

Last Rites Held For Mary A. Gage

Mary Alta Gage, 12, daughter of Mr. and Mrs. W. B. Gage of Bula, passed away at a local hospital Friday afternoon at 3:25 o'clock, following a four days' illness, as a result of an obstruction of the bowels and gangrene.

Funeral services were conducted Sunday afternoon, August 27, at 3 o'clock, at the Methodist Church, Bula, when large numbers gathered to pay their last respects to this lovely child, whose untimely death occurred only three days after she became ill. She was admitted to Payne-Shawwell Hospital on Thursday, and although an operation was performed in an effort to save her life, she passed away the next day.

Mary Alta was in the seventh grade at Bula school, a member of the Methodist Church and Sunday school.

The large attendance at the funeral services, and the elaborate floral offering, all spoke the love and admiration felt for the child in the community, and the respect held for the Gage family, who are prominent residents of Bula, and operate a home and garage, and have lived in the community for 11 years.

Rev. J. E. Peters, Methodist pastor of Meadow, Texas, officiated at the funeral services, assisted by Rev. C. M. Curry, pastor of Bula Methodist Church. Interment, in the large of Hammons Funeral Home, took place in the Littlefield cemetery.

Flower bearers were: Herbert Nickerson, L. H. Medlin, W. W. Evins and Earl Kiker.

Flower bearers were class mates of the deceased child.

Mary Alta Gage was born October 9, 1931.

Besides her parents, she is survived by two brothers and two sisters, Betty Jo, Billy Barton, Jimmie and Dorothy Jane Gage.

Also surviving her are her grandparents, Mr. and Mrs. E. G. Gage of Bula, and Mr. and Mrs. Steve Atton of Cecil, Ark.

Mr. Boone named as assisting him in this patriotic move, J. O. Garlington, Mayor Beaman Phillips as representing the City; Hardy Shetty for the Rotary Club; Bob Cooper for the Fire Department; Judge L. B. Holt for the County; and Supt. Fred Miller as representing the schools. He stated, however, that both the Junior and Woman's Study Clubs would be represented, as well as other clubs and departments in the County.

To Manufacture Electric Irons

Twenty manufacturers who have received allocations to produce 1,768,968 electric irons have agreed to sell them at no change from their March, 1942, prices, the Office of Price Administration has announced.

New electric irons are one of the first items in the consumer durable goods field that will re-appear on the market since production was suspended in 1942. They will bear price tags stating the dollar-and-cents retail ceilings. Authorized retail prices range from \$5.30 up to \$11.70, but the majority of the irons are automatic models in the medium price range.

War Production Board has authorized production of 2,037,898 electric irons, by 32 manufacturers. Prices for the other manufacturers have not been established yet.

Critical Time For Poultry Men

Lem Weaver, Lamb County Agent, has sent the Leader the following item for publication:

Now is the critical time for poultry men. A lot of talk is being heard about the high prices of feed in relation to the price of eggs.

The following method is good to help you determine the per cent egg production required to equal the cost of feed. Take the average price of feed, divide by the price of eggs and multiply by three.

Example:
Cost of mash\$3.65 per cwt.
Cost of grain\$1.75 per cwt.

Cost of 200 lbs. feed \$5.40
\$5.40 divided by 2 equal \$2.70—average cost of feed per cwt.
\$2.75 divided by 27c (price of eggs) equals 10.

10 x 3 equals 30—the per cent production necessary to equal cost of feed.

If your hens are not laying better than 30 per cent at this time a good culling will help reach a profitable percentage of production as well as lower the death rate. To do a good job it will take only one day's work before harvest starts to prepare the flock for fall and winter production. Below is a check list to follow in examining your flock and equipment:

1.—Have you checked your poultry house for mites. It will take two treatments 10 days apart to rid your flock of mites. Oil or carbolineum will do this job for you.

2.—Have you examined your hens for lice. A tablespoon of sulfur put in each nest once each month will help control lice.

