MIAMI, ROBERTS COUNTY, TEXAS, THURSDAY, FEBRUARY 23, 1922

NUMBER 30

WHITE HOUSE LUBER COMPANY ENJOYS 1922 ANNUAL CONVENTION

Optimism reigned supreme at the annual convention of the officers, directors and managers of the White House Lumber Company, held at the company's general office in Canadian, Texas, on Saturday, Feb. 11th. After a highly desirable, thoroughly wholesome and singularly appropriate 7 o'clock dinner at the Moody Hotel the convention assembled at the company's offices, and was called to order with a few appropriate remarks by General Manager B. F. Tepe.

Optimistic and stirring was the address of welcome by H. E. Hoover, president of the company, in which he became reminiscent, reviewing the pioneer days of Northwest Texas, and the opening of the first lumber yard by B. F. Tepe on November 17, 1898, out of which has grown the present White House Lumber Company, which is not only the oldest but the largest institution in the 31st Judicial District of Texas, owned, operated and financed strictly by home men. The White House Lumber Company is strictly a home enterprise, the personnel of which, has always and will always stand for the things which are for the best interest of Northwest Texas.

D. J. Young, president of the First National Bank, and a director of the company, addressed the convention in his usual interesting and instructive manner, reviewing present day successful business methods for the advancement of our great Plains country. Mr. Young in his address recounted many interesting bits of history of the plains country since the opening thirty years ago of the bank of which he is now president.

J. S. Hood, mayor of Canadian and Vice-President of the Company, remembered by all the men of pioneer days of Hutchinson, Hansford, Hemphill, Ochiltree and Lipscomb counties, was present with his optimistic hopes and ambitions for greater and better Panhandle of Texas.

Interesting talks and papers on various topics of business were entered into by B. F. Tepe, General Manager, Geo. L. Coleman, Secretary-Treasurer, and Chas. W. Callaway, the efficient manager of the company's yard at Perryton, Texas, and discussion of business ethics was engaged in by all present, including the following managers and employees:

P. V. Bryant, Accountant, Canadian, Texas; D. C. Dyer, Auditor, Canadian, Texas; E. D. Jones, Manager, Canadian, Texas; R. E. Simpson, Assistant Manager, Canadian, Texas; W. E. Callaway, Manager, Spearman, Texas; H. V. Simpson, Manager, Booker, Texas; R. N. Coleman, Manager, Follett, Texas; J. H. McBride, Manager, Higgins, Tex.; J. W. Voyles, Manager, Miami, Texas; W. M. Craven, Manager, Pampa, Texas; Geo. B. Moss, Manager, White Deer, Texas; R. W. Lane, Manager, Panhandle, Texas.

The interests of the entire citizenship of our great plains country were considered and plans were laid for the encouragement of improved dairy cows, registered hogs and thoroughbred poultry, and the getting away from the one-crop system, which has proven so disastrous to our country many times.

Let our slogan for 1922 be: "More hens to pay the store accounts, more hogs for meat at home and for market, more milk and butter for the family table, and more cream cans and larger cream checks, so that every day's income on the farm will more than equal that day's expense." An extensive and vigorous "Own Your Home" campaign will be

ESTABLISH OFFICE AT PANHANDLE

The local law firm of Coffee & Holmes has formed a combination with the Amarillo firm of Kimbrough & Kimbrough, and this allied firm has opened a branch office at Panhandle where the firm will do business under the name of Kimbrough, Coffee, Holmes & Kimbrough. Mr. Coffee and Mr. Holmes, as well as the members from Amarillo, will each spend a part of their time at Panhandle, and the firm will devote the best of time to cases belonging strictly to Carson County.

CALL MEETING OF TAX-PAYERS

A meeting of the tax payers of Roberts County is called for Saturday, February 25th, at 2 o'clock p. m. to be held in Mark Cunningham's office, over Moon's store. At this meeting the report of the committees appointed at the last meeting will be received and any other business that may come up will be discussed. All tax payers are especially urged to come.

T. M. Cunningham, Chairman.

STUDY CLUB NOTES

Mrs. Simmons and Mrs. Tom Pursley entertained the members of the Study Club Friday of last week at the residence of Mrs. N. S. Locke.

The program was short but good. Mrs. Broadus was leader and gave quite an interesting paper on her subject. Mrs. Lard assisted by and made a talk on the problem of the working girls.

"Chicken sandwiches, fruit salad, cake and coffee was served to fifteen members and four guests as follows: Mrs. Ivey Pursley.

Mrs. Bud McCustian.
Mrs. Dr. Hicks.
Mrs. L. B. Cross.
Club adjourned and will meet Friday, March 3d, with Mrs. Broadus.
Press Reorter

Cushing News—Omar Sala, the 18-year old son of Elder Sala, pastor of the Church of the Brethren, often called the Dunkard or Dunker Church, west of the city, died Saturday night about 6 o'clock, after a short illness of pneumonia. Funeral services were held at the Brethren Church on Sunday afternoon, and were largely attended.

Omar will be remembered as the eldest son of the Elder Joseph Sala, formerly of the Laketon community. Omar's mother died here last year, and the family later sold out their farming outfit and moved to where Sala accepted the pastorate of the Dunkard Church.

launched at once for the encouragement of home building; plans are being perfected for assisting those who are in need of help in planning and financing the building of homes.

In the words of the immortal Lincoln let us say, "Let not him who is houseless, pull down the house of another, but let him work diligently and build one for himself; thus by example assuring that his own house shall be safe from violence when built."

The convention adjourned at mid night, after arrangements had been made for an annual convention, to be held next summer at the country Club Lakes, where fishing and bathing can be enjoyed by all employees and their families. These White House Lumber Company conventions mean greater things for the entire Panhandle of Texas.

INCOME TAX FACTS.

Farmers, rangers, herders, dairymen, truck gardeners, vineyard and orchard owners, and other food producers must compute their net and gross income for 1921 and ascertain whether an income tax return, or a tax or both are due. All gains, profits, and income derived from the sale or exchange of farm products, whether produced on the farm, purchased and resold, must be included in gross income. When a farmer exchanges his products for groceries, clothing, or other merchandise, the fair market value of such goods must be included. Profit received from the sale of farm land, or rent received for the use thereof, must be included.

In determining income upon which the tax is assessed, the farmer may deduct from gross income all necessary expenses incurred in the operation of his farm during the year 1921. There include cost of cultivation, harvesting, and marketing of his crops of feed and fertilizer used, amount spent in repairs to farm building (other than the dwellings) and to fences and machinery. Wages paid to farm hands are deductible, but not wages paid to a domestic servant, which is a personal expense.

As an aid to farmers, the Bureau of Internal Revenue has prepared a sales of live stock, produce, and a summary which must be attached to the individual return of income and expenses.

An unmarried or widowed farmer or one living apart from his wife must file an individual return for 1921 if his net income for 1921 was \$1,000 or more or if his gross income was \$5,000 or more. If married and living with his wife on December 31, 1921 if his net income for 1921 was \$2,000 or more, or if his gross income was \$5,000 or more.

LEGION AUXILIARY MEETING

The American Legion Auxiliary met in regular session Feb. 21st with fifteen members present. Roll Call was answered with current events on other Legions. After the business meeting a short program rendered.

Song, - - - - - Auxiliary.
What Other Auxiliaries are Doing - - - - - Mrs. J. D. Lard Solo - - - - - Mrs. Flake George Burst and Duds - Ruth Chisum. Fifteen Minutes of "Just Fun."

The Auxiliary have recently added a library table and twelve chairs to the club room. These add much to the appearance of the room. Next meeting will be March 7th. All members are urged to be present.

DON'T MISS THE BIG DOIN'S

Amarillo, Feb. 22.—Every minute of the time will be taken on the program of the Auto-Style Show staged in Amarillo, March 9, 10 and 11, according to announcements made Monday night at the weekly dinner meeting of the Amarillo-Panhandle Automotive Association in the Hotel Amarillo.

Leading stores have taken space in the style show division and these will exhibit from three to five models decked in the latest offerings of the world's fashion centers. The models will present desired wearables from the dainty boot to the creation of the best milliners—nothing will be omitted. The gentlemen's furnishings stores will also be on hand with the best and newest things for men. This will be somewhat of an innovation, and yet it will be interesting according to the statements of the arrangement committee who declare that they have been "shown" regarding this item in the show.

Every automobile and accessories man in this city is ready to bet that there will be a number of surprises from that general division of the attractions. Colors, form, model, material, performance, style, will all come in for their share of the attention of the public gathered here from every portion of the country. The accessories men have some surprises "up their sleeves" and these will be sprung each day, for the benefit of the motor vehicle using public.

Interspersing the offerings in the style and automobile divisions will be the entertainment features. These have been selected for their real worth and are of such nature as this part of the country seldom has opportunity of witnessing. Direct from the Orpheum circuit these attractions have been designated by reason of their uniform excellence. There is range in these features and acts, so that something must be offered in the program to please each individual patron of the show.

Then comes the dances, afternoon and evening with a wide range of little features well calculated to appeal to the throngs now assured for the three days events. A superb orchestra will discourse music throughout the shows, being constantly on hand, with a musical repertoire unsurpassed as to variety and selection.

MOVES TAILOR SHOP

Gene Martin, owner of the Toggery has moved the Tailor shop from the rear of the City Barber Shop, to the old postoffice building. A partition is being built dividing the building the Superior Electrical and Vulcanizing Co., will occupy the east half.

The new location will be a much more convenient one for the Toggery.

NEW SCHOOL OF PRINTING AT DALLAS

Dallas, Texas—Young men leaving school with the feeling that they can't afford to spend four years in college, yet dreading the long hard pull necessary to rise in the business world from a clerical position of long hours and small pay, have greeted the prospects of a new profession at a good salary, made possible by the Southwest School of Printing, at 24-17-191-2 Commerce St., Dallas, with joyous acclaim. This is evidenced by the fact that the recently established school already has a large and active class, requiring fourlinotype machines.

The leading employing printers of the southwest have banded themselves together and established the Southwest School of printing. They intend that it shall be the nucleus of a great Graphic Arts University, wherein all forms of printing, illustrating binding, designing, etc., shall be taught. At present it is devoted to training bright young men to be linotypers.

A young man with a high school education and eager to learn, can finish the linotype course in about three months, and his training will have been exactly as he will encounter in the printing office after he leaves the school.

The faculty is made up of men who have achieved notable success in the printing profession, and every person connected with the school, whether teacher or director, is a practical printer, and a majority of them own their places of business, which is but another way of saying they are successful printers.

JUVENILE PARTY

The XX girls on Tuesday night planned a kid party outright. "On February 14th nineteen twenty two come to George's, we will show you." Thus the various invitations read, When each was received everyone said without a doubt, I will be right there, so don't forget but save me a chair. At seven o'clock, we knocked at the door dressed as kids, as I said before each trying to do his best to see if the other was fully dressed.

All looked real stunning for the boys and the girls were quite while every girls looked in ruffles and ribbons from head to feet. The games we played were suited well. But some of the contests were hard to tell, for that line went there and this line here with every word mixed, and nothing clear. But at last when this one race was won another was started, in which was great fun. Do horses and pigs have feathers they asked and to refrain from 'yes' was a very hard task.

Each little lassie and each little lad were thinking—such a good time we have had
When next came the eats, ice cream and cake,
Peanuts and mints in dainty heart shapes
But now it was late, so we bid adieu
And the expression of pleasure we for from felt
As each one left with a great regret
Wish these came oftener, Yes, you bet!
P. R.

