VACATION DAYS

Many millions of people are starting on their vacations or will soon begin these times of rest and recreation. It is with feelings of happiness that people drop for a time the cares of ordinary life, and proceed to enjoy whatever vacation plans they may have formed and carry out cherished de-

sires. The majority of vacationists may travel or visit favorite resorts, while many will find pleasure and satisfaction by spending their free time at home.

Some people need the vacation mainly for rest. The strain of work and toil has told on them, and they are well satisfied to spend the vacation quietly. Many are happy if they have interesting things to read, and can enjoy the beauty of some scene or the companionship of friends.

With many the vacation is a period of great activity, as they take long trips or engage in favorite games and sports. Some are so very active that they return from a vacation as tired as when they left home. Even if so, they have great enjoyment in new experiences and pleasant activities.

One beneficial effort of vacation is that one is apt to meet a good many people, and have pleasant conversations with them. People exchange their experiences, and one often learns things of value. Frequently the acquaintances thus made prove to be lasting friendships.

People return from their vacations rested and refreshed, and with new energy for their ordinary work and duties. In quiet hours away from home, many may have been able to think up or have learned of new ideas helpful in their work. So vacation is a grand old time, and its days have been well spent.

Hairy Vetch Turns Out Good As Soil Builder

COLLEGE STATION—Wilbarger County farmers, after their first attempt to grow hairy vetch as a soil building and seed crop, are satisfied with results.

On the sandy soils of the Rolling Plains, hairy vetch has lived up to its advance notices, as far as Wilbarger County is concerned. Frank Wendt, county agricultural agent, reports that the farmers are "elated" over the outcome of planting hairy vetch with rye. The crop has been "invaluable" as a cover crop in holding down sandy soils and has furnished good winter pasture.

The most troublesome part of the vetch-growing—seed harvest—is over now, says County Agent Wendt. After a few bad starts and some trial and error experiences, the farmers harvested from 150 to 800 pounds of seed an acre.

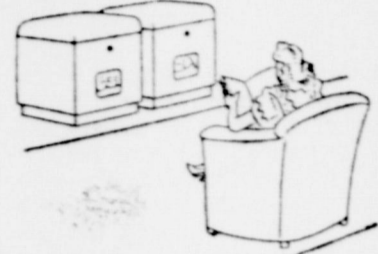

FIXING UP the HOME
By Diane Greeter

Hot Water for Automatic Living

AUTOMATIC living! That's what the world demands today and that is what it is getting. Strangely, however, most of our new gadgets and gimmicks depend upon a very simple little thing—something which we have had for many years.

Take the automatic clothes washer, for instance. You must have exceptionally hot water. We would suggest that you plan to have a good automatic gas water heater to provide the best service from your washer. Water should be 160 to 180 degrees Fahrenheit to do the job well.

Regardless of where you might live now or where you might plan to live, you can have all the advantages of modern gas appliances. LP-Gas, which many know as "bottled" or "tank" gas, will do the job. Several companies in your

community will sell and install the appliances and make regular delivery of gas to your home. The gas is compressed into a liquid form, which makes economical transportation possible, and you can store many, many cubic feet of gas in a small container.

Incidentally, look into the possibility of an automatic gas clothes dryer as a companion piece for your washer. They are about the same size and shape and they make a complete laundry when installed together.

Wilbarger County produced about 250,000 pounds of hairy vetch seed, estimates the county agent, most of which will be used in the county for fall planting.

Supplies of glass jars, jar rubbers and closures are bigger than in recent years. The homemaker will also find better supplies of pressure canners, home freezers and more freezer locker space.

What the nation undoubtedly needs, in part, is larger and cheaper watermelons.

Canners Use Same Time Tables Regardless Of Type Cooker Being Used

COLLEGE STATION—The processing time tables for home canners recently released by the Texas A. and M. College Extension Service can be relied on for any make or model of canner.

Canners on the market today differ in material, design and also size, but tests in nine canners showed that the rate of heating and cooling did not differ enough to make different processing times necessary.

U. S. Department of Agriculture specialists made tests with green beans and mashed pumpkin with two canners of porcelain enamel one steel, one of pressed aluminum,

and the other cast aluminum. The canners varied in weight from 11 to 20 pounds and in volume from 17 to 31 quarts. Each canner had a capacity of at least one tier of seven quart jars.

Housewives may feel safe in using the standard new time tables are in the offices of newspaper advertisers.

Chicken Feed

"Folding Money" NOW

Poultry raising in our area has come a long way since Mother kept a few chickens for egg money and Sunday dinners.

Today there's a lot of good "folding money" in scientific poultry raising. It's not "chicken feed" any more, for more folks than ever before are making big money in the poultry business in the Panhandle-Plains-Pecos Valley Area.

We have so much confidence in the poultry industry—and all other industries we serve, that we are investing 35 million dollars in a building program. This expansion program in our territory will bring more dependable electric service to industry and farms and better living—electrically—to everyone.

SOUTHWESTERN PUBLIC SERVICE COMPANY
22 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

"COTTON ED" Says...
"TO GET WHAT YOU WANT... LOOK TO THEM THAT'S GOT IT"

My Pappy once told me... "Man ain't no different from any 'tater varmint. They're all a thinkin' and a restin' 'bout SELF-PROTECTION EVERY DAY."

