New highway bill will create 20,000 Texas jobs

By The Associated Press

DALLAS - The Senate override of President Reagan's veto of the highway bill frees up \$850 million in federal funds for Texas highways in 1987, state officials said Thursday.

That money will support about 20,145 jobs in construction and related activities, said Marcy Goodfleisch, spokeswoman with the State Department of Highways and Public Transportation in Austin.

It also may mean that Texans will be able to drive 65 mph on some highways by mid-summer, she said.

The Senate overrode Reagan's veto by a vote of 67-33, as the president failed in a last-ditch bid to persuade enough Republicans to support him in a high-stakes showdown with congressional Democrats.

The tense roll call came after Reagan had spent nearly two hours in the Capitol in private meetings with Senate Republicans, urging them to sustain both the veto and, with it, his political prestige.

With its two-thirds majority, the Senate thus joined the House in enacting the bill into law over Reagan's objections. The House voted 350-73 Tuesday to override the veto Reagan made last week.

"We've been waiting for two days," she said, referring to congressional action. "Reaction in the whole department has been very positive because we know we can go to work on projects that are now needed."

She said estimates are that 23.7 jobs are created with every million dollars spent on highway projects. The department will begin letting contracts almost immediately.

"We have been postponing projects for a while now and as early as December started using some major state dollars for these projects that would have been let by federal dollars," she said, citing the new bridge in Baytown in Southeast Texas as an example.

The bill permits states to raise the speed limit from 55 to 65 mph on most stretches of interstate highways and earmarks more than 100 highway demonstration projects tailor-made for individual lawmakers.

The 65 mph limit would apply to 2,422 miles of Interstate highways in Texas, but not to 704 more-urban miles. Trucks would be allowed to drive only 60 mph during the day and 55 mph at night, Ms. Goodfleisch

Ms. Goodfleisch said the state highway commission must await the new regulations from the bill and set a public hearing before it can vote on whether to raise the speed limit on some highways. Legislative action, she said, is not necessary.

The override vote pitted U.S. Sens. Phil Gramm and Lloyd Bentsen of Texas. Gramm, a Republican, voted to sustain the veto, while Bentsen joined his fellow Democrats in favor of the override.

"This is a victory both for Texas and for pay-as-you-go

government," Bentsen said in a prepared statement. The bill includes a Bentsen amendment that closes a loophole in the 85 percent guarantee program.

He said the bill will mean an additional \$580.2 million for Texas during the next five years "over and above what we would have gotten otherwise. It would have been in jeopardy had the President's veto been sustained." Bentsen said.

Gramm declared, however, that "pork won this battle, but it will not win the war."

In a telephone interview from Washington, Gramm said the bill "clearly is a budget buster" that allocates money on a "pork-barrel formula."

"Finally, the bill cheats Texas," said Gramm, "because this bill gives money to Boston, Mass., as a going-away gift to (retired House Speaker) Tip O'Neill and for a mass transit system in Los Angeles."

U.S. could see another Vietnam

By SCOTT BRUMLEY News Staff Writer

The United States faces the possibility of a conflict similar to the Vietnam War, if arms shipments to Central American nations continue, photojournalist Dith Pran said during an interview Thursday.

Pran's experiences with The New York Times correspondent Sydney Schanberg during the war in Cambodia inspired the movie "The Killing Fields." Pran said wars like the conflict in Indochina are perpetrated by superpowers who, too often, send arms to nations he characterized as "their puppets."

His experience during the Cambodian conflict, especially the images of Dith Pran the suffering of victims of the war he saw while working with Schanberg, gave Pran a distinct insight into world, he said.

Foreign students go beyond stereotypes

Mark D. Rentz Guest Columnist

EDITOR'S NOTE: The author has granted reprint of this column, which originally ran in the Feb. 16, 1987 issue of Newsweek. Texas Tech's current enrollment consists of 792 students from foreign countries. As such, the column has a lot of bearing on the Tech community's attitude toward those students from other lands.

Rather than viewing foreign students has taking a free ride in an American institution of higher learning, American students should welcome the contributions of these students.

Last year, after we invited my foreign students to dinner, my wife and I were astonished to learn that we were in all likelihood breaking bread with future world leaders. One of my students, Khaled, in replying to another student's question, mentioned that his father had been president for five years.

"Of what company?" I asked. "Of my country," he replied. His wife nodded, adding, "President Abdullah al-Sallal, Khaled's father, is commonly referred to as having given birth to North Yemen."

From around the table came other foreshadowings of greatness: architects from Thailand and Mexico pursuing postgraduate degrees; the fifth- and 57th-ranked undergraduate students in all of Tunisia; a Japanese educator; a brilliant and highly awarded Korean opera singer; the daughter of an Egyptian national assemblyman. That night I realized the possibilities of international diplomacy and envisioned a blockbuster sequel to Dale Carnegie's best seller — "How to

Win Friends and Influence Nations." According to Lawson Lau, author of "The World at Your Doorstep,"

one-third to one-half of the world's top positions in politics, business, education and the military will be filled in the next 25 years by foreign students attending colleges and universities in the United States. Some of the puzzled and bewildered and sometimes unimpressive-looking sojourners in our dorms, cafeterias and classrooms may one day assume national responsibilities in their countries. How we treat them now could have lasting global consequences.

The next time you see a friendless foreign student, just remember that the presidents, prime ministers and princes of the following studied in our own backyard: El Salvador (Jose Napoleon Duarte at Notre Dame); Philippines (Corazon Aguino at College of Mount St. Vincent, New York); Mexico (Miguel de la Madrid at Harvard); Zimbabwe (the Rev. Canaan Sodindo Banana at Wesley Theological Seminary, Washington, D.C.); Malawi (Dr. Hastings Kamuzu Banda at University of Chicago and Meharry Medical College in Tennessee); Sweden (Ingvar Carlsson at Northwestern); Greece (Andreas G. Papandreou at Harvard); Jamaica (Edward Philip George Seaga at Harvard); Belize (Manuel Esquivel at Loyola); Iceland (Steingrimur Hermannsson at Illinois and California Institutes of Technology); and King Birendra Bir Bikram Shad Dev of Nepal (Harvard).

