Egypt And Israel Brand Sisco Trip To Area Failure WASHINGTON (AP) - The

Nixon admienistration is weighing what Mideast peace move to try next in the wake of an inconclusive visit to Israel by Assistant Secretary of State Joseph J. Sisco.

Aides said Sisco, who returned Friday night after a week of talks with Israeli leaders, reported to Secretary of State William P. Rogers over the weekend and probably will be received by Presidest Nixon next week.

Sisco was said to have found the Israelis still interested in a peace settlement but, like the Egyptians, still standing by their basic terms for reopening the Suez Canal and waiting for more concessions from the other side.

One of the U.S. options now would be another approach to Cairo aimed at promoting movement in the Israel-Arab divisions. Another is for Rogers to take up the question with foreign ministers attending the U.N. General Assembly opening this fall.

By coincidence it is now just a year since Rogers' stop shooting-start talking Mideast peace initiative took effect. U.S. strategists are pleased that the cease-fire still holds, but are not so happy about the slow

Scientists Hail Apollo 15 Flight

ABOARD USS OKINAWA (AP - Apollo 15's astronauts splashed safely into the Pacific Ocean vesterday afternoon with only two of their three parchutes opening properly to end a 12 day mission to a moon mountain valley.

They returned with a rock chip they believe is part of the original lunar crust and with the first detailed photos of the hidden side of the moon.

Apollo 15 landed within about seven miles of their recovery ship.

Apollo 15 splashed down at 4:46 p.m. EDT-right on time.

Astronauts David R. Scott. James B. Irwin and Alfred M. Worden reported moments later that all was well aboard the craft.

"Everybody's in good shape," said Scott.

Aboard their command ship Endeavour are science materials which are expected to take scientists years to completely understand. This includes a crystalline rock which may be part of the moon's original shell and the most detailed photos yet of the back side of the moon.

Endeavour came home to almost perfect weather and landed almost precisely on target, about 330 miles north of

The only flaw in the return to earth was failure of one of three main parachutes to deploy properly. However, the shutdown by its double-wham- with only a single chute and the

Mrs. Clyde Ferguson of Pampa and Grover S. Grimes, Sr. of Arkansas City, Kansas, were united in marriage July 25 in the chapel of the First Baptist Church of Borger, with Rev. Joe Dee Ray, pastor, officiating for the double-ring ceremopny.

Miss Rhonda Bond of Ardrews was the maid of honor. Larry Taylor of Pampa was the best man. Miss Kaye Lyn Janeway of Borger was the flower girl and Buddy Porterfield of Amarillo was the ring bearer. The bride was given away by her father.

The organist, Mrs. Harold Hasse of Borger, played "'Trumpet Voluntary'' as the processional and "A Mighty Fortress Is Our God" as the recessional, and also accompanied Andy and Phil Dietz of Borger in three songs. Phil sang "The Twelfth of Never" and Andy sang "If Ever I Would Leave You." They then joined in the prayer song "The Voice That Breathed O'er, Eden" at the conclusion of the ceremony. The Dietz twins also served as ushers.

The bride's dress was chiffon over peau satin, with Victorian neckline edged with reembroidered lace. Sheer yoke with lace applique was accented

defined by re-embroidered lace and closed with a row of pearl buttons in the back. Long full sleeves of chiffon had lace wristbands were trimmed with lace ruffle edgings. The A-line skirt, with lace-edged panel in front was centered with appliqued lace, rhinestones and seed pearls, and bordered with re-embroidered lace, swept to extra-length and fullness in the back.

She wore a tiered veil of silk illusion, floor length, and attached to a side-effect headband of lace roses, accented with rhinestones and seed pearls. Her bouquet was white rose, surrounded by gardenias and greenery, with white ribbon streamers.

Miss Bond wore a streetlength dress of green dotted swiss, over a lime-green lining. which had an Empire bodice, a bow-trimmed neckline, and short cape sleeves. Her veil was of green silk illusion, shoulder length, and attached to a taffeta

PAMPA DAILY NEWS PAMP, TEXAS 45th YEAR Sunday, August 5, 1971

The Bampa Daily News

A Watchful Newspaper EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BETTER PLACE TO LIVE **Our Capsule Policy**

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capability.

The News believes each and every person would get more satisfaction in the long run if he were permitted to spend what he earns on a volunteer basis rather than having part of it distributed involuntarily.