Take us COTTON FARMERS... we're a gittin' PROTECTION... even while we're a HOEIN' and GROWIN'... and we're agittin' PROTECTION FROM THEM THAT HAS PROTECTION TO GIVE.

My woman "Cindy" recollected to me 'tater day when New York and New Orleans cotton markets a-closed... fall... Yep they quit buyin' cotton an' count of the tumble break that was happenin' in cotton... and Son it was a MESS... them Critters took fer cover... But the COTTONOIL boys stayed with us and kept right on a buyin' cotton... Yes Sir... they gave us PROTECTION when we needed it... and as fer me... I'm right proud of my Elk Cotton Oil boys of bein' my neighbors... sorta gives me a feller athankful feelin'... besides... them Elk Cotton Oil boys set a fine example fur some of 'tater Cotton Best.

Like I said a fore... if'n you want Protection... GET IT FROM THEM THAT'S GOT IT TO GIVE."

Sincerely,
"Cotton Ed"

Diarrhea, Summer Complaint
Prevalent Now

The season when dysentery and "summer complaint" is most prevalent in the state, and Dr. Geo. Cox, State Health Officer, has been warning parents of children regarding the prevalence of these diseases.

The cause of the intestinal ailments are impure milk, food; allowing a child to overheat; using too much cream in the

diet; and under-feeding." Dr. Cox said. "All foods should be fresh and clean, and left-overs should be properly refrigerated to prevent spoilage."

Dr. Cox said definitely that when a feeding formula for infants is used, it should be prescribed by a physician and then prepared with extreme care, especially in regard to cleanliness and refrigeration. Babies should be fed at regular intervals and on a definite schedule. Their stomachs and bowels can become easily upset if they are fed haphazardly whenever they happen to be fretful or restless.

The State Health Officer de-

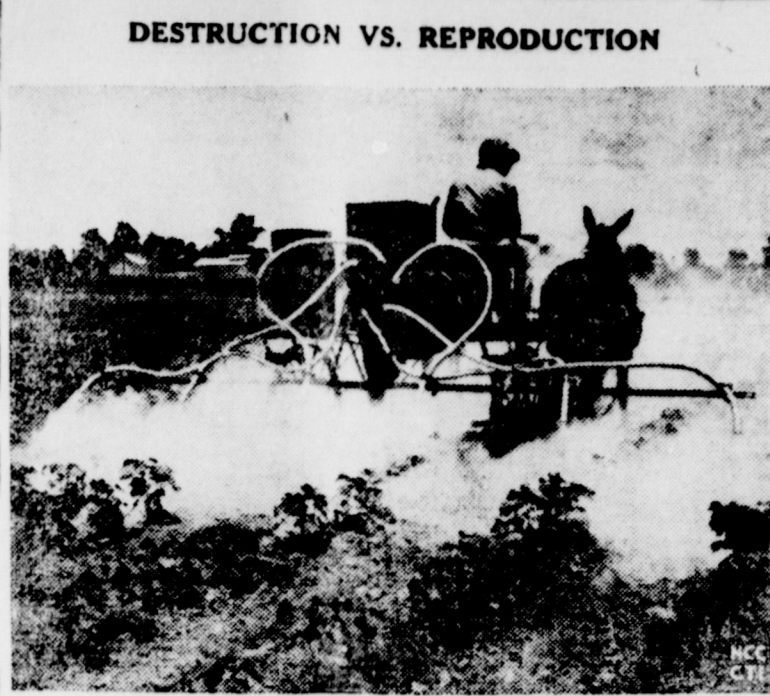

clared that with dysentery, as with many other diseases, the fly is an agent of transmission, and every home should be well screened and free of flies.

"If diarrhea or dysentery develops, consult a physician at once," Dr. Cox advised. "This so-called 'summer complaint' can become a very serious menace to young baby's health, if not an actual threat to his life."

Seven Percent More Blue Ribbon Dairy Cows Exhibited This Spring

COLLEGE STATION — Thirty per cent of the dairy cattle exhibited at "dairy days" in Texas this spring were classed as blue ribbon animals, an increase of seven per cent over blue ribbon awards last year.

The increase, say Extension dairymen at Texas A. and M. College, indicates that Texas dairy farmers are recognizing good dairy type. There was also a marked decrease in the number of cattle receiving white and yellow ribbons.

The summer's bitterest battle is raging today across the Cotton Belt—the struggle of the farmer to protect his cotton crop from the hungry boll weevil and other insect enemies. Multiplying with unbelievable rapidity, the boll weevil can heavily damage the crop unless controlled by insecticides, the National Cotton Council declared. The multi-drawn duster shown in the picture distributes insecticides over several rows of cotton simultaneously, but many other types of equipment are available to meet the needs of every size farm.

At the 33 educational "dairy days" held in the state this year, 2,156 head of dairy cattle were classified. Final tabulation by the Extension dairymen, who helped judge many of the shows, reveals that 18,720 people took part in the "dairy days".

A breakdown of the classifications shows 21 per cent of the cattle classified purple ribbons; 30 per cent, blue ribbons; 42.8 per cent, red ribbons; 21.1 per cent, white; and 4 per cent yellow.

Six different breeds of dairy cows were entered in the 33 shows—Ayrshire, Brown Swiss, Jersey, Guernsey, Holstein and Milking Shorthorn.

