NUMBER 4

TOWN and COUNTRY

by Wendell Tooley

moved to Littlefield four days ago this month. I had to drive back and forth from Littlefield for a week or two until I could find some sort of house to live in. It looks like the situation is the same...there just aren't enough rent houses in Littlefield and very few GOOD ones for sale.

discussed industry at a community development action meeting Tuesday night...and the same came up...well where we put the families of a industry if it came to Littlefield tomorrow?

good question.

ously, very few investments to build a group of houses and risk waiting a year or five for enough families to come to town to fill the need.

member of the group had lived here since and there had never been homes to take care of the need.

Littlefield has some homes...but few families live in this type of run-down homes.

is the answer to the problem? I think we can point out three possibilities that are used by other cities in similar problem.

A housing program sponsored by a group of business men to build new homes under contract, or as a corporation individually.

public housing projects, or repair work on older homes in town...collecting rent from the taxes without a property lets a home run in a hurry.

encouraging outlook on the field building is the over \$10 million dollars in building permits already this year...an unusual amount of home building going on at this time.

ESSED are the dissatisfied when they have a GOAL."

WALT Moranetz handed this article clipped from the paper at the Lions Club meeting yesterday...it's pretty good if you're a parent.

-The Archdeacon of the Church of England pastors a handy guide on how to turn your child into a crook."

Drawing a bead on in-laws parents, the Venerable Father Dilworth-Harrill outlined these 12 rules in the parish magazine:

1. Begin from infancy to the child everything he does in this way he will grow up to believe that the Lord owes him a living.

2. When he picks up bad habits laugh at him. It will encourage him to pick up more phrases that will be on the top of your head.

3. Never give him any special training. Wait until he is 21, and then let him see the Town on Page 5)

BREAK GROUND FOR NEW CHURCH--Members of the Littlefield Drive Church of Christ broke ground for their new church Sunday morning following church services. The new church will be located at the corner of 17th and Crescent Drive. Pictured above from left to right are Russell Blevins, E. J. Wicker, Dr. J. R. Fain, Alvis Jones and John Rickey. Construction on the new building began this week.

Chamber Action Group Continues Local Study

Twenty members of the Community Development Action study group met in the chamber of commerce offices Tuesday night to further investigation into Littlefield's industry and retail sales situation.

From the discussion came the election of a special "Projection" committee which will assume steps to be taken now in the study.

Troy Armes was selected to head the committee composed of Jim Mangum, Pat Boone, Jr.,

Joe Wilson, Dr. E. W. Armistead, Mrs. Beula Dunlap and Earnest Connell.

Garrison led the discussion. Most of the discussion centered around keeping and getting more industry for Littlefield, and the needed facilities should (See Study on Page 5)

Whitharral School Vote Is Saturday

Voters in the Whitharral Independent School District will go to the polls Saturday to ballot in the \$175,000 bond election.

Polling place will be in the high school Agriculture Building. Election judges are Jack Milburn, Howard Strickland, Robert Avery and Clifford Throckmorton.

The proposed bonds, in addition to present bonded indebtedness of \$147,000 are scheduled to mature in 1981, while the old bonds will mature in 1982.

Senate Bill 116, which must be adopted locally and which is designed to modernize the general tax structure, will also be on the ballot with the bond issue.

The new bonds, to be handled by Southern Securities Co. of Lubbock will be used to finance a cafeteria, auditorium, ag shop and renovate the school with new ceilings, windows and floors, and add dressing room facilities to the gym.

The bond election was ordered by the school board early in May following recommendations of a building committee,

Cal Farley Speaks Today To Rotarians

Cal Farley, founder and president of the nationally-famous Boys Ranch near Amarillo will be the guest speaker for the Littlefield Rotary Club today.

Often referred to as "the greatest boys man in America," Cal Farley has also gained nation-wide recognition as an interesting, humorous and informative speaker, bringing the Boys Ranch message to many hundreds of civic and service clubs from New York to California.

Formerly a successful Amarillo businessman, Farley sold his thriving business in 1947 to devote his entire time and energies to helping homeless, unwanted and confused boys from all over the country and since founding Boys Ranch in 1939, he has never taken any salary whatsoever from the Ranch.

Boys Ranch is now in its 23rd year of operation and at the present time, nearly 300 boys from all over the nation call it home. More than 1,300 boys can be numbered among the "exes" and these are scattered throughout the world, in the Armed Forces, in colleges, in various jobs or following the trades they learned at the Ranch.

For his great humanitarian work Cal Farley has been honored many times. He has been chosen "Texas Outstanding Citizen," received the Boys

club of America coveted Bronze Keystone Medal and the VFW's Silver Citizenship Medal. Three times he was elected to run for mayor of Amarillo, twice for Congress and once for Governor of Texas, all of which he declined because his only interest has been in helping unfortunate boys.

FBI Director J. Edgar Hoover calls Boys Ranch "a blueprint for crime prevention."

Annexation Hearing On City Agenda

City Councilmen will close the public hearing on the Annexation Ordinance at their meeting tonight at 7 in the Council Meeting Room of the City hall.

Following the closing of the public hearing, the ordinance will be adopted.

Other items on tonight's agenda include the appointment of an Equalization Board, discussion of street repairs for the summer, discussion of the three-party contract on the comprehensive plan, consideration of hiring a dump ground maintenance man and review of the monthly reports from the various departments.

The public is invited to attend the public hearing and the meeting.

Tour Of Russia On Tap For Charles Duval, Jr.

Charles Duval, Jr., son of Mr. and Mrs. Charles Duval, of Littlefield, will be one of 40 students to tour Russia this summer through a program of the University of Michigan.