3.—Fleas are bad during dry weather. Clean the floor and put salt on the floor at the rate of 50 lbs. per 10x10 foot house space and sprinkle with water.

4.—Sell all grey eyed hens. Diseases of poultry can be controlled considerably if each producer will burn and bury dead hens instead of carrying them down the road and throwing them out. This causes the person that lives next to the road considerable trouble. I am sure if we would only think of the damage caused each other this would be stopped. Each one can help Lamb county be a better place to grow poultry if we will burn or bury dead birds.

Where does a job come from, pop?

A job, little sister, comes from a pocketbook. The bigger the pocketbook—the bigger the number of jobs.

Take right now, for example. There are more jobs than there ever have been in the history of our nation. Everybody who wants one can have one.

The pocketbook belongs to WAR . . . the biggest, most cruel war in history. War opens its pocketbook ten thousand times a day—to buy planes and ships, bombs and tanks.

War wants what millions of men can make. And in return for making, war pays well—that is in money.

“Is war the only pocketbook big enough to make jobs enough?”

No. What one big pocketbook can do—

millions of small pocketbooks can do . . . without the hell of missing husbands and missing sons.

They can if the millions of people who own those pocketbooks make up their minds that part of what they earn today belongs to tomorrow—and live that way.

They can if the millions of working people who represent the great American majority make up their minds never again to leave America's prosperity up to anyone else but themselves.

They can if they realize that Uncle Sam's pocketbook cannot keep right on spilling out jobs after the war is won.

We—you, me, the neighbor next door—are the only ones who can provide those jobs, by buying Bonds which we can trade in after the war, for the things we want.

WAR BONDS today are JOB BONDS tomorrow

Every time you open your pocketbook . . . take out money and buy something, you make a job . . . or a hundred jobs.

When—later on—your Bonds buy a washing machine, car, or refrigerator—you put men on the job. Yes, millions of men. Miners dig ore. Smelters refine it. Trainmen ship it. Pressers roll it. Electricians get

busy. Lathe operators and welders pitch in. Then truckers and sales people.