EVOLUTIONARY DEVELOPMENT IN GENERAL-PURPOSE TRACTOR DESIGN ANNOUNCED BY LOCAL JOHN DEERE DEALER

ANY ADVANTAGES TIMED FOR NEW ROLL-O-MATIC FREE-ACTION FRONT WHEELS

Members of this community will be pleased to know that W. E. Bowen, John Deere Farm Equipment Dealer, is announcing a revolutionary development in general-purpose tractor design—the new John Deere Roll-O-Matic "Free-Action" Front Wheels.

The driving ease . . . increased riding comfort . . . new smoothness and ease of operation, and longer tire life among the advantages claimed for this new development.

Invented by John Deere, Roll-O-Matic is a radical departure from conventional design. Instead of being mounted, front wheels are free to rotate. The slightest up-or-down movement of either wheel is immediately transferred through gears which automatically equalize the load on both tires.

As is shown in the illustration of two John Deere Tractors. One equipped with conventional rigid front wheels; the other with Roll-O-Matic. The right front tires of both

are resting on a rock five inches high. Notice that the entire front end of the conventional tractor has been forced to raise the full five inches and that one tire is taking the full load. Now, look at the tractor equipped with Roll-O-Matic. Here, the rise is only two and one-half inches—exactly half that of the conventional tractor—and each front tire is taking its full share of the load.

By minimizing the up-and-down movement of the front end, and equalizing the load between both front wheels, Roll-O-Matic offers a smoother, safer, more comfortable ride, and greatly increases front tire life. Steering, also, is greatly improved. The difference is immediately apparent upon driving one of these tractors—in the way it steers over rough ground . . . on side-hills . . . in furrows . . . on top of beds . . . along the contour . . . in almost any operating condition. There's no fighting the wheel, no creeping, no weaving from side to side. With just a guiding hand on the wheel, the tractor literally climbs out of furrows, "walks" right over obstructions, operates in rough fields with greater stability.

Roll-O-Matic is an exclusive John Deere feature and will be made available for the new John Deere Models "A" and "B" Tractors recently announced.

DORIS FORRESTER AGENCY

Wheeler, Texas

There's Money in MILK.

You Bet There Is

BUT YOU HAVE TO

Keep It Fresh

In order to keep the bacteria count down and keep milk fresh, it has to be cooled down to 50 degrees in a very short time after being taken from the cow. And, you are aware of the fact that milk must be kept FRESH to be marketable.

Ordinary methods such as setting the can in the shade of a tree or putting it down in a tank of water will not effectively cool milk down to 50 degrees and keep it that way until it is picked up, consequently the bacteria multiply and your milk sours before it reaches market and is returned to you unmarketable.

TO COOL MILK QUICKLY AND EFFICIENTLY . . .

Many dairy farmers in this section have already set up WET STORAGE MILK COOLERS in their Grade A barns and are getting top market price for their milk. We suggest that you join the many satisfied customers who already are using WET STORAGE MILK COOLERS and let us install one for you IMMEDIATELY. We can make immediate delivery, and we can handle the papers if you need financing.

SOCIETY

Martin-Goad Nuptials Read In Impressive Ceremony Saturday

The marriage of Miss Ida Mae Martin, daughter of Mr. and Mrs. P. A. Martin and W. A. Goad, Jr. son of Mr. and Mrs. W. A. Goad, Sr. was quietly solemnized Saturday at 2:30 p. m. at the Church of Christ parsonage with B. M. Litton, local minister, officiating in the simple but impressive single ring ceremony.

The bride was very attractive in a two-piece dress of white eyelet linen. She wore a white straw hat trimmed in brown. Her other accessories also carried out the brown and white color scheme. Her corsage was white carnations tied with yellow ribbon. Louis Martin, brother of the bride, attended the couple.

Mrs. Goad graduated from Wheeler High School with high honors in May. She was valedictorian of the senior class this year and salutatorian of the 8th grade class when she finished grammar school. She was the recipient of a number of awards for her outstanding achievements in both sports and school work upon her graduation.

Mr. Goad graduated from Wheeler High in '42. He is a veteran of the recent war when he served with Gen. Patton about a year in both France and Germany. He was awarded the Purple Heart and three battle stars.

Mrs. McQueen Teaches Bible Lesson Monday

The ladies Bible Class of the Church of Christ met Monday at 3 p. m. in the church building for the third in a series of lessons in the book of First Timothy. Mrs. J. C. McQueen was present and taught the lesson.

The scriptural qualifications of elders or bishops and deacons were discussed at length by the class, and it was pointed out that stricter discipline should be maintained in the home, especially by fathers, since this is one of the chief failings of present day leaders of the church in general. After the class, the ladies almost completed their first project which was redecorating the nursery and ladies lounge. All ladies are urged to be present again next week and visitors are always welcome.

Those attending were: Mesdames J. C. McQueen, O. Nations, Bill Owens, P. H. Scott, Shelby Pettit, T. J. Daughtry, Clyde Johnson, C. L. Wilkes, George Topper, J. J. Ayres, Herman Top-

per, Allie Minor, B. M. Litton, Misses Pearl and Claudine Johnson and Wanda Lou Topper.

Helton-Zybach Nuptials Solemnized July 15 At Home of Bride's Parents

In a pretty morning wedding, Miss Rowena Helton, daughter of Mr. and Mrs. Virgil Helton of Briscoe, became the bride of R. L. Zybach, son of Mr. and Mrs. Clarence Zybach of Briscoe, July 15, at the home of the bride's parents.