Although most foreign students are satisfied with their academic experience in the United States, many also have said that they hate America because they feel that Americans don't know or even care if they exist. For example, in a study published in 1976, 40 percent of the 247 foreign students surveyed at 38 Southern universities felt "unwelcome, lonely, and isolated," and the situation is not much different in the North. One of my

foreign students, representing the view of many, made this damning ovservation: "Americans are very friendly, but they don't make good friends."

Since a number of foreign students had asked me for advice on how to make friends with Americans, I helped develop a program in the English language and culture division which seeks to pair foreign and American students for an hour or so a week of friendly conversation. The first time we tried to run "Conversation Partners," we were inundated with requests from foreign students who were willing and wanting — but mostly had to wait because we couldn't attract enough American students. We finally contacted church groups and communityservice organizations so our students could meet face to face and on a regular basis with average Americans.

Making a foreign friend is really one of the easiest things in the world to do. They don't necessarily need us to do things for them, they just need us to do things with them. They are, by and large, courteous, ambitious, bright and sociable. According to the Institute of International Education, they are unmarried (80 percent), male (70.7 percent) and supported by personal or family funds (67.1 percent). Almost one out of five is working toward a master's degree; one in 10 is enrolled in a doctoral program. They come from 187 different countries and all 343,777 of them are spread across the United States. Alaska has 234 international students.

Making a foreign friend is easy, but turning a foreigner into an enemy is apparently easier still. Stereotypes abound, but not every Arab is a terrorist from Libya or Lebanon and not every Asian is

responsible for our country's trade imbalance. What a great irony it is that we alienate on our own soil the citizens of nations we journey great lengths to influence.

The U.S. government anually allocated \$15 billion, divided almost equally into military and economic aid, to foreign countries. To add a personal touch, we have sent, since 1961, more than 120,000 Peace Corps volunteers to 92 nations. Yet when we entertain strangers in our midst, instead of saying, "Welcome to our home," the words many foreigners seem to hear, expressly or not, are "Go home."

Apparently we did not endear ourselves to Lt. Col. Mengistu Haile Mariam, who trained at the Aberdeen Proving Grounds, a U.S. Army ordnance base in Maryland. After he seized power in Ethiopia, Mengistu expelled more than 341 American military men and civilians and signed cooperative accords with the U.S.S.R.

The strategic possibilities of forging friendships with foreign students are so beneficial that Richard Berendzen, president of American University in Washington, D.C., has advocated increased government support for international education. The "future leaders of the developing world," he has said, not only will get a diploma in the United Stated but also will gain "some understanding of our culture ranging from our form of government to our sports, from our TV to our food, from our business life to our spiritual life." The political benefits are obvious. The next wave of world leaders is here. Influence the world; go out and make a foreign friend.

Mark D. Rentz teaches English in the department of international studies at Arizona State

SMU leaders contemplate 1988 football

DALLAS (AP) - Southern Methodist Interim President William Stallcup said Thursday he will decide within the next few days whether to scrap SMU's 1988 football season.

"I haven't gotten all the information I need to make a decision," Stallcup said after a meeting of the interim executive committee of the board of trustees. "I'm trying to keep an open mind till I get all the facts."

The NCAA has banned SMU's 1987 football season and, among other sanctions, limited the Southwest Conference school to seven road games

Officials investigate fat removal death

HOUSTON (AP) — State and county officials are investigating the death of a woman who underwent fat removal surgery at a Pasadena doctor's clinic a few days before she died.

Patricia Howell, a 39-year-old florist living in Baytown, became ill a day after she had a suction-assisted lipectomy Friday at Dr. Hugo Ramirez's clinic near Houston, officials said.

Howell died Monday night at St. Luke's Episcopal Hospital in Houston where she had been transferred earlier in the day, officials said. Autopsy results on the woman were not yet available Thursday.

Fire, smoke traps 54 Canadian miners

MURDOCHVILLE, Quebec (AP) - Fire and smoke trapped 54 men overnight in a copper mine directly under this one-industry town and one man died, officials said Thursday. Most took shelter in a lunchroom 2,600

The one miner, who had survived previous accidents, was felled by smoke and died before he could reach one of the underground lunchrooms that double as emergency shelters.

The TWU Board of Regents voted vent students from drinking because Wednesday to allow alcohol on cam- they can consume it elsewhere, she pus for the first time in the school's said. history, said Glenda Simmons, vice Other arguments for the policy president for student life.

Under the new policy, alcoholic hibition was out of step with other drinks will be available at the state universities. The average TWU clubhouse of the TWU golf course and student is 30 years old, well above allowed in dormitory rooms of drinking age, and a more liberal students who are at least 21, said policy was viewed as easier to Simmons.

Organizers of student functions can apply to have alcohol served at their gatherings and members of the community may serve alcohol at campus events, such as wedding receptions.

The new policy also allows faculty groups to serve alcohol in a "private club environment" on campus, Simmons said.

There was only one vocal opponent: At a subcommittee meeting, regent Fran Chiles of Fort Worth, armed with several newspaper articles and statistics on alcoholism, strongly protested the proposal.

"I think we should take a stand not to let this insidious, deceptive drug on campus," Chiles said.

The full board approved the measure 6-1, with Chiles dissenting.

Friends, family gather to mourn Martin's death

By The Associated Press

LOS ANGELES — Dean Martin and his family gathered with friends Wednesday to remember the entertainer's son Dean Paul Martin, the actor-pilot killed with another flier during a California Air National Guard practice mission.

The private 25-minute military service at Los Angeles National Cemetery in West Los Angeles included a fly-over in missing-man formation of planes from the 163rd Tactical Fighter Group, the unit in which Martin was a captain.

Among about 200 people attending the service were longtime show business friends Frank Sinatra and Sammy Davis, Jr. and Martin's former comedy partner, Jerry Lewis.

Security guards kept reporters about 200 feet away.

Also attending were Lucille Ball, her husband, Gary Morton, and her son, Desi Arnaz Jr., comedian Milton Berle, composer Henry Mancini, actor-singer Shaun Cassidy, Danny Thomas and Martin's former wife, ice skater Dorothy Hammill.