Duval, a senior at the University of Texas, has devoted his entire studies to Russia, its history, language, government and economics.

"I can hardly wait to go," Duval said Monday. "From what I have heard, 80 or 90 per cent of the Russian people are very friendly, but I want to see for myself.

The trip is strictly academic with the students spending four weeks at the University of Michigan doing extensive study in the language and two more weeks aboard his continuing the study. Classes will also be held each morning while the students are in Russia to refresh and study the difficulties of the day before.

Following the trip, the students are given an all-day examination. A total of 12 semester hours are given for the tour.

The party leaves New York on July 24 aboard the S. S.

Olympia and arrives in Athens on August 6. From there the group will tour Odessa, Kiev, Moscow, Vladimir and Leningrad in Russia. They will then go to Helsinki and Amsterdam and return home by plane on September 4.

"I don't know if we will meet Khrushchev or not," Duval commented, "but, I sure do hope that we do." "I think what I am most excited about is the opportunity to communicate with the Russians in their own language," he continued.

The party will have guided tours every morning while in Russia with language refresher classes at noon. The afternoons and evenings are free so the students can make any tours they desire.

"We will have a tour of the Kremlin, a Soviet Youth camp, the ballet, and other cultural events," he added.

"We are not permitted to sell any gifts to the Russians because of the death penalty imposed on the Russian people," Duval said, but giving or exchanging items is permitted."

Eight Jailed On Charges

County officers were kept busy over the weekend as they jailed eight persons on a wide variety of charges. Two of the arrests were made by Highway Patrolmen and two by City Police.

Andrew Morris of Clovis was arrested late Saturday afternoon by Deputy Homer McLaury and charged with DWI. He was picked up between Amarillo and Sudan on Highway 84.

City Police arrested Enselino Rangel and charged him with attempt to murder in connection with a knifing early Sunday morning. The incident took place north of the tracks in Littlefield and put Joe Alvarado in a local hospital with knife wounds. Bond was set at \$1,000.

Highway Patrol troopers arrested Glenn Miller Turner of Littlefield on a charge of DWI. The man was arrested on Highway 84 east of town. Franklin Madison Page was returned to the county on a capias pro fine and is currently serving 90 days in jail and has a fine of \$192.50 including costs.

Other arrests included three for drunk and one for minor consumption.

Three-Day Event Is Slated

Forty-two Littlefield merchants have agreed to participate in the second annual "Buk-Nik Days" city-wide sales event. The big celebration is scheduled for three days Thursday, Friday and Saturday June 14, 15 and 16.

Over \$1,000 in Buk-Niks, redeemable for merchandise in the stores of participating businesses, will be given away during the event. The Buk-Niks will be printed in \$1 and \$5 denominations and are redeemable through Wednesday, June 20.

Registrations will begin Thursday, June 14 and continue through Saturday afternoon until 3:30 p.m. June 16.

A new procedure in registration for the drawings will be held this year in order that one person may not register a series of books, as has happened in the past. Each sales person will carry a book of coupons and will give one coupon to each customer with a sale or upon request.

Drawings will be held at 3:30 p.m. Thursday and Friday. One drawing will be held at 10:30 a.m. Saturday and another, including the grand prize drawing, at 5 p.m. Saturday. There will be four \$25 drawings and ten \$10 drawings on Thursday and Friday. The remainder will be drawn Saturday with the grand prize being \$300.

Any winner who is present and presents himself at the place of the drawing will receive double the amount of Buk-Niks, except the grand prize. All drawings will be held at Fourth and Phelps.

There will be rides for the kiddies, plenty of concession stands of homemade pies and cakes and many special bargains during the three-day event.

The Rainbow Girls and the Women's Froum have already agreed to have concession stands.

There will be a free movie at the Palace Theater Saturday morning sponsored by (See Buk-Nik on Page 4)

C-C Board Will Meet Tonight

Chamber of Commerce board of Directors will meet tonight at 7:30 in the chamber offices. The meeting was set up one week because of urgent matters which need attention.

Kenneth Ware, chamber president, said there are important items on the agenda and urged all board members to attend the session.

Items listed on the agenda include recommendations from the Governmental Affairs Policy Committee, recommendation for the establishment of a County Safety Council, a proposal from the Highway and Tourist Committee concerning the old cemetery and a report from the Ways and Means Committee.

WILL TOUR RUSSIA--Charles Duval, Jr., shown above, is looking over information sent to him by the University of Michigan. Duval will make a five-week tour of Russia this summer.

Microscopic Test Shows Screwworms

Are they really screwworms? The only sure way to identify a screwworm is to collect maggots for microscopic examination by a specialist. This is why livestock producers are asked to collect worms from every infested livestock wound.

Success of the eradication program will depend, in part, on positive identification of as many cases as possible. These records are vital in the day-by-day execution of the program. Cooperation in Lamb county to date has been excellent, but County Agent Kimbrough also stressed the importance of continued cooperation.

Although the largest number of wounds infested with maggots are infested by those of the true screwworm, other kinds of maggots may be involved. This has been confusing to some producers.

The true screwworm is only one of a large group of flies, most of which are referred to as common blow flies. However, screwworm maggots infest only the wounds of living warm-blooded animals.

Some of the maggots infesting wounds may be maggots which breed primarily in carcasses. When they are found in living animals, carcass-breeding maggots are usually found feeding on soiled wool or in wounds containing decaying blood and tissue.

The true screwworm is distinguished from common blow fly maggots by two dark parallel air tubes. These tubes are readily visible in full-grown maggots of the screwworm but are scarcely visible in the maggots of other blow flies. Screwworms have a pinkish tinge when they have completed feeding and are about ready to leave the wound. Most common blow fly maggots have white, yellow, or gray colors. However, microscopic examination by a specialist is

JAN ELLZEY

Miss Jan Ellzey to Direct Youth

Jan Ellzey, who has just completed her freshman year at Murray College, will be the new Youth Worker at the Methodist church here in Littlefield, directing activities for Junior High and Senior High youth.

Ellzey is a graduate of Midland High School, Miss Ellzey has held various offices in both the church and District Methodist Youth Fellowship. During high school years she was member of the National Honor Society; represented Future Teachers of America as Miss of District IV; was teen-aid chairman of the Midland Dimes campaign; Midland Youth Center Junior Class Secretary; at the time of graduation

from high school received the Midland Downtown Lions Club scholarship.

This past year Jan was Secretary of the McMurry Freshman Class; was runner-up for Freshman Favorite; is a member of Delta Beta Epsilon social club; and was recently elected as one of the four Senators in each class who will govern the 1962-63 student body at McMurry.

Miss Ellzey is the daughter of the Rev. and Mrs. Jack Ellzey, who have resided in Littlefield since June of last year, and at the Northwest Texas Conference annual session held at Big Spring last week Mr. Ellzey was appointed as pastor of the local church for the coming year.

Study Tour Scholarships Awarded

County Agricultural Agents man J. Kennedy of Young County, and Uel Ray Stockard, county, have been awarded 1962 Dow Study Tour scholarships, according to Ollmer, Hale county agent and chairman of the Professional Committee of the Texas County Agricultural Agents Association.

The tour program is carried out in cooperation with the Agricultural Chemicals Department, Dow Chemical Company, Michigan. The program is designed to meet the needs of county agents by giving them opportunities to study marketing enterprises, outstanding farm operations, agronomy, successful Extension Service and research projects, Liner said.

Kennedy will join other scholarship winners from the Western Region in Boise, Idaho, on June 11, to begin the 19-day tour. The group will visit in Idaho, Oregon, Washington, Montana, Wyoming and return to Littlefield on June 30.

Stockard will join the Southern Region group in Little Rock

Arkansas, also on June 11, and will make four stops in Arkansas, Missouri, Kansas, Colorado, New Mexico, Texas and Oklahoma before returning to Little Rock on June 30.

Kennedy and Stockard are veteran Texas county agents; both have directed many outstanding Extension programs in the counties they have served; both are active members of their state association and are in a position to put into use information gained from the training opportunity. Kennedy has served Texas Association for several years.

Both are graduates of Texas A&M College and have conducted outstanding adult as well as 4-H programs during their Extension careers. Kennedy has served in Wilbarger, Stonewall and Young counties and Stockard in Hopkins, Tarrant and Ellis counties. Both began their service as assistant county agents immediately after graduating from college.

Clevenger Is Taking Part In Nuclear Tests

WITH JOINT TASK FORCE EIGHT IN THE PACIFIC-Air Force Airman Second Class Lloyd H. Clevenger of Littlefield, Tex., is participating in "Operation Dominic," the joint Department of Defense-Atomic Energy Commission nuclear test series being conducted in the Pacific.

Airman Clevenger, a jet engine mechanic permanently assigned to Laughlin AFB Tex., is on temporary duty for the tests.

A graduate of Littlefield High school the airman entered the service in April 1958. He and his wife, the former Jan L. Pearson of Route #1, Littlefield, have one child, Teresa. The airman is the son Morse Ave., Littlefield.

Operation Dominic is a joint DOD-AEC nuclear test series conducted in the atmosphere over the Pacific Ocean.

President Kennedy authorized the operation on March 2, 1962, saying it would involve only those tests which cannot be held underground. The tests are to be conducted under conditions which restrict the radioactive fallout to an absolute minimum. The President authorized the series only after exhaustive evaluation of the Russian atmospheric tests of 1961 showed that the U.S. had been left no choice but to keep our defensive arsenal adequate for the security of all free men. He further stated that if the USSR would not sign a fully effective treaty before the latter part of April and apply it immediately there would be no need for the tests to begin.

All the detonations of Dominic are conducted under stringent controls to insure the safety of all personnel associated with the operation.

A conference on weed control through flame & other results will conclude the afternoon program at Halfway. The group preparing for the tour included Ted J. Parks of Austin, Public Relations Director for the Texas Butane Dealers Association; Fred Garrison, Plainview Garrison Oil Co., District Director for the Texas Butane Dealers Association; Iodie Howard Lubbock, Western Tank & Steel and AFCO; Bill Taylor, Jones Copeland, Bill Watson, E. T. Lusk, Gene Bumpus Co. & Gocher Mfg. Co.; Dr. Earl H. Collister, Director and C. H. Janeway, head of Public Relations of the High Plains Research Foundation.

Nation wide interest and attendance at the special Flame Cultivation Day is indicated. The public is invited to attend the tours.

To qualify for the trip, students must have had at least two years of college Russian language and be an undergraduate. In addition each must take an oath that they will not speak anything else but Russian during the entire tour.

"They figure if you are about to starve to death, you will speak enough Russian to get food," Duval added with a smile.

Duval plans to enter the Foreign Service after graduation from college. He hopes to do graduate work at Columbia University after he finishes at the University of Texas and possibly make another trip to Russia.

Duval will make a report to this paper after his return from Russia.

He is financing his trip through the Littlefield Rotary Club Student Loan Fund.

