Bass noted that anyone who wants to attend, may go to the National Convention and all they have to do is let it be known and if elected, he can go to the National Convention. Bass urges people to get involved and not sit on their apathy, but to take an active part in their Precinct Conventions.

The County Convention will be held a week after the precinct conventions. This is where 25

Mrs. Myrtle Latham's daughter of Farwell visited her on Tuesday.

Mrs. Newton who was in the hospital several days was brought back to her room here on Saturday. Her daughter, Mrs. Lassiter, of Whiteface was with her on Monday.

The Assembly of God people came Sunday and sang for us for about an hour.

Mr. and Mrs. Largent of Littlefield came Friday to visit her parents, Dr. and Mrs. McDaniels.

Mrs. Kaltwasser, who was in the Methodist Hospital in Lubbock, for several days to get a new pacemaker. She had the stitches removed Tuesday of this week.

Mrs. Violet Crow of Clovis visited her mother, Mrs. Spurlin, on Monday and Thursday.

Looking back over the past years, thoughts return again to this little poem by Lucy Larcom, entitled "January". It impressed me with its truth and deep meaning for us.

It follows, "we pause beside this door; Thy year, Oh God, how shall we enter in? The footsteps of a child sound close beside us, Listen, he will speak! His birthday bells have hardly rung a week, yet has he trod the world's press undefiled. "Enter through me," he saith, "nor wander more, for La! I am the door."

I hope you will see its meaning and true simplicity. It holds a message for each of us.

Letters To The Editor

(Editor's Note: This letter is reprinted from the Clovis News Journal, by request of the writer.)

TO THE EDITOR:

Who is guilty? On behalf of me and my family, let me state that even though the feelings ran hard and heavy during the week of my brother's trial, we do believe that the state has passed laws that must be obeyed, the District Attorney had a job that had to be done, the judge had a job to do, and the jury was made up of twelve good people, who did what they felt was necessary.

The job they had to do on the night of January 9, 1976, was not a pleasant one, and they did not enjoy passing the death sentence on a fellow-man, but it should never have become necessary for them to have been placed in this situation.

My family and I feel the numbness, but not any hate, nor any bad feelings toward anyone. I saw a judge and five lawyers who could hardly speak after it was all over.

Mr. Bonem, whom I have known and respected as a man and a lawyer for many years, said in his closing statement, not for the grace of God, we would be trying a murder case instead of sex crimes... But for the way the system has worked - or failed - in this case, he would be right and there would be no trial. You figure it out for yourself just who really is guilty.

It started back in 1973. Deon took a girl, at knife point, made her commit a sex crime, and got out on \$1,500 bond, at 10 percent, which was \$150. This was the first time that we had any reason to believe that anything was wrong. A few short weeks later, he entered a motel with a gun, made a man lie on the floor, raped a woman, then was sent to the New Mexico State Hospital for an evaluation. They said that he had problems, sent him back for trial, but to keep down taxpayer's expenses, they dropped six sex-related crimes if he would plead guilty to sodomy.

He was sentenced from one to 10 years in the New Mexico State Penitentiary. He got out in less than two years on parole - "Ready for society" - they said. His Parole Board and his Parole Officer said that there was no reason he could not go to bars and drink, yet all his crimes had involved alcohol. Then, 63 days later, we have a woman dead, a brutal murder, rape, kidnapping, the act of sodomy. They cannot pass the buck anymore.

The psychologist at the State Penitentiary said he did not have enough time to run all the tests that he needed to make a complete evaluation on Deon.

The reason for this was because he had several hundred other men to test and evaluate at the time, he had seen Deon some 25 to 50 times, and Deon repeatedly asked for help. Again, the buck was passed.

As a Deputy Sheriff, I have helped transport many people to the State Hospital. I know the deputies spend more time with the people than the doctors do. We would take them for a 90-day evaluation and two to three weeks later, we would bring them back. They had received no help during the time they were there for the evaluation, no matter how much they asked for help. Now, what do we have because of politics? We have a man on death row, we have a dead woman, and we have two children without a mother, and a very sad family of a man who is now sentenced to pay with his life for these crimes.

The sad part is, the police still have a long list of the people on the streets, who could and might commit the same crimes. How many of these people have knocked on the door for help, and have been turned away because it was cheaper, at the time, to turn them loose on the public than to give them help when they could be helped?

