Tid Bits

By HVO

JUST DAYS before Christmas, and all through the town, people like me still wondering: "What happened to July 4th this year?"...Christmas music all around town, you'll notice and appreciate, courtesy of Kendrick Music Center, and played over speakers around the square.

YOU OWE it to yourself to try Fred Brown's smoked turkey if you haven't already. It's better than Finger - Lickin' Good. Bet he'll need your Christmas order right away, 'cause there'll be a batch of requests for this succulent treat. On T - Day, ours went extra good with cornbread dressing made with wild rice, courtesy of ever - thoughtful Munsingwear in their annual treat - pack from Minnesota. A decided delicacy, one cup raw wild rice yields four cups of cooked rice. Mah - No - Min, as the Indians call it is typically American and is actually not rice at all but is an annual grass which grows from seed the same as barley, wheat, and rye. Presumably it is called rice because it grows in the water - clear water that is ideally less than three feet deep. About seventy - five percent of all the wild rice grown comes from northern Minnesota with small quantities produced in the neighboring areas of Wisconsin and Canada.

FISH FRY SET

The Men's Fellowship Bible Class has set its annual Fish Fry for Friday, Dec. 1, at the Christian Church Annex. The Choir of the First Baptist Church, N. Seaman St., will perform, and visitors and prospective members for the class are invited.

CAN WE print from color photos, with our new offset process? We're often asked. Yes, but we're never able to predict the finished printing quality, so we do still prefer black and whites. Color shots with a lot of blue seems to give our offset camera the jitters and the results leave a lot to be desired. Even so, our average with color and - or black and white is ever so much better than in the hot metal days.

IT'S A SMALL world, after all: Clipped from Kernel Gene Baker's Peanut Hulls column in the Gorman Progress:

It is good to travel and visit but it is also a grand feeling to return home. Thereasa and I flew to California last week to visit a son, Mr. and Mrs. Tom Reese and family. Naturally, we carried bags of Nutri - rich Peanuts which we passed out on the plane and to folks in California. A couple sitting behind us accepted the peanuts and when the lady read the name of the town on the bag exclaimed, "I was born at the Blackwell Hospital in Gorman." She was Catherine Janie Harris, daughter of Mr. and Mrs. Tom Harris of Eastland. Catherine and her husband, Dr. Robert L. Johnson of Lewisville, Texas, were flying to Los Angeles to attend a medical convention. The Harris family lived in Gorman back in the forties and Mr. Harris worked for SW - PGA. Catherine's brother, John Tom, is ranching in Montana, and another brother, Jack, is living in Eastland.

Goodfellows Roll Up Their Sleeves For Another Year

As sure as Christmas comes, you can be sure Goodfellows will be busy in Eastland. Initial letters are already going out, and preparations are already underway to make it

another GOODFELLOW YEAR. President Ed Sargent has announced that the first work - plan session will be held Tuesday evening beginning at

6:30 p.m. at the Eastland National Bank Conference Room. Every worker and every person interested in joining the Goodfellow project, is invited

and urged to attend the meeting, Mr. Sargent said. "There are so many new people in our town and we know they'll enjoy the thrill of working for Goodfellows too, so we want to

invite them to the meeting so that they can put on the Goodfellow harness too." Eastland's Goodfellows began many years ago as a project of the Men's Fellowship

Bible Class which meets at the First Christian Church. Like Topsy, it grew and under the long and successful leadership of the late Morris Keasler, it became a project of pride for

all Eastland and Eastlanders. Mr. Sargent has been an active part of the program since its inception. Under Mr. Keasler's direction and the Class efforts, it was turned into a perpetuating effort, and renamed Goodfellows.

Mr. H.T. Wilson, president Eastland National Bank, served as president a couple of years, and further bolstered its cause and scope.

Eastland's No. One Treasurer James Reid has been and is a guiding light in the Goodfellows organization.

Mr. Sargent sees Goodfellows as the perfect vehicle for bringing cheer not only to those who actually NEED the extra Christmas boost, but also for those lonely ones who would appreciate being remembered at the Christmas season. "There's a great number", he says, "who live here and who no longer have friends or family near, and for these too, we'd like to make the Goodfellow Idea glow."

One of many segments of Eastland's society active in the Goodfellow work is the Eastland Jaycees under President Larry Rollins direction. They are already receiving used but repairable toys (dolls, wheels, etc.) which they make new again to be distributed through the Goodfellows. Jaycee Chairman Greg Sedillio urges one and all to go through the closets, the garages and the back rooms, to turn up toys that are no longer cherished by your own, and bring them to the City Fire Hall, where the Jaycees will give them new life so that they may become cherished possessions for other children.

Eastland Goodfellows extend to Carbon, Olden and the surrounding good neighbors proving that the purpose of the drive is to spread as much sunshine in this area as possible.

Last year, 85 families were given generous baskets, many with toys and clothes. That's the GOODFELLOW way in Eastland.

GOODFELLOWS

P. O. Box 331
Eastland, Texas
A Non-Profit Organization
November 20, 1972

We are all fortunate to live in Eastland. Eastland people always come through and do the job when it is necessary. The United Fund has just completed and went over the top 100%. Eastland people believe in sharing.

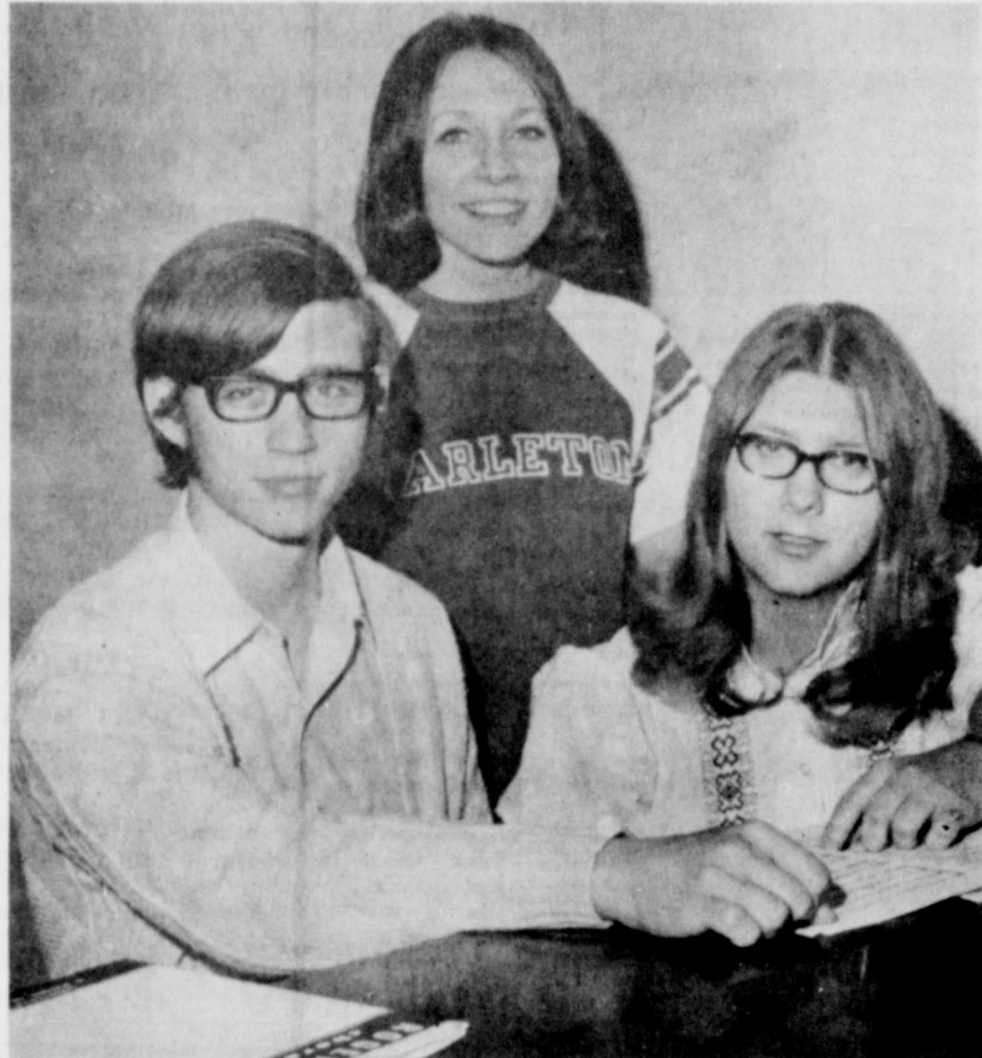

It is coming Goodfellow time again. We want to make sure that there is no family in Eastland that is neglected at Christmas. Eighty five families were given generous baskets last year including toys and clothes.

We ask you to help us again this year with a contribution to GOODFELLOWS. Thank you again for your help in the past.

Ed Sargent
Ed Sargent
President
Goodfellows

P. S. If you have a name of a needy family, get it to me or to James Reid at Eastland National Bank and we will see that they are taken-care-of.

TO SING IN EASTLAND - - This trio will be a part of the Tarleton State College A Cappella Choir which will give a concert in Eastland Monday, Nov. 27, beginning at 8 p.m. at the First Methodist Church. Seated are Duncan Dudley and Cindy Brown. Looking on is Janie Miller, daughter of Mr. and Mrs. Pat Miller of Eastland.

A Cappella Choir In Concert Monday

Versatility is the outstanding feature of the A Cappella Choir from Tarleton State College.

The choir will present a concert in Eastland on Monday evening, November 27, 1972, at 8 p.m. in the First Methodist Church.

The 32 voice singing group develops its tonal skills through unaccompanied choral works, but might add a flute and a tambourine to color up a Christmas Carol, or swing on the piano to liven up an old hymn.