MAKES 'EM FEEL GOOD

Tuesday night, and early Wednesday morning, about .24 of an inch of rain fell here at Miami, and farmers from out on the plains say that there was a good rain over most of this section. With the nice weather of the past ten days, and what of the wheat that was not already up, just ready to come thru, this little rain, though not as big as was needed, is going to do lot of good. The note of optimism over the crop this year, is growing more marked, as this fine weather continues. Here's hoping that the blues and pessimism have gone for good.

Reports carried in the papers Wednesday, indicated that the rain was quite general over the Panhandle and reached into western Oklahoma. Most localities reported a heavier rainfall than there was here, some of them as much as an inch.

INTRODUCTION

As we have just become a citizen of Miami for the purpose of donating our time to the work of the Christ, the first thing essential to the success of this, the greatest work man ever engaged in is to get acquainted with the people and the people get acquainted with me.

I take this means of introducing our object, purpose and attitude toward those both in and out of the church.

To those in the church, we want your co-operation not only church work but in everything that will make the community better. Make people think more of each other by always manifesting the spirit of Christ toward those we shall come in contact with from time to time. Whether you agree with us on all things or not I want you to realize that we are brother travelers from time to eternity, and shall some day meet at the great tribunal to give and account for the way we have conducted ourselves in each others presence in the presence of the great God of Heaven and earth. Remember that you are your brothers keeper and I am my brothers keeper. We must help each other over hard places along lifes journey, if we expect to gain that eternal home where there is no sickness, sorrow, pain or death where more of these things shall be felt or feared.

In view of these things, I shall as I always have reason every sermon I shall preach, every prayer that I pray and every song that I sing with that grace and truth that come by Jesus Christ that will build peace and union in Christ for which he prayed before he left this earth.

We want you to help us to enlist every boy and girl in town that is not attending the Lords day Bible study in this great work of coming out and sitting at the feet of Jesus and learning some of the simple lessons taught by the one who said "Suffer little children to come unto me."

Brother, just stop and think of the many precious little jewels of Heaven that could be gathered in and fitted for usefulness in the kingdom of God if we would only do what we could. We want to help christianity and work and pray.

Any kind word we may speak or any kind deed we may do to help your don't fail to command our service.

In the Gospel hope,
G. A. Lamberth.

Kitchen Needs

Preparedness is the good housewife's slogan. From the time she starts to cook the meal till the time she washes and dries the pan she has frequent need of many things, she will be hindered greatly if she does not have them right at hand.

For instance, there are lards and cooking oils; there are flavoring extracts and other seasoners.

Soaps and cleaning compounds that she needs for the cleaning up afterwards. For all these and other kitchen needs she can rely on us.

Novelties in Undermuslins; Girdles of Many Sorts

Now that the season for spring sewing is on, when women occupy themselves with replenishing their own and their children's undermuslins, we find that many novelty garments invite the attention of the seamstress. The annual "white sales" which supply the material for this seasonal sewing, have blossomed out with new color, new cloths and new modes of trimming—when there is trimming. It remains to be seen whether the in-

novably simple dresses as a background for interesting girdles. Quite likely this idea first saw the light of day in that thrifty Paris—which is always on the alert to take advantage of opportunities and always enthusiastic over the appearance of any new dress accessory.

Many of the new girdles are made of metals and set with mock jewels, but compositions imitating ivory and other semi-precious materials, together

Pajamas of Cotton Crepe

roduction of color and ingenious new decorations will last or not, but manufacturers have faith in it and have made nainsook, batiste and other cottons in almost as many colors as they find in silk underwear.

It is not worth while to put much work on the short-lived, soon outgrown garments for children. Manufacturers are showing such sensible garments as the pajama pictured here. This is made of cotton crepe, cut in one piece, with kimono sleeves, and has long pantaloettes ending in a flounce at the ankles. The required fullness is gathered in at the front and back

with beads, plaques and cabochons of jet, steel, glass, mother-of-pearl or porcelain are also used. Silk cord, it almost goes without saying, is found in the company of all these other things, at least as often as chains. Some of the girdles merely encircle the waist but many of them end in a dangle motif.

Just now, roses made of the same material as the dress or of ribbon are set on girdles also made of the same material, and are in great favor. But girdles that will serve for more than one frock are made of velvet or other ribbons. One of these is shown below it

Girdles Now Important.

and the pantaloettes attached to the body across the back by means of buttons and buttonholes. Muslins, printed cottons, and satens are also used for these garments.

Jacquard crepe, in white or colored designs, and satens are used for pajamas in new types, for grown-ups also and they are easier to make than the regulation model.

It was a happy thought when someone decided to use the season's fash-

which the girdle supports three loops and ends at the side fastened, apparently, with small steel buckles and having the ends finished with tassels. Black velvet ribbon and rose petals of metallic ribbon, falling in cascades, make the other girdle.

SHEEP CARE DURING WINTER

Breeding Ewes Should Be Kept Thrifty and Not Allowed to Lose in Weight.

(Prepared by the United States Department of Agriculture.)

At this season the flock owner is principally interested in fall and winter feeding and maintenance. The shepherd should train himself to read the condition of his sheep by feeling the bone of the loin or back. At no time while they are in lamb should ewes be allowed to lose weight. In open, wet, fall seasons there is danger of waiting too long to start feeding.

Winter management is very important in its effect upon the returns from the flock. Leguminous hays, straws and cornstalks usually form the main part of economical winter rations. Clover, alfalfa or cowpea hay, if of good quality, may be used as the sole feed until near lambing time, from 3 to 3½ pounds daily being sufficient for ewes weighing less than 150 pounds. Oat and wheat straw are better than rye or barley straw. Cornstalks placed where the ewes can eat off the leaves may be used as a part of the roughage ration. If this ration is made up largely of cornstalks or straw, a nitrogenous concentrate should also be used. Timothy hay is not good sheep feed.

Slilage will reduce the cost of the ration, but it is best to use it with hay. Feed only silage made from well-matured corn, and be sure that it is not spoiled, frozen or moldy. Three pounds per head a day is the limit for this feed. For breed ewes, roots, particularly turnips, should be used sparingly until after lambing. The two rations here given will be found satisfactory for ewes from 120 to 145 pounds in weight:

Ration No. 1.

- 2 pounds alfalfa or cowpea hay.
- 2 pounds corn silage.
- ½ pound shelled corn.

Ration No. 2.

- 2½ pounds alfalfa hay
- 2 pounds corn silage.

If the ewes run on fall wheat or rye during the winter the pasture must be supplemented by some dry or concentrated feed. Silage and roots are not desirable when the pasture is green. One-half pound of cottonseed meal contains the daily protein re-

A Good Pasture to Range Over Provides the Best Exercise for the Breeding Flock.

quirement for pregnant ewes and it should be used when the price is right. However, a quarter-pound along with other feeds containing protein may be better than one containing a larger amount of cottonseed meal.

Exercise for the ewe in winter is necessary if strong lambs are to be produced. They can be induced to take exercise by scattering their feed over the ground which will induce them to do a great deal of walking. Another way is to do the feeding some distance from the shelter. Winter pasture will, of course, solve the problem of exercise. But the flock ought not to be out in rain or wet snow, as a wet fleece is a frequent cause of colds and pneumonia. A sheep will shake off dry snow and be none the worse for having been out in a storm.

Present conditions should be no discouragement to a person who thinks of starting a flock, for the man who succeeds with live stock is the one who goes in and stays in through fat years and lean. Perhaps it is better to go in when prices are low, for then it costs less for foundation stock.

It is doubtful whether a man should start keeping sheep unless his farm will allow the keeping of at least 30 ewes, and in most cases 60 or more will be handled better and more economically than a very small flock. Old ewes should be discarded at five years of age. When this is done and the poorest of the ewe lambs are sold a flock will ordinarily double in size in three years.

CASTOR OIL GOOD FOR SWINE

Simple, Harmless and Generally Effective Remedy for Animals When Off Feed.

Castor oil for hogs that are off feed is a simple, harmless and generally effective remedy. Put salt on the hog's tongue, and when she starts to lick put the castor oil in her mouth with a spoon. Two tablespoonfuls is the right dose. Give it immediately you notice a hog is off feed.

THE KITCHEN CABINET

"They are such dear, familiar feet that so along the path with ours—feet fast or slow And trying to keep pace; if they mistake, Or tread upon some flower that we would take Upon our breast, or bruise some reed, Or crush poor hope until it bleed, We must be mute, Not turning quickly to impute Grave fault; for they and we Have such a little way to go—can be Together such a little while along the way We will be patient while we may."

SEASONABLE GOOD THINGS.

A tasty dessert, which may be prepared any time during the year, is the following:

Tapioca Pudding.—Cook fifteen minutes one tablespoonful of tapioca and a pint of milk. Dissolve a tablespoonful of gelatin in one-half cupful of cold water. Add one-half cupful of sugar, the yolk of an egg and add to the first mixture. Pour over steamed dried peaches or apricots and one-half of a sliced banana. When cool stir in one-half cupful of whipped cream.

Grapefruit Pudding.—Take one package of lemon Jello, dissolved as usual, add one cupful of steamed raisins, one-half cupful of sugar, one cupful of grapefruit, six walnut meats cut fine. Mix all together and mold. Serve with whipped cream.

Rhubarb Pudding.—Take three cupfuls of pieplant, cut in small pieces; mix with one cupful of sugar. Melt one-third of a cupful of butter and mix with three cupfuls of bread crumbs. Make alternate layers of bread crumbs and fruit—three of bread and two of fruit. Bake one hour. Serve with hard sauce. Take one cupful of powdered sugar, one-third of a cupful of creamed butter and, when well blended add a teaspoonful of flavoring, using one-third lemon and two-thirds vanilla. Fold in the beaten white of an egg.

Frozen Fruit Salad.—Cut in small bits the fruit from a can each of pineapple, white cherries, pears and peaches. Mix the prepared fruit with the juice from the cans; add two oranges, one-quarter of a grapefruit, cut in bits, two cupfuls of mayonnaise and one pint of whipped cream. Turn into the freezer and freeze, turning the crank slowly. Then pack in brick molds. Serve in slices on lettuce. This will serve 35 persons.

Behind the cloud the starlight lurks, Through showers the sunbeams fall; For God, who loveth all his works, Has left His Hope with all.—Whittier.

GOOD THINGS

A good pudding and inexpensive is.

Steamed Molasses Pudding.—Beat one egg, add one fourth of a cupful of molasses, two tablespoonfuls of melted fat, one-fourth of a cupful of sugar, one and one-fourth of a cupful of flour, two teaspoonfuls of soda dissolved in one-half cupful of hot water. Steam in small molds one hour. Serve with an egg sauce.

Apple Fritters.—Mix and sift together one and one-third cupfuls of flour, two teaspoonfuls of baking powder, one-fourth teaspoonful of salt and then add one beaten egg to two-thirds of a cupful of milk and combine the mixtures. Cut two medium sized apples into eighths, slice the eighths and stir into the batter. Drop by spoonfuls into hot fat and fry until brown. Roll in powdered sugar.

Swiss Cheese Savory.—Dip round slices of bread in melted butter, sprinkle with salt and pepper, paprika and a little lemon juice. Put one-half pound of Swiss cheese through the meat chopper, add one tablespoonful of chopped parsley, one tablespoonful of canned or fresh pimento, two tablespoonfuls of butter creamed, four tablespoonfuls of milk or cream, with salt and pepper to taste. Force through a star tube onto the bread, sprinkle with cheese, heat hot and serve.