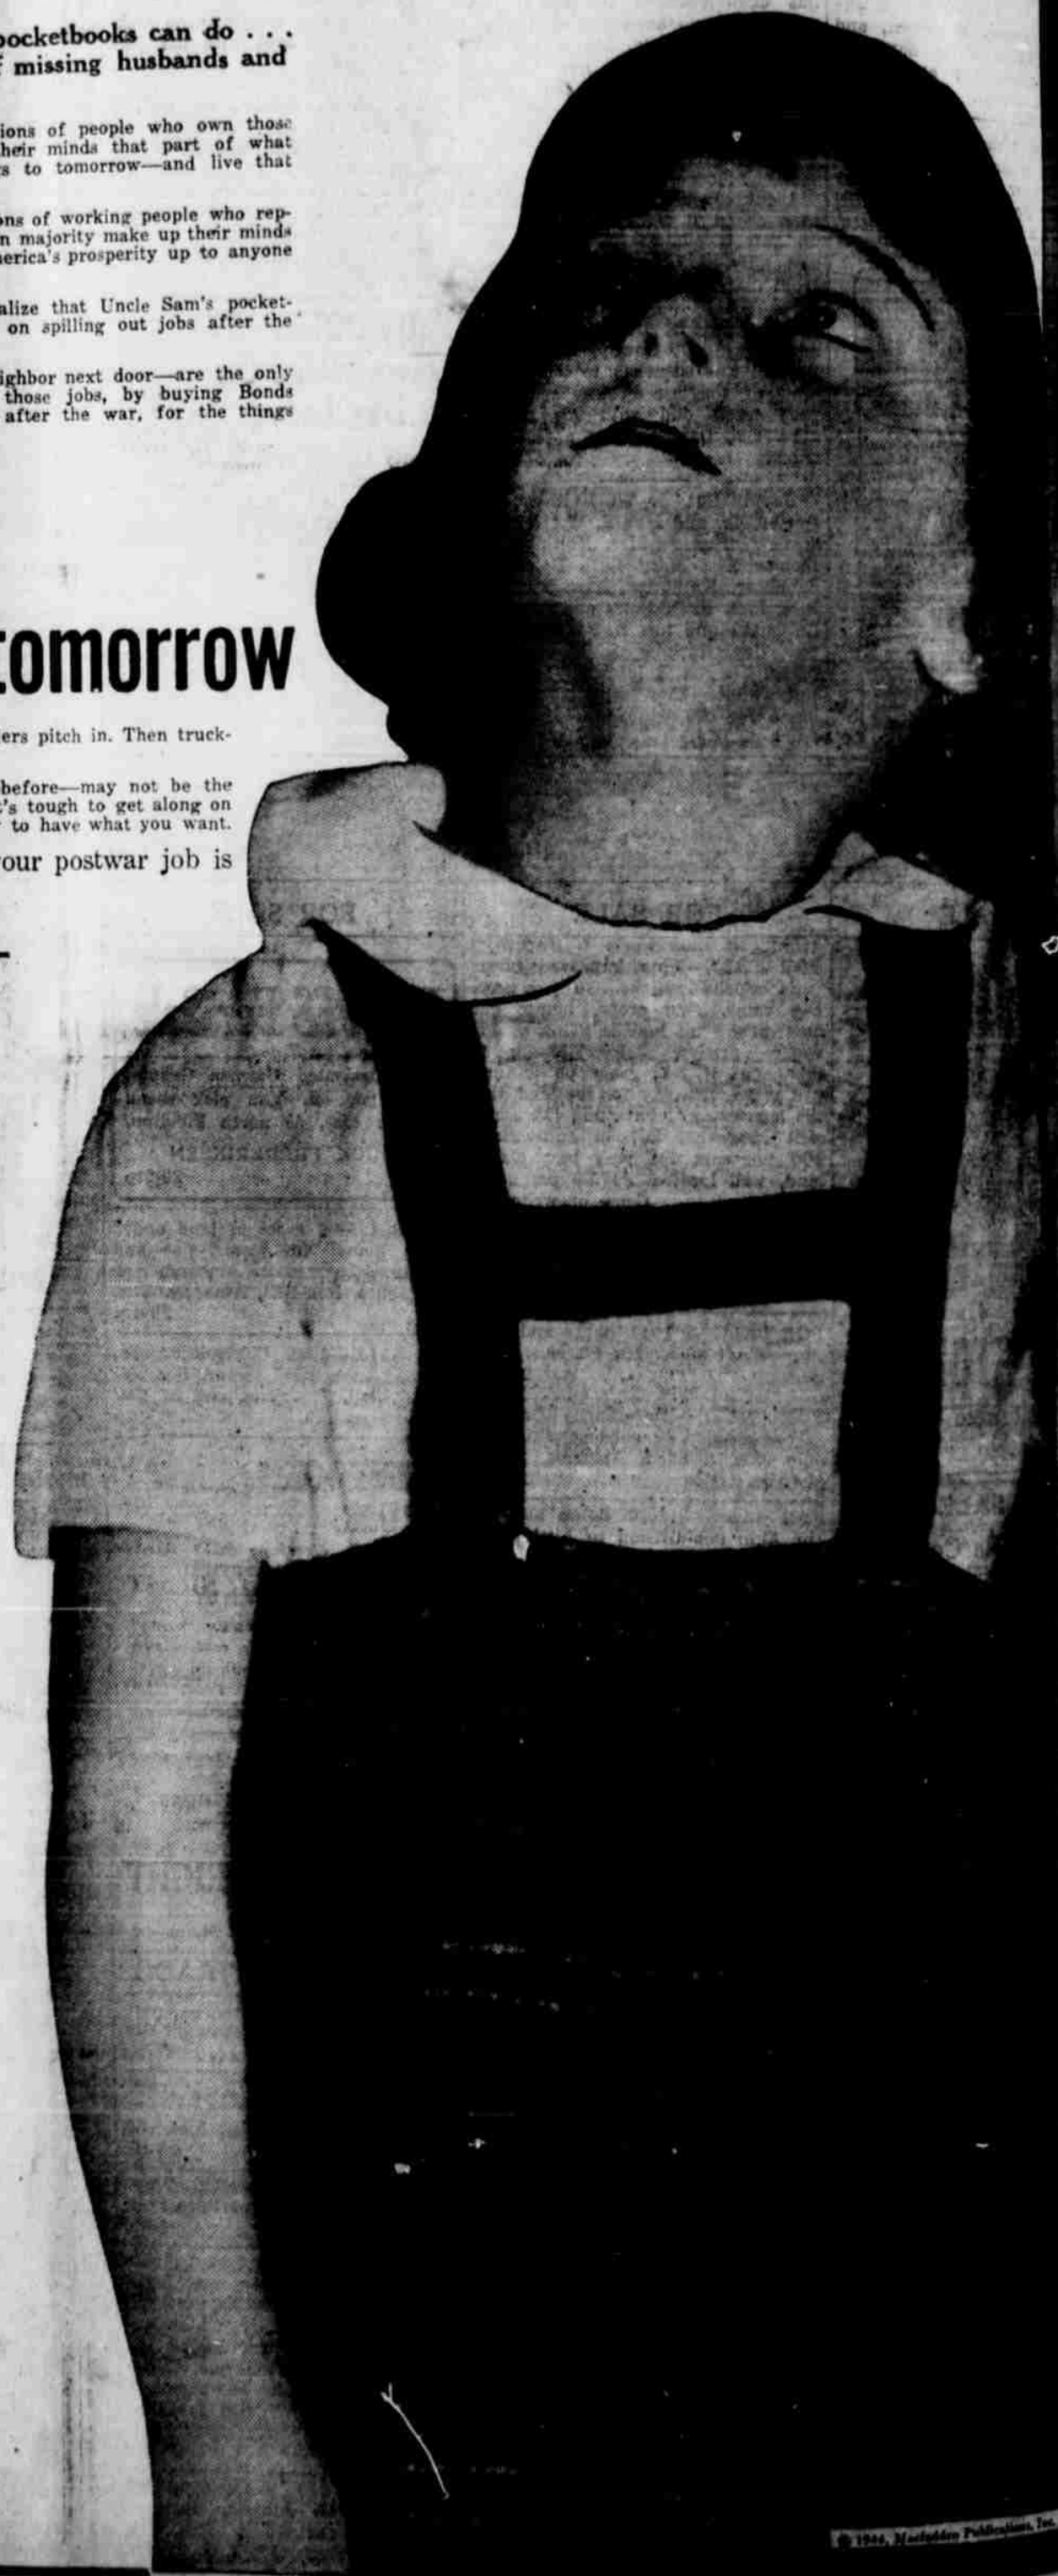

Buying Bonds—more than before—may not be the easiest job in the world. For it's tough to get along on what you need—when it's easy to have what you want.

Yes, it's tough, but your postwar job is worth it.

fense motion for continuance and ordered the case to trial.

Roy Granbery, abstractor and insurance man of Olton, and Dr. and Mrs. F. W. Janes of Littlefield, who lived in Olton at the time of the slaying, were the first state witnesses called. They were guests along with Mrs. Granbery in the Hunt home the night before the couple was found shot to death in their bed and their testimony pertained to details concerning time of their departure from the Hunt home which was fixed by all three parties at "between 2 and 2:30 o'clock in the morning."

After failing to qualify little six-year-old Jo Ann Hunt, daughter of the Littlefield physician and his wife who were found murdered in their beds on last Oct. 26 by the child, as a witness, the prosecution rested its case without calling another witness.