Martin was eulogized by actor James Woods, who told mourners he talked by telephone with his friend the day before he was killed, and quoted him as saying:

"Jimmy, the proudest achievement of my life was to bring Alex into this world. ... If I die today, because of Alex, I would die a happy man." "Alex" referred to Alexander, Martin's 12-year-old son by Olivia Hussey, his first wife. The youngster watched his father take off the day of the fatal flight.

Meanwhile, recovery teams continued searching 90 miles east of Los Angeles for remains of Martin, 35, and weapons officer Ramon Ortiz, 39, of Las Vegas, Nev., whose jet crashed March 21 in the San Bernardino

The F-4 Phantom jet, one of a group of three on a practice run, catapulted into a rugged 70-degree-slope mountainside 10 minutes after takeoff from March Air Force Base near Riverside.

The plane disappeared from radar shortly after an air controller ordered the pilots to turn to avoid 11,502-foot Mount San Gorgonio.

Martin carved out his own career in the entertainment field starting at age 14, when he formed a rock 'n' roll band with Desi Arnaz Jr. and neighbor Billy Hinsche. They had a hit single, "I'm a Fool."

A professional tennis player who made his way to Wimbledon, Martin later went on to star in the 1979 movie "Players" with Ali McGraw. He starred in NBC's "Misfits of Science" last year and most recently in a soon-to-be-aired episode of Home Box Office's "The Hitchhiker."

Also Wednesday, it was learned that Dean Martin's daughter-in-law, Carole Costello, a daughter of comedian Lou Costello, died Sunday of a

Rodriguez, an eight-year booth

"Oh, please, I've just got to turn in In a world where green means go, this one paper," is the excuse heard most often by Vicky Hoeffner,

Rodriquez said she often hears the Driving is restricted on campus line "I'm not a student, but I need to go see my advisor." Thinking that the two statements do not mesh, she said she asks how long they think the advisement will take and gets the

"Come on," she said with a laugh,

Some will take desperate measures to get on campus, completely disregard the guard in the booth, and courageously blow past the entry station with a determined goal to drive on campus.

"When someone does that I call the station they are headed towards and get them to stop them," Gschwend But does this stop people from con- said. "If they are really rude about it, I'll call a patrol car to get them."

Working in a booth, as opposed to issuing tickets, has several advantages for the women. Equipped with phones and heaters, the stations have all the comforts of home. Well, almost all the comforts of home.

Resorting to creative measures, entry station guards have found that the cold weather outside the warm booth provides a good refrigerator for drinks. When a guard needs to take a quick break for obvious reasons, a push of a button on the phone solves the problem, and a replacement is sent to man the booth.

Another reason the women like to gives tickets and has cars towed.

"People yell 'get a real job' when booths each month for a change of angry, they should remember — it's a

Wet vs. dry

Colleges loosening drinking rules

By The College Press Service

FLAGSTAFF, Ariz. — After a few years of prohibition, some Northern Arizona students can drink again on campus.

If they go through a training program first.

At Alabama, fraternities will be able to serve alcohol at parties again, though only if they build six-foot permanent fences around the party areas and have ID checkers at the entrances.

At Lehigh in Pennsylvania, greeks adopted a strict new policy of identification checks and "closed party weekends" in order to retain some of their student drinking privileges.

And so it has gone across the country. The pendulum that in 1985-86 forced hundreds of colleges nationwide to ban student drinking outright has in recent months swung back to allow some limited amount of drinking.

In Arizona, for example, each of the three state universities "now allows the consumption of alcohol in limited circumstances in dorms, but no sale of liquor on campus," said Glenn Brockman, associate counsel for the state board of regents.

Worcester State in Massachusetts last winter let the campus dry pub go wet again, providing it can maintain its own liability insurance and liquor license.

The reason is that outright liquor bans have proved too rigid in some cases.

The University of Nebraska at Lincoln, for one, almost had to pull out of hosting Gov. Kay Orr's January 9 inauguration because it officially banned liquor from campus.

The regents relaxed the prohibition for the occasion, despite one regent's fear the move would "give students a foot in the door" to modify the policy permanently.

"When you let (students) drink at 19, then suddenly they can't it's difficult for them to adapt to," observed Andrew Smith, director of the Texas Union in Austin, which runs a tavern on the premises.

A new law that pushed the legal drinking age from 19 to 21 as of September 1, 1986, "eliminated a lot of patrons from what is a large tavern," Smith said.

His solution was to "divide it. Remodeling (of the tavern) into alcohol and non-alcohol sides will be completed this spring," he reported.

Though campus drinkers are getting a little more leeway, no one expects the old days of lax drinking policies to return soon.

"Thanks to MADD (Mothers Against Drunk Driving) and similar groups, there's lots of awareness of drinking issues," explained Rick Brandel, Northern Arizona's associate director of student life. "Students recognize these issues and are looking for alternative activities to drinking."

In addition, in 1984 Congress ruled states must raise their legal minimum drinking ages to 21 by 1988 or risk losing up to 10 percent of their federal highway funds. Only a handful of states have failed to comply.

"The de-emphasis on alcohol will continue as a trend as people realize it's not fashionable to drink to excess," predicts Andy Bowman of BACCHUS, a national group aimed at controlling student drinking.

"In states that raise their drinking age to 21, students who previously could drink legally in bars feel left out, so we'll start a trend toward more and more non-alcoholic bars."

Some Texas students are trying to convince owners of popular off-campus nightspots to lock up their liquor one night a week and open their doors to underage students, BACCHUS's Bowman claims.

Other colleges also are using "dry" nightclubs and other incentives to curtail illegal drinking among underage students.

Last spring, Penn State and Maryland, among many others, opened dry bars offering alcohol-free drinks and live music several nights a week.

One Northern Arizona dorm director founded a "high society" club aimed at teaching students it's "okay not to drink," Brandel said.

"There's still abusing drinking behavior on campus."

"There's still abusive drinking behavior on campus," he added. "But there seems to be a growing trend among students to be responsible in their drinking behavior and to recognize their drinking problems."

Individual houses and whole greek systems in Princeton, Ohio State, Penn State, Missouri, Idaho, Washington, Stanford, Florida and South Carolina, among many others, have adopted dry rushes during the last year.