Rev. O. C. Evans, pastor of the Lakeview Methodist Church, read the impressive single ring service. Vows were exchanged before an improvised altar with a vine-covered background and an arrangement of white gladioli in white floor baskets.

Miss Roberta Zybach played "The Rosary" by Nevin preceding the professional and accompanying Miss Patty Porter of Shamrock who sang "For Sentimental Reasons" and "Because" Traditional wedding marches were used.

Little Miss Jean Zybach, sister of the bridegroom, was flower girl. She wore a dress of white dotted swiss over pale blue satin.

Mrs. R. J. Holt, Jr. of Wheeler, attended the bride as matron of honor. She was attired in a street-length dress of teal blue, and wore a corsage of pink carnations.

Miss Mabel Sorenson of Briscoe, was bridesmaid. She wore a street-length dress of pale blue, and her corsage was of pink carnations.

Mr. Jimmy Venable served the bridegroom as best man, and Mr. Eddie George was groomsmen.

The attractive bride, entered on the arm of her father, who gave her in marriage. She wore a street-length dress of white pique with insets of lace insertion. She carried a white Bible topped with white carnations and showered with satin streamers. For traveling, she chose an aqua suit, with which she wore white accessories and a corsage of white carnations.

For her daughter's wedding, Mrs. Helton wore a grey dress with black accessories, and a corsage of pink gladioli. Mrs. Zybach, mother of the bridegroom, wore a teal blue dress with black accessories, and a corsage of pink gladioli.

Mrs. Zybach is a graduate of the Shamrock High School with the class of 1947, where she was a popular and talented student.

The bridegroom is a graduate of Briscoe High School and attended Texas A. and M. College. Following the reception, the couple left for a trip to points in Colorado.

SUITED FOR SEA

Lovely Pat Kirkwood is striped for action in this novel two-piece suit of blue and white cotton. The M-G-M starlet was delighted by the unusual cut of the adjustable bra top. The fluted edging forms the pockets of the slim drop-front shorts.

They will make their home on a ranch near Briscoe.

Kelton YWA's Meet At Home Of Sponsor Mon.

The YWA's of the Kelton Baptist Church met Monday, July 21, in the home of their sponsor, Mrs. Bledsoe. Bible study was from Matt. 4: 5-6.

All girls are invited to meet each Monday at 3:00 o'clock p. m.

Mrs. Davis Teaches Kelton WMU Lesson

The Kelton Baptist WMU met Monday July 21, at the church, with the vice president in charge of the business meeting. A Bible lesson was taught by Mrs. L. T. Davis, Sr.

Those present were: Mesdames J. A. Tucker, L. T. Davis, Jr., Curtis Henderson, Geo. Henderson, F. L. Rathjen, Geo. Gandy, L. T. Davis, Sr., and Mrs. J. F. Rathjen.

Mrs. T. B. Killingsworth, Sunbeam leader, reported nine present.

Parker-Rainey Vows Spoken At Briscoe

Miss Charlene Parker, daughter of Mr. and Mrs. George Parker of Allison, and Zeland L. Rainey of Dumas were united in marriage at the Methodist parsonage in Briscoe, Saturday, July 5. Rev. A. N. Motes, pastor, performed the single ring ceremony.

Mertise Hall of Allison was the bride's only attendant and Mr. Wilmer of Dumas served the groom as best man.

The young couple are making their home in Dumas.

DEVELOP... PROFITABLE PULLETS

—with—

FORTIFIED PULLET DEVELOPER

Your pullets between eight and twenty-four weeks of age are going through a vitally important stage in their lives insofar as future egg-laying ability is concerned. It is during this important period that rugged, vigorous and strong egg-making organs must be developed... If the pullet is to hold up under the strain of heavy egg production later on.

Develop Egg Organs... Quickly, Safely

Fortified PULLET DEVELOPER is designed to quickly and safely develop egg-making organs, and at the same time, to furnish the elements scientific feeding tests show are necessary for all-round strength and ruggedness.

FARM FOR SALE—1280 acres located north of Roy and just over in Colfax Co., N. M. About 300 acres in cultivation. Balance in grass, 2 good wells. Partly fenced. Three room farm house. Some sheds. Priced at \$12.50 per acre. Owner sick and must sell. J. E. Procter, Realtor, Roy, N. M.

PUPPY ISN'T TAKING A CAT NAP

HERE'S ONE OCCASION where experimenting with white mice proves merely that a cute photograph may result. Waiting to enter her mice in a McKeesport, Pa., pet show, Glenda Drye turned them loose on the back of a sleepy puppy. Obviously, he wasn't taking a cat nap. (International)

Baby son of Mr. and Mrs. T. A. Treadwell, Briscoe, entered for treatment July 22.

Marilyn Sue Whitener, Wheeler, underwent a tonsilectomy July 17.

Strawberry plants can be carried through the summer by irrigating every five to seven days, and providing shade, which can be made with old sacks tacked onto a frame.

The cotton insect has started getting the one bale out of every seven that he usually gets in Texas. Insect control is necessary if Texas farmers get that extra bale to the gin.

Mobeetie Happenings

By Edith St. John

Mrs. Jim Barton and Janie visited in Pampa Thursday.
Kenneth Grimes is visiting Mr. and Mrs. Doyle Grimes and children of Mobeetie.

W. C. Hogan attended to business in Pampa Thursday.
Mr. and Mrs. Tince Williams and Peggy visited in Paducah Saturday and Sunday.

