

Several committees established by our national legislative assembly have made names for themselves in recent years. But the current senate racketeering committee seems headed for the best headlines of any.

The stink and corruption in organized labor affairs that these workers have turned up in only a short time has been truly phenomenal. And they say, in words to that effect, "You ain't seen nothin' yet."

On invitation by the committee members, over 20,000 letters have poured into the mail boxes of the senators serving on the committee, listing complaints of all kinds about unquestionable union activity.

These letters come not from an indignant general public, but from the union members themselves, who have been boondoggled into submission by coercion that takes the form of subtle economic hints all the way to dynamiting homes.

How such conditions can exist in America staggers the imagination of the average citizen. How so many thousand people can be driven to support and uphold a thing they hold in mortal fear is shocking.

Whether we like it or not, America has come to be a "controlled" country with restrictions of all description on manufacturing, banking, insurance, mining, and other important segments of the economy.

Yet organized labor is permitted to consolidate and monopolize until not only can the unions dictate the wages the workers shall earn, the hours they shall work, and the positions they shall hold; but the workers themselves are now being told what they shall do by the unions they are supposed to be masters of.

This is as good a modern-day comparison to Frankenstein as we know about.

At the turn of the century, as our nation blossomed forth with the fruits of industrialization, an era evolved that justified the birth of unionism.

The working man was exploited with almost inhuman conditions imposed by greedy finance and industrial giants. He worked 12 hours or more daily at a pace that bent his back and broke his health. His accident ratio was high, his prospects for advancement slim, and pay a mere pittance.

But, as any sixth grade child knows, those days have passed. Federal laws have established minimum wages and working conditions, and the unions have made it possible for the working man, by joining efforts with his fellow working men, to bargain with industrial giants with effectiveness that he could never have hoped to achieve alone.

Perhaps, though, the pendulum has swung too far the other way. Now, instead of the greedy steel and textile mill owners, the workers are afraid of their own unions!

You've heard about people "going to pieces." Well, we have a wife who is falling apart.

Last year, she talked the writer into going to see a dentist. She thought we needed a dental checkup badly. Just for the ride, she went along too.

As things turned out, the dentist gave us a quick once-over, said we were sound as a dollar, and suggested that she have hers checked. It turned out she had some gum infections she didn't even know about, and wasn't too many years from losing her whole set of choppers.