Defense Attorney Curtis Douglass of Pampa then presented a lengthy defense motion for an instructed verdict of acquittal, based on "insufficiency of evidence" in the case. The chain of evidence did not coincide and did not exclude all reasonable hypotheses outside the defendant's guilt, Douglass declared.

Judge Russell promptly denied the motion and the defense, after conferring with Thomas for a few moments, summarily announced they would rest without calling a single witness.

The state, in seeking to place the blame of the murder on the shoulders of Thomas, presented a witness who said he saw Thomas in Littlefield on the nights of October 24 and 25. Clothing and a piece of string with which they sought to link Thomas with the slaying, were also introduced in evidence. The piece of string, found in an Amarillo garage corresponded to cord with which the Hunts were tied together, the state attempted to prove by witnesses.

Testimony was scheduled to have been resumed Wednesday morning after a night session Tuesday night lasting until 10:30 o'clock, when the sudden close to the trial was made.

Eddie Glass of Clovis, fireman for the Santa Fe railway, testified he saw Thomas both nights in the cafe he was operating at Littlefield at the time of the slayings of the physician and Mrs. Hunt.

Nine witnesses were sent to the stand by the state Tuesday night, two of them as recall witnesses.

They were Eddie Glass, Mrs. Irene Moore, described as the former wife of "Red" Craig, and Craig, both of Amarillo; Mrs. Moore (recall); Raymond Waters, Texas Ranger; Nor-

vell Redwine, Texas Ranger (recall) G. H. McLaughlin, chemist, and Geo. W. Gambill, of the Texas Department of Public Safety at Austin, and Levi Duncan, Texas Ranger.

Craig testified Thomas borrowed his car on Monday, Oct. 25, to "go and see a produce man," and brought it back about 8:30 o'clock the next morning. That afternoon, testified Craig, he drove Thomas in it to Clarendon and Thomas himself drove the rest of the way from Amarillo to Childress. He said he saw nothing unusual in Thomas' behavior.

"I asked him, 'You haven't done anything in this car that will get me in trouble?' Craig testified, adding, 'he said he hadn't.'"

Mrs. Moore said that when she was living with Craig, Thomas had borrowed their car "numerous times."

Duncan testified that he discovered the right front tire of the Craig car corresponded to the measurements and tread of a tire which left tracks about the time of the slayings in the alley back of the Hunt home. He said he had judged that the tracks left in the alley were made by a left front tire.

Craig, when recalled to the stand, stated that he "understood" that the tires on his car had been switched after his wife had a "blowout." Mrs. Moore was then recalled to the stand. She recalled the "blowout" but she couldn't remember whether the tires were switched before or after the slayings.

Waters and Redwine told of finding a piece of string in the Veasey garage, which the state claims is a piece of the same taring found on the Hunts' bed.

McLaughlin said that the most scientific methods available it had been determined that the two pieces were from the same length of string, that apparently they had been severed.

Gambill, the other safety department expert, testified that the plaster of cast of the human tracks left outside the Hunt home corresponded with "slight variations" to a similar cast taken of the shoes found in the Veasey closet. He said the shoes may or may not have been buffeted.

Evidence Tuesday shifted sharply from Littlefield to Galveston to Amarillo in a parade of eight witnesses, which added to the morning's seven made 15 state witnesses called up to the 6:30 p. m. recess.

Tuesday afternoon witnesses were Aubrey Fawver, assistant chief of police at Lubbock, still on the stand from the morning session; Sheriff Sam Hutson of Lamb county (re-

called); Redwine, Texas Ranger of Lubbock; Dr. Ewell Hunt of Lubbock, brother of the slain doctor; Mrs. Marie Hall, operator of a Galveston shipping agency; R. S. Williams, Vernon telephone exchange operator; Mrs. S. L. Veasey, both of

Amarillo, and Deputy Sheriff Dick Vaughn of Amarillo.

Clothing by which the state indicated hopes to connect Thomas with the Hunt slayings was introduced in evidence—tennis shoes, a shirt and a pair of cotton trousers, and numerous other exhibits were admitted.