But greeks themselves have no choice. In December, for instance, a federal court said Villanova could be held liable for an off-campus auto accident related to an off-campus frat party at which minors illegally were served alcohol.

"Schools know that presuming no control over greeks puts them in no better liability position," Bowman added. "So greeks are doing more to safeguard themselves."

Domestic duties: Do they pay?

John Moretti Guest Columnist

In an effort to maintain a healthy cumulative GPA during a heavy final semester at Texas Tech, I recently resigned a fulltime job I'd held for some five years. My wife works part time and is carrying a fairly stout class load herself, and in the interest of both chivalry and a happy marriage, I volunteered to tackle all daily domestic duties 'til semester's end.

There are some important lessons I've learned as an apprentice homemaker which may help one survive, should one be so unfortunate as to land a tenured position on this endless treadmill:

- Watching "Lifestyles of the Rich and Famous" is not as thrilling as one might imagine.
- There is no practical method for staying ahead of Lubbock's intolerable and endless dust.
- Potato peelers are highly efficient tools for removing excess knuckle skin

- Pots and pans have handles for a good reason.
- By the time the housework is done, the grass will have grown at least ten inches. By the time you knock down the lawn, there will be at least three dirty dishes in each room of the house.
- If not let out on a continual basis, the cat will pee on a favorite item of your spouse's.
- If left unattended, the dog can chew through the leg of almost any kind of furniture, whether it's made of high-impact plastic, hardwood or titanium-coated steelmesh.
- Taking a midday nap will not make chores go away and will make your mouth taste like topsoil.
- The diuretic effects of consuming too much coffee will last long after you stop drinking it.
- Pouring liquid bleach directly onto clothing will turn that clothing white, no matter what color it started out as.
- Afternoon cartoons have metamorphosed into serialized plugs for super-hero actionfigures, dolls and sugar-coated breakfast cereal.
- Door-to-door salesmen and other pests only show up when you're trying to get the dog's tail

- out of the vacuum cleaner.
 Telephone survey companies are alive and well and call at least
- are alive and well and call at least once per hour.
 It takes only three days to run out of clever excuses for not join-
- Paying utility bills will severely deplete your bank account.

brew."

hours.

ing the boys for an "afternoon

- Ignoring utility bills will result in a verbal flogging from both the utility company and your spouse.
- Every cleaning product lacks one key ingredient — elbow grease.
- Mundane and repetitive tasks may lead to humming commercial jingles.
- It is hazardous to pogo while
- unloading the dishwasher.

 All cooked foods dry to an impenetrable crust in less than two
- Food may explode if microwaved to excess.

My early enthusiasm for the job quickly wore off, and it was then I realized there was a correlation between the gritty details of housework and the steady boom in

career-minded young women. Who

can blame them? Even if this job

paid, it wouldn't pay enough.

Jazz drummer Buddy Rich dies of seizure at 69

LOS ANGELES (AP) — Buddy Rich, the legendary jazz drummer who began his career more than a half-century ago as a vaudeville song-and-dance prodigy, died Thursday. He was 69.

Rich, a self-taught drummer who played with Artie Shaw and Tommy Dorsey before starting his own band 21 years ago, had undergone surgery March 16 at the UCLA Medical Center for a brain tumor and had been undergoing daily chemotherapy treatment.

"He had just come back from having treatment, had a seizure, and they took him right back. He died at 1:45 p.m.," said family spokesman Jackie Green.

Rich's wife, Marie, and daughter, Kathy, were with him when he died, Green said. The exact cause of death was not immediately known.

At first it was reported the tumor was inoperable, but Paul Werth, a personal spokesman for Rich, said those reports were incorrect.

Rich was hospitalized a month ago in New York with paralysis on his left side. Physicians first thought he had suffered a stroke, and he was transferred to UCLA for tests.

Drink of the Week Green Thing

Recipe provided by bartender manager Russell Stevens, Brumski's, Austin.

- 1 oz. Bacardi
- 1 oz. Meyers Dark Rum
- 2 oz. pineapple juice 2 oz. orange juice
- 1 oz. blue curacao

Shake and pour over ice in 12 oz. glass; garnish with cherry.

Virgin Drink Pineapple Egg Cocktail

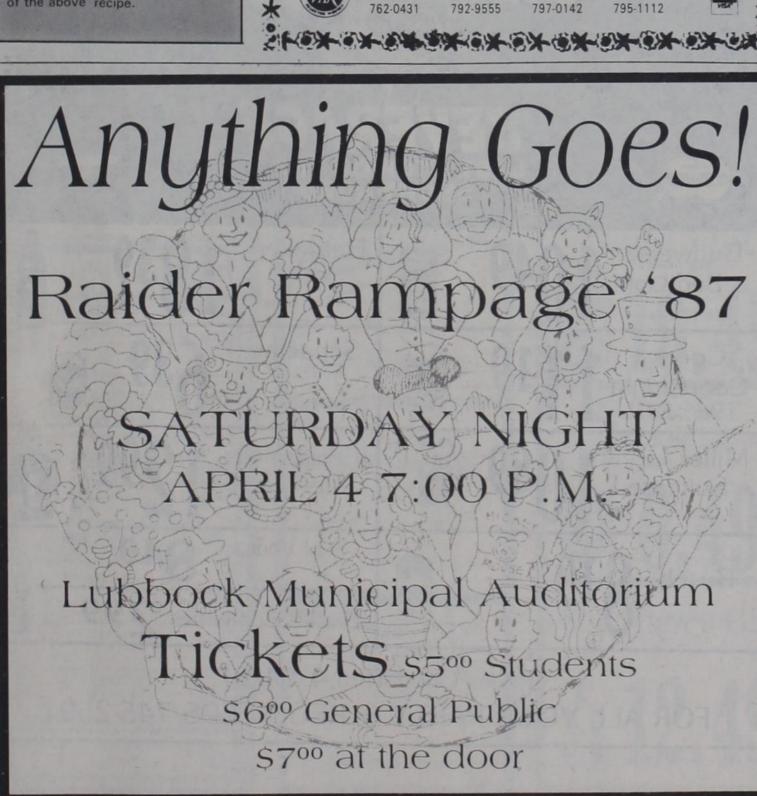

- 1 pint pineapple juice
- 5 oz. lemon juice 2 oz. sugar

12 oz. crushed ice

combine in a blender with 4 oz. cold water; blend at high speed until foamy; divide among several glasses filled with ice; garnish each glass with a cherry.