Many of its members, music and non - music majors at the college in Stephenville, will hurry away from a Concert Band rehearsal to travel to Eastland to join in the singing. Each member has been selected by audition to participate in this specialized group. Janie Miller, daughter of Mr. and Mrs. Pat Miller of Eastland is a member of the choir.

The concert fare will be designed to appeal to the seasonal as well as the general mood of the audience. Included will be two songs of an "optimistic" tone and the non - classifiable "Waltz for Two Left Feet".

John Crocker To Be Engineer Munsingwear

Vassarette of Munsingwear, Inc. is announcing the appointment of John W. Crocker as Jr. Industrial Engineer for Eastland. Crocker replaces Bob McCoy who resigned in October.

Crocker, who has been in training in the Paris, Athens, and Arkadelphia plants of Vassarette will begin at Eastland, December 18.

Crocker is a native of Big Spring, Texas, graduating from High School there. He is a recent graduate of North Texas State University and holds his degree in Management and Industrial Arts.

While attending school, he was employed with Brown & Sharpe Tool Company in Denton, where he was a leadman on the night shift. His employment there was for a period of four years. Prior to that, he was employed by Sid Richardson Carbon of Big Spring.

Mr. Crocker is engaged and the couple is making plans for an early Spring wedding.

'Season's Sampling'

The public is invited to attend a "Season's Sampling". This program, to be presented by Texas Electric Service Company's Home Economist, Mrs. Beverly Nicholson, will include recipes and lighted decorating ideas from TESCO's holiday recipe book.

The recipes will be prepared in a microwave oven and in small electric appliances. Gift ideas will also be included in the program.

The program will be held in the Reddy Room of Texas Electric Service Company in Eastland on December 5th from 1:30 to 3:30 p.m.

There is no charge or pre - registration to attend.

Notes 90th

Joseph Carroll Allison of 1108 W. Commerce in Eastland celebrated his 90th birthday Friday, Nov. 24th, at the home of his daughter Mrs. Elmer Foster of Lake Leon.

Forty - five members of his family were on hand for the celebration, which included a birthday dinner with all the trimmings, including a huge birthday cake.

All of Mr. Allison's children were present to help celebrate the occasion.

Those seated at the head table with Mr. and Mrs. Allison were their children: John Allison of Farmington, New Mexico; Mrs. Weems Dykes, San Angelp; Mrs. Bill Beaty, Robert Lee; Grady Allison, Houston; Nelson Allison, Odessa; James Allison, Lubbock and Mrs. Foster.

Mr. Allison served a number of years as Eastland County Tax Assessor and Collector prior to his retirement in December 1964.

Sage advice: If you see a gunfight, get into it so you won't be shot as a bystander.

Chamber Moves To New Location

Same friendly service - - but at new, more convenient quarters.

That's the hallmark for the Eastland Chamber of Commerce, just relocated at 214 S. Seaman St., with additional parking facilities and other services for members and visitors.

President Marcus O'Dell announced the relocation and invited members and visitors to visit the new C of C headquarters, and also encouraged potential members to consider joining forces with the chamber in its continuing efforts to make and keep

Eastland a good place to live.

Mr. O'Dell particularly thanked J.T. Carter for his assistance in the moving of the office furniture and equipment last Friday. The office officially opened on S. Seaman Tuesday after the telephone company got the new line in. The chamber was formerly housed in the office east of Eastland National Bank. The bank will use that space in its long - range building and development plans.

Mrs. Emma Lou Benton is chamber secretary and the chamber telephone will continue to be 629 - 2332.

JR. HIGH CHEERLEADERS - - Bottom Row left to right: Hjordist Dunn and Melody Bond both 7th graders; Second row left to right Gail Swift, 8th grade and Mary Jane Harbin, 8th; Top row: Yvonne Wilson, 8th head cheerleader. (Photo by Lloyd Armstrong)

ANNOUNCING!

BRANDIE JILL WARREN
Mr. and Mrs. Larry Warren of Irving announce the birth of a daughter, Brandie Jill, born Sunday, Nov. 12, in the Irving Hospital in Irving. Brandie Jill weighed seven pounds and ten ounces. Maternal grandparents are Mr. and Mrs. Arless Pierce of Cisco. Paternal grandparents are Mrs. Jerry Warren of Cisco and Carl Warren of Dallas. Maternal great-grandparents are Mrs. Jennie Pierce of Eastland and Clyde Campbell of Carbon. Paternal great-grandparents are Mr. and Mrs. Drew Warren of Hollis, Oklahoma.

J.E. "Hap" Jackson, Carbon farmer, was presented a certificate of appreciation by the Eastland County Rural Development committee last week. A certificate is presented each year by the committee to a man who has made outstanding contributions to the development of agriculture in the county.

Past recipients of the award are E.E. Blackwell of Ranger, C.M. McCain of Eastland, O.B. Rone of Gorman, and Sam Kimmell of Cisco.

Jackson was cited for his leadership in the adoption of improved farming techniques and good farm management. His neighbors say he is a good example for other farmers to follow. One neighbor said "When we are getting our equipment ready to do a job, Hap is usually already finished with his work."

Jackson farms 137 acres of peanuts, 125 acres of grain sorghum and is a commercial pecan grower. He is a participant in the Rural Environmental Assistance Program and a cooperater with the Upper Leon Soil and Water Conservation District. His crop yields are usually among the highest in the county.

The Rural Development Committee is composed of County Agent DeMarquis Gordon, Chairman; David Martin, ASC Director; Lynn Gibson Soil Conservationist; and Charlie Henderson, FHA Supervisor. Martin presented the certificate to Jackson during meeting of the committee.

Mr. X Speaks To PTO On Drugs

The Eastland PTO met Tuesday, Nov. 21, in the cafeteria of the Eastland Elementary School. The program was one of great concern to everyone. The guest speaker was a narcotic agent from Midland.

Eastland has a drug problem and more people need to be aware of the problem. The best way to protect our children

is to be aware of what it can lead to and that they could spend time in jail and have a criminal record for the rest of their lives. If they are arrested and convicted of possession of marijuana they can get from two years to life in prison. There is another way - they can sign consent forms to go to a state hospital for a stay of forty

two (42) months. There are three classes of drugs: (1) narcotic drug - which possession of is a felony, (2) dangerous drugs - which is a misdemeanor and (3) control drug which is by a doctor's prescription. A very high percentage of people on drugs started on marijuana. If any drugs are found in the possession of your child you should try to find out where they got it, how they got

A weekly public service feature from
the Texas State Department of Health

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

Texas school children and some of the common childhood diseases, hopefully, will soon no longer be frequent companions. Thanks to a mandatory school immunization law being implemented by state and local health authorities, Texas school children have the best protection against disease outbreaks they have ever had in the history of the state.

After the first full year since implementation of the new state law began, state health officials report immunization levels of the school population are up considerably over previous years. And early indications this year are that those immunization levels will continue on the upswing.

As of May 1, 1972, the great majority of school children in Texas had begun or completed their required immunization program for five common

childhood diseases: diphtheria, polio, measles, rubella, and tetanus. Smallpox, the standard immunization school children received for decades, is no longer a required immunization.

"We feel great progress has been made in the past year, particularly when you view the fact that out of 2.9 million school children in Texas some 2.3 million are on record in their schools as protected," said Dr. James E. Peavy, Texas Commissioner of Health. "Our forecast is for even better levels next May."

The mandatory immunization law passed by the Texas Legislature in April, 1971 required a monumental effort on the part of health authorities, school officials, and private medicine. Prior to enactment of the law, each individual school district set their own immunization requirements and some had no requirements. Quite often, in those areas where children needed the full range of protection, smallpox was the only immunization required. Under the new law, a child must be immunized against certain diseases to enroll in school.

School authorities worked closely with health officials to see that all parents were advised of the new requirements and that all school children began their immunization programs as soon as possible. The result was that three-fourths or more of all Texas school children were protected against each disease by the end of that first year under the new law. With the 80 school districts that began late campaigns and continued enforcement of the mandatory law in all school districts, state health officials foresee a substantially better

immunization level at the end of this school year.

"Our immunization program has spot-checked several school districts around the state, with most reporting a rise in their immunization level to include more than 90 percent of all school children in their district," said Dr. Peavy. "Less than one percent of the school children involved admitted no immunizations at all. We believe the outlook for achieving close to 100 percent protection among the school population is very bright."

Of the 1200 school districts in Texas, 400 are being revisited this year by state health authorities. School officials are offered assistance, advice, immunization clinics, and assistance to their school nurse from state or local health authorities.

"If it were not for the work done by local health departments and school nurses, the program would not have been as successful as it has been to date," said Dr. Peavy. "Of course, a lot of the immunizations were obtained through private physicians, and their cooperation has also been phenomenal."

Taking all groups as a whole, probably among the best immunized at the present time in the state are Catholic school children, with better than a 90 percent immunization level. As of May 1, 1972, some 74 percent of all Texas school children are immunized against polio; 79 percent against diphtheria; 79 percent against measles; 78 percent against rubella; and 79 percent against tetanus. Health officials believe the required two months spread between the three dosages of polio vaccine and the required booster dose were the factors that caused the polio statistics to trail those for the other diseases. In many cases, as a result, complete immunization against polio was not reported by the end of the reporting period on May 1, 1972.

"We feel the pre-school age child, from birth to five years of age, is where the disease problem is now in Texas," said Dr. Peavy. "By May 1, 1973, occurrence of these common childhood diseases in the pre school population will be our biggest remaining problem."

State health authorities have already mounted a massive pre-school immunization campaign. The Texas Immunization Program will now lay plans to work closely with the Department of Public Welfare in enforcing the required immunizations in kindergartens and day care centers. Under state law, children attending such day care centers must be immunized against whooping cough (pertussis), polio, diphtheria, rubella, measles, and tetanus.

Provisions Of Upland

Cotton Program Announced

Major provisions of the 1973 Upland Cotton Program aimed at improving the commodity's position in the market place were announced today by Secretary Earl L. Butz.

Today's announcement by the U.S. Department of Agriculture includes the following major provisions:

A national base acreage allotment of 10,000,000 acres. No cropland set aside requirement as a condition of program eligibility.

A national production goal of 12,075,000 standard bales of 480 pounds, net weight.

A preliminary payment rate of 15 cents per pound.

The National average loan rate was announced on October 17 at 19.5 cents per pound, basis middling 1 inch upland cotton (micronaire 3.5 through 4.9) net weight, at average location. This is the same as for the 1972 crop.

Elimination of the set aside requirement will free about two million additional acres of cropland on cotton farms for any crops that producers choose. "This step is important for our cotton producers," The Secretary said. He pointed out that a larger acreage of soybeans is needed in 1973, and this important crop is considered a good alternative in many areas of the cotton belt. Further, selective increases in the acreages of some grain crops are also needed.

As in the past, any cotton farmer may participate in the 1973 Cotton Program by signing up and complying with his conserving base requirements. He may participate on any farm or all farms in which he has an interest. Also as in the past, a producer's cotton allotment will be used to determine his program payment, but he will be free to plant the acreage that he decides upon after studying the outlook for supply, demand,

Rodent Control Demonstration To Be Held Nov. 28

Farmers, ranchers and homeowners will learn how to rid themselves of rats and mice in the upcoming Rodent Control Demonstration, November 28th at Ranger. The demonstration will be conducted at the Ranger Airport beginning at 1:30 p.m.

A specialist with the Fish and Wildlife Service will present the information and answer questions on rodent control.

The Rodent Control Demonstration is sponsored by the Texas Agricultural Extension Service and the Ranger 4-H Club. Rat and Mice bait will be sold by the 4-H club at the demonstration.

Gov. Smith To Make Last Recommendations

AUSTIN - When Gov. Preston Smith leaves office in January, one of his last official acts as chief executive will be to make his recommendations to the Legislature, and he has indicated he intends to make some strong suggestions on traffic safety.

"The need is compelling," the Governor told the fourth annual Public Support Conference of the Governor's Committee on Traffic Safety.

He has also indicated the outlines of the recommendations he will make to the Legislature in January. "We need to strengthen our legislation to remove the drunk driver from the road," he said. "We must provide driver education to every eligible young driver in our school system."

He has also mentioned needs to provide qualified and rapid medical service for accident victims anywhere in the state and upgrading our licensing system.

"We also need the safest possible school bus transportation for the children of Texas," he has said. Other speakers during the conference in Austin indicated that he may have in mind a measure requiring special training of school bus drivers.

Governor Smith also said he would make a recommendation on traffic safety to his successor as chief executive. "We will strongly urge the next administration to place a priority on traffic safety equal to that which we have placed on it."

Pointing to statistics that show that the death rate per 100 million miles on Texas highways has fallen from 5.5 the year before he became Governor to 5.1 in 1971, the Governor revealed that Department of Public Safety projections for 1972 place the rate at less than 5.0.

"That's what our traffic safety program is all about," he said, "saving lives of our citizens and those who visit us. No responsibility as Governor could have any greater meaning than that."

Gov. Smith paid tribute to his traffic safety administrator and his deputy, Ross Rommel and Gen. Tom Bishop. "Together, they have formed an organization which brings together the leadership and talents of our state agencies with traffic safety respon-

sibilities," he said. Thanking those attending the conference for their work on behalf of traffic safety, the Governor said, "We call upon you to give the same kind of support to the next Governor of Texas and to express your desire, as well as Texas' need for meaningful traffic safety legislation."

Others deeply involved in traffic safety in Texas have also called for strengthening traffic laws during the next session of the Legislature.

"Ever notice how smoothly traffic flows when a patrol car is in the area?" DPS Director Col. Wilson E. Speir asked. "The fact is that a visible presence of DPS vehicles serves as a great deterrent to moving traffic violations."

He said however that the DPS presence is only about half of what it should be. "We need additional patrolmen and we need them badly," he said. He indicated he would ask the Legislature for an increase in DPS patrol strength of about 100 men each year of the biennium.

He also called for reform of our traffic court system and the strengthening of laws against the drunk driver.

The traffic court system has come under fire from many quarters. Retired Supreme Court Chief Justice Robert W. Calvert, speaking of the entire court system in Texas, called for revision of the judicial

article of the State Constitution. "Must we wait for a scandal before we move for meaningful improvements in our judicial system?" Calvert asked.

He pointed to three principle problems - docket congestion and consequent delay in the trial and final disposition of cases, lack of proper judicial administration or business management of the court system, and selection of judges by partisan political elections.

Robert Derby, Austin, chairman of the Traffic Courts Study Committee created by the last session of the Legislature, has expressed his group's support for Calvert's recommendations.

"The sheer volume of traffic cases are simply overwhelming municipal and justice courts," he said. He said there were more than two million moving traffic violations filed in Texas during 1971.

He said his committee would support revision of the judicial article of the Constitution and would recommend five pieces of legislation to update and modernize our traffic court system now. "The problem is of such a magnitude that we need all the assistance we can get," Gov. Smith has said. "But we have found, during the 22 years of public service we have had an opportunity to devote to the state, that Texans can and do meet the challenge, whatever it may be, when they recognize it," he said.

AT YOUR LOCAL NEWSPAPER

Gordon pot

by DeMarquis Gordon

The Thanksgiving season is a time for us to reflect on our good fortune of living in a nation overflowing with food and fiber abundance.

Let's take a look at Texas' Agricultural industry as we near the end of November, the month designated as "Texas Food and Fiber Abundance Month".

For instance, consider that agriculture is a \$10 billion industry in Texas, second only to the oil and gas industry. In addition, the agricultural industry provides employment for 35 to 40 percent of the Texas labor force.

Of the state's approximate land area of 168 million acres, some 143 million acres are in farmland - more than any other state. Texas produces more than 200 different types of crops and livestock. It provides food and fiber for consumers throughout this country as well as abroad. Texas is the third leading agricultural state in the nation and ranks fourth among the leading agricultural exporting states.

We're indeed fortunate to have such a wide array of high quality food and fiber products at our fingertips at reasonable prices.

We can be especially proud of Eastland County farmers and ranchers who produced the largest peanut crop ever this year and bit an all time high in value of livestock marketed. We also had an extremely good peach and pecan year.

It is indeed a time for everyone to count his blessings.

A little work done now can make the fireplace the center of attraction during the Christmas season.

Why not do some log treating or paper log making now for the special occasion? You can have flames that are red, green, blue, orange or purple depending upon the chemicals used to treat the material to be burned in the fireplace.

Calcium chloride can be used to produce orange colored flames, copper chloride - blue, potassium chloride - purple, strontium nitrate - red, lithium chloride - carmine, and copper sulfate - emerald green.

Dry pine cones, small blocks of chips of wood can be soaked in solutions of these chemicals to produce the multi-colored flames when burned. Most of

The Light Touch

By Clint Bray
People so often play up the bad side of things. Nobody ever puts out a sign that says "Nice Dog".

It'll be great when the younger generation takes over all our problems, including the next younger generation.

Starting from scratch isn't as hard as starting without it.

Football: a bag of leather entirely surrounded by 22 men.

The husband who promises to move heaven and earth for his bride is the same fellow who, a few years later, growls fiercely when he's asked to move the sofa.

We'll keep our promise to provide the best in gifts at BRAY'S in Eastland and Ranger.

the chemicals can be purchased from chemical suppliers or local drugstores.

To treat cones or wood, a plastic pail and onion sack are needed. The cones or chips are placed in the sack and immersed in a solution containing one pound of the desired chemical dissolved thoroughly in one gallon of water. The bag must be weighted down so the material is completely covered by the solution. Allow the cones or wood to soak for at least 10 minutes.

After soaking, the treated material may be placed on newspapers to dry. After drying overnight, they will be

ready to use in the fireplace.

"Logs" can be made of loosely rolled newspapers tied with a heavy twine and soaked in a solution of four pounds of copper sulfate and three pounds of rock salt in a gallon of water. They will require several days to dry out. Once dry, a paper log will burn all evening and produce a rainbow of colors.

Delicious, nutritious pecans and pecan baked goods will be on display in the Eastland County Courthouse next Friday and Saturday reports Dan Childress, President of the Eastland County Pecan Growers Association. These items will also be sold to those whose appetites are stimulated by the display of goodies. The event will be the Twentieth Annual Eastland County Pecan Show sponsored by the Eastland Chamber of Commerce and the Eastland Pecan Growers Association.

Marcus O'Dell, Chamber of Commerce President says visitors will see some of the best quality pecans in Texas as well as prize pecan pies, cakes, candies, nut bread and cookies. A third feature will be a display of centerpieces using pecans in various forms.

O'Dell also stated that parking meters will be sacked December 1 and 2 for the big event. He encourages everyone in the county and surrounding areas to come and see the Pecan Show Friday afternoon and Saturday.

The Home Demonstration Club members will operate a concession where coffee and pecan food will be sold.

De Gordon, County Agent, estimates that over 200 entries of top quality pecans representing 40 different varieties will be on display. Each entry consists of a least 40 pecans. They must have been grown in 1972 by the person entering the pecans in the

Pecan Show To Feature Bake

The Twentieth Annual Eastland County Pecan Show will feature a Bake Show and Centerpiece division. The Pecan Bake Show and Pecan Centerpiece Divisions will be held on December 1st and 2nd, in the Eastland Courthouse Lobby in conjunction with the Pecan Show.

There will be five divisions of baked products in the Adult and Youth division. All baked entries must contain pecans. The divisions are (1) cakes, (2) pies, (3) candy, (4) cookies, (5) nut bread.

All entries should be Show. All entries of pecans must be entered by noon on Friday. Ribbons will be awarded to the top three places of each variety. Plaques will be given to the exhibitor of the Champion Shelling Pecan, the Champion In-Shell Pecan, and the Champion Native Pecan.

exhibited on disposable plates, paper or foil, or pieces of stiff cardboard covered in foil.

Prizes will consist of cash prizes and ribbons to be awarded to the top three places in each food division. Cash awards shall be as follows: 1st place - \$2.50, 2nd place - \$2.50 and 3rd place - \$1.00. The overall Grand Champion will be awarded \$5.00 and Reserve Champion - \$4.00 for both the Adult and Youth divisions.

Any adult or youth in the county is invited to participate. All entries must be in place by 11 a.m. on Friday, December 1st.

All entries of Home Demonstration and 4-H members will become the property of the Bake Show and will be sold to the public with proceeds going to the Home Demonstration Council and 4-H Council funds respectfully. Baked pies, cakes, and many

other homemade goodies will be on sale to the public during the annual County Pecan Show. The Home Demonstration Club ladies will sponsor a bake sale in the Courthouse Lobby on December 1st and 2nd.

This will be a good time to "stock up" on these delicious homemade baked foods for the

Holiday company and entertaining.

All proceeds will go to the Home Demonstration fund which will be used to sponsor coming activities and projects.

You and each of you are hereby commanded to appear before the Honorable District Court of Eastland County, Texas, to be held at the Courthouse of said County, in the City of Eastland, Eastland County, Texas at or before 10:00 o'clock a.m. of the first Monday after the expiration of forty-two days from the date of the issuance of this citation, same being the 25th day of December, A.D. 1972, and answer the petition of H.R. Diddle, et ux, Plaintiff, in Cause No. 25,828, styled: H.R. Diddle, et ux, vs Minnie Forehand, et al, in which the following persons are Plaintiff: H.R. Diddle, et ux; and the following persons are Defendants: Minnie Forehand, et al; which petition was filed in said court on the 2nd day of May, 1972, and the nature of which said suit is as follows:

This is a suit in trespass to try title and to quiet title to lands and premises owned in fee simple by the above named Plaintiffs, which land is located and situated in Eastland County, Texas, and is more particularly described as follows, to-wit:

Being out of the N 1/2 of the NE 1/4 of Section No. 28 of the R.R.B. & C.R.R. Co. Survey and being more particularly described by metes and bounds as follows:

BEGINNING at an iron rod set in a N&S fence line in the north line of State Highway No. 36 that is located East 415 varas (1152.78 ft.) and North 40 ft. from the S.W. corner of the said N 1/2 of NE 1/4 Section No. 28. THENCE West along the north line of said State Highway No. 36 a distance of 123 ft. an iron rod set. THENCE North 2 deg. 26 min. East, at 70 ft. a fence, in all 261.50 ft. to an iron rod set at the occupied westerly northwest corner of the Second Tract as described in a deed to H.R. Diddle recorded in Vol. 389, page 67 of the Deed Records of Eastland County, Texas. THENCE South 89 deg. 41 min. East 166.50 ft. to an iron rod set at the southwest corner of the said H.R. Diddle Fourth Tract. THENCE North 1 deg. 20 min. West 95 ft. to an iron rod set in the west line of said Fourth Tract at its intersection with the south line of a public road. THENCE South 89 deg. 41 min. East with said road 81.50 ft. to an iron rod set in the east line of said Fourth Tract at a road intersection. THENCE South 1 deg. 20 min. East with said road 152 ft. to an iron rod set by a corner fence post at the easterly southeast corner of the said H.R. Diddle

Third tract, same being the northeast corner of the Mamie Forehand Tract. THENCE North 89 deg. 38 min. West along a fence 136 ft. to an iron rod set by a fence corner post claimed by Mamie Forehand as her northwest corner. THENCE South 0 deg. 42 min. East 50 ft. to an iron rod by a fence corner post claimed by Mamie Forehand as her northwest corner. THENCE South 0 deg. 46 min. West 153.80 ft. to the place of beginning and containing 1.066 acres.

That Plaintiff above named, on the 20th day of April, 1972, was and still is, the owner in fee simple of the hereinbefore described premises. That on the date last mentioned, the Defendants unlawfully entered upon said land and premises and dispossessed the Plaintiffs and withhold from them possession thereof, to which possession they were and are legally entitled.

Plaintiffs allege and show to the Court that they claim the hereinbefore described land under Deed duly recorded and registered, and that they have had and held open, visible, peaceable, continuous, notorious, exclusive, hostile and adverse possession of all of the lands hereinabove described, using and enjoying the same and paying all taxes due thereon annually, and as required by law for a period of more than five consecutive years prior to the commencement of this suit.

If this citation is not served within ninety (90) days of its issuance, it shall be returned unserved.

Issued and given under my hand and seal of said Court, at Office in Eastland, Texas, this the 10th day of November, A.D. 1972.

ATTEST:

Joe T. Gray
Clerk of the
District Court,
Eastland County,
Texas

Farm Bureau Has 1096 Families At End Of '72

Eastland County Farm Bureau finished out the year 1972 with 1096 families.

New members signed up for this year was 248.

One hundred thirty six thousand nine hundred and forty-two (136,942) have voluntarily chosen Texas Farm Bureau as their general Farm organization.

The 1972 official membership represents gain of 9,540 families above the 127,402 families of 1971. Stated another way, the 1972 membership is 17.49 percent of last year's membership.

He's working now on your 1982 electric service.

He's one of the engineers at Texas Electric who is charged with the job of making sure this area continues to have enough electricity.

Developing our power system is a complex assignment. It requires teamwork, training, knowledge and experience. It continuously involves weighing alterna-

tives in the selection and arrangement of facilities that will keep our power system reliable and efficient, and environmentally sound.

Ten years ahead may seem a long time, but in our business that's the normal planning cycle.

We're already at work on construction projects that will be completed in 1978. By then we will have added more than 2,000,000 kilowatts—about 2/3 of our present generating capabil-

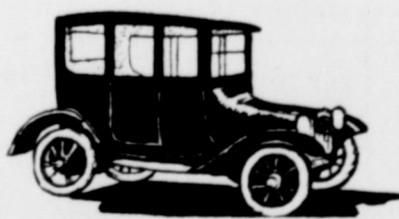

ity—as well as related transmission and distribution facilities. And we're now planning into the 1980's.

Being able to meet the electric service requirements of our customers tomorrow depends on sound planning today by the people at Texas Electric.

It's the job of every one of us to see that you get the most value from your electric service.

LETTERS to EDITOR

DEAR Editor: What ever became of "I Remember"? I read them with interest since seems most of my life goes way back - much farther I am sure, than Dick O'Brien's as I'm 85. I use to hear of him when he was pastor of First Church in Big Spring. He sometimes wrote "Things for The Baptist Standard. I have one old song book I wish he had. So many of the old, old songs, takes me back to childhood. So if I have his address sometime I might like to mail it to him.

Suppose the leaves are at their best about now. It's now been 15 years since we were there last, 1957. As we grow older time does to some extent dim the memories we cherish. But the memory of Eastland Co. will always remain in my heart.

Sincerely,
Mrs. M.L. Brashear

P.S. - Since writing the enclosed letter, I have the November 16 paper. I read with interest the story about the Bollinger Cemetery. I don't

recall ever hearing of it, tho we lived in Staff Community. The Bollinger and Brashear families knew each other about always. At the time I "went out" to Eastland, (1907) Staff that is Mr. and Mrs. Bollinger and the youngest children went to Mexico. I knew Bennie right well. He and his girlfriend were one of the couples who ran around with us. Of course we all traveled in buggies. I have two real good snapshots made of four couples of us made on a Sunday afternoon before we were married Friday, which was Friday 13th. We didn't know that was supposed to be unlucky date. Anyway it wasn't for us. I know both Bennie and Bert have passed on. One of the other girls and I are the only

Milchem Opens Eastland Office

Milchem, Inc., of Midland, announced Friday the opening of an area service office in Eastland, at 705 St. Charles Street.

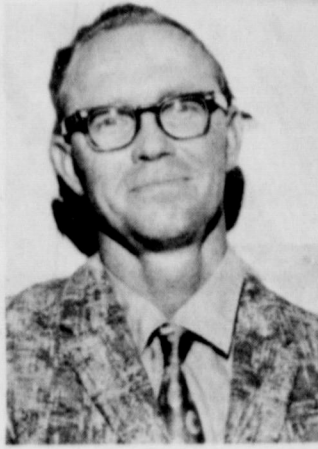

The firm specializes in providing various types of drilling mud to oil well drilling contractors. The firm also provides technical engineers, schooled in all types of drilling procedures to advise the drilling firms on the exact type of drilling mud best suited for their particular problem.

In charge of the new Eastland office is Kenneth Stacy, originally from Rankin. Stacy said the Eastland office will service a radius of 100 miles around Eastland.

The firm, whose home offices are in Houston, has other West Texas district offices located in Midland, Monahans, Snyder, and Fort Stockton.

In addition to specialized types of drilling mud, the firm also handles its own brand of "Mil Lime" and caustic soda in bulk form. Stacy said, "when you buy our mud, you automatically get the services of one of our district engineers".