From Your Chamber Office

Buk Nik Day Committee has a good number and cross section of representation enrolled in our Buk Nik Day program. Don't forget Buk Nik Days in Littlefield, Thursday, Friday and Saturday June 14th, 15th, & 16th.

The Board of Directors will meet tonight (Thursday) to avoid a conflict with Buk Nik Days next week.

There are some items on the agenda which should be of great interest to every member of the Littlefield Chamber:

The County Wide Safety Program proposal.

The policy proposal from the Governmental Affairs Policy committee, plus an additional proposal from the Highway and Tourist committee.

Kenneth Ware, President has already called a special meeting of the Board of Directors along with the entire membership for Friday night June 22, to discuss the Chamber's membership and budget. This meeting will determine to a great extent the future of the Littlefield Chamber of Commerce.

All Chamber of Commerce meetings and Board of Directors meetings are open to the public, however, a special effort will be made to secure membership attendance at the June 22nd meeting.

Most of the basis for study was taken from a report from Market Statistics Incorporated a group of economic research consultants who recently made a study of business in Littlefield and Lamb County in comparison with the above counties.

Full reports of the study are available in chamber offices to anyone seeking a copy. The next general meeting is scheduled for Friday night, June 22nd, when the general chamber membership will meet for discussion of raising the chamber's \$21,000 budget.

Attending the study were Garrison, Ware, Armes, Mangum Wilson, Armistead, Mrs. Dunlap, Connell, J. W. Garrison cited the following considerations necessary in working for industry: economic advantage this area offers, needed municipal facilities, needed educational facilities, a wholesome well balanced tax structure, good business climate and good recreational facilities.

One member of the group brought out the fact that if an industry decided to come to Littlefield there was not enough housing to take care of its employees...as in the case now, when Plant X construction workers are trying to find housing here.

It was also pointed out that Littlefield had never had enough or an abundance of housing.

In discussing the types of industry feasible for Littlefield, livestock feeding, fertilizer, processing plants for cotton, grain products and almost any type of industry that deals with agriculture were listed.

In the retail sales study the group studied charts and graphs

How to pay for a Cadillac—and not get one!

There are several ways that a man can pay the price of a new Cadillac car—and find himself in possession of an automobile of far less stature.

Because there are many motorists currently considering the purchase of their next car, we would like to enumerate these ways of going astray.

1. Assume that the purchase price of a new Cadillac car is higher than it actually is. (There are eleven models of other makes that this year cost more than the lowest-priced Cadillac model.)

2. Fail to appreciate that the basic price of a new Cadillac includes important things that are extra on many other cars. (Including automatic transmission, power steering and power braking.)

3. Neglect to find out from a Cadillac dealer what your present car is worth in trade. (He is especially anxious this spring to welcome new owners.)

And if you take one of these detours, think of all the unique pleasures you could be missing.

There is Cadillac's styling—so majestic that it attracts attention wherever it goes.

There is Cadillac's comfort—so wonderful that every journey becomes a brief vacation.

And there is Cadillac's performance—so great that it is without rival on the world's highways.

So we suggest that you play it safe—and get all the facts from your dealer soon.

You might be closer to a Cadillac than you think.

Steve Spray of Eastern New Mexico fired a one-under-par 71 to Austin Adams of Appalachian State College for the medal prize in the NAIA golf tournament here Tuesday.

As a team, Eastern New Mexico is third with 368 as Western Missouri is ahead with 300 and follows by Texas Wesleyan with 301. The first round was played in the rain.

Gene Murphy of Eastern is tied with 72, but the other members of the team, Tim Nesbitt and Tom Sheesley had 79 and 88 respectively.

Nesbitt is from Clovis, but the other three are playing in the home state. Spray, who led the tournament the first two days of the meet last year before blowing high, is from Indiana. 1961 while Murphy is from Kansas and Sheesley is from Oklahoma.

Appalachian State is fourth with 310 but the fifth place went to over 320. Eastern was fifth last year.

Five Track Stars Go AAU Meet Invitation

NEW YORK -- Five track stars have been invited to compete in the Trinidad games, June 15-17, the AAU announced Monday.

Four are from New York schools--Bill Urban of New York University, Tyrone Patterson of Manhattan, Jim Sullivan of St. John's and Fordham's Dan Strick. Lawson Smart of Mississippi State completes the quintet.

McKinney was the winning pitcher while the loser was Rosa.

Philosopher Says Farmers Can Stand Market Fluctuations Better Than Tycoons

The Sandhills philosopher on his Johnson farm looks at the stock market this week, from quite a different angle. The Sandhills philosopher says that farmers aren't supposed to be as well, let's be mentally alert as big business men, they're supposed to be drawn more than brain, sometimes I wonder, when the stock market took a nose-dive recently, what happened? Why, big business men all over the country shuddering, members of the stock exchange got jittery, the newspapers were full of expert advice and explanations, and people began wondering if the bottom was going to fall out of things. Is this another 1929? they asked.

Some people with stocks even became a little panicky, and the more worried they got the more they sold. "Why, just think," one man complained, "yesterday my stock was worth \$70 a share. Now it's worth \$40." He was plenty worried.

But here's the point. Every time somebody sold a stock, somebody else bought it, and after it was all over the stocks

apparently climbed back up to about where they were before, people were kicking themselves at first for not selling sooner, then kicking themselves for having sold.

Business people ought to associate with farmers more and they'd come to learn how to be calm under such situations. It happens all the time in farming. Many's the time I've had a crop in the field I figured was worth so much money, only to find out when I hauled it to market it was worth 30 percent less. Every farmer know what it is to have a steer worth \$100 today and \$70 tomorrow.