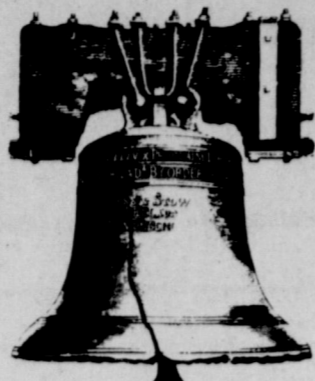

I think we would all be surprised at the money spent on this trial to pay for the expenses of all involved, when it could have been so much better spent on a few more tests when Deon first begged for help in 1973. The woman would now be alive, the children would not be without a mother, and my brother would not be awaiting execution on death row.

How can we prevent this from ever happening again? Not by sticking our heads in the sand like an ostrich, or by saying, "It will never touch me or my family." You are wrong if you think this will prevent an incident like this from happening again. Think what has happened - the life lost, the children, the man asking for help and not receiving it, the loved ones on both sides.....

Do you have any ideas that might prevent this happening again? If so, do it, or ask someone else what to do. This has touched all our lives, I want to see it never happen again, but I don't know what to do, other than write this letter. Please do me a favor; if you read this, send it to another paper and have them print it. Show it to a friend. The whole world has the same problem, and maybe someone has a solution to the problem. Whether you are a mother, father, sister, or brother, - stop - and think. You play a part - think - "This could happen to me, I am a part of it."

If you want details of how this all came about, please write to me, I will answer any letters. We must try to prevent this from happening again - not so much for my brother's sake - it may be too late for him - but maybe for your brother, or a friend, or a neighbor. We owe it

to the dead mother, her children, her family, my family, and especially to my brother. Sincerely, and with great regret, E.J. Melton R.R. No. 6 Box 6196 Juneau, Alaska 99803

You're doing without a Zimmatic center pivot. Saving your hard-earned capital for other improvements. Don't want to borrow right now. But it's costing you money every year you wait. Two ways. First, you're losing the extra crop production you get under irrigation. Second, inflation is at work. Boosting prices, dropping the value of your dollars.
Why not rent a Zimmatic under our new lease plan? Let the system pay for itself and put some extra money in the bank for you at the same time.
Our rates are reasonable. You can include freight, installation, pump... other "above ground" items in one flexible package, tailored to your needs. Why wait to irrigate? It's just costing you money. Call us today for details on our new lease plan.

C OF C HONORS JACK SCHUSTER... The Muleshoe Chamber of Commerce honored Bailey County farmer Jack Schuster by selecting him Farmer of the Year. Schuster (l) receives a plaque from Jerry Wenmohs, local ASCS office.

Sunflower Yield Is Good

BUSHLAND -- Although sunflowers did not fare too well in the 1975 market place, the new crop yielded well in dryland experiments at the USDA Research Center at Bushland. In an experiment conducted by Soil Scientist, Ordie R. Jones, maximum yield was 1,850 pounds per acre. The experiment was designed to determine the best plant population and planting date for different levels of soil moisture at planting.

Hybrid 896 sunflowers were planted on April 7, April 24, May 20, June 16, and July 15 at 10-, 14-, 18-, and 22-thousand plants per acre. Soil water contents at planting, adjusted in April to simulate wet, medium, and dry years were 7.0, 4.9 and 3.7 inches of plant available water in the top 6 feet of soil. Some of this water evaporated during the dry summer and late plantings had less soil moisture

than early plantings. Weeds were controlled in all plantings with a preplant incorporated application of Treflan at 1.5 pints per acre. Head moths were controlled at flowering on April and May plantings with three applications of methyl parathion at 0.5 pound per acre made with a high-clearance sprayer.

"My research showed that planting date and soil water content at planting had the greatest effect on yield, but plant population had little effect on yield", Jones stated. Highest yields were obtained from April plantings regardless of soil water content at planting. Yields from April 7 planting on the

wet, medium, and dry soil were 1,850, 1,590, and 1,500 pounds per acre. April 24 yields were 1,660, 1,590 and 1,300 pounds per acre. Yields declined drastically from plantings made later during the dry season. May 20 plantings produced 1,040, 1,110 and 990 pounds per acre on the three soil moisture levels. Plantings on June 16 and July 15 produced less than 800 pounds per acre regardless of soil moisture level in April.

According to the researcher, planting date had a big effect on seed oil content. Seed harvested from April 7 plantings contained 48 percent oil. Oil percentage dropped to 43 percent from

Southern High Plains. Sunflowers yielded 1,800 pounds per acre under ideal dryland conditions early in the season and down to 500 pounds per acre with very dry conditions later in the year. "If sunflower price stabilizes around 10 cents per pound, returns should be much greater than from other crops we can grow," Jones concluded.

A home town booster is a man who helps make his home town better as well as bigger.
