sugar on their food. Too much sugar dulls the appetite for other foods and may blur the eyesight or injure the health. Too much sugar may do damage. Rats living on food containing too much of a certain kind of sugar always develop cataracts on their eyes. Cataracts are common among people with diabetes.

"Words Are Not Big Enough to praise ADLERIKA. Am 55 and travel; always carry ADLERIKA with me." (G. D.-Calif.) Gas bloating, sour stomach, spells of constipation quickly relieved thru ADLERIKA. Get it TODAY.

MERCURY BOOKS, 570 LEXINGTON AVE., NEW YORK, N. Y.

cl

NEW MEXICO EASTERN GAS COMPANY
August 6, 1941.

Dear Friends:

Your local newspapers protect this soldier as well as all other young men in the service.

I know you have been reading in your newspaper of the controversy that is raging as to whether General Lear was justified in punishing the soldiers who were supposed to have made remarks to some girls on a golf course. Our papers have been publishing what General Lear had to say about the incident and in the same issue what his critics had to say. Only from reading both sides of this question are you and I in position to form an opinion as to who was right. We were not present.

In dictator-controlled Germany, Italy, Japan or Russia there would never have been one word in print. You would never have known that anything happened, even if your son had been one of the soldiers punished.

The greatest protection your son in the service has is a free, uncontrolled press. If he is not properly fed, clothed or cared for when sick, or if he receives unjust punishment, your newspapers will tell you the truth about it.

I wonder if you really appreciate what the freedom of the press means to you personally?

Sincerely,

Albert S. Johnson

Washington Digest

New U. S. Farm Policy Aims at High Production

Latest Campaign Represents Definite Shift From 'Plowing Under' Plan; Powder Makers Need Cotton Linters.

By BAUKHAGE

National Farm and Home Hour Commentator.

WNU Service, 1343 H Street, N. W., Washington, D. C.

"This year and next the farmer is going places. There are certain indications that he will continue to see considerable new money: Indications based on conditions that affect the farmers' general outlook on life, as well as his cash income."

That statement did not come from "official sources"—it didn't even come from a farmer, although he used to be one. It was made in my office by square-cut, square-jawed Conklin ("Pop") Mann, an editor and advertising man, keen student of rural matters, and a long-time friend of mine. Mann was down from New York, bursting with enthusiasm for his favorite theme—assured prosperity on the farm. Mann believes that business has a job ahead to interpret and readjust its marketing to meet the sweeping economic changes now taking place in American agriculture.

The farmer is now becoming a far more important factor in the distribution of both consumable and capital goods than ever before. That rise in the farmers' economic importance isn't just a matter of great cash income, according to Mann. It is due, rather, to the fact that the farmer now has a sound business platform under him and can plan and work on a basis comparable to any other business man.

"Farmers," says Mann, "are both doing well and experiencing a new sense of economic security because of parity and guaranteed prices for farm products. There is a definite psychological response to their feeling of increased safety. When a farmer is doing well, and feeling secure, look for a strong upward surge in his buying psychology."

Mann interprets the farm in terms of modern industry—he sees the farm as a manufacturing plant, producing the raw materials for food, clothing and numerous other products. "Evolutionary changes, deep down in farm economics," says this agro-idealist, "have taken place which give the farmer a stabilized economic base from which he can plan and work with a sense of security he never had before."

Farmer Psychology

I like the way this hard-hitting, successful business man and writer describes the psychology of the farmer as he grew up with him in other days. He asks this question of the industrialist:

"How would I feel about buying anything but necessities if my whole economic structure was a gamble? Suppose I owned a ten or fifteen thousand-dollar plant and a lot of livestock, and, once a year, I planted crops, not knowing if the price would make them worth harvesting; how would I feel?"

Mann has a deep inherited kinship for the man who works close to the soil and you cannot doubt his sincerity when he adds:

"Some day a saga will be sung about the courage that kept the farmers going through their darkest days."

I wish I might write that saga for I know it from brave letters that poured into me from radio listeners all through the worst of the depression. I can tell you that they gave me a renewed faith in America that has kept me from being cynical through these days of distrust and doubt.