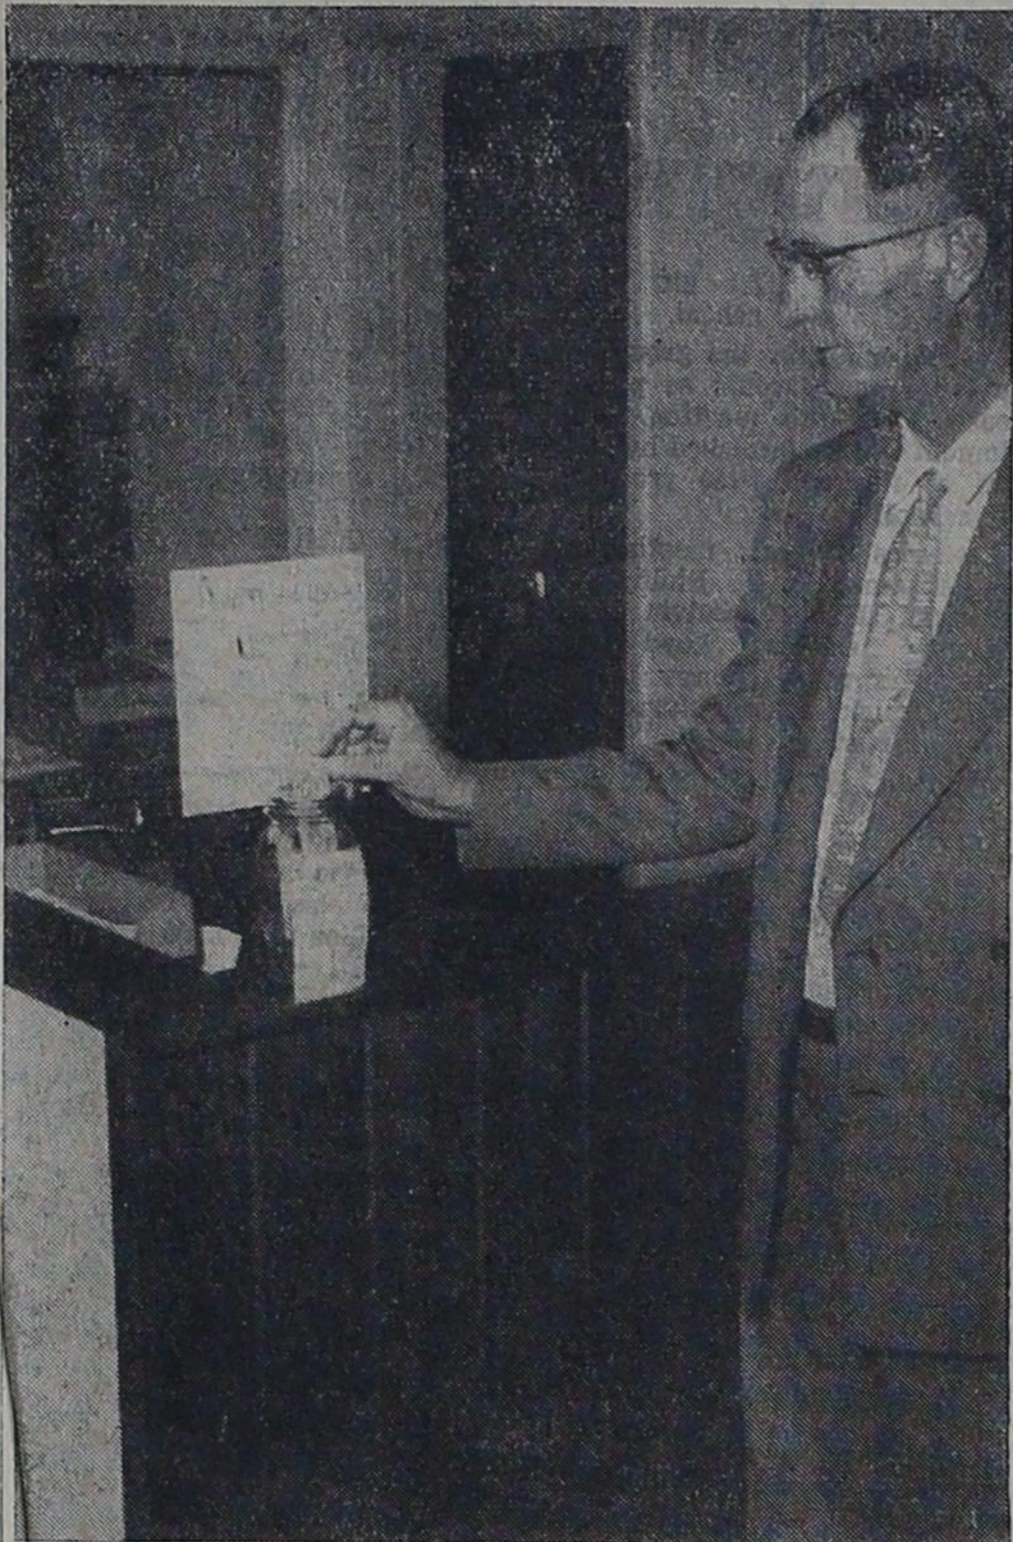

Since then, she's been returning to the dental doc about once a month, but that's only the start. All winter long, she hacked and wheezed with colds that ranged all the way from the simple sniffles right up to one step away from double pneumonia.

This has called for an array of pills, liniments, vitamins, and other essentials that has fairly burst the bathroom medicine cabinet at the seams.

Whenever the wife goes to bed, she picks out her teeth, sterilizes her mouth, Ben-Gay's her chest, wraps a saline-filled towel around her neck, and dumps a double handful of odd-sized pills down her guzzle. We sometimes wonder if she'll last 'til sunup.

Everytime we think maybe she's making a little progress, the war breaks out on a new front. Her feet have been giving her trouble, so she checked with a chiropodist last week, and sure enough, she's as flat footed as Donald Duck.

To remedy this, the doc prescribed a pair of handsome white shoes that pinch her mangled appendages into something resembling feet. Whenever you see someone clumping across the street in shoes that look like they belong on a registered nurse, tip your hat. That's the wife.

**MAKES CONTRIBUTION**—Dropping a bill in one of the swimming pool containers being placed around town, Sam Aldridge, Farwell's new mayor. The containers are being placed in most of Texico-Farwell's business establishments in hopes that citizens will aid the pool fund with their nickles, dimes, and dollars. The containers were prepared by Chamber of Commerce representatives and are being distributed by members of ESA society.

## Fire Guts Martin Garage

### BULLETIN

A fire, caused by an automobile exploding, gutted Martin's Garage in Texico about mid-morning today, resulting in an estimated \$,000 damage.

Texico-Farwell firemen who were summoned to the scene, brought the fire under control about 11 a. m., but not before the entire south part of the building had been destroyed.

All equipment and a car, truck, and pickup, which were in the building, were burned.

The explosion occurred in the north end of the garage and spread to the opposite end, wiping out everything. Living quarters on the extreme north were not touched by the flames.

Delbert Artin, owner of the business, said there was no insurance on any part of it.

## FFA Auction Flops

The FFA Community Auction planned last Saturday for the benefit of the FF chapter and the proposed Texico-Farwell swimming pool was a failure. Some items had been consigned to the sale but not enough people were on hand for an auction, report Robert Morton, FFA sponsor.

A few items were sold to individuals there, but sales were very few. A reason for its failure could have been the time of the year, Morton says. "Most farmers were busy and could not be on hand."

However, several items were donated with complete sale price to go to the swimming pool fund. Ed McGuire donated a 170-pound pig and Morton has it as his place for sale. "We'd like to sell it to someone who wants a pig to eat," he says.

Also donated was a pair of rubber boots and a piform rocker. Anyone wishing to purchase these items may do so at the garage building.

who received votes were Herbert Potts, 28; and Veron L. Billingsley, 21.

In the county school trustee race, Clyde Magness was unopposed and was re-elected to that position from Farwell with 79 votes.

The Farwell school board had its first meeting since the election Monday night, and all officers who served during the past year were renamed to their posts. The officers are A. W. Gohber, president; L. L. Norton, vice-president; and Kaltwasser, secretary.

Other members of the board are L. E. Meeks, J. T. Ford, Adolph Haseloff, and Henson.

The group met for re-organization, the paying of bills, and other routine business.

## Lions Plan Breakfasts

Planned as money-raising events for the summer youth program, the Texico-Farwell Lions Club has set the dates for two of its annual breakfasts. They are planned on successive Sundays, May 12 and 19, in the Farwell School Lunch-room.

Pancake breakfasts will be served each morning from 7-9 a. m. Tickets will soon be on sale at 75 cents for adults and 50 cents for children under 12. Various committees have been ap-

pointed by President Joe Helton to make arrangements for the two feasts.

Just what the youth program will consist of this year is not known, but funds derived will determine what will be offered. J. D. Atwell, new Farwell football coach, will be a director of the program, as will Curtis Miller of Texico.

In the past, Little League baseball and swimming have been the most popular functions of the program, but lack of transportation may mean the curtailment of some of these activities, reports a Lions spokesman. Transportation will have to be rented, while in the

past it has been furnished by the schools.

The plans for the breakfasts were worked out at a meeting of the Lions Monday night. Other business included the election of officers for the coming year. They will be installed at the next meeting of the group, April 22.

Installation of officers will be done by Carl Rodolph, Lions International director of Clovis. The installation is planned earlier than usual this year due to the director being unable to be on hand at any other time. The new officers will not take over their duties until July.

## Montoya Winner In Texico

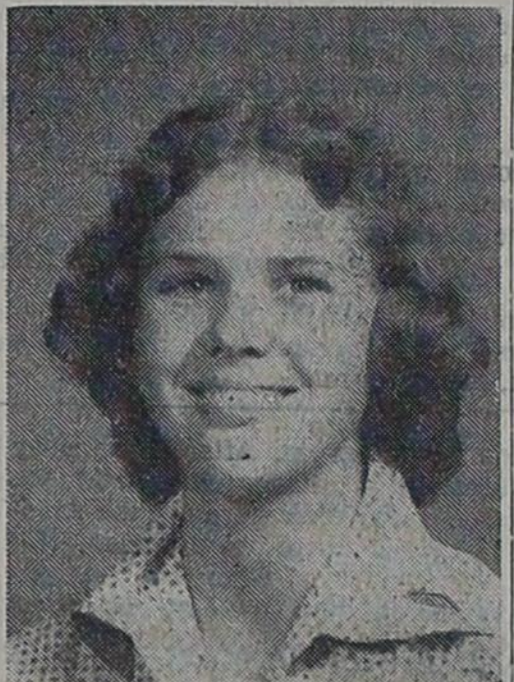

Democrat Joe Montoya was the recipient of the most votes in Texico Tuesday during the special election. He polled 73 votes to his opponent, Republican Tom Bolack's 46.

A total of 123 ballots were cast in the election which was considered a "better than had been expected" turnout.

Montoya also carried Curry County and the state. He will fill the congressional seat in Washington, left vacant by the death of Antonio Fernandez. Fernandez died shortly after being re-elected to the seat in the general election last fall.

Both Mrs. Lucy Brown in Texico and Mrs. Ernest Lokey in Farwell received bulletins this week listing the service cuts which will go into effect if additional funds in the department do not become available for the final quarter of the fiscal year, ending June 30.

The curtailments were ordered by Postmaster General Arthur Summerfield as a budgetary measure, and some of them which may go into effect, starting Saturday, are:

- Tucker was not too optimistic about any of his boys winning the right to participate in the state meet, but did admit that several of them had a good chance. "You just have to be real good to place in a regional meet with so much competition," the coach says.

### SKATING PARTY

About 40 youngsters attended a skating party given by the Texico High School freshmen on Monday night of this week. Members of the class invited guests to the party which was chaperoned by the class sponsor, Charles Stockton.

# THE TRIBUNE'S EDITORIAL COMMENT

## Answer Could Be Giving Them What They Want

What can be done to keep small town residents trading at home? That one question has probably been pondered many times by merchants in towns such as the Twin Cities. In some instances it has been partially answered, but to many merchants there is no answer.

It's hard for many of them to understand why someone will drive several miles to a neighboring town to shop, when everything they are in need of can be purchased at home. Some try to do something about it, but others do nothing more than bemoan the fact that it is happening and let it go at that.

Many small town citizens give little thought to patronizing the businesses which are paying taxes in their own home town and working for its betterment. So, it is up to the businessmen themselves, to come up with ways of stimulating more trade at home.

The problem can never be conquered completely, as there are various reasons for shoppers visiting the larger cities, which nothing can be done about. For instance, the novelty of visiting a city and just getting away from small town surroundings could be one.

Then, too, a reason given by many shoppers is the large selections from which to choose at the larger shopping places. Human nature causes an individual to look for the best deal and one has much more of an opportunity to do so if there is more than one store and numerous styles and colors of an article to select from.

While small communities can never match the business districts of these larger cities, there is something that any merchant can do to compete with the out-of-town businesses.

That would be giving the people what they want at home, letting them know what one has to sell, at what prices, and giving the customer the best of service possible.

A small town merchant has one advantage to begin with—that being the nearness to the buyer. Large stores buy and sell by volume, therefore mak-

ing it easier to sell at a narrow profit, but they have several things against them, too. High rent, large payrolls, and high taxes, only to mention a few of the problems.

The volume sold by small town businesses probably can't match larger cities, but volume can be increased if businessmen meet the challenge and try to serve the hometown people.

There is a good size trade territory which the Twin Cities could serve. Some businesses have shown that they are serving it, others are not. Those which are serving it are the ones which have branched out and given the people what they want. Those that have should be an indication of what can be done if a businessman so desires.

No town can be progressive if its citizens are not and no business can be progressive if the owner is not.

## ON FIELD TRIP

Five journalism majors at Eastern New Mexico University inspected newspapers in Southern New Mexico and toured the Potash mines in Carlsbad last weekend. Included on their itinerary were papers in Carlsbad, Alamogordo, Roswell, and El Paso.

The group was accompanied by Joe W. Milner, instructor in journalism. Students making the trip included Richard Hapke, Tribune news editor.

We have enjoyed the kids this week—not just our own, but all around us. Maybe it's spring, but they seem to be brighter than ever.

We took the little boys and their cousins, Betsy and Prissy Crume from Hereford, for a train ride on Ronny's birthday Tuesday. Ronny and Hal were a little skeptical about boarding that awesome whistling train, but after we were settled inside, they were bouncing all over the place.

Later Ronny informed us that the choo-choo scared him on the outside, but it didn't scare him on the inside. Then he inquired, "mama, you know why I like cars best? They don't 'whis-kl'."

The little boys were so excited about it as were the little girls, that mama didn't have time to get excited or nervous. It was our first train ride, too.

The first train we saw go by was a freight train. Ronny informed us that it was a choo-choo that carried boxes. Sure enough, there were box cars by the score.

We visited briefly with Mrs. D. W. Bagley Friday in the hospital. Since she had undergone surgery only four days before, we expected to find her all listless and pale, but she was as chipper and pretty as could be.

We were so pleased to learn she had been all over the hospital that day and was doing very well.

Also, we visited with Mildred Burns who was there with her precious little daughter. The baby had had surgery that morning, and wasn't feeling so well. We hadn't seen her in quite some time.

Her hair was in ringlets all

RECEIVE HONOR—Mr. and Mrs. Fred Danforth, left, were honored with a citizenship award recently by the Texico Woman's Club. The couple was recognized for its outstanding work in Texico during the past year. Making the presentation is Mrs. Agrie Jones, vice-president of the Woman's Club.

### Danforths Receive Citizenship Award

In a state of complete surprise, Mr. and Mrs. Fred Danforth received an award for outstanding citizenship from Mrs. Agrie Jones, vice-president of the Texico Woman's Club at an appreciation dinner held recently in the club building.

The award was a silver platter engraved with, "Texico Woman's Club Citizenship award for 1956-1957 to Charleyrene and Fred." Mrs. Danforth is serving as the first president of the newly-organized civic club. They are both teachers in the Texico School.

In her presentation speech, Mrs. Jones remarked that the club had voted to give a citizenship award each year to some outstanding person.

The appreciation dinner was to honor all husbands of the members and special guests who have contributed so much in making the Texico Woman's Club and Teen Center a reality. The men donated many hours of free labor in the redecorating of the building, the construction of a kitchen and the library corner. Furniture for the

building is through the courtesy of the Furniture Mart, Texico-Farwell.

At the conclusion of the dinner, the president introduced special guests who were able to attend. These were Mr. and Mrs. Claude Rose, Mr. and Mrs. M. C. Roberts, Mr. and Mrs. Grayson Roberts, Mr. and Mrs. Andy Sutter of Clovis, Mr. and Mrs. Joe Helton, Mr. and Mrs. Olan Schleuter, and Beale Stewart.

Mr. and Mrs. Jim Bob Smart, Mr. and Mrs. Ben Smart, Mr. and Mrs. Buck Bradshaw, Dick Hapke, and Mr. and Mrs. Muckaroy were other invited guests who were unable to attend.

Following the introduction of these honored guests Mrs. Danforth thanked the committee responsible for the fine dinner. Tables had been set up in a u-shape and guests served themselves buffet style from a table at the front of the room. Members serving on this committee were Mrs. M. H. Poteet, Mrs. Ira Levins, Mrs. John Adams, and Mrs. Milton Henson.

Games of bridge, "42" and visiting furnished entertainment during the remainder of the evening.

A. girls acted as the reception committee and served the food which featured Mexican dishes. At the speaker's table were Mr. and Mrs. A. E. Redwine, Mr. and Mrs. Wesley Barnes, Mr. and Mrs. John Agee and Wayne Bristow.

Mr. John Agee acted as toast-mistress and gave the welcome address. Invocation was by A. E. Redwine. A good imitation of a real "bull fight" was presented by Andy Fuqua, J. C. Gilmore and Glen Watkins. Madalyn Schuman, Janis Clark and Rosemary Agee sang "Yum Yum Yum."

The main address was given by Wayne Bristow from Wayland College. Bristow had as his theme "Young People's Responsibility to the World." He stressed the need of college for young people and what college had meant to him. He tried to impress on the young people that there is a time for "merry-making" and a time for God that should not be forgotten in the midst of all that is going on around them.

Seniors present were Joy Smith, Mona Hall, Johnny Nowell, Janice Oliver, Danny Rue Cargile, Jeanell Floyd, Juanita Scott, Andy Fuqua, Jimmy Weaver, Johnny Gammon, J. C. Gilmore, Mack Hall, Durwood Teague, Glen Watkins, and Jim Roy Daniels.

Faculty members present were Mr. and Mrs. George Washington, Mr. and Mrs. Purl Tippie, Mr. and Mrs. Morris Cooper, Mr. and Mrs. Jack Black, David Estes and Mr. and Mrs. James Ward.

In closing, Wynell Barnes sang "Vaya Con Dios" accompanied at the piano by Marcella Mayfield. Benediction was by Wesley Barnes.

Don't forget the senior play "Bolts and Nuts" to be given Friday night, April 12. This is a three-act comedy and action will begin at 8 p. m.

Two Local Girls Feted With Party

Mrs. Bob Jones and Mrs. DeWitt Precure honored their daughters, Bobbie Jo Jones and Donna Precure, on their 10th birthdays with a "double decker" party. Immediately after school last Friday, all of those of the 4th grade room who could go were taken to Friona to the skating rink where the youngsters enjoyed a couple of hours of skating and spills. The fun outweighed the falls, so no one seemed to mind.

They then returned to the home of Mrs. Bob Jones where they were served sandwiches, potato chips, punch and birthday cake. After the gifts were opened, more games were played until all were exhausted.

Those present were Linda Lesly, Charlotte Seaton, Johnny Ivy, Marianna Gammon, Rachel Moore, Linda Monk, Kay Anne Smith, Gail Ivy, Jody Brown, Jan Nowell, Ramona McMahon, Loretta White, Gary Eubanks, Theron Vaughan, Ronald Ashford, Buddy Embry, Billy White.

## Junior Livestock Show this Friday

The annual Parmer County Junior Livestock Show will be held Friday, April 12, in Friona. It will feature young boys, mostly members of county 4-H and FFA units, who will exhibit their stock.

The show is open to all registered breeding stock and fat animals. This junior show is a survivor of its parent promotion, the Parmer County Dairy Show and Fair, a fall event, which was discontinued last year for lack of interest.

In spite of the decline in stock population in the county with the coming of irrigated farm County Agent Joe Jones this week says he has hopes that "we will have a pretty nice show for the boys."

A factor which will help stimulate interest for the youngsters will be an auction sale to be held at the conclusion of the judging, at which most of the stock in the show will be sold to the highest bidders.

The county agent pointed out that businessmen and individuals who want to help keep interest in the show should investigate this means of doing so. Businessmen and individuals who theoretically "buy" calves don't always wind up with them, he points out.

"It works this way—" explains

the agent. "We'll have a 'floor price' that will be set by some buyer who will agree to take any animal at that price. Whatever the animal sells above that "floor" will be all the cost borne by the successful bidder, provided he doesn't want to keep the animal."

An example would be an 800-pound calf that would sell for a top bid of say, 21 cents per pound. If the floor price (which would have already been established) was 18 cents, then the cost of the calf to the buyer—if he wanted to turn the calf back—would be \$24, at three cents per pound.

Thus, a show booster can find that instead of worrying about what he is going to do with \$200 worth of beef, he can "donate" \$24 to the show by buying the calf over the floor and then reselling him to the floor buyer at the prevailing price.

G. B. "Pete" Buske of Friona is making sale arrangements.

Judge for the show, which will begin at 8:45 a. m., will be Homer Brumley of Hereford. Entries are to be in by 8, reminds Jones, although it is permissible to bring stock in the evening previous.

### NEWS FROM THE FARM BUREAU

By RAYMOND EULER

Thursday, April 25, 9 o'clock at Bushland, Southwestern Great Plains Field Station, the 10th annual meeting of the Texas Weed Control Association will take place. For the past several years, your Farm Bureau weed committee has had representatives in attendance. This will be no exception. We are sure you would enjoy the day of demonstrations, and gain some very helpful information.

A free lunch will be served at noon, making it very convenient to spend the full day on the grounds without interruption. If you would like to go with a group, please leave your name at the Farm Bureau Office, or with County Agent Joe Jones.

We expect to be able to give you a definite count of County Farm Bureau membership by next week. All we can say at this time is that it exceeds 600. Until all cards have been processed and accounted for, it is impossible to make a positive count.

Senator George Moffett of Chillicothe offered a senate amendment to the appropriations bill last week to increase funds available for Texas Experiment Stations. Senator Jerrard Secrest of Temple offered a similar amendment for the benefit of State Extension Service.

Both amendments were defeated. We are happy to say that our senator, Andy Rogers of Childress, gave full support to both amendments all the way through. The bill now goes to a conference committee for further action.

Your local Farm Bureau officials have wired again, urging passage of these amendments in the interest of research that will increase market value of farm products. If you will let Senator Rogers and Representative Jesse Osborn know you are interested in this legislation, too, it may help prospects of such passage.

The only opposition we know of comes from the school teaching profession, which contends that any money allotted to agriculture, would otherwise have gone into their pockets.

It seems that 7½ million from a fund of 91 million would not be too much for that group to allow for agriculture, which is largely responsible for their employment in the state, anyway.

CONSIDER THIS: Every purpose is established by counsel: and with good advice make war. Proverbs 20:18.

READY FOR THE SHOW — Robbie Osborn will be one of many boys who will show their prize animals in the annual Parmer County Junior Livestock Show which will be Friday in Friona.

### THE PARMER FARMER

Nice spring weather the past few days has spurred activity on our farms. Pre-irrigation in many places is in its final stages, but on some farms, this is the peak of the pre-watering activity.

Most of the land is in good shape and if the weather treats us right, we stand a chance to get a good start on this year's crop, which is often important when all the figures are in.

We finally found out the other day that the blackeyed pea story that's been going around in the Friona area has run aground. Woodrow Fleming tells us that there was a promoter from the Rio Grande Valley who was in the area several weeks ago, seeking to contract pea growing deals on the Plains.

As the story went, this fellow was representing a large processing firm which would take care of harvesting and marketing problems, which are always big ones in the case of commercial vegetables.

About that time, though, some big rains came to the Lower Valley, and the pea project fell through. With enough water at Falcon Dam to irrigate, and enough soil moisture to sprout the crops, apparently the boys downstate figured they could grow their own peas this year.

Bill Broadhurst, hydrologist for the High Plains Underground Water District, says that there are about 35,000 small surface lakes on the Plains. We don't know how he arrived at this figure, but a guess at the total by even the most unscientific methods would run in the tens of thousands.

Most every farmer has at one time or another seen the aerial maps used in USDA work, and one of the most noticeable things about these maps is that they show with remarkable clarity the extent of the slight depressions that form our ponds in wet weather.

Broadhurst, who is a pretty good scientific guesser, figures something like 1,000,000 acre-feet of water falls from the skies each year and runs off into these surface lakes.

It has been proven beyond all question that "two-way" wells which irrigate crops during rainy seasons and serve as a drain for excess water in wet seasons will work.

They have to be switched on and off occasionally as lakes drain, because the silt in the run-off water clogs the formation and greatly reduces its ability to accept

the recharge. However, pumping the well only a minute or two seems to relieve the congestion, and this operation can be repeated apparently indefinitely.

We predict that within the next 10 years, lakebeds on the Plains will be selling for almost as much as top irrigated land, for this very reason.

Because of the extreme slowness of water to "move" once it has been returned to the sands under the surface, for all practical purposes, a farmer can "store" irrigation water under his land much as though he had a huge tank all to himself.

## Survey Findings Released

The first tangible outgrowth of a large-scale movement on the irrigated Plains begun two years ago, appears in a progress report from the Texas Agricultural Experiment Station, dated February 2, and distributed throughout the area last week.

It features compilations by Leigh H. Hammond and H. B. Sorensen of the Department of Agricultural Economics at College Station, and deals with market potentials of tomatoes.

This is presumed to be the first of a series of reports on vegetable production possibilities in the area, and is aimed at giving prospective producers a close view of the marketing problems they must take

Copies of the report were sent to the county agent, banks, and other leaders of the area. In rather technical detail, the report contains graphs that depict production peaks, sources of tomatoes, destination of shipments, and other pertinent information.

California, Texas, Florida, and Mexico are the principal producers of tomatoes in the country, and up until now, the High Plains has not made any substantial contribution to the total.

"West Texas tomato production will have to compete primarily with California for a share of the total market in the Central states," believe the authors of the report.

"The Central states look promising as an area to move into with expanded production since the chief competitor, California, sends the larger proportion of its shipments to the six major cities of the area—Dallas, Fort Worth, Denver, Kansas City, New Orleans, and Minneapolis-St. Paul."

Included in the survey were Deaf Smith, Parmer, Castro, Bailey, Lamb, Hale, Floyd, and Lubbock Counties.

## The Parmer County Implement Co. News

"The Place Where Most People Trade" Friona, Texas—Wednesday, April 10, 1957

We invite you to come into the Parmer County Implement Company and meet Mr. Lester Dunn, our new office manager. Mr. Dunn worked for International Harvester Company in Amarillo for several years and will move to Friona as soon as school is out.

Have you seen the newest in pickup? Well, we have the latest, the new 1957 I. H. pickup. Drop by and let us show it to you.

There are over 100 business firms in Friona now. You might not know that unless you had been on a committee to put posters in every store window.

To get the maximum horsepower with the least fuel, have your tractor tested on the dynamometer in our shop. The cheapest running tractor is the one that is running right.

Mrs. James Wilson has been very ill at her home in Friona but she is doing much better now although she is not allowed company yet.

We do give trades day tickets. If we forget to give yours to you please remind us because the only reason we bought the tickets were so we could give them away.

Charles Beaton, son of the S. E. Beaton, played with the Navy Band in Amarillo, Saturday. Ten boys from this area were chosen to appear with the band and we congratulate Charles and his band director, Mr. Fry, for receiving this honor. Charles plays the trombone.

We sell lots of Goodyear tires. That's one of the reasons we can sell them for less. Goodyear, the greatest name in rubber, makes more and better tires.

David, our five year old, has been trying to learn to jump on a pogo stick. He works and works until he is out of breath and then tries again. The other day he told our mother, "I could pogo real good if I could just balance my feet."

There is nothing like a ride in a new '57 Oldsmobile. Come by and test drive an "88."

The recruit from the North was sweating at his first experience with the heat of a Texas summer. He remarked to an old Texan who was standing nearby: "I'll sure be glad to get back to Michigan."

"I reckon a man has to be born and raised here to stand the weather." "What!" exclaimed the Michigander. "You mean to tell me that folks live here when there ain't no war!"

Last Friday, was an exciting day in the life of the youngsters who will be first grade students next year. They were all day visitors with the first grade teachers—dinner at the cafeteria and everything—just like real school. Young Jim Schlenker, son of the Carl Schlenkers, was one of the visitors and he rode the bus to and from school. He reported to his mother when he got home that the teacher told them not to come back to school Monday but he thought he'd go anyway because he'd had so much fun.

Cotton planting time in Parmer County almost always means cold weather. Maybe we all just want to plant two weeks too early. Anyway, we have plenty of cotton planters and repairs.

Girl Scout leaders are reminded of a training course to be given in this part of the Caprock Girl Scout Council. The first one was Tuesday at Muleshoe. The next one will be Wednesday, April 10, at Friona and then the next one will be in Olton on the 17th.

International Harvester trucks and pickups have an enviable reputation for performance plus economy. We will be glad to give you a demonstration ride in one of the new trucks or pickups and we will always take your trade-in at a better price.

Mr. and Mrs. V. R. Jordan, accompanied by their son Marvin of Snyder, Texas, went to For-dyce, Arkansas, last Thursday to attend the funeral of Mr. Jordan's nephew and wife who were killed in a car wreck. Mr. Jordan's brother's wife was also seriously injured.

If you are going to need a crust buster we have just what you want at a much better price. Fits any tractor, quick attaching or old style hitch.

Questioned as to the "truth and veracity" of a backwoodsman who was on trial, a neighbor cautiously said: "I wouldn't go so far as to say he is a liar—but when it is time to feed his hogs, he has to get somebody else to call 'em."

# Crops Research Plan Announced By Foundation

The crops research program at the High Plains station of Texas Research Foundation was announced today by Dr. Johnny H. Davis, associate head of the station.

This phase of the program will be divided into three parts:

(1) Experimental and observation tests in small plots. These will include many strains recently developed of which only a small quantity of seed is available. Most of this material will be planted in 22-foot, single row plots to study its adaptation to this area;

(2) Commercial varieties and hybrids in 4-row, 100-foot plots,

and; (3) Field size areas of varieties and hybrids generally planted in this area to compare their productivity.

Crops to be tested are:

**GRAIN SORGHUM** — Forty-nine varieties and hybrids will be tested in 2-row plots 100 feet long replicated four times, and 100 experimental varieties and hybrids will be planted in single row plots for observation. Seven or eight leading varieties and hybrids will be planted in 10-15-acre field sized plots for comparison.

**COTTON** — Twenty-five varieties

of cotton will be planted in 4-row plots 100 feet long with four replications. Advanced strains test of strains from seed breeders to observe characteristics and production of strains which these breeders are developing for this area. Seven leading varieties will be planted in field sized areas of 8-10 acres to compare them on this larger scale.

**SESAME** — Fifty strains of sesame, including five direct harvest or non-shattering types will be compared in small plots. Renner No. 15, a non-shattering type, will be planted in a seed production field.

**CORN** — One hundred varieties and hybrids will be tested in small plots to determine adaptability in this area. Seed of T.R.F. No. 9, a white hybrid developed at Renner for the milling industry, will be produced in a seed production block.