Southern Italy Salad Dressing.—Mince fine one green pepper, one stalk of celery, place in a bowl and cover with a French dressing prepared as follows: One-half teaspoonful of mustard, one teaspoonful of paprika, one-half teaspoonful of salt, a minced slice from a clove of garlic, two tablespoonfuls of garlic vinegar, five tablespoonfuls of salad oil. Put into a bottle and shake vigorously for five minutes. Now prepare a cooked dressing as follows: Take one cupful of milk, six tablespoonfuls of flour, stir and mix well and put over the fire to cook; add five tablespoonfuls of garlic vinegar and cook for three minutes, then set aside while preparing the following: Beat one egg, add one-half cupful of salad oil, one teaspoonful of mustard, one-half teaspoonful of paprika, one teaspoonful of salt and one clove of garlic cut in very fine bits. Mix well and add to the prepared milk. Beat very hard and bring the mixture to the boiling point. Cook for two minutes, then cool and chill. Use this on chopped or shredded cabbage.

- Pain, Pain

Accept only "Bayer" package which contains proper directions. Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monocetate of Salicylic Acid.

Utility.
"You made your wife a Christmas present of a set of furs she doesn't really need?"
"I do," replied Mr. Meekton.
"I thought you were a strict advocate of useful giving."
"I am. A new set of furs put Henrietta in a perfectly angelic frame of mind. Nothing could be more useful."

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

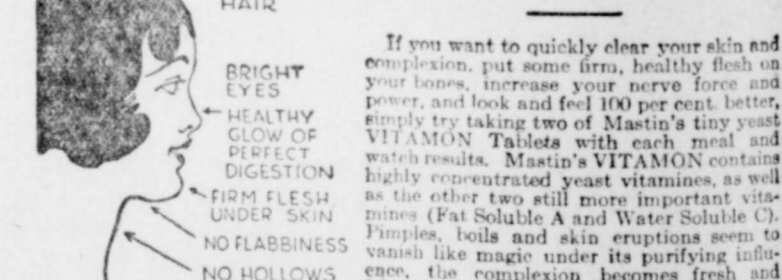

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble. Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions. Get a medium or large size bottle immediately from any drug store. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

A soft answer turneth away wrath and a short answer turneth away impertinence. Imitation cheerfulness is better than none.

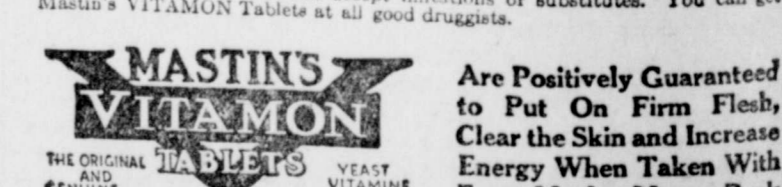

Yeast Vitamon Tablets Bring Real Beauty

Danishes Skin Eruptions. Puts On Firm Flesh, Strengthens The Nerves and Increases Energy.

Concentrated Tablets Easy and Economical to Take. Results Quick.

If you want to quickly clear your skin and complexion, put some firm, healthy flesh on your bones, increase your nerve force and power, and look and feel 100 per cent better, simply try taking two of Mastin's tiny yeast VITAMON Tablets with each meal and watch results. Mastin's VITAMON contains highly concentrated yeast vitamins, as well as the other two still more important vitamins (Fat Soluble A and Water Soluble C). Pimples, boils and skin eruptions seem to vanish like magic under its purifying influence, the complexion becomes fresh and beautiful, the cheeks rosy instead of pale, the lips red instead of colorless, the eyes bright instead of dull. The whole system is toned and invigorated, and those who are under-weight begin to get some firm, "stay-there" flesh. So rapid and amazing are the results that success is absolutely guaranteed. Be sure to remember the name—nothing else like it, so do not accept imitations or substitutes. You can get Mastin's VITAMON Tablets at all good druggists.

Are Positively Guaranteed to Put On Firm Flesh, Clear the Skin and Increase Energy When Taken With Every Meal or Money Back

She Made a Real Sale.
I was clerking in a clothing store and had been talking about making sales, when a man came in and I said: "Now watch me, and I shall show you how to make a real sale."
When I made out the bill I said: "How do you spell your last name?"
Imagine my embarrassment when he fired back so that everybody in the store could hear it: "Did you ever hear of Smith being spelled any way except S-m-i-t-h?"—Exchange.

Five-Pound Box, at That
In the good old days we could make a girl's heart flutter by handing her a lozenge with a love message stamped upon it; but nothing less than dollar-a-pound candy makes any impression upon the cardiac organ of the modern girl.—Boston Transcript.

No Place for Her.

LAND GROWS RICH

Wonderful Development of Canada in Forty Years.

Four Decades Ago Little Considered, Today One of the Greatest Granaries and Dairying Centers.

The recent announcement that the sale of the first section of Canadian Pacific land was sold forty years ago, and when you read that the first carload of wheat was shipped from Winnipeg forty years ago, the changes that have taken place since then are matters of reminiscence, but yet of interest. What forty years ago was an unknown quantity, barren because but little production was attempted, is today one of the greatest granaries in the world. Then there was scarcely any farm live stock in the West. Dairying was not engaged in at all. Today there are 6,988,817 farm animals on the prairies, of which 881,800 are milch cows; and dairying is only second in importance to grain growing in the West.

Forty years ago the shipment of one carload of grain was a notable exploit. Today, Canada ranks as the second largest wheat-producing country in the world, with 329,185,300 bushels, 90 per cent of which was grown in the three prairie provinces, of which the province of Saskatchewan produced more than half. The Dominion is today the second largest producer of oats, with 330,710,000 bushels, of which 60 per cent was grown between Winnipeg and the Rocky mountains; and the fifth largest producer of barley with 63,311,000 bushels, of which the prairies yielded 65 per cent.

Forty years ago scarcely any of the rich soil had been brought under cultivation. The farm machinery of the time was crude; there were no competent advisers; government experimental farms were a blessing that came years later.

Yet these hardy pioneers stuck it out, and in forty years numbers of them are enjoying their declining days in the communities they wrested from the wilderness, prosperous, contented, with their children's families gathered about them or seeking their own fortunes still further westward or northward. They have seen civilization creep in to the West and the wilderness thrust out. Today are thriving cities and towns where bleaching buffalo bones marked the ox trails of forty years ago. Today are thousands of freight trains, each with its thousand-ton cargo of wheat or merchandise, roaring down the roads where the old carts creaked. Today are schools within walking distance of every farmhouse, churches within driving distance of every home. Today are telephones and every modern convenience linking communities over vast distances by the common bond of the spoken word.

Forty years ago the Rockies were practically an impenetrable barrier. The Pacific coast being reached from the east by ships sailing round Cape Horn. The province of Manitoba had a population of 62,200, compared with 613,008 in 1921. Winnipeg was then a frontier town with 7,987 people, and Brandon, which was regarded as a far-flung outpost of the West, boasted of a few hundred in population. In 1891 it only had 3,778. Such places as Calgary and Edmonton were mere trading posts in the Northwest territories. Buffalo roamed the prairie in their native state.

Today on these plains are to be seen herds of cattle, bands of horses and droves of sheep, from any of which can easily be selected stock that can carry off premiums, sweepstakes and championships in competition with the best in any other part of the world.—Advertisement.

How Now?

Following the birth notices in a paper there is a line: "Our Ads Bring Results."—Exchange.

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

The AMERICAN LEGION

(Copy for this department supplied by the American Legion News Service.)

EX-SERVICE MEN'S HOSPITAL

Dr. Albert Wehenkel Heads Detroit Institution—All Employees Have Been in Service.

Dr. Albert Wehenkel, of Detroit, Mich.

The only hospital in the country operated by ex-service men for the benefit of ex-service men has been opened at Camp Custer, Mich. It is the new Roosevelt American Legion hospital converted from a former community house at Camp Custer and turned over to the Legion by the state. The superintendent is Dr. Albert M. Wehenkel, of Detroit, Mich.

Dedicated by Marshal Foch, the hospital opened its doors to former service men of Michigan suffering from tuberculosis. Each doctor, nurse and employee at the institution has been in some branch of the government service. Each patient is given a separate room, tastefully decorated and supplied with running water. They are kept at the hospital until their case has been pronounced "arrested" and then are placed immediately in vocational training to prevent a period of idleness.

Doctor Wehenkel has been tuberculosis expert for the Detroit board of health for seven years. He saw two years of army medical service during the war.

Yet these hardy pioneers stuck it out, and in forty years numbers of them are enjoying their declining days in the communities they wrested from the wilderness, prosperous, contented, with their children's families gathered about them or seeking their own fortunes still further westward or northward. They have seen civilization creep in to the West and the wilderness thrust out. Today are thriving cities and towns where bleaching buffalo bones marked the ox trails of forty years ago. Today are thousands of freight trains, each with its thousand-ton cargo of wheat or merchandise, roaring down the roads where the old carts creaked. Today are schools within walking distance of every farmhouse, churches within driving distance of every home. Today are telephones and every modern convenience linking communities over vast distances by the common bond of the spoken word.

KEEP AWAY FROM THE ORIENT

Ex-Service Men Are Warned That Jobs Are Scarce and Only Natives Are Employed.

Whipple S. Hall, who traveled 10,000 miles to represent the department of the Philippines at the national convention of the American Legion, warns all ex-service men to keep away from the Orient unless they have enough money to bring them back home again.

Discharged veterans of the Siberian front, many accompanied by Russian wives as destitute as their husbands, worked their way to the islands as merchant sailors and are now in the hands of the Legion and the auxiliary. Many of them, penniless, worked their way down through China in the belief that the Orient blossomed with good jobs. Virtually all manual labor and small clerical work is performed by natives.

Poor Man's Pride. So many men to whom the East side missionary had given money had expressed a preference for a certain lodging house that he wondered what constituted its particular attraction.

"It makes us feel self-respecting," said the men, when questioned. So far as the mission worker could see, it was the typical cheap lodging house, whose inducements to self-respect were not discernible to the ordinary eye. So he interviewed the manager.

"That's easy," replied the latter and pointed to a sign above the desk: "Gentlemen Are Requested to Leave Their Valuables With the Clerk."—American Legion Weekly.

Last Man Killed in War. A sergeant of the Seventy-ninth division who left his lines at 10:55 a. m. on November 11, 1918, and was killed in attempting to capture a German machine gun, is cited at American Legion headquarters as a claimant for the honor of being the last man killed in the war. At 11 o'clock sharp, according to the report, the doughboy was picked up and carried to the American lines.

LOANS FOR EX-SERVICE MEN

Commander MacNider Is Originator of Plan to Aid Men in Need of Assistance.

Buddies who are "broken in health and battling their way through red tape for their just disability compensation" will be the beneficiaries of a big rotating fund, details of which are being worked out at national headquarters of the American Legion.

The fund is designed to provide loans, without security and at a low rate of interest, to ex-service men in every state who are in need of assistance. Commander MacNider, who originated the plan, says that such a provision is of vital necessity in order that worthy men may keep their self-respect during a period of financial stress. Ex-soldiers who do not need the ready cash provided by the government's payment of adjusted compensation have signified their willingness to turn over their bonus to the fund.

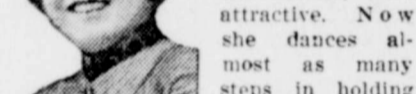

Hundreds of instances of sick and wounded ex-service men falling back on charity while their claims were being reviewed are shown by Legion reports. Tubercular victims whose condition has been brought on by poison gas or exposure have gone to sanitariums in the West and have been denied immediate treatment and become public charges, it is declared. Some help for these men during the period of readjustment is of prime importance, according to MacNider.

HELPED ENTERTAIN THE BOYS

Mrs. Jessie Erskine Danced in France—Now Treasurer of County Legion Committee.

Mrs. Jessie A. Erskine says she used to dance 9,000 steps a week at Tours, France, for the edification and amusement of gobs, doughboys and leathernecks, some of whom, she admits, were attractive. Now she dances almost as many steps in holding down her job as treasurer of the Niagara county committee of the American Legion, in New York state.

