## Wheeler Schools

From Arling Cordell, Superintendent of Schools

We are having some fine basketball at our Junior High Tournament this week. Come out and enjoy our new gym and these games.

Final completion of the gym and of the new building is, we are promised, about February 1st, at which time we will begin to move in. We expect to take about a month to settle in, and perhaps to have a dedication ceremony together with an Open-House during Texas Public Schools

pository for Trust Funds in possession of the County and District Clerks. Bids to act as depository for such trust funds must be filed with the County Clerk on or before 10:00 a.m., February 13, 1967.

 Wheeler County, Texas. 5tc

Week. Do you have pieces of art or sculpture which you would like to contribute to help us in decorating our new building? If so, please let us know. We will provide suitable framing where needed and we hope that our local artists will contribute also.

We are beginning the second semester this week. By this time you have had your children's grades brought home. Study these carefully, confer with the teachers and principals where poor grades are involved, give your child some definite plans for home study, encourage them by complimenting them on good work, do not glass over poor work. Remember, the objectives of the public schools of America are (1) Teach them so that they will learn to read, to write, to speak, to listen to the best of their ability; (2) to be a good citizen to develop moral and spiritual values which will sustain them during their future trials of life.

Your Board of Education and I, with our Principals have just completed a thorough study of our total school program. We have written school policy which covers every area: punctuality, professional training, methods of teaching, loyalty, cooperation, discipline, supervision in and out of classrooms, guidance, maintenance. We expect these detailed policies to guide us all - faculty and pupils in improving our program for the new school. We need everyone's help if we are to do this. Won't you assist us? "Together We Help A Child"

**NOTICE**  
 The school census for 1967-68 is now being prepared. If you have, or know of, a child that will be eligible to enroll in school for the first grade in September, please call the superintendent's office, 2041. We will take the name down then send out an official to fill in the census form. If the child has an older brother or sister now in school, the child will or may be listed on the form sent home from school.

Visiting Mr. and Mrs. Rufus Watts Monday night and playing 88 were Mr. and Mrs. Will Burke and Mr. and Mrs. Red Ivey.  
 Mr. and Mrs. J.F. Cook, Jr of Silver City, New Mexico spent the weekend with his mother, Mrs. J.F. Cook, Sr. Mr. and Mrs. Elmer Byars of Pampa visited on Sunday afternoon.

**Supplemental Feeding Needed**

By Charles David Jackson  
County Agri. Agent.

With the moisture shortage this fall and winter, supplemental feeding will be mighty important during the next few months.

Cattlemen may be able to save some time and money by protein feeding supplemental twice a week rather than daily feeding.

In a Texas A & M University test, cattle fed a protein supplement twice a week performed just as well as those fed daily. The result from twice weekly feeding was about a 60 percent saving of labor and travel as compared to daily feeding.

Feeding twice a week doesn't necessarily mean feeding less supplement, just feeding larger amounts less frequently.

Also, during cold winter weather, cattle need plenty of forage to produce body heat. A low quality roughage that is high in fiber is a good feed during a storm, because of the high body heat production resulting from digesting the fiber in the roughage.

A well-fed cow can stand extremely low temperatures. Researchers say the critical temperature is just above the temperatures at which cattle begin to shiver. A cow on a fasting diet, or without any feed, reaches a critical temperature at about 55 degrees F. A maintenance ration lowers the critical temperature to about 23 degrees F. With an increase in feed consumption, the critical temperature will drop to well below zero.

Wet hair coats and an increase in wind velocity raise the critical temperature and at the same time increases feed requirements necessary for body heat production.

It'll pay good dividends to keep cattle well-fed during the winter stress months.

"Sure scared hell out of that train engineer."