If farmers got panicky under such a situation, they'd stay that way most of the time. Wild fluctuations in the stock market may run big business men berserk, but fluctuations in farm prices are as ordinary to a farmer as dry weather when he needs a rain and rainy weather when he needs sunshine.

On top of this, most of the losses in the stock market are paper losses, a stock will keep its price but a hog that's ready for market. In farming, the losses aren't paper losses. This doesn't necessarily prove that farmers are smarter. They just don't scare so easy.

Yours faithfully,
J. A.

Texas Leads Nation In Cattle, Sheep

Texas leads all other states in the liveweight production of cattle, calves and sheep, but ranks 15th in hog production. Iowa is the top hog producing state by a wide margin.

The total number of pounds of cattle and calves produced on Texas farms during 1961 reached 2.3 billion pounds, reports Ed Uvacek, Extension livestock marketing specialist. During the same period, sheep and lamb production amounted to 195 million pounds while 288 million pounds of hogs were produced, he says.

Thus, Uvacek points out, Texas production last year of cattle and calves represented almost 10 percent of the nation's total output. Though the number of sheep and lambs produced in Texas far exceeds the next ranking state, the percentage

of liveweight production amounted to only about 12 percent of the nation's total. This, Uvacek says, is due to the fact that Texans are not as heavily in the lamb feeding business as are operators in California and Colorado.

Liveweight production for the nation last year was 29,688 million pounds of cattle and calves; 20,216 million pounds of hogs and 1,688 million pounds of sheep and lambs.

Uvacek explains liveweight production as the total number of pounds produced on farms. This includes the weight gained by animals on hand, bought or born during the year.

Screwworm Production Facility Is Dedicated

The formal dedication of the new fly production plant at the headquarters of the Western Screwworm Eradication Program are scheduled for Saturday, June 16.

The new plant, located at the Air Force Base, is designed to provide 50 to 75 million sterile flies per week. With construction beginning in mid-June, the first flies from the

Water District Prints Map Showing Decline

The High Plains Underground Water Conservation District has announced the publishing of a map which indicates the decline of the ground-water table in the southern High Plains for the 24-year period, 1938 to 1962.

The map is prepared in three colors, black, yellow and red. It uses the different colors to indicate various increments of decline.

A total of five increments are shown--10-40 feet, 40-60 feet, 60-80 feet and more than 100 feet of decline since 1938.

W. L. (Bill) Bradhurst, Chief Hydrologist for the High Plains Water District made the decline computations revealed by the color map. His computations were based on water-level measurements made by the U. S. Geological Survey, the Texas Water Commission and the High Plains Water District.

According to Bradhurst, a decline map such as the one just published can be used along with other data to determine, within reasonable limits, the amount of ground water depleted from the reservoir and the approximate amount of water remaining in storage.

"Percentage wise," Bradhurst states, "as an average for the 13 counties in the High Plains Water District, something on the order of 20 percent of the ground water available to pumps in 1938 has been depleted. The percent of depletion for the counties in the District is: Armstrong, 32 percent; Bailey, 13 percent; Castro, 19 percent; Cochran, 20 percent; Deaf Smith, 18 percent; Floyd, 22 percent; Hockley, 30 percent; Lamb, 15 percent; Lubbock, 44 percent; Lynn, 38 percent; Parmer, 12 percent; Potter, 33 percent; and Randall, 20 percent.

The map has been reproduced in the Water District's non-

advertising monthly newspaper, "The Cross Section" and mailed to those persons on the circulation list. For others, who do not receive "The Cross Section" but who would like a copy of the map, it will be made available free of charge upon request. Address map requests to: High Plains Water District 1628-15th Street, Lubbock, Texas.

Two Poultry Conference Will Feature Latest Research

The annual Poultry Conference is scheduled for Texas A&M's Memorial Student center, June 13-14. Ben Wormell, extension poultry husbandman, said the conference is designed to aid commercial producers, hatcherymen, breeders, hatchery and feed service men and related poultry industry personnel. It is sponsored by the Department of poultry Science.

The program for the 1962 conference places major emphasis on the breeding, health feeding and management factors that provide for the maximum returns from egg and meat production, he added.

An expected highlight of the two-day meeting will come on the afternoon of June 13 when demonstration reports on poultry research in progress at Texas A&M are given. The demonstrators and discussions will be held at the laboratories where the research is being done. Wormell listed some 18 projects which are up for discussion. They include: "Have You Seen A Chicken Blood Bank," "Which Blood-Type Will Die of Atherosclerosis?," "Life in the Age of Plastics," "The EKG of a Rooster," "Muscular Dystrophy in Chickens" and "High Octane Rations Give High Poultry Yields."

Research workers in the department of Veterinary Microbiology; Agricultural Economics and Sociology; Agricultural Engineering and Poultry Science will present new information dealing with the rapid technological and economic changes taking place in the poultry industry.

Dr. R. E. Cook, coordinator, Southern Poultry Breeding project, Athens, Georgia, will be the featured out-of-state speaker. He will discuss the inter-relationships of the genetics of the bird and its environment.

Milk Plays Major Role in History

The story of milk goes back to the beginning of civilization. Historic drawings, unearthed in the Sahara Desert and dating back 8,000 or more years, feature picture stories of a 5,000 year-old Frieze, found in an ancient temple near Babylon, depicting a dairy scene showing milk being strained.

Through the years, empires have risen and fallen, and the milk specialist, milk has been used as a food of primary importance in the diet. The Bible makes references to milk and even describes the land of milk and honey. Marco Polo noted that the Tartars traveled that the Tartars credited much of their strength and endurance to milk.