By the time this column is read, the greatest concentrated drive to increase farm production, to assure the farmer a definite price for what he produces will be on. For the first time in history, milk and poultry producers will be asked to pledge themselves to raise as much of their product as they possibly can—and they will get all the co-operation, advice and assistance that the government can give them. Quite a different picture from "plowing under."

Cotton Linters

And Powder Making

Cotton linters, the hair-like fibers that cling to the seed after the long, staple cotton is removed in ginning, is a vital ingredient in the manufacture of smokeless powder. Army officials are checking to see whether or not there is going to be a shortage of this product that will seriously interfere with the defense program. They have ringing in their

ears the solemn warning of Rep. Wright Patman, of Texas, in the house of representatives, that there will be a linters shortage by the middle of 1942—or even as early as next February, depending upon how much the defense program is expanded, or whether or not the United States becomes involved in a "shooting war."

At any rate, three plans are being considered in order to meet such an emergency.

First, there is the substitution of alpha pulp. This is the wood product that Germany has been using in its smokeless powder since cotton imports have been shut off as a result of the war. This is the same ingredient, too, on which rayon and cellulose industries depend.

Second, the department of agriculture is experimenting with a machine for chopping up staple cotton into short lengths and breaking down the fiber so as to make it usable in place of linters. Within the near future the machine will be given a trial run at the Hopewell bleachery.

Third, a process has been developed for making wood linters out of the southern gum tree—the familiar sweet gum, black, or Tupelo gum. Already one plant in the Midwest is turning out these wood linters which are being used interchangeably with cotton linters in powder which is going to England.

Washington Residents

And Car Luxury

Midtown Washingtonians—that's most of them—provide no sheltering rooftop for their servants, either human or wheeled. And so, early in the morning, nose to tail, the parked cars patiently hug the curb, awaiting their masters' will. As the day begins, there is a little knot of colored girls and other servants who are on their way to wake the missus and get breakfast, lunch and dinner and then depart for their own mysterious habitations.

Of course, there are more cars than girls, for, here as elsewhere, the car is the No. 1 luxury. Better walk up three flights to a hall-bedroom than be car-less.

Of course, there are many government employee families which have settled down as contented bourgeoisie, the ambitious but secure beneficiaries of bureaucracy. They eventually own their own neat homes, on which there is plenty of time to work, after four-thirty. There is the 26-day leave each year and 14-day sick leave, occasional furloughs (without pay), retirement and pension to which to look forward. And there is always that semi-monthly salary check, not high in proportion to commercial wages but always there, in good times or bad, for the classified civil servant.

In boom times the salaries of government workers do not go up along with prices, and you cannot strike against the government. Prices are high in normal times in Washington, compared with other cities of its size; clerks and shopkeepers tend to be a little bored and snooty in the capital, and collectors are relentless. But Uncle Sam's pay check is always there, even if, in days of depression, a sizeable share may have to be mailed back to rugged relatives at home who are out of jobs—but even so there is usually enough left for the garage-less car.

Filing of Documents

Is Serious Problem

In the public mind, the word "waste" is frequently associated with the word "government." If you will look up the word "waste" in the dictionary, you will also find that it is connected with the word "vast" (the Latin "vastus").

There is, of course, a vast waste in all governments and not the least is waste paper. As a matter of fact, the Congress of the United States recognizes this fact for it has created a joint select committee on the disposition of papers in the executive departments. Before papers and documents of any department can be thrown away, the Archives Council passes upon whether or not they have historical value. If not, the council advises the joint committee, which in turn reports to congress on what action that body should take in disposing of them.

The question of storing papers in Washington, the filing case for the emergency, to say nothing of the office, is becoming as serious as the need for providing space for human beings.

Documents of historical value are kept in the great Archives building on Constitution avenue where moth and rust do not corrupt nor can thieves break through and steal.

Papers of no historical value can be sold for waste, on direction of congress, and the money received therefor turned into the treasury.

Kathleen Norris Says:

Upon Making the Most of Our Luck

(Released by Western Newspaper Union.)

The serene belief that we are entitled to everything good in this life, often blinds a girl to the fact that marriage is not merely a stepping stone to individual advancement or pleasure.