Lawyer Wednesday afternoon identified two casts, coat hangers and other articles found on the Hunt premises; said the gate in the back yard apparently had been kicked down; said venetian blind in the Hunt bedroom had been broken, and that he found tracks under a tree commanding a view of the bedroom through the broken blind and identified a walter of other state exhibits.

Mrs. Veasey, on direct examination by District Attorney Harold LaFont said her husband was an Amarillo garageman; that he had a garage just west of her home, on the same lot as the residence; that there was a gasoline pump beside the garage; that she had known Thomas probably 10 years; that he was a frequent, welcome visitor in the Veasey home.

She said Thomas came to visit her when she was recovering in a hospital after an operation in 1943. She said she had seen him October 23. (The Saturday before the Hunt slayings.) She said he spent the Saturday and Sunday nights before the slayings at her home, but did not spend Monday night; said her husband left that Monday (Oct. 25) early to go deer hunting with their soldier son and she locked the doors.

Mrs. Veasey testified that Thomas returned Tuesday morning when she and a woman she had called in to nurse her were at breakfast and said: "You locked me out last night."

She said he'd left her home about 4 o'clock Monday afternoon before the Hunts' bodies were found. She said he washed his shirt Tuesday morning at her home, and hung it on the clothesline. She didn't see him hang it on the line, she said, but that she saw the shirt. She said she found a shirt and trousers, admitted in evidence, in a dirty clothes closet in her home.

The Amarillo woman said Thomas had access to her house, and on cross-examination said he "always washes his clothes when he came to our house." She said he left Tuesday afternoon after supper, saying he had a reservation on a train and explaining that he was going home, that he was not supposed to be out of Galveston county.

Much credit is due the law officers of the State, including Lamb county officers, Sheriff Sam Hutson, Deputy Sheriff Sid Hopping, and others, for the endless task and splendid accomplishments brought about in the above case.

head, rattlesnake, cotton mouthed water moccasin, and the coral snake, and how to identify them.

Tuesday's program included baseball, swimming, and rifle shooting. Rifle instructions were given by E. C. Pope of the Rodent Control Service, Lubbock, Texas. Mr. Pope was four times state champion and has attended many national and international matches. Each boy was allowed to fire 20 rounds each using the four positions of shooting.

Wednesday's program included the final playoff in baseball, and announcing of winners in baseball and rifle shooting. Arville Moore, Sudan, won 2nd in the group of all boys under 14 years of age in rifle shooting with a score of 105.

Joe Frank Cummings, Olton, and H. L. Brandon, Sudan, also placed in the high ten in rifle shooting. Approximately 165 boys took part. Lamb County baseball team got to the semi-final in baseball to be taken down by Lynn County.

After announcing the winners in all sports and games, E. E. Callender, Specialist with the Wildlife Division of the Texas Extension Service, showed the boys a large display of birds, and fur-bearing animals, telling them which ones were harmful and those that were helpful. Many of our birds and small animals are helpful by preying on rodents.

Lem Weaver, county agent, and S. L. Garrison, assistant county agent, accompanied the boys to the camp.

Parcels To Be Mailed Overseas Oct. 15-Oct. 15

Postmaster W. D. T. Storey has the following announcement: From September 15 to October 15 is the time for mailing Christmas parcels to overseas service men. Request is necessary during this time, however, only one parcel per week may be mailed by anyone in the same person. Parcels must not weigh more than 5 pounds. They must not be more than 15 inches in length or

36 inches in length and girth combined. Parcels should be put into strong cartons, or boxes, well wrapped, tied and marked Christmas Parcel.

Begin now to save strong boxes, cord, and wrapping material. The time is close at hand.

Parcels that are going to remote places should be mailed during the first days of the period.

Please bear in mind that these parcels to overseas men will have to withstand lots of handling and many of them are crushed before reaching their destination. Someone will be disappointed should the parcel fail to go through. That's why you should do an extra good job of packing and wrapping. Shoe boxes are not strong enough for these parcels, although they are approximately the correct size.