Mrs. Mayne Patterson and Mrs. Margie Lester visited in Pampa Wednesday.
Mrs. Tracy Willis visited in Pampa Thursday.

Mr. and Mrs. Glen D. Hodges of Pampa and formerly of Mobeetie are the parents of a son.
Mrs. Wes Johnson and Mrs. Vernon Hooker attended to business in Pampa Tuesday.

Rev. and Mrs. Ed Murphy and children visited in the John Walker home Sunday.
James Hogan of Groover visited his parents over the weekend.

Mrs. Bennie Barton and Miss Jerry Evans visited in Amarillo Tuesday.
Mrs. Dora Hogan and grandchildren visited in the W. C. Hogan home Sunday.

Edwina Brown, Ted Leonard, Patsy McCauley, Lee Roy Hathaway and Barbara Nichols visited Billy Allen Leonard Sunday.
LeRoy Patton visited his parents Tuesday night.

Ebb Patton, Betty Jean and George visited in Pampa Wednesday.
Vondell Wallis visited Sandra Barker Sunday.

This is the time of year when animals often get pressic acid poisoning when turned on grasses whose growth have been stopped or retarded by drought, trampling or overgrazing. Smart stockmen are feeding hay before turning cows on pasture.

RUSS VARIETY WHEELER, TEXAS

Veterans' News

QUESTIONS AND ANSWERS

Q—I am a World War II veteran taking a school course that requires three hours per week. Am I entitled to receive subsistence allowance under the G. I. Bill?

A—If you are taking an undergraduate course at a college or university, you are eligible for one-quarter of the full subsistence allowance, but if it is a higher school or vocational school course of less than 6 hours per week, you are not eligible for any subsistence allowance.

Q—I am a veteran-amputee. Am I entitled to a service card and what is the limit repair service costs allowed?

A—Yes, if you are a veteran wearing an artificial limb, you are entitled to repairs at government expense and may obtain a Prosthetic Service Card. This card enables the veteran to get immediate repair service up to \$35 without prior approval from the Veterans Administration.

Q—I am a disabled veteran and have completed my on-the-job training course, but have not been able to get a job. Am I

entitled to receive unemployment compensation under the G. I. Bill?

A—Yes. The Servicemen's Readjustment Act (G. I. Bill) provides that you can draw adjusted unemployment compensation up to a maximum of 52 weeks, provided that you are able and available for work at the time. The number of weeks of readjustment allowance payable to you is determined by the length of your service. The service must have been 90 days or more between September 16, 1940 and the end of World War II.

Q—As a World War I veteran with a non-service-connected disability, which does not permit me to work regularly, am I entitled to a pension?

A—Your only pension relief is through the law which gives you the right to a pension of \$60 per month, provided you are permanently and totally disabled and unable to follow a substantially gainful occupation. This pension is not payable if your income exceeds \$1,000 if single, or 2,500 if married or with minor children.

The Veterans Administration is seeking pharmacists for employment in Texas, Louisiana and Mississippi. VA announced this week.

Salaries for the positions range from \$2,644 to \$4,149 per year. Application forms and further information may be obtained from the Board of U. S. Civil Service Examiners, Veterans Administration, Branch Office No. 10, 1114 Commerce Street, Dallas 2, Texas.

The Veterans Administration has negotiated contracts with about 130 correspondence schools in the United States to furnish veterans instruction under the G. I. Bill.

Veterans are eligible for these "mail order" courses if they meet the qualifications for GI Bill education or training.

A veteran may get up to a total of 500 dollars worth of correspondence courses. No subsistence allowance is paid for correspondence courses.

Only schools which have a contract with VA and which are approved by the state in which they operate may be paid for veterans' courses under the GI Bill.

About 35 per cent of the veterans who have entered education or training have terminated their courses, VA reports.

The great majority of these veterans are eligible for additional GI study if they want to take it some time in the future.

There are many reasons for terminations, VA found. These include ill-health, lack of housing, financial problems, scholastic difficulties, employment opportunities and personal problems.

NOW 2 Great NEW Postwar DE LAVAL MILKERS

De Laval Engineering Brings You Still Better De Laval Milking For the Smallest to the Largest Herds!

The New DE LAVAL MAGNETIC SPEEDWAY MILKER

It's here... the great new postwar De Laval Magnetic Speedway Milker offering you still better De Laval Milking and many other important advantages. Dairy farmers always look to De Laval for the best in milking... and get it!

Still Better Milking
Improved Sanitation
Longer Service-Life
Still Greater Dependability
Rugged Strength
Easier Cleaning
Simplified Design and Construction
More Compact Installation
Lower Operating Costs

The New DE LAVAL Sterling MILKER

De Laval engineering has again added to the superiority of the De Laval Sterling Milker with many important new features similar to those incorporated in the great New De Laval Magnetic Speedway Milker. Among these are the new stainless steel "Sani-Cover" operating top, easy to clean as a saucer; new "Sani-Claw" for straight-through brushing and visible sanitation and new Sterling vacuum pump with metered lubrication.

NEW POISONS FOR COTTON BEING TRIED

COLLEGE STATION—They're still in the experimental stage, not on the market in commercial lots, and much research remains to be done—but USDA scientists believe they may have something in two new insecticides for the control of cotton insects.

They are benzene hexachloride and chlorinated camphene.