By KATHLEEN NORRIS

ONCE there was an aviator who took an Arab from the heart of a burning desert into one of the garden spots of Europe.

The Arab for the first time saw magnificent hotels, shops, gardens, trees. He was disturbed. Could it be possible, he asked, that any God was greater or kinder than his God?

But it was when he saw a river that his whole philosophy suffered a terrible shock. Here was crystal, icy, miraculous water racing along, free to whosoever would have it, inexhaustible. He asked how long the gods would continue this exhibition, and was told that as far as men knew the river had always flowed and would always flow.

"Here is a strange thing," he pondered. "In my country we must dig through the dry, dry sand for water, and when we reach it, it is scanty, warm, and tastes of camel manure." And he decided, when he returned home, and was relating to his people the marvels he had seen, to make no mention of the river.

Fail to Appreciate Advantages.

This exquisite little story is included in "Wind, Sand and Stars," St. Exupery's book. Nothing that I've ever read has ever brought to me more clearly the blessing that is cold clean water, and the shameful thought of our unappreciation of everyday privileges. We take so much for granted!

Another story that brought that home with terrible force I read in a newspaper a few weeks ago. It was contained in one of the many gallant letters from England that are filling our press today. It was written by a woman who had had a fearful experience in London raids. She had served the suffering in a dozen capacities; advising, cooking, guiding, nursing, reassuring. For 13 days and nights she had lived through horrors of fear. She was bruised, sore, exhausted; her feet burned by hot ashes.

When it was over she went down to a friend's house in the blessed quiet country. She revelled in a hot bath, a clean bed. But she found herself so overwhelmed by the sheer luxury of relief from danger, hot water, fresh sheets, and above all, by the bliss of having her feet bare at night, that she could hardly sleep. Simple Needs Rule Life Elsewhere.

Almost everywhere in the world the basic, simple needs of life rule the thoughts of men and women. To obtain work, food, shelter, these are the burning anxieties of their lives. Just to have a roof at night, to be able to put a loaf of bread or a bowl of macaroni or potatoes on the table three times a day; just to feel that for a few months at least there will be work, and pay for that work—these are the favors for which millions and millions of our fellow creatures humbly ask their gods.

Millions of the women in oriental countries have one gala costume, and it lasts them all their lives and is handed down to younger women when they die. Millions of them use blackened old iron pots and pans that have seen generations of service. Not for them the pleasantness of beauty shops, perfumes and soaps, lacy underwear, spring hats, whipped cream, bottled cherries, bridge parties. Families there could live year in and year out on just what the up-keep of a car comes to; 45,000,000 cars are moving about our country today.

APPRECIATION LACKING

American women reading this article will travel in fantasy with Miss Norris to visit other women in London, China and an Arab philosopher in the desert. She etches the pattern of their life in well chosen chapters, revealing their humility for small favors, which most Americans accept casually as their birthright.

When I was last in China an amah who had been the nurse of my sister's children came to the hotel to make herself useful to us. She took entire charge of our rooms and slept on a rug in the bathroom; we could not persuade her to anything more comfortable. During the course of this stay I happened to give her a length of heavy dark green felt that I had used as a typewriter cover. The next day the amah appeared with neat squares of it sewed to her clothes, on elbows and knees. The autumn weather was insufferably hot, and it seemed a strange time for her to make any warmer the suffocating bundle of patched, cleaned, mended old garments that she wore.

"What else could she do?" my sister said. "Amah has no bedroom closet, no bureau, no place to store things. She lives in a dusty open compound with a rabble of children and grandchildren, cousins and relatives swarming about her, to say nothing of a goat, a dog, a few chickens, wash buckets, cooking furnace, fodder pile, chopping block, all the accumulated possessions of centuries of Chinese life. The cold weather is coming, and Amah put the warm cloth just where it would do the most good."

Find Joy in Simple Things.

Well, there is something to be said for the reality of that sort of living. It never grows monotonous and it never grows dull. Just the race to keep food inside you and famine at arms-length is a thrilling business. A feast, two or three times a year, is a real feast; the whole family anticipates with joy the moment when the roasted pig or goose, the rice and hot tea, the sauces and pastes shall be ready, and remembers the occasion for months. A new garment, a few extra pennies, and unexpected bit of good luck give these peoples joys that we never know. Most of them live, and they have developed a strangely stoical philosophy about those who die. Being always face to face with death seems to rob it of most of its terrors.

But it is a pity that we take so quietly for granted the advantages of our own position. If we appreciated them there is not a woman in America who would not feel herself fortunate, would not take a changed attitude toward life and toward her own problem, and would not want to put herself from now on in a position of giving rather than of taking.

Taking love for granted is one of the dangers of this serene belief of ours that we are entitled to everything good in this life, and that it is the duty of everyone around us to see that we get it.

Love is a wonderful, perishable, changeable thing. Nine divorces out of ten are caused by husbands and wives who regard it as a settled, accepted fact; a thing that needs no further consideration or culture. Too many wives forget that marriage is not merely a stepping stone to individual advancement or pleasure, and that to have love in your life is to be counted among the privileged of mankind.

THIS may seem premature, but the midsummer date hasn't been early enough to check football gossip on more than a few fronts.

Most of the coaches I've run across are still uncertain about army enlistments and the draft, but there is no uncertainty about what might be one of Minnesota's greatest teams.

Bernie Bierman will deplore any such talk, just as any football coach would, but reports from Big Nine camps are all along the same line—"Look out for Minnesota—speed and power—quality and quantity—a great combination in every way."

"Minnesota will be the best football team in the country this fall," a Michigan entry told me.

"If any team can go through the season unbeaten it will be Bernie Bierman's outfit, with a brilliant backfield working back of a big, fast line."

Which reminds us that Michigan has lost Tommy Harmon and Evashevski, and a combination of this sort isn't easy to replace. Bo McMillin writes that his Indiana squad

Grantland Rice

Bernie Bierman

has good prospects and that, outside of Minnesota, Big Nine rivals can look for trouble from Ohio State, Wisconsin and Northwestern.

In the East

Conditions in the East are still uncertain until draft requirements are known.

But you might keep an eye on Swede Larson's Navy team when the first kickoff arrives. After considerable pressure the modest Major of Marines finally broke down and confessed that Navy might get along rather nicely before December's snows are reported.

"We have a good-looking squad," Coach Larson said, "losing few men from last fall. With any luck this should be one of the best Navy teams in some time."

Lou Little's Columbia squad should also move up, but there is still uncertainty at Harvard, Yale and Dartmouth.

On a recent trip to Texas we found that Dana Bible's Texas university outlook was the brightest of the Lone Star range. There is the chance that he may lose one or two of his star backs, but if he retains the material that is due back, including Layden and Crain, Bible will have a big Bowl contest on his hands.

SMU to Be Strong

Southern Methodist will again be strong, and so will Rice. Texas A. and M. loses most of her star cast from 1940 and T.C.U. is still looking for another Sammy Baugh or Davey O'Brien. They do not grow on every cottonwood tree.

Along the West coast Stanford still has the ball, with many of her unbeaten veterans ready to pick up where they left off.

Red Sanders, the Vanderbilt director, looks for the usual steamy season in Dixie where Duke, Alabama and Tennessee, plus Tulane, will be well up.

Coach Sanders is looking forward to one of the season's feature battles when Princeton invades Nashville on the first southern trip a Tiger football team ever took. Both Princeton and Vanderbilt will be at Princeton and Vanderbilt will be at Princeton.

Season of Questions

It is doubtful if any football season ever opened with more questions at hand.

"How will Spike Nelson make out at Yale?" "How about Red Blaik at West Point?" "And Tuss McLaughry at Dartmouth?"

"What will Tennessee do with Bob Neyland absent?" Neyland's record is one of the best in football history.

"Will Ohio State's ex-high school coach stop the Buckeye slump of 1940, with so many stars missing?"

"What's the outlook at Notre Dame under new coaching?" My guess is that Notre Dame will be among the best.

Personal Confidence The confidence which we have in ourselves gives birth to much of that which we have in others.—La Rochefoucauld.

THE TRUTH SIMPLY TOLD

Today's popularity of Doan's Pills, after many years of worldwide use, surely must be accepted as evidence of satisfactory use. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions.