Mrs. Erskine was chief stenographer in the quartermaster department, and was also chief sister in the department of sports and pastimes, which was less official but just as interesting. She succeeded in being A. W. O. L. twice without being given her sailing papers.

Mrs. Jessie Erskine, of Niagara Falls, N. Y.

Directs Mortars or Souls. Elliot Porter, State Chaplain of Legion in Montana, Recognizes No Denominational Bars.

Elliot Porter's efficiency in directing trench mortars was no greater than his proficiency in directing souls. As state chaplain of the American Legion in Montana, he built up a splendid reputation as notable as that which he won as captain in the British field artillery. Mr. Porter, who is a Presbyterian, was one of the three men who wrote the national ceremonial ritual for the Legion. He worked in conjunction with a Catholic priest and a Jewish rabbi. He recognizes no denominational bars in his Legion work, and at the 1921 convention nominated a Catholic to succeed him as state chaplain.

Elliot Porter, State Chaplain of Legion in Montana.

Carrying On With the American Legion. The 53 Americans who received the Congressional Medal of Honor will each receive the Italian war cross, General Zaccari, chief of staff of the Italian army, has announced.

The National Guard of the country, with an enrolled strength of 132,000 men, has reached a point only slightly below that of the nation's regular army.

During the war the British Red Cross collected \$95,000,000, of which \$70,500,000 was expended. The membership was 128,000. Women members numbered 90,000.

A proposal has been made in Washington that the President give an American flag to the next of kin of each deceased soldier whose body is not returned from France.

The Congressional Medal of Honor laid upon the tomb of Great Britain's unknown soldier will be enclosed in a glass-fronted box and affixed to the tomb, according to the wish of the dean of Westminster Abbey.

The annual report of the commissioner of pensions discloses on its rolls the names of 64 widows of the War of 1812; 109 soldiers and 2,156 widows of the Mexican war and 3,784 soldiers and 2,569 widows of Indian outbreaks prior to 1891. World war veterans are not mentioned in the report.

Help Your Kidneys

Is a cold or grip keeping you miserable? Are you tortured with dull, persistent backache and sharp, cutting pains? Likely your kidneys need help. Colds and grip fill the blood with poisons. Your overworked kidneys have become weekend filtering these poisons off. That's why you feel weak and depressed and suffer from headaches, dizzy spells and urinary disorders. Don't wait for serious kidney disease. Help your kidneys with Doan's Kidney Pills. Doan's have helped thousands and should help you. Ask your neighbor!

An Oklahoma Case

Mrs. A. C. Cale, Wilburton, Okla., says: "I had severe backache that made me feel miserable all the time. It was a dull, nagging ache across the small of my back. Sharp darting pains came in on my side, and I had dizzy spells and kidney trouble. Doan's Kidney Pills were recommended and they cured me of the trouble."

GOOD JOKE ON DANISH KING

Monarch Jumped Too Quickly to Conclusion That Eskimo Was Actuated by Loyalty.

An amusing story of the king of Denmark's recent visit to Greenland was recently told by M. Aagaard of the Danish legation, to members of the Danish club in London.

As the royal yacht was approaching Greenland a dark speck became visible on the open sea. It proved to be a solitary Eskimo in his little kayak (native canoe). The Eskimo came on board and his loyalty in having braved the perils of the sea in such a frail craft assured him the warmest of welcomes. The king presented him with a cigar and, what the Eskimos most highly prize, a rifle.

On landing, the king described the incident to the Danish commissioner in Greenland and asked him who the man was. The commissioner, in accents of horror, replied: "The man's an escaped convict. He broke prison yesterday, stole a canoe and put to sea. We thought he had been drowned."

But Now—Rummy Robinson—Yes, lady, once for a whole year I turned me back on beer.

Kind Lady—Ah, my noble man, what were you doing at the time?

Rummy Robinson—Driving a brewery truck, mum.

Gratitude demanded turns to ashes on the lips.

Then She Remembered.

Meeting a friend of mine, the wife of a bank treasurer, we stood talking. Along came a mutual acquaintance, the widow of a bank cashier.

"There goes Mrs. Blake!" exclaimed my friend. "I wonder how she likes the work in a broker's office?"

"Oh, she likes it fine, but she's had a hard time making a living," I replied. "But that's the way of it. Being a banker's wife doesn't always mean you have money, but you've got to pretend you have anyway!"

"That's right," said my friend, and then I remembered what her husband is.—Chicago Tribune.

Up to the Neck.

A bachelor who is forever putting his foot in it recently visited the proud parents of a new boy.

The mother held up the bundle for inspection by the bachelor and asked slyly: "Tell us now, frankly, which of us do you think he is like?"

After a careful scrutiny the bachelor replied: "Well, of course, it isn't very intelligent looking yet, but he's wonderfully like both of you."

Quick Wealth.

"Yes; he made a fortune out of an idea."

"How come?"

"Just as soon as he saw that woolen hosiery would be in vogue he came forward with a woolen openwork effect."—Louisville Courier-Journal.

A trust company trusts no one, and a trust is not to be trusted. What's in a name?

Says Sam: It's a question which kills most people—germs or grouches.

Taking a Farm Scene.

"Shoot!" cried a stern voice at the side of the road.

"And then?"

"I threw on the emergency brake and my wife fainted."

"Highwaymen?"

"No, a movie director was issuing an order to his camera squad."—Birmingham Age-Herald.

Every department of housekeeping needs Red Cross Ball Blue. Equally good for kitchen towels, table linen, sheets and pillowcases, etc.—Advertisement.

DIDN'T SEE END OF INCIDENT

Gap Johnson Had More Important Thing to Attend to Than Witnessing a Hanging.

"While I was in Tumlinville yesterday," relates Gap Johnson of Rumpus Ridge, Ark., "a mob came rarin' around a corner hauling along a gent with a rope around his neck, and flung the end of it over a limb within forty feet of me."

"Did they hang him?" interestedly asked an acquaintance.

"Dogged if I know! You see, just then a feller bantered me for a hoss swap and drug me off to look at his nag, and I didn't learn how the anecdote came out."

"What had the gent done?"

"Well, I heard somebody say that he'd either been selling home dry liquor to the mob or else he'd refused to do so; I forgot to ask which."—Kansas City Star.

Santa Claus Best Advertiser.

Christmas trees undoubtedly represent a destruction of timber of great value. They also represent a stimulation to business which every merchant depends upon in his annual calculations. It pays to advertise, and Santa Claus, though a myth, is the greatest advertiser on earth.

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores followed by a dusting with Cuticura Talcum powder usually makes a clear, sweet, healthy skin.—Advertisement.

SEMI-MOURNING, AS IT WERE

Offer of That Red Skirt Made Caroline Reconsider Her Demonstration of Sorrow.

Every Saturday Caroline used to go forth on a cleaning job. One day she appeared robed in black.

"What's the matter?" her employer asked.

"Oh, Miss Sophy," she moaned, "my uncle he is dead, and Ise gwine to mourn. Ise gwine to mourn for him four months."

The lady expressed sympathy and added:

"I had out that red skirt of mine for you. I thought you might like it; but of course you won't want it now."

"No, Miss Sophy; Ise gwine to mourn four whole months."

Next week brought Caroline as usual.

"I been thinkin' 'bout that red skirt, Miss Sophy," she said, "it's just the kind of a red skirt I like, and I believe from now on I'll mourn from the waist up."—Everybody's Magazine.

He—"I see this hotel has adopted a rule permitting women to smoke."

She—"I suppose now I'll have to quit."

An Early Beginning.

Mother—"This is your baby brother, Johnny—I think you had better scarp him, ma; he looks like a fighter."

One third of your life is allotted to sleep. Do you get your share? The most important period in the process of applying nutrition to the repair of the body is while you are asleep. For the most favorable transformation of digested food into nerve and cell tissue, so doctors tell us, sleep is absolutely essential. Is it any wonder that those who suffer from lack of proper sleep are weak, pale and lacking in energy or ambition? One of the causes of insomnia is nerve-irritation from tea and coffee drinking. Tea and coffee both contain caffeine, which has a tendency to cause undue stimulation. The irritating effect of caffeine often results in insomnia, depression, and a weakened nervous system. You can easily overcome these troubles by drinking Postum instead of tea or coffee. Postum is a delicious, satisfying cereal beverage, and it is absolutely free from caffeine, or any other harmful substance. Ask your grocer for Postum. Drink this delicious, refreshing beverage for ten days. Then see if you do not feel better and more clear headed, and if you do not sleep better at night—as so many other people have proved for themselves. Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Postum for Health "There's a Reason" Made by Postum Cereal Co., Inc., Battle Creek, Mich.

**CLUB LADIES ACCEPT
Old Man Heare's Invitation to Take
A Trip Around the World**

Speaking in behalf of the ladies clubs of Miami, we feel sure that a majority of the members will be delighted to take advantage of this splendid offer of the "Never Sweat Club" to take a trip around the world.

We have often contemplated just such a trip, but for various reasons that we will not state here, never expected to see our hopes realized.

One of the greatest obstacles in the way of our taking such a trip has been very nicely removed by the thoughtful planning of the president of the "Never Sweat Club."

While we cruising in the warm waters of the Mediterranean sea or climbing the lofty Alps we will think just as little as possible of the many perplexing problems encountered by dear patient Mrs. Heare as she herds those 200 more or less youngsters up, and down the Main thoroughfares of Miami during the hot July days, of what a task to get them ready for Sunday School on each Sunday morning for other occasions which are continually coming up in our progressive little city.

You know Miami has got to be well for the want of a better word we will say "a going town"—and the children as well as the "grown ups" have caught the fever.

Of course being model mothers we will require Mrs. Heare to keep a careful watch over each child during our absence and be able to render a good report of her guardianship on our return.

As to what will become of the chickens, the garden or the Jersey cow we consider those things entirely to insignificant to be discussed. We haven't any notion of letting little things like that interfere with such a delightful trip.

The last but by no means least item to be settled on side of finances—and we will leave such an unpleasant subject to be thrashed out later—is clothes.

It may be that we will be in London in time for Princess Mary's wedding, we must be prepared. However, we realize that we are getting into deep water and for fear we are taking to much responsibility we suggest that a committee be appointed from each club to see that the proper wardrobes are prepared.

Complete line of Sherwin-Williams Paints and Varnishes at the White House—covers most, looks best, wears longest—Phone 23.

Wednesday was a holiday and the XX girls day off, so a number of them took advantage of it and went on an all-days picnic. Left town at ten o'clock, all mounted on very high spirited horses. At noon we were only too eager to spread the lunch and we surely did it justice too. After resting a short while we were off again. Rode all afternoon and after making some pictures, we came back to town, each declaring a "mounted" picnic the best ever. P. R.

To wear a smile,
I'd walk a mile
And then I'd walk some more,
For the man worth while
Is the man who can smile
When the rest of the world is sore.

AROUND THE CORNER

Around the corner I have a friend,
In this great city which has no end;
Yet days go by and weeks rush on,
And before I know it a year is gone,
And I never see my old friend's face;
For life is a swift and terrible race.

He knows I like him just as well
As in the days when I rang the bell
And he rang mine. We were younger
then;
And now we are busy men—
Tired with playing a foolish game;
Tired with trying to make a name.

Tomorrow I say, I will call on Jim
Just to show him I'm thinking of him.
But tomorrow comes—and tomorrow
goes;
And the distance between us grows
and grows.

Around the corner!—yet miles away
"Here's a telegram sir," Jim died
today!
And that's what we get—yet deserve
in the end—
Around the corner a vanished friend.
—Chas. Hanson Towne.
In Publishers' Review.

There seems to be considerable of
censure going the rounds for the
action of the jury in the case of Mrs.
Stella Beauchamp, here last week.

