JFK Trying For Complete Control-Seale

"We need to get the Federal Government out of business they have no business being in the first place," Amarillo's Jack Seale, Republican candidate for Congress, told a meeting of the Farmer-Bailey Counties Young Republican Club Monday night here.

Seale, candidate for United States representative for the 18th Congressional District, where Walter Rogers seeks reelection, spoke to a gathering

at the Friona High School Auditorium.

The Amarillo mayor attacked government spending, President Kennedy's "abuse of his presidential powers," and the present administration attempt to gain "complete control of the nation's economy."

"The Federal Government is spending money at the rate of \$3,000 per second," said Seale. Glancing at his wrist watch, he said "In those five seconds

they just spent \$15,000."

"The theory that we can spend our way into prosperity is a bunch of malarky--that money comes out of our taxes," he cautioned.

Seale said that President Kennedy has shown he's not afraid to use all the power he can command "plus some." He listed the ways the president has controls over congressmen:

- (1) Patronage power (appointments, committee assignments);
- (2) Economic powers and pressures (the president's intervention in the steel strike) and
- (3) Control of news media.

Those media which don't agree with Kennedy are not given news, Seale said.

"The country is definitely under the control of bought-off congressmen," Seale stated. He listed the defeated Urban and Farm bills as attempts by the administration to gain complete control of the nation's economy.

As to his reasons for seeking the office, Seale said "You need conservative representatives who will stand up for you in Congress."

Seale stated that many proposals have been defeated recently because many congressmen were afraid to face their constituents at home. "We have just enough conservatives in Congress to defeat the bad bills now. We don't have enough to get our own bills passed," he said.

He pledged himself to work toward balancing the national budget, with a systematic retirement of the national debt; getting the government out of as many businesses as possible and reforming the tax laws.

He went on record as opposed to progressive income tax as well as withholding tax. "If a person had to write out a check for the lump sum at the end of the year, he would think more about how Congress spends his money," Seale said.

The Congressional candidate said he believed the United States should get out of the United Nations, and should cut off its foreign "giveaway" program. "Any money given to another country should be strictly on a loan basis," he said.

Seale had a busy day in Parm-

er County, beginning with a 7 a. m. breakfast at Earl's Cafe in Friona. He had a "coffee break" meeting at Bovina, a noon luncheon at Farwell, and afternoon sessions at the Frank Hinkson residence and White's Elevator.

His wife, Polly, accompanied him at his engagements.

Board Hears Three Requests

The board of equalization for the City of Farwell heard requests for changes in taxes on property from three persons at the meeting of the board Tuesday, July 24, at the City Hall. Mrs. Dorothy Eason, city secretary, says that two persons requested changes on residences and one requested a change on a business. Serving on the board this year were Clay Henson, chairman, Sam Rundell and Ernest Kube.

Farwell Water Use Shows Big Increase

In the space of just one year consumption of water by Farwell residents increased a whopping 54 percent, according to figures supplied The Tribune by Graham-Shuman Agency. (The local firm keeps records for the Farwell Waterworks.)

Tabulations were run on the month of June for 1961 and the same month this year. In June of last year 10,186,000 gallons was metered to customers in Farwell. By contrast, the gallonage jumped to 15,671,000 last month--an all-time high for the city.

Residents agree that June of 1962 was one of the driest (if not hottest) summer months on the record books, and Farwell has acres of lawns and gardens that cried for a drink. From the looks of the figures, property owners gave their greenery what it asked.

The record pumpage coincided with an increase in rates which was announced by the company three weeks ago. The volume of "irrigation" rate was raised from 15 cents a thousand to 25 cents a thousand gallons. Thus, the increase came at just a time when it was most felt--a period of high volume consumption.

The "base rate" for Farwell water is \$2 for the first 2000 gallons. The next 2000 gallons are charged out at \$1 a thousand and then the rate drops to 25 cents for everything over the first four thousand.

These rates are similar to those in Texico, where the minimum is \$3 for the first thousand gallons, 60 cents a thousand for the next two thousand, and 25 cents per thousand for all over 5000.

Curiously, Texico users did not show the spurt in consumption over a year ago as did their neighbors on the Texas side of the Twin Cities. Water used in Texico in June of 1961, according to city records, was 4,454,090 gallons. This year it increased to 4,800,090 gallons in June, which is nothing to compare with the 54 percent rise indicated in Farwell. Farwell has 396 meters in service, which is up somewhat from 385 at this time last year. Texico customers number 273 now as compared with 258 last summer.

Grand Jury Indicts Former Bovina Mayor

Two indictments of four counts each against Emmett Tabor, former mayor of Bovina, were returned by Parmer County Grand Jury following a Monday session.

A shortage of \$13,055.21 was found in City of Bovina funds following Tabor's resignation as Mayor in February. Restitution of the entire amount was made. He was charged with

felony theft following his resignation.

Each of the indictments charged Tabor with theft, embezzlement, forgery and passing, according to Hugh Moseley, county clerk.

Tabor was released on bond following the filing of charges in February.

In other action Monday, the grand jury returned two indictments against R. G. Sparks of Bovina, each indictment charging statutory rape and incest. His bond is set at \$12,500 on each charge.

Gary Green was indicted on a worthless check charge; three indictments were returned against Abel Gomez for forgery and passing; Seth Large Jr., Alvin Hollings and Wilkie Lee Alford were indicted for auto theft and burglarizing Bovina Dairy Freezer; Joe Morris was indicted for forgery and passing and the same forgery and passing charge was returned against Harold F. Robinson.

Charles L. Mercer served as foreman of grand jury. Members other than Mercer were A. W. Anthony Jr., Claude Miller, Joe Blair, Wyle M. Bullock, C. V. Potts, Tom Caldwell, E. W. Chester, Alvin Glasscock, Cly Henson, J. B. Jennings, Clarence Johnson.

Tabor, a barber in Bovina, was a veteran member of Bovina city commission. He had served two two-year terms as city commission. He had served his first two-year as mayor at time of his resignation.

Billingsley Car shows extend of damage in Monday accident.

Farwell Chamber Meets Tuesday

Farwell Chamber of Commerce will meet in regular session Tuesday, July 31, at 5 p. m., at the bowling alley cafe.

Hurshel Harding, chamber president, says routine business will be discussed and that nothing special is on the agenda for the meeting. All members are urged to be present.

Local Man's Sister Dies

Funeral services were conducted Wednesday afternoon in the First Methodist Church of Muleshoe for Mrs. Ina Francis Owens, sister of Alfred Hapke of Texico.

Mrs. Owens died Monday morning. Other survivors include her husband, three sons, a daughter, two sisters, 11 grandchildren and four great-grandchildren.

Burial was in Muleshoe cemetery.

Helton Team Wins District Tournament

The Helton Oilers won first place in the district softball tournament Monday night in Clovis when they shutout Gold Lantern, 7 to 0.

The Oilers got two hits and two runs in the first, three hits and four runs in the third, one hit and one run in the fifth, and one hit in the seventh to secure the win. Ox Louis and St Koenigs handled the pitching for the Oilers with Louis getting credit for the win.

The win sends Helton to the state tournament in Albuquerque, August 2, 3, 4, and 5.

Light Session For Texico Councilmen

In a Friday meeting, of Texico City Councilmen business transacted was light with most of the discussion being confined to routine matters.

A letter from the State Drivers License Bureau was read by City Attorney, Harry Patton stating that the City of Texico is one of the three approved places in Curry County for the obtaining of drivers license. Mrs. Juanita Autry, city clerk is to give the written test to license applicants and E. C. Clifton, town marshal is to give the road test. The office is open all day each day with the exception of Saturday and Sunday.

Also up for discussion was the purchasing of a police car to be used by the town marshal. A committee of three councilmen was appointed by the mayor to inspect the car Saturday morning and they were given permission to buy the car if they could obtain it for \$600, or less and buy it on the lease purchase agreement. The car in question was one which the Clovis Police Department had recently used and is a 1961 model.

Next meeting will be August 3, 4:30 p. m.

Sarah Beth Walker Crowned GA Queen

Before an altar arrangement of green and white candles, Miss Sarah Beth Walker was crowned Queen with scepter of the Pleasant Hill Baptist Girls Auxiliary Sunday night.

Attending Miss Walker as Queen was Miss Mary Dane, with other attendants being Veda Wil-

son, princess; Janine and Bette Clark maidens; Elaine Kelley and Jamie Reimer, flower girls; Johnny Dane, crown bearer; and Dyame Frazier, scepter bearer. Escorts for Miss Walker and Miss Dane were Jackie Dane and Weldon Walker.

Child Breaks Arm in Fall

Glaire, four-year-old daughter of Mr. and Mrs. John McFarland, fell while playing at the home of her aunt, Mrs. Darrell Norton, Sunday afternoon breaking both bones in her right arm just above the wrist.

She was hospitalized in Friona overnight and the arm was placed in a cast. She returned home Monday afternoon.

Herington Home

Stan Herington, son of the Duane Heringtons of Farwell, is reported this week to be getting along fine following his recent hip surgery.

Politics was a natural subject at a luncheon held for Jack Seale at the Spur Restaurant Monday at noon. Seale, who is mayor of Amarillo, is running on the Republican ticket for U. S. Congressman. He opposes Walter Rogers. Clockwise, those at his table included Frank Hinkson, Les Bruns, Seale and his wife, Polly, and John Zahn.

None Injured In Mishap

An accident involving Phillip Billingsley of Farwell and Jimmy Clark, an employee of Red Ball Freight Co. in Clovis, took place at about 6 p. m. Monday at the intersection of Third and Main in Farwell.

The accident occurred when the Billingsley car, a 1955 Ford traveling west on Main, struck a Red Ball Freight Co. truck turning north. The impact caused the Billingsley car to veer and strike a 1959 Chevrolet pickup, owned by James Ussery which was parked in front of Ussery's place of business.

Deputy Sheriff Tom Atkins, the investigating officer, estimated at \$100 to the truck and \$50 to the pickup. There were no serious injuries and no charges were filed.

Four Building Permits Issued

Four building permits were issued at the Farwell City Hall during the month of July with permits going to Tom Lindop for the construction of concrete driveways and sidewalks at his home; C. M. Meeks for the construction of a double driveway, storm cellar, block fence and storage room; Ray Mears to construct concrete driveways at his place of business, and C&C Construction Co. to build a brick veneer residence and double garage.

Nix Visits Here

J. O. (Jim) Nix arrived in Farwell last week for an extended stay in the home of his son, Charlie Nix, and to renew acquaintances with old friends.

Moody To SMU

C. L. Moody, vice-president of Clovis National Bank and son-in-law of Mr. and Mrs. A. B. Bell of Texico, is in Dallas where he will attend classes at SMU for the next two weeks. He will study accounting.

Mrs. Moody will visit with her parents during his absence.

Little Leaguers Win Over Bovina

The Texico-Farwell Little League teams wound up this week's action with one win and two losses.

The Lions grabbed third place in the league Thursday by beating Charles Oil Company of Bovina, 21 to 7.

The Lions got two runs in the first, five in the second, seven in the third, and seven in the fourth to take the win. The big gun for the Lions was Rickey Stanley who got a single, double, triple, and home run. The next big hitter was Ardel Autrey with two doubles and one single. Tim Crume and Robin Mahaney handled pitching duties for the Lions with Crume getting credit for the win. Grisom was tagged for the loss.

On Monday, Charles Oil beat the Texico-Farwell Red Tops by a score of 16 to 12.

The Red Tops collected four runs in the first, off a double by Roddy Pearce and six straight walks. They picked up two more runs in the second and third and two more in the fourth when Doug Harriman doubled, J. B. Taylor walked and Roddy Pearce hit a triple. They got one more in the fifth and collected one in the sixth when Greg Meeks walked, Taylor got on base on an error, Pearce walked, and Roy McDaniel singled to drive in Meeks. Pitching for the Red Tops were McDaniel, Taylor, and McCloud.

The Lions were defeated Tuesday by Oklahoma Lane Farm Supply, 13 to 1. The Lions' lone run came in the first inning when Greg Hargrove tripled and

Jim Webb singled to drive in the run. The losing pitcher was Tim Crume.

The Babe Ruth League Lions defeated the Melrose Rebels Saturday night by a score of 27 to 10 behind the pitching of Emmet Autrey.

The next game for the Red Tops is Friday at 6 p. m. when they meet the Oklahoma Lane Farm Supply team. The Lions play their next game Thursday with Bovina Implement.

Lazbuddie School Opens August 27

Lazbuddie school has set the opening date for the fall term as August 27, according to word received from Superintendent Ward this week.

The faculty has been completed with the approval of contracts for Alton Warren, who will teach in the seventh and eighth grades and Mrs. Reita Warren, who will teach second grade.

The board also increased the tax rate for the 1962-63 school term from the present \$1.65 to \$1.75. This increase was necessary to take care of expenses occurring from the renovation of classrooms in the old red building, home making cottage, field house, and the football stadium. The increase in the Local Fund Assignment set by the state continues to cause and increase in the budget each year.

Past Resident Dies In California

Funeral services were held in Delhi, Calif., Saturday for William (Bill) Goforth, 51, who passed away in a Delhi hospital Monday as the result of complications from an injury suffered from a power saw.

Burial was in Turlock Cemetery at Delhi. Mr. Goforth farmed and did carpentry work here for a period of 16 years before moving to California in 1946. He was a member of the Delhi Church of Christ.

Survivors include his wife, Pearl; one son, William Goforth with the U. S. Army in Germany; one daughter, Mrs. Jo Anne Lacey of Delhi; nine sisters, Mesdames Melvie Ham of Oregon, Agnes Reese of Gallup, Rose Jones of Texico, Katherine Cote of Clovis, Polly Duncan of Texas, and Ollie Hannah of Michigan; and Misses Mary, Margaret and Nanny Goforth of Farwell; three brothers, Joe of Farwell, Elwood of Texico, and Henry of Missouri, and four grandchildren.

Local people attending the services were Misses Mary and Margaret Goforth, Frank Jones and Mrs. J. A. Jones.

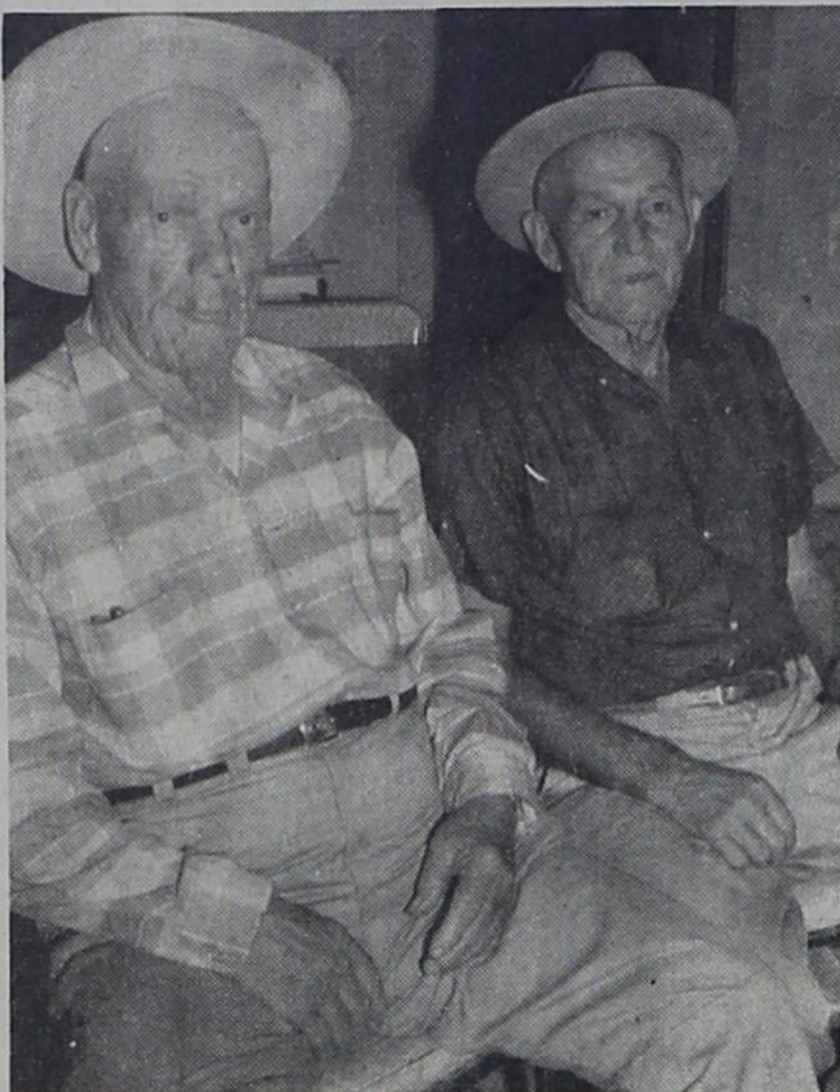

I wish Cox luck and I hope he wins. I am going to vote for him. It will not be tragic for Texas if he loses, because Conally is fundamentally a conservative also, even though the ties he has with the New Frontier are cause for concern. Another reason I would like to see Cox win is because I think it is time Texas became a true two-party state. There is no shadow of a doubt that we have a rift of enormous proportions in the Democratic Party in Tex- (Continued on page 2)

Brothers Re-united After Forty-three Years

By Chris Moss
At 4 p.m. Monday Mrs. O. B. Pipkin opened her door to a man who was an apparent stranger to her, but who insisted upon waiting to see her husband when he arrived home from work.

After talking with her for a few minutes he revealed that he was A. R. Pipkin, a brother of O. B., whom the Pipkins had not seen in many years. The brothers had last seen each other in Sherman, early in 1919 when each was making a move with the O. B. Pipkin family coming west and settling at Farwell and the A. R. Pipkin family going east to settle at St. Louis, Missouri. The Missouri settlers later went to Corpus Christi and finally settled on a farm at Talco, where he resided for 29 years until his retirement some three years ago. He now lives in the town.

O. B. Pipkin and his brother A.R. are renewing their acquaintance after a 43 year separation.

About a year ago, the brothers began a correspondence after having located each other through a third brother Ed, 84, who lives in Farmington, Missouri. A. R. says that he sees Ed quite often, but it has been a number of years since O. B. saw him and he recalls that at their last meeting, it had been some 33 years since they had last met. The brothers hope to have a reunion with their brother, Ed, in the early fall when O. B. plans to make a visit to Talco.

When asked about the changes the years had made, the brothers replied almost in unison "Why had heard, but had only seen when he was a small boy. O. B., 74, has two sons who had never met their uncle and came to Farwell from their homes in Clovis and Amarillo over the weekend to meet the uncle and cousin.

I never would have known him; I never knew anyone could get so ugly in only 43 years." The brothers say that they never meant to lose track or be apart for so long but time does fly and each was busy in his own way and the years went by so swiftly; but now that they are together again, they say never again will we let it happen.

Entered as second class matter at Farwell, Texas, under the act of March 3rd, 1879. Published every Thursday.

SUBSCRIPTION RATES -- Farmer and adjoining counties, \$3.00 per year; elsewhere, \$4.00 per year. Payable in advance.

Missionary Speaks At Texico Church

M. M. Henson, missionary-elect to Brazil, was guest speaker at the Calvary Baptist Church in Texico Thursday night.
Henson, who is from Poplar Bluff, Mo., is touring this area making talks in churches prior to leaving for Brazil.
Following his talk Thursday night, women of the church served refreshments and a fellowship period was enjoyed.
In other activities at the church, a group of 16 members plans to leave next Wednesday for a four-day session at Camp Thunderbird, New Mexico. They will return home Saturday, August 4.

Public Hearing

There will be a public hearing on the 1962-63 budget of the Farwell Independent school district on Monday, August 6, at 8 p.m. in the superintendents office. Anyone interested in this budget hearing should be present.

Pleasant Hill

BY MRS. BUCK TAYLOR

FOR SALE:

1956 International, 36 passenger school bus, superior body and a 1958 Chevrolet, 48 passenger school bus, superior body. Bids will be accepted until 8 p.m. August 6. Mail bids to Farwell Independent school district

Box F, Farwell, Texas

The board reserves the right to refuse any and all bids.

Hooper--

I doubt that the conservatives (who trace their lineage to the "Shivercrats") will ever manage to boot the liberals (the DOT's, "party faithfuls" and "true Democrats") out. The Democratic national Philosophy is too antagonistic for this ever to become possible as a practical matter of politics.

Since Tower won his amazing victory, candidates on all levels are stepping forth under the Republican banner. Since reconstruction days, that has been considered an invitation to tar and feathers in the Lone Star State, but if Jack Cox should win, the GOP kiss of death could become the wand of the magi.

A little tot, in church for the first time, watched the ushers pass the collection plates. When they neared his pew, he piped up loudly, "Don't pay for me, Daddy, I'm under five."

Lutheran News

Confirmation Class meets each Wednesday and Saturday morning at 9:30 a. m.

Youth choir meets each Friday morning at 9:30 a. m. For their first performance the youth choir has chosen the hymn "Jesus Like A Shepherd Lead Us." This will be presented July 22.

July 29, the annual congregational picnic and chicken barbecue will be held. Games are planned for the Sunday School and the Walther League has challenged the oldsters to a ballgame.

Sunday School teachers training class will meet August 1. Lutheran Women's Missionary League will meet August 2.

July 29, 7:30 p. m. Rev. Sander will serve Immanuel Lutheran Church at Rhea in the absence of Rev. Bergman of Clovis who is their vacancy pastor.

Lawrence Kreigel of Bovina is attending L. S. V. School at Texas Tech in Lubbock where he is taking a course in leadership training.

Letter To Editor

Dear Staff,
Thanks very much for the nice write up in the Tribune. Of all the papers that carried it, I thought yours was the best. Thanks again,
Charlie Phillips

Uncle Ray's "Hot Air"

The customer was buying a fountain pen for his son's graduation present. "It's to be a surprise, I suppose," observed the clerk. "I'll say it is," the father replied, "He's expecting a convertible."

"You said," exclaimed the irate caller, "that I had resigned from the town council and intended retiring from business into private life." "But," protested the editor, "all that is quite true--"

"Quite. But you printed the information under 'Public Improvements.'"

It will be an improvement on your budget when you trade at Uncle Ray's. Don't forget plenty of ice for these hot days.

FIRST DATE

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake, (2) For his children's sake, (3) For the sake of his community and nation, (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

It was in May, several years ago that Mildred moved next door. That was a break for Eric. It is so easy to get acquainted with one's neighbors. The first date naturally called for careful strategy. You don't want to seem too eager -- but you want to know what she likes . . . and what she's like. Eric's and Mildred's first date was a Youth Fellowship supper at the church. Eric happens to be a leader of this group. And Mildred happens to be an earnest Christian girl.

Of course, happens is a very broad word. It means that Eric's and Mildred's parents had once decided that a son or a daughter ought to be given the advantage of religious training.

Now Eric and Mildred are engaged. And everybody says they were meant for each other. And the altar before which they take their vows will be the heart of the religious life of their family. Thus it happens!

Auxiliary Members Have Social

Firemens Auxiliary members of Texico met in the home of Mrs. Fred Danforth, Monday night for a social and short business meeting.

Plans were made by the members to piece a quilt and sell it later and also to sell Christmas cards. Anyone desiring to order personalized cards now may contact Mrs. Perry Winkles at her home.

A report was heard from Mrs. Russell Johnson on recent activities of the Auxiliary. They were recently called by city marshal, Slim Clifton, to lend assistance to a family who became stranded in Texico while trying to reach relatives in Oklahoma. The Auxiliary made

a small cash donation to the family and they continued their trip. A plant was also sent to Mrs. Walter Freeman, who recently underwent surgery. Refreshments of strawberry shortcake with whipped cream and pops were served to

Mesdames Rip Snodgrass, F. S. Thigpen, John Adams, Perry Winkles, Elmer Teel, C. H. Webb and Russell Johnson.

Family Reunion In Lewis Home

The Sam Lewis home in Texico was scene of a family reunion Sunday, with family members present from Nebraska, California, Colorado and Texas.

Attending the affair were Mrs. Lester Busch and twin daughters Pat and Pam from Colorado Springs, Mr. and Mrs. Frank Lewis from Davis, Calif., Mrs. Thyra Miller from Kerney, Neb., Mr. and Mrs. Bud Ninyard and family from Silverton and Mr. and Mrs. Raymond Lewis from Lubbock.

Kennedys Announce Arrival Of Daughter

Mr. and Mrs. Edwin Kennedy of Clovis are announcing the arrival of a daughter, Sunday, July 22, at 4 a.m. in Clovis Memorial Hospital.

The baby weighed 6 lb. 12 1/4 oz. at birth and has been named Kari Lynn. Grandparents are Mr. and Mrs. Ralph Payne and Mr. and Mrs. L. O. Kennedy, all of Hobbs, and great-grandparents include Mr. and Mrs. Frank York of Portales and Mrs. Minnie Boaz of Hobbs.

Kennedy is employed at the local Piggly Wiggly store.

Lunsford Family Has Dinner

A dinner for family members was held the past Sunday in the home of Mrs. Charles Lunsford in Farwell.

Those in attendance were Mr. and Mrs. E. V. Plaster from Clovis, Mr. and Mrs. Dickie Plaster and Shane from Salt Lake City, Mr. and Mrs. Buster Lunsford and children of Farwell, and Mr. and Mrs. Bobby Gable and children from Muleshoe.

Mrs. Charlie Boyd, a sister of Mrs. Lunsford from Overbrook, Kansas, was also present.

LeeAnn Williams Is Four Years Old

LeeAnn Williams, daughter of Mr. and Mrs. Bert Williams, was honored with a party on her fourth birthday in the home of her parents, Saturday, July 7.

All of the little guests arrived wearing bathing suits and the afternoon was spent in swimming. After which the children watched LeeAnn open her many gifts. Miniature beach hats were given the children as party favors.

Refreshments of birthday cake decorated with a miniature swimming pool on which miniature baby ducks floated was served with punch to Deana Williams, David Snider, Susan Sheriff, Connie and Tim Jones and also Mrs. Johnnie Williams, LeeAnn's grandmother, and Mrs. Maggie Stone her great-grandmother.

Crooks Family Take Vacation

Mr. and Mrs. R. E. Crooks and son, Keith of Texico accompanied by Mr. and Mrs. R. L. Crooks and daughter, Raelene of Montclair, Calif. were weekend visitors in Northfield, Tex.

At Northfield they were joined by Mr. and Mrs. Walter Timmons for a trip to Tyler where they visited with Mr. and Mrs. Troy Phillips going from there to Troup to visit with Mrs. Lizzie Crooks. Mrs. Crooks is the mother of R. E. and R. L. Crooks and Mrs. Timmons.

While gone the Crooks families attended a reunion of the Monk family in Childress.

Janell Hudnall To Teach In Farmington

Miss Janell Hudnall, daughter of Rev. and Mrs. Harvey Hudnall of Texico, and a graduate of Wayland College in Plainview, will teach English in Tibbetts Junior High School in Farmington in 1962-63.

Miss Hudnall received her B. S. degree in secondary education, with English and arts as her teaching fields in May. She was art editor of the Wayland Literary Magazine, vice-president of Owen Hall, women's residence hall, and last year was on the dormitory court and was an American Heritage Essay Contest winner. She was also chosen as winner of the outstanding achievement award in art by the faculty of the Division of Humanities and was listed among the college honor roll students for the spring semester.

Mrs. Winnie Bradley And Joe Cobb Marry

Announcement was made this week of the marriage of Mrs. Winnie Bradley of Clovis and Tom Cobb of Farwell.

The couple was married July 16, in Ft. Sumner by Rev. Harry T. Martin, pastor of the First Baptist Church, in Ft. Sumner.

After a short trip to Las Vegas the couple are at home in Clovis.

Companion Class Has Chicken Fry

An old-fashioned chicken fry was enjoyed by fifty members of the Companion Class of Oklahoma Lane Methodist Church the past Tuesday, when members met at the church and fried the chicken in an iron wash pot. Children of members were guests.

Each member brought a salad and pie to complete the menu. Wendol Christian is teacher of the class.

LOCALS

Mr. and Mrs. Cecil Dykes and children of Amarillo visited over the weekend in the Russell Johnson and Homer Dykes homes.

Joe Boltinghouse and his mother, Mrs. Sid Bell and a daughter, visited in the Rev. J. L. Bass and Russell Johnson homes last week. Mrs. Bell is the former True Alley and attended school at Fairfield as a child. She and Mrs. Johnson are childhood friends.

Mrs. Gertrude Davidson of Houston, who has been visiting in the Sam Randol, Ebb Randol, T. E. Randol and Russell Johnson homes, left for her home Saturday. Mrs. Davidson is a niece and cousin of the local people.

Texico Grads Plan For Future

(Continued from last week)

Larry Richardson, son of Mr. and Mrs. Jess Richardson, received a scholarship to New Mexico Institute of Mining and Technology at Socorro. While in high school, he was president of his junior and senior classes and was named to the all-state chorus his senior year.

Richard Ridings is working in Carlsbad and will continue to work there this fall. Richard has been active in FFA work while in high school and was vice-president of the FFA his senior year. He is the son of Mr. and Mrs. R. D. Ridings.

Freddie Taylor has not decided what he will do next fall. He participated in baseball in high school and was named class favorite his senior year. Glenda Billingsly is now Mrs. Bill Thigpen. She took part in sports for three years and was reporter of the press club her senior year. Glenda is the daughter of Mr. and Mrs. H. H. Billingsley.

Attending college at ENMU

this fall will be Sharon Tompkins, daughter of Mr. and Mrs. Earl Tompkins of Rosedale. Sharon was a varsity cheerleader for three years and was named class favorite her senior year.

Evie Thornton is married to Roy Thornton and is living in Clovis. Evie has been active in the FFA for two years and was a member of the press club during her senior year. She is the daughter of Mr. and Mrs. C. W. Swann of Clovis.

Dwight Turner received a scholarship to the University of New Mexico where he plans to major in chemical engineering. Dwight was the top student in his class scholastically for the last four years and was valedictorian of the graduating class. He was a charter member of the National Honor Society and served as president. He also was a top basketball player in high school and served as president of the student council his junior year. Dwight is the son of Mr. and Mrs. J. T. Turner.

Jerry Walker is undecided as to his plans next fall. This summer he is on the wheat harvest. In high school, Jerry was active in FFA work and played baseball. He is the son of Mr. and Mrs. R. M. Walker of Pleasant Hill.

Ronald Watts is working for Don Sudderth this summer and plans to attend college in 1963-64. While in high school, Ronald won the Spanish medal his junior year and was co-editor of the school newspaper his senior year. Ronald is the son of Mr. and Mrs. E. G. Watts.

Patsy Wall is married to Everett Widner. Patsy was a cheerleader her sophomore and junior years and was president of the press club her senior year. She is the daughter of Mr. and Mrs. Willie Wall.

Hospital Notes

Jimmy Hill, 14-year-old son of Mr. and Mrs. John Hill of Texico, is feeling fine following his recent appendectomy. Carol Bell is recuperating nicely from her recent tonsillectomy.

H. H. Petree is doing well, according to family members, and would enjoy visits from friends.

R. S. Tucker, who recently broke his leg, is up and about in a wheel chair and enjoys visiting with his friends.

Mrs. Ellen Daniels, who suffered a stroke last week, is "just about the same," according to family members.

J. J. Spurlin, who has been a patient in Clovis Memorial hospital for several weeks is feeling much better, according to family members. He may have limited company.

Mrs. Doran Returns From Institute

Mrs. J. Buck Doran, guidance counselor in the Texico Schools, returned Friday from Las Cruces where she has been attending a guidance and counselors institute since June 20.

Mrs. Doran was one of the teachers selected in the state of New Mexico to attend the institute on a fellowship grant. Teachers attended the workshop from Indiana, Oklahoma, Texas, California, Arizona and New Mexico.

The institute is under the direction of Dr. William Cross of NMU; and main lecturers heard were Dr. Craddock, psychology instructor at the university; Dr. Caplin, guidance counselor for the Albuquerque public school system; and Dr. Reed Merrill from the University of Utah.

News From LAZBUDDIE
BY MRS. C. A. WATSON

Recent visitors in the home of Mrs. E. H. Briggs are her mother, Mrs. Jennings, and her sisters, Mesdames Elliot Taylor and Pat Henry. Mesdames Jennings and Taylor are from Lubbock and Mrs. Henry lives in Dallas.

Marianna Gammon has been vacationing for the past few days.

Mrs. Lena Menefee spent several days in Abilene, Arlington, Dallas and Greenville. She attended a reunion of the Monney family in Greenville.

Sunday guests in the Menefee home were Mr. and Mrs. Sam Long from Hereford and Mr. and Mrs. J. S. Menefee and Carolyn from Corpus Christi.

Mr. and Mrs. Woodrow Cargile and children from Hobbs have been visiting in the home of his uncle, Dan Cargile.