Editor's Note: The University Daily does not condone or recommend the abuse of alcohol; therefore, responsibility cannot be accepted for misuse of the above recipe.

Helping the homeless

Students spend break working in urban shelters

By MISSY COSTELLO Lifestyles Staff Writer

While most students were catching rays at the coast, lifts at the slopes or sleep at home, some 20 student members of the Texas Tech Wesley Foundation were working with the needy and homeless in New York City.

"The main objective of the trip was to see both the physical and spiritual needs of the people and help them," said Les Hall, coordinator of the trip. Hall, a Tech geology graduate, is currently serving as an intern at the Wesley Foundation.

Hall said the Wesley Foundation usually sponsors three mission trips anually, including two work projects in Bolivia and Haiti.

"I didn't want this to be just a work project," Hall said. "I wanted this to be a people project, for us to be working directly with people." The students' work in New York City was coordinated by the New York

City School of Urban Missions (NYSUM). "They had a full schedule for us," said Tom Taylor, a junior

mechanical engineering major who was a participant on the trip. "Some days we went to bed at 1 a.m. and got up at 7 a.m." The students worked in shelters in all five of New York's boroughs, per-

forming a variety of different tasks. "They (NYSUM) tried to get us exposed to different areas," Taylor

said. "They wanted to give us a total view," Hall added.

The group attended classes at the school each morning before they

began their work to aid in "cross cultural connections." "New York is not a melting pot like people call it," Taylor said.

"Distinct cultural areas are still intact and have been for over 100 years. "You have to learn to deal with each ethnic group; we had people teach us how to interact with these groups," he said. "Besides the classroom education, we also got a street education."

"It was all hands on experience," Hall said.

The group worked at the Bowery Mission, a 107-year-old organization that is the third largest mission in the world. They also answered prayer lines for "The 700 Club" and worked for the Coalition for the Homeless and with other organizations.

Wesley, which is a Methodist student group, worked with church sponsored and state supported organizatons. Taylor said church and state

organizations differed in their approaches to helping the hungry.

"There really was a big difference in the Christian sponsored and the state run organizations as far as the atmosphere," Taylor said. "The state supported shelters are trying to meet a quota more than people's needs. They don't do anything but get the bodies in the building. It was very impersonal; very cold."

"One aspect is that you could talk to the people (in the church supported shelters) about anything; they seemed more open and friendly," he said. "In the state sponsored agencies, the only thing you could do was hand them food."

The Wesley students spent one night handing out blankets in the subway stations to the people that lived there. Hall said that although the temperature outside was 40 degrees, people that live in the subway stations wear only jeans and a shirt, carrying their possessions in bags and sleeping on cardboard boxes."

"A lot of the people live in the subways because it's safer than the shelters," Taylor said. "In the shelters, they'd be asleep and get mugged or something.

"They actually felt safer on the streets. They respect each other's privacy there."

Wesley members had the opportunity to talk to numerous street people about their situation.

"I came in contact with this guy who was about to be thrown out onto the street," Hall said. "His rent was up in two weeks, and that was it. His wife was about to have a baby in about two weeks - he didn't have any

money or anything. "He couldn't believe the things that were happening to him. He said, 'I'd rather hang myself than have my wife have her baby on the street.' "It's really tough to see that — you're just there for a week. It makes a lasting impression on you."

Taylor said he met a man named Billy that had been pictured in a recent article in U.S. News and World Report on the homeless in New York

In the article, the man was shown in a wheel chair being carried out of a subway station to panhandle on the street. According to Taylor, Billy had one leg amputated when it became infected after repeated heroin injections.

"When you see things like that on the news, they seem impersonal; you get conditioned," Taylor said. "But when you actually meet these people

it really does change you."

"I thought, 'these people are no different than I am yet they are forced to live live this. This could easily happen to me."

Hall talked of another man they met working at The Bowery who at one time played for Stevie Wonder's band and was also fostering a \$2000 a day cocaine habit.

"The Bowery took him in, he went through their (drug rehab) program and now he works for them," Hall said.

Taylor and Hall said people who live on the streets strive to maintain

their sense of dignity. "Those people had a lot of pride," said Taylor. "They tried to tell you

they were all right. "Some people we talked to had (college) degrees — just for one reaon or another they had lost all their money. It's almost like once you get

down there there's no way to get out." Wesley members who participated in the programs expressed an optimistic view about the plight of the homeless.

"A lot of good comes out of people's efforts," Taylor said. He said that though the problem is far from being solved, at least lives are being made more comfortable.

"Those organizations really are effective because they do know the true

needs of the people," he said. Although New York City may seem far away, the homeless situation is

in no way removed from West Texas or Lubbock. "There are many needs and hurts on a large scale," Hall said. "In Lubbock, there are the same needs and hurts, but on a smaller scale.

"You don't see it if you're not looking." "Although here you don't see it as much, you also don't see organizations working to help," Taylor said. "There (in New York City) it seemed

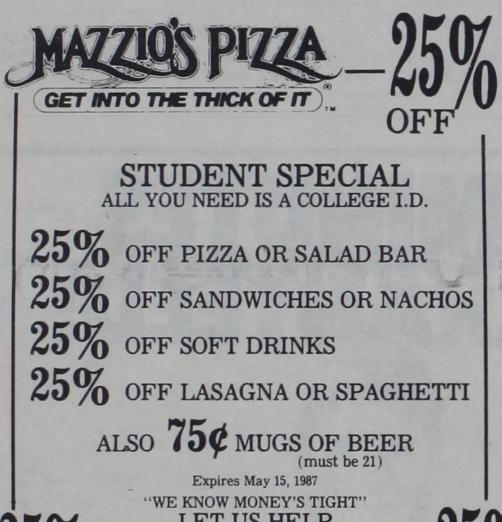

like there were a lot more solutions. "We just want to bring people's awareness up," Taylor said. "There are

still hungry people in Ethiopia, the news has just stopped reporting it." Hall said, "We want to raise awareness of the situation." Amy Robertson, a social worker for the Salvation Army in Lubbock,

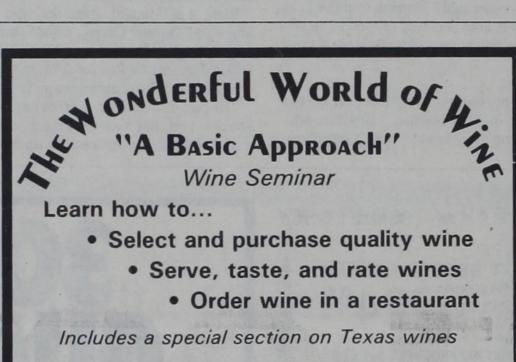

said estimating the number of homeless in Lubbock is not easy.

"It's impossible to determine how to estimate how many homeless people are in Lubbock," said Robertson. "The national estimate is anywhere from 250,000 to 3 million.

"A lot of people come through here that are homeless — they just travel from place to place. They don't have a home, but they like it that way.

Tech hosts front-running Hogs

By KENT BEST Sports Editor

If Texas Tech baseball coach Larry Hays could ask for any one thing in this weekend's three-game Southwest Conference series against Arkansas, it would be for the Red Raiders to be in each game from beginning to end.

year and 3-6 in conference play, has first-place tie with Texas in the only flirted with this season.

we've been fighting and battling all Raiders can halt the slide. the way.

toughness this weekend."

doubleheader is scheduled to begin that aren't hit that well." at noon Saturday.

Ragan

A situation that Tech, 16-15 on the in the SWC, is currently locked in a league standings. After a three-"I'd like to see our guys have game sweep by Texas A&M last some success this weekend," Hays week in Lubbock, Tech slipped to said Thursday afternoon. "We've sixth. Hays, who calls Arkansas a been trying, but I don't know if "great" team, just hopes the

"We know what to expect from "I'm looking for mental Arkansas," he said. "They're a great team with a lot of talent and a The Raiders will host the Razor- great tradition. Maybe my biggest backs in a single game at 2 p.m. to- worry is their team speed. They can day at the Tech Diamond. A beat out a lot of infield hits on balls

The Razorbacks, who have hit 593 Arkansas, at 24-7 overall and 5-1 singles thus far this season com-

pared to their opponents' 374, are led by senior catcher Andy Skeels' team-leading 107. Skeels, a .398 hitter, went on a tear against Houston last week, going eight-for-13 with 12 RBI and seven runs scored. In Saturday's doubleheader against the Cougars, Skeels knocked three homeruns, pushing his season out-

As a team, Arkansas is hitting .333 and .335 in SWC games. The Hogs have hit 30 home runs, 77 doubles and 24 triples so far this

Tech, which took a pair from nonconference rival College of the Southwest Wednesday, is near the bottom of the league standings in team batting at .295.

Stacy Ragan, a mainstay in the Tech offense early in the year, is struggling through a six-game slump, hitting just .143 in the process. Still, Ragan is hitting .402 going into the Arkansas series.

Hays said senior right-hander Bill season.

Shutt will start for Tech in today's game, with Mike Beiras (5-2) and Bret Marshall slated for Saturday.

According to Hays, his decision to start Shutt in the opener was an

"He's pitching well and if he's right he'll get some fly balls," Hays said. "Our starting pitchers have got to have a good series." Arkansas will counter with Ray

Harris (2-2) in today's game, while Spencer Wilkinson (4-1) and John Cebuhar (4-1) will pitch the doubleheader.

RAIDER NOTES: Second baseman Kevin Lowery and shortstop Dave Geck will return to the team Monday after a two-week suspension, Hays said Thursday. Lowery and Geck, both starters, were suspended for team rules' violations. Designated hitter Dan Spencer, third baseman Tommy Hernandez, and catcher Scott Drury were suspended for the

Raiders sprint to Austin primed for Texas Relays

By CURTIS MATTHEWS Sports Staff Writer

With expectations of warmer

weather than last weekend's meet, the Texas Tech men's track team will travel to Austin for the 60th Texas Relays today through Saturday.

Most of Tech's top athletes will compete, with the remainder of the team taking part in the McMurry Relays in Abilene today.

The relay events are always targeted as the main focus of the annual event in Austin, but Tech also has qualified three athletes for Saturday's invitational competitions.

Zach Gwandu, Carlso Ybarra and Keith Stubblefield will represent Tech in the invitational mile, steeplechase and 100-meter dash.

Ybarra will be one of the busiest Red Raiders competing this weekend. In addition to running the steeple, Ybarra was scheduled to run in the 10,000-meters on Thursday and is slated for the 5,000 today.

Tech has numerous individual and relay runners ready for Friday's competition. Wayne Walker and Leonard Harrison will run the college 100-meters with prelims slated for today. Last weekend at the Texas Tech Invitational, Harrison won the 100-meters in a time of 10.20. That time blew past the NCAA qualifing standard of 10.29 for the national meet held June 3-6 in Baton Rouge, La.

Tech will be represented in the 110-meter high hurdles by Lemuel Stinson, and will get help from Dodd Nolan and Lew Mays in the 400-meter intermediate hurdles. Nolan was another of the Tech athletes who turned in strong performances in the Tech Invitational. The sophomore from Dalhart won the 400-meter intermediate hurdles with a time of 52.60 despite persistant winds.

Devon Dixon and Chris Sims are scheduled for Friday's triple jump competition. In addition to the individual events, Tech will field teams for the 400-meter, 800-meter and 1,600-meter relay prelims today.

Women join men in 60th relay showcase

The Texas Tech women's track team will compete along with the Tech men at the Texas Relays Friday and Saturday in Austin.

The team will be paced by Debbie Rutkowski and Kim Mudie in individual events in addition to the relays. The 400-meter relay prelims will be Tech's first event at 9 a.m. Friday.

Rutkowski will take part in both the shot put and discus. Rutkowski has the Southwest Conference's third best throw in the discus (152-4) and the sixth best mark in the shotput (44-4).

Mudie is one of 13 runners invited to take part in a talented women's 5,000-meter run.

Without any jumping events scheduled for the women's competition, Cheryl Young will turn her efforts toward the relays, competing in the 400-meter, sprint medley and 1,600-meter relays for

Tech will have competitors in two finals events on Friday. Rutkowski will throw in the shot put finals scheduled for 7 p.m., and Georgianna Jones, Rita Webster, Amanda Ramirez and Lisa Zarate will comprise the Raiders' 3,200-meter relay team.

Golfers in position to advance to tourney finals

Netting a winner at Tech

Double trouble

Texas Tech's Annemarie Walson, left, and Cathy Carlson, above, prepare to return backhand volleys during workouts at Tech.

With 19-2 record in tow, women netters charting championship course in 1987

By CHRIS HOOTEN Sports Staff Writer

No, they don't receive a lot of air time from the local television or radio stations, and no, they don't get much print from the newspapers.

But yes, the Texas Tech women's tennis team does deserve all the above for compiling a 19-2 record thus far in the 1986-87 season and a 3-1 mark in Southwest Conference

The Red Raider netters have knocked off non-conference opponents Minnesota, 8-1; Utah, 6-3; Oklahoma, 6-3; Kansas, 7-2; Kansas State, 9-0 and Iowa State, 8-1.

In league play, Tech already has beaten last year's champion Texas A&M, 6-3, in College Station. The Raiders also have wins over Baylor and Rice in the nationally respected Southwest Conference.

Tech's two losses came against Indiana and Texas, who are currently ranked ninth and 15th, respectively,

in the ITCA poll.

With a win over league-leading TCU Saturday in Fort Worth, the Raiders could pop into the ITCA Top 25 themselves for the first time ever since their inaugural season in 1976.

Tech Coach Mickey Bowes, who is in his eighth year as the women netters' boss, said new-found confidence has been the key to his team's success this year.

"I don't think this team is particularly afraid of any team," Bowes said. "They want to play them all and that's kinda refreshing.

"In the past, we've had teams which were scared to death of the better teams in the league, but this team isn't that way," he said. "I don't believe they are going to be intimidated by anybody."

So far, the Raiders have avoided the intimidation and with only four conference matches left, Tech is sitting in good shape in third place in the SWC. The conference standings are determined by individual matches. The Raiders are 23-13, trailing first-place TCU (33-12) and Texas (38-16).

Before the season got under way, Bowes said his team would be good in the bottom half of the singles and in the Nos. 1 and 2 doubles. He believed that if the top half of the singles or the No. 3 doubles team gave some unexpected help, his squad could be "really good."

With his fourth through sixth singles players combining for a 40-3 record and the No. 1 and 2 doubles teams currently 16-1 and 14-3, respectively, Bowes looks something like a prophet.

Walson and Carlson's success in singles has been a pleasant bonus for Bowes, who has depended greatly on the bottom half of his singles

order. "They are always sorely tested at one, two and three," Bowes said. "There is a good No. 1 player for every team we play, and it's just a war up there at the top three."

Doubling Up

It's in doubles action where Tech has been winning a lion's share of its battles this season.

The No. 1 doubles team of Walson and Brigance has compiled a 16-1 overall record and 3-1 slate in SWC matches, while the No. 2 tandem of Carlson and Hrebec have a season

record of 14-3, 3-1 in league. "Our No. 1 and 2 doubles teams are quality teams and can play with almost any doubles team in the country, outside of maybe the top four ranked teams in the ITCA," Bowes said. "We've put three pretty good doubles teams on the court this vear."

More unexpected help is coming at the third spot from Roberts and Shannon Cizek, who have managed a surprising 13-3 record and 3-1 mark in the SWC.

"The No. 3 doubles team, which I thought at the beginning of the season was a real vulnerable spot for us, has done quite well," Bowes said. "They have played better and better doubles as the season has progressed and have achieved a good overall record."

Singled Out

At the No. 4 singles spot, Eva Ziegler, who will be returning to her home in Austria next year, has amassed a 15-1 record, the best singles mark for anyone on the squad. Ziegler is 3-1 in SWC action.

"Eva will be hard to replace next year," Bowes said. "She has been very solid at the No. 4 singles. She's very tough-minded, possibly the most mentally tough player on the team."

The No. 5 position has been handled by Lisa Roberts, one of only two seniors for the Raiders. At No. 5, she has a record of 14-1, second only to Ziegler's 15-1 mark. In league action, Roberts is 3-1.

"Roberts has done a very good job this year and she's been very solid at No. 5," Bowes said. "I count on a win there when she goes on the court."

Paula Brigance plays at the No. 6 spot and when asked who his most improved player is, Bowes is quick to point to Brigance.

"That's an easy one to answer," Bowes replied. "The most improved player on our team this year is Paula Brigance, playing at No. 6 singles.

"She's doing a good job there and the reason is because not often do you see a serve-and-volley player at No. 6," he said. "She is six feet tall, has a big serve and comes in to take over the net, and people playing at No. 6 don't see that very often.

That's a great advantage to us." Brigance has won 11 singles matches, while losing only one this year. Her attitude toward singles has changed from a year ago.

"I'm winning at No. 6 instead of just showing up," Brigance noted. "Coach is a motivator and he wants you to give 100 percent. And if you don't, you're going to catch some flak and he'll steer you in the right direction."

But the bottom of the singles order hasn't shouldered the burden alone, as Bowes has gotten help from an unexpected area, the Nos. 1 through 3 singles.

At the top of the lineup, Annemarie Walson has played the toughest singles position with measurable success. One of the team captains, she is 12-4 for the

season and 2-2 in league matches. Julie Hrebec has played at No. 2 singles, where she is 3-8, but her big contribution has come in doubles play.

The No. 3 singles slot finds Cathy Carlson, the other team captain. Carlson battled for the No. 1 position but settled in at No. 3, where she is 11-4 and 2-2 in SWC matches.

Down the stretch

Although the Raiders might be considered a legitimate contender for the conference crown midway through the season, Bowes is cautiously optimistic.

