Yes, the crowning typewriter triumph IS HERE!

It is just out-and comes years before experts expected it. For makers have striven a life-time to attain this ideal machine. And Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of touch so light that the tread of a kitten will run the keys!

CAUTION

The new-day advances that come alone on this machine are all controlled by Oliver. Even our own famous models-famous in their day never had the Optional Duplex Shift.

It puts the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 28 keys, the least to operate of any standard typewriter made.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

WARNING

This brilliant new Oliver comes at the oldtime price. It costs no more than lesser makes -now out of date when compared with this discovery

For while the Oliver's splendid new features are costly-we have equalized the added expense to us by simplifying construction.

Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver, it naturally folows that you want the finest model.

Remember this brand new Oliver "9" is the greatest value ever 17 CENTS A DAY given in a typewriter. It has all our previous epecial inventions -visible writing, automatic spacer, 62 -ounce touch-plus the Optional Duplex Snift, Selective Color Attachment and all these other new-day features.

Yet we have decided to sell it to everyone everywhere on our famous payment plan-17 cents a day! Now every user can easily afford to have the world's crack visible writer, with the famous PRINTYPE. that writes like print, included FREE if desired.

TODAY --- Write for Full Details and be among the first to know about this marvel of writ-ing machines. See why typists, employers, and individuals everywhere are flocking to the Oliver. Just mail a postal at ONCE. No obligation. It's a pleasure for us to tell you about it. jan12t11

that everything is clean. The kitcher should be kept scrupulously clean, and the result will be fewer flies and less disease.

This inspection should take place once a week. Every Sunday morning English ships are carefully examined by the captains and other officers. It this were done in every household there would be better health for all. There should be an organization against these insects, and this could be accomplished if people would inform their neighbors of the danger of houseflies. It is also essential that children should know the danger of flies and how to guard against it. Children should be taught by their teachers the importance of a clean school. Much illness will be prevented, doctors' bills will be reduced, the health of all improved, if homes are kept sweet and clean.