These physicians, too, approve every word of advertising you read, the objective of which is only to recommend Doan's Pills as a good diuretic treatment for disorder of the kidney function and for relief of the pain and worry it causes. If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidney lag, and diuretic medication would be more often employed.

Burning, scanty or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

Use Doan's Pills. It is better to rely on a medicine that has won world-wide acclaim than on something less favorably known. Ask your neighbor!

DOAN'S PILLS

WNU—H 32—41

CREATING NEW WEALTH TO ORDER

Advertising creates new wealth by showing people new and better ways of living, and as it creates new wealth it contributes to the prosperity of everyone touched by the flow of money which is set up. In this way, don't you see, advertising is a social force which is working in the interest of every one of us every day of the year, bringing us new wealth to use and enjoy.

BRIEFS . . . by Baukhage

A rifle range in New York has been soundproofed by WPA workers to eliminate ear-splitting echoes. Now if we could only get the enemy to use cotton bullets.

Look before you leap isn't always such good advice in Washington these days. Traffic conditions are so bad that a pedestrian frequently hasn't a chance to look before he has to leap.

Demonstration Club Notes

By Special Staff Reporters

Live At Home Club

The Live at Home club entertained members of the Lakeview home demonstration club at the home of Mrs. Dennis Robards, from 2:30 until 5 o'clock, Wednesday, July 30. The afternoon was spent in playing games. A solo was sung by Miss Eddie Earl Talbot, which was enjoyed by all.

A delicious plate lunch was served to the following: Mmes. Edith Lillard, E. L. Fairchild, E. W. Talbot, Kenneth O'Brian, T. A. O'Brian, Russell O'Brian, J. A. Wimberley, Rosa Terry, C. P. Warren, Glenn Taylor and children, Harold and Edith; E. E. Taylor, Miss Elvira Marion, Edd Earl Talbot, Helen Taylor and the hostess, Mrs. Dennis Robards.

The club will meet at the home of Mrs. E. E. Taylor on Aug. 6, at 2:30. Everyone is invited.

Club Dates Changed

Due to unforeseen conflicts, Miss Elsie Cunningham, home demonstration agent, has announced that the following clubs will meet on the dates given below, rather than at the regularly scheduled times:

- Hub club, August 15.
- Lazbuddy 4-H, Aug. 9, 10 a. m.
- Friena Junior 4-H, Aug. 9, 2 p. m.
- Mildred Taylor's home, Parmerton, Aug. 27.
- Bovina, Aug. 28.

Help Your Neighbor Club

Members of the Help Your Neighbor Club met in regular session at the club room on July 31, with Mrs. J. B. Daniel as hostess.

Fifteen members and three visitors were present. A comfort was tacked for the hostess, Mrs. W. H. Alderson gave a talk on her trip to College Station. A most interesting and enjoyable trip was reported.

Refreshments were served to Mesdames W. H. Alderson, C. R. Hurst, J. B. Drager, J. E. Johnston, Robert Leach, J. D. Stevens, Kenneth Wise, Earley Stevens, J. B. Daniel, Henry Helms, Miss Dona Hurst, Miss Vera Leach, Miss Cleola Hurst, Miss Elsa Helms, Miss Maudie Leach. Three new members were added to the club.

Club will meet with Mrs. W. H.

Alderson in the club room, Aug. 14. The members are giving a weiner roast and entertainment for the husbands, Aug. 17, 8 p. m., at the club room.

Rhea Club

The Rhea H. D. Club met in the home of Mrs. C. W. Dixon, July 29, and entertained the Bovina club. Games were played. Mrs. Chas. Schlenker gave a history of the club, then bingo was played the remainder of the afternoon.

Those present from Bovina were: Mesdames Bob Williford, Vernon Ward, N. E. Bonds, Frank Miller, Henry Tidenburg, A. B. Vassey, Ronald Berggren, L. P. Starr, Bill Nittler, Reagan Looney, Fred Henery, Jewel Tate, W. O. Cherry, W. J. Parker, C. O. Smith.

Those present from the Rhea club were: Mesdames Floyd Schlenker, Ralph Wilson, Cordie Potts, Charlie Rogers, Elmo Dean, Wayne Parker, Claudie Potts, Paul Koeltzow, Charlie Calaway, Tom Hurst, Russell Harrington, Chas. Schlenker, Robert Calaway, Travis Brown, C. W. Dixon.

Visitors were: Mrs. Ruby Sullivan, Miss Doris Tice, from Wellington; and Mrs. Ray Landrum, from Friena.

Oklahoma Lane Club

The Oklahoma Lane home demonstration club met in the club room, Aug. 1, with Miss Cunningham, county agent, and Miss Cooper, district agent, present.

Miss Cunningham reminded the club members that it is time to plant fall gardens, and assist non-club members in planting one.

The demonstration was on "Renovating Clothing." Part of the time was spent in deciding how to remodel several dresses brought by club members.

Plans were made for the club trip to Ruidoso, N. M., on August 10-12. The 4-H club girls exhibited some of their work, and served punch and cookies to the ladies club.

Those present: Misses Cooper and Cunningham; Mesdames Lee Thompson, E. R. Barry, J. R. Caldwell, S. H. Sides, Levi Johnson, E. W. McGuire, C. Perkins, A. B. Wilkinson, F. E. Kepley, W. E. Verner, E. Foster, Tom Foster, C. B. Watkins, W. N. Foster, Thad Watkins, Chas. Summers, Alta Roberson. Visitors were: Mesdames Ford, T. L. Kent, L. M. Grissom, C. C. Christian, J. Donaldson.

Oklahoma Lane Jr. Club

The Oklahoma Lane Jr. Club met

Aug. 1. After attending to business Louise Donaldson and Bobbie Lou Kent made a report on their trip to the Short Course at A. & M. Later in the afternoon, the girls invited their mothers and the home demonstration club in for a social hour, where they exhibited their goals for 1941. A welcome speech was made by Bobbie Lou Kent. The women were served refreshments. Miss Cooper was the guest of honor and we enjoyed having her with us.

SHOWER FALLS

A light shower fell in Farwell late Tuesday afternoon, bringing relief from one of the hottest days of the summer. A fairly good rain is believed to have visited the area south-east and south of this city, where some row crops were beginning to need moisture.

69 Students Granted Transfers In County

A total of 69 school students in Farmer county were granted transfers to adjoining school districts by action of the Farmer County Board of Education, in session here Monday.

All applications for transfers were granted, Judge Lee Thompson, secretary of the County Board, announced today.

Midway led the list in transfers with 31 students asking for transfer to adjoining districts. Rhea came next with a total of 13. It was explained that practically all transfers were sought on the ground that no high school was maintained in the resident district of the students. Other transfers were granted because of accessibility.

The transfers granted were as follows:

Midway to Muleshoe, 21; Midway to Oklahoma Lane, 6; Midway to Friena, 1; Midway to Lazbuddy, 3; Farwell to Oklahoma Lane, 5; Rhea to Friena, 13; Oklahoma Lane to Farwell, 5; Black to Friena, 3; State Line to Farwell, 3; Lakeview to Friena, 9.

H. T. Reynolds was renamed a member of the County Board, when J. B. Belew declined to qualify.

Miss Dama Anglin, of Tahoka, Texas, is here for a visit with her sister, Miss Hazel.

To Attend Feed And Food Meet, Friday

Agent Jason O. Gordon and Demonstrator Elsie Cunningham will be in Muleshoe, Friday of this week, in attendance at a meeting for extension workers, stressing "Food and Feed In The National Defense Program."

District Agents K. J. Edwards and Lica Cooper will be in charge of the assembly, local agents announced. During the day, J. H. Rosborough will demonstrate "Production of Food", while Miss Jennie Camp will show "Preservation of Food". An extension service entomologist is also expected to appear.

For a better class of job Printing Phone 2131.

Mattress Meeting To Be Held At Midway

The first step in the beginning of the mattress making program in the Midway community will be Thursday, August 7th, Miss Elsie Cunningham has announced, at which time she requests all persons listed for mattresses under the 1941 program be on hand.

The material for the mattress ticks will be distributed to recipients at this time, the agent stated, with actual construction to begin August 11th.

Persons participating in this program are asked to be at the Midway school building at 1 p. m., Thursday of this week.