"TCU, Texas and SMU are very tough but nobody seems to dominate," he said. "We're gonna be in a race with Houston right in the middle (of the conference standings)."

"Who knows, if things break well, we can stay up with those top three," Bowes added. "I don't discount that, but I'm saying that halfway through, those are the teams to beat."

The Raiders will get an opportunity to knock off the TCU Lady Frogs at 11 a.m. Saturday in Fort Worth. Tech and TCU have had common opponents this year, one of which was Oklahoma. The Sooners beat the Lady Frogs 5-4. Tech handled the Sooners 6-3 on Jan. 30 at the Texas

Before the Raiders face TCU, they will travel to Denton to take on North Texas State at 2 p.m. today in a non-conference matchup.

Tech Indoor Quadrangular.

Coming off the TCU match, Tech will play at 11 a.m. Sunday at Fayetteville, Ark., against the Lady Razorbacks, who are currently in eighth place in the conference with a 6-12 individual match record.

Looking ahead

What does the future hold for Bowes and his squad?

"I'm not looking past the next 30 days and trying to finish as high as we can in the conference," Bowes said. "I'm committed to seeing this team finish higher than we have in the past, and I think we're make steady progression up. I hope it continues."

The colorful Bowes is simply taking his job as it comes.

"I just take this thing one year at a time," he said. "At the end of each season, I go in to Jeannine McHaney (assistant athletic director) and say, 'Well, do you want me to continue another year?' and she either says yes or no. That's the same way I'll do it this year."

After his team finishes this year, it seems likely that Bowes will get his eighth "yes" in a row.

Hrebec, Roberts giving direction to youthful squad

By CHRIS HOOTEN

Quite often coaches can be heard No. 5 singles spot. talking about senior leadership and how important it is.

Gerald Myers recently praised last few seasons, primarily Tony

Benford and Bubba Jennings. roundball coach, spoke highly of senior Lisa Logsdon and her leader-

ship capabilities this season. of as an individual, rather than a team sport, for the Tech women's tennis team, seniors Julie Hrebec

fashion. from Carrollton, said she tries to side," Bowes said. "That's how show leadership by-displaying sup- much respect I have for her singles

port for her teammates. "A lot of the younger players is to support each other," Hrebec said. "Even if you lose a match, you because every match is important, and a 3-1 league mark. not just yours."

Hrebec, she has taken numerous five-minute, self-collecting breaks this year while compiling a 3-8 singles record at the difficult No. 2

Although her singles performance has been disappointing, Hrebec has made up the difference in doubles action. Teaming with Cathy Carlson at No. 2 doubles, the pair has produced a 14-3 overall

"Julie is basically a doubles player, and although she has the talent to play in the first three singles positions, she doesn't seem to handle the singles nearly as well as she does playing doubles with Cathy Carlson," Tech Coach Mickey Bowes said. "I really count on Julie, even if she comes off a singles loss, to step right back on the court and play with Cathy and pick up the doubles win at the No. 2 doubles."

When asked why she excels at doubles and not singles, Hrebec points to the mental aspects of

"Singles is so different from doubles," Hrebec said. "I feel more pressure in my singles just because I have to rely on myself. It's easier to let yourself down than to let your partner down, in my opinion."

Roberts, who is a senior threeyear letter winner from New Braunfels, said she tries to give leadership by displaying a good attitude every day.

"We (the seniors) bring the attitude of the team to practice," Roberts said. "If our attitude is good, the rest will follow. We have and what he expects."

While Hrebec excels at doubles, Roberts plays her best tennis at the

"I have more confidence in myself as a singles player because Texas Tech basketball coach I'm not letting anyone down but myself," Roberts said. "In doubles, some of the leaders he coached the I've learned to serve and volley and its given me added confidence. Coach has helped me to be ag-Marsha Sharp, the Tech women's gressive and to come to the net all

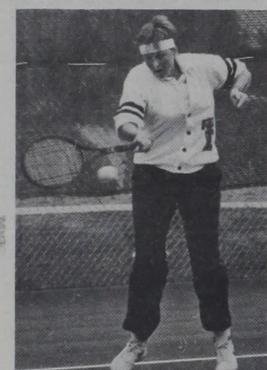

the time." Roberts, who won the Southwest Conference No. 5 position her Although tennis is usually thought sophomore year and reached the finals her freshmen year, gets

nothing but praise from Bowes. "Maybe you shouldn't count your and Lisa Roberts lead in true team chickens before they hatch, but when Lisa steps onto the court, I Hrebec, a three-year letterman kinda count that one on the Tech

play." In doubles action, Roberts is no don't understand how important it slouch either. She has teamed with Shannon Cizek to form the No. 3 doubles tandem, which was a big take five minutes to think about it question mark for the Raiders goand then you go out and support the ing into the season. The pair have other players. It's so important put together a 13-3 overall record

"She is not a super doubles Unfortunately for Tech and player, but doing an adequate job at No. 3," said Bowes.

> According to the two seniors, the Tech squad is doing a good enough job on the court to challenge for the

Hrebec

conference championship.

"We are very capable, this year, of beating the top three teams (TCU, Texas and SMU) in the Southwest Conference," Roberts

Hrebec echoed the remarks of her teammate adding that everyone on the team is playing well and for a common purpose.

"Our team has really surprised me and everybody is playing well," she said. "Nothing is affecting the team. We know each other and what it takes to help one another.

But after the last drop volley has been ran down and the final match

Roberts

has been decided, where will these two seniors go after graduation?

"I would like to go to Europe and play tennis just for fun if I can come up with funds," Roberts commented. "I'm looking into the Army and I'd like to join them. My dad was in the Army, and coach was in the Army and he loved it."

"I would like to get into a film school after graduating in December, maybe at New York University or UCLA," Hrebec said. "It's very hard to get in those schools, but that's my goal - to get into the film industry behind the scenes."

Consultation

Texas Tech tennis player Dick Bosse, left, receives some impromptu advice from been playing on this team for four women's coach Mickey Bowes at the Tech years, so we know how coach thinks Courts. Bowes, who has been at Tech eight

years, is the winningest coach in Tech women's tennis history with a record of 218-96-1.

Rugby team drops college title, looks to defend TRU crown