Results to date indicate that these organic chemicals may be much more effective than any of the standard dusts now in use.

A mixture of benzene hexachloride which contains 5 per cent of what is known as "gamma isomer" has proved deadly to the boll weevil and cotton aphid, but not the bollworm. This is just the opposite of DDT, which takes care of the bollworm but not the aphid or weevil.

The camphene compound apparently controls all of the common cotton insects.

The USDA Bureau of Entomology and Plant Quarantine, the Texas A. and M. College Agricultural Experiment Station and other state experiment stations have been testing the products under field conditions.

One mixture which made a good showing in tests last year near Waco and College Station consisted of 5 per cent DDT, 3 per cent of the gamma isomer of benzene hexachloride and a neutral deluent. The dust was applied at the rate of 10 pounds per acre repeated every 4 to 5 days as long as the insect infestation lasted. When bollworms were present the dusting was done at the rate of 15 pounds per acre.

At Waco, where lots of insects were present, cotton treated with this mixture yielded 59 per cent more than comparable plots dusted with calcium arsenate alone. The infestation was lighter at College Station but similar results were obtained.

USDA treatments near Waco, with 2 per cent chlorinated camphene produced average yields of 4 per cent above that of cotton dusted with calcium arsenate.

As things shape up now, it looks like either the benzene hexachloride-DDT combination or the chlorinated camphene will be the ticket when several kinds of insects, including the bollworm, are present. If the bollworm is not causing damage the benzene compound alone seems to get the job done.

The probable price of the new insecticides and the comparative costs of these and calcium arsenate, DDT and other dusts now in use are not known at present and

may be several years before they are on the market in commercial lots.

NATIONAL PRESS BUILDING
WASHINGTON, D. C.

By Anne Goode

Frozen fish fillets will be available to consumers soon. Packaged in one-pound boxes like candy, they can be sliced into any size portion and cooked in a skillet or oven without defrosting.

A packing tip: Don't risk spilling your precious perfume and ruining your clothes. Instead, light a candle and let the hot wax drip around the neck to seal it tightly.

There's a new iron on the market that's light in weight—around three pounds—and designed specially to do a professional job on ruffles and pleats without burning in the rear while you're doing the job.

Here's a frosting recipe I know you'll like as much as I do. As you will see it makes a large amount but it will keep in the refrigerator for two or three weeks. Cream a half pound of vitaminized margarine with 1 1/2 pounds powdered sugar. Add an unbeaten egg and continue to cream. Gradually add a cup of orange juice and cream until light and fluffy. Lastly, mix in a little orange rind.

An egg shortage is predicted for next winter with prices running high. Buyer interest is waning and chick production is 1% to 10% lower than last season.

They say a new jellied salad will be on the market soon. All you do is chill the can in the refrigerator, then it's ready to slice and serve with real mayonnaise, for no salad would be complete without real mayonnaise to add the final note of fine flavor.

will not be until they are manufactured in volume.

Meanwhile, says Texas Extension Service entomologists, cotton farmers will do well to go ahead with the dusting materials now recommended. The new products need further testing and, even if they continue to show up well and have no harmful effects, it

BOLL WEEVILS WILL STEAL 25,000 new automobiles—or their cotton cash equivalent—from Cotton Belt farmers this season unless the farmer uses every possible control measure to combat the pest. Recommending that farmers in this area consult their county agent, vocational agriculture instructor, or state entomologist for controls most effective locally, the National Cotton Council says that failure to fight the weevil properly will reduce the value of the cotton crop more than \$100,000,000.

And, they add, you're wasting your time if you try to remember "chlorinated camphene" and "benzene hexachloride." If and when these insecticides are offered on the market they'll have more simple trade names.

Department of Agriculture agronomists are saying that the record wheat crop in Texas and the U. S. this year is due in part to new varieties of wheat which were planted. In the past ten years, 30 improved varieties of wheat have been distributed to American farmers.

THE WHEELER TIMES classifieds offer more for less money, to both buyer and seller, than any other business device we know about.

From where I sit... by Joe Marsh

"Not Responsible For Wife's Debts"

A young man came rushing into the Clarion office the other day and wanted me to print an ad—"right quick"—saying he won't be responsible for his wife's debts from now on, as he's leaving her for good immediately.

I allowed as how the forms were all closed up, and it was too late to take his ad. He says: "All right, Monday then"—and we agreed on Monday.

Of course, the forms weren't closed. But I had kind of an inkling of what might happen. Then Sunday he phones me, and says, kind of sheepishly: "You can forget that ad. Me and the missus have everything all patched up. And we're having a friendly glass of beer, right now."

From where I sit, if you give folks time enough to think things over, those hasty quarrels that come so often from misunderstanding will give way to tolerance and common sense.

Joe Marsh

MORE money from lower bacteria count because of these McCormick-Deering features Yet LESS time for care and cleaning!

(Above) No oil is needed for this smooth-working pulvator—so, there is no danger of oil contaminating the milk.

(Above) Stainless steel head has 3/4-inch curved radius to permit speed and ease in brushing and cleaning.

(Above) Tear cup assembly and infusions are designed for rapid rinsing and washing, are fastened to pail heads.

(Left) Stainless steel pail has large 9-inch opening that makes a quick job of cleaning and inspection.

(Right) Inside surface of the drawn stainless steel pail is as smooth as glass—no welded, overlapping seams. Pail bottom has 3/4-inch radius, too.

