Sandhills Philosopher

Philosopher Offers Self To Test Friendship Can Be Purchased

Editor's note: The Sandhills philosopher on his Johnson farm discusses foreign positive conclusions.

Dear editor:

Lots of candidates throughout the country, I've noticed, when they're running for justice of the peace or Congress or some other office, they don't find anything else to run against, but they run against Foreign Aid.

Why give all this money away to foreign countries, they demand, pointing out that regard to the billions of dollars we've spent, the world is in a worse shape than it was before we started.

I don't know anything about Foreign Aid, except that any

new President that gets elected, whether he's a Democrat replacing a Republican or a Republican replacing a Democrat, and after he's been there long enough to get familiar with his job and the shape of the world, comes out for the necessity of Foreign Aid, and I'm not one to question a President on the stake the U. S. has in the welfare of the rest of the world. I believe in the division of powers. He runs Washington and I run this farm, and we both have our hands full.

But what brought this to mind was a statement I read last night by a college professor who's an expert on foreign affairs. He said it has been proven impossible to buy friendship and the United States ought

to stop trying it.

Now a statement like that ought to be proved. How does this college professor know friendship can't be bought? I'm not saying it can, but the question ought to be put to a test, a scientific test, this is 1962, not 1900.

Consequently, I am offering my services, if Washington will start sending me \$250 a month, I will allow a group of scientists to come out to this Johnson grass farm once a month, wire me up with all those scientific gadgets they use on astronauts, and test my friendship reactions to that \$250. They can even televise my pulse rate the warmth of my heart beat, the glow on my face and the increase in my appetite when I cash that check, if they want to.

Now this thing shouldn't be any snap test. To be completely scientific in really finding out if my friendship can be bought, a big stack of data ought to be built up, over several years. I'd say eight or ten at the least, through more than one administration. How did my reaction in January compare with January a year ago, two years ago, five years ago . . . thing like that.

I don't know whether friendship can be bought or not, but I'm willing to sacrifice myself to this test to find out. I'd like to start not later than April 1 if possible.

Yours faithfully
J. A.

Plainview Production Credit Association Meeting Saturday

Stockholders and guests from across an eight-county area of high plains will attend the annual meeting of the Plainview Production Credit Association Saturday, March 31, in the Plainview High School auditorium.

A barbecue luncheon will be served in the high school cafeteria to all stockholders and guests of the home-owned agricultural credit organization beginning at 11 a. m., General Manager Olan Alexander of Plainview, announced. Luncheon will be served until 1 p. m.

The business meeting will follow the luncheon, in

the auditorium. Grady Shepard of Hale Center, member of the association's board of directors, will preside at the business meeting.

Highlights of the meeting will include an election of one member of the board of directors for a three-year term. Nominated for the board position are L. R. Durham of Plainview and John Norfleter, Route 1, Hart.

Durham was nominated for reelection.

Holdover directors are Vice President Henry Hayes of Plainview, D. S. Anderson of Muleshoe, Don Garrison of Silvertown and Shepard, Durham is currently president of the association.

Guest speaker is expected to be W. N. Stokes, Jr., president of the Federal Intermediate Credit Bank of Houston. The Houston bank acts as discount agency for all 36 Production Credit Associations in Texas, providing loan funds through the sale of debentures on the nation's commercial money market.

Cotton Classing Service Is Again Available

Growers who wish to have their cotton classed by the U. S. Department of Agriculture under provisions of the Smith - Doxey Act should apply for these services as soon as their cotton is planted, says Fred Elliott, extension cotton specialist.

The Smith - Doxey Act provides for one free classification for each eligible bale of cotton. Samples must be submitted by a bonded sampler or by a public warehouse which issues negotiable receipts, explains Elliott.

Each cotton improvement group, except those in southern Texas, must file an application with the cotton classing office serving its territory not later than August 1. Those in counties south of a line from Dimmit to Karnes to Matagorda must file an application by June 1.

Prompt application filing is necessary because time is needed for each group to arrange for submitting samples by an approved sampling agent to the proper classing office, says Elliott. At least 15 days are required to process applications and deliver sampling supplies.

Application forms for these services may be obtained from county agents, cotton classing offices of the Cotton Division of the AMS, or from the area office in Dallas.

Farm Facts

Fish farming is getting to be a profitable venture, especially in the South. The Alabama Experiment Station has been one of the pioneers in this development.

H. R. Swingle, fish culturist at the station, stocked a pond in February with 2,587 red catfish and 500 golden shiners. The pond was fertilized four times during the spring and summer and the fish were fed a special feed developed at the station.

The pond was opened to public fishing in August and permits were sold for \$1 apiece. When the pond was drained in December, it yielded 500 pounds of catfish which sold for 50¢ a pound locally. Demand for dressed fish exceeded the supply. Net income from fishing permits, shiners, and dressed catfish amounted to \$321 per acre.

Rice growers in Arkansas have been rotating their crops with fish for a number of years. They flood their

Many farmers now raise fish.

Planting Time For Summer Pastures Nears

Summer temporary pastures are a good bet for anyone owning beef or dairy cattle, says E. M. Trew, extension pasture specialist. These pastures produce better quality forage than permanent pastures and this results in more beef or milk per acre.

In addition, they permit resting of permanent pastures and ranges, and they often provide a source of hay.

Best quality Sudan grass is an excellent grass for temporary pastures, says Trew. A slightly less desirable plant is a Sudan - Johnson grass hybrid. These grasses are coarser and of lower quality than Sudan, but they often produce higher yields. Sudan - grain sorghum hybrids can also be used. These are coarser still, but they produce good yields and appear palatable.

Pearl millet is suggested for use on poor, acid soils, on severely eroded heavy soils and on soils where Sudan "yellows out," he says.

Summer temporary pastures can be planted any time after danger of frost is past, explains the specialist. If the pasture is to be used for grazing, the seed

should be planted in 36 - 42 inch rows. For hay production the seed can be broadcast or close drilled.

Correct fertilizer recommendations should be obtained by soil testing, emphasizes Trew. Application should be in bands 2 - 3 inches below and to the side of the seed at planting. If additional growth is needed after each grazing down or cutting, topdress with 30 - 50 pounds of nitrogen, providing adequate moisture is available.

For local recommendations and publications on summer grazing crops, see your local county agent, suggests Trew.

Plans are essential in the accomplishment of any program whether national or individual.

The man who extends favors acquires an importance only in the mind of those who receive them.

Judging To Begin In Improvement Program

The time of decision has arrived, judging will begin next month, reports Reagan Brown, extension rural sociologist, in the state's 14 extension district winners in the 1961-62 Texas Community Improvement Program.

Eight communities will be named, based on the progress made during the past year, in each of the districts. The first place district winners will then be considered by the state judging committee in their deter-

mination of the top three communities in the state, said Brown.

He added that 268 rural communities are participating in the program and that approximately 10,000 families reside in them. District extension agents, he said, will be in charge of the district judging and will soon be announcing judging schedules. A late May announcement of the "Most Progressive Rural Community in Texas" will climax another very successful

year, Brown said.

He listed the objectives of the 10,000 participating families as -- making their communities better places in which to live, with particular emphasis on increasing and managing income; increasing the opportunities for social activities; improving the farm and home and improving health conditions and services.

Awards for the winning communities are provided by the electric utility companies operating in Texas. The program is sponsored by the Texas Agricultural Extension Service in cooperation with these same companies, Brown said.

STATE CAPITAL Highlights AND Sidelights

by Vern Sanford

AUSTIN, Tex. -- Candidates for governor now are quarrelling over legislative redistricting... which would give the metropolitan cities more strength.

Poll tax payments indicate that these cities actually have the voting strength. But final figures are not in all counties. Official figures plus some estimates reveal 1,250,429 qualified voters in the 12 counties which contain cities of 100,000 or more.

One notable thing about the poll tax figures is the growing number of those with exemptions from the poll tax because they are 21 years of age and vote free -- or they are over 65 and don't have to buy a poll tax in order to vote.

Indications are that there will be more exemption certificates this year (those in cities of 10,000 or more) than ever before, even in record-setting 1960.

Another fact to consider is that rural people go to the polls regardless of the weather, while inclement weather keeps many city folks home.

MOTORCICLE INCREASES - Texas Department of Public Safety statisticians figure an accident occurred in Texas traffic every 97 seconds last year, with someone killed every three hours and 47 minutes.

When the department closed its 1961 "death book", it reported a motorcicle total of 2,314 -- 50 more traffic deaths than 1960 held. Drivers of 324, 149 motor vehicles sustained 132,570 injuries.

December 22 was the most deadly day... 23 people were killed in 15 fatal accidents. Col. Homer Garrison, Jr., director of the DPS, remarked "It is a sobering thought to realize that the number of persons killed on Texas streets and highways was greater than the populations of most Texas towns."

Fourteen counties were free of fatal accidents in 1961 -- Borden, Brewster, Delta, Hansford, Hardeman, Kent, Lipscomb, Loving, Mason, Raines, Roberts, Somervell, Sutton, and Upton.

"WEL - KNOWN CAMEL CART - DRIVER" -- The State Highway Department is pondering a mysterious postcard that carries a request for a copy of the new 1962 highway travel map.

The return address reads: Bashir Ahmed Sarban (Well-Known Camel Cart - Driver) 27, Corner Chambers, 181, McLeon Road, Karachi, Pakistan.

Folks at the highway department are wondering if this is the same Bashir Ahmed who visited Texas and the U. S. last year as Vice President Lyndon Johnson's guest.

There was quite a furor when that "Bashir" retired his camel and accepted a gift of a new Ford. Could he be planning to return to America and motor through the Lone Star State.

HOPES RISE FOR HISTORIC PARK -- Lawson Knott, Jr., deputy administrator of U. S. General Services Administration, informed Gov. Price Daniel that the government has granted his request for Lorenzo de Zavala's burial site to be bid on separately when San Jacinto Ordnance depot is put on the sale block.

Property contains the grave of de Zavala, a Mexican - Texan who signed the Texas Declaration of Independence, and served as vice president of the republic.

General Antonio Castillo, "a gallant foe" who died at San Jacinto, also is buried there. Governor Daniel has been urging that the de Zavala home-site and cemetery acreage be set aside for state or county park purposes. He believes this bidding provision will delay the sale of this tract to give time for Sen. Ralph Yarborough to pass a bill transferring the 142 acres to the state or county, or pave the way for some other park arrangement.

MISREPRESENTED REPRIVE REVOKED -- Governor Daniel revoked a one-year reprieve for Johnny Will Ford after C. V. "Buster" Kern, Sheriff of Harris County, revealed some new information about the case.

Ford had served one year of a three-year sentence in the Harris County jail for unlawfully carrying a pistol, as an habitual, when the Board of Pardons and Paroles made the cus-

tumary recommendation for a reprieve and failed to get any objections from local officials.

After the reprieve was granted on March 9, Sheriff Kern advised the governor he hadn't had notice of the pending clemency application, and would have protested it if he had received it.

He said Ford was pursued for two years before he was forced to surrender, whereas the board had been told surrender was voluntary.

Daniel said his action did not reflect on the board, "because they acted upon factual representations made on behalf of the applicant and in the absence of protests from local officials."

LETTERS OF THE LAW - The State Comptroller declared oil, gas and related well services are responsible for collecting a two per cent sales tax when service involves any taxable, tangible, personal property sold or rented by a firm.

Comptroller Robert S. Calvert further stated that receipts from the sale of tangible personal property to a common carrier are exempt from the sale and use tax if the property is shipped out and used out of the state.

When democratic county clerks in Harris and Galveston counties said they would attempt to nullify the republican primary nominations unless GOP primaries are held in every voting precinct in their counties, GOP state chairman Tad Smith dug up a 1952 opinion on the matter by the then attorney general, Price Daniel.

The 1952 ruling states that a county clerk does not have the authority to determine questions of irregularity or illegality where a certificate of nomination is regular on its face. The opinion said county clerk acts in a ministerial capacity in receiving the certificates and placing names of nominees on the general election ballot.

Members of the State Bar association voted 4,532 to 1,012 in favor of a proposed constitutional amendment for local option abolition of justice of the peace courts.

They also voted 4,506 to 966 for a proposal urging an amendment to authorize the Legislature to provide for interim county and state government during a disaster period.

Attorney General Will Wilson ruled that Morningside Manor, Inc., a Methodist - operated home for the aged in San Antonio, is exempt from ad valorem taxes, even though some residents pay for their care.

He also stated that a physician who is a notary public can acknowledge an application for an absentee ballot, and then, as a physician, issue a disability certificate for the absentee.

WAR ON SCREW-WORMS -- Governor Daniel promised to transfer \$25,000 from emergency funds to the Texas Animal Health Commission to buy materials and employ personnel for the fight against the screw-worm fly.

Contract has been signed for construction of a plant at Mission, where up to 75,000,000 sterile flies will be produced each week for use in the eradication program of the commission and the Southwest Animal Health Research foundation.

PARK REPAIRS APPROVED -- Emergency repairs will be made to Carls-damaged San Jacinto Monument by San Jacinto Day, April 21.

A \$3,200 appropriation from the governor's emergency fund will be added to \$5,000 from the San Jacinto Park commission and \$5,000 from the San Jacinto Museum and History Association to meet the most urgent repairs of the estimated \$157,000 damage done by the hurricane.

Speaker James A. Turman named Representatives Murray Watson Jr., R. H. "Dick" Cory, Virginia Duff, Forrest Harding and Reed Quilliam to the House Interim committee on special districts.

Sixteen individuals and organizations already have been told they may appear at the March 30 hearing on the proposed changes in the new sales tax, to be held in Dallas.

From Your Chamber Office

BY KENNETH WARE

What it is . . . ?
What it does . . . ?
How it functions . . . ?

1. What is the Littlefield Chamber of Commerce?

It is a voluntary organization of Littlefield and Littlefield area citizens who are investing their time and money in a community development program — working together to improve the economic, civic and cultural well-being of the area.

2. What are the purposes of the Chamber of Commerce?

To sponsor and encourage and work for any development that will lead toward the creation for more dollars for more people and improve the overall economic welfare of the people. The Chamber of Commerce serves as a clearing house for information and strives to translate community improvement ideas into a program of action.

3. Who can join the Littlefield Chamber of Commerce?

Any responsible citizen who is interested in the improvement of the area and who is willing to make a personal and financial investment in the work of the organization.

4. Is the Chamber of Commerce tax supported?

No. The only income is from the financial investment made by the membership.

5. How much does it cost to be a member of the Chamber of Commerce?

The minimum financial re-

quirement for membership commonly referred to as membership dues, is \$40.00 annually for individuals and \$60.00 annually for businesses. Many members pay several times the minimum, depending upon their ability to pay and their interest in the progress of the area.

6. What is the money used for?

To maintain an office and to finance the various committee activities.

7. Are the Officers and Directors paid for their work?

No. In addition to their financial support of the Chamber of Commerce program, all members are asked to assume some actual work in community activity. Officers, Directors, Committee chairman and committee members all serve without pay. The only paid employees are the manager and office staff, who devote their fulltime to Chamber of Commerce activities.

8. Who runs the Chamber of Commerce?

The Chamber of Commerce is a democratic organization and every member has a voice in determining the policies and activities. A Board of Directors, consisting of 12 members is elected by the membership and is responsible for directing the operations and activities. The by-laws provide for a change of personnel on the Board of Directors each year.

9. How does the Chamber of Commerce work?

Primarily through committees. The needs of the area are listed in the form of a program of work and committees are named to carry out the various projects. Some projects may be completed in a short time, while others may require several years of sustained effort. The Chamber of Commerce should not be mistaken for a social or civic club. It is an action organization — a business institution dedicated to those projects that will provide a more abundant life for all the people of the area. A business or professional man should be embarrassed if he does not belong.

10. What actual benefits do members receive?

Numerous services are available to members, however, the real benefits come indirectly through the continuous de-

velopment of the area. An active well-supported Chamber of Commerce program will result in increased income for farmers, more business for merchants and professional people, better workers and better production for industry, more job opportunities for the working people and finer civic and cultural facilities for the enjoyment of all citizens.

11. What particular type of activity does the Chamber of Commerce stress?

The Chamber of Commerce strives to maintain a well-rounded program of work to include every phase of activity of importance to the economic development of the Littlefield area. The organization has several committees working in the following fields of endeavor: Industrial Development, Agriculture, Education, Cultural and Civic Affairs, Trade Development, Information and Public Relations, Convention and Tourist, and Ways and Means.

Dollars invested in the program of the Littlefield Chamber of Commerce buy more than a membership — they buy what no other dollar can — the unity, cooperation and combined efforts of unselfish men and women devoted to the task of making their community a better one.