Now, we are not going to go into
the merits of this particular case, for
that is none of our business. You
may believe in your own heart, that
the defendant committed the crime
she was accused of. And that is no
body's business but your own.

The jury was sworn to do its duty,
as regards the evidence that was in-
troduced, and their verdict was
brought in as they saw the right. We
feel sure that there was not a man
on that jury who allowed himself to
be influenced by his personal ideas
of the merits of the case. Yes, we
know there are murderers and boot-
leggers acquitted that everyone
knows are guilty as they can be.
But is it our business to censure
every jury that acquits a person ac-
cused of a crime? That tendency to
censure, is one of the things that are
responsible for the present-day lack
of respect for the law. There may
be, and there are, things about our
administration of the law now-a-days
that are not as they should be. If
you have a way figured out whereby
it can be bettered, tell it—where it
will do some good. But don't spend
your time telling around on the
street corners what you would have
done if you had been on the jury.
There are a good many other ways in
which you could spend your time
much more profitably.

NOTHING DOING

Yes this is "Candidate Time" al-
right, as is evidenced by the many
"releases" and marked copies of pa-
pers we are receiving of late. Now
we are extremely glad to do what we
can for deserving fellows who want

POLITICAL ANNOUNCEMENTS

The Chief is authorized by the fol-
lowing persons, to announce their
candidacy for the offices indicated,
subject to the Democratic Primaries in
July.

WANT \$25?
If you have a good imagination
you may be able earn that much.
The Amarillo Advertising club is of-
fering \$25. to the person who sug-
gests a suitable slogan for the City
of Amarillo, to be used in an adver-
tising campaign, for the "Queen of
the Panhandle." The contest closes
the 28th of February, so get your
answers into the Amarillo Advertis-
ing club quick. You may be the
lucky one.

This is the time of year when most
anything in the way of weather may
happen—and then not happen at all.
Tuesday we thought we were to have
a snow storm. Then the sun came
out as bright as a new dollar. Just
so it is in life's troubles and disap-
pointments. Just about the time
things look like a regular blizzard of
blue devils, the sun comes out and the
sun shines as of old and the blue
devils fly away. It would be a terri-
ble old world if things always looked
as dark as we sometimes see them,
and lawze! Storms would be with us
most of the time if it always out to
be the sort of weather that threatens.
Cheer up.—Higgins News.

**ISN'T THERE SOMETHING
WRONG?**

The law, this piece of human im-
perfection, that attempts to regulate
society, and control human passions
and actions, is getting somewhat be-
hind in its job. Military rule be-
comes necessary in some localities
and the hooded K. K. K. seems to be
needed to act as a most efficient
auxiliary.

The daily papers are flooded with
accounts of so-called crimes, mur-
ders, thefts, hold-ups, robberies,
arson, gambling, bigamy, bootleg-
ging, adultery, dance halls, red
lights, and many other acts that are
in violation of law and good govern-
ment. The feeble efforts of our
well-paid judges and prosecuting at-
torneys, the multitude of higher
courts, the costly array of juries and
other court attaches, seem to be un-
availing in the effective administra-
tion of the law.

The futile efforts of our sheriffs
and other peace officers, all speak
volumes in regard to the pitiful con-
dition that our social fabric has
fallen into, and the helplessness of
our courts. A large per cent of our
citizens HATE LAW. They can't
brook restraint. Personal liberty to
them means license, and the right to
do whatever they please to do. Con-
science is a myth, a joke. Every evil
passion is a sacred right. Lie, steal,
kill—if you want to.

When you rise above that strata of
human beings you have left a big
bunch behind you. Cities are breed-
ing thousands of them yearly. The
cave-man was a credit to them.

What is the remedy?
Shall we throw off all the re-
straints of law? Shall we drift back
to the cave-man and his methods of
"might makes right"? Is our so-called
civilization a failure? Is the six
shooter the best arbiter of justice?
Shall vigilance committees become
necessary to protect life and prop-
erty and decent society?

Would it be better to reform our
criminal court procedure and allow
juries and judges to brush aside the
impenetrable maze of technicalities

that now hedges them about and al-
low a verdict to be rendered on com-
mon-sense facts proven? Would it
be better to let a majority of a jury
find a verdict? Or would it be bet-
ter, safer and cheaper to do away en-
tirely with juries and have all cases
tried by, say, three trained judges?
And then to let their verdict be final.
It this plan best? I rather begin to
think so. What do you say?

A Judicious Inquiry.

A well known traveling man who visits the drug trade, says he has often heard druggists ask a customer, who wished to buy a cough medicine, whether it was for a child or an adult and if for a child, they almost invariably recommended Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it and for colds, croup and whooping cough it is unsurpassed.

Arthur, the son of Mrs. Ralph Course, living midway between here and Mobeetie, came very nearly losing his eye, Sunday afternoon, being hit with a shot from a "nigger shooter," in the hands of playmate. Mrs. Course took him to a specialist in Amarillo Sunday evening, and there is now hopes of saving the sight.

Teams and men are busy on the hill south of town, at the end of Mobeetie Street, grading it down, so as to open the street to the road leading out of town south. When this work is completed the grade up the big hill will be considerably reduced, and the dangerous curve at the foot of the hill will be eliminated.

An extra gang has been here for the past several days, and are at work moving the east water crane, to the west, something over one hundred feet, thus making it possible for east bound trains to make only one stop and can both discharge passengers and take water at the same time.

J. L. Kiplinger and wife, who have been at Ontario, Oregon for the past year, returned this week to Miami. Mr. Kiplinger says that that is a mighty fine country out in Oregon, but there is no place on earth that compares with the Panhandle.

B. F. Gray was called to Dallas the first of last week, by the serious illness of his sister, who died shortly after his arrival. Funeral services were held and burial made at Waco, Saturday.

J. R. Durrett returned the last of last week from Albuquerque, N. M., where he had taken Mrs. Durrett to take treatment at a sanitarium. Mrs. Durrett will remain at Albuquerque indefinitely.

Johnnie Holmes went Monday evening to Panhandle, where he will remain during the two weeks term of the District Court there.

Johnnie George returned the last of last week from Wichita, Kansas having finished his course at a business college there.

Dick Reid returned Saturday to childree, after spending some time visiting his parents, Mr. and Mrs. J. A. Reid.

Miss Bessie Billy, of San Francisco, is a visitor this week at the home of her aunt, Mrs. J. F. Johnston.

Samuel Edge, of Mineral Wells, was here the last of last week looking after some business matters.

Joe Cunningham is suffering from a broken arm, as a result of a fall from a horse Sunday afternoon.

Allison Hise and Art Gowin drove to Shamrock last Thursday, and returned home Friday evening.

Mrs. John Wiseley of Canadian, spent the week-end visiting with her sister, Mrs. J. F. Johnston.

Mr. and Mrs. Jimmie Kivlehen, of Mutual, Okla., came in Sunday for a short visit with relatives.

The young son of Ab Smith received a broken arm Sunday, as a result of falling from a horse.

Mrs. Jack Montgomery visited last week with her parents, on the ranch, returning home Sunday.

Mrs. Jap Johnston and Mrs. Pearl Bailey, of Mobeetie, were shopping in Miami, Monday.

Miss Beulah Lee spent Saturday night and Sunday with her parents at White Deer.

Miss Ellen Cannon, of Mobeetie visited over the week-end with friends here.

LOCKE BROS.
"THE HOUSE OF QUALITY"

SOO SOO CLUB

The Soo-Soo Club met with Mrs. Ralph Chisum Tuesday, February 21. Most of the afternoon was spent in sewing; then a short business discussion was held. Afterwards the hostess served a delicious luncheon consisting of chicken salad, sandwiches, coffee, Angel Food and Devil Food cake, and pineapple cream.

Owing to the bad weather only a few of the members and two guests were present. The guests were: Miss Evelyn Sohns, of Amarillo, and Mrs. Rufus Sewell.

J. P. Osborne, of this place, has 5 head of pure bred Herefords entered in the sale that is to be held by the Panhandle Hereford Breeders' Association at Amarillo, today. Frank Pursley took them to Amarillo Monday.

Mrs. O. C. Elliott and Mrs. Sohns, are spending this week with Mrs. Elliott's brother, Pete Mayfield, on Gagesby.

Cleve Coffee returned from Panhandle Tuesday, after attending court there for a couple of days.

Miss Evelyn Sohns, of Amarillo is spending the week here with her mother and sister.

O. G. McCormack was a visitor at Jester Oklahoma, the later part of the week.

Mrs. J. A. Newman visited at Canadian one day the later part of the week.

Miss Edith Simmons visited over Sunday with her parents at White Deer.

Mrs. John Webster visited Sunday and Monday with relatives at Mobeetie.

Sam Ledum was a business visitor at Amarillo Monday and Tuesday.

Miss Nettie Neal, from Pampa, is visiting relatives here this week.

Mrs. J. F. Johnston made a trip Friday to Canadian.

Auto Enamels at the White House. S W P quality.

St. Paul is Exonerated. Men translated the Bible—and twisted St. Paul's remarks about women to suit their own ideas. That is divulged by Miss K. Raleigh to the Women's Freedom league.

The apostle's remarks about women, she said, were badly twisted in translation and it could be proved by the removal of a few dots and commas, that St. Paul did not: Forbid women to preach; command them to obey their husbands; insist that forever and aye, whatever the fashion of the country, they should wear hats in church; say that they should never wear jewelry and fine clothes.

"In the sentence 'Women obey your husbands,'" said Miss Raleigh, "the correct translation of the word, 'obey' is 'be considerate to.'"

Good Logic. A man the other day denied that John Bunyan was the author of "The Pilgrim's Progress." Being vehemently contradicted, he thus replied: "No, I question even if he contributed to the work, for it is impossible that a bunion could contribute to any pilgrim's progress."

Got Something You Want to Sell?

Most people have a piece of furniture, a farm implement, or something else which they have discarded and which they no longer want.

These things are put in the attic, or stored away in the barn, or left lying about, getting of less and less value each year.

WHY NOT SELL THEM?

Sombody wants those very things which have become of no use to you. Why not try to find that somebody by putting a want advertisement in THIS NEWSPAPER?

We always have a complete line of **DRUGS, TOILET ARTICLES, ETC.**

and also everything in

Boston Folk Thought This Was a Free Show

This crowd jammed Newspaper Row, in Boston, when a handout artist gave a free exhibition of his skill, drawing himself from a straight jacket as he was lowered headfirst from a roof. The joke was that it was an exhibition for a big collection was taken up for a charity fund.

Most Awesome of Volcanoes

Kilauea in Hawaii Is Perpetual Show Place, Performing Day and Night.

LAVA IS CONSTANTLY BOILING

Crater Covers an Area of 2,700 Acres and Is Eight Miles in Circumference—Paved Highway Leads to It From Hilo, 30 Miles Away.

Hilo, T. H.—On the island of Hawaii—the big island, as it is called, of the Hawaiian group—is located the only true volcano in the world. It is a perpetual show place, performing day and night and at times putting on a demonstration that is awe-inspiring in its grandeur and magnificent power. On such occasions best specimens are run here from Honolulu and other island towns. It was only last March that Kilauea belched forth a flood of molten lava that flowed in giant streams over the east face of the circular crater that surrounds the active pit of Halemauaua. The big crater covers an area of 2,700 acres and is eight miles around. The pit of constantly boiling, steaming and scorching lava and gas is situated almost in the center of the original crater. The active volcanic pit is more than three miles in circumference.

From a topographical standpoint the volcano of Kilauea has no counterpart. There leads to the very rim of the crater a paved highway, all the way from Hilo, 30 miles. The only road that is given one that a volcano is anywhere around is the white sulphur fumes that may be seen during the day and the glowing red of reflected fire from the fire pit at night.

So easy is the grade of the highway that the rise from sea level to an altitude of 4,000 feet in less than thirty miles is scarcely noticed, except by the increased chilliness of the air. Then suddenly at a turn in the fern-lined road there bursts into view the black, undulating crater of Kilauea, and there comes to one's ears the blessing of the plant kingdom of gas and molten lava in the pit of Halemauaua. The automobile is run through a pass in the outer rim and out upon the hardened lava. The remaining short distance to the performing center is made on foot.

Going to the accessibility this volcano is visited by hundreds of tourists every year. It is in such close contact with the every-day life of the people of the surrounding territory and the home visitors that whatever dangers there may be in its occasional over-

flows are lost sight of. During the eruption of last March some of the visitors came near being cut off by the streams of lava which flowed over the enormous stack that surrounds the main crater. Even small children ventured close to the sizzling columns of molten froth that oozed out of the fiery pit.

Hotel at Crater's Edge.—Upon the very edge of the big crater is built the Volcano house, a modern hotel where the guests may view the performance of the restless monster from the windows of their rooms or from the central chairs upon the veranda. Many times during the day little fountains of molten lava may be seen at the base and on all sides of the boiling white fumes of sulphur constantly pour forth from cracks in the lava formation. The active ground the main crater of Kilauea are to be seen evidences of past restlessness brought by the volcano in three past, all going to show that its present long period of comparative passivity may be only a prelude to another tremendous performance.

It is at Kilauea that the most thorough scientific study of volcanoes and earthquakes ever undertaken is in progress. This work is in charge of Prof. Thomas A. Jaggar, Jr. He conducts an observatory and seismological station upon the brink of the volcano, where every phase and movement of the lava pit and the earth tremors are recorded day by day. This research work has already resulted in many valuable discoveries, some of which promise to be of much practical value in the future. It is asserted.

For one thing, the conclusion has been reached that the underground flow of Kilauea may be used for industrial purposes. At the last session of the Hawaiian legislature a bill was introduced appropriating \$25,000 to make borings in the floor of the big crater to test the heat supply for power purposes. While this measure failed of final passage because of the rush of other measures that were deemed of more importance, it is regarded as practically assured that the next legislature will make the desired appropriation. It is stated that the use of this heat in a large power plant or piping it to sugar mills and other industries could be easily accomplished.

Power Possibility.—"Volcano power for human use is a possibility," said Professor Jaggar, for heat is power, and volcanoes generate heat. Earth steam is used directly near Volterra in Italy. Vast stores of earth steam exist in Japan, Iceland, the Yellowstone and New Zealand. There is no steam pressure at Kilauea, but there is a furnace of oxidizing volcanic chemicals, with sulphuric acid and alum and epsom salts as by-products, so that borings may discover very interesting temperatures and minerals. It is not proposed by boring to tap a steam jet, nor merely to discover hot rock; the bore-hole would immediately cool it off. The source of renewable energy in a volcanic boring is chemical process. Cracks near the pit of Halemauaua in Kilauea volcano have opened from time to time. They get hotter and hotter until they become glowing furnaces, emitting apparently merely hot air. If a boring will start such a furnace, then 20 holes at such a place will run a respectable engine.

Rising to a height of 13,000 feet only a few miles from Kilauea is the great volcano of Mauna Loa, which has intermittent eruptions, the last one of great violence beginning in October, 1919, and continuing for five months, the flow coming from a split in the mountain far down upon its flanks. The black rolls of treacle lava flowed for miles through the mudflats, forests and bare rock slopes, finally emptying into the sea, where giant clouds of steam rose day and night. Myriads of sea fish were killed by the boiling water.

Scientific Possibilities.—Speaking of results that may come from the research work which he is conducting, Professor Jaggar said: "Probably the most far-reaching use

Invention Allows Moving Plane to Take Up Pass

CHICAGO.—An invention recently patented by Charles E. Jones of Cambridge, Mass., designed to make possible the taking up of passengers in an airplane in motion, is being tested at the Massachusetts Institute of Technology. The inventor claims that his device would allow a plane to land and take off without stopping, thus saving time and fuel. The plane would be lowered to the ground by a system of cables and pulleys, and passengers would be able to board or disembark while the plane is still moving. The inventor also claims that his device would allow a plane to take off from a short runway or even from a ship's deck.

Wireless Phones for Commuters

CHICAGOANS who reside in the suburbs may soon find their trains equipped with the wireless telephone so that they can talk with their homes while going to or coming from the city, and can even enjoy grand opera in the evening. The system was tried out recently, and the photograph shows a passenger using the radio phone on a car.

Elements Can Be Transmuted

Dream of Scientists for a Thousand Years Achieved by Dr. Rutherford.

FAR-REACHING POSSIBILITIES

Remarkable Results in Converting Nitrogen into Oxygen, by the Action of Alpha Particles, Has Been Achieved by Dr. Rutherford.

New York.—The transmutation of elements, the dream of alchemists for centuries, is being achieved by Dr. Rutherford. He has converted nitrogen into oxygen by the action of alpha particles. This is the first time that one element has been changed into another. The process is called transmutation. Dr. Rutherford's discovery is a major breakthrough in the field of nuclear physics. It shows that elements are not fixed and unchangeable, but can be transformed into other elements. This has far-reaching implications for the future of science and technology.

The possible far-reaching results of Rutherford's discovery were discussed at a luncheon by Professor O. W. Richardson in his recent presidential address to the Section of Mathematics and Physics of the British Association. "Rutherford has taken the direct method of bombarding the nuclei of the different atoms with the equally minute high-velocity helium nuclei (alpha particles) given off by radioactive substances, and examining the tracks of any other particles which may be generated as a result of the impact.

The amounts of energy which have been thus far released by artificial disintegration of the nuclei are themselves small, but they are enormous in comparison with the minute amount of matter affected. "If these effects can be sufficiently intensified there appears to be two possibilities. Either they will prove uncontrollable, which would presumably spell the end of all things, or they will not. If they can be both in-

vented, I believe, from the disruption of these atoms. "This is certainly the transmutation of elements, but it is done on an infinitely small scale, and is important at present only to the scientific man. It does not promise that elements can be changed from one type to another, except on the smallest laboratory scale. It does not suggest that the transmutation of metals may be developed from it."

The possible far-reaching results of Rutherford's discovery were discussed at a luncheon by Professor O. W. Richardson in his recent presidential address to the Section of Mathematics and Physics of the British Association. "Rutherford has taken the direct method of bombarding the nuclei of the different atoms with the equally minute high-velocity helium nuclei (alpha particles) given off by radioactive substances, and examining the tracks of any other particles which may be generated as a result of the impact.

The amounts of energy which have been thus far released by artificial disintegration of the nuclei are themselves small, but they are enormous in comparison with the minute amount of matter affected. "If these effects can be sufficiently intensified there appears to be two possibilities. Either they will prove uncontrollable, which would presumably spell the end of all things, or they will not. If they can be both in-

ITALY'S WARM FRIEND

Mrs. John A. Drake of New York recently received a letter from Pope Benedict XV in which his holiness bestowed upon her his apostolic benediction for the work which she has done as head of the American Free and Relief for Italy, Inc. She is wearing the many medals bestowed upon her in Italy.

tensified and controlled, then we have at our disposal an almost limitless supply of power which will surely transcend anything hitherto known."

Learns Secret of Arrow Heads

Illinois Man Gets Credit as Only Man Who Knows How to Make Them.

INDIAN CHIEFS LOSE TRICK

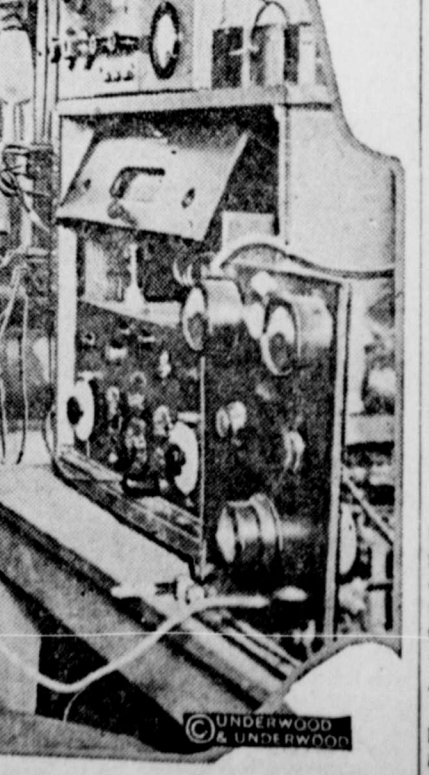

Many of Them Confess Their Ignorance of Just How to Make Arrow Heads—Are Identified by Tribal Marks.

Springfield.—Making of Indian arrow heads has been reduced to its first principles here by Herbert Wells Fay, custodian of the Lincoln monument, who has gained the distinction, which it is said until now has been undisputed, of being the only white man to make real arrow heads.

Indians are among the foremost in crediting Mr. Fay with this ability. Drawn to the last resting place of Abraham Lincoln, various present-day Indian chiefs have openly confessed their ignorance of "just how" to make arrow heads, and then have voiced their surprise at the excellent workmanship of the white man.

Finding that his arrows have been taken for the work of real Indians, Mr. Fay no longer makes arrows of flint, but to prevent fraud uses only glass. Worked Near Dekalb. His study of arrow heads was gained largely near his former home at Dekalb, in which vicinity, he said, there had been seven Indian camps. Mr. Fay takes issue with other authorities who say arrow heads may be identified by their shape as the work of a particular tribe. Years of study and the actual making of arrows prove otherwise, Mr. Fay declares.

Wireless Phones for Commuters

Chicagoans who reside in the suburbs may soon find their trains equipped with the wireless telephone so that they can talk with their homes while going to or coming from the city, and can even enjoy grand opera in the evening. The system was tried out recently, and the photograph shows a passenger using the radio phone on a car.

spoon). They found that the break at the top of the flake faced stone the longer would be the break in the stone, but it would correspondingly wide. They tried, however, a long, narrow piece as suitable for an arrow head.

"They then found that by breaking the stone at a corner they could produce such a 'flake' (raw arrow head), two, or even five times its width according to the skill of the artist. Such an arrow head always has a ridge on one side and the other smooth. The ridge is the corner of the stone from which the flake was broken.

"Next, the Indian found that in striking the arrow head, if the stone breaks easier from one direction than from the other, the stone will break from the other on the bottom. This gave rise to the belief that arrow heads were made to revolve. Such was not the intention of arrow makers, the same natural peculiarity appearing in spear heads, which are not intended to revolve, as spears were expected to go more than a few feet into the ground.

"These principles being true of a stone used by the Indians, it is an admitted impossibility for any collector to tell what tribe made certain arrow heads. The width, depth and thickness, determined by the depth of the fracture of the stone, determine the shape and appearance of the finished product."

Chert Center in Illinois. Most of the arrow heads of the north Mississippi valley, Mr. Fay said, were made of chert, a chalky flint taken from the quarries in Union county, Illinois, near Cairo. The black chert that place along the Mississippi river show outcroppings of the active and prolific evidences of the activity of Indians, who went there from parts of Illinois, Indiana, Iowa and Wisconsin, he added.

"Less than 1 per cent of the arrow heads found in this wide territory," Mr. Fay continued, "seem to have been made from local stone. The Union county quarries have been determined throughout that region corresponded exactly to the quality of the Union county stone. It is not known whether expert 'flake' makers had the quarries in Union county and distributed material to tribes as they came down, or whether each tribe had its flake makers and visited the quarries periodically.

Implement used by Indians in making arrow heads, according to Mr. Fay, were made with one tool, a piece of bone somewhat like the handle of a toothbrush.

WILL BAN GRADE CROSSINGS

United States Will Construct Bridges or Underpasses on Federal Highways.

Washington.—Grade crossings will be eliminated wherever possible and replaced with bridges or underpasses on all roads of the federal aid highway system to be constructed under the federal highway act, the bureau of public roads of the Department of Agriculture announces. Important roads, many of which present cross and recross railroads, grades, hereafter will be built entirely on one side of the railroad. In the three years ending with 1922, according to records available to the bureau, 3,636 lives were lost and 10,644 persons were injured at grade crossings in the United States.

Man Pays Shoemaker's Bill After 42 Years

La Plata, Md.—Wesley Bowie, a retired shoemaker of this town, was much surprised a few days ago by receiving pay for a pair of shoes he made a customer forty-two years ago. At that time Mr. Bowie made for each of three brothers, one of whom was the debtor, a pair of calfskin boots. This man soon left Charles county without paying his bill, and Mr. Bowie had not heard of him since. The debtor made a personal trip to La Plata to pay his bill. He found Mr. Bowie and made himself known to him. He said this was the only bill he owed and he wished to cancel that obligation. He then offered Mr. Bowie a \$10 bill and asked if that would square the deal with him. Mr. Bowie was perfectly willing to close the account for that amount and the matter was settled. The debtor then stated that he has lived in Montgomery county thirty years on one farm.

CHARLES HOPES TO RETURN

Exiled Emperor Calls Hungary His Fatherland and Counts on Loyalty.

Budapest, Hungary.—"I regard Hungary as my fatherland. I am also convinced that I will return to Hungary," Former Emperor Charles is quoted as making this declaration to the correspondent of a Budapest newspaper who interviewed him at Funchal, Madeira, where he is in exile. "I have the highest esteem for the loyalty of Count Andrássy, Count Apponyi and Count Szeged and whatever happens I do not doubt the loyalty of the Hungarian nation," added Charles. Count Hunyadi, a faithful follower of the former emperor, has been obliged to leave Funchal, being unable to bear the expenses of living there.

Oil on Indian Lands.

Billings, Mont.—Enter the Montana Indian oil magnate. The Crows, on their reservation near here, already have begun to receive payment for their oil lands or wells, or both. Oil tracts on the reserve give great promise, it is said, and several Indian millionaires may soon be created. The Crows long since abandoned Indian habits and customs and to a large extent Indian speech. The only difference wealth will make will be in luxury and display.

SISTERS

By KATHLEEN NORRIS

Copyright by Kathleen Norris

CHAPTER XII—Continued.

"Don't hate him," she answered. "Indeed I don't. And it isn't the place and the life, Peter! I'm happy in two rooms—some- anywhere— But not—with Oh, Peter, if I hadn't done it— beauty, as she pushed her plate and leaned toward him, was so that Peter, a lighted match held to a fresh cigarette, put match down aimlessly and looked carefully at the cigarette, and laid down, too, without the faintest consciousness of what he was doing. Happiness on her white forehead, the gold hair dug to the brim of the drooping hat. The soft curve of the babyish shortness of her lip, and the crimson sweet- ness of the little earnest mouth had seemed more lovely than they had today. She was youth incarnate, glowing, flushed, unspooled.

And in that moment Alix came in. She had said good-night half an hour before; she was in her wrapper and her hair fell over one shoulder in a rumpled braid. Cherry, sick with fright, faced her in a sort of horror, unable to realize at that moment that there was nothing betraying in her attitude or Peter's, and nothing in her sister's unsuspecting soul to give significance to what she saw, in any case. Peter, more quickly recovering self-control, went toward his wife.

"Peter!" she said. "Cherry! Look at this! Look at this!" She held the paper out to them, but it was rather at her that they looked, as all three gathered near the hearth again.

"I happened to finish my novel," Alix said, "and I reached for Dad's old Bible—it's been there on the shelf near my bed ever since I was married, and I've even read it, too! But look what was in it—there all this time! It's Uncle Vincent's receipt to Dad for that three thousand that is making all the trouble!" Alix exulted to the still bewildered Cherry. "It's been there all this time—and Cherry," she added in a voice rich with love and memory, "that's what he meant by saying it was in Matthew, don't you remember? Doesn't it mean that, Pete? Isn't it perfectly clear?"

"It means only about fifty thousand for you and Cherry," Peter answered. "Yes sir, by George—it's perfectly clear! He paid it back—every cent of it, and got his receipt! Him—this puts rather a crimp in Little's plans—I'll see him tomorrow. This calls off his suit!"

"Really, Peter?" Alix asked, with dancing eyes. "And it means that you can keep the old house, Cerise," she exclaimed triumphantly, "and we can be together part of the year, anyway! Oh, come on, everybody, and sit down, and let's talk and talk about it! Let me see it again—in recognition of all claims against the patent extinguisher aforementioned—sit down, Pete; it's only ten o'clock! Let's talk. Aren't you simply wild with joy, Cherry?"

world came muffled and dull through the thick mist. Then Peter knelt down beside her chair and gathered her hands together in his own, and she rested her forehead on his, and spent and silent, they remained, not speaking, for a long while. Presently Cherry broke the brooding, misty silence.

"What shall we do?" she asked in a small, tired voice. Peter abruptly got to his feet, took a chair three feet away, and with a quick gesture of his hand and toss of his head, flung back his hair.

"There is only one thing to do, of course," he said decidedly, in a voice unconsciously grim. "We mustn't see each other—we mustn't see each other! Now—now I must think how best to manage that!"

Her eyes, heavy with pain, were raised to meet his, and she saw his mouth weaken with a sudden misgiving, and she saw him try to steady it and look down.

"I can—I shall tell Alix that this new business needs me in town for two or three nights," he said, forcing himself to quiet speech, but with one fine hand propping his forehead as if it ached. "I'll stay at the club."

And as soon as Alix saw that Cherry did feverishly, "I shall join Martin. I'll write him tomorrow—this is Sunday—and I'll go on Wednesday!"

Peter sprang over the porch rail and vanished, walking with swift energy up the trail that led toward the mountain.

For the rest of the day Cherry lived in a sort of daze of emotion; sometimes she seemed to be living two lives, side by side. In the one was her old happy relationship with Alix, and even with Peter, the old joking and talking and gathering for meals, the old hours in the garden or beside the fire, and in the other was the confused

He Seemed Absolutely Dumbfounded.

and troubled and ecstatic consciousness of the new relationship between Peter and herself, the knowledge that he did not merely admire her, did not merely feel for her an unusual affection, but that he was consumed by a burning adoration of her slightest motion, the turn of her wrist, the smile she gave Kow at breakfast time, the motion she made when she stopped to tie her shoe or raised her arm to break an apple from the low, dusty branches. The glory of being so loved enveloped her like a great shining garment, and her cheeks glowed softly rosy, and there was a new and liquid softness, a sort of shining glitter, in her blue eyes.

Peter was quiet that evening, and was gone the next morning when the sisters came out to breakfast. He had left a message to the effect that he would not be at home that night, and at four o'clock telephoned confirming the message. Alix chanced to answer the telephone, and Cherry, who was in her room, heard Peter's name, and stood still, listening with a shock of disappointment.

But at eight o'clock that evening, when she and Alix were sitting on the porch, when the last ebbing pink of the sunset had faded and great spiders had ventured forth into the dusk and the dew, and Cherry knew that it was the gate, and she knew that it was a flood of utter, irrational happiness rose in her heart; she had been racked with hunger for the sound of that voice; she had been restless and unsatisfied, almost feverish with longing and doubt; now peace came again, and content.

He came up to them, his glance resolutely averted from Cherry, explaining that everything went well and making them laugh with an account of Justin Little's reception of the new turn of affairs. "He seemed absolutely dumbfounded," Peter said, laughing and said—in that little nervous, smiling way of his—that he felt it to be by no means conclusive—

"I can hear him!" giggled Alix. "And I guess both you girls will have to come in in a day or two," Peter continued.

"Cherry's going in to the dentist tomorrow," said Alix. "Oh, so I am!" Cherry said in a rather strained voice. She did not look at Peter, nor did he at her, but they felt each other's thoughts like a spoken word.

"Had you forgotten?" Alix asked. "I don't think I'll go in, for I have about a week's work here to do." Peter left them, without one word or look for Cherry, who went back to the house with her sister in a most agitated and wretched state of mind. She had the telephone in her hand, to cancel the engagement with her dentist, when Alix suddenly consented to accompany her into town; and at lunch time will take a chance on the St. Francis, St. Alix said, innocently, "for Peter almost always lunches there."

Feeling that the question was settled, yet restless and unsatisfied still, Cherry dressed for town; they climbed into the car; Alix's firm hands, in yellow chambray gloves, snatched at the wheel; the die was cast.

Yet at the station another change of plan occurred, for as Alix brought the car to the platform Anne came toward them from the arriving train, a gloved and demure and smiling Anne, anxious, she explained, to talk over this newest development, and "whether it proved to be of any value or not," he tried to find out what Uncle Lee had really wanted for them all, and then agree to do that in a friendly manner.

GOOD HIGHWAYS

ROADS CONSTRUCTED IN 1921

Approximately 28,000 Miles Built During Year Just Passed—Materials Lower.

(Prepared by the United States Department of Agriculture.)

Road building has recovered from the setback received during the war, and prospects are bright for the future. Approximately 14,000 miles of road were constructed during the present season by the states in conjunction with federal aid, according to the bureau of public roads, United States Department of Agriculture, and probably an equal amount independent of federal aid. More miles of improved road were built than during any other year.

Costs of road grading and construction with local materials is down practically to the 1914 level. Some reductions, also, have been made in freight rates on road materials. The importance of this item is shown by the fact that in some cases it has been estimated that increased freight rates have added 10 per cent to the cost of a road. Prices of manufactured road materials tend downward; the present level is materially lower than that of a year ago.

With the new appropriation by congress of \$75,000,000, added impetus will be given to new road construction. Many of the states are considering en-

larged amounts of state aid, and the new law will have a tendency to encourage this policy. It will also secure the construction of a system of interstate and intercounty highways, rather than haphazard selection of roads as in some cases in the past.

HEAT INFLUENCES CONCRETE

Discovery Made That Edges Curl Up and Down in Response to Temperature Changes.

That the edges of concrete roads curl up and down in response to changes in temperature is the discovery recently made by the bureau of public roads of the United States Department of Agriculture in the course of experiments at the department's experimental farm at Arlington, Va.

Curling is caused by the unequal expansion and contraction of the upper and lower sides of the concrete slab under the influence of heat. It has been observed during the middle of the day when the surface of the road becomes hot it expands more than the cooler underside and causes the sides to move downward. At night when the surface is cool the contraction causes the edges to rise slightly. The extreme movement may be as much as one-tenth of an inch.

While the warping of the concrete is not in itself detrimental to the road, it may lead to failure of the surface under the wheels of vehicles which travel over it when parts of it are not resting on the ground.

HAUL PRODUCTS TO MARKET

Enormous Amount Carried Over Country Roads Shows Necessity of Better Condition.

The necessity of keeping country roads in good condition is shown by a report recently compiled by the bureau of markets and crop estimates, United States Department of Agriculture, showing the extent to which they are used in hauling farm products to market. According to the report, which shows the tonnage of 11 products hauled on country roads, giving the yearly average for the period from 1915 to 1919, there were 27 tons of these 11 crops hauled for every 100 acres of land. The average tonnage of the 11 crops hauled on country roads each year for the period mentioned amounted to \$8,500,000 tons. The 11 crops referred to in the report are corn, wheat, oats, barley, rye, rice, flaxseed, cotton (including seed), tobacco, potatoes and cultivated hay.