Stacy expressed his pleasure at having been transferred to Eastland and said his firm, and its services are available 24 hours per day, seven days per

week, and can be reached locally at 629-2829. The Stacy's have two children, Calera Jan. 10, who is in the 5th grade, and Kimberley

Anne, 8 who is a 2nd grader. Mrs. Stacy is the former Phyllis Jan Williams of Odessa. The Stacy's are members of the Bethel Baptist Church. (Photo By Dabney)

COMMUNITY

PLAN

EASTLAND COUNTY, TEXAS

You are urged to study this information, and keep it where you can locate it at any time. Follow the instructions outlined in this brochure in order to minimize the effects of gamma radiation in event of nuclear attack.

This Plan Has Been Approved By:

Scott Bailey
County Judge, Eastland County

C.M. Britain
Mayor, City of Carbon

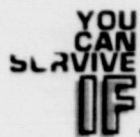

Eugene Baker
Mayor, City of Gorman

Douglas Fry
Mayor, City of Cisco

W.J. Van Bibber
Mayor, City of Ranger

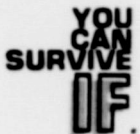

James Keel
Mayor, City of Eastland

C.M. Canall
Mayor, City of Rising Star

... YOU KNOW YOUR COMMUNITY SHELTER PLAN

Suppose it is 9:30 P.M.
 You and your family are at home.
 Suddenly you hear Civil Defense warnings.
 A bulletin flashes on radio and television: "Radar has detected missiles approaching the United States. Take shelter immediately." Would you know what to do?
 A nuclear attack may never come. But it may come. Certainly you want to be prepared ... just in case.
 This Civil Defense Community Shelter Plan outlines the present status of fallout shelter protection in your area. It has been prepared and approved by your local, state and federal governmental officials.
 By reading and understanding this PLAN now, you and your family can learn what to do and where to go for maximum protection in case of nuclear attack.
 You owe this preparation to yourself and your family.
 FOLLOW THIS PLAN — IT GIVES YOU THE MAXIMUM CHANCE FOR SURVIVAL.

... YOU RECOGNIZE THE DANGER

Should the United States come under nuclear attack, radar detection equipment would alert the United States Defense Command and the warning would be sounded as soon as possible. At that time, it would not be known where nuclear blasts might occur.
 But even if there were no actual blasts in this area, local residents could be endangered by radioactive fallout.

what is FALLOUT

If a nuclear weapon explodes on or near the ground, tons of earth are drawn up with the "fireball" produced by the explosion. They mix with the radioactive materials produced by the explosion and eventually fall back to the ground as particles of "fallout". This radioactive dust may fall as far as several hundred miles from where the weapon exploded and may arrive within minutes or hours depending on the distance from the point of explosion and the velocity and direction of high atmosphere winds.

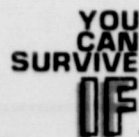

The primary danger from fallout is caused by the "gamma rays". Like X-Rays they can harm living things exposed to them.

You can protect yourself from fallout by getting heavy material (shielding) between yourself and the fallout particles giving off the gamma rays. The heavier the construction of a building you may be in, the better protection it gives you.

Persons exposed to radioactive fallout do not become radioactive. They are neither contagious nor infectious. People who have fallout particles on their bodies or clothing probably would not carry enough to endanger other people, but should brush themselves off for their own protection.

Food and water are contaminated only to the extent that they contain the fallout particles. Exposed food can be eaten after washing or peeling.

Radioactive fallout decays rapidly. Seven hours after an explosion the radiation level is only one-tenth as high as it was an hour after the blast. Two days after a blast, radiation is only one-hundredth as strong.

... YOU RECOGNIZE THE WARNING

This Community Shelter Plan was developed with one idea in mind: to inform you, in advance, what to do in case of nuclear attack.
 Warning to this county's residents will come in a matter of seconds after the National Warning System detects an attack.
 Sirens will sound the warning.

WAVERING TONE: (3 to 5 minutes)
 ACTION
 GO TO SHELTER IMMEDIATELY.
 Attack on U.S. has been detected.

STEADY TONE:
 ACTION
 LISTEN TO LOCAL RADIO FOR INSTRUCTIONS.

Local Civil Defense officials will be on radio to broadcast the facts of the crisis and to give instructions.

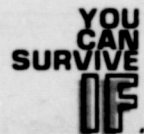

COMMUNITY PLANNING IS ESSENTIAL FOR SURVIVAL

PURPOSE OF THIS PLAN

This PLAN of action was developed by professional engineers and planners to offer maximum protection from nuclear radiation. The local PLAN is a part of the nationwide Civil Defense Program, and is designed:
 1. To utilize shelter facilities in existing buildings by determining the shelter space available in such building, and the population that can be accommodated in that building.
 2. To give instructions on ways to improvise shelter at the homes or offices of those persons who cannot reach public shelter in the specified time.
 3. To determine the need for additional shelter in areas where it is not now available.
 If you find you live or work in an area where shelter is not available, you can improvise shelter with materials at hand.

THIS PLAN TELLS YOU HOW!

If you are in an area where shelters are not available when the warning sounds, use this time to improvise shelter until otherwise directed by local officials. If, following the warning, it is determined that more time is available to reach shelter, instructions will be broadcast on local radio stations.
 If you follow this PLAN, less confusion will result and the maximum number of people can be protected.
 You owe it to yourself and your family to read this PLAN. Know in advance what to do and where to go when the warning sounds.

... YOU ARE PREPARED

Licensing a building makes it eligible for emergency supplies.
 Most licensed shelters are clearly marked with the familiar sign seen here. As eligible buildings are licensed, they will be so marked.
 Some shelters will have a trained Shelter Manager in charge. He will need your cooperation throughout your stay.
 Most licensed shelters have limited emergency Civil Defense supplies, not sufficient for extended stay. These supplies are furnished by the Federal Government and are constantly being stocked in other shelters when authorized by building management, during the continuous Civil Defense preparedness program.

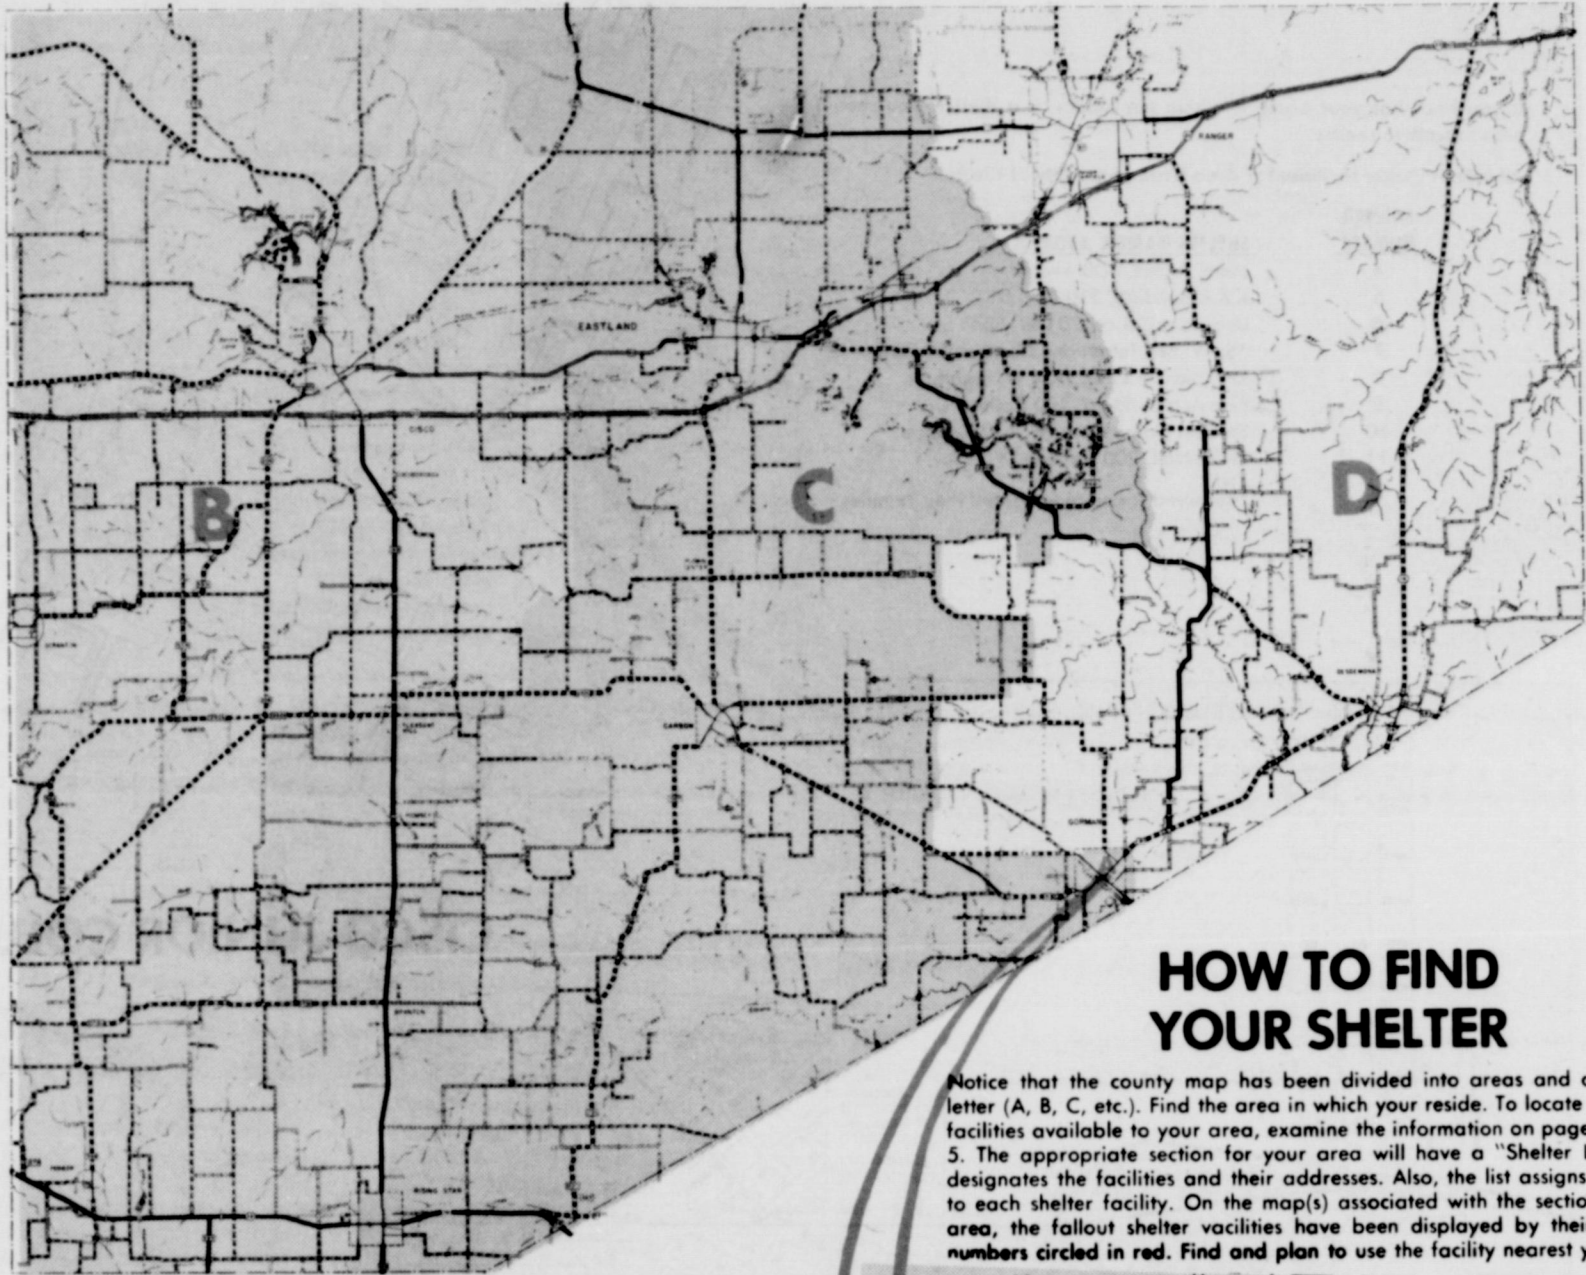

THERE ARE SOME ITEMS YOU SHOULD BRING WITH YOU.
 SEE THE LIST ON PAGE 6.

COMMUNITY SHELTER PLAN

FALLOUT

NOTICE...

There is enough public fallout shelter space in the cities of Gorman, Cisco, Eastland, and Ranger to shelter all Eastland County residents. Although some of the shelter facilities have been partially stocked with emergency supplies, the quantity of supplies is limited and individuals using the shelters will have to take additional supplies with them. A list of suggested items to take to public shelter is given on page 6 of this publication.

HOW TO FIND YOUR SHELTER

Notice that the county map has been divided into areas and assigned a letter (A, B, C, etc.). Find the area in which you reside. To locate the shelter facilities available to your area, examine the information on pages 3, 4 and 5. The appropriate section for your area will have a "Shelter List" which designates the facilities and their addresses. Also, the list assigns a number to each shelter facility. On the map(s) associated with the section for your area, the fallout shelter facilities have been displayed by their assigned numbers circled in red. Find and plan to use the facility nearest your home.

EASTLAND COUNTY

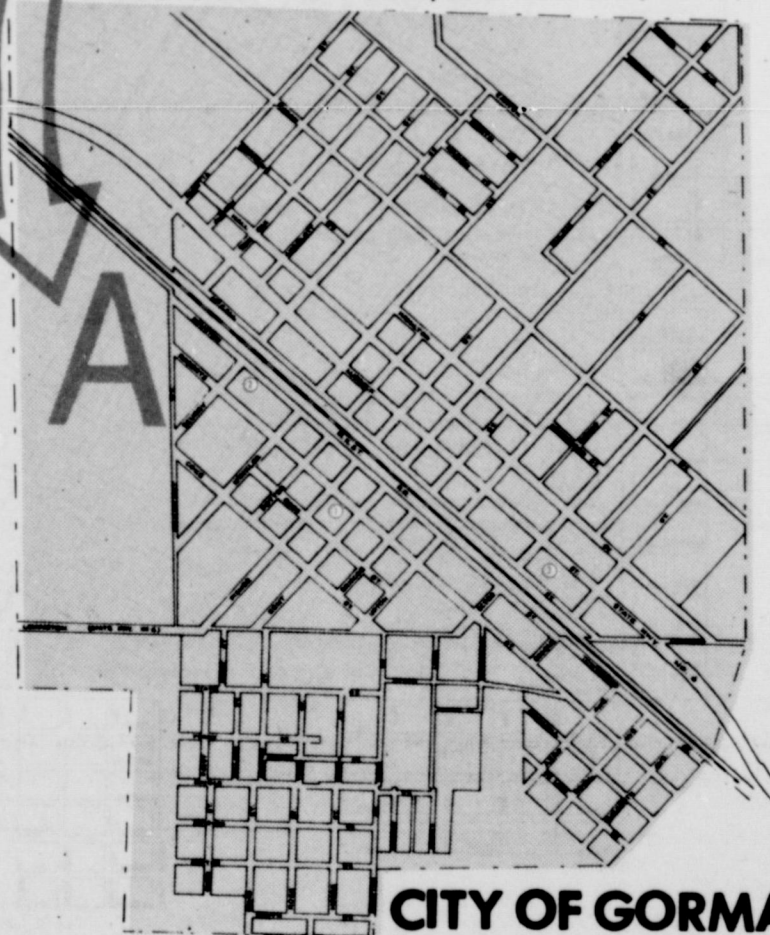

SHELTERS FOR AREA A

("A" is your area designation only if you reside within the city limits of Gorman, Texas.)

If you find that your home is within ten blocks of a shelter, you should plan to walk to shelter.

All fallout shelter facilities for Area A are in the City of Gorman.

SHELTER NUMBER	SHELTER NAME & ADDRESS
1	Gorman Hotel, 100 Fisher St.
2	Blackwell Hospital & Clinic, Roberts & Scurry Sts.
3	Gorman Peanuts, McCall & Ector Sts.

CITY OF GORMAN

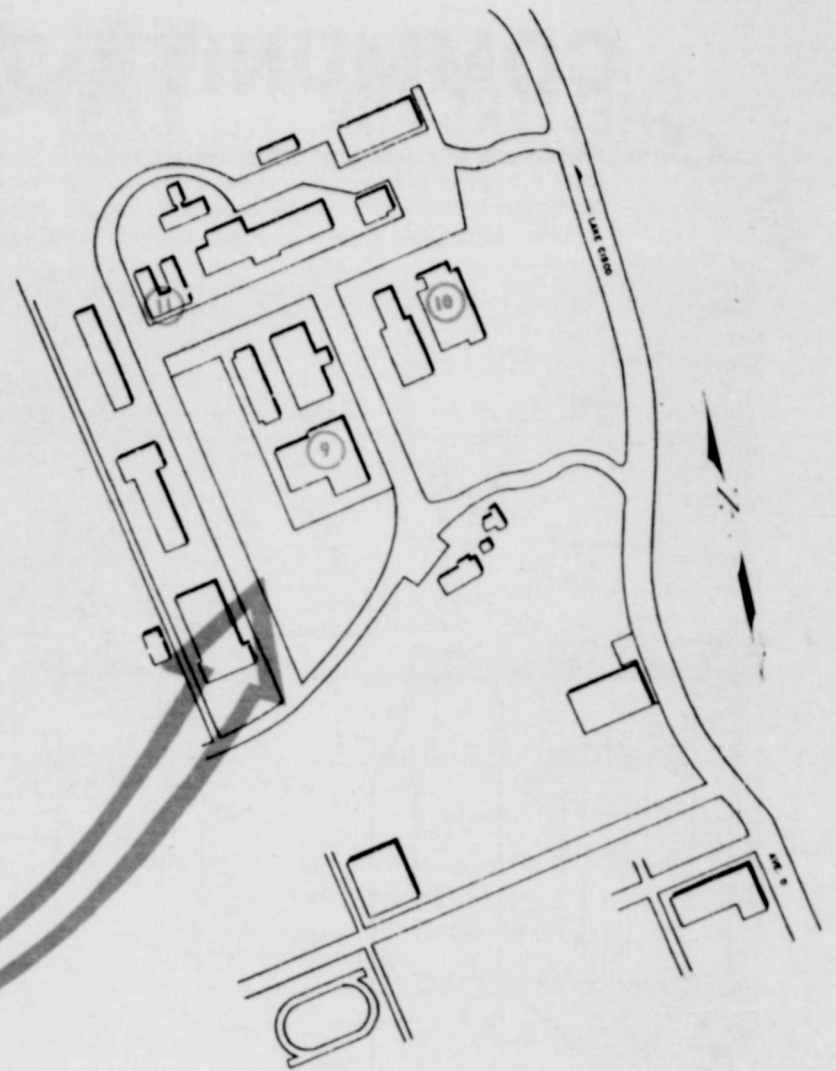

SHELTERS FOR AREA B

If you find that your home is within ten blocks of a shelter, you should plan to walk to shelter.

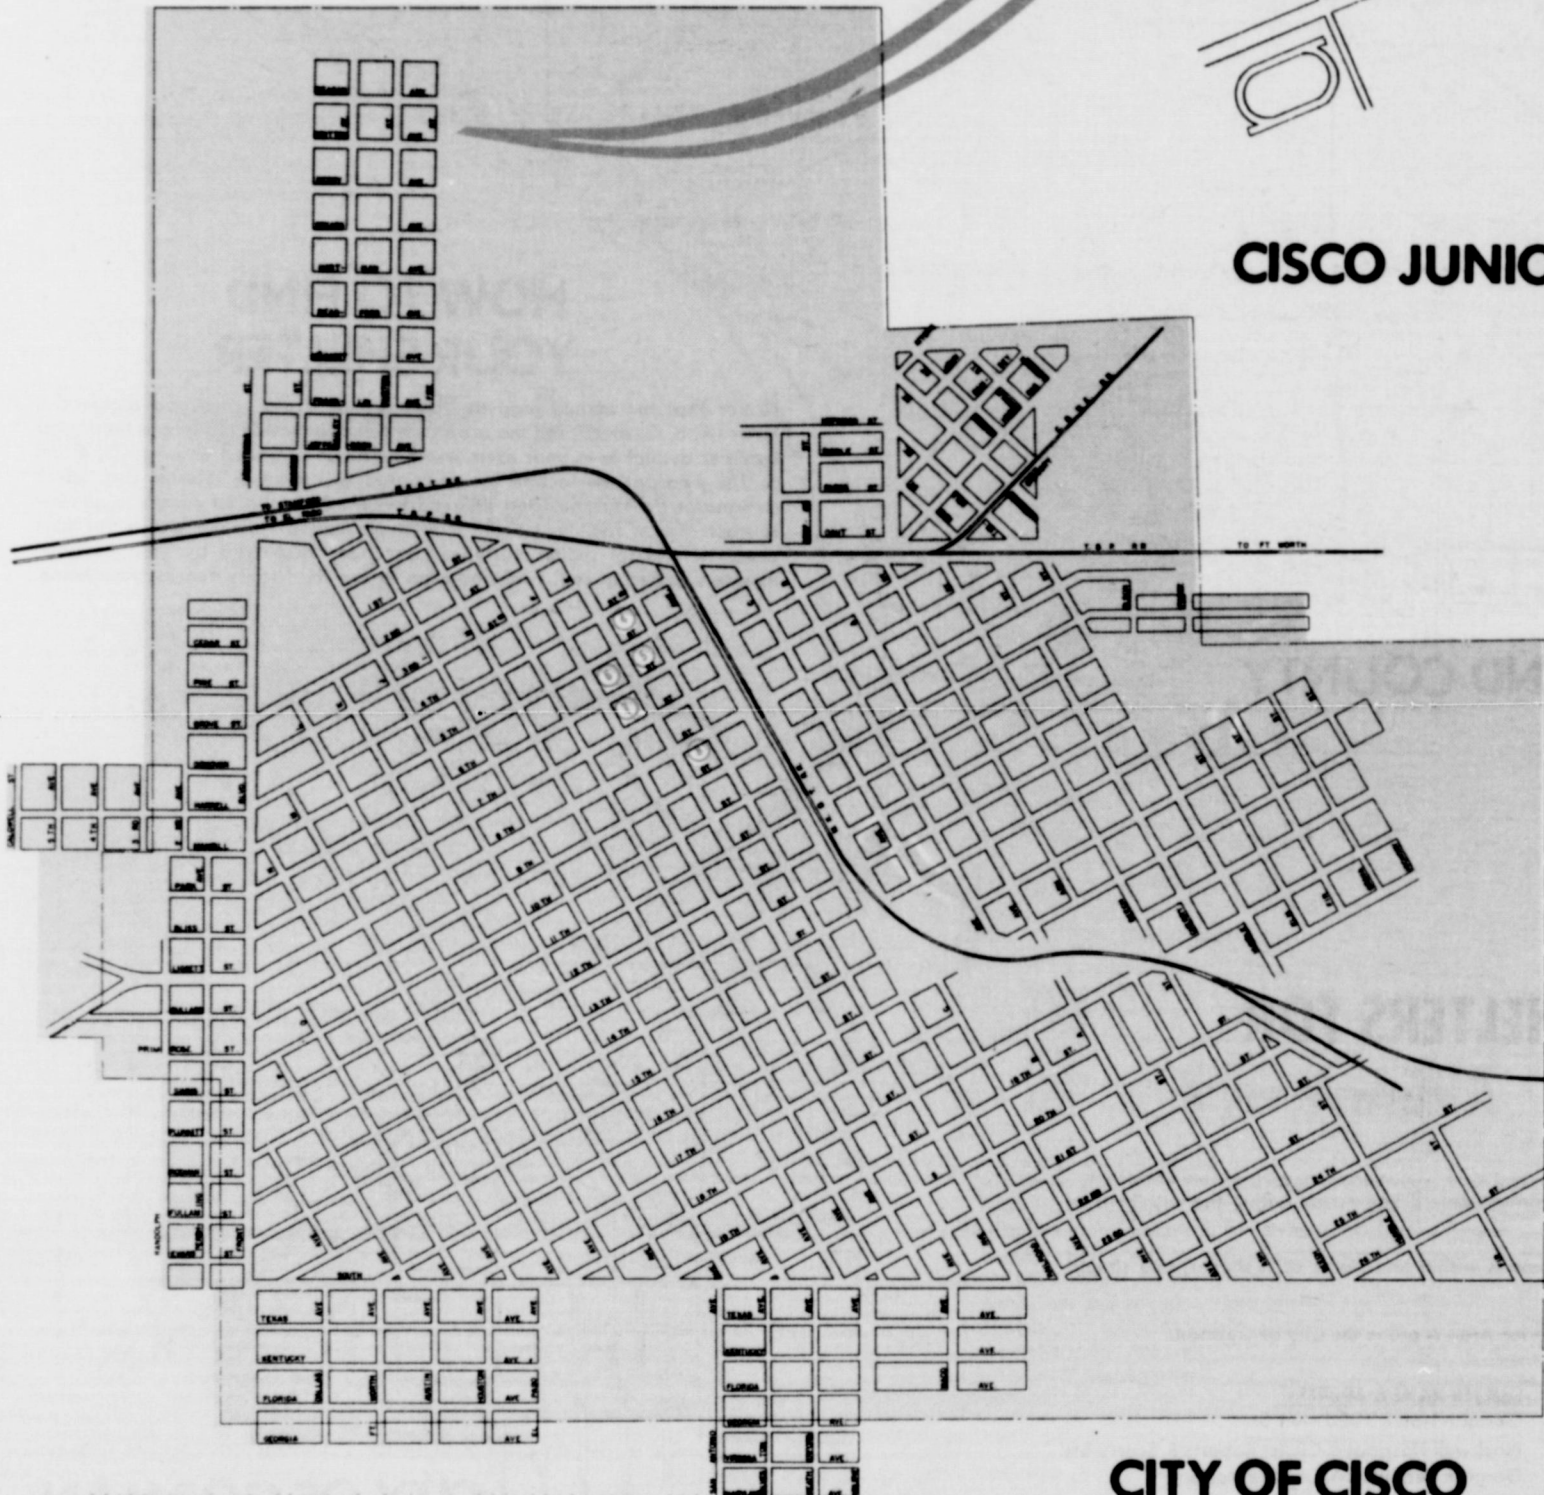

All fallout shelter facilities for Area B are in the City of Cisco.

<u>SHELTER NUMBER</u>	<u>SHELTER NAME & ADDRESS</u>
4	Hotel Annex, 400 Ave. D
5	K & K Building, 510 Ave. D
6	U. S. Post Office, 204 W. Sixth St.

27	Ranger College Gymn, 100 Cooper St.

If you find that your home is within ten blocks of shelter, you should plan to walk to shelter.

SUGGESTED SUPPLIES TO TAKE TO THE PUBLIC SHELTER

Pick out the ones that may be needed and can be carried in a small bag or suitcase.

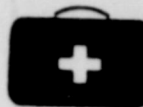

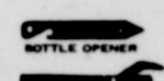

- Supplies of prescription medicines for diabetics, heart patients, etc.
- Special medicines and food for the care of invalids and infants.
- A small package of supplementary foods (canned meats, dried foods, sugar, salt, canned fruit, and milk).
- Blankets, sleeping bag, or air mattress.
- Extra change of clothing in a plastic bag.
- Small first aid kit.
- Soap, tooth paste, tooth brush, and towels.
- Portable radio plus batteries, books, games and compact toys.
- Flashlight plus batteries.
- Paper toweling.
- Your copy of this Community Shelter Plan.

**DO NOT OVERLOAD ANY INDIVIDUAL
CONSIDERABLE WALKING MAY BE REQUIRED**

WHAT NOT TO TAKE

- Pets.
- Weapons.
- Alcoholic beverages.
- Bulky packages.
- Foods requiring cooking or cooling (refrigeration).
- Heat or flame producing devices, except matches and lighters.

WHAT TO TAKE

<p>SANITATION AND MEDICAL SUPPLIES</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  FIRST AID KIT </div> <div style="text-align: center;">  SOAP </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;">  SANITARY NAPKINS </div> <div style="text-align: center;">  TOILET PAPER </div> </div>	<p>CLOTHING AND BEDDING</p> <div style="text-align: center; margin-bottom: 10px;">  SLEEPING BAGS </div> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  BLANKETS </div> <div style="text-align: center;">  EXTRA CLOTHING </div> </div>
<p>EATING UTENSILS AND FOOD</p> <div style="display: flex; justify-content: space-between;"> <div style="text-align: center;">  WATER </div> <div style="text-align: center;">  EATING UTENSILS </div> <div style="text-align: center;">  FOOD AND CONTAINERS </div> <div style="text-align: center;">  CUPS </div> <div style="text-align: center;">  BOTTLE OPENER </div> <div style="text-align: center;">  CAN OPENER </div> <div style="text-align: center;">  POCKET KNIFE </div> </div>	

There is no way to predict how long you may have to remain in the shelter.