The history of dairying in America pre-dates that of the United States as a nation. It points out that the first cows landed at Jamestown in 1607 and helped bring an end to the terrifying period of starvation. Still later, as the pioneers moved westward, nearly every covered wagon was accompanied by a cow, literally, the family's "food factory" on wheels.

For many years now, June has been observed in America as Milk Month. Meekma says that the time of the year when dairymen recognize the vital contributions the dairy industry makes to the nation's economy. It is also, he adds, the time when the industry goes out to tell its story and encourage greater use of its products.

Presently Meekma adds that the milk industry is as modern and highly technical as any other industry. Modern herds barely resemble the herds of the pioneers. They are more productive and more

scientifically cared for than the herds of only a few decades ago. There have also been great changes in the processing and distribution of the product. Milk today is pasteurized, often homogenized, often fortified with vitamin D, sealed in sanitary containers and, in general improved beyond the fondest dreams of pioneer American dairy farmers. It is a food, concludes Meekma, which provides about 28 percent of our daily nutritional needs for approximately 19 percent of our food dollar.

**Spring Brings Sharpies
Knocking At Your Door**

(Editor's Note: The following warnings were issued this week by the Deaf Smith County Chamber of Commerce, which serves as the local Better Business Bureau office. If

you are in doubt, you are asked to call the Chamber office before investing any money or signing any contract.)

A pest control firm is victimizing people in the Hereford area. Contacts by this pest control firm have been made both in person and by telephone. A number of complaints have been received at the Chamber office since this firm started operating in this area.

Victims of their racket are approached by a representative of the pest control company and offered a free inspection to determine if there are termites in their home. After this so-called inspection, the victim is told that the termite condition in the home is critical and the owner is then rushed into a job at an exorbitant price.

If you are approached in this manner, for the sake of your pocketbook, you should check with a reliable local pest control firm or call the Chamber of Commerce.

In one instance, a reliable pest control firm checked a home immediately after the inspection had been done by the gyp firm, and found that there was no evidence of termites on the property. A favorite ruse by the phony termite inspector is to carry live termites with him in a bottle and during the inspection, turn the termites out on a loose board under a house. The termite-infested board is then shown to the homeowner as conclusive evidence that termites are present in the home.

It should also be noted that

anyone soliciting business in this way is in violation of Hereford's solicitation ordinance. A description of the truck and, if possible the license number should be given to the police.

Spring brings other gyp offers, many of which probably will try to operate in Hereford this year. Among them are:

1. **Humus Peddlers:** Usually, a trucker stops at your house, lifts a basket of rich, black humus from his truck and begins to sprinkle it on your lawn. When the fellow says it's only 50 cents or 75 cents a basket and that you won't need much to cover your entire lawn, you tell him to go ahead with the job.

You may start to count the number of baskets he uses, but when he asks for a drink of water and you go into the house to get it, you lose count. Your bill can be anywhere up to a hundred bucks — and you can't prove that the number of baskets listed on your bill was not actually placed on your lawn.

The peddler may say "humus" was scraped from remote forests or bogs. This may be true, but more often it is not. Samples of the "humus" have been tested and have proved to be nothing more than material from the dump of some chemical plant. In some cases, the product has proved harmful to grass and shrubs.

Never worry about the course of events; just be sure you are right and hold to your faith.

**"Modern?" That's like when
you've got
Gas Air Conditioning!**

"Modern" is a real hard word to explain. Like, for instance, if you were talking about the "newest" in Summer comfort — the Sun Valley Gas air conditioner. It's the "most" in Summer comfort, because the air is the "coolest," and "cleanest" and stays that way when it's "hottest" outside. You might say it's the "economical"est," too, because it uses low-cost, dependable GAS. And no moving parts in the heating or cooling cycles make it the "maintenance free"est" of any unit on the market. So I guess you'd say "modern" ends everything with an "est," like the Sun Valley does.

Mama says it'll be all right for daddy to stay in the house to smoke his cigar now, thanks to Sun Valley's new twice-as-big filters.

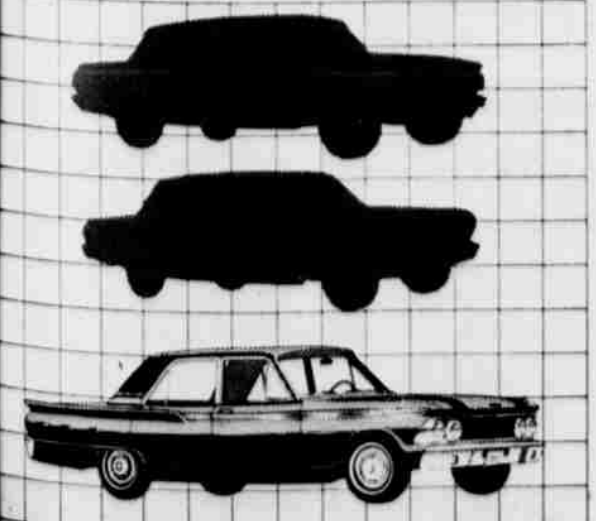

BUDGET-SIZED ECONOMY
Mama says it's never too soon to learn the dollars and sense facts about utility bills. She says "constant efficiency" means it keeps you cool all the time, and doesn't cost any more when it gets hot.

Does Ford Fairlane's
"compact" price mean
it's a compact car?

NO!!!

Rambler is a compact!
The experts classify cars by wheelbase. Anything under 114-inch wheelbase is a compact. The biggest Rambler's wheelbase is only 108 inches!

Chevy II is a compact!
Chevy II tries to sound like a middle-size car... but its wheelbase is only 110 inches!

**Our Ford Fairlane is right between the
compact and the big cars — gives you
compact price with big-car room and ride!**

Fairlane's wheelbase is a full 115.5 inches. From bumper to bumper, Fairlane measures 197.6 inches... 14.6 inches longer than Chevy II... 7.6 inches longer than the longest Rambler. Fairlane is as roomy inside as most of the cars on the road today... and rides more smoothly than most. Yet it's a foot shorter... easier to park than the big cars... less gas-wasting bulk. Come size it up!

Penn Point

By D. H. P.

Russ Metz, publisher of the Bath County News-Observer of Owingsville, Ky., came up with a real good idea...or some good food for thought. It isn't like eating a steak or homemade ice cream, but it is something we need to stop every once in a while and consider. Here is what he had to say, but changed to fit our county.

If for a period of two weeks everyone in Lamb County made all their retail purchases and sales performed out of the county, what would happen? It is pretty hard to imagine the chilling effect of a fine, friendly little community suddenly transformed into a ghost town. But, that's exactly what would happen in the towns of Lamb County if everyone suddenly began leaving the county to do their business. It certainly is a frightening thought and not a complete impossibility.

Every week many Lamb County residents take their money out of the county to spend on things that could be bought right here at home. They fully believe they are getting bargains they cannot get at home. And, until they are shown differently, they will continue to drive away and shop.

Obviously, those people are not in the majority...But, it is also very evident that mouny businesses do suffer when the retail dollar leaves home and may suffer more and more as other people begin spending their money elsewhere.

From this we can only gather that neighboring towns are doing a better selling job than we are, the buyers of our county the retailers here offer, taking advantage of the situations where the people have not been informed of the same bargains in their own home county. Despite the fact that we have an advantage of time, distance and tradition, we are finding our county becoming a secondary market for our citizens...in many cases.

There is only one solution to this growing economic problem. We must do a better job of selling our own residents on the merits of shopping at home. This cannot be done by waiting in our business places and watching the cobwebs form across the doorways.

To must tell to sell. Tell and keep on telling everyone about the many bargains offered

"I'm going into water sports gradually."

at home. Tell them and sell them, and they will not leave their money in towns that do not benefit Lamb County.

Too many of us think that because we have been in business in the same location for 20 or 30 or even 40 years, that "everyone knows where I am and what I have to sell." This may well be true among the people who have lived here 20 or 30 or 40 years but what about the new people who have moved here in the past 5 or 10 years?

So you see, this little bit of food for thought wasn't easy to swallow. We are all going to have to pick up our feet and get with it or we may not have anything to swallow.

"The President," reported Senator Hubert Humphrey to newsmen after a recent visit to the White House, "has the bit in his mouth (we assume he meant "teeth") on medical aid for the aged...He was kindly and soft-hearted in the steel dispute as compared with his feelings on medicare."

Well-known before this bulletin, was the flat rejection by Mr. Kennedy of any consideration of a health plan for oldsters outside of the compulsion of the Social Security system. Thus, it might be well to consider, before it is too late to protest and before our lawmakers commit us irrevocably, why, if the intentions are so benevolent, the proffered services so complete and the cost so trifling, medicare cannot be offered on a voluntary basis.

Is it because nine million Americans already over 65 and millions more who are approaching that age-already have the sort of health insurance

they want, and do not want Federal care?

Is it because the would-be beneficiaries are shocked by their discovery of the additional costs of medicare—\$10 a day for the first nine days of hospitalization, payment by the patient of the first \$20 of the cost of outpatient hospital diagnosis, payment by the patient of his own doctor or surgeon and purchase of drugs used outside of hospital or nursing home?

Or is it because the whole Social Security adventure has been so fiscally disastrous (\$600 million in the hole last year) that something new must be found to save it, a glossy gimmick that will boost the spiraling SS tax farther and faster—to an estimated \$507 a year per Social Security number by 1968?

Once Medicare is established, if the Congress is heedless enough or weak enough to pass it, voluntary health and hospitalization plans must go. Not enough people, no matter how much they prefer the do-it-yourself program and no matter what their salaries, will have enough left after Federal, state, local and Social Security taxes for such a luxury. Medicare must then, of necessity, be expanded to include all ages. And, insofar as taking care of their own health and that of their children is concerned, Americans will have had it!

Is this what President Kennedy is so determined to achieve?

Farm Facts

Flax fiber is the chief raw material of the cigarette paper industry. This means added income for flaxseed farmers from a substance that once was thrown away. Now it brings about \$3 million a year in farm income. Flaxseed long has been used for linseed oil, an important ingredient in paints and linoleum.

Flax fiber is used for cigarette paper.

70,000 to 85,000 cigarettes.

Cigarette paper must be pure white and strong porous to a specified degree—and not over a thousandth of an inch thick.

Flax is grown on about 3.5 million acres in Minnesota, the Dakotas, and California. In Europe and other parts of the world it is grown largely for the fibers which are used in making linen.

At decorticating plants, the fiber is separated from the woody portion and cortex of the flax plant and is pressed into bales. The fiber is then shipped to the paper mills to be processed into pulp and finally into rolls of paper weighing about 4,000 pounds each.

Rolls are cut into "bobbers" or reels, about one inch wide. A bobbin weighs 8 1/2 pounds and will wrap

STATE CAPITAL Highlights AND Sidelights by Vern Sanford

AUSTIN, Tex.— Crooked-hole well-drilling is the big news at the capitol.

More than \$3,000,000 in penalties is asked by Atty. Gen. Will Wilson in the first suit brought by the state following "crooked-hole" investigation in the East Texas Oil Field. Suit contends that six oil wells were drilled in such a direction that they would up under someone else's land.

