TO THE CITIZENS OF EASTLAND

All we citizens of Eastland agree that we need medical practitioners and a hospital. We cannot have one without the other.

Obviously no group of individuals is going to donate a hospital to the city, so the only way we can have a hospital and doctors is to erect the hospital ourselves.

The special donation plan has been tried and failed miserably because of its discriminatory features. The only feasible way to erect a city hospital is for we citizens of Eastland to vote a special assesment on ourselves for this purpose, then the hospital will belong to us to do with as we please. The only logical system of assesment would be on the gas meters, the electric meters or the water meters. Since the first two are owned by corporations, no system of collections could be incorporated into the municipality, therefore the only alternative is a special assesment on the water meters. This means that there will be a minimum of additional record keeping and no new personnel will have to be employed. This dollar per meter will be placed in a special hospital fund and used only for that purpose. The hospital administration will become a function of the city commissioners, elected by us, the citizens of Eastland.

A special fund has been set aside for hardship cases, so this will place no burden on those who cannot afford to donate this small amount.

All citizens of Eastland, realizing the urgent need for a hospital, will surely donate one dollar a month for three years to accomplish this goal. However, as with every constructive movement for human welfare, there will be some opponents of this plan. Listen to their objections, ask what alternative they have to offer, then go vote for a hospital for Eastland.

Mrs. Joe Stephen Entertains For Visiting Girls

Mrs. Joe Stephen honored Miss Marion West of Cleveland, house guest of Mable Grimes and Edna Hickman, guest of Mr. and Mrs. Eugene Hickman, Thursday when she entertained members of the Co Ed club, at her home, 101 East Lens Street.

Numbers of the football boys of the Maverick team were hidden throughout the house, and as each girl found a number, she did a stunt to characterize that member of the football squad. Game tables

MRS. M. P. HERRING
Real Estate and Rentals
1002 S. Seaman Phone 726-W

were laid for Bingo, with the prize going to Edith Cox.

Gifts were presented to the honorees by the hostess. Pictures of the group were made on the back terrace and horse shoe pitching was the out door diversion.

Coke bottles, used as bud vases containing arrangements of marigolds, decorated the house, the table arrangement was a carton of Coke bottles containing marigolds embedded in a mass of artificial ice cubes, all of which was placed on a large reflector.

Refreshments of Cokes and cookies was served.

Evelyn Bailey, daughter of Rev. and Mrs. J. Morris Bailey has returned home from visits in Waco and in San Antonio, while in Waco she visited with her cousin, Suzanne Voit and in San Antonio with her uncle Milton H. Bailey and family.

Little Mike Siebert, son of Mr. and Mrs. Wendell Siebert was painfully burned Thursday. While playing in the yard of his grandparent's home, he fell into a trash

Baptist Circles To Meet Monday At The Church

The four circles of the Women's Missionary Union of the First Baptist Church will meet Monday evening at the church for the regular monthly business and social meeting.

The program will be given by members of the Lottie Moon Circle and members of the Blanche Groves Circle will be hostesses.

The other Circles are the Maybelle Taylor circle and the Business Women's circle. All members were urged to attend.

Business Womens Circle Have Picnic Supper

Members of the Business Women's Circle of the WMU of the First Baptist Church met Thursday evening at the City Park for a picnic supper.

The group exchanged secret pal gifts, and spent the evening visiting.

Present were Misses Allean Williams, Lola Laney, Christine Garrard, Betty Price, Verne Allison, and Mrs. Frances Zernial, Eugene Green, Tom Amis, R. L. Young and Hannah Lindsey.

Mrs. Johnson Hosts Meeting of Stitch And Chatter Club

Members of the Stitch and Chatter Club met Wednesday afternoon in the home of Mrs. Fred Johnson, South Ostrum Street.

The afternoon was spent visiting and sewing. Refreshments of ice cream, cake and Cokes was served to Mrs. Wells Dalton, Howard Upchurch, Weldon Armstrong, Wayne Jackson and Gene Haynes by the hostess, Mrs. Johnson.