**SOYBEANS** — Ten leading varieties will be tested in replicated 2-row, 100 foot plots, and 50 varieties and strains will be planted in a production and observation test.

**CASTOR BEANS** — Twelve varieties of castor beans will be grown in a test to determine best variety for this area. Test to solve the volunteer problem will be initiated.

**SUNFLOWERS** — Forty strains of sunflowers will be tested in replicated tests.

**GRASSES** — Twenty-one different grasses will be planted to study their place in this area.

Many of the tests listed above will be duplicated on dry land to determine the productivity of these crops without irrigation.

In addition to the tests outlined here, Dr. Davis stated that Dr. Longnecker, head of the High Plains station, would be conducting fertilizer and other soils tests with these crops.

## UNUSUAL EASTER EGGS

Coloring eggs is traditional at the Easter season. An unusual but beautiful way to decorate the egg is the method used by the people of the Ukraine, according to Lucille Moore, extension recreation specialist. This is the most prized art of their home craft culture.

The eggs may be blown or sucked out or they may be hard cooked. The decoration is achieved by using beeswax or paraffin wax as a resist to the dye and various color dyes. A lettering or broad-point pen can be used successfully. The pen point is warmed in the open flame and dipped in melted wax. The design on the egg, usually thin-lined geometric pattern, is applied in wax. The egg is then dipped in the lightest color dye to be used. The entire egg will be colored with the exception of those portions covered with wax. When dye is dry the design can be carried further and then dipped in darker shade. This can continue to give as many colors as desired, but because the designs are of fine lines three or four colors ought to be sufficient. Keep in mind the surface covered with the wax will be the color of the last dye not the next one.

When the design and dipping are finished the eggs are warmed and

the wax rubbed off. Easter egg dyes are good. Crepe paper, soaked to remove color, makes a satisfactory dye. A little vinegar added to the water in which the paper was soaked, helps set the color.

**FOR YOUNGSTERS** . . . Hard cooked eggs, bowls of dye and crayons will suffice. Draw designs with the crayon, then dip in color. The crayon may or may not be removed.

## Parmer Drills 11 Wells In February

Statistics released by the High Plains Underground Water District show that Parmer County landowners installed 11 new irrigation wells during the month of February.

Bailey led the District with 57 wells, and Lubbock had 42. Hockley had 49, Castro 16, Deaf Smith 10, and Lamb 3.

It should be pointed out that many wells in the older irrigated areas are not "new" ones, but replacements.

## The Parmer Farmer— (Continued From Page 7)

That last year was an excellent one for the cotton growers no one now doubts. It didn't take much imagination to see the improvement in the weather for the fall of 1956 as compared with a year previously.

There are some interesting statistics that further underscore this fact. It is often said that High Plains cotton is the "sorriest grown."

That isn't true—at least it wasn't last year. Grade, staple, and micronaire data from the Agricultural Marketing Service at Lubbock proves it. Of the 1,622,000 bales produced on the Plains last year, 25.6 percent of the crop had a staple length of

thirty-one thirty-seconds. Another 24.8 percent went fifteen-sixteenths. A substantial percentage, 18.5, went an even inch, and the average of the crop was 30.6 32nds. Average micronaire tests were 3.9.

Over 24 percent of the crop graded middling white, and 25 percent was middling light spotted. The average grade index was 95 (middling white is 100).

Not bad, for the sorriest cotton grown!

Plant scientists of the Texas Agricultural Experiment Station have announced the release of a new blight resistant cotton variety. It is known as Austin and is highly resistant to the most damaging race of bacterial blight found in Texas. Commercial seed should be available to farmers in 1958.

Get More Good From Milk

From soup to dessert—milk used generously in cooking can add greatly to the nourishment in meals, extension food and nutrition specialists remind us.

When families in this country are not well fed, the nutrient they most often lack is calcium. And the main source of calcium in our food supply is milk.

Milk would be an important food if it offered no more than the mineral calcium, which is needed all life long for healthy bones. Along with calcium, milk contains about 100 nutrients—minerals, vitamins, sugars and protein elements. Altogether, this makes milk a very special food bargain.

The protein in milk is of the best quality that food offers, so that milk can help out with protein in the same way that meat, fish, poultry and eggs do. Milk is a good source of the B vitamin riboflavin, which is another nutrient often short in the foods families choose.

Drinking milk is the simplest way to get the good from milk. But there are many opportunities in cooking to get part of the milk needed daily.

Children should have a minimum of one quart daily and adults need two or more glasses.

Every man, woman and child, old and young, needs three kinds of recreation, says Lucille Moore, extension recreation specialist: (1) Family recreation with those at home; (2) Neighborhood recreation with others of like ages and interests; and (3) Individual recreation alone.

Tips for "burgermakers"—look for bright red color—some fat for flavor. If you have beef ground to order, choose round steak, chuck, flank, sirloin tip.

If meat is lean, have 2 or 3 ounces suet ground with each pound.

The three C's of credit are a guide for family use of the charge account, says Eula Newman, extension home management specialist. The first one is CHARACTER—meaning, will you pay as you agreed to pay? The second C is for CAPACITY and suggests the question, "can you pay as you agreed?" The third C is for CAPITAL and pertains to the security you have to offer to prove that you are a good risk.

Remember that credit cannot take the place of income. It can

# Consider Cowpeas For Spring Planting

A warm spring sun and the bursting of treebuds remind farmers on the Plains that planting time is just around the corner once again. And in making plans for the coming year, County Agent Joe Jones suggests that the lowly cowpeas is at least worthy of consideration.

Interplanting peas with grain sorghums (and corn) has been established as a successful practice on the Plains in recent years, and more and more farmers are swinging around to this little "extra" to help them nudge net profits higher.

Cowpeas, being legumes, are nitrogen-producing plants that more than pay their way for the ride you give them when they are planted with grain sorghums, says Jones.

