and the Empire went to pieces because the rulers attempted to have free bread and free circuses. And Rome didn't attempt to have free circuses for the people in the entire empire. The empire went to pieces even though it only attempted to have free circuses for people in the home territory.

Now we, under the Marshall plan are attempting to furnish more free tobacco for Europe than those in charge of European affairs even requested. Listen to these remarks of Representative Case of South Dakota as published in the gressional Record, I quote:

"In the requests that were made by the European nations . obacco, they asked for what? Fo about 247,000 metric tons . . . But what did the tobacco people in the Department of Agriculture think? Well, that is not enough. So they proposed to increase the allocations on tobacco, and proposed that instead of 240,000 (sic) metric tons we should provide 328,000 metric tons of tobacco. That was their estimate along the first part of the year. They revised it in March and made it 323,000 tons. ... But it makes me wonder when . . . the to acco proposed to be provided by the taxpayers of this country for other governments is increased by 80,000 metric tons on the sugan gestion of our own officials . . ### **Light Mystery** Still Unsolved

ALICE -(A)- The mystery of Alice's strange light in the sky was still unsolved today-but a pilot who spent some time looking for it believed it was nothing more glamorous than the reflection of a tin roof on a high haze.
The light appeared Sunday and was still visible from the ground yesterday. A Navy flier from Cor-pus Christi and a National Guard pilot from Houston went aloft to hunt it.

On landing, both told J. M. Paschish, chief of the Civil Aeronautics Administration communications station here, that they could find nothing in the sky resembling the mysterious light. Neither told Paschish his name.

### 'Electric Nerve' Aids Polio Victims

A new "electrical nerve," which acts as a substitute for human nerves affected by infantile or other paralysis, is demonstrated at the first international polio conference in New York. The device generates mild electric currents which replace lost nerves. They cause muscles to tense, swell and relax the same as they do in mild exercise. This helps to restore limbs wasted by polio. The "electric" nerve was developed by General Electric engineers and the G-E X-ray corporation.

Just go to your druggist and ask for four ounces of liquid Barcentrate. Pour this into a pint bottle and add enough grapefruit juice to fill the bottle. Then take just two tablespoonsful twice a day. ness is giving the people the kind of entertainment they want, said Palumbo, who owns six night clubs and restaurants in Philade Right now he thinks the people

are shopping for night club en-tertainment every bit as sharply as they do for their dollar's value in food or clothing. society you just don't crash with a new bank roll. Palumbo has given blood trans fusions as well as dollars. He is easier to hit than a radio giveway program. As the whim seizes him, he passes out watches, pen and pencil sets, cases of liquor, perfume, gold rings, bracelets, and

television sets for orphanages.
"I get my chief pleasure out of life in seeing people enjoy themselves," he says. His favorite beverage is a soft drink.