Under extreme conditions, you may have to stay there for as long as two weeks.

DETAILED INSTRUCTIONS ON HOW TO USE PLAN AND MAP

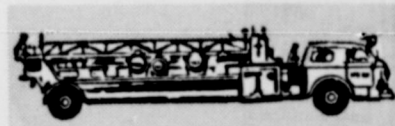

It is important that you use the shelter allocated to you. The plan provides for the maximum number of people to walk to shelter — where possible, it is better to walk to shelter and leave your car at home. The plan provides that **EVERYONE CAN BE SHELTERED** in their designated shelter within the prescribed 1-hour time limit, IF they FOLLOW THE INSTRUCTIONS.

If the plan provides for you to WALK to the shelter:

The City is laid out into areas so that people walking to shelters will not have to cross designated heavy traffic corridor streets.

Minimize crossing heavy traffic corridor streets. Crossing a corridor is dangerous to walker and driver alike.

Walking time to any allocated "walk-in" shelter is not more than 30 minutes.

Emergency vehicles with operating emergency lights will be given the "right-of-way."

DO NOT SPEED. The routes and distances are planned so you can get to parking spaces and shelters at a normal legal speed.

If the plan provides for you to DRIVE to shelter:

It is important that you follow your designated route.

Designated routes — shown on the map — are the safest and most direct routes and cross traffic is minimized.

Vehicles using undesignated streets only slow down and interfere with the smooth flow of traffic to designated parking areas.

When entering the Central Business District, there may be some cross traffic. Proceed cautiously to parking areas where a policeman will direct you.

Vehicles on undesignated streets interfere with pedestrians moving to their designated shelters and are dangerous to pedestrians and drivers alike.

After parking and locking your car, immediately walk to your allocated shelter. If your shelter is in a group of buildings, a "shelter cluster" manager will direct you to one of the shelters in the cluster.

IF YOU LIVE IN AN AREA WITHOUT PUBLIC SHELTER. . .OR IF YOU CANNOT TAKE YOUR PUBLIC SHELTER SHOWN ON MAP STUDY THE FOLLOWING ON HOW TO IMPROVISE SHELTER

WHAT TO DO NOW:

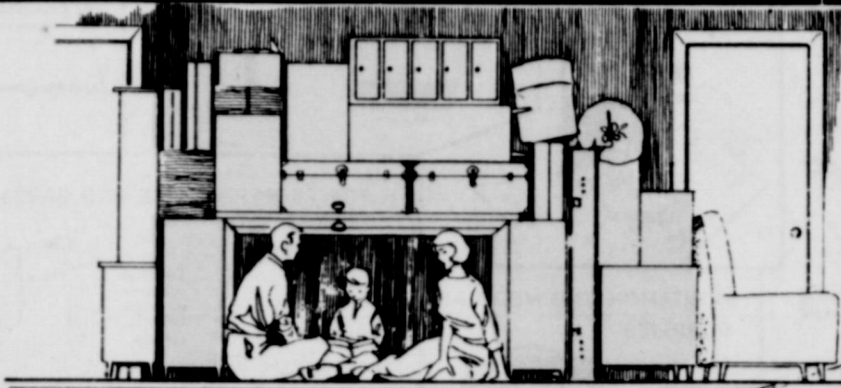

(1) Study the sketches below and decide which is applicable to your situation and select a shelter location. The area selected should provide 10 sq. ft. for each person to be sheltered.

(2) Take note of available shielding materials such as bricks, concrete blocks, sand or loose earth which could be moved quickly. If no shielding materials are presently available, obtain and store some in a convenient location.

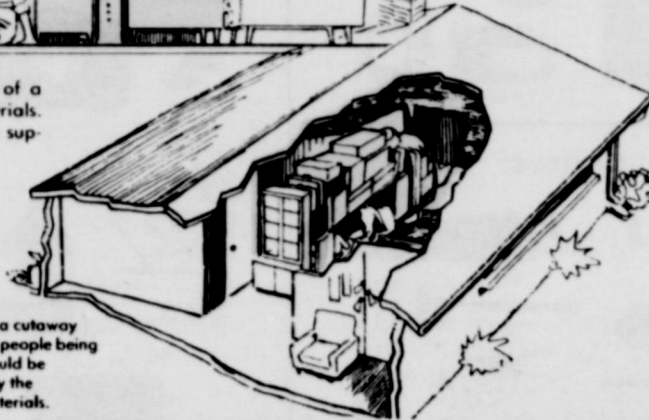

(3) Take note of non-perishable foods normally kept in the home. If these are not sufficient to maintain your family for two weeks, increase the supply.

(4) Decide on an emergency plan and familiarize your family with the details.

FIRST FLOOR OF HOUSE WITHOUT A BASEMENT

Place boxes or drawers on top and around the sides of a sturdy table or workbench and fill them with heavy materials. Often a makeshift table can be made by using doors supported by cabinets or other pieces of furniture.

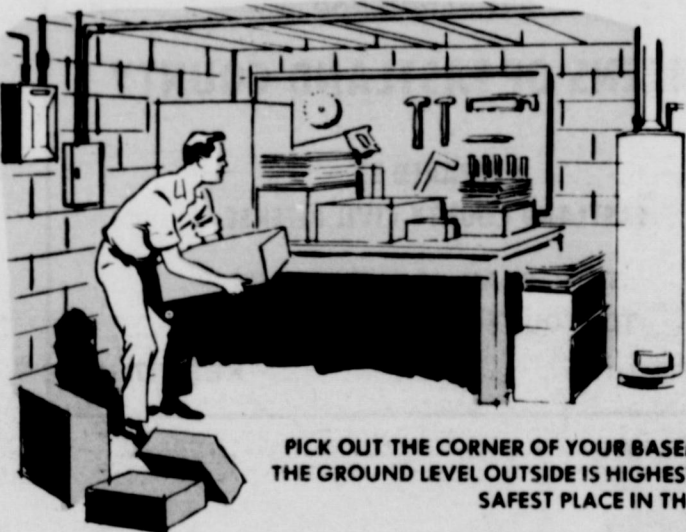

NOTE: This is a cutaway drawing. The people being protected should be surrounded by the protective materials.

STORM CELLARS

If the existing roof of the storm cellar is made of wood or other light material, it should be covered with one foot of earth for overhead shielding from fallout. More posts or braces may be needed to support the extra weight. After the roof has been shielded, better protection can be provided by blocking the entranceway with concrete blocks, sandbags, bricks, earth or other shielding material, after all occupants are inside the shelter. A few inches should be left open at the top to provide ventilation. If shielding material is not available for the entranceway, shelter occupants should stay as far away from it as possible.

IF YOUR HOME HAS A BASEMENT

PICK OUT THE CORNER OF YOUR BASEMENT WHERE THE GROUND LEVEL OUTSIDE IS HIGHEST. THIS IS THE SAFEST PLACE IN THE BASEMENT.

Place boxes or drawers on top of a sturdy table or workbench and fill them with heavy materials, such as dirt or sand. If the sides of the basement away from the shelter area have more than 2 feet of outside wall exposure, materials should also be placed around the open sides of the table. Be very careful not to overload the table to the point of collapse.

IMPROVISING OUTSIDE THE HOUSE OR BARN

Dig a shallow ditch (6 inches deep, 6 inches wide) parallel to and about 4 feet from the outside wall. Remove the doors inside the house from their hinges. Place the bottoms of the doors in the shallow ditch (so they will not slip) and lean the doors against the outside wall. On the doors, pile all the shielding materials that they will support. Stack other shielding materials at the ends of the doors. If there is time, make the shelter deeper by digging out more earth inside it. Dig out shallow trenches to allow rain water to drain off away from the shelter. Shielding materials can also be placed on the other side of the wall.

HOME SHELTER SUPPLIES

<p>INFANT-CARE SUPPLIES</p> <p>BOTTLES AND NIPPLES MILK DIAPERS RUBBER SHEETING</p>	<p>EATING UTENSILS AND FOOD</p> <p>EATING UTENSILS MEASURING CUP PAPER PLATES PAN BOTTLE OPENER CAN OPENER POCKET KNIFE CUPS NAPKINS WATER FOOD AND CONTAINERS</p>	<p>BOOKS, GAMES, ENTERTAINMENT</p>	<p>RADIATION METERS, RADIO</p> <p>BATTERY-POWERED RADIO WITH AERIAL EXTRA BATTERIES CHARGER RATE METER, DOSIMETER</p>	<p>CIVIL DEFENSE INSTRUCTION MATERIAL</p>

LOCAL OFFICIALS ENDORSE COMMUNITY SHELTER PLAN

There are many variables involved in determining criteria to be used in a Community Shelter Plan: Time of warning of missile strike; location of strike; weather conditions; time of day or night; location; vehicle control and travel time analysis and others.

Those responsible for this PLAN utilized all of talent available to arrive at a solution that would be logical, practical and would shelter the maximum number of people.

YOU CAN SURVIVE IF... IF YOU KNOW WHERE TO GO

This publication tells you where to go and what to do in case of a nuclear emergency. It is a community shelter plan based on a 90-minute maximum warning period before fallout would reach the area. Therefore, if a warning does come, you would have a 20-minute time period to leave your place of employment and return home if necessary. During this time period there will be controlled traffic on all major streets. At the end of this time period traffic will generally be limited to one-way movement to shelters.

Regardless of where you may be when a warning is received, go to your allocated shelter, for this plan has been designed to keep families and neighbors together.

This plan has been developed to provide protection from radioactive fallout, and in no way should be interpreted as effective against blast and tornadoes.