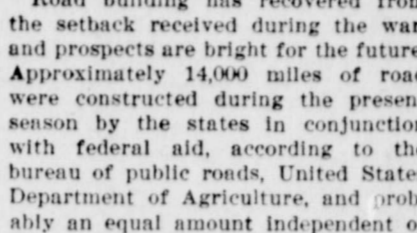

The bureau of animal industry is considering the proposal of the forest service laboratory to start feeding trials with dairy animals in which the wood product will form a part of the ration and the tests will extend for an entire year at least. The hydrolized wood feed for these cows will be made at the laboratory. So far all the stock feed has been made from white pine sawdust. Other soft woods, particularly the western species, will be tried in the future.

Want to Spend \$15,000,000. The Massachusetts department of public works wants to spend \$15,000,000 a year on roads and bridges of the state during the next 20 years.

MONTHS OF SUFFERING

How a Baltimore Girl Recovered Her Health

Baltimore, Maryland.—"For several months I suffered with severe backache and general weakness. I could not sleep comfortably at night for pain in my back. I found your book at home one day and after reading it began at once to take Lydia E. Pinkham's Vegetable Compound. I have had very good results and some of my girl friends are taking it now. You may use this letter to help other girls, as the letters in your book helped me." — ROSE WADSWORTH, 3013 Roseland Place, Baltimore, Md.

That is the thought so often expressed in letters recommending Lydia E. Pinkham's Vegetable Compound. These women know what they have suffered, they describe their symptoms and state how they were finally made well. Just plain statements, but they want other women to be helped. Lydia E. Pinkham's Vegetable Compound is a medicine made from medicinal roots and herbs, and without drugs to relieve the sickness women so often have, which is indicated by backache, weak feelings, nervousness, and no ambition to get anything done or to go anywhere. It has helped many women. Why not try it?

In Gay New York. In full evening dress he appeared in Times square from a side street shortly after nightfall. He stepped, or rather lurched, his way to the middle of the square and in one hand he carried a lighted red lantern. A policeman watched him wandering about for awhile and then went over to him.

"What's the idea of the red lantern?" inquired the cop, with a humorous twinkle in Celtic eyes. "You know, officer," he hiccupped, "it's funny thing. Some fool drunk left this red lantern in front of a great big hole up the street." — New York Times.

Naturally. "What did Mrs. Horner say after her maid-of-all-work departed?" "Help! Help!" — Wayside Tales.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby shirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—advertisement.

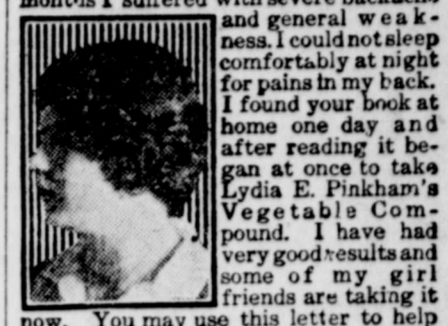

All He Asked. Old Crusty—You ask for my daughter? Why, young man, at your present salary you could not even dress her.

Sultor—Oh, yes, sir! I could keep her in gloves. Old Crusty—Gloves! Do you mean to insinuate that my daughter would wear only gloves?

Sultor—Parlor me, sir; I asked only for her hand. An undiscussed problem grows more complicated.

ACOLD TODAY—DON'T DELAY

ECHOES from M. I. S.

By Students of
MIAMI INDEPENDENT SCHOOL

Tuesday brought us a regular spring shower (?)

Robert Robbins attended a Poland China Hog Sale, Tuesday.

A number of pupils are on the sick list this week.

The Seventh grade gave a very pretty song in chapel last Wednesday. Our Chapel exercises have improved wonderfully since Mrs. Baker has been teaching public school music.

Report cards will be handed out next Wednesday, and the Honor Roll will be published.

The Seniors are anticipating a jolly good time at their Colonial reception February 24th.

Garments made by Domestic Science girls in Clothing I were judged this week by girls in Clothing II. One garment made by Edith Simmons and one made by Effie Cowan will be sent to the girls' Clothing Contest in Houston this spring, these garments having won first place. Other garments will be judged later by some of the women of the community.

Mrs. Ewing entertained Robert's teachers Saturday evening with a dinner. Daintily tinted Japanese cards marked the places of the guests. After a delicious dinner, well seasoned with Judge Ewing's and Mr. Gilley's jokes, "42" was enjoyed until a late hour.

LATIN

All the people died who spoke it, All the people died who wrote it; All the people die who learn it; Blessed death—they surely earn it.

Mr. Gilley—"What is the Latin Race?"

A Fish—"It's a race between a Latin pony and a teacher's goat."

SENIORS' NOTES

The Seniors met February 20th and set the dates for their Graduation Exercises, and also for the Senior play. We also discussed dates for their Baccalaureate Sermon, but no definite one was decided upon.

It was unanimously voted that Mr. N. P. Willis, of Canadian, be asked to deliver the class address.

The debaters are working steadily on their question, and are planning to bring back both the Boys' and Girls' cups this year.

Miss Keevil—"Who was the leading writer in the first half of the eighteenth century?"

Ruby—"Chaucer."

Miss Keevil—"Where do we commence today?"

Willie Fae—"The Revival of Learning."

JUNIOR CLASSIFIED ADS LOST AND FOUND

LOST—A purse containing a love letter and ten pennies. A liberal reward if returned to—A Soph.

LOST—One broken heart. If found please return to Flora Philpott.

FOUND—A comb. By a woman, with three teeth missing.

LOST—Paradise, by Milton.

WANTED—To know where to bum a smoke.—Jack Coffee.

SOPHOMORE DOPE

Our name is just plain "Sophomore" And in number we are strong. And toward the goals of "Junior" We are climbing right along. —Ruby Pennington.

Mr. Crain is a professional "Miner Net" Maker, at least that is what we hear from the Biology class.

When the Biology class went fishing 't'other day, they forgot to take a seine; so the girls used their hair nets and caught many fish.

The Expression classes are working very hard on their declamations, and everyone expects to win.

"FISHIE" JOKES

Ina—"Miss Keevil, how would you say, 'The blue eyed man, in Spanish? Would you say 'the man of blue eyes, or 'the eyes of the blue man'?"

Virginia—"Mrs Baker, do I have my stems going the wrong way?"

Jewel—"What happened the fourth of July? Did Texas get her independence?"

The Sophs (soft heads) can say all they want to about T-H-E-I-R P-L-A-Y" but what about our FRESH. President?

We found last week that all the boys were fond of "courtin'" But what about all the girls? They were all at school.

NOTICE

We will not be home until after five o'clock every day; so if any one wants us before that, call at the school house. —The Poor Fish.

Miss Keevil—"That was a nice little poem Virginia wrote about 'The Busybody' wasn't it?"

Hartwell—"Huh! I'll bet that was one of Harry Kelley's inventions.

At The CHURCHES

FIRST BAPTIST CHURCH
Rev. E. G. Pennington, Pastor

Sunday School, 10:00 a. m., every Sunday.

Preaching, every 1st, 2nd, and 4th Sundays, both morning and evening.

Choir rehearsal every Tuesday evening at 7:30.

Women's Auxiliary, every Wednesday afternoon, at 3: o'clock.

Prayer Meeting every Wednesday evening at 7:30.

"How can a Busy Person Find Time for Reading?" —Miss Morley.

Song.
Business.
Benediction.

CHURCH OF CHRIST
Eld. G. A. Lamberth, Pastor.

Sunday School 10 a. m. every Sunday.

Prayer Meeting and Bible Study every Friday night at 7:30.
Preaching 2nd and 4th Sundays at Miami.
Preaching 1st and 3d Sundays at Laketon.

MISSIONARY SOCIETY

Missionary Society met at the church Wednesday afternoon with seven members present.

Lesson on Cuba Society meets next Wednesday at 2:30 p. m. at the home of Mrs. B. F. Jackson.

A Missionary Voice program will be given. All women of the Methodist church are invited. P. R.

WOMAN'S AUXILIARY

Illness in the homes of Mesdames Will Locke and Carl Certain prevented our ladies from having their Missionary meeting at Mrs. Will Locke's home this week. Nine ladies were present at the church for the meeting. Next week we are to study the second chapter of the W. M. U. Manual, and Mrs. Fred Snyers is Leader. We hope all our Baptist ladies will be able to be with us, and we extend a special invitation to Baptist ladies who have recently moved to our town, to come and work with us. P. R.

PRESBYTERIAN AID

The Presbyterian ladies met with Mrs. Dave Lard Feb. 22d, with seven members present. The meeting was called to order by the Secretary in the absence of the President and Vice-President, and after the formal opening we resumed work on our fancy work.

The next meeting will be Social Day with Mrs. Jack Mead, March 1st. Press Reporter.

LONG-BELL Croceted Posts for the yard or garden—straight and durable—White House Lumber Co.

They Appeal to Our Sympathies

The bilious and dyspeptic are constant sufferers and appeal to our sympathies. Many such, however, have been completely restored to health by the use of Chamberlain's Tablets. These tablets strengthen the stomach, invigorate the liver and improve the digestion. They also cause a gentle movement of the bowels. —When you have any trouble with your stomach, give them a trial.

EDUCATION DE LUXE

It is a far cry from the little red school house on the hill—the school house that wasn't red at all, not even painted—to the modern educational plants enjoyed by the youth of today. Some of us may justly marvel that we ever learned anything back in those days of the three R's, considering what is required for a first-class school today. Or, we might say, the youth of today should outstrip us at every turn of the road, considering the superior advantages he has in the way of schools.

The modern school is a marvel, and if any of us old fogys who attended school twenty-five or—? years ago, doubt that the "would do move" all we have to do is to visit a modern school.

A school that opened in a Texas city a few days ago is described as having "Forty class-rooms and laboratories, a cafeteria, an auditorium, two study halls, library hall, swimming pool, gymnasium, two sets of showers, eight rest-rooms and twelve drinking fountains. The building is absolutely fire-proof, the floors give forth no sound when walked upon, the building is heated by steam and has a system of thermostats to keep a uniform temperature of 70 degrees, etc."

This building has an air circulating system; all class-rooms have private telephones, electric clocks, private lockers for teachers and private book-cases for immediate reference. Outside, the students have a play-

ground 400 by 500 feet.

This is what we might term education De Luxe, and if it doesn't educate, then there must be something wrong with the student.

It hasn't been so long—only yesterday it seems—since we attended a school housed in a two-room, frame building. The windows rattled when the wind blew, the roof leaked and snow and the north winds blew in through cracks. We had a big heating stove in the center of the room, and on unusually cold days we all gathered round to study and play. A bit of philosophy of our teacher was "don't ask people to move back from the fire; make it so hot they'll have to move back." His idea of a good fire was a red-hot stove, and then our faces would blister while our backs popped out with goose-bumps. Lots of shoe leather was burned up in those days; a fellow would get his feet cold and wet and come in and pop them against the stove, leaving them there until the smell of burning leather all but drove us to the open air.

We had desks in those days; big fellows, made by the community jack-of-all-trades. They had initials carved all over them, and instead of being painted, were covered with a coat of pencil marks, ink, chalk and dirt.

But those were the happy days! The new generations may get more "learning," but I'll bet they don't get any more pleasure out of their school days. At least, in after years, the memory won't be any more pleasant than our!—Southwestern Machinery.

Your Opportunity

To buy the best of land at rock-bottom prices on long time with a very small cash payment. All we want down is just enough to show your good intentions.

If you want to put in good cattle, work horses and mules or Liberty Bonds, will accept same as first payment.

A REAL OPPORTUNITY AND REAL BARGAINS

Come to Spearman, Hansford County, Texas at once and get your choice of these lands.