Sensing The News

By ANTHONY HARRIGAN

FUTURE OF RAILROADS Anyone who has any interest in the nation's transportation system knows that the railroads are vital to the well-being of the American economy. Informed observers also know that the railroad industry is in trouble because of decades of government intervention and union special privilege.

Citizens who want the full story of the plight of the railroads would do well to read the new book "Throttling The Railroads" by Clarence B. Carson (Foundation For Economic Education, 30 South Broadway, Irvington-on-Hudson. N.Y., \$2 paperback).

The seriousness of the railroad situation is apparent to anyone who reads newspapers or views television. Railroad unions, as Mr. Carson points out, "are perenially on the verge of striking and tying up transportation throughout the length and breadth of the country."

But that's only part of the story. The difficulties facing the industry stem from years and years of government intervention. In Mr. Carson's

1. Discouraged investment by limiting earnings and prescribing conditions of

only by harassing investors but also by making railroads ohanded down on June 22 by continue costly operations once

2. Discouraged innovation not prove that church people are healthier than non-church

Speaking in Canberra the headlong disintegration of why they should not be allowed

recently, he admitted that this American society. fact can be somewhat infuriating for authority, and used as an illustration his experiences of teaching in an American medical college, where he found it virtually impossible to control his class. After conceding that his teaching experiences made him "very angry," he nevertheless added that, if he were writing his book again, he would not change a thing in it.

Dr. Spock admitted that, in his book, he simply popularized the theories of Freud, and of progressive educators in the United States.

He claimed that progressive educators like John Dewey reasoned that you did not have to force children to learn, but rather that they were "wild to learn," and would learn naturally.

Dr. Spock saw much good coming out of the line-up of his pensive retirement system on the railroads. 7. Produced bankruptcies.

For world for that matter. It is

more detaialed information I almost unbelievable when you suggest you contact Evelyn get to looking at the statistics Christi Caller-Times carried a Mason or, jI have a copy of on the great job done by this column called "Elology Notes" some information I received segment of the economy. Many from our Grain Marketing of the products they are selling for the column was "Is the Specialist at Texas A&M that today are bringing little more I would be glad to share with and in many cases less when

they leave the farm than they formation in the column does were bringing fifteen years ago. not fit the Texas Panhandle, yet Recently we have had a lot CATTLE PRICES

of promotion by commercial Recent rains have not broken think about. We are carrying concerns on the above named the drouth over the state but a portion of the article: variety of small grain. This is they have dented the drouth. "In our highly-industralized a cross between rye and wheat Many places have received very and product-oriented society our and, most of the crosses are effective rains. Many of these lifeblood is still a very simple made with a spring variety of places have not had any cattle product: Water. Every person, wheat; therefore, the winter on them all summer and they adult or child, in the United hardiness of Triticale is not are presently being stocked. States requires some 1,650 very winter hardy. I have Light-weight calves have taken gallons of this precious liquid reviewed some information sent a sudden upturn in price even every single day. Industry and

over the state do not paint any feed lots at the present time. total water requirement is estuaries. The necessity of fresh glowing picture for this variety Many observers feel there willj utilized for drinking or direct water input into bays and of small grain for either pasture be an extreme shortage of food preparations; roughly one estuaries is only beginning to or grain. So, I would look before yearling cattle to place in the gallon per person per day. I leaped at some promotional feed lots from now throughout "Yet, despite this temendous

up by some people over the ppened is the fact that a lot is truly consumed. The water biological balance of our oceans nation, not only on this grain of cattle that would have gone we drink, the water we use to and the survival of the esdbut other grains in which you one grass in the spring of the wash our clothes with, the tuaries is imperative to the read a big success story. Dr. year, had it not been for the water needed for cooling in- ultimate productivity of the Kenneth Porter at Bushland has drouth, went into the feed lots dustrial processes, the water oceans. probably done more work in the instead. We see no let up in sprayed on land for irrigation development of a Triticale the spiraling price of these of crops, all this water is flows into the oceans must also variety than anybody in the light-weight cattle if good rains