Serviceman Answers Red Cross Inquiry

An unusual happening was reported recently when a local service man's wife, not hearing from her husband for about five weeks, applied at the local Red Cross office for assistance in securing some news of him, located somewhere in the Southwest Pacific. Mrs. L. M. Brandon, Executive Secretary, sent a message on August 2 asking for a welfare report on the serviceman, 1st Sgt. Francis G. Lankford, medical detachment of the 112th Cavalry unit, stating his wife had not heard from him since June 23, previous to which she had been receiving as many as eight letters a week.

Much to Mrs. Brandon's surprise the message of inquiry was answered by no other than Sgt. Lankford himself, as follows:

"Dear Mrs. Brandon: 'I received your letter to the Field Director in this theatre, and I wish to thank you for your effort in trying to help. I have sent 'Miss Dalton' a letter from the C. G. with dates on it that will explain my delay in writing, and I think she will understand. Please ask her for a copy.'"

JOIN GULF'S "Anti-Breakdown" Club TODAY!

BEFORE THIS WAR IS OVER, there may be only two kinds of people in America...

1. those who can still get to work in automobiles.
2. those who are forced to walk.

If you want to be in the fortunate group who will still be riding to work in automobiles, join Gulf's "Anti-Breakdown" Club today. How do you do it? Just come in for Gulf's Protective Maintenance Plan!

This plan was conceived by experts in car care. Gulf developed it because car maintenance is a most important civilian job.

Gasoline powers the attack... Don't waste a drop!

1 Protects your car at 39 danger points...

GULF'S Protective Maintenance Plan includes Gulflex Registered Lubrication which reaches up to 39 vital points with six different Gulflex Lubricants that reduce wear, and lengthen your car's life.

2 Guards your bearings and piston rings...

IT'S IMPORTANT to give your car a good motor oil and change regularly. Gulf offers two outstanding oils... Gulfgrade, "The World's Finest Motor Oil," and Gulfube, an extra-quality oil costing a few cents less.

3 Helps gas coupons go a little further...

AIR-FILTER and spark-plug cleaning, and radiator flushing help give better gas mileage. A clean air filter makes gas burn more economically; clean plugs increase power; a clean radiator prevents overheating.

4 Get an appointment at your Gulf station

HELP YOUR Gulf Dealer do a thorough job—and save your time—make an appointment in advance. Phone or speak to him at the station. Then you should encounter no delay when you get Gulf's Protective Maintenance Plan... 15 services in all!

For better car care today... to avoid breakdowns tomorrow!

In the meantime Mrs. Lankford had heard from her husband, and was thrilled to think he had answered the inquiry himself. The cause for the delay was that he had been serving in three major battles, and is believed to be in the vicinity of Saipan.

Sgt. Lankford has been overseas two years.

Family May Request Report On Condition Wounded Serviceman

Inasmuch as next of kin sometimes receive no further report on a serviceman's condition after being advised he is wounded or ill, in order to clarify the position of his family, Mrs. L. M. Brandon, Executive Secretary of Lamb County Red Cross, handed the Leader the following information for publication, received from the National Red Cross headquarters:

"If a family which has received official notification from the military authorities that a serviceman is injured or seriously ill does not receive a progress report within 30 days, the chapter may advise the family to write to The Adjutant General's Office, War Department, Washington 25, D. C., requesting a further report.

"In some cases a family has not received official notification from the military authorities but has unofficially learned from the man himself, or from his fellow servicemen that the serviceman has been injured or is seriously ill. In those instances, the chapter worker may write direct to the appropriate field director for a welfare report. The family must be advised of the length of time required for a reply to be received from the field director and must understand that the request will be considered a non-emergency message which will not receive preferential handling.

"In neither case will the chapter

submit Form 2230 or write to Home Service at national headquarters.

"Navy Personnel—if a family which has received official notification of a serviceman's injury or illness does not receive a progress report within 30 days and wishes additional information, Chapters may advise them to write the appropriate naval authorities, i.e., Bureau of Naval Personnel, Washington 25, D. C.; Marine Corps Headquarters, Washington 25, D. C., or United States Coast Guard Headquarters, Washington 25, D. C. Chapters will not submit Form 2230 or write to Home Service at National Headquarters in these cases."

Mrs. A. B. Haynes County Chairman Junior Red Cross

Mrs. A. B. Haynes was appointed County Chairman of Junior Red Cross to take the place of Mrs. Johnnie Carl, who has served in this office for the past several years. Mrs. Haynes was appointed Friday by G. M. Shaw, County Chairman.

LABOR DAY

"... means EVERY DAY for me!" says Reddy Kilowatt your Electrical Servant

The biggest labor day parade this year will include a lot of you folks pouring right up to the shop gates to work on your cars, trucks and your lawnmowers. Sell others will work on farms, helping produce needed food, and many of you stay-at-homes will keep busy in your Victory Gardens all day.

More power to you! That's the way to celebrate a wartime holiday. Best of all, it's the American way, because you're doing it voluntarily—no dictator shoved you into your back to drive you to work.

While you're at it, think of me. I'll be "laboring on Labor Day," too. I'll be testing the whack in your plants helping you out with the ferns, shrubs, probably even pumping the water you sprinkle on your garden. I'll be working just as I do twenty-four hours every weekday, every Sunday, every holiday, throughout the year. Yes, every day is Labor Day for me, and I'm always prepared to serve you!

Completes 4 Weeks Of Jump Training

Pvt. William A. Wilson, Jr., son of Mr. and Mrs. W. A. Wilson of West First St., Littlefield, has won the right to wear Wings and Boots

of the United States Army Paratroopers. He completed four weeks of jump training at the Parachute school, Fort Benning, Ga., August 17, during which time he made five jumps from a plane, the last a tactical jump at night involving a combat problem on landing.

Jumping at the parachute school has been steadily developed to a recognized war science. There is less than one per cent chance of injury while jumping at the school.

In addition to producing jumpers, Parachute Specialist Training is given to qualified men in communication, demolition, riggers and sewing machine maintenance, vital skills for airborne troops.

POST WAR ON THE FARM COMES LATER And It Calls For Action Now

You hear a great deal these days about post-war planning. That's a fine thing, and mighty important, too. It will mean a speedy change-over from making things for war to making things for peace. But for us farmers and ranchers "post-war" comes later than for anyone else.

Our job will be to help feed the whole world for several years after victory. The demand for American foodstuff will remain great. This means we must keep busy now and plan for immediate action. Our farm buildings must be kept in tip-top condition and additional ones added, now.

BUILD NOW

The government is permitting new construction of barns, bins, silos, poultry houses, and all other kinds of essential structures for ranches and farms.

You can't find a better place to get materials and good, practical suggestions for farm construction work than at Wm. Cameron & Company. Besides supplying all the materials you need, they also give you complete, easy-to-use plans absolutely free.

IMPROVE NOW

The best place to invest ranch and farm profits, next to U. S. War Bonds, is right back in the business. Improve buildings, repair fences, strengthen foundations and put on good roofs.

Present increased production calls for a number of new structures such as brooders, poultry houses, utility buildings, feeders, etc. At Cameron's you will find these items already made, waiting to be loaded on your truck. Every time you're in town, visit Cameron's.

PRESERVE NOW

The value of paint on farm buildings can't be reckoned in the nice appearance, and air of prosperity it gives the place. Good paint, such as Minnesota brand, penetrates the surface, seals the pores and adds years of life to the buildings. Minnesota Standard Red Barn Paint has been a favorite on American farms for over 70 years. On your implements, tractor, and equipment use Minnesota Implement Paint. A gallon or two will paint every implement on the average farm.