Mr. and Mrs. Ed T. Cox and Mr. and Mrs. Tom Amis will attend the family reunion Sunday of Mrs. Cox's family, the Barnett Family reunion at Holland Lake in Weatherford.

Make your wash day easy, send your clothes to Fuller's Steam Laundry. Free pick-up delivery service.

Mrs. Ruth Guyton, Mgr.

Friendship Sewing Club Meets In Van Geem Home

Mrs. Will Van Geem entertained members of the Friendship Sewing Club Thursday afternoon at her home, 810 West Moss St.

The afternoon was spent visiting and sewing. Refreshments of pineapple sherbert and cookies with iced tea was served.

Present were Mrs. Bruce Butler, Clyde McBea, Raymond Webb, Eunice Burkhead, Pearl Killough, Winnie Wynn, Clyde Walker, Clyde Mayo, Wilber Stiles, Lon Horn, Millie Britton and a visitor, M. B. Griffin and Mrs. Van Geem, hostess.

The group will meet again July 5th in the home of Mrs. Stiles, 1403 South Seaman St.

Gifts To A&M Are Received

COLLEGE STATION, June 23 (Spl.)—Gifts of items of equipment valued at \$2,140 have been received recently by the Texas Agricultural Experiment Station, according to Dr. R. D. Lewis, director.

Goldthwaite's Texas Toro Company, Ft. Worth, gave a knapsack sprayer with attachments, valued at \$40.

Phillips Chemical Company of Bartlesville, Okla., and Houston gave 7.7 tons of ammonium sulfate and 6.5 tons of ammonium nitrate, plus all transportation cost, all valued at \$2,000.

The Tennessee Corporation, Atlanta, Ga., gave 700 pounds of fertilizer valued at \$100.

In addition, Wyatt Manufacturing Company, Inc., of Salina, Kan., loaned the station a spiral grain loader valued at \$99.

Also loaned the station were four Hereford bulls, with a total value of \$7,500 for use at various substations. The animals were loaned by Thornton & Sons, Pyote; J. V. Williams, Paint Rock; Reid Brothers, Fort Davis; and J. N. Thompson, Waco.

Mrs. Ita Parrish and Mrs. Dora Duncan attended the party Friday evening in Breckenridge given by Mrs. Pauline Hitchcock for members of the art class taught by Gaitha Browning. The class completed their course Friday evening.

Grants Given A&M College

COLLEGE STATION, June 23 (Spl.)—The Texas Agricultural Experiment Station recently has received grants totaling \$7,050 to further its research, Dr. R. D. Lewis, director, has announced.

A grant of \$3,000 was received from Schenley Laboratories, Inc., Lawrenceburg, Ind., to support research conducted by Dr. J. R. Couch of the Poultry Husbandry and Biochemistry and Nutrition departments on the use of procaine penicillin, vitamin B12 and distillers' by-products in the rations of chicks and poults.

The Research and Development Department, Phillips Petroleum Company, Bartlesville, Okla., has contributed \$200 to be used at the Lower Rio Grande Valley Experiment Station for field testing of experimental cotton defoliants. Work is under direction of C. A. Burleson and Dr. W. C. Hall.

A \$1,600 contribution to the station's study of an organizational and economic analysis of agricultural marketing cooperatives of Texas came from the Texas Federation of Cooperatives, Dallas.

If You Need An ELECTRICIAN Call Basham's Electric

DEAD ANIMALS Un-Skinned REMOVED free CALL COLLECT Eastland, 288 BROWNWOOD RENDERING CO.

Abbott Laboratories, North Chicago, Ill., gave \$2,000 to aid studies to determine the effects of arsenic acid and sodium arsenite on growth and reproduction of poultry. The grant will enable employment of a graduate assistant and will help meet other operating expenses.

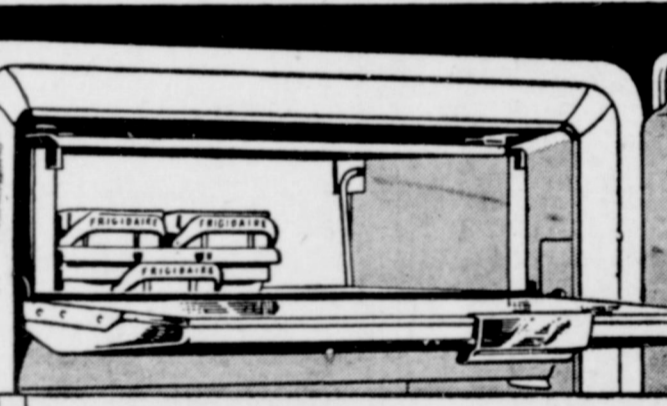

Mrs. Mary Margaret Ryder and son Johnny of Jefferson City, Tenn. are spending the week here with their uncle, R. L. Jones and family.

ANCIENT people thought of the mind of the child as a blank paper or a slate on which parents and neighbors would write what they pleased. There was truth in that figure. Our words and our deeds are forever leaving their marks upon the plastic brain of the child in the midst. Perhaps we would prefer the figure of the moving picture camera. Through the eyes and through the ears, the growing child is recording the scenes and the sounds of the world in which he dwells. Many years hence the picture will flash again before the memory of the man who was once that child. Words spoken in carelessness will leap into speech and the very tones of our voice will be repeated. Innocence and eagerness to learn make the child the ready imitator of that person of whom he thinks well. His conscience, as well as his understanding is learned from us older folk who make up his world of experience. What we are and what we do will speak louder, or will make a deeper impression upon the growing life than will the so-called lessons that teachers seek to impart in the classroom. The world is the classroom and all of us are the teachers. What lessons are we teaching these all-seeing eyes of the child among us?

THE thoughts of a child are long thoughts; they become part of a personality which goes on for years, and perhaps centuries. If we are teaching immortal souls in the school of the every day, then how important is each and every day! We are all responsible for the child who must take his place in the work-a-day world of tomorrow. Perhaps we ought to say he is the child of God and He holds us all responsible for the lessons we are teaching His little child from day to day.

Newspaperman Writes Book Which Will Possibly Sweep US

AUSTIN, June 23—A newspaperman turned historian is the biographer of a newspaperman turned inventor in a new book, "Gail Borden: Dairyman to a Nation" by Joe B. Frantz.

Dr. Frantz, assistant professor of history at the University of Texas, has worked as a reporter on the Weatherford Herald and the Temple Telegram. He teaches business history and modern U.S. history.

Published by the University of Oklahoma Press, Frantz's book has just gone on sale. The professor spent six years gathering material and writing the biography, and he visited 25 places where Borden lived, from Texas to Maine.

Borden came to Texas at the age of 28, in 1829, while the area was still under Mexico. He was Stephen F. Austin's official surveyor, and his newspaper, the Telegraph & Texas Register, was the official paper of the Republic of Texas.

At Galveston, Borden was the first collector of customs and was agent for the Galveston City Company, which originally owned all the land comprising the city of Galveston. During his 12 years as agent, Borden sold more than \$1,500,000 worth of lots, or nearly all the land occupied by modern Galveston.

With two others, he laid out the city of Houston. Active in Texas religious work, Borden was on the Baptist board.

SECOND HAND BARGAINS

We Buy, Sell and Trade
Mrs. Margie Craig
208 W. Commerce

LEGAL EAGLE — A three-career gal is lovely Mari Blanchard, now a Hollywood actress. Once the world's highest paid bathing suit model, she was, before that, a college graduate in international law. She still likes all three jobs, but hopes some day for a thriving law business.

He had a three-year fight to get a patent on the process he invented. Finally he obtained a patent and opened a factory in Connecticut. He went broke. He opened another factory and again he went broke.