• Notice how often stainless steel construction is mentioned as part of the McCormick-Deering Milk? The only metal the milk touches is this smooth, polished steel. Bacteria don't lodge on its surface. There is no rusting or corrosion to give bacteria a home. Rubber is the only other material through which milk passes.

If you're interested in improving the standards of cleanliness in your dairy—in cutting down bacteria count to build up the size of your milk check—then stop in at our place now for full details on how a McCormick-Deering Milk can save you both time and money. We can make immediate delivery.

MCCORMICK-DEERING MILKERS

Are You Making \$18.35 Profit On A 200-lb. Hog?

It can be done! With today's high prices on pork . . . many farmers on the Purina Plan are able to make \$18.35 in profit over feed costs on every 200 pounds of pork they take to market. And here are the figures to show that it can be done!

If hogs sell at \$23.75 . . . grain at \$3.25 per 100-lbs. . . and Pig and Hog Chow, \$6.40 a bag —

100 Lbs. Pig and Hog Chow at	\$6.40
700 Lbs. grain at \$3.25 100 Lbs.	\$22.75
Total feed cost	\$29.15
Money received for 200 lbs. pork	\$47.50
Cost of feed to produce 200 lbs. pork	\$29.15
Profit over feed cost	\$18.35

The above figures for dry lot feeding, pasture feeding 20% less cost on feed.

With opportunities like this, you're wise to choose the ration that builds fast growth. Purina Pig and Hog Chow helps produce the results you want . . . helps you make the early high market. So, come in and buy for profitable feeding this year . . . get the famous Chow in the Checkerboard bag for lots of pork—Purina Hog Chow.

Texas Farm Women Thanked For Can Goods

COLLEGE STATION — Texas farm women have received word of thanks from Luzon for canned goods which they donated through the U. S. Philippine War Relief.

Gratitude for 12 cases of assorted canned foods was expressed in a letter from Leandro V. Uyguanco, medical officer in charge of Central Luzon Leprosarium, where the food was received and used by the leper patients in that institution.

Maurine Hearn, vice director for women and state home demonstration agent of the Texas A. and M. College Extension Service, who received the letter, said that much food has been contributed by Texas rural women through War Relief.

"In the name of the lepers of this institution, I wish to express our most sincere gratitude and thanks," Uyguanco stated in the letter.

That gratitude and thanks, said Miss Hearn, goes directly to the farm women who contributed war relief food.

LIL
BABY

Nothing brings more real pleasure into a home than the laughing face of a healthy, happy baby. It brightens the household and revitalizes the domestic relations of the family.

In the face of this happy child the whole purpose of marriage and of the home is fulfilled. For man's highest duty, next to that of living a just and useful life and honoring God, is to carry on the human race and transmit its priceless heritage to a new generation.

The greatest thrill on earth is that of the parent who looks into the wide, wondering eyes and smiling face of his own flesh and blood.

But parenthood carries great responsibilities which no father or mother can afford to ignore. It is the responsibility to bring the child up in an environment conducive to faith, honesty and right living. In this great task the Church can render invaluable assistance.

The churches of this community offer religious instruction and spiritual inspiration to young and old alike. Go to church on Sunday. Let the service lift you into the realms of the Infinite.

THE CHURCH FOR ALL ... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend and support the church of his choice. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church on Sunday and read your Bible daily.

News In World of Religion

By W. W. Reid

Harlem, one of the oldest and largest sections of New York City has a population of 85,000, mostly Puerto Ricans, Negroes, and Italians, and group there are only 8,500 Catholics, according to a recent study made from house to house by Kenneth D. Miller and Dr. J. Barry, of the New York Mission Society. These figures point out that while the majority are nominally Catholics they have little connection with any church, and their children are without any religious influence in their lives. They recommend a united approach to Protestantism to the needs of Harlem through the organization of a local council of churches and the establishment of a number of churches, service organizations, educational and recreational facilities.

Culture, with more workers than other industry, had a 10% increase in production last year of 54 per cent, compared to the national rate of only 31%.

This Series of Church Ads Is Being Published Each Week in the Support of a Nationwide "GO TO CHURCH" Movement, and Is Being Sponsored by the Business Firms and Individuals Listed Hereon.

Civilian Work

(Continued from Page One)
 Farm fires destroy \$90,000,000 worth of property each year. Think of it—ninety millionaires could barely buy the farm property burned up each year—could you replace yours if it burned? This is not a sales talk for insurance, just a suggestion that you take a look at your place and see if you can't find several things to do that would make your place safer—clean up trash, put water barrels (full of water, and covered) around, inspect electric wiring, etc.

And speaking of wiring, O. B. Crouch of the Greenbelt R. E. A. says people can burn up their houses if they want to by using small wire, poor wiring jobs, etc. but he warns that Grade A Dairy Barns are going to have to be wired right, or the dairymen will not be cut in on the R. E. A. line. As for home wiring, amateur wiring and overloading of electrical equipment is a big cause of disastrous fires on Texas farms.

NOTICE!
 WE SCALD HOGS ON TUESDAY & THURSDAY OF EACH WEEK.
Wheeler Lockers

Never use less than No. 14 wire in your house unless you would like to be in the headlines as one whose house burned. And for another thing, all connections should be soldered—not just twisted together and taped.

Here's hoping we of Wheeler County take to heart the precautions advocated by President Truman in his Proclamation designating the week of July 20 as Farm Safety Week, and follow the leading of the National Safety Council in trying to cut down on the huge number of farm accidents and the life and money loss they cause.

Miss Martin Honored At Pre-Nuptial Shower

Miss Ida Mae Martin, bride-elect of W. A. Goad, Jr. was honored with a tea and miscellaneous shower recently at the home of Mrs. Lee Guthrie.

Miss June Johnson registered the guests, while the honoree was assisted by Mrs. P. A. Martin and Mrs. W. A. Goad, Sr. in receiving the gifts. Miss Donnie Goad, Mrs. Joe Weatherly and Mrs. Louis Martin assisted in the gift display room.

Mrs. Shelby Pettit and Mrs. Harvey Close presided at the tea table which was laid with a lace cloth, centered with a flower arrangement of white gladiolus, yellow dahlias and daisies, flanked with white tapers in crystal candelabra.

Those calling during the evening were: Messlames B. M. Litton, George Topper, Jack Guynes, C. C. Robison, Harold Nash, Amos May, D. A. Hunt, Luther Parks, R. G. Russ, Frank Wofford, Harry Wofford, Milton Finsterwald, R. Wm. Brown, W. O. Carriek, Holt Green, Wylie Pettit, Cliff Bradstreet, Charles Hubbard, Annie Savage, Dick Beauchamp, J. D. Beatty, Dick Guynes, Herbert Savage of Dimmit, Homer Pitcock, Roy Bailey, J. C. Moore, Jr. and Mrs. A. E. Hunt of Portales, N. M. Misses Melba May, Jo Noah, Mary Alice Close, Billie V. Brown, Edna Farmer, Yvonne Clark, Betty Brewster, and Peggy Weatherly.

Those sending gifts were: Messlames C. L. Wilkes, B. Greenhouse, S. D. Conwell, Cecil Martin, Linda Clay, Cliff Weatherly, S. M. E. E. Henderson Will Attend CVPA Meeting

E. E. Henderson of Wheeler County, director of the Canadian Valley Production Credit Association, Canadian, will attend the annual group directors' conference for five production credit associations July 28 and 29 in Amarillo.

Others in attendance from the Canadian Valley Production Credit Association will be C. W. Allen, secretary-treasurer, Erbin Crowell, assistant secretary-treasurer, both of Canadian; President H. H. Keahey of Gray County, vice-president, Lloyd Bussard of Lipscomb County, Director Marion Smith of Hemphill County, and director Frank McMordie of Roberts County.

LOCAL NEWS ITEMS

Mr. and Mrs. H. E. Davis of Bridgeport and Mr. and Mrs. Chas. Vermillion and daughter visited Friday night in the home of Mr. and Mrs. C. C. Hallman.

Mr. and Mrs. Lee Barry of Briscoe are attending the Rural Letter Carriers State Convention at Mineral Wells, July 21, 22, and 23. They will visit relatives at Jayton before returning home.

Mrs. David Hollis of Glendale, Calif. came by plane Saturday for a two weeks visit with her parents, Mr. and Mrs. Perry Riley. Other weekend guests in the Riley home was another daughter, Mrs. M. C. Crabb and her husband, and Miss Jennie Riley of Amarillo.

Mr. and Mrs. C. C. Robison attended the funeral of J. E. Bowman in Carey Friday afternoon.

Mr. and Mrs. Tom Wilson, Mr. and Mrs. Weldon Weatherly and Mrs. J. E. Willard attended the funeral of Walter Anglin Tuesday of last week, in Amarillo.

Q. What can be done to prevent sores from mashing their pigs?
 A. All farrowing houses of every type should have a guard rail around the sides and back of the individual pens used by each sow and her litter. This rail should be 8 to 10 inches from the floor and 8 to 10 inches from the wall. Guard rails are of great value in keeping sores from rolling on their pigs.

Q. Is it possible to control the color of egg yolks?
 A. Yes, research work conducted at the Research Farm of the Halston Purina Company has shown the effect of the feed on the color of the yolks of the eggs produced by the laying flock. The results of this research work have provided information on the relationship between alfalfa meal and yellow corn in respect to variability in yolk color. With this information, the amount of alfalfa meal and of yellow corn can be controlled to provide the color of yolk desired. By the use of special ingredients, Purina research workers have been able to produce eggs with bright green and bright red yolks, showing that what the hen eats influences the color of the egg yolks.

Q. Approximately how many broilers can be raised in a pen that is 16x20 feet?
 A. Broilers should have one square foot of floor space per bird for the best results. This means that 320 chicks may be started in a pen that measures 16x20 feet. Broiler raisers have found that it pays to give the birds plenty of room. Where the chicks are crowded, mortality and vices increase, and growth decreases.

Q. I have a young Jersey cow that sucks herself. Is there any preventive?
 A. The question of cows sucking themselves is a serious problem but so unusual that not many animals are affected. The best plan would be to keep the animal tied or send her to the butcher. If the cow is valuable, you might try a harness, made somewhat as follows. Fasten a rope or strap back of the front legs, around the body, and the quite tight. Then put a halter on the cow, and from each side of the halter fasten a light rope or strap back to the strap on her body. The ropes should be adjusted so that she can move her head sideways but not clear around to her body.

Send your questions about livestock or poultry problems to FARM FACTS, 815 South Eighth Street, St. Louis 2, Missouri. Questions will be answered without charge, either by mail or in this column, as a service of this newspaper.