Sunday visitors in the Cargile home were Mr. and Mrs. Dwan Menefee of Friona, Mr. and Mrs. Preston Cargile of Lariat and Mr. and Mrs. Don McDonald of Muleshoe.

Don Watson was a weekend guest of Robert Garlington in Muleshoe.

Mrs. Clyde Redwine entertained with a barbecue supper in her home honoring her parents, Mr. and Mrs. Raymond Houston, on their 23rd anniversary Thursday. Those in attendance were Mr. and Mrs. Houston, Gene and Harold Houston and Carol Redwine.

Lazbuddie HD club met July 12 for their last regular meeting for the summer. Plans were made to help the 4-H girls with their annual picnic.

Mrs. James Robinson, Sherry, Vickie and Jimmy visited in the home of Mrs. J. O. Webb in Malone the past week. They also visited with Mr. and Mrs. Arnold Webb who had recently been in a car wreck. The couple have been dismissed from the hospital but will be in braces for some time.

Recent visitors in the L. M. Hardage home were Mr. and Mrs. Jimmy Ady from Burkburnett and Mr. and Mrs. J. A. Britton. The families all vacationed in Red River and Cannon City for several days.

Those attending the Farmers Union meeting in Lubbock Thursday were T. O. Lesly, O. D. Spitzer and Messers and Mesdames Wyle Bullock, Freeman Davis and Leon Smith Jr.

Mrs. Charlie Watson received word of the death of her five-year-old nephew, Danny Cook, Friday. The Cook family was vacationing in Mountain Park, Okla., at the time and the child stepped into a deep hole while wading in a shallow pond and drowned before help could reach him. Funeral services were held in Mountain Park Sunday afternoon. Survivors include his parents, grandparents, Mr. and Mrs. Allen Cook of Mountain Park, and Elder and Mrs. Jimmy Bass of Littlefield.

Morris Bruns was a weekend visitor in the home of his parents, Mr. and Mrs. L. F. Bruns.

Mrs. J. B. Jennings, accompanied by Twila Gallman, Clark King and Tamme Jennings is in Roaring Springs this week to attend a district planning retreat.

The sub-district meeting of the youth fellowship of the Methodist Church met at Lazbuddie the past Sunday with Miss Kathy

Moore, vice president, in charge of the program.

Open house was held at the new Methodist parsonage Sunday afternoon with 56 persons in attendance. Piano selections were rendered throughout the afternoon by Misses Tamara Jennings and Charlotte Seaton. Misses Karen King and Twila Gallman presided at the guest register and the serving table.

Mr. and Mrs. Darrell Thompson announce the arrival of a son, July 14. He weighed 9 lbs. 10 oz. and has been named Bobby Darrell. Grandparents are Mr. and Mrs. Duane Darling of Lazbuddie and Mr. and Mrs. Darrell Thompson Sr. of Friona.

Mr. and Mrs. Gary Dale announce the arrival of a daughter, Monica Lynn, weighing 6 lb. 3 oz., July 7. Grandparents are Mr. and Mrs. L. R. Hall of Lazbuddie and Mr. and Mrs. Dale of Muleshoe.

Mr. and Mrs. Andy Fuqua are announcing the arrival of a son, Roy Dale, July 9 at West Plains Hospital in Muleshoe. He weighed 6 lb. at birth. Grandparents are Mr. and Mrs. Fuqua of Spur and Floyd Schumann of San Diego.

Birthday greetings to Gary Johnson, Larry Davis, Johnace Seaton, Linda Hodges, Lube Flores, Suzanne Crooks, Berny Watson, Bennie Marrow and Charlotte Seaton.

Mesdames Lacy Hardage, John McGehee, C. D. Gustin, Tice Hugg, Duane Darling, Harold Wilson, Roy Miller, T. J. Brantley, Darrell Thompson, James Mabry, Pete Mimms and Clyde Monk were hostesses for a bridal shower honoring Miss Donna King, bride-elect of Odie Bradshaw, Thursday at the fellowship hall in First Methodist Church. The serving table was laid in the honoree's chosen colors of yellow and white and centered with a floral arrangement of yellow flowers flanked by yellow candles in crystal holders.

White individual cake squares and punch were served.

Mrs. Jess Pendergrass and Mrs. Oran Broyles each were lucky winners of a book of stamps at the grand opening of a new store in Muleshoe recently.

Young people from the Muleshoe Church of Christ were entertained with a wener roast at the barn on the Clyde Monk farm. Approximately 35 young people attended.

Mr. and Mrs. H. A. Harvey from Plainview visited with Mr. and Mrs. J. A. Harvey Saturday. Also visiting in the Harvey home was the Elton Schafer family from Springlake.

Eugene Houston returned Saturday from Pagosa Springs where he had spent a week with the Dave Bostic family.

Mrs. Carolyn Pilgrim and son Kirk, are visiting in the Frank Hinkson home.

Mr. and Mrs. John Agee left Saturday to attend the funeral of J. C. Stevens in Oklahoma City.

Mr. and Mrs. Vernon Goodwin of Seagraves were weekend guests in the home of Mr. and Mrs. Dan Cargile.

Mary Floyd suffered a painful, although not serious, injury Friday when a hoe flipped cutting her foot severely. She is to remain in the hospital for several days.

Mr. and Mrs. Max Steihock are announcing the arrival of a son, Dennis Glen, July 3. The young man weighed 7 lb. and 10 oz. at birth.

Crowded Out Last Week

The Bill Curry family and the Wesley Barnes family returned Friday from a trip to

4-H Club Members Attend Record Book Workshops

Twenty-three 4-H Club boys and girls attended special county-wide 4-H Record Book workshops conducted July 17 and 18 in Bovina High School Study Hall and Hub Community Center, Extension Service Agents, Miss Ettie Musil and Deryl L. Coker conducted the training. Instructions for the record books have been revised for this year. Record books are very different with the organization and stories of new instructions. Record books are an important part of the 4-H Club program. They give special training for youth in the importance of keeping records of time, money and energy management of all projects.

Four-H record books are due August 1 in the Extension Service Agents' office in Farwell. Record books will be judged in the county and district for the senior division. Boys and girls who are 14 to 21 years of age are eligible for the senior division. Junior division books will be judged in the county. Four-H members must be nine

to 13 years of age for junior division.

These record books will determine the awards to be presented at the annual Achievement Awards Program in November. Four-H members must enter completed record books before they are eligible to receive awards, medals or year pins.

Records may be entered in the following awards programs: achievement, agricultural, automotive, beautification of home grounds, beef, canning, citizenship, clothing, crop protection-crop production scholarship, dairy, Danforth leadership training, dog care and training, dress revue, electric, Texas Electric, entomology, field crops, foods-nutrition (Favorite Foods), fire prevention, garden, grain marketing, health, home economics, leadership, poultry, poultry fact finding, recreation, safety, Santa Fe, swine, tractor, wildlife conservation.

Four-H Club certificates and seals will be presented to clubs completing certain require-

ments. As one of the sixteen requirements for each club, 50 per cent of the club members must submit 4-H record books to be eligible for a certificate. To be eligible for a certificate with a red or blue seal 75 per cent of the members must submit records. For a purple seal 90 per cent of the club members must submit 4-H records.

Attending the workshop at Bovina High School were Tina Runnen, Mary Coffey, Martha Coffey, Sharon Martensen, Roger Martensen, Dwayne Bauer, Wayne Schueler, Danny Schueler, Darrel Schueler, Shirley Schueler, Dale Schueler, Kathryn Gober, Janis Billingsley, and Bruce Billingsley.

Attending the workshop at Hub Community Center were Judy Koelzer, Jill Mimms, Terri Sue Mabry, Adrian King, Marsha Schumann, Karen King, Patcine Broyles, Pat and Serri Tannahill.

Mothers and leaders attending were Mrs. Franklin Bauer, Mrs. Johnnie Rundell, Mrs. Leon Billingsley, Mrs. C. W. Tannahill, and Mrs. Ralph Broyles, Junior Assistant Extension Agent, Miss Cella Patton, also attended.

SOIL CONSERVATION DISTRICT NEWS

Wherever you live—in the country, suburbs, or urban area — you live in a watershed, an area where runoff water from rain and melted snow drains in a common outlet such as a stream, creek, river or lake. The watershed can be as small as a few acres or as gigantic as the Mississippi River Basin.

On a well-protected watershed, the excess water finds its way slowly down grassed waterways taking very little of the valuable top soil with it. The chance of flooding on the bottomland is greatly reduced. Therefore the damage to private and public property is lessened. In fact, of the 13,000 small watersheds in the United States more than 8,000 need protecting.

The protection of our land from floodwater and erosion damage is so vitally important nationally that in 1954 Congress passed a bill, Public Law 566, which enables local groups to obtain technical and financial aid from the Federal government in planning and developing watersheds under 250,000 acres in size.

Through a watershed project, conservation measures are established on the land, flood prevention dams are built, and channel improvements made where needed. The dams are designed to catch and hold peak runoff water and discharge it at a reduced rate down the streams and creeks.

In many cases these dams are designed for multiple use. The permanent pool of water backed up by the structure can be an important source of water for industrial, domestic and irrigation use. Most of the multi-purpose reservoirs provide ideal recreational facilities for swimming, fishing, boating and wildlife habitats.

Where these multi-purpose watershed projects have been established, the results have been extremely gratifying. It has meant less risk in farm-

STRIKING COTTON FIELD scene is the group of geese above, which were seen patrolling the place farmed by Mose Glasscock, one mile east of Farwell. The geese are said to be good for removing grass from cotton fields.

WITH THE COUNTY AGENT DERYL COKER

The current situation indicates that we could have a potential problem with the sorghum midge in grain sorghum this year. Last year the sorghum midge caused a great deal of damage on grain sorghum. Losses ranged from 20 to 100 per cent in a number of the High Plains counties.

1961 was the first year that we on the Plains encountered this particular insect, although we were fortunate that Farmer County was not affected as much as counties to the east and south. We could be affected this year, so farmers should be on the look-out for this insect.

Midge have already been observed in Lubbock county.

As the situation looks now we should not develop a serious problem for the next two to four weeks, and let's hope we have no problem with midge at all.

As a general rule the sorghum midge is a tropical pest and is most injurious in the humid parts of the state. The adult midge is an orange colored, fragile -- looking gnat or fly about 1/12 of an inch long. Adult females lay their eggs in the spikelet or seed husk of the plant.

Midge will attack grain sorghums, sweet sorghums, sudan grass and other wild or uncultivated grasses. The female adults mate and begin laying, a lower road and bridge maintenance cost, the addition of small industry and a general uplift in the economic conditions of the area.

ing eggs soon after emergence. Each female is capable of laying from 50 to 250 tiny white eggs during the 24 to 48 hours which it lives as an adult.

A single larva is capable of destroying the developing seed. The adult male lives only a few hours to one day, but an average number of 16 days are required for the midge to develop from egg to adult.

Midge damage closely resembles blasted or blighted sorghum heads resulting from disease and hard rain during the flowering stage.

Control recommendations are extremely difficult to make due to the lack of information on the habits of this insect. But insecticides such as Sevin, Toxaphene, Endrin, and Parathion have been effective when applied at the correct time. Insecticide treatments must be made one to four days after 90 per cent of the heads have emerged from the boot. There is no indication that sorghum midge problem exists in this area at this time, but farmers should check their fields at regular intervals, while the crop is booting.

Many farmers are confusing

the corn leaf aphid with sorghum midge, so no one should take control measures for sorghum midge until they know that the insect is present.

The corn ear worm also known as the cotton boll worm or tomato fruit worm is fairly numerous in some fields of grain sorghum in the county. Serious grain sorghum losses can result where populations are large. This fact may be more important this year where yields have apparently already been reduced by weather conditions. The presence of these ear worms or boll worms in grain sorghum does not guarantee that we will have a serious boll worm problem in cotton but indications are that our boll-worm population will be larger than in the past three or four years.

I strongly urge that fields be checked to determine whether the problem exists. A large infestation of these worms can definitely lower your yields.

FOR SALE

1955 Ford school bus, good condition, chain hoist 1 1/2 ton. Sealed bids will be accepted until 8:00 p. m., August 9, 1962. Mail bid to Lazbuddie ISD, Box A, Lazbuddie, Texas. The board reserves the right to refuse any or all bids. Also used tires and wheels, size 822.5 and 750.20.

Millers Say Government Goofed On Sedimentation

The government's provision that premiums on wheat with high sedimentation ratings would be included in the 1962 wheat price support was made over the objections of the people who are the biggest customers—the millers and bakers.

According to the millers, the sedimentation test is by no means a reliable test within itself to indicate the relative baking quality of wheat.

"Our industry is very much opposed to using sedimentation ratings as a basis for premiums," said Ray Pritchett of the Golden West Seed Company in Texico. Pritchett owns the New Mexico Milling Company in Clovis and Portales, N.M. It has been proven that wheat with a high sedimentation test—up to 70—can be very poor wheat for milling purposes, and is very often just that.

"If this type of wheat is put into the government loan program, it will never be sold, for premium or otherwise," said Pritchett. Since it would be of

little value to millers, he predicted that the government's storage problem would be increased, and farmers with this type of wheat, if they can get the market price, would be wiser to sell than to store it. "Of course, elevators are in business for storage, so they don't care how long it stays there," Pritchett said.

Pritchett recently mailed a letter to C. H. Moseley, chief of the Dallas ASCS office, at the latter's request. He also sent copies to Congressmen Walter Rogers, George Mahon, senator John Tower and others. In the letter, Pritchett told what he thought of the sedimentation program, summing it up as a "waste of the taxpayers' money."

The following statement was presented before the Sedimentation Conference in Fort Worth last September by R. D. Zumwalt of Burrus Mills, Dallas. It was entitled "How Millers and Bakers Look at the New Sedimentation Test."

Actually, this title is a misnomer; the test is not something new which was developed yesterday; in fact, many cereal chemists have been working with it for the past several years and, like many other things, it has some good characteristics and some not so good. To understand its purpose, we should go back to the miller of yesterday. He didn't have elaborate laboratory facilities to tell him which wheat was suitable for family flour and which was suitable for

bakery flour, so he made his selection simply by chewing a few kernels of each lot to test the gluten. The strong gluten was put aside for bakery, while the weak went to family flour. Later on, cereal chemists related gluten quantity to the measurement of nitrogen in wheat. While the test indicated quantity of gluten, it did not tell the quality of the gluten, so further tests became mandatory. More than twenty years ago most mills were using machines to ascertain gluten quality, and this is true today. The attitude of the milling industry is well stated in the following letter to Mr. Horace D. Godfrey:

"The USDA announcement of August 23rd stating that premiums based on sedimentation values would be included in the 1962 crop wheat price-support operation is of great interest to the flour milling industry. The announced purpose of the move—that is, to encourage production of higher quality wheat—is commendable. The industry itself spends a great deal of time, money and effort in behalf of this objective every year.

"Because of the importance to everyone concerned, that the new premium schedule be as practical and as workable as possible, we wish to urge that those who will be vitally affected in its day-to-day operation will be given an opportunity to review it in light of our experience. Millers have been checking and working with the sedimentation test for many years and are well aware of its value as well as its limitations as a single test for determining the baking quality of wheat. There is practically complete agreement that at best the sedimentation test gives only a rough indication of quality, and I know of no miller who feels that it alone is accurate enough to reliably indicate the relative baking quality of wheat.

"I wish to take this opportunity to offer the cooperation of the Millers National Federation in furnishing technical information and advice which may be of help to the Department in connection with its newly announced program. Inasmuch as any schedule of premiums which

might be developed will not go into effect until the 1962 crop, there should be ample time for the industries which will be most affected to thoroughly explore and appraise any proposed schedule before it is adopted and announced."

C. L. Mast, Jr., Exec. VP. Perhaps it will be of interest to you to study the information on the sheets given to you (copy of sheets attached) on which you will find on No. 1, thirty points of observation which are usually made for the selection of wheat—one of these tests being sedimentation. Obviously, some of the factors weigh very heavily and others hardly at all. The information on a sheet before you covers seven lots of wheat used in varying percentages to build a mill mix from which a particular type of bakery flour was produced. Actually, with today's high-speed bakeries producing many different types of breads with different methods, it has become necessary for the flour mills to supply flours with specific characteristics for those particular bakeries. This particular mix would be considered not exceptionally strong but, as I have said previously, it was designed and manufactured for a specific baker, and it suits him perfectly. We were surprised when we found the sedimentation grading of this particular mix to actually run 41.2, whereas a weighted average of the individual wheats was 47.48. This, no doubt, is an unusually wide variation, because it will be noted on the other sheet before you that various blends of only two wheats checked within a two-point margin.

When the program of incorporating sedimentation tests into next year's wheat loan program was announced, it was without prior consultation with the milling industry, and our

trade organization, the Millers National Federation, has been working diligently in an effort to learn the answers to the following questions:

(1) How accurately can the test results be reproduced? Under ideal conditions, what is the margin or error that can be expected?

The answer to this question is best found by referring to Dr. Walter T. Greenaway's report to the Association of Cereal Chemists. He tells of difficulties in checking between collaborators. Everything must be exact in order to check within two points, and low moisture wheat sometimes gives erratic results. Under ideal conditions our laboratories can usually check within two points; and, if they are further away than this on the first run, they can go back, do it over again, and, possibly, get within the two-point tolerance—but it isn't easy.

(2) What effect does storage of a year or longer have on sedimentation values?

We have no specific knowledge. However, I would personally doubt that the storage period would affect it to any appreciable degree. I have here a sample of wheat produced in 1932, and it might be of interest to run a sedimentation test on it.

(3) What correlation, if any, is there between sedimentation values and baking quality as measured by the baking test?

I am afraid there is very little correlation. One of the large milling companies told me they had sent to a statistical company in Chicago the detailed results determined by their mill laboratory on more than one thousand samples and asked that organization to correlate sedimentation values to baking quality. It was reported back to this milling company that in or-

der to find a correlation the factor would have to be .5 or higher, and in the case of the one of the one thousand samples, they came up with a factor of .4; thus resulting in their statement that there was no correlation between baking quality and sedimentation values.

(4) Since the USDA had decided to use sedimentation values, from a practical standpoint where should premiums begin? Where should discounts begin?

This is the hot one. From a practical standpoint, where should premiums begin and where should discounts begin? From the information floating around, I have heard some people advocate premiums beginning at 40, and possibly, applying on increments of 5 running up through 60. (This is the general pattern announced by USDA after this talk was presented.) One miller advocated a discount of ten cents per bushel on mellow varieties of wheat; I have not heard anyone suggest discounts below 40.

(5) If, for instance, premiums start at 40, what should the increment be between upward or downward graduation of a premium or discount scale?

This is closely related to #4, and that's where the heat is really encountered. What should the premiums be? As a miller and as a supplier to the baking industry, we have the obligation to furnish the product at a cost as reasonable as possible, so that the baker, in turn, may supply the consuming public with a product within the reach of everyone. We have had protein premiums applicable to loan values for many years and, no doubt, some wheat producers have received premiums beyond value, while other wheat producers have failed to receive full value for the quality wheat they produced. We, as millers, are heartily in accord with the principle of paying for quality. This, of course, is indicated by the spreads applicable to various wheats, as the high side and the low side for the particular protein wheat involved. In periods of abundant protein these premiums are relatively low. This year, with the scarcity of protein, they are extremely high. Still, the fact that there are high and low premiums indicate that someone is willing to pay for quality. The impact on the milling industry would be negligible if sedimentation loan value premiums were determined at a level not higher than the present loan or support protein scales. A discontinuance of protein premiums could then be accomplished in 1962, and sedimentation values substituted without causing extreme confusion; not only within the milling industry, but also within the grain trade as well. This is a personal observation and does not necessarily rep-

resent the view of the milling industry.

(6) Within the present knowledge available to your company, do you think your grain department will be able to buy wheat on the basis of sedimentation values?

This can be answered in the affirmative; the grain department can buy wheat on the basis of sedimentation values; but there will be other factors considered on each lot if it is destined to the milling department. For all practical purposes, wheat purchased for the milling of bakery flours is presently bought on sample. The laboratory analyzes it and, if it fits, the grain department is instructed to buy it. Regardless of its sedimentation value, the laboratory will still run proteins as long as flour specifications call for specific proteins, and I doubt that the entire

The story is told of a loaf of bread that fell from a baker's basket. When it hit the pavement, a crumb broke off and lay beside it. Almost instantly... three sparrows made a swoop for the crumb, and when the contest was over... two of the birds flew away without a bite... while the other carried off the meager breakfast. The loaf was untouched in the frenzy. Only the crumb had seemed a worthwhile prize to the birds. Just a little wider range of vision... and a little less greed... and each bird could have been more than satisfied. The moral is plain. Men... like birds... quarrel over trivialities... and in the heat of doing so... let life's bigger... more lucrative prizes escape them... unnoticed.

Tobacco Revolution
BALTIMORE, Md. (UPI) — The tobacco industry in the United States is in a "technological revolution" that is saving about \$100 million annually in the manufacturing costs of cigarettes and cigars, according to W. P. Cadogan, of the American Machine and Foundry Co., Springfield, Conn.

Cadogan told a symposium at a recent meeting of the American Institute of Chemical Engineers that the revolution involves mostly the use of "sheet" tobacco. This was described as grinding dried tobacco to 60 to 80 mesh size and bonding it together with an adhesive derived from tobacco stems.

world trade in wheat flour will discontinue protein specifications for a long time.

In conclusion, gentlemen, you must accept sedimentation tests, even with its higher laboratory costs and, sometimes, erratic results. It has merit when considered in the light of its limits. However, I doubt that anyone presently considers that the tests are more than an indication of wheat quality. If discretion is used in the application of loan premiums applied to sedimentation values, I believe the change will be most beneficial.

BY MISS LITTLE MILES

This is Farm Safety Week, July 22-28. The theme for this week is "Family Safety at Work and Play." Never a day goes by that we do not hear of serious accidents happening on the farm and in the house. Many accidents occur within our home that do not get publicity in the newspapers or on the radio.

I'm sure many of you have had cut fingers, scalds or burns, or ripped clothes because of carelessness. After it happened, I'm sure you could think back to say, "I knew better, I should have held the knife a little straighter" or "I should have been a little more careful and took my time."

Yes, we have to take time to practice safety. Safety is always in season, whether fall, spring, summer, or winter. We could even consider safety as good management. Remember the extra time it took you to apply first aid to a bruise or cut? These accidents usually occur when you are busy and every minute is precious to you.

We can learn to incorporate safety into everything we do. How many times have you read on the label of an aerosol can not to puncture it or throw it into the incinerator. It may explode while you are still holding it or explode from the trash you are burning. We know this, but we ignore the directions.

For appliances we have many safety rules we ignore. For instance, never plug a portable dishwasher into an outlet that is not grounded. Water and electricity do not get along together. Never use a combustible cleaning ingredient or solution in an automatic dryer or combination washer-dryer. That is unless you don't object to blowing out the front of it.

We've mentioned the hazards of clothing before, but we'll mention them again. Shoes rate high as causes for accidents. Broken-down counters on shoes or too-high heels often cause falls or sprained ankles. Slippery finishes on the soles of new shoes are often hazardous, especially on children's shoes. You can rub the shoe sole with light sandpaper, or over some sand, to prevent slipping.

Unbuttoned long sleeves are dangerous for you men while checking irrigation wells or working on tractors and implements. Many an arm has been twisted off or badly injured from

loose shirt tails or sleeves. Are you taking time to practice safety? Do you have guards on tractor shafts or irrigation motor shafts? Loose clothing could very quickly pull you into the shafts. Maybe you home-makers could insist that these guards be replaced for safety's sake.

Have you heard your friends say, "We surely were lucky"? Practice safety, don't leave safety to your guardian angel. We often take needless chances with little practices such as standing on a wobbly chair to reach to the top shelf. Steady chairs or stools are so much easier to stand on.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

"The agnostic can't find God for the same reason a thief can't find a policeman."

PCA, back in 1951 and 1952 was becoming increasingly aware of bureaucratic pressures concerning the operation of the various activities. They responded by making a hard, but determined effort to become independent of the USDA as soon as they were able to repay government funds.

Farm Bureau gave full and successful support to this movement which resulted in the present independence of the agencies which are now under the management of their own farmer members. This might be an indication of what should happen to some other governmental agencies which have since become able but not willing to launch out on their own.

This is National Farm Safety Week, and farmers and all others should be glad for the cooperation given by newspapers, radio, T.V., and other mediums of publicity. If the emphasis makes each of us just a little more conscious of our responsibility to our fellow man, ourselves and our families in our driving, work and play, it is well worth while.

There has been a lot of information regarding the frequency and types of accidents, but we would like to mention two or three of particular importance to rural areas such as ours:

1. One-third of tractor fatalities occur on the highways.
2. Three out of four traffic deaths occur on rural roads and highways.
3. Accidents happen close to home. Facts reveal that 65 per cent of all fatal accidents occur within 25 miles of home.
4. It is important to insure adequate and proper marking of slow-moving farm vehicles, including lights.
5. Encouragement should be given to regulations requiring that the operation of tractors and self propelled farm equipment on public highways be restricted to qualified vehicle operators.

As we said last week, office secretary Nell Davis is spending this week down at Corpus Christi at the annual Farm Bureau Institute. We are not sure at this time whether others from the county have been able to go or not.

Cards are being mailed soon, and we hope you will not neglect filing for your five cents per gallon state and four cents per gallon federal tax refund on non-highway used fuels.

CONSIDER THIS: The sacrifice of the wicked is an abomination to the Lord; but the prayer of the upright is his delight. Proverbs 15:8.

Plainview PCA Retains Top National Rankings

The Plainview Production Credit Association held its place in 1961 as the nation's largest, according to figures recently released by the Farm Credit Administration.

Serving an eight-county area of the High Plains, the Plainview association ranked first in three categories among nearly 500 associations serving the United States and Puerto Rico.

The association led in total loan volume, net worth and amount of capital stock owned by association members. It also held high rankings in the nation in two other categories, loans outstanding on December 31, 1961 and in accumulated earnings.

The association's 1961 loan volume totaled \$37,205,000, highest in its history. Total net worth and reserves was \$4,292,183, and capital stock, all member owned, totaled \$2,792,370.

The agricultural credit organization had \$12,833,000 in loans outstanding on December 31, 1961, fourth highest in the nation and highest among 36 associations in Texas.

"We are gratified that our association earned this recognition among the nation's Production Credit Association," commented L. R. Durham of Plainview, association president. "The figures themselves are important only in the fact that they reflect our continuous effort to provide dependable and progressive agricultural credit to our stockholders."

The Plainview Production

Credit Association, owned and operated in its entirety by more than 1,700 farmers and ranchers, provides agricultural credit in Farmer, Castro, Swisher, Briscoe, Bailey, Lamb, Hale and Floyd counties. Offices are operated in Plainview, Friona, Dimmitt, Tulia, Silverton, Muleshoe, Littlefield and Floydada.

Fred Conner of Plainview is acting general manager of the association. In addition to President Durham, other directors are Vice President Henry Hayes, D. S. Anderson of Muleshoe, Grady Shepard of Hale Center and Don Garrison of Silverton.

The 36 Production Credit Associations, serving all 254 Texas counties, loaned nearly \$400,000,000 in 1961. The nation's 500 PCAs had a loan volume of \$2.9 billion, a record high for any single year.

The HAPPY HOMEMAKER

BY JUNE FLOYD

Oven dishes are simple to prepare and a homemaker is able to obtain a subtle blend of flavors impossible to obtain in any other method of preparing food. Since complete meals are prepared in one all-purpose cooking pan, this method eliminates some dishwashing, too.

Basic instructions for preparing one dish meals in the oven or on top of the stove are as follows:

1. Brown meat over medium-high heat. Add fat if meat is very lean.

2. Cover pan after browning for two or three minutes. Then reduce heat to low and cook until nearly done.

3. Arrange vegetables around meat and complete the cooking over low heat.

IRISH STEW

3 lbs. lamb shoulder (cut in two inch cubes)
Stewing beef may be used if preferred

2 tablespoons fat
2 teaspoons salt
1/4 teaspoon pepper
1/8 teaspoon rosemary
1/8 teaspoon marjoram
1 onion, sliced
1 stalk celery, cut up
2 cups water

6-8 small, whole onions
6-8 medium potatoes
6-8 small carrots

Place cooking pan over medium heat. Brown meat thoroughly in hot fat. Season then add sliced onion, celery and water. Cover. After 2-3 minutes, reduce heat to low and cook about 45 minutes.

Then add remaining vegetables and thicken juices to desired consistency. Add cooked vegetables, mix lightly and heat thoroughly. Serves six to eight persons.

BEEF POT ROAST

3 1/2 to 4 lb. beef roast (chuck, round or rump)
6 potatoes, peeled
6 carrots
6 small onions
salt and pepper

Brown roast on all sides over medium high heat. Season with salt and pepper. Cover cooking pan and reduce heat to low. Cook slowly until roast is nearly done (2 to 2 1/2 hours).

Arrange vegetables around roast. Baste with meat juices and sprinkle with salt and pepper. Recover pan and cook until

vegetables are tender -- 30 to 40 minutes. Serves 8 to 10.

CORN AND HAM CASSEROLE

1 1/2 cup chopped ham
1 cup whole kernel corn
2 tablespoons butter
2 tablespoons flour
1 cup milk
1 tablespoon green pepper
1/4 teaspoon paprika
1 tablespoon onion
1/3 cup cheese, grated
1/4 cup cracker crumbs
2 tablespoons butter

Cook ham. Make a white sauce of the butter, flour, milk and paprika. Add corn, chopped pepper, paprika and onion. Pour into a greased casserole. Cover with a mixture of cheese, cracker crumbs and butter. Bake at 300-325 degrees for 30 minutes.

SKILLET HAM SALAD

1/4 cup chopped green onion
1/4 cup chopped green pepper
2 cups cooked diced ham
1 tablespoon fat
1/4 teaspoon salt
1/4 teaspoon pepper
1/4 cup water
1/2 pound sharp cheese, diced
3 to 4 potatoes

Cook and dice potatoes. Cook onion, pepper and meat in hot fat. Stir occasionally until meat is slightly browned. Add potatoes, salt pepper and water. Heat mixture slightly and stir in cheese. Heat just until cheese begins to melt.

PORK CHOPS BAKED IN TOMATO SOUP

Dredge six one-half inch thick pork chops with flour. Brown in hot fat. Place in baking dish.

Complete Brake And Bear Front-End Service

TIRE TRUING
WHEEL BALANCED
OVERLOAD SPRINGS

FREE INSTALLATION

On all Mono-Matic Shocks and Load Levellers ALSO

On Mufflers . Mufflers Guaranteed as long as you own the car

Boyd's Brake Shop

19 yrs in Clovis
221 W. Grand - Clovis

(If fried in electric skillet, drain grease drippings and add other ingredients.)

1 can (10 1/2 oz) can tomato soup
1 can (10 1/2 oz.) can water
1/2 cup chopped celery
3/4 cup minced onions
3/4 teaspoon salt
1/2 teaspoon paprika
1 green pepper, chopped

Combine ingredients, heat and pour around chops. Cover dish or skillet and bake at 350 degrees for one hour or at low heat in the skillet.

Another hazard of outings that is very prevalent during summer months is water. It is always a good idea to be well acquainted with any body of water before you go swimming or wading in it.

Before any group enters any water an expert swimmer should explore the bottom for sharp dropoffs. If there is any, non-swimmers should be sure to stay in the shallow water area.

Diving should always be limited to supervised swimming areas or bodies of water with which the diver is well acquainted.

With the new ice chests now on the market any picnic can be a cold lunch picnic and there's no end to the delicious dishes that can be prepared ahead of time and then served on the spot cold.

Or, if you want to serve sandwiches, you can make a variety of spreads which have been prepared and make sandwiches just before serving time.

MOCK CHICKEN SPREAD

1 lb. pork
6 hard boiled eggs

3/4 pint salad dressing
1/2 pound stew beef
1 whole stalk celery
salt and pepper

Boil meat with salt and pepper. Cool and chill. Grind eggs, meat and celery. Mix with salad dressing. Spread on crackers or slices of bread.

PIMENTO CHEESE SANDWICHES

1 hard boiled egg
1 1/2 tablespoons chopped pimento
2 tablespoons minced onion

1 tablespoon butter
1 tablespoon flour
1/2 cup milk
1/2 pound grated American cheese
dash cayenne pepper
1/4 teaspoon salt
1 tablespoon sugar
2 tablespoons vinegar

Chop the egg; add the cheese, pimento, onion and salt. Melt the butter in a double boiler; add the sugar and flour and blend. Add the vinegar, milk and pepper while stirring and

cook until thickened. Combine with the cheese mixture. Use as a spread for either open or closed sandwiches.