Tests by farmers have disclosed that the cowpeas, when planted with the cash crop, reduce little if any of the yield that is normally expected from the grain sorghum.

Then, on top of that, they make a substantial contribution to the soil with the nitrogen they exude, and for the next few years, crop yields may be expected to increase accordingly.

But that's not quite all the story. Farmers are now finding that after the grain has been harvested in the fall, they can return livestock to the stubble fields, where the cows will make good use of the beans themselves.

In fact, tests at Oklahoma A&M show that 100 pounds of cowpeas are equivalent to 80 pounds of cottonseed cake. On this basis,

trials in Castro County just last year indicated that animals did better on stubble and cowpeas than they did on stubble supplemented with cottonseed cake.

Varieties that are popular hereabouts include the Irons, Clays, and New Era. Since all legumes should be inoculated before planting, that practice would apply to cowpeas.

Seeding rate is about four pounds per acre, and Jones emphasizes that the planting rate of sorghum or corn should not be decreased. Special fittings are readily available to use for planting machinery, and the investment required for this extra equipment is modest.

Cowpeas, then, pay two ways, and the county agent suggests that farmers give them a consideration this year.

## THE HAPPY HOMEMAKER

It is almost fresh strawberry time again. There is nothing better than strawberry preserves and strawberry shortcake, but for a change, "Strawberry Meringue Bars," are very good.

Beat together 3/4 cup shortening, 1/3 cup sugar, and 2 egg yolks. Add 1 1/2 cups sifted flour and stir until thoroughly blended. Spread mixture in bottom of an ungreased 13" x 9" baking dish, and bake 15 minutes. Remove from oven and spread evenly with 1 cup strawberry preserves.

Stiffly beat 2 egg whites, beat in 1/2 cup sugar gradually, fold in 1 cup finely chopped walnuts. Spread meringue carefully over preserves and bake 25 minutes. Cool, cut into bars, and decorate with additional preserves.

Would you like to avoid that last minute rush when making gravy to serve with roast chicken or turkey? One homemaker with whom we always enjoy visiting likes to make the gravy ahead of time. She says that by doing this she does a better job.

When you put your fowl into the roasting pan, cook giblets and neck until tender in water to cover, seasoned with celery tops, onion and carrot, salt and pepper. Cool. Remove meat from neck, chop or grind with giblets. Use cooking liquid and water or vegetable cooking water to make a cup for each cup of gravy.

Mix one teaspoon flour for each cup of liquid with a little cold water, stir in gradually, cook, stirring until thickened. Add giblets. It's pale, not full flavored at this point, but the slow part of gravy making is done. Refrigerate.

When the fowl is roasted and on the platter, pour off all but a little fat from the roasting pan, pour the gravy into the pan; heat to boiling, and stir well to blend all the rich brown essence of the turkey or chicken into it. Season to taste.

If you have a daughter who is in the second or third grade, cookie making can be a lesson in reading, arithmetic, and following instructions. Prepare some simple recipes for her and print them on tablet size pieces of paper, help her set the oven control, then get out of her way.

Too much bossing spoils the cooking for beginners. A simple recipe that children this age can understand is being printed below:

**Roll and Cut Cookies**  
 1/2 cup sugar  
 1/4 lb. butter  
 1 egg (unbeaten)  
 1 tablespoon sweet milk  
 1/2 teaspoon vanilla  
 1/2 teaspoon baking powder  
 1 1/2 cups flour

Mix in the order given. Roll on wax paper. Cut with cookie cutters and bake 10 minutes at 400 degrees.

If you drop a bit of yellow into the whites of eggs when separating them, it may be removed easily by dampening a cloth in cold water then touching it to the spot of yellow which will cling to the cloth.

Why don't some of you Parmer County homemakers enter the 1957 National Crochet Contest? Wouldn't it be wonderful to crochet your way to New York or Bermuda? The rules for this year's contest have been printed, and leaflets are free for the asking. Some of the most beautiful crocheted articles we have ever seen have been made by local crochet enthusiasts. Entering the contest would be fun whether you win a trip or not.

One writer, Lura Cox Brand, has a wonderful idea of being a grandma. She expresses it in a poem entitled, "Gay Grandma."  
 In grandma's day, life moved so slow,  
 She gracefully grew old.  
 She sat and rocked and pieced her quilts  
 And children's stories told.  
 No doubt, in this atomic age,  
 When seventy and gray,  
 I'll take a space ship to the moon  
 To celebrate the day.

## SOIL CONSERVATION DISTRICT NEWS

Now that spring is here it's clean up, check up, fix up, and break up time around the farm again.

Clean up, check up and fix up for fire and accident prevention as you prepare for efficient spring farm work and make the home safe from fire and accidents. Remove the hazards and maintain the buildings and surroundings to make them safe from accidents. Clean up leaves, grass, or trash

along fences and buildings. Safeguard your farm and home and help to beautify your community.

Check up to find defects in chimneys, stovepipes, and heating and cooking equipment. Check the fire safety around fuel storage and other flammable liquids. Is the electric wiring adequate and in good repair? Are lightning rods in good repair and properly grounded? Are surge arresters installed? Are attics, basements and other storage places clear of fire-hazardous paper, rags or junk? Are roofs leakproof and covered with fire resistant materials? Is your fire department number at your telephone? Are you ready in case of fire?

Fix up all these needy repairs. Break up dangerous habits and unsafe practices. Never smoke in bed or carelessly at any time.

Never leave small children alone in a house. Keep matches, medicines, and chemicals safely away from them. Never quicken fires with kerosene. Never overfuse or tamper with electric fuses. Never use old frayed outlet cords or defective appliances. Never use toxic

or flammable cleaning fluids indoors. Never operate tractors, or automobiles where exhaust or dripping gasoline can start a fire.

Anti-histamines should not be given to a dog suffering from the bite of a poisonous snake.