until some promoter that came parts of the state and finally people will think less of buying as are produced in many inalong, that this variety of small break the drouth. If we have higher prices steaks. The fifty dustrial and commercial grain has been pushed. Dr. good wheat pasture conditions dollar barrier in dressed beef operations. Rivers and lakes Porter has this to say about over the Panhandle this fall, has ben broken and I think unfortunately, are not only used this small grain variety. He you will see some of the highest your next stop will be fitty-five as suppliers of fresh water, but says, "In clipping tests at priced calves you've ever seen dollars and on up to sixty in often are considered the Bushland, Triticale 208 and I'm talking about forty the long run. This is not to- cheapest disposal systems produced more early forage dollar cattle, weighing in the say we won't have a few sharp available. The finding of high than wheat but stands were four hundred pound bracket. We drops temporarily but, I think levels of mercury in such severely reduced after the first have this now but I think you over the long pull and since pelagic fish species as tuna and clipping, and total production will jse some cattle weighing World War II beef prices have swordfish and mammals such was low. Another test sown over four bring from forty-five pretty well moved with the as seals illustrates dramatically at Bushland in the Fall of 1970 to forty-six cents a pound. This inflationary spiral. This is not the long-range and widespread

Panhandle Water

By FELIX W. RYALS (recycled in nature and is used On July 1, 1965 this columnist and reused again and again made his first trip to the Texas Ekentually, the water which Panhandle. Every now and then percolates through our in-I do some reminiscing about dustrial society finds its way that trip. After passing through into oceans. Solar energy Wichita Falls, I observed that shrinking the oceans' surface the vegetation became more evaporates some of this water scarce and the soil more and in the form of clouds it barren. On crossing the Pease is carried over the land and River and forks of the Red descends in the form of rain River, 1 also observed dry or snow. This process has been riverbeds. I gadually became going on for eons, and convinced that over the by gone statistically speaking, every centuries this area had received earth inhabitant receives about 30,000 gallons of fresh water The big blizzard that hit the every single day.

Texas Panhandle the last week "So, are we running out of of March in 1957 ended a seven fresh water? Hardly. The over until 1970. Official weather problem is one of distribution year drouth. That drough was and pollution. While certain driest year on record since 1889. regions of the earth receive reports now list 1970 as the large amounts of fresh water, Last Sunday the Corpus others like Corpus Christi and the Coastal Bend are rather deficient in rainfall. In addition. by Dr. Hans Suter. The caption the rainfall in our area is highly sporadic. During the last 10 World Running Out of Fresh years the wettest year had over Water?" Some of the in-40 inches of rain while the driest year had less than 15 inches. On the average we it does give us something to receive 28.34 inches of rainfall every year. Using this figure and the area within the city

(roughly 100 square miles) we every year.

"Although we do not collect ficials. this rain water in cisterns or other devices, the runoff from me by our Small Grain though they were already agriculture need 1,500 gallons other devices, the runoff from Agronomist, R.J. Hodges, down considered very high before the and municipal uses account for the city streets fulfills an imat Texas A&M and would say recent rains. Yearling cattle are 150 gallons of water per day portant role in the fresh water most of the experiment stations hard to find to place into the Only a small amount of the balance in our bays and be recognized by the public Estuarine areas are extremely

WE CALL IT A Hideaway Water Heater but not because we're ashamed of it.

Electric water heaters have no flues . . . don't need to be vented to the outside of the home. And this gives them a hideaway story all their own. They can be installed anyplace . . . in the bath, in the kitchen . . . hidden away where a great part of the hot water action is ... even in the laundry. Ask us about electric water heating for your home.

We sell, service, guarantee, install and finance electric water heaters.

ELECTRICITY ... IT DOES SO MUCH GOOD FOR SO MANY PEOPLEI

regrowth after grazing was where some unions are ing. measured. Triticale produced receiving from one-third to as little forage and stands were much as forty-two per cent reduced severely. In these High increase in wages. Plains tests, all the Triticale It looks to me like another varieties had a spring growth round of inflation, bigger than habit. Winter hardy varieties we have ever seen before. With may perform more favorably." this much increase in wages, So, I don't think we have any other prices have to follow miracle in this variety of small because you never get a grain and I would not fall for corresponding increase in efany promotional schemes by ficiency in anything except people more interested in a agriculture. I'm not informed profit than they are in your enough to know where this thing will end but, to me, it is very pasture We congratulate County Judge obvious that with the extreme

nesday

Bonnie Hogan.

fallen, setting records or near records in South and Southwest Texas. Director John Hutchison of the Texas Agricultural Extension Service said many crops were ready for harvest and that damage could be heavy.

The rains will greatly benefit ranges and leave moisture for planting late crops and give hay a chance to produce badly needed forage. Local flooding was being reported. Runoff has been ditions:
