TEXAS POLITICS

By Rep. Malouf Abraham

One of the real tough subjects facing us is the liquor situation. This is a most difficult problem to try to solve. Too many people have their minds made up and don't want to be confused by the facts.

Our problem down here is that we have to hear both sides of these questions and try to find a solution that seems satisfactory to everyone. We must realize that most of the people in Texas are living in the larger cities and favor some sort of liquor-by-the-drink bill. Our present liquor laws are very unsatisfactory to both the "wets" and the "drys".

We already have nearly 1400 licensed clubs of various types plus thousands of "brown bag" places. The present laws are very confusing and so poor that they vary according to the interpretation of the LCB people in the different areas. This confusion helped cause the scandals last year in the Liquor Control Board.

Last session they attempted to pass the ill-fated Mini-Bottle Bill tied to a bunch of changes in the liquor laws. The mess they came up with didn't please anybody and fortunately didn't pass. It was probably unconstitutional anyhow.

Now they have come

up with a Constitutional Amendment where in the Legislature would be authorized to present a liquor-by-the-drink bill on a Local Option basis. If this passes both houses by a 2/3 majority, the people of Texas would vote on it in November, 1970. If this passes, in 1971 the Legislature would prepare a bill setting up the regulations. It would then take the vote of the people of each county to have liquor-by-the-drink in the county. The city boys tell us that they want it, and that if we don't want it we don't have to have it in our county. They tell us that we shouldn't keep them from having it.

So, this is the fix I find myself in. Do I have the right to tell the Dallas people what they can or can't do? Certainly my first responsibility is to the people of my District but I am also responsible to all the people of Texas. Problems are not solved by pretending they don't exist. Now, go back and read this over again and do a little studying about it yourself. Put yourself in my place, and if you have some suggestions, I will welcome them. Don't snow me with a bunch of statistics, etc. Also, please don't put words in my mouth - I'm just trying to let you see the whole picture.

Favorite Food Show March 1

Wheeler County 4-H Favorite Foods Show will be held on Saturday, March 1 at 10:00 a.m. in the county courthouse. The food show is designed to help 4-H members develop skill in preparation of food and in planning and serving of nutritious meals and in the selection and use of table appointments.

Each contestant must have the food project record in the Extension office by 9:00 a.m. and exhibits should be set up by 10 a.m. for judging. A public showing of exhibits will be at 11 a.m.

Darrell Royal, winning football coach in the history of the University of Texas, faces a new challenge this year. We encourage ranchers to make provisions for a little extra feed on those days when weather is bad. Keeping an old smooth mouthed cow alive the next few months may mean the difference between a calf crop or nothing. With the increasing popularity of liquid protein supplement for wintering brood

Miss Petite Pattern Size

By Brenda Hofmann, CHDA

Alas, Finally the short, petite women over 25 years of age will not have the problem of finding a pattern to fit her in size and style. A new pattern size Miss Petite has just been developed by a leading pattern company. It was introduced in the February pattern book. It is for the sophisticated women over 25 years that measures 5'2" to 5'3". The measurements of Miss Petite are the same as Misses except for waist and back length. The waist is 1/2" larger and the back length is 1" shorter than the Misses. The sizes range from 6mp to 16mp. This will be a blessing for the petite women, who in the past, have had to fight the "teenage" look in their pattern size.

Consumers have much to look forward to in purchasing meats in the future. Much research is being done in this field. Some day you will buy meat that has been irradiated - you will keep it for months and even years in your "cabinet! No refrigeration will be needed. Or you might buy a freeze dried meat that requires no refrigeration and is restored to its original form by adding water. We have much to look forward to in easy convenient meats to keep, prepare and serve.