Operators plugged two of them before Texas Railroad Commission engineers could check to see if the holes were straight or crooked.

Suit asked \$1,000 a day for each day of operation of each well. Over a two-year period, this comes to \$3,442,000.

Commission engineers plan to check more than 1,000 wells. Humble oil and Refining Company brought civil suit against another group of oil operators. Humble says that the operators' crooked wells ended under a Humble lease and have been draining off Humble's oil.

SAFETY IN AGE—If you live to be 100 you'll be safe from death by accidents.

State Health Department statistics reveal that not a single Texan over 100 years of age died in an accident in 1960.

Statistics also reveal that

there's something to what they say about Texas weather. Deaths from extreme heat and from freezing were reported during the year.

Biggest killer for all age groups, except those under one and over 75, is the highway accident.

In the home, fire and explosion are the biggest killers. Falls are in third place. Home ranks next to the highway as the scene of most accidental deaths.

MENTAL PATIENT CLINIC—Board of State Hospitals and Special Schools is expected to act within the next week or two on whether to select a site in the Lower Rio Grande Valley or in the Beaumont area for an outpatient clinic for discharged mental patients.

Dr. C. J. Kullman, state director of mental health and hospitals, said the Board already had chosen the Fort Worth area for one of the two clinics authorized by the last Legislature.

"Second will be established in South Texas," he added. Sites are being considered at Beaumont and Brownsville-Harlingen.

Such clinics now are operating in Houston, San Antonio and Dallas.

PARK PATRONAGE GAINS—State Parks system is showing

substantial gains in patronage as compared with last year. Bill M. Collins, executive director for the Parks Board, said that increases in the number of visitors particularly were noticeable at Garner State Park in Southwest Texas, Lake Corpus Christi Park, Palo Duro Canyon Park in the Panhandle, Bentzen Park on the Rio Grande border, and Kerrville and Buescher parks.

Total visitors in April, latest figures available, were 681,871, compared with 590,133 in the same month a year ago.

DOVE HUNTING SEASON—Texas will have representatives at the national dove conference in Washington on June 26 when length and dates of the 1962 hunting seasons will be discussed.

H. D. Dodgen, executive secretary of the State Game and Fish Commission reports the outlook favorable for a good dove crop in Texas—both mourning and whitening doves.

VACATION READING STIMULATED—Fourth annual "Texas Reading Club"—designed to encourage an interest in reading among youngsters—during their summer vacation—is under way.

Sponsored by the Texas State Library and participating libraries in 89 cities and towns, the program enrolled more than 16,000 young people this year. Harold J. Marburger, director of rural library services, State Library, described the reading club as the largest of its kind in the nation.

Youths who read 12 books on their reading level before August 31 will receive a reading certificate signed by Marburger and Dr. Dorman H. Wintfrey, director and librarian, State Library.

In addition, all youngsters who enroll will receive a "reading log" to keep a record of books completed during the program.

Books in many instances are being furnished by the State Library through inter-library loan, bookmobiles, multi-county regional libraries and through the loan of books as an extension service from the library field services.

TOLL ROAD—Only toll road in Texas—the Fort Worth-Dallas Turnpike—seems to be making its way.

The Turnpike grossed \$3,245,797 last year, with operating expenses of \$937,165. It put \$1,641,977 into the fund to pay interest on the \$58,500,000 borrowed to build the road, and to build up its total reserves to nearly \$5,000,000.

The Fort Worth-Dallas Turnpike is the only place in Texas where it is legal to drive 70 miles per hour.

Legislature allowed the Turnpike Authority to raise the speed limit to that figure.

SMOKERS PAY—Cigarette smokers are chipping in more than \$7,000,000 a month to the State Treasury under the 8-cent sales tax on each package.

Treasurer Jesse James reported income from that source to be \$7,700,588 in May. **SCREWWORM CONTROL**—Fight against the screwworm fly has been extended northward, reason is because truck-hauled livestock, infested with screwworms, crossed the control line which was being maintained by aerial distribution of sterile male flies.

Texas Annual Health Commission meets on June 11 to adopt a regulation requiring inspection of livestock as they cross the control line, and spraying

them to make sure they do not carry the costly worms into clear territory.

A new distribution point was established at Conroe after outbreaks of screwworms were reported in East Texas.

Program is a bold effort to control this \$40,000,000 a-year pest. It is financed by the federal and state governments and by contributions from livestock owners. Most of the money is federal.

GOVERNOR'S APPOINTMENTS—Governor Price Daniel appointed former Atty. Gen. John Ben Shepperd of Odessa to the Texas Industrial Commission to replace Robert L. Haynsworth of El Paso, who resigned. Commission has the job of attracting industry to Texas.

Governor Daniel moved Dr. Harvey of Hallettsville from the board of directors of Texas A&I at Kingsville to the board of Texas Southern University at Houston. He named to the A&I board C. C. Winn, San Antonio; Leo Welder, Victoria; and Lewis Maples, Kingsville.

Hoyt Jonson, Palestine attorney was named to the board of managers of the Texas State Railroad.

Carl Phinney of Dallas was put on the State Securities Board.

BUSINESS PICKUP—Texas business activity improved in April by failing to lose ground as it had in February and March.

Bureau of Business Research at the University of Texas read its business barometers and concluded that April business was at 128.2 per cent of the 1957-59 average, up 17 per cent over April of 1961. Strength in the sales of automobiles was a major factor in the lev-

eling off from the all-time high reached in January with an index of 132.9 per cent.

The ole' swimmin' hole can be the last place you will visit on earth -- unless you are careful.