Borden was now nearing 60, and his inventions had met with nothing but failure. He had made some money in real estate, but had lost it. Finally he met a New York wholesaler, Jeremiah MILBANK, who agreed to finance one more try at the condensed milk business.

The success of this last effort has resulted in the modern Borden Company, which operates 500 plants throughout the country and does an annual business of \$600,000,000. Borden enjoyed 12 years of success, living to the age of 72.

Frantz became interested in this remarkable character while

making a study of newspapers of the Republic of Texas. Borden's Telegraph & Texas Register operated successively, 1835-1877 in four Texas towns—San Felipe, Columbia, Harrisburg and Houston. In all but San Felipe, it was the first newspaper.

A Gail Borden scholarship in journalism recently was established at the University of Texas by The Borden Company Foundation, Inc. Borden also is remembered because of Borden County, named for him, with its county seat of Gail.

Dr. Frantz has been teaching at the University since 1949. He holds the Philosophy and Master of Arts degrees in history and the Bachelor of Journalism degree from the University. He received a Harvard fellowship in business history in 1948.

A native of Dallas, Frantz

grew up in Fort Worth and Weatherford. His father, E. A. Frantz and grandmother, Mrs. W. B. Buckley, 93, still reside in Weatherford. The teacher's wife, the former Miss Helen Boswell, is the daughter of Dr. G. C. Boswell, president of Ranger Junior College.

Dr. Frantz served in the Navy as a lieutenant during World War II, participating in eight major operations in the Pacific. He was archivist and acting director of San Jacinto Museum at Houston 1942-43.

Buick's newest engine—
the F-263 Fireball—
gives this year's SPECIAL
the highest power in SPECIAL history

Remember - only BUICK has a FIREBALL ENGINE

WE get a chuckle, sometimes, over all the fuss that's being made about "new engines."

You'll note that the key feature of their design in every case is the valve-in-head principle—whether these engines are already in production or still in the dream stage.

Fact is, it takes this design to get the most from "high compression"—and how high you can go depends upon the available fuel. Using this design, wartime aircraft engines operated on 100 octane gasoline.

It also takes this design to get the more-miles-per-gallon which folks like in an automobile.

So what gives us a chuckle is this:

No other type of engine has ever been used in a Buick—which means that Buick owners, all along, have

When you come to check the field you'll find that there's a sweet freedom from roughness to this engine's operation—tracing to the fact that the whole mechanism itself is engineered smooth, and the further fact that every Fireball Engine gets a Micropoise balancing after assembly.

been getting a lot of things that others have just "discovered."

But that's not all. They get something more—vastly more—because today's Fireball Engine has one standout feature found in no other automobile.

That name "Fireball" isn't just a

trick word. It describes what happens in this engine. Inrushing fuel rolls into a swirling ball of gasoline vapor compacted around the spark plug. And when the fat spark sets it off, a cyclone of power lets go.

Of course, a Fireball Engine, being a valve-in-head, keeps pace with high-test fuel, when it comes to "high compression."

But what's more important in the present state of the world is this: A Fireball Engine is designed to handle the not-so-high-test fuel we may be getting in the not-too-distant future.

So, if you want to sample all that's fine in motorcar engines, your Buick dealer is the man to see. Come in soon, and find out what the rest of the world has been missing.

Equipment, accessories, trim and models are subject to change without notice.

EAT YOUR CAKE AND HAVE IT TOO

That's what actually happens when you follow a program of grass-legume rotation with crops, and a permanent pasture.

Crop yields are larger and at the same time soil fertility is built up, when you practice a grass-legume rotation program with crops. That's what we mean by "Eat your cake and have it to."

Permanent pastures for beef cattle, dairy cattle, hogs, sheep and poultry produce more milk and meat of better quality at lower cost for feed and labor.

There's no secret about such a program. Many farmers are doing it.

You can do it on your farm. To get going on such a program first talk to the local Soil Conservation Service man and your County Agent.
